Docketing Clerk means the Office in DOE with which documents for an enforcement action must be filed and which is responsible for maintaining a record and a public docket for enforcement actions commencing with the filing of a Preliminary Notice of Violation. It is also the Office with which in-

terpretations, exemptions, and any other documents designated by the Secretary shall be filed.

DOE means the United States Department of Energy or any predecessor agency.

DOE Nuclear Safety Requirements means the set of enforceable rules, regulations, or orders relating to nuclear safety adopted by DOE (or by another Agency if DOE specifically identifies the rule, regulation, or order) to govern the conduct of persons in connection with any DOE nuclear activity and includes any programs, plans, or other provisions intended to implement these rules, regulations, orders, a Nuclear Statute or the Act, including technical specifications and operational safety requirements for DOE nuclear facilities. For purposes of the assessment of civil penalties, the definition of DOE Nuclear Safety Requirements is limited to those identified in 10 CFR 820.20(b).

DOE Official means the person, or his designee, in charge of making a decision under this part.

Enforcement adjudication means the portion of the enforcement process that commences when a respondent requests an on-the-record adjudication of the assessment of a civil penalty and terminates when a Presiding Officer files an initial decision.

Exemption means the final order that sets forth the relief, waiver, or release, either temporary or permanent, from a DOE Nuclear Safety Requirement, as granted by the appropriate Secretarial Officer pursuant to the provisions of subpart E of this part.

Filing means, except as otherwise specifically indicated, the completion of providing a document to the Office of the Docketing Clerk and serving the document on the person to whom the document is addressed.

Final Notice of Violation means a document issued by the Director in which the Director determines that the respondent has violated or is continuing to violate a DOE Nuclear Safety Requirement and includes:

- (i) A statement specifying the DOE Nuclear Safety Requirement to which the violation relates;
- (ii) A concise statement of the basis for the determination;

§ 820.2

10 CFR Ch. III (1–1–16 Edition)

(iii) Any remedy, including the amount of any civil penalty;

(iv) A statement explaining the reasoning behind any remedy; and

(v) If the Notice assesses a civil penalty, notice of respondent's right:

(A) To waive further proceedings and pay the civil penalty;

(B) To request an on-the-record adjudication of the assessment of the civil penalty; or

(C) To seek judicial review of the assessment of the civil penalty.

Final Order means an order of the Secretary that represents final agency action and, where appropriate, imposes a remedy with which the recipient of the order must comply.

General Counsel means the General Counsel of DOE or his designee.

Hearing means an on-the-record enforcement adjudication open to the public and conducted under the procedures set forth in subpart B of this part.

Initial Decision means the decision filed by the Presiding Officer based upon the record of the enforcement adjudication out of which it arises.

Interpretation means a statement by the General Counsel concerning the meaning or effect of the Act, a Nuclear Statute, or a DOE Nuclear Safety Requirement which relates to a specific factual situation but may also be a ruling of general applicability where the General Counsel determines such action to be appropriate.

NNSA means the National Nuclear Security Administration.

Nuclear Statute means any statute or provision of a statute that relates to a DOE nuclear activity and for which DOE is responsible.

Party means the Director and the respondent in an enforcement adjudication under this part.

Person means any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, Government agency, any State or political subdivision of, or any political entity within a State, any foreign government or nation or any political subdivision of any such government or nation, or other entity and any legal successor, representative, agent or agency of the foregoing; provided that person does not include the

Department or the United States Nuclear Regulatory Commission. For purposes of civil penalty assessment, the term also includes affiliated entities, such as a parent corporation.

Preliminary Notice of Violation means a document issued by the Director in which the Director sets forth the preliminary conclusions that the respondent has violated or is continuing to violate a DOE Nuclear Safety Requirement and includes:

(i) A statement specifying the DOE Nuclear Safety Requirement to which the violation relates;

(ii) A concise statement of the basis for alleging the violation;

(iii) Any proposed remedy, including the amount of any proposed civil penalty; and

(iv) A statement explaining the reasoning behind any proposed remedy.

Presiding Officer means the Administrative Law Judge designated to be in charge of an enforcement adjudication who shall conduct a fair and impartial hearing, assure that the facts are fully elicited, adjudicate all issues, avoid delay, and shall have authority to:

(i) Conduct an adjudicatory hearing under this part;

(ii) Rule upon motions, requests, and offers of proof, dispose of procedural requests, and issue all necessary orders;

(iii) Exercise the authority set forth in § 820.8;

(iv) Admit or exclude evidence;

(v) Hear and decide questions of fact, law, or discretion, except for the validity of regulations and interpretations issued by DOE;

(vi) Require parties to attend conferences for the settlement or simplification of the issues, or the expedition of the proceedings;

(vii) Draw adverse inferences against a party that fails to comply with his orders;

(viii) Do all other acts and take all measures necessary for the maintenance of order and for the efficient, fair and impartial adjudication of issues arising in proceedings governed by these rules.

Remedy means any action necessary or appropriate to rectify, prevent, or penalize a violation of the Act, a Nuclear Statute, or a DOE Nuclear Safety

Department of Energy

§ 820.5

Requirements, including the assessment of civil penalties, the requirement of specific actions, or the modification, suspension or rescission of a contract.

Respondent means any person to whom the Director addresses a Notice of Violation.

Secretarial Officer means an individual who is appointed to a position in the Department by the President of the United States with the advice and consent of the Senate or the head of a departmental element who is primarily responsible for the conduct of an activity under the Act. With regard to activities and facilities covered under E.O. 12344, 42 U.S.C. 7158 note, pertaining to Naval nuclear propulsion, Secretarial Officer means the Deputy Administrator for Naval Reactors.

Secretary means the Secretary of Energy or his designee.

(b) Terms defined in the Act and not defined in these rules are used consistent with the meanings given in the Act.

(c) As used in this part, words in the singular also include the plural and words in the masculine gender also include the feminine and vice versa, as the case may require.

[58 FR 43692, Aug. 17, 1993, as amended at 71 FR 68732, Nov. 28, 2006; 72 FR 31921, June 8, 2007]

§ 820.3 Separation of functions.

(a) *Separation of functions.* After a respondent requests an on-the-record adjudication of an assessment of a civil penalty contained in a Final Notice of Violation, no person shall participate in a decision-making function in an enforcement proceeding if he has been, is or will be responsible for an investigative or prosecutorial function related to that proceeding or if he reports to the person responsible for the investigative or prosecutorial function.

(b) *Director.* The Director shall be responsible for the investigation and prosecution of violations of the DOE Nuclear Safety Requirements. After the request for an enforcement adjudication, the Director shall not discuss *ex parte* the merits of the proceeding with a DOE Official or any person likely to advise the DOE Official in the decision of the proceeding.

(c) *Presiding Officer.* A Presiding Officer shall perform no duties inconsistent with his responsibilities as a Presiding Officer, and will not be responsible to or subject to the supervision or direction of any officer or employee engaged in the performance of an investigative or prosecutorial function. The Presiding Officer may not consult any person other than a member of his staff or a special assistant on any fact at issue unless on notice and opportunity for all parties to participate, except as required for the disposition of *ex parte* matters as authorized by law.

§ 820.4 Conflict of interest.

A DOE Official may not perform functions provided for in this part regarding any matter in which he has a financial interest or has any relationship that would make it inappropriate for him to act. A DOE Official shall withdraw at any time from any action in which he deems himself disqualified or unable to act for any reason. Any interested person may at any time request the General Counsel to disqualify a DOE Official or request that the General Counsel disqualify himself. In the case of an enforcement adjudication, a motion to disqualify shall be made to the Presiding Officer. The request shall be supported by affidavits setting forth the grounds for disqualification of the DOE Official. A decision shall be made as soon as practicable and information may be requested from any person concerning the matter. If a DOE Official is disqualified or withdraws from the proceeding, a qualified individual who has none of the infirmities listed in this section shall replace him.

§ 820.5 Service.

(a) *General rule.* Any document filed with the Docketing Clerk must be served on the addressee of the document and shall not be considered filed until service is complete and unless accompanied by proof of service; provided that the filing with the Docketing Clerk of any document addressed to the DOE Official shall be considered service on the DOE Official.

(b) *Service in an Enforcement Adjudication.* Any document filed in an enforcement adjudication must be served on

§ 820.6

all other participants in the adjudication.

(c) *Who may be served.* Any paper required to be served upon a person shall be served upon him or upon the representative designated by him or by law to receive service of papers. When an attorney has entered an appearance on behalf of a person, service must be made upon the attorney of record.

(d) *How service may be made.* Service may be made by personal delivery, by first class, certified or registered mail or as otherwise authorized or required by the DOE Official. The DOE Official may require service by express mail.

(e) *When service is complete.* Service upon a person is complete:

(1) By personal delivery, on handing the paper to the individual, or leaving it at his office with his clerk or other person in charge or, if there is no one in charge, leaving it in a conspicuous place therein or, if the office is closed or the person to be served has no office, leaving it at his usual place of residence with some person of suitable age and discretion then residing there;

(2) By mail, on deposit in the United States mail, properly stamped and addressed; or

(3) By any other means authorized or required by the DOE Official.

(f) *Proof of service.* Proof of service, stating the name and address of the person on whom served and the manner and date of service, shall be shown for each document filed, and may be made by:

(1) Written acknowledgement of the person served or his counsel;

(2) The certificate of counsel if he has made the service;

(3) The affidavit of the person making the service; or

(4) Any other means authorized or required by the DOE Official.

(g) *Deemed service.* If a document is deemed filed under this part, then the service requirements shall be deemed satisfied when the document is deemed filed.

§ 820.6 Computation and extension of time.

(a) *Computation.* In computing any period of time set forth in this part, except as otherwise provided, the day of the event from which the designated

10 CFR Ch. III (1-1-16 Edition)

period begins to run shall not be included. Saturdays, Sundays, and Federal legal holidays shall be included. When a stated time expires on a Saturday, Sunday or Federal legal holiday, the stated time period shall be extended to include the next business day.

(b) *Extensions of time.* A DOE Official may grant an extension of any time period set forth in this part.

(c) *Service by mail.* Where a pleading or document is served by mail, five (5) days shall be added to the time allowed by these rules for the filing of a responsive pleading or document. Where a pleading or document is served by express mail, only two (2) days shall be added.

§ 820.7 Questions of policy or law.

(a) *Certification.* There shall be no interlocutory appeal from any ruling order, or action decision of a DOE Official except as permitted by this section. A Presiding Officer in an enforcement adjudication may certify, in his discretion, a question to the Secretary, when the order or ruling involves an important question of law or policy concerning which there is substantial grounds for difference of opinion, and either an immediate decision will materially advance the ultimate termination of the proceeding, or subsequent review will be inadequate or ineffective.

(b) *Decision.* The certified question shall be decided as soon as practicable. If the Secretary determines that the question was improvidently certified, or if he takes no action within thirty days of the certification, the certification is dismissed. The Secretary may decide the question on the basis of the submission made by the Presiding Officer or may request further information from any person.

§ 820.8 Evidentiary matters.

(a) *General.* A DOE Official may obtain information or evidence for the full and complete investigation of any matter related to a DOE nuclear activity or for any decision required by this part. A DOE Official may sign, issue and serve subpoenas; administer oaths

and affirmations; take sworn testimony; compel attendance of and sequester witnesses; control dissemination of any record of testimony taken pursuant to this section; subpoena and reproduce books, papers, correspondence, memoranda, contracts, agreements, or other relevant records or tangible evidence including, but not limited to, information retained in computerized or other automated systems in possession of the subpoenaed person.

(b) *Special Report Orders.* A DOE Official may issue a Special Report Order (SRO) requiring any person involved in a DOE nuclear activity or otherwise subject to the jurisdiction of DOE to file a special report providing information relating to a DOE Nuclear Safety Requirement, the Act, or a Nuclear Statute, including but not limited to written answers to specific questions. The SRO may be in addition to any other reports required by this part.

(c) *Extension of Time.* The DOE Official who issues a subpoena or SRO pursuant to this section, for good cause shown, may extend the time prescribed for compliance with the subpoena or SRO and negotiate and approve the terms of satisfactory compliance.

(d) *Reconsideration.* Prior to the time specified for compliance, but in no event more than 10 days after the date of service of the subpoena or SRO, the person upon whom the document was served may request reconsideration of the subpoena or SRO with the DOE Official who issued the document. If the subpoena or SRO is not modified or rescinded within 10 days of the date of the filing of the request, the subpoena or SRO shall be effective as issued and the person upon whom the document was served shall comply with the subpoena or SRO within 20 days of the date of the filing. There is no administrative appeal of a subpoena or SRO.

(e) *Service.* A subpoena or SRO shall be served in the manner set forth in §820.5, except that service by mail must be made by registered or certified mail.

(f) *Fees.* (1) A witness subpoenaed by a DOE Official shall be paid the same fees and mileage as paid to a witness in the district courts of the United States.

(2) If a subpoena is issued at the request of a person other than an officer or agency of the United States, the witness fees and mileage shall be paid by the person who requested the subpoena. However, at the request of the person, the witness fees and mileage shall be paid by the DOE if the person shows:

(i) The presence of the subpoenaed witness will materially advance the proceeding; and

(ii) The person who requested that the subpoena be issued would suffer a serious hardship if required to pay the witness fees and mileage. The DOE Official issuing the subpoena shall make the determination required by this subsection.

(g) *Enforcement.* If any person upon whom a subpoena or SRO is served pursuant to this section, refuses or fails to comply with any provision of the subpoena or SRO, an action may be commenced in the United States District Court to enforce the subpoena or SRO.

(h) *Certification.* (1) Documents produced in response to a subpoena shall be accompanied by the sworn certification, under penalty of perjury, of the person to whom the subpoena was directed or his authorized agent that a diligent search has been made for each document responsive to the subpoena, and to the best of his knowledge, information, and belief all such documents responsive to the subpoena are being produced unless withheld on the grounds of privilege pursuant to paragraph (i) of this section.

(2) Any information furnished in response to an SRO shall be accompanied by the sworn certification under penalty of perjury of the person to whom it was directed or his authorized agent who actually provides the information that to the best of his knowledge, information and belief a diligent effort has been made to provide all information required by the SRO, and all information furnished is true, complete, and correct unless withheld on grounds of privilege pursuant to paragraph (i) of this section.

(3) If any document responsive to a subpoena is not produced or any information required by an SRO is not furnished, the certification shall include a statement setting forth every reason

§ 820.9

for failing to comply with the subpoena or SRO.

(i) *Withheld information.* If a person to whom a subpoena or SRO is directed withholds any document or information because of a claim of attorney-client or other privilege, the person submitting the certification required by paragraph (h) of this section also shall submit a written list of the documents or the information withheld indicating a description of each document or information, the date of the document, each person shown on the document as having received a copy of the document, each person shown on the document as having prepared or been sent the document, the privilege relied upon as the basis for withholding the document or information, a memorandum of law supporting the claim of privilege, and an identification of the person whose privilege is being asserted.

(j) *Statements/testimony.* (1) If a person's statement/testimony is taken pursuant to a subpoena, the DOE Official shall determine whether the statement/testimony shall be recorded and the means by which it is recorded.

(2) A person whose statement/testimony is recorded may procure a copy of the transcript by making a written request for a copy and paying the appropriate fees. Upon proper identification, any potential witness or his attorney has the right to inspect the official transcript of the witness' own statement or testimony.

(k) *Sequestration.* The DOE Official may sequester any person who furnishes documents or gives testimony. Unless permitted by the DOE Official, neither a witness nor his attorney shall be present during the examination of any other witnesses.

(l) *Attorney.* (1) Any person whose statement or testimony is taken may be accompanied, represented and advised by his attorney; provided that, if the witness claims a privilege to refuse to answer a question on the grounds of self-incrimination, the witness must assert the privilege personally.

(2) The DOE Official shall take all necessary action to regulate the course of testimony and to avoid delay and prevent or restrain contemptuous or obstructionist conduct or contemptuous language. The DOE Official may

10 CFR Ch. III (1-1-16 Edition)

take actions as the circumstances may warrant in regard to any instances where any attorney refuses to comply with directions or provisions of this section.

§ 820.9 Special assistant.

A DOE Official may appoint a person to serve as a special assistant to assist the DOE Official in the conduct of any proceeding under this part. Such appointment may occur at any appropriate time. A special assistant shall be subject to the disqualification provisions in § 820.5. A special assistant may perform those duties assigned by the DOE Official, including but not limited to, serving as technical interrogators, technical advisors and special master.

§ 820.10 Office of the docketing clerk.

(a) *Docket.* The Docketing Clerk shall maintain a docket for enforcement actions commencing with the issuance of a Preliminary Notice of Violation, interpretations issued pursuant to subpart D of this part, exemptions issued pursuant to subpart E of this part, and any other matters designated by the Secretary. A docket for an enforcement action shall contain all documents required to be filed in the proceeding.

(b) *Public inspection.* Subject to the provisions of law restricting the public disclosure of certain information, any person may, during Department business hours, inspect and copy any document filed with the Docketing Clerk. The cost of duplicating documents shall be borne by the person seeking copies of such documents. The DOE Official may waive this cost in appropriate cases.

(c) *Transcript.* Except as otherwise provided in this part, after the filing of a Preliminary Notice of Violation, all hearings, conferences, and other meetings in the enforcement process shall be transcribed verbatim. A copy of the transcript shall be filed with the Docketing Clerk promptly. The Docketing Clerk shall serve all participants with notice of the availability of the transcript and shall furnish the participants with a copy of the transcript upon payment of the cost of reproduction, unless a participant can show that the cost is unduly burdensome.

§ 820.11 Information requirements.

(a) Any information pertaining to a nuclear activity provided to DOE by any person or maintained by any person for inspection by DOE shall be complete and accurate in all material respects.

(b) No person involved in a DOE nuclear activity shall conceal or destroy any information concerning a violation of a DOE Nuclear Safety Requirement, a Nuclear Statute, or the Act.

§ 820.12 Classified, confidential, and controlled information

(a) *General rule.* The DOE Official in charge of a proceeding under this part may utilize any procedures deemed appropriate to safeguard and prevent disclosure of classified, confidential, and controlled information, including Restricted Data and National Security Information, to unauthorized persons, with minimum impairment of rights and obligations under this part.

(b) *Obligation to protect restricted information.* Nothing in this part shall relieve any person from safeguarding classified, confidential, and controlled information, including Restricted Data or National Security Information, in accordance with the applicable provisions of federal statutes and the rules, regulations, and orders of any federal agency.

§ 820.13 Direction to NNSA contractors.

(a) Notwithstanding any other provision of this part, and pursuant to section 3213 of Pub. L. 106-65, as amended (codified at 50 U.S.C. 2403), the NNSA, rather than the Director, signs, issues and serves the following actions that direct NNSA contractors:

- (1) Subpoenas;
- (2) Orders to compel attendance;
- (3) Disclosures of information or documents obtained during an investigation or inspection;
- (4) Preliminary notices of violations;
- and
- (5) Final notices of violations.

(b) The NNSA Administrator shall act after consideration of the Director's recommendation.

[72 FR 31921, June 8, 2007]

Subpart B—Enforcement Process**§ 820.20 Purpose and scope.**

(a) *Purpose.* This subpart establishes the procedures for investigating the nature and extent of violations of the DOE Nuclear Safety Requirements, for determining, whether a violation has occurred, for imposing an appropriate remedy, and for adjudicating the assessment of a civil penalty.

(b) *Basis for civil penalties.* DOE may assess civil penalties against any person subject to the provisions of this part who has entered into an agreement of indemnification under 42 U.S.C. 2210(d) (or any subcontractor or supplier thereto), unless exempted from civil penalties as provided in paragraph (c) of this section, on the basis of a violation of:

- (1) Any DOE Nuclear Safety Requirement set forth in the Code of Federal Regulations;
- (2) Any Compliance Order issued pursuant to subpart C of this part; or
- (3) Any program, plan or other provision required to implement any requirement or order identified in paragraphs (b)(1) or (b)(2) of this section.

(c) *Exemptions.* With respect to a violation occurring under a contract entered into before August 8, 2005, the following contractors, and subcontractors and suppliers to that prime contract only, are exempt from the assessment of civil penalties under this subpart with respect to the activities specified below:

- (1) The University of Chicago for activities associated with Argonne National Laboratory;
- (2) The University of California for activities associated with Los Alamos National Laboratory, Lawrence Livermore National Laboratory, and Lawrence Berkeley National Laboratory;
- (3) American Telephone and Telegraph Company and its subsidiaries for activities associated with Sandia National Laboratories;
- (4) University Research Association, Inc. for activities associated with FERMI National Laboratory;
- (5) Princeton University for activities associated with Princeton Plasma Physics Laboratory;

§ 820.21

10 CFR Ch. III (1–1–16 Edition)

(6) The Associated Universities, Inc. for activities associated with the Brookhaven National Laboratory; and

(7) Battelle Memorial Institute for activities associated with Pacific Northwest Laboratory.

(d) *Nonprofit educational institutions.* With respect to a violation occurring under a contract entered into before August 8, 2005, any educational institution that is considered nonprofit under the United States Internal Revenue Code shall receive automatic remission of any civil penalty assessed under this part.

(e) *Limitation for not-for-profits.* With respect to any violation occurring under a contract entered into on or after August 8, 2005, in the case of any not-for-profit contractor, subcontractor, or supplier, the total amount of civil penalties paid under this part may not exceed the total amount of fees paid by DOE to that entity within the U.S. Government fiscal year in which the violation occurs.

(f) *Not-for-profit.* For purposes of this part, a “not-for-profit” contractor, subcontractor, or supplier is one for which no part of the net earnings of the contractor, subcontractor, or supplier inures to the benefit of any natural person or for-profit artificial person.

[58 FR 43692, Aug. 17, 1993, as amended at 74 FR 11843, Mar. 20, 2009]

§ 820.21 Investigations.

(a) The Director may initiate and conduct investigations and inspections relating to the scope, nature and extent of compliance by a person with the Act and the DOE Nuclear Safety Requirements and take such action as he deems necessary and appropriate to the conduct of the investigation or inspection, including any action pursuant to § 820.8.

(b) Any person may request the Director to initiate an investigation or inspection pursuant to paragraph (a) of this section. A request for an investigation or inspection shall set forth the subject matter or activity to be investigated or inspected as fully as possible and include supporting documentation and information. No particular forms or procedures are required.

(c) Any person who is requested to furnish documentary evidence, information or testimony in an investigation or during an inspection shall be informed, upon written request, of the general purpose of the investigation or inspection.

(d) Information or documents that are obtained during any investigation or inspection shall not be disclosed unless the Director directs or authorizes the public disclosure of the investigation. Upon such authorization, the information or documents are a matter of public record and disclosure is not precluded by the Freedom of Information Act, 5 U.S.C. 552 and 10 CFR part 1004. A request for confidential treatment of information for purposes of the Freedom of Information Act shall not prevent disclosure by the Director if disclosure is determined to be in the public interest and otherwise permitted or required by law.

(e) During the course of an investigation or inspection any person may submit at any time any document, statement of facts or memorandum of law for the purpose of explaining the person's position or furnish information which the person considers relevant to a matter or activity under investigation or inspection.

(f) If facts disclosed by an investigation or inspection indicate that further action is unnecessary or unwarranted, the investigation may be closed without prejudice to further investigation or inspection by the Director at any time that circumstances so warrant.

(g) The Director may issue enforcement letters that communicate DOE's expectations with respect to any aspect of the requirements of DOE's Nuclear Safety Requirements, including identification and reporting of issues, corrective actions, and implementation of DOE's Nuclear Safety Requirements, provided that an enforcement letter may not create the basis for any legally enforceable requirement pursuant to this part.

(h) The Director may sign, issue and serve subpoenas.

[58 FR 43692, Aug. 17, 1993, as amended at 72 FR 31921, June 8, 2007]

Department of Energy

§ 820.24

§ 820.22 Informal conference.

The Director may convene an informal conference to discuss any situation that might be a violation of the Act or a DOE Nuclear Safety Requirement, its significance and cause, any correction taken or not taken by the person, any mitigating or aggravating circumstances, and any other useful information. The Director may compel a person to attend the conference. This conference will not normally be open to the public and there shall be no transcript.

§ 820.23 Consent order.

(a) *Settlement policy.* DOE encourages settlement of an enforcement proceeding at any time if the settlement is consistent with the objectives of the Act and the DOE Nuclear Safety Requirements. The Director and a person may confer at any time concerning settlement. These settlement conferences shall not be open to the public and there shall be no transcript.

(b) *Consent order.* Notwithstanding any other provision of this part, DOE may at any time resolve any or all issues in an outstanding enforcement proceeding with a Consent Order. A Consent Order must be signed by the Director and the person who is its subject, or a duly authorized representative, must indicate agreement to the terms contained therein and must be filed. A Consent Order need not constitute an admission by any person that the Act or a DOE Nuclear Safety Requirement has been violated, nor need it constitute a finding by the DOE that such person has violated the Act or a DOE Nuclear Safety Requirement. A Consent Order shall, however, set forth the relevant facts which form the basis for the Order and what remedy, if any, is imposed.

(c) *Effect on enforcement adjudication.* If a Consent Order is signed after the commencement of an enforcement adjudication, the adjudication of the issues subject to the Consent Order shall be stayed until the completion of the Secretarial Review Process. If the Consent Order becomes a Final Order, the adjudication shall be terminated or modified as specified in the Order.

(d) *Secretarial review.* A Consent Order shall become a Final Order 30 days

after it is filed unless the Secretary files a rejection of the Consent Order or a Modified Consent Order. A Modified Consent Order shall become a Final Order if the Director and the person who is its subject sign it within 15 days of its filing.

§ 820.24 Preliminary notice of violation.

(a) If the Director has reason to believe a person has violated or is continuing to violate a provision of the Act or a DOE Nuclear Safety Requirement, he may file a Preliminary Notice of Violation. The Notice and any transmittal documents shall contain sufficient information to fairly apprise the respondent of the facts and circumstances of the alleged violations and the basis of any proposed remedy, and to properly indicate what further actions are necessary by or available to respondent.

(b) Within 30 days after the filing of a Preliminary Notice of Violation, the respondent shall file a reply.

(c) The reply shall be in writing and signed by the person filing it. The reply shall contain a statement of all relevant facts pertaining to the situation that is the subject of the Notice. The reply shall state any facts, explanations and arguments which support a denial that a violation has occurred as alleged; demonstrate any extenuating circumstances or other reason why the proposed remedy should not be imposed or should be mitigated; and furnish full and complete answers to the questions set forth in the Notice. Copies of all relevant documents shall be submitted with the reply. The reply shall include a discussion of the relevant authorities which support the position asserted, including rulings, regulations, interpretations, and previous decisions issued by DOE.

(d) The respondent may terminate an enforcement action if the reply agrees to comply with the proposed remedy and waives any right to contest the Notice or the remedy. If a respondent elects this option, the Preliminary Notice of Violation shall be deemed a Final Order upon the filing of the reply.

§ 820.25

§ 820.25 Final notice of violation.

(a) *General rule.* If, after reviewing the reply submitted by the respondent, the Director determines that a person violated or is continuing to violate a provision of the Act or a DOE Nuclear Safety Requirement, he may file a Final Notice of Violation. The Final Notice shall concisely state the determined violation, any designated penalty, and further actions necessary by or available to respondent.

(b) *Effect of final notice.* (1) If a Final Notice of Violation does not contain a civil penalty, it shall be deemed filed as a Final Order 15 days after the Final Notice is filed unless the Secretary files a Final Order which modifies the Final Notice.

(2) If a Final Notice of Violation contains a civil penalty, the respondent must file within 30 days after the filing of the Final Notice:

- (i) A waiver of further proceedings;
- (ii) A request for an on-the-record adjudication; or
- (iii) A notice of intent to seek judicial review.

(c) *Effect of waiver.* If a respondent waives further proceedings, the Final Notice of Violation shall be deemed a Final Order enforceable against the respondent. The respondent must pay any civil penalty set forth in the Notice of Violation within 60 days of the filing of waiver unless the Director grants additional time.

(d) *Effect of request.* If a respondent files a request for an on-the-record adjudication, then an enforcement adjudication commences.

(e) *Effect of notice of intent.* If a respondent files a Notice of Intent, the Final Notice of Violation shall be deemed a Final Order enforceable against the respondent.

(f) *Amendment.* The Director may amend the Final Notice of Violation at any time before an action takes place pursuant to paragraph (b) of this section. An amendment shall add fifteen days to the time periods under paragraph (b) of this section.

(g) *Withdrawal.* The Director may withdraw the Final Notice of Violation, or any part thereof, at any time before an action under paragraph (b) of this section.

10 CFR Ch. III (1-1-16 Edition)

§ 820.26 Enforcement adjudication.

If a respondent files a request for an on-the-record adjudication, an enforcement adjudication is initiated and the Docketing Clerk shall notify the Secretary who shall appoint an Administrative Law Judge to be the Presiding Officer.

§ 820.27 Answer.

(a) *General.* If a respondent files a request for an on-the-record adjudication pursuant to § 820.25, a written answer to the Final Notice of Violation shall be filed at the same time the request is filed.

(b) *Contents of the answer.* The answer shall clearly and directly admit, deny or explain each of the factual allegations contained in the Final Notice of Violation with regard to which respondent has any knowledge, information or belief. Where respondent has no knowledge, information or belief of a particular factual allegation and so states, the allegation is deemed denied. The answer shall also state the circumstance or argument that is alleged to constitute the grounds of defense and the facts that respondent intends to place at issue.

(c) *Failure to admit, deny, or explain.* Failure of respondent to admit, deny, or explain any material factual allegation contained in the Final Notice of Violation constitutes an admission of the allegation.

(d) *Amendment of the answer.* The respondent may amend the answer to the Final Notice of Violation upon motion granted by the Presiding Officer.

§ 820.28 Prehearing actions.

(a) *General.* The Presiding Officer shall establish a schedule for the adjudication and take such other actions as he determines appropriate to conduct the adjudication in a fair and expeditious manner.

(b) *Prehearing conference.* The Presiding Officer, at any time before a hearing begins, may direct the parties and their counsel, or other representatives, to appear at a conference before him to consider, as appropriate:

- (1) The settlement of the case;
- (2) The simplification of issues and stipulation of facts not in dispute;

Department of Energy

§ 820.29

(3) The necessity or desirability of amendments to pleadings;

(4) The exchange of exhibits;

(5) The limitation of the number of expert or other witnesses;

(6) Setting a time and place for the hearing; and

(7) Any other matters that may expedite the disposition of the proceeding.

(c) *Exchange of witness lists and documents.* Unless otherwise ordered by the Presiding Officer, at least five (5) days before any prehearing conference, each party shall make available to all other parties, as appropriate, the names of the expert and other witnesses it intends to call, together with a brief narrative summary of their expected testimony, and copies of all documents and exhibits that each party intends to introduce into evidence. Documents and exhibits shall be marked for identification as ordered by the Presiding Officer. Documents that have not been exchanged and witnesses whose names have not been exchanged shall not be introduced into evidence or allowed to testify without permission of the Presiding Officer. The Presiding Officer shall allow the parties reasonable opportunity to review new evidence.

(d) *Prehearing conference order.* The Presiding Officer shall prepare an order incorporating any action taken at the conference. The summary shall incorporate any written stipulations or agreements of the parties and all rulings and appropriate orders containing directions to the parties.

(e) *Alternative to prehearing conference.* If a prehearing conference is unnecessary or impracticable, the Presiding Officer, on motion or *sua sponte*, may direct the parties to make appropriate filings with him to accomplish any of the objectives set forth in this section.

(f) *Other discovery.* (1) Except as provided by paragraph (c) of this section, further discovery under this section shall be permitted only upon determination by the Presiding Officer:

(i) That such discovery will not in any way unreasonably delay the proceeding;

(ii) That the information to be obtained is not otherwise obtainable; and

(iii) That such information has significant probative value.

(2) The Presiding Officer shall order depositions upon oral questions only upon a showing of good cause and upon a finding that:

(i) The information sought cannot be obtained by alternative methods; or

(ii) There is substantial reason to believe that relevant and probative evidence may otherwise not be preserved for presentation by a witness at the hearing.

(3) Any party to the proceeding desiring an order to take further discovery shall make a motion therefor. Such a motion shall set forth:

(i) The circumstances warranting the taking of the discovery;

(ii) The nature of the information expected to be discovered; and

(iii) The proposed time and place where it will be taken. If the Presiding Officer determines that the motion should be granted, he shall issue an order for the taking of such discovery together with the conditions and terms thereof.

(4) When the information sought to be obtained is within the control of one of the parties, failure to comply with an order issued pursuant to this paragraph may lead to the inference that the information to be discovered would be adverse to the party from whom the information was sought, or the issuance of a default order under 820.38.

§ 820.29 Hearing.

(a) *General.* Except as otherwise provided by this part or the Presiding Officer, a hearing shall be conducted in accordance with the Federal Rules of Evidence. The Presiding Officer shall have the discretion to admit all evidence that is not irrelevant, immaterial, unduly repetitious, or otherwise unreliable or of little probative value, if he believes the evidence might facilitate the fair and expeditious resolution of the proceeding. But such evidence may be reasonably limited by the Presiding Officer in scope and length in order to permit prompt resolution of the proceeding. In the presentation, admission, disposition, and use of evidence, the Presiding Officer shall preserve the confidentiality of trade secrets and other commercial and financial information, and shall protect classified and

§ 820.30

unclassified controlled nuclear information, as well as any other information protected from public disclosure pursuant to law or regulation. The confidential, trade secret, or classified or otherwise protected status of any information shall not, however, preclude its being introduced into evidence. The Presiding Officer may make such orders as may be necessary to consider such evidence in camera, including the preparation of a supplemental initial decision to address questions of law, fact, or discretion that arise out of that portion of the evidence that is confidential, includes trade secrets, is classified, or is otherwise protected.

(b) *Subpoenas.* The attendance of witnesses or the production of documentary evidence may be required by subpoena.

(c) *Examination of witnesses.* There shall be no direct oral testimony by witnesses, except as permitted by the Presiding Officer. In lieu of oral testimony, the Presiding Officer shall admit into the record as evidence verified written statements of fact or opinion prepared by a witness. The admissibility of the evidence contained in the statement shall be subject to the same rules as if the testimony were produced under oral examination. Before any such statement is read or admitted into evidence, the witness shall have delivered a copy of the statement to the Presiding Officer and the opposing counsel not less than 10 days prior to the date the witness is scheduled to testify. The witness presenting the statement shall swear or affirm that the statement is true and accurate to the best of his knowledge, information, and belief and shall be subject to appropriate oral cross-examination upon the contents thereof provided such cross-examination is not unduly repetitious.

(d) *Burden of presentation; burden of persuasion.* The Director has the burden of going forward with and of proving that the violation occurred as set forth in the Notice of Violation and that the proposed civil penalty is appropriate. Following the establishment of a *prima facie* case, respondent shall have the burden of presenting and of going forward with any defense to the allegations set forth in the Notice of Viola-

10 CFR Ch. III (1-1-16 Edition)

tion. Each matter of controversy shall be determined by the Presiding Officer upon a preponderance of the evidence.

§ 820.30 Post-hearing filings.

Within fifteen days after the filing of the transcript of the hearing, or within such longer time as may be fixed by the Presiding Officer, any party may file for the consideration of the Presiding Officer, proposed findings of fact, conclusions of law, and a proposed order, together with briefs in support thereof. Reply briefs may be filed within ten days of the filing of briefs. All filings shall be in writing, shall be served upon all parties, and shall contain adequate references to the record and authorities relied on.

§ 820.31 Initial decision.

(a) *Initial Decision.* The Presiding Officer shall file an Initial Decision as soon as practicable after the period for filing reply briefs under 820.30 has expired. The Initial Decision shall contain findings of fact, conclusions regarding all material issues of law or discretion, as well as reasons therefor, any remedy and a proposed Final Order. A party may file comments on an Initial Decision within fifteen days of its filing.

(b) *Amount of civil penalty.* If the Presiding Officer determines that a violation has occurred and that a civil penalty is appropriate, the Initial Decision shall set forth the dollar amount of the civil penalty. If the Presiding Officer decides to assess a penalty different in amount from the penalty assessed in the Final Notice of Violation, the Initial Decision shall set forth the specific reasons for the increase or decrease.

§ 820.32 Final order.

(a) *Effect of Initial Decision.* The Initial Decision shall be deemed filed as a Final Order thirty days after the filing of the Initial Decision unless the Secretary files a Final Order that modifies the Initial Decision or the Secretary files a Notice of Review.

(b) *Notice of review.* If the Secretary files a Notice of Review, he shall file a Final Order as soon as practicable after completing his review. The Secretary may, at his discretion, order additional

Department of Energy

§ 820.35

procedures, remand the matter or modify the remedy, including an increase or decrease in the amount of the civil penalty from the amount recommended to be assessed in the Initial Decision.

(c) *Payment of a civil penalty.* The respondent shall pay the full amount of any civil penalty assessed in the Final Order within thirty (30) days after the Final Order is filed unless otherwise agreed by the parties.

§ 820.33 Default order.

(a) *Default.* The Presiding Officer, upon motion by a party or the filing of a Notice of Intent to issue a Default Order *sua sponte*, may find a party to be in default if the party fails to comply with the provisions of this part or an order of the Presiding Officer. The alleged defaulting party shall have ten days to answer the motion or the Notice of Intent. No finding of default shall be made against the respondent unless the Director presents sufficient evidence to the Presiding Officer to establish a *prima facie* case against the respondent. Default by respondent constitutes, for purposes of the pending action only, an admission of all facts alleged in the Final Notice of Violation and a waiver of respondent's rights to an on-the-record adjudication of such factual allegations. Default by the Director shall result in an order to dismiss the Final Notice of Violation with prejudice.

(b) *Effect of default order.* When the Presiding Officer finds a default has occurred, he shall file a Default Order against the defaulting party. This order shall constitute an Initial Decision.

(c) *Contents of a default order.* A Default Order shall include findings of fact showing the grounds for the order, conclusions regarding all material issues of fact, law or discretion, and the remedy.

§ 820.34 Accelerated decision.

(a) *General.* The Presiding Officer, upon motion of any party or *sua sponte*, may at any time render an Accelerated Decision in favor of the Director or the respondent as to all or any part of the adjudication, without further hearing or upon such limited additional evidence, such as affidavits, as he may re-

quire, if no genuine issue of material fact exists and a party is entitled to judgment as a matter of law, as to all or any part of the adjudication. In addition, the Presiding Officer, upon motion of the respondent, may render at any time an Accelerated Decision to dismiss an action without further hearing or upon such limited additional evidence as he requires, on the basis of failure to establish a *prima facie* case or other grounds that show no right to relief on the part of the Director.

(b) *Effect of Accelerated Decision.* (1) If an Accelerated Decision is rendered as to all the issues and claims in the adjudication, the decision constitutes an Initial Decision of the Presiding Officer, and shall be filed with the Docketing Clerk.

(2) If an Accelerated Decision is rendered on less than all issues or claims in the adjudication, the Presiding Officer shall determine what material facts exist without substantial controversy and what material facts remain controverted in good faith. He shall thereupon file an interlocutory order specifying the facts that appear substantially uncontroverted, and the issues and claims upon which the adjudication will proceed.

§ 820.35 Ex parte discussions.

At no time after a respondent has requested an on-the-record adjudication of the assessment of a civil penalty shall a DOE Official, or any person who is likely to advise a DOE Official in the decision on the case, discuss *ex parte* the merits of the proceeding with any interested person outside DOE, with any DOE staff member who performs a prosecutorial or investigative function in such proceeding or a factually related proceeding, or with any representative of such person. Any *ex parte* memorandum or other communication addressed to a DOE Official during the pendency of the proceeding and relating to the merits thereof, by or on behalf of any party shall be regarded as argument made in the proceeding and shall be served upon all other parties. Any oral communication shall be set forth in a written memorandum and served on all other parties. The other parties shall be given an opportunity

§ 820.36

to reply to such memorandum or communication.

§ 820.36 Filing, form, and service of documents.

(a) *Filing in an enforcement proceeding.* The original and three copies of any document in an enforcement proceeding shall be filed with the Docketing Clerk commencing with the filing of a Preliminary Notice of Violation.

(b) *Form of documents in an enforcement proceeding.* (1) Except as provided herein, or by order of the DOE Official, there are no specific requirements as to the form of documents filed in an enforcement proceeding.

(2) The first page of every document shall contain a caption identifying the respondent and the docket number.

(3) The original of any document (other than exhibits) shall be signed by the person filing it or by his counsel or other representative. The signature constitutes a representation by the signer that he has read the pleading, letter or other document, that to the best of his knowledge, information and belief, the statements made therein are true, and that it is not interposed for delay.

(4) The initial document filed by any person shall contain his name, address and telephone number. Any changes in this information shall be communicated promptly to the Docketing Clerk and all participants to the proceeding. A person who fails to furnish such information and any changes thereto shall be deemed to have waived his right to notice and service under this part.

(5) The Docketing Clerk may refuse to file any document that does not comply with this section. Written notice of such refusal, stating the reasons therefor, shall be promptly given to the person submitting the document. Such person may amend and resubmit any document refused for filing.

§ 820.37 Participation in an adjudication.

(a) *Parties.* In an enforcement adjudication, the Director and the respondent shall be the only parties; provided that the Presiding Officer may permit a person to intervene as a party if the

10 CFR Ch. III (1-1-16 Edition)

person demonstrates it could be liable in the event a civil penalty is assessed.

(b) *Appearances.* Any party to an enforcement adjudication may appear in person or by counsel or other representative. A partner may appear on behalf of a partnership and an officer may appear on behalf of a corporation. Persons who appear as counsel or other representative must conform to the standards of conduct and ethics required of practitioners before the courts of the United States.

(c) *Amicus Curiae.* Persons not parties to an enforcement adjudication who wish to file briefs may so move. The motion shall identify the interest of the person and shall state the reasons why the proposed amicus brief is desirable. If the motion is granted, the Presiding Officer shall issue an order setting the time for filing such brief. An *amicus curiae* is eligible to participate in any briefing after his motion is granted, and shall be served with all briefs, reply briefs, motions, and orders relating to issues to be briefed.

§ 820.38 Consolidation and severance.

(a) *Consolidation.* The Presiding Officer may, by motion or *sua sponte*, consolidate any or all matters at issue in two or more enforcement adjudications under this part where there exists common parties or common questions of fact or law, consolidation would expedite and simplify consideration of the issues, and consolidation would not adversely affect the rights of parties engaged in otherwise separate adjudications.

(b) *Severance.* The Presiding Officer may, by motion or *sua sponte*, for good cause shown order any enforcement adjudication severed with respect to any or all parties or issues.

§ 820.39 Motions.

(a) *General.* All motions in an enforcement adjudication except those made orally, shall be in writing, state the grounds therefor with particularity, set forth the relief or order sought, and be accompanied by any affidavit, certificate, other evidence, or legal memorandum relied upon.

(b) *Answer to motions.* Except as otherwise specified by a particular provision of this part or by the Presiding Officer, a party shall have the right to file a written answer to the motion of another party within 10 days after the filing of such motion. The answer shall be accompanied by any affidavit, certificate, other evidence, or legal memorandum relied upon. If no answer is filed within the designated period, the party may be deemed to have waived any objection to the granting of the motion. The Presiding Officer may set a shorter or longer time for an answer, or make such other orders concerning the disposition of motions as he deems appropriate.

(c) *Decision.* The Presiding Officer shall rule on a motion as soon as practicable after the filing of the answer. The decision of the Presiding Officer on any motion shall not be subject to administrative appeal.

Subpart C—Compliance Orders

§ 820.40 Purpose and scope.

This subpart provides for the issuance of Compliance Orders to prevent, rectify or penalize violations of the Act, a Nuclear Statute, or a DOE Nuclear Safety Requirement and to require action consistent with the Act, a Nuclear Statute, or a DOE Nuclear Safety Requirement.

§ 820.41 Compliance order.

The Secretary may issue to any person involved in a DOE nuclear activity a Compliance Order that:

(a) Identifies a situation that violates, potentially violates, or otherwise is inconsistent with the Act, a Nuclear Statute, or a DOE Nuclear Safety Requirement;

(b) Mandates a remedy or other action; and,

(c) States the reasons for the remedy or other action.

§ 820.42 Final order.

A Compliance Order is a Final Order that constitutes a DOE Nuclear Safety Requirement that is effective immediately unless the Order specifies a different effective date.

§ 820.43 Appeal.

Within fifteen days of the issuance of a Compliance Order, the recipient of the Order may request the Secretary to rescind or modify the Order. A request shall not stay the effectiveness of a Compliance Order unless the Secretary issues an order to that effect.

Subpart D—Interpretations

§ 820.50 Purpose and scope.

This subpart provides for interpretations of the Act, Nuclear Statutes, and DOE Nuclear Safety Requirements. Any written or oral response to any written or oral question which is not provided pursuant to this subpart does not constitute an interpretation and does not provide any basis for action inconsistent with the Act, a Nuclear Statute, or a DOE Nuclear Safety Requirement.

§ 820.51 General Counsel.

The General Counsel shall be the DOE Official responsible for formulating and issuing any interpretation concerning the Act, a Nuclear Statute or a DOE Nuclear Safety Requirement.

§ 820.52 Procedures.

The General Counsel may utilize any procedure which he deems appropriate to comply with his responsibilities under this subpart. All interpretations issued under this subpart must be filed with the Office of the Docketing Clerk which shall maintain a docket for interpretations.

Subpart E—Exemption Relief

§ 820.60 Purpose and scope.

This subpart provides for exemption relief from provisions of DOE Nuclear Safety Requirements at nuclear facilities.

§ 820.61 Secretarial officer.

The Secretarial Officer who is primarily responsible for the activity to which a DOE Nuclear Safety Requirement relates may grant a temporary or permanent exemption from that requirement as requested by any person subject to its provisions; provided that, the Secretarial Officer responsible for

§ 820.62

environment, safety and health matters shall exercise this authority with respect to provisions relating to radiological protection of workers, the public and the environment. This authority may not be further delegated.

§ 820.62 Criteria.

The criteria for granting an exemption to a DOE Nuclear Safety Requirement are determinations that the exemption:

- (a) Would be authorized by law;
- (b) Would not present an undue risk to public health and safety, the environment, or facility workers;
- (c) Would be consistent with the safe operation of a DOE nuclear facility; and
- (d) Involves special circumstances, including the following:
 - (1) Application of the requirement in the particular circumstances conflicts with other requirements; or
 - (2) Application of the requirement in the particular circumstances would not serve or is not necessary to achieve its underlying purpose, or would result in resource impacts which are not justified by the safety improvements; or
 - (3) Application of the requirement would result in a situation significantly different than that contemplated when the requirement was adopted, or that is significantly different from that encountered by others similarly situated; or
 - (4) The exemption would result in benefit to human health and safety that compensates for any detriment that may result from the grant of the exemption; or
 - (5) Circumstances exist which would justify temporary relief from application of the requirement while taking good faith action to achieve compliance; or
 - (6) There is present any other material circumstance not considered when the requirement was adopted for which it would be in the public interest to grant an exemption.

§ 820.63 Procedures.

The Secretarial Officer shall utilize any procedures deemed necessary and appropriate to comply with his responsibilities under this subpart. All exemption decisions must set forth in

10 CFR Ch. III (1-1-16 Edition)

writing the reasons for granting or denying the exemption, and if granted, the basis for the determination that the criteria in § 820.62 have been met and the terms of the exemption. All exemption decisions must be filed with the Office of the Docketing Clerk which shall maintain a docket for exemption decisions issued pursuant to this subpart.

§ 820.64 Terms and conditions.

An exemption may contain appropriate terms and conditions including, but not limited to, provisions that :

- (a) Limit its duration;
- (b) Require alternative action;
- (c) Require partial compliance; or
- (d) Establish a schedule for full or partial compliance.

§ 820.65 Implementation plan.

With respect to a DOE Nuclear Safety Requirement for which there is no regulatory provision for an implementation plan or schedule, an exemption may be granted to establish an implementation plan which reasonably demonstrates that full compliance with the requirement will be achieved within two years of the effective date of the requirement without a determination of special circumstances under § 820.62(d).

§ 820.66 Appeal.

Within fifteen (15) days of the filing of an exemption decision by a Secretarial Officer, the person requesting the exemption may file a Request to Review with the Secretary, or the Secretary may file, *sua sponte*, a Notice of Review. The Request to Review shall state specifically the respects in which the exemption determination is claimed to be erroneous, the grounds of the request, and the relief requested.

§ 820.67 Final order.

If no filing is made under § 820.66, an exemption decision becomes a Final Order fifteen (15) days after it is filed by a Secretarial Officer. If filing is made under § 820.66, an exemption decision becomes a Final Order 45 days after it is filed by a Secretarial Officer, unless the Secretary stays the effective date or issues a Final Order that modifies the decision.

Subpart F—Criminal Penalties**§ 820.70 Purpose and scope.**

This subpart provides for the identification of criminal violations of the Act or DOE Nuclear Safety Requirements and the referral of such violations to the Department of Justice.

§ 820.71 Standard.

If a person subject to the Act or the DOE Nuclear Safety Requirements has, by act or omission, knowingly and willfully violated, caused to be violated, attempted to violate, or conspired to violate any section of the Act or any applicable DOE Nuclear Safety Requirement, the person shall be subject to criminal sanctions under the Act.

§ 820.72 Referral to the Attorney General.

If there is reason to believe a criminal violation of the Act or the DOE Nuclear Safety Requirements has occurred, DOE may refer the matter to the Attorney General of the United States for investigation or prosecution.

Subpart G—Civil Penalties

SOURCE: 62 FR 46184, Sept. 2, 1997, unless otherwise noted.

§ 820.80 Basis and purpose.

This subpart implements the Federal Civil Penalties Inflation Adjustment Act of 1990 (the Act) (Pub. L. 101-410), as amended by the Debt Collection Improvement Act of 1996 (Pub. L. 104-134, section 31001). 28 U.S.C. 2461 note. As amended, the Act requires each agency head to adjust by regulation each civil monetary penalty provided by law within the jurisdiction of the Federal agency by the inflation adjustment specified in 28 U.S.C. 2461 note. This subpart increases the civil penalty amount specified in 42 U.S.C. 2282a.

§ 820.81 Amount of penalty.

Any person subject to a penalty under 42 U.S.C. 2282a shall be subject to a civil penalty in an amount not to exceed \$160,000 for each such violation. If any violation under 42 U.S.C. 2282a is a continuing one, each day of such violation shall constitute a separate viola-

tion for the purpose of computing the applicable civil penalty.

[62 FR 46184, Sept. 2, 1997, as amended at 74 FR 66033, Dec. 14, 2009; 79 FR 19, Jan. 2, 2014]

APPENDIX A TO PART 820—GENERAL
STATEMENT OF ENFORCEMENT POLICY

I. Introduction

(a) This policy statement sets forth the general framework through which the U.S. Department of Energy (DOE) will seek to ensure compliance with its enforceable nuclear safety regulations and orders (hereafter collectively referred to as DOE Nuclear Safety Requirements) and, in particular, exercise the civil penalty authority provided to DOE in the Price Anderson Amendments Act of 1988, 42 U.S.C. 2282a (PAAA). The policy set forth herein is applicable to violations of DOE Nuclear Safety Requirements by DOE contractors who are indemnified under the Price Anderson Act, 42 U.S.C. 2210(d), and their subcontractors and suppliers (hereafter collectively referred to as DOE contractors). This policy statement is not a regulation and is intended only to provide general guidance to those persons subject to DOE's Nuclear Safety Requirements as specified in the PAAA. It is not intended to establish a "cookbook" approach to the initiation and resolution of situations involving non-compliance with DOE Nuclear Safety Requirements. Rather, DOE intends to consider the particular facts of each noncompliance situation in determining whether enforcement sanctions are appropriate and, if so, the appropriate magnitude of those sanctions. DOE may well deviate from this policy statement when appropriate in the circumstances of particular cases. This policy statement is not applicable to activities and facilities covered under E.O. 12344, 42 U.S.C. 7158 note, pertaining to Naval nuclear propulsion.

(b) Both the Department of Energy Organization Act, 42 U.S.C. 7101, and the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2011, require DOE to protect the public health and safety, as well as the safety of workers at DOE facilities, in conducting its nuclear activities, and grant DOE broad authority to achieve this goal.

(c) The DOE goal in the compliance arena is to enhance and protect the radiological health and safety of the public and worker at DOE facilities by fostering a culture among both the DOE line organizations and the contractors that activity seeks to attain and sustain compliance with DOE Nuclear Safety Requirements. The enforcement program and policy have been developed with the express purpose of achieving safety inquisitiveness and voluntary compliance. DOE will establish effective administrative processes and

positive incentives to the contractors for the open and prompt identification and reporting of noncompliances, and the initiation of comprehensive corrective actions to resolve both the noncompliance conditions and the program or process deficiencies that led to noncompliance.

(d) In the development of the DOE enforcement policy, DOE recognizes that the reasonable exercise of its enforcement authority can help to reduce the likelihood of serious incidents. This can be accomplished by providing greater emphasis on a culture of safety in existing DOE operations, and strong incentives for contractors to identify and correct noncompliance conditions and processes in order to protect human health and the environment. DOE wants to facilitate, encourage, and support contractor initiatives for the prompt identification and correction of problems. These initiatives and activities will be duly considered in exercising enforcement discretion.

(e) The PAAA provides DOE with the authority to compromise, modify, or remit civil penalties with or without conditions. In implementing the PAAA, DOE will carefully consider the facts of each case of noncompliance and will exercise appropriate discretion in taking any enforcement action. Part of the function of a sound enforcement program is to assure a proper and continuing level of safety vigilance. The reasonable exercise of enforcement authority will be facilitated by the appropriate application of safety requirements to nuclear facilities and by promoting and coordinating the proper contractor and DOE safety compliance attitude toward those requirements.

II. Purpose

The purpose of the DOE enforcement program is to promote and protect the radiological health and safety of the public and workers at DOE facilities by:

a. Ensuring compliance by DOE contractors with applicable DOE Nuclear Safety Requirements.

b. Providing positive incentives for a DOE contractor's:

- (1) Timely self-identification of nuclear safety deficiencies,
- (2) Prompt and complete reporting of such deficiencies to DOE,
- (3) Root cause analyses of nuclear safety deficiencies,
- (4) Prompt correction of nuclear safety deficiencies in a manner which precludes recurrence, and
- (5) Identification of modifications in practices or facilities that can improve public or worker radiological health and safety.

c. Deterring future violations of DOE requirements by a DOE contractor.

d. Encouraging the continuous overall improvement of operations at DOE nuclear facilities.

III. Statutory Authority

Section 17 of the PAAA makes most DOE contractors covered by the DOE Price-Anderson indemnification system, and their subcontractors and suppliers, subject to civil penalties for violations of applicable DOE nuclear safety rules, regulations and orders. 42 U.S.C. 2282a. Furthermore, section 18 of the PAAA makes all employees of DOE contractors, and their subcontractors and suppliers, subject to criminal penalties, including monetary penalties and imprisonment, for knowing and willful violations of applicable DOE nuclear safety rules, regulations and orders. 42 U.S.C. 2273(c). Suspected, or alleged, criminal violations are referred to the Department of Justice for appropriate action. 42 U.S.C. 2271. Therefore, DOE's enforcement authority and policy will apply only to civil penalties since decisions on criminal violations are the responsibility of the Department of Justice. However, referral of a case to the Department of Justice does not preclude DOE from taking civil enforcement action in accordance with this policy statement. Such actions will be coordinated with the Department of Justice to the extent practicable.

IV. Responsibilities

(a) The Director, as the principal enforcement officer of DOE, has been delegated the authority to:

- (1) Conduct enforcement inspections, investigations, and conferences;
- (2) Issue Notices of Violations and proposed civil penalties, Enforcement Letters, Consent Orders, and subpoenas; and
- (3) Issue orders to compel attendance and disclosure of information or documents obtained during an investigation or inspection.

(b) The NNSA Administrator, pursuant to section 3212 (b)(9) of Public Law 106-65 (codified at 50 U.S.C. 2402 (b)(9)), as amended, has authority over and responsibility for environment, safety and health operations within NNSA and is authorized to sign, issue and serve the following actions that direct NNSA contractors:

- (1) Subpoenas;
- (2) Orders to compel attendance;
- (3) Disclosure of information or documents obtained during an investigation or inspection;
- (4) Preliminary Notices of Violations; and
- (5) Final Notices of Violations.

The NNSA Administrator acts after consideration of the Director's recommendation.

V. Procedural Framework

(a) 10 CFR part 820 sets forth the procedures DOE will use in exercising its enforcement authority, including the issuance of Notices of Violation and the resolution of contested enforcement actions in the event a

DOE contractor elects to litigate contested issues before an Administrative Law Judge.

(b) Pursuant to 10 CFR 820.22, the Director initiates the civil penalty process by issuing a Preliminary Notice of Violation and Proposed Civil Penalty (PNOV). The DOE contractor is required to respond in writing to the PNOV, either admitting the violation and waiving its right to contest the proposed civil penalty and paying it, admitting the violation but asserting the existence of mitigating circumstances that warrant either the total or partial remission of the civil penalty, or denying that the violation has occurred and providing the basis for its belief that the PNOV is incorrect. After evaluation of the DOE contractor's response, the Director of Enforcement may determine that no violation has occurred, that the violation occurred as alleged in the PNOV but that the proposed civil penalty should be remitted in whole or in part, or that the violation occurred as alleged in the PNOV and that the proposed civil penalty is appropriate notwithstanding the asserted mitigating circumstances. In the latter two instances, the Director will issue a Final Notice of Violation (FNOV) or an FNOV and Proposed Civil Penalty.

(c) An opportunity to challenge a proposed civil penalty either before an Administrative Law Judge or in a United States District Court is provided in the PAAA, 42 U.S.C. 2282a(c), and 10 CFR part 820 sets forth the procedures associated with an administrative hearing, should the contractor opt for that method of challenging the proposed civil penalty. A formal administrative enforcement proceeding pursuant to section 554 of the Administrative Procedures Act is not initiated until the DOE contractor against which a civil penalty has been proposed requests an administrative hearing rather than waiving its right to contest the civil penalty and paying it. However, it should be emphasized that DOE encourages the voluntary resolution of a noncompliance situation at any time, either informally prior to the initiation of an administrative proceeding or by consent order after a formal proceeding has begun.

VI. Severity of Violations

(a) Violations of DOE Nuclear Safety Requirements have varying degrees of safety significance. Therefore, the relative importance of each violation must be identified as the first step in the enforcement process. Violations of DOE Nuclear Safety Requirements are categorized in three levels of severity to identify their relative safety significance, and Notices of Violation are issued for noncompliance which, when appropriate, propose civil penalties commensurate with the severity level of the violation(s) involved.

(b) Severity Level I has been assigned to violations that are the most significant and Severity Level III violations are the least significant. Severity Level I is reserved for violations of DOE Nuclear Safety Requirements which involve actual or high potential for adverse impact on the safety of the public or workers at DOE facilities. Severity level II violations represent a significant lack of attention or carelessness toward responsibilities of DOE contractors for the protection of public or worker safety which could, if uncorrected, potentially lead to an adverse impact on public or worker safety at DOE facilities. Severity Level III violations are less serious but are of more than minor concern: i.e., if left uncorrected, they could lead to a more serious concern. In some cases, violations may be evaluated in the aggregate and a single severity level assigned for a group of violations.

(c) Isolated minor violations of DOE Nuclear Safety Requirements will not be the subject of formal enforcement action through the issuance of a Notice of Violation. However, these minor violations will be identified as noncompliances and tracked to assure that appropriate corrective/remedial action is taken to prevent their recurrence, and evaluated to determine if generic or specific problems exist. If circumstances demonstrate that a number of related minor noncompliances have occurred in the same time frame (e.g. all identified during the same assessment), or that related minor noncompliances have recurred despite prior notice to the DOE contractor and sufficient opportunity to correct the problem, DOE may choose in its discretion to consider the noncompliances in the aggregate as a more serious violation warranting a Severity Level III designation, a Notice of Violation and a possible civil penalty.

(d) The severity level of a violation will be dependent, in part, on the degree of culpability of the DOE contractor with regard to the violation. Thus, inadvertent or negligent violations will be viewed differently than those in which there is gross negligence, deception or wilfulness. In addition to the significance of the underlying violation and level of culpability involved, DOE will also consider the position, training and experience of the person involved in the violation. Thus, for example, a violation may be deemed to be more significant if a senior manager of an organization is involved rather than a foreman or non-supervisory employee. In this regard, while management involvement, direct or indirect, in a violation may lead to an increase in the severity level of a violation and proposed civil penalty, the lack of such involvement will not constitute grounds to reduce the severity level of a violation or mitigate a civil penalty. Allowance of mitigation in such circumstances could encourage lack of management involvement

in DOE contractor activities and a decrease in protection of public and worker health and safety.

(e) Other factors which will be considered by DOE in determining the appropriate severity level of a violation are the duration of the violation, the past performance of the DOE contractor in the particular activity area involved, whether the DOE contractor had prior notice of a potential problem, and whether there are multiple examples of the violation in the same time frame rather than an isolated occurrence. The relative weight given to each of these factors in arriving at the appropriate severity level will be dependent on the circumstances of each case.

(f) DOE expects contractors to provide full, complete, timely, and accurate information and reports. Accordingly, the severity level of a violation involving either failure to make a required report or notification to the DOE or an untimely report or notification, will be based upon the significance of, and the circumstances surrounding, the matter that should have been reported. A contractor will not normally be cited for a failure to report a condition or event unless the contractor was actually aware, or should have been aware of the condition or event which it failed to report.

VII. Enforcement Conferences

(a) Should DOE determine, after completion of all assessment and investigation activities associated with a potential or alleged violation of DOE Nuclear Safety Requirements, that there is a reasonable basis to believe that a violation has actually occurred, and the violation may warrant a civil penalty or issuance of an enforcement order, DOE will normally hold an enforcement conference with the DOE contractor involved prior to taking enforcement action. DOE may also elect to hold an enforcement conference for potential violations which would not ordinarily warrant a civil penalty or enforcement order but which could, if repeated, lead to such action. The purpose of the enforcement conference is to assure the accuracy of the facts upon which the preliminary determination to consider enforcement action is based, discuss the potential or alleged violations, their significance and causes, and the nature of and schedule for the DOE contractor's corrective actions, determine whether there are any aggravating or mitigating circumstances, and obtain other information which will help determine the appropriate enforcement action.

(b) DOE contractors will be informed prior to a meeting when that meeting is considered to be an enforcement conference. Such conferences are informal mechanisms for candid pre-decisional discussions regarding potential or alleged violations and will not normally be open to the public. In circumstances for which immediate enforce-

ment action is necessary in the interest of public or worker health and safety, such action will be taken prior to the enforcement conference, which may still be held after the necessary DOE action has been taken.

VIII. Enforcement Letter

(a) In cases where DOE has decided not to conduct an investigation or inspection or issue a Preliminary Notice of Violation (PNOV), DOE may send an Enforcement Letter to the contractor, signed by the Director. Enforcement Letters issued to NNSA contractors will be coordinated with the Principal Deputy Administrator of the NNSA prior to issuance. The Enforcement Letter is intended to communicate the basis of the decision not to pursue enforcement action for a noncompliance. The Enforcement Letter is intended to inform contractors of the desired level of nuclear safety performance. It may be used when DOE concludes the specific noncompliance at issue is not of the level of significance warranted to conduct an investigation or inspection or for issuance of a PNOV. Even where a noncompliance may be significant, the Enforcement Letter recognizes that the contractor's actions may have attenuated the need for enforcement action. The Enforcement Letter will typically recognize how the contractor handled the circumstances surrounding the noncompliance, address additional areas requiring the contractor's attention, and address DOE's expectations for corrective action.

(b) In general, Enforcement Letters communicate DOE's expectations with respect to any aspect of the requirements contained in the Department's nuclear safety rules, including identification and reporting of issues, corrective actions, and implementation of the contractor's nuclear safety program. DOE might, for example, wish to recognize some action of the contractor that is of particular benefit to nuclear safety performance that is a candidate for emulation by other contractors. On the other hand, DOE may wish to bring a program shortcoming to the attention of the contractor that, but for the lack of nuclear safety significance of the immediate issue, might have resulted in the issuance of a PNOV. An Enforcement Letter is not an enforcement action.

(c) With respect to many noncompliances, DOE may decide not to send an Enforcement Letter. When DOE decides that a contractor has appropriately corrected a noncompliance or that the significance of the noncompliance is sufficiently low, it may close out its review simply through an annotation in the DOE Noncompliance Tracking System (NTS). A closeout of a noncompliance with or without an Enforcement Letter may only

take place after DOE has confirmed that corrective actions have been completed. Close-out of any NNSA contractor noncompliance will be coordinated with NNSA prior to closeout.

IX. Enforcement Actions

a. This section describes the enforcement sanctions available to DOE and specifies the conditions under which each may be used. The basic sanctions are Notices of Violation and civil penalties. In determining whether to impose enforcement sanctions, DOE will consider enforcement actions taken by other Federal or State regulatory bodies having concurrent jurisdiction, e.g., instances which involve NRC licensed entities which are also DOE contractors, and in which the NRC exercises its own enforcement authority.

b. The nature and extent of the enforcement action is intended to reflect the seriousness of the violation involved. For the vast majority of violations for which DOE assigns severity levels as described previously, a Notice of Violation will be issued, requiring a formal response from the recipient describing the nature of and schedule for corrective actions it intends to take regarding the violation. Administrative actions, such as determination of award fees where DOE contracts provide for such determinations, will be considered separately from any civil penalties that may be imposed under this Enforcement Policy. Likewise, imposition of a civil penalty will be based on the circumstances of each case, unaffected by any award fee determination.

1. Notice of Violation

a. A Notice of Violation (either a Preliminary or Final Notice) is a document setting forth the conclusion of the DOE Office of Nuclear Safety and Environment that one or more violations of DOE Nuclear Safety Requirements has occurred. Such a notice normally requires the recipient to provide a written response which may take one of several positions described in Section V of this policy statement. In the event that the recipient concedes the occurrence of the violation, it is required to describe corrective steps which have been taken and the results achieved; remedial actions which will be taken to prevent recurrence; and the date by which full compliance will be achieved.

b. DOE will use the Notice of Violation as the standard method for formalizing the existence of a violation and, in appropriate cases as described in this section, the notice of violation will be issued in conjunction with the proposed imposition of a civil penalty. In certain limited instances, as described in this section, DOE may refrain from the issuance of an otherwise appropriate Notice of Violation. However, a Notice of Violation will virtually always be issued

for willful violations, if past corrective actions for similar violations have not been sufficient to prevent recurrence and there are no other mitigating circumstances, or if the circumstances otherwise warrant increasing Severity Level III violations to a higher severity level.

c. DOE contractors are not ordinarily cited for violations resulting from matters not within their control, such as equipment failures that were not avoidable by reasonable quality assurance measures, proper maintenance, or management controls. With regard to the issue of funding, however, DOE does not consider an asserted lack of funding to be a justification for noncompliance with DOE Nuclear Safety Requirements.

Should a contractor believe that a shortage of funding precludes it from achieving compliance with one or more DOE Nuclear Safety Requirements, it must pursue one of two alternative courses of action. First, it may request, in writing, an exemption from the requirement(s) in question from the appropriate Secretarial Officer (SO), explicitly addressing the criteria for exemptions set forth in 10 CFR 820.62. A justification for continued operation for the period during which the exemption request is being considered should also be submitted. In such a case, the SO must grant or deny the request in writing, explaining the rationale for the decision. Second, if the criteria for approval of an exemption cannot be demonstrated, the contractor, in conjunction with the SO, must take appropriate steps to modify, curtail, suspend or cease the activities which cannot be conducted in compliance with the DOE Nuclear Safety Requirement(s) in question.

d. DOE expects the contractors which operate its facilities to have the proper management and supervisory systems in place to assure that all activities at DOE facilities, regardless of who performs them, are carried out in compliance with all DOE Nuclear Safety Requirements. Therefore, contractors are normally held responsible for the acts of their employees and subcontractor employees in the conduct of activities at DOE facilities. Accordingly, this policy should not be construed to excuse personnel errors.

e. Finally, certain contractors are explicitly exempted from the imposition of civil penalties pursuant to the provisions of the PAAA, 42 U.S.C. 2282a(d), for activities conducted at specified facilities. See 10 CFR 820.20(c). In addition, in fairness to non-profit educational institutions, the Department has determined that they should be likewise exempted. See 10 CFR 820.20(d). However, compliance with DOE Nuclear Safety Requirements is no less important for these facilities than for other facilities in the DOE complex which work with, store or dispose of radioactive materials. Indeed, the exempted

contractors conduct some of the most important nuclear-related research and development activities performed for the Department. Therefore, in order to serve the purposes of this enforcement policy and to emphasize the importance the Department places on compliance with all of its nuclear safety requirements, DOE intends to issue Notices of Violation to the exempted contractors and non-profit educational institutions when appropriate under this policy statement, notwithstanding the statutory and regulatory exemptions from the imposition of civil penalties.

2. Civil Penalty

a. A civil penalty is a monetary penalty that may be imposed for violations of applicable DOE Nuclear Safety Requirements, including Compliance Orders. See 10 CFR 820.20(b). Civil penalties are designed to emphasize the need for lasting remedial action, deter future violations, and underscore the importance of DOE contractor self-identification, reporting and correction of violations of DOE Nuclear Safety Requirements.

b. Absent mitigating circumstances as described below, or circumstances otherwise warranting the exercise of enforcement discretion by DOE as described in this section, civil penalties will be proposed for Severity Level I and II violations. Civil penalties will be proposed for Severity Level III violations which are similar to previous violations for which the contractor did not take effective corrective action. “Similar” violations are those which could reasonably have been expected to have been prevented by corrective action for the previous violation. DOE normally considers civil penalties only for similar Severity Level III violations that occur over a reasonable period of time to be determined at the discretion of DOE.

c. DOE will impose different base level civil penalties considering the severity level of the violation(s) by Price-Anderson indemnified contractors. Table 1 shows the daily base civil penalties for the various categories of severity levels. However, as described above in Section IV, the imposition of civil penalties will also take into account the gravity, circumstances, and extent of the violation or violations and, with respect to the violator, any history of prior similar violations and the degree of culpability and knowledge.

d. Regarding the factor of ability of DOE contractors to pay the civil penalties, it is not DOE’s intention that the economic impact of a civil penalty be such that it puts a DOE contractor out of business. Contract termination, rather than civil penalties, is used when the intent is to terminate these activities. The deterrent effect of civil penalties is best served when the amount of such penalties takes this factor into account. However, DOE will evaluate the relationship

of affiliated entities to the contractor (such as parent corporations) when it asserts that it cannot pay the proposed penalty.

e. DOE will review each case involving a proposed civil penalty on its own merits and adjust the base civil penalty values upward or downward appropriately. As indicated above, Table 1 identifies the daily base civil penalty values for different severity levels. After considering all relevant circumstances, civil penalties may be escalated or mitigated based upon the adjustment factors described below in this section. In no instance will a civil penalty for any one violation exceed the statutory limit. However, it should be emphasized that if the DOE contractor is or should have been aware of a violation and has not reported it to DOE and taken corrective action despite an opportunity to do so, each day the condition existed may be considered as a separate violation and, as such, subject to a separate civil penalty. Further, as described in this section, the duration of a violation will be taken into account in determining the appropriate severity level of the base civil penalty.

TABLE 1—SEVERITY LEVEL BASE CIVIL PENALTIES

Severity level	Base civil penalty amount (percentage of maximum civil penalty per day)
I	100
II	50
III	10

3. Adjustment Factors

a. DOE’s enforcement program is not an end in itself, but a means to achieve compliance with DOE Nuclear Safety Requirements, and civil penalties are not collected to swell the coffers of the United States Treasury, but to emphasize the importance of compliance and to deter future violations. The single most important goal of the DOE enforcement program is to encourage early identification and reporting of nuclear safety deficiencies and violations of DOE Nuclear Safety Requirements by the DOE contractors themselves rather than by DOE, and the prompt correction of any deficiencies and violations so identified. DOE believes that DOE contractors are in the best position to identify and promptly correct non-compliance with DOE Nuclear Safety Requirements. DOE expects that these contractors should have in place internal compliance programs which will ensure the detection, reporting and prompt correction of nuclear safety-related problems that may constitute, or lead to, violations of DOE Nuclear Safety Requirements before, rather than after, DOE has identified such violations. Thus, DOE contractors will almost always be

aware of nuclear safety problems before they are discovered by DOE. Obviously, public and worker health and safety is enhanced if deficiencies are discovered (and promptly corrected) by the DOE contractor, rather than by DOE, which may not otherwise become aware of a deficiency until later on, during the course of an inspection, performance assessment, or following an incident at the facility. Early identification of nuclear safety-related problems by DOE contractors has the added benefit of allowing information which could prevent such problems at other facilities in the DOE complex to be shared with all appropriate DOE contractors.

b. Pursuant to this enforcement philosophy, DOE will provide substantial incentive for the early self-identification, reporting and prompt correction of problems which constitute, or could lead to, violations of DOE Nuclear Safety Requirements. Thus, application of the adjustment factors set forth below may result in no civil penalty being assessed for violations that are identified, reported, and promptly and effectively corrected by the DOE contractor.

c. On the other hand, ineffective programs for problem identification and correction are unacceptable. Thus, for example, where a contractor fails to disclose and promptly correct violations of which it was aware or should have been aware, substantial civil penalties are warranted and may be sought, including the assessment of civil penalties for continuing violations on a per day basis.

d. Further, in cases involving willfulness, flagrant DOE-identified violations, repeated poor performance in an area of concern, or serious breakdown in management controls, DOE intends to apply its full statutory enforcement authority where such action is warranted.

4. Identification and Reporting

Reduction of up to 50% of the base civil penalty shown in Table 1 may be given when a DOE contractor identifies the violation and promptly reports the violation to the DOE. In weighing this factor, consideration will be given to, among other things, the opportunity available to discover the violation, the ease of discovery and the promptness and completeness of any required report. No consideration will be given to a reduction in penalty if the DOE contractor does not take prompt action to report the problem to DOE upon discovery, or if the immediate actions necessary to restore compliance with DOE Nuclear Safety Requirements or place the facility or operation in a safe configuration are not taken.

5. Self-Identification and Tracking Systems

a. DOE strongly encourages contractors to self-identify noncompliances with DOE Nuclear Safety Requirements before the non-

compliances lead to a string of similar and potentially more significant events or consequences. When a contractor identifies a noncompliance through its own self-monitoring activity, DOE will normally allow a reduction in the amount of civil penalties, regardless of whether prior opportunities existed for contractors to identify the noncompliance. DOE will normally not allow a reduction in civil penalties for self-identification if significant DOE intervention was required to induce the contractor to report a noncompliance.

b. Self-identification of a noncompliance is possibly the single most important factor in considering a reduction in the civil penalty amount. Consideration of self-identification is linked to, among other things, whether prior opportunities existed to discover the violation, and if so, the age and number of such opportunities; the extent to which proper contractor controls should have identified or prevented the violation; whether discovery of the violation resulted from a contractor's self-monitoring activity; the extent of DOE involvement in discovering the violation or in prompting the contractor to identify the violation; and the promptness and completeness of any required report. Self-identification is also considered by DOE in deciding whether to pursue an investigation.

c. DOE has established a voluntary Non-compliance Tracking System (NTS) which allows contractors to elect to report noncompliances. In the guidance document supporting the NTS (DOE-HDBK-1089-95), DOE has established reporting thresholds for reporting items of noncompliance of potentially greater safety significance into the NTS. Contractors may, however, use their own self-tracking systems to track noncompliances below the reporting threshold. This self-tracking is considered to be acceptable self-reporting as long as DOE has access to the contractor's system and the contractor's system notes the item as a noncompliance with a DOE Nuclear Safety Requirement. For noncompliances that are below the reportability thresholds, DOE will credit contractor self-tracking as representing self-reporting. If an item is not reported in NTS but only tracked in the contractor's system and DOE subsequently finds the facts and their safety significance have been significantly mischaracterized, DOE will not credit the internal tracking as representing appropriate self-reporting.

6. Self-Disclosing Events

a. DOE expects contractors to demonstrate acceptance of responsibility for safety of the public, workers, and the environment and to proactively identify noncompliance conditions in their programs and processes. In deciding whether to reduce any civil penalty

proposed for violations revealed by the occurrence of a self-disclosing event, DOE will consider the ease with which a contractor could have discovered the noncompliance and the prior opportunities that existed to discover the noncompliance. When the occurrence of an event discloses noncompliances that the contractor could have or should have identified before the event, DOE will not generally allow a reduction in civil penalties for self-identification, even if the underlying noncompliances were reported to DOE. If a contractor simply reacts to events that disclose potentially significant consequences or downplays noncompliances which did not result in significant consequences to workers, the public, and the environment, such contractor actions do not lead to the improvement in nuclear safety contemplated by the Act.

b. The key test is whether the contractor reasonably could have detected any of the underlying noncompliances that contributed to the event. Examples of events that provide opportunities to identify noncompliances include, but are not limited to:

(1) prior notifications of potential problems such as those from DOE operational experience publications or vendor equipment deficiency reports;

(2) normal surveillance, quality assurance assessments, and post-maintenance testing;

(3) readily observable parameter trends; and

(4) contractor employee or DOE observations of potential safety problems. Failure to utilize these types of events and activities to address noncompliances may result in higher civil penalty assessments or a DOE decision not to reduce civil penalty amounts.

c. For example, a critique of the event might find that one of the root causes was a lack of clarity in a Radiation Work Permit (RWP) which led to improper use of anti-contamination clothing and resulting uptake of contamination by the individual. DOE could subsequently conclude that no reduction in civil penalties for self-identification should be allowed since the event itself disclosed the inadequate RWP and the contractor could have, through proper independent assessment or by fostering a questioning attitude by its workers and supervisors, identified the inadequate RWP before the event.

d. Alternatively, if, following a self-disclosing event, DOE found that the contractor's processes and procedures were adequate and the contractor's personnel generally behaved in a manner consistent with the contractor's processes and procedures, DOE could conclude that the contractor could not have been reasonably expected to find the single procedural noncompliance that led to the event and thus, might allow a reduction in civil penalties.

7. Corrective Action To Prevent Recurrence

The promptness (or lack thereof) and extent to which the DOE contractor takes corrective action, including actions to identify root cause and prevent recurrence, may result in up to a 50% increase or decrease in the base civil penalty shown in Table 1. For example, very extensive corrective action may result in reducing the proposed civil penalty as much as 50% of the base value shown in Table 1. On the other hand, the civil penalty may be increased as much as 50% of the base value if initiation or corrective action is not prompt or if the corrective action is only minimally acceptable. In weighing this factor, consideration will be given to, among other things, the appropriateness, timeliness and degree of initiative associated with the corrective action. The comprehensiveness of the corrective action will also be considered, taking into account factors such as whether the action is focused narrowly to the specific violation or broadly to the general area of concern.

8. DOE's Contribution to a Violation

There may be circumstances in which a violation of a DOE Nuclear Safety Requirement results, in part or entirely, from a direction given by DOE personnel to a DOE contractor to either take, or forbear from taking an action at a DOE facility. In such cases, DOE may refrain from issuing an NOV, and may mitigate, either partially or entirely, any proposed civil penalty, provided that the direction upon which the DOE contractor relied is documented in writing, contemporaneously with the direction. It should be emphasized, however, that pursuant to 10 CFR 820.50, no interpretation of a DOE Nuclear Safety Requirement is binding upon DOE unless issued in writing by the General Counsel. Further, as discussed in this section of this policy statement, lack of funding by itself will not be considered as a mitigating factor in enforcement actions.

9. Exercise of Discretion

Because DOE wants to encourage and support DOE contractor initiative for prompt self-identification, reporting and correction of problems, DOE may exercise discretion as follows:

a. In accordance with the previous discussion, DOE may refrain from issuing a civil penalty for a violation which meets all of the following criteria:

(1) The violation is promptly identified and reported to DOE before DOE learns of it.

(2) The violation is not willful or a violation that could reasonably be expected to have been prevented by the DOE contractor's corrective action for a previous violation.

(3) The DOE contractor, upon discovery of the violation, has taken or begun to take

prompt and appropriate action to correct the violation.

(4) The DOE contractor has taken, or has agreed to take, remedial action satisfactory to DOE to preclude recurrence of the violation and the underlying conditions which caused it.

b. DOE may refrain from proposing a civil penalty for a violation involving a past problem, such as in engineering design or installation, that meets all of the following criteria:

(1) It was identified by a DOE contractor as a result of a formal effort such as a Safety System Functional Inspection, Design Reconstitution program, or other program that has a defined scope and timetable which is being aggressively implemented and reported;

(2) Comprehensive corrective action has been taken or is well underway within a reasonable time following identification; and

(3) It was not likely to be identified by routine contractor efforts such as normal surveillance or quality assurance activities.

c. DOE will not issue a Notice of Violation for cases in which the violation discovered by the DOE contractor cannot reasonably be linked to the conduct of that contractor in the design, construction or operation of the DOE facility involved, provided that prompt and appropriate action is taken by the DOE contractor upon identification of the past violation to report to DOE and remedy the problem.

d. DOE may refrain from issuing a Notice of Violation for an item of noncompliance that meets all of the following criteria:

(1) It was promptly identified by the DOE nuclear entity;

(2) It is normally classified at a Severity Level III;

(3) It was promptly reported to DOE;

(4) Prompt and appropriate corrective action will be taken, including measures to prevent recurrence; and

(5) It was not a willful violation or a violation that could reasonably be expected to have been prevented by the DOE contractor's corrective action for a previous violation.

e. DOE may refrain from issuing a Notice of Violation for an item of noncompliance that meets all of the following criteria:

(1) It was an isolated Severity Level III violation identified during a Tiger Team inspection conducted by the Office of Health, Safety and Security during an inspection or integrated performance assessment conducted by the Office of Nuclear Safety and Environment, or during some other DOE assessment activity.

(2) The identified noncompliance was properly reported by the contractor upon discovery.

(3) The contractor initiated or completed appropriate assessment and corrective actions within a reasonable period, usually be-

fore the termination of the onsite inspection or integrated performance assessment.

(4) The violation is not willful or one which could reasonably be expected to have been prevented by the DOE contractor's corrective action for a previous violation.

f. In situations where corrective actions have been completed before termination of an inspection or assessment, a formal response from the contractor is not required and the inspection or integrated performance assessment report serves to document the violation and the corrective action. However, in all instances, the contractor is required to report the noncompliance through established reporting mechanisms so the non-compliance issue and any corrective actions can be properly tracked and monitored.

g. If DOE initiates an enforcement action for a violation at a Severity Level II or III and, as part of the corrective action for that violation, the DOE contractor identifies other examples of the violation with the same root cause, DOE may refrain from initiating an additional enforcement action. In determining whether to exercise this discretion, DOE will consider whether the DOE contractor acted reasonably and in a timely manner appropriate to the safety significance of the initial violation, the comprehensiveness of the corrective action, whether the matter was reported, and whether the additional violation(s) substantially change the safety significance or character of the concern arising out of the initial violation.

h. It should be emphasized that the preceding paragraphs are solely intended to be examples indicating when enforcement discretion may be exercised to forego the issuance of a civil penalty or, in some cases, the initiation of any enforcement action at all. However, notwithstanding these examples, a civil penalty may be proposed or Notice of Violation issued when, in DOE's judgment, such action is warranted on the basis of the circumstances of an individual case.

X. Procurement of Products or Services and the Reporting of Defects

(a) DOE's enforcement policy is also applicable to subcontractors and suppliers to DOE Price-Anderson indemnified contractors. Through procurement contracts with these DOE contractors, subcontractors and suppliers are generally required to have quality assurance programs that meet applicable DOE Nuclear Safety Requirements. Suppliers of products or services provided in support of or for use in DOE facilities operated by Price-Anderson indemnified contractors are subject to certain requirements designed to ensure the high quality of the products or services supplied to DOE facilities that could, if deficient, adversely affect public or worker safety. DOE regulations require that DOE be notified whenever a DOE contractor

obtains information reasonably indicating that a DOE facility (including its structures, systems and components) which conducts activities subject to the provisions of the Atomic Energy Act of 1954, as amended or DOE Nuclear Safety Requirements either fails to comply with any provision of the Atomic Energy Act or any applicable DOE Nuclear Safety Requirement, or contains a defect or has been supplied with a product or service which could create or result in a substantial safety hazard.

(b) DOE will conduct audits and assessments of its contractors to determine whether they are ensuring that subcontractors and suppliers are meeting their contractual obligations with regard to quality of products or services that could have an adverse effect on public or worker radiological safety, and ensure that DOE contractors have in place adequate programs to determine whether products or services supplied to them for DOE facilities meet applicable DOE requirements and that substandard products or services are not used by Price-Anderson indemnified contractors at the facilities they operate for DOE. As part of the effort of ensuring that contractual and regulatory requirements are met, DOE may also audit or assess subcontractors and suppliers. These assessments could include examination of the quality assurance programs and their implementation by the subcontractors and suppliers through examination of product quality.

(c) When audits or assessments determine that subcontractors or suppliers have failed to comply with applicable DOE Nuclear Safety Requirements or to fulfill contractual commitments designed to ensure the quality of a safety significant product or service, enforcement action will be taken. Notices of Violations and civil penalties will be issued, as appropriate, for DOE contractor failures to ensure that their subcontractors and suppliers provide products and services that meet applicable DOE requirements. Notices of Violations and civil penalties will also be issued to subcontractors and suppliers of DOE contractors which fail to comply with the reporting requirements set forth in any other applicable DOE Nuclear Safety Requirements.

XI. Inaccurate and Incomplete Information

(a) A violation of DOE Nuclear Safety Requirements for failure to provide complete and accurate information to DOE, 10 CFR 820.11, can result in the full range of enforcement sanctions, depending upon the circumstances of the particular case and consideration of the factors discussed in this section. Violations involving inaccurate or incomplete information or the failure to provide significant information identified by a DOE contractor normally will be categorized

based on the guidance in section VI, "Severity of Violations".

(b) DOE recognizes that oral information may in some situations be inherently less reliable than written submittals because of the absence of an opportunity for reflection and management review. However, DOE must be able to rely on oral communications from officials of DOE contractors concerning significant information. In determining whether to take enforcement action for an oral statement, consideration will be given to such factors as

(b)(1) The degree of knowledge that the communicator should have had regarding the matter in view of his or her position, training, and experience;

(b)(2) The opportunity and time available prior to the communication to assure the accuracy or completeness of the information;

(b)(3) The degree of intent or negligence, if any, involved;

(b)(4) The formality of the communication;

(b)(5) The reasonableness of DOE reliance on the information;

(b)(6) The importance of the information that was wrong or not provided; and

(b)(7) The reasonableness of the explanation for not providing complete and accurate information.

(c) Absent gross negligence or willfulness, an incomplete or inaccurate oral statement normally will not be subject to enforcement action unless it involves significant information provided by an official of a DOE contractor. However, enforcement action may be taken for an unintentionally incomplete or inaccurate oral statement provided to DOE by an official of a DOE contractor or others on behalf of the DOE contractor, if a record was made of the oral information and provided to the DOE contractor thereby permitting an opportunity to correct the oral information, such as if a transcript of the communication or meeting summary containing the error was made available to the DOE contractor and was not subsequently corrected in a timely manner.

(d) When a DOE contractor has corrected inaccurate or incomplete information, the decision to issue a citation for the initial inaccurate or incomplete information normally will be dependent on the circumstances, including the ease of detection of the error, the timeliness of the correction, whether DOE or the DOE contractor identified the problem with the communication, and whether DOE relied on the information prior to the correction. Generally, if the matter was promptly identified and corrected by the DOE contractor prior to reliance by DOE, or before DOE raised a question about the information, no enforcement action will be taken for the initial inaccurate or incomplete information. On the other hand, if the misinformation is identified after DOE relies on it, or after some

question is raised regarding the accuracy of the information, then some enforcement action normally will be taken even if it is in fact corrected.

(e) If the initial submission was accurate when made but later turns out to be erroneous because of newly discovered information or advance in technology, a citation normally would not be appropriate if, when the new information became available, the initial submission was corrected.

(f) The failure to correct inaccurate or incomplete information that the DOE contractor does not identify as significant normally will not constitute a separate violation. However, the circumstances surrounding the failure to correct may be considered relevant to the determination of enforcement action for the initial inaccurate or incomplete statement. For example, an unintentionally inaccurate or incomplete submission may be treated as a more severe matter if a DOE contractor later determines that the initial submission was in error and does not correct it or if there were clear opportunities to identify the error.

XII. Secretarial Notification and Consultation

The Secretary will be provided written notification of all enforcement actions involving proposed civil penalties. The Secretary will be consulted prior to taking action in the following situations:

- a. Proposals to impose civil penalties in an amount equal to or greater than the statutory limit;
- b. Any proposed enforcement action that involves a Severity Level I violation;
- c. Any action the Director believes warrants the Secretary's involvement; or
- d. Any proposed enforcement action on which the Secretary asks to be consulted.

XIII. Whistleblower Enforcement Policy

a. DOE contractors may not retaliate against any employee because the employee has disclosed information, participated in activities or refused to participate in activities listed in 10 CFR 708.5 (a)–(c) as provided by 10 CFR 708.43. DOE contractor employees may seek remedial relief for allegations of retaliation from the DOE Office of Hearings and Appeals (OHA) under 10 CFR part 708 (Part 708) or from the Department of Labor (DOL) under sec. 211 of the Energy Reorganization Act (sec. 211), implemented in 29 CFR part 24.

b. An act of retaliation by a DOE contractor, proscribed under 10 CFR 708.43, that results from a DOE contractor employee's involvement in an activity listed in 10 CFR 708.5(a)–(c) concerning nuclear safety in connection with a DOE nuclear activity, may constitute a violation of a DOE Nuclear Safety Requirement under 10 CFR part 820 (Part 820). The retaliation may be subject to

the investigatory and adjudicatory procedures of both Part 820 and Part 708. The same facts that support remedial relief to employees under Part 708 may be used by the Director of the Office of Enforcement (Director) to support issuance of a Preliminary Notice of Violation (PNOV), a Final Notice of Violation (FNOV), and assessment of civil penalties. 10 CFR 820.24–820.25.

c. When an employee files a complaint with DOL under sec. 211 and DOL collects information relating to allegations of DOE contractor retaliation against a contractor employee for actions taken concerning nuclear safety, the Director may use this information as a basis for initiating enforcement action by issuing a PNOV. 10 CFR 820.24. DOE may consider information collected in the DOL proceedings to determine whether the retaliation may be related to a contractor employee's action concerning a DOE nuclear activity.

d. The Director may also use DOL information to support the determination that a contractor has violated or is continuing to violate the nuclear safety requirements against contractor retaliation and to issue civil penalties or other appropriate remedy in a FNOV. 10 CFR 820.25.

e. The Director will have discretion to give appropriate weight to information collected in DOL and OHA investigations and proceedings. In deciding whether additional investigation or information is needed, the Director will consider the extent to which the facts in the proceedings have been adjudicated as well as any information presented by the contractor. In general, the Director may initiate an enforcement action without additional investigation or information.

f. Normally, the Director will await the completion of a Part 708 proceeding before OHA or a sec. 211 proceeding at DOL before deciding whether to take any action, including an investigation under Part 820 with respect to alleged retaliation. A Part 708 or sec. 211 proceeding would be considered completed when there is either a final decision or a settlement of the retaliation complaint, or no additional administrative action is available.

g. DOE encourages its contractors to cooperate in resolving whistleblower complaints raised by contractor employees in a prompt and equitable manner. Accordingly, in deciding whether to initiate an enforcement action, the Director will take into account the extent to which a contractor cooperated in a Part 708 or sec. 211 proceeding, and, in particular, whether the contractor resolved the matter promptly without the need for an adjudication hearing.

h. In considering whether to initiate an enforcement action and, if so, what remedy is appropriate, the Director will also consider the egregiousness of the particular case including the level of management involved in

the alleged retaliation and the specificity of the acts of retaliation.

i. In egregious cases, the Director has the discretion to proceed with an enforcement action, including an investigation with respect to alleged retaliation irrespective of the completion status of the Part 708 or sec. 211 proceeding. Egregious cases would include: (1) Cases involving credible allegations for willful or intentional violations of DOE rules, regulations, orders or Federal statutes which, if proven, would warrant criminal referrals to the U.S. Department of Justice for prosecutorial review; and (2) cases where an alleged retaliation suggests widespread, high-level managerial involvement and raises significant public health and safety concerns.

j. When the Director undertakes an investigation of an allegation of DOE contractor retaliation against an employee under Part 820, the Director will apprise persons interviewed and interested parties that the investigative activity is being taken pursuant to the nuclear safety procedures of Part 820 and not pursuant to the procedures of Part 708.

k. At any time, the Director may begin an investigation of a noncompliance of the substantive nuclear safety rules based on the underlying nuclear safety concerns raised by the employee regardless of the status of completion of any related whistleblower retaliation proceedings. The nuclear safety rules include: 10 CFR part 830 (nuclear safety management); 10 CFR part 835 (occupational radiation protection); and 10 CFR part 820.11 (information accuracy requirements).

APPENDIX A TO PART 824—GENERAL STATEMENT OF ENFORCEMENT POLICY

AUTHORITY: 42 U.S.C. 2201, 2282b, 7101 *et seq.*, 50 U.S.C. 2401 *et seq.*

SOURCE: 70 FR 3607, Jan. 26, 2005, unless otherwise noted.

§ 824.1 Purpose and scope.

This part implements subsections a., c., and d. of section 234B. of the Atomic Energy Act of 1954 (the Act), 42 U.S.C. 2282b. Subsection a. provides that any person who has entered into a contract or agreement with the Department of Energy, or a subcontract or subagreement thereto, and who violates (or whose employee violates) any applicable rule, regulation or order under the Act relating to the security or safeguarding of Restricted Data or other classified information, shall be subject to a civil penalty not to exceed \$120,000 for each violation. Subsections c. and d. specify certain additional authorities and limitations respecting the assessment of such penalties.

[70 FR 3607, Jan. 26, 2005, as amended at 74 FR 66033, Dec. 14, 2009; 79 FR 19, Jan. 2, 2014]

§ 824.2 Applicability.

(a) *General.* These regulations apply to any person that has entered into a contract or agreement with DOE, or a subcontract or sub-agreement thereto.

(b) *Limitations.* DOE may not assess any civil penalty against any entity (including subcontractors and suppliers thereto) specified at subsection d. of section 234A of the Act until the entity enters, after October 5, 1999, into a new contract with DOE or an extension of a current contract with DOE, and the total amount of civil penalties may not exceed the total amount of fees paid by the DOE to that entity in that fiscal year.

(c) *Individual employees.* No civil penalty may be assessed against an individual employee of a contractor or any other entity which enters into an agreement with DOE.

[70 FR 3607, Jan. 26, 2005, as amended at 70 FR 8716, Feb. 23, 2005]

§ 824.3 Definitions.

As used in this part:

Act means the Atomic Energy Act of 1954 (42 U.S.C. 2011 *et seq.*).

Department of Energy

§ 824.6

Administrator means the Administrator of the National Nuclear Security Administration.

Classified information means Restricted Data and Formerly Restricted Data protected against unauthorized disclosure pursuant to the Act and National Security Information that has been determined pursuant to Executive Order 12958, as amended March 25, 2003, or any predecessor or successor executive order to require protection against unauthorized disclosure and that is marked to indicate its classified status when in documentary form.

DOE means the United States Department of Energy, including the National Nuclear Security Administration.

Director means the DOE Official, or his or her designee, to whom the Secretary has assigned responsibility for enforcement of this part.

Person means any person as defined in section 11.s. of the Act, 42 U.S.C. 2014, and includes any affiliate or parent corporation thereof, who enters into a contract or agreement with DOE, or is a party to a contract or subcontract under a contract or agreement with DOE.

Secretary means the Secretary of Energy.

§ 824.4 Civil penalties.

(a) Any person who violates a classified information protection requirement of any of the following is subject to a civil penalty under this part:

(1) 10 CFR part 1016—Safeguarding of Restricted Data;

(2) 10 CFR part 1045—Nuclear Classification and Declassification; or

(3) Any other DOE regulation or rule (including any DOE order or manual enforceable against the contractor or subcontractor under a contractual provision in that contractor's or subcontractor's contract) related to the safeguarding or security of classified information if the regulation or rule provides that violation of its provisions may result in a civil penalty pursuant to subsection a. of section 234B. of the Act.

(b) If, without violating a classified information protection requirement of any regulation or rule under paragraph (a) of this section, a person by an act

or omission causes, or creates a risk of, the loss, compromise or unauthorized disclosure of classified information, the Secretary may issue a compliance order to that person requiring the person to take corrective action and notifying the person that violation of the compliance order is subject to a notice of violation and assessment of a civil penalty. If a person wishes to contest the compliance order, the person must file a notice of appeal with the Secretary within 15 days of receipt of the compliance order.

(c) The Director may propose imposition of a civil penalty for violation of a requirement of a regulation or rule under paragraph (a) of this section or a compliance order issued under paragraph (b) of this section, not to exceed \$120,000 for each violation.

(d) If any violation is a continuing one, each day of such violation shall constitute a separate violation for the purpose of computing the applicable civil penalty.

(e) The Director may enter into a settlement, with or without conditions, of an enforcement proceeding at any time if the settlement is consistent with the objectives of DOE's classified information protection requirements.

[70 FR 3607, Jan. 26, 2005, as amended at 74 FR 66033, Dec. 14, 2009; 79 FR 19, Jan. 2, 2014]

§ 824.5 Investigations.

The Director may conduct investigations and inspections relating to the scope, nature and extent of compliance by a person with DOE security requirements specified in § 824.4(a) and (b) and take such action as the Director deems necessary and appropriate to the conduct of the investigation or inspection, including signing, issuing and serving subpoenas.

§ 824.6 Preliminary notice of violation.

(a) In order to begin a proceeding to impose a civil penalty under this part, the Director shall notify the person by a written preliminary notice of violation sent by certified mail, return receipt requested, of:

(1) The date, facts, and nature of each act or omission constituting the alleged violation;

§ 824.7

10 CFR Ch. III (1-1-16 Edition)

(2) The particular provision of the regulation, rule or compliance order involved in each alleged violation;

(3) The proposed remedy for each alleged violation, including the amount of any civil penalty proposed; and,

(4) The right of the person to submit a written reply to the Director within 30 calendar days of receipt of such preliminary notice of violation.

(b) A reply to a preliminary notice of violation must contain a statement of all relevant facts pertaining to an alleged violation. The reply must:

(1) State any facts, explanations and arguments which support a denial of the alleged violation;

(2) Demonstrate any extenuating circumstances or other reason why a proposed remedy should not be imposed or should be mitigated;

(3) Discuss the relevant authorities which support the position asserted, including rulings, regulations, interpretations, and previous decisions issued by DOE;

(4) Furnish full and complete answers to any questions set forth in the preliminary notice; and

(5) Include copies of all relevant documents.

(c) If a person fails to submit a written reply within 30 calendar days of receipt of a preliminary notice of violation:

(1) The person relinquishes any right to appeal any matter in the preliminary notice; and

(2) The preliminary notice, including any remedies therein, constitutes a final order.

(d) The Director, at the request of a person notified of an alleged violation, may extend for a reasonable period the time for submitting a reply or a hearing request letter.

§ 824.7 Final notice of violation.

(a) If a person submits a written reply within 30 calendar days of receipt of a preliminary notice of violation, the Director must make a final determination whether the person violated or is continuing to violate a classified information security requirement.

(b) Based on a determination by the Director that a person has violated or is continuing to violate a classified information security requirement, the

Director may issue to the person a final notice of violation that concisely states the determined violation, the amount of any civil penalty imposed, and further actions necessary by or available to the person. The final notice of violation also must state that the person has the right to submit to the Director, within 30 calendar days of the receipt of the notice, a written request for a hearing under § 824.8 or, in the alternative, to elect the procedures specified in section 234A.c.(3) of the Act, 42 U.S.C. 2282a.c.(3).

(c) The Director must send a final notice of violation by certified mail, return receipt requested, within 30 calendar days of the receipt of a reply.

(d) Subject to paragraphs (h) and (i) of this section, the effect of final notice shall be:

(1) If a final notice of violation does not contain a civil penalty, it shall be deemed a final order 15 days after the final notice is issued.

(2) If a final notice of violation contains a civil penalty, the person must submit to the Director within 30 days after the issuance of the final notice:

(i) A waiver of further proceedings;

(ii) A request for an on-the-record hearing under § 824.8; or

(iii) A notice of intent to proceed under section 234A.c.(3) of the Act, 42 U.S.C. 2282a.(c)(3).

(e) If a person waives further proceedings, the final notice of violation shall be deemed a final order enforceable against the person. The person must pay the civil penalty set forth in the notice of violation within 60 days of the filing of waiver unless the Director grants additional time.

(f) If a person files a request for an on-the-record hearing, then the hearing process commences.

(g) If the person files a notice of intent to proceed under section 234A.c.(3) of the Act, 42 U.S.C. 2282a.(c)(3), the Director, by order, shall assess the civil penalty set forth in the Notice of Violation.

(h) The Director may amend the final notice of violation at any time before the time periods specified in paragraphs (d)(1) or (d)(2) expire. An amendment shall add fifteen days to the time period under paragraph (d) of this section.

Department of Energy

§ 824.12

(i) The Director may withdraw the final notice of violation, or any part thereof, at any time before the time periods specified in paragraphs (d)(1) or (d)(2) expire.

§ 824.8 Hearing.

(a) Any person who receives a final notice of violation under § 824.7 may request a hearing concerning the allegations contained in the notice. The person must mail or deliver any written request for a hearing to the Director within 30 calendar days of receipt of the final notice of violation.

(b) Upon receipt from a person of a written request for a hearing, the Director shall:

- (1) Appoint a Hearing Counsel; and
- (2) Select an administrative law judge appointed under section 3105 of Title 5, U.S.C., to serve as Hearing Officer.

§ 824.9 Hearing Counsel.

The Hearing Counsel:

- (a) Represents DOE;
- (b) Consults with the person or the person's counsel prior to the hearing;
- (c) Examines and cross-examines witnesses during the hearing; and
- (d) Enters into a settlement of the enforcement proceeding at any time if settlement is consistent with the objectives of the Act and DOE security requirements.

§ 824.10 Hearing Officer.

The Hearing Officer:

- (a) Is responsible for the administrative preparations for the hearing;
- (b) Convenes the hearing as soon as is reasonable;
- (c) Administers oaths and affirmations;
- (d) Issues subpoenas, at the request of either party or on the Hearing Officer's motion;
- (e) Rules on offers of proof and receives relevant evidence;
- (f) Takes depositions or has depositions taken when the ends of justice would be served;
- (g) Conducts the hearing in a manner which is fair and impartial;
- (h) Holds conferences for the settlement or simplification of the issues by consent of the parties;

(i) Disposes of procedural requests or similar matters;

(j) Requires production of documents; and

(k) Makes an initial decision under § 824.13.

§ 824.11 Rights of the person at the hearing.

The person may:

- (a) Testify or present evidence through witnesses or by documents;
- (b) Cross-examine witnesses and rebut records or other physical evidence, except as provided in § 824.12(d);
- (c) Be present during the entire hearing, except as provided in § 824.12(d); and
- (d) Be accompanied, represented and advised by counsel of the person's choosing.

§ 824.12 Conduct of the hearing.

(a) DOE shall make a transcript of the hearing;

(b) Except as provided in paragraph (d) of this section, the Hearing Officer may receive any oral or documentary evidence, but shall exclude irrelevant, immaterial or unduly repetitious evidence;

(c) Witnesses shall testify under oath and are subject to cross-examination, except as provided in paragraph (d) of this section;

(d) The Hearing Officer must use procedures appropriate to safeguard and prevent unauthorized disclosure of classified information or any other information protected from public disclosure by law or regulation, with minimum impairment of rights and obligations under this part. The classified or otherwise protected status of any information shall not, however, preclude its being introduced into evidence. The Hearing Officer may issue such orders as may be necessary to consider such evidence *in camera* including the preparation of a supplemental initial decision to address issues of law or fact that arise out of that portion of the evidence that is classified or otherwise protected.

(e) DOE has the burden of going forward with and of proving by a preponderance of the evidence that the violation occurred as set forth in the final

§ 824.13

notice of violation and that the proposed civil penalty is appropriate. The person to whom the final notice of violation has been addressed shall have the burden of presenting and of going forward with any defense to the allegations set forth in the final notice of violation. Each matter of controversy shall be determined by the Hearing Officer upon a preponderance of the evidence.

§ 824.13 Initial decision.

(a) The Hearing Officer shall issue an initial decision as soon as practicable after the hearing. The initial decision shall contain findings of fact and conclusions regarding all material issues of law, as well as reasons therefor. If the Hearing Officer determines that a violation has occurred and that a civil penalty is appropriate, the initial decision shall set forth the amount of the civil penalty based on:

(1) The nature, circumstances, extent, and gravity of the violation or violations;

(2) The violator's ability to pay;

(3) The effect of the civil penalty on the person's ability to do business;

(4) Any history of prior violations;

(5) The degree of culpability; and

(6) Such other matters as justice may require.

(b) The Hearing Officer shall serve all parties with the initial decision by certified mail, return receipt requested. The initial decision shall include notice that it constitutes a final order of DOE 30 days after the filing of the initial decision unless the Secretary files a Notice of Review. If the Secretary files a notice of Notice of Review, he shall file a final order as soon as practicable after completing his review. The Secretary, at his discretion, may order additional proceedings, remand the matter, or modify the amount of the civil penalty assessed in the initial decision. DOE shall notify the person of the Secretary's action under this paragraph in writing by certified mail, return receipt requested. The person against whom the civil penalty is assessed by the final order shall pay the full amount of the civil penalty assessed in the final order within thirty days (30) unless otherwise agreed by the Director.

10 CFR Ch. III (1-1-16 Edition)

§ 824.14 Special procedures.

A person receiving a final notice of violation under § 824.7 may elect in writing, within 30 days of receipt of such notice, the application of special procedures regarding payment of the penalty set forth in section 234A.c.(3) of the Act, 42 U.S.C. 2282a(c)(3). The Director shall promptly assess a civil penalty, by order, after the date of such election. If the civil penalty has not been paid within sixty calendar days after the assessment has been issued, the DOE shall institute an action in the appropriate District Court of the United States for an order affirming the assessment of the civil penalty.

§ 824.15 Collection of civil penalties.

If any person fails to pay an assessment of a civil penalty after it has become a final order or after the appropriate District Court has entered final judgment for DOE under § 824.14, DOE shall institute an action to recover the amount of such penalty in an appropriate District Court of the United States.

§ 824.16 Direction to NNSA contractors.

(a) Notwithstanding any other provision of this part, the NNSA Administrator, rather than the Director, signs, issues, serves, or takes the following actions that direct NNSA contractors or subcontractors.

(1) Subpoenas;

(2) Orders to compel attendance;

(3) Disclosures of information or documents obtained during an investigation or inspection;

(4) Preliminary notices of violation; and

(5) Final notices of violations.

(b) The Administrator shall act after consideration of the Director's recommendation. If the Administrator disagrees with the Director's recommendation, and the disagreement cannot be resolved by the two officials, the Director may refer the matter to the Deputy Secretary for resolution.

APPENDIX A TO PART 824—GENERAL
STATEMENT OF ENFORCEMENT POLICY

I. INTRODUCTION

a. This policy statement sets forth the general framework through which DOE will seek to ensure compliance with its classified information security regulations and rules and classified information security-related compliance orders (hereafter collectively referred to as classified information security requirements).

The policy set forth herein is applicable to violations of classified information security requirements by DOE contractors and their subcontractors (hereafter collectively referred to as DOE contractors). This policy statement is not a regulation and is intended only to provide general guidance to those persons subject to the classified information security requirements. It is not intended to establish a formulaic approach to the initiation and resolution of situations involving noncompliance with these requirements. Rather, DOE intends to consider the particular facts of each noncompliance situation in determining whether enforcement penalties are appropriate and, if so, the appropriate magnitude of those penalties. DOE reserves the option to deviate from this policy statement when appropriate in the circumstances of particular cases.

b. Both the Department of Energy Organization Act, 42 U.S.C. 7101, and the Atomic Energy Act of 1954 (the Act), 42 U.S.C. 2011, require DOE to protect and provide for the common defense and security of the United States in conducting its nuclear activities, and grant DOE broad authority to achieve this goal.

c. The DOE goal in the compliance arena is to enhance and protect the common defense and security at DOE facilities by fostering a culture among both DOE line organizations and contractors that actively seeks to attain and sustain compliance with classified information security requirements. The enforcement program and policy have been developed with the express purpose of achieving a culture of active commitment to security and voluntary compliance. DOE will establish effective administrative processes and incentives for contractors to identify and report noncompliances promptly and openly and to initiate comprehensive corrective actions to resolve both the noncompliances themselves and the program or process deficiencies that led to noncompliance.

d. In the development of the DOE enforcement policy, DOE believes that the reasonable exercise of its enforcement authority can help to reduce the likelihood of serious security incidents. This can be accomplished by providing greater emphasis on a culture of security awareness in existing DOE operations and strong incentives for contractors

to identify and correct noncompliance conditions and processes in order to protect classified information of vital significance to this nation. DOE wants to facilitate, encourage, and support contractor initiatives for the prompt identification and correction of problems. These initiatives and activities will be duly considered in exercising enforcement discretion.

e. Section 234B of the Act provides DOE with the authority to impose civil penalties and also with the authority to compromise, modify, or remit civil penalties with or without conditions. In implementing section 234B, DOE will carefully consider the facts of each case of noncompliance and will exercise appropriate judgment in taking any enforcement action. Part of the function of a sound enforcement program is to assure a proper and continuing level of security vigilance. The reasonable exercise of enforcement authority will be facilitated by the appropriate application of security requirements to nuclear facilities and by promoting and coordinating the proper contractor attitude toward complying with those requirements.

II. PURPOSE

The purpose of the DOE enforcement program is to promote and protect the common defense and security of the United States by:

a. Ensuring compliance by DOE contractors with applicable classified information security requirements.

b. Providing positive incentives for a DOE contractor's:

(1) Timely self-identification of security deficiencies,

(2) Prompt and complete reporting of such deficiencies to DOE,

(3) Root cause analyses of security deficiencies,

(4) Prompt correction of security deficiencies in a manner which precludes recurrence, and

(5) Identification of modifications in practices or facilities that can improve security.

c. Deterring future violations of DOE requirements by a DOE contractor.

d. Encouraging the continuous overall improvement of operations at DOE facilities.

III. STATUTORY AUTHORITY

Section 234B of the Act subjects contractors, and their subcontractors and suppliers, to civil penalties for violations of DOE regulations, rules and orders regarding the safeguarding and security of Restricted Data and other classified information.

IV. PROCEDURAL FRAMEWORK

a. 10 CFR part 824 sets forth the procedures DOE will use in exercising its enforcement authority, including the issuance of notices of violation and the resolution of contested

enforcement actions in the event a DOE contractor elects to adjudicate contested issues before an administrative law judge.

b. Pursuant to §824.6, the Director initiates the civil penalty process by issuing a preliminary notice of violation that specifies a proposed civil penalty. The DOE contractor is required to respond in writing to the preliminary notice of violation, either admitting the violation and waiving its right to contest the proposed civil penalty and paying it; admitting the violation, but asserting the existence of mitigating circumstances that warrant either the total or partial remission of the civil penalty; or denying that the violation has occurred and providing the basis for its belief that the preliminary notice of violation is incorrect. After evaluation of the DOE's contractor response, the Director may determine that no violation has occurred; that the violation occurred as alleged in the preliminary notice of violation, but that the proposed civil penalty should be remitted in whole or in part; or that the violation occurred as alleged in the preliminary notice of violation and that the proposed civil penalty is appropriate notwithstanding the asserted mitigating circumstances. In the latter two instances, the Director will issue a final notice of violation or a final notice of violation with proposed civil penalty.

c. An opportunity to challenge a proposed civil penalty either before an administrative law judge or in a United States District Court is provided in 42 U.S.C. 2282a(c). Part 824 sets forth the procedures associated with an administrative hearing, should the contractor opt for that method of challenging the proposed civil penalty.

V. SEVERITY OF VIOLATIONS

a. Violations of classified information security requirements have varying degrees of security significance. Therefore, the relative importance of each violation must be identified as the first step in the enforcement process. Violations of classified information security requirements are categorized in three levels of severity to identify their relative security significance. Notices of violation are issued for noncompliance and propose civil penalties commensurate with the severity level of the violation(s) involved.

b. Severity Level I has been assigned to violations that are the most significant and Severity Level III violations are the least significant. Severity Level I is reserved for violations of classified information security requirements which involve actual or high potential for adverse impact on the national security. Severity Level II violations represent a significant lack of attention or carelessness toward responsibilities of DOE contractors for the protection of classified information which could, if uncorrected, potentially lead to an adverse impact on the na-

tional security. Severity Level III violations are less serious, but are of more than minor concern: *i.e.*, if left uncorrected, they could lead to a more serious concern. In some cases, violations may be evaluated in the aggregate and a single severity level assigned for a group of violations.

c. Isolated minor violations of classified information security requirements will not be the subject of formal enforcement action through the issuance of a notice of violation. However, these minor violations will be identified as noncompliances and tracked to assure that appropriate corrective/remedial action is taken to prevent their recurrence, and evaluated to determine if generic or specific problems exist. If circumstances demonstrate that a number of related minor noncompliances have occurred in the same time frame (*e.g.*, all identified during the same assessment), or that related minor noncompliances have recurred despite prior notice to the DOE contractor and sufficient opportunity to correct the problem, DOE may choose in its discretion to consider the noncompliances in the aggregate as a more serious violation warranting a Severity Level III designation, a notice of violation and a possible civil penalty.

d. The severity level of a violation will depend, in part, on the degree of culpability of the DOE contractor with regard to the violation. Thus, inadvertent or negligent violations will be viewed differently from those in which there is gross negligence, deception or willfulness. In addition to the significance of the underlying violation and level of culpability involved, DOE will also consider the position, training and experience of the person involved in the violation. Thus, for example, a violation may be deemed to be more significant if a senior manager of an organization is involved rather than a foreman or non-supervisory employee. In this regard, while management involvement, direct or indirect, in a violation may lead to an increase in the severity level of a violation and proposed civil penalty, the lack of such involvement will not constitute grounds to reduce the severity level of a violation or mitigate a civil penalty. Allowance of mitigation in such circumstances could encourage lack of management involvement in DOE contractor activities and a decrease in protection of classified information.

e. Other factors which will be considered by DOE in determining the appropriate severity level of a violation are the duration of the violation, the past performance of the DOE contractor in the particular activity area involved, whether the DOE contractor had prior notice of a potential problem, and whether there are multiple examples of the violation in the same time frame rather than an isolated occurrence. The relative weight given to each of these factors in arriving at

the appropriate severity level will depend on the circumstances of each case.

f. DOE expects contractors to provide full, complete, timely, and accurate information and reports. Accordingly, the severity level of a violation involving either failure to make a required report or notification to DOE or an untimely report or notification will be based upon the significance of, and the circumstances surrounding, the matter that should have been reported. A contractor will not normally be cited for a failure to report a condition or event unless the contractor was actually aware or should have been aware of the condition or event which it failed to report.

VI. ENFORCEMENT CONFERENCES

a. Should DOE determine, after completion of all assessment and investigation activities associated with a potential or alleged violation of classified information security requirements, that there is a reasonable basis to believe that a violation has actually occurred, and the violation may warrant a civil penalty, DOE will normally hold an enforcement conference with the DOE contractor involved prior to taking enforcement action. DOE may also elect to hold an enforcement conference for potential violations which would not ordinarily warrant a civil penalty but which could, if repeated, lead to such action. The purpose of the enforcement conference is to assure the accuracy of the facts upon which the preliminary determination to consider enforcement action is based, discuss the potential or alleged violations, their significance and causes, and the nature of and schedule for the DOE contractor's corrective actions, determine whether there are any aggravating or mitigating circumstances, and obtain other information which will help determine the appropriate enforcement action.

b. DOE contractors will be informed prior to a meeting when that meeting is considered to be an enforcement conference. Such conferences are informal mechanisms for candid pre-decisional discussions regarding potential or alleged violations and will not normally be open to the public. In circumstances for which immediate enforcement action is necessary in the interest of the national security, such action will be taken prior to the enforcement conference, which may still be held after the necessary DOE action has been taken.

VII. ENFORCEMENT LETTER

a. In cases where DOE has decided not to issue a notice of violation, DOE may send an enforcement letter to the contractor signed by the Director. The enforcement letter is intended to communicate the basis of the decision not to pursue further enforcement action for a noncompliance. The enforcement

letter is intended to point contractors to the desired level of security performance. It may be used when the Director concludes the specific noncompliance at issue is not of the level of significance warranted for issuance of a notice of violation. The enforcement letter will typically describe how the contractor handled the circumstances surrounding the noncompliance and address additional areas requiring the contractor's attention and DOE's expectations for corrective action. The enforcement letter notifies the contractor that, when verification is received that corrective actions have been implemented, DOE will close the enforcement action. In the case of NNSA contractors or subcontractors, the enforcement letter will take the form of advising the contractor or subcontractor that the Director has consulted with the NNSA Administrator who agrees that further enforcement action should not be pursued if verification is received that corrective actions have been implemented by the contractor or subcontractor.

b. In many investigations, an enforcement letter may not be required. When DOE decides that a contractor has appropriately corrected a noncompliance or that the significance of the noncompliance is sufficiently low, it may close out an investigation without such enforcement letter. A closeout of a noncompliance with or without an enforcement letter may only take place after the Director has issued a letter confirming that corrective actions have been completed. In the case of NNSA contractors or subcontractors, the Director's letter will take the form of confirming that corrective actions have been completed and advising that the Director has consulted with the NNSA Administrator who agrees that no enforcement action should be pursued.

VIII. ENFORCEMENT ACTIONS

The nature and extent of the enforcement action is intended to reflect the seriousness of the violation involved. For the vast majority of violations for which DOE assigns severity levels as described previously, a notice of violation will be issued, requiring a formal response from the recipient describing the nature of and schedule for corrective actions it intends to take regarding the violation.

1. Notice of Violation

a. A Notice of Violation (preliminary or final) is a document setting forth the conclusion that one or more violations of classified information security requirements have occurred. Such a notice normally requires the recipient to provide a written response which may take one of several positions described in Section IV of this policy statement. In the

event that the recipient concedes the occurrence of the violation, it is required to describe corrective steps which have been taken and the results achieved; remedial actions which will be taken to prevent recurrence; and the date by which full compliance will be achieved.

b. DOE will use the notice of violation as the standard method for formalizing the existence of a possible violation and the notice of violation will be issued in conjunction with the proposed imposition of a civil penalty. In certain limited instances, as described in this section, DOE may refrain from the issuance of an otherwise appropriate notice of violation. However, a notice of violation normally will be issued for willful violations, for violations where past corrective actions for similar violations have not been sufficient to prevent recurrence and there are no other mitigating circumstances.

c. DOE contractors are not ordinarily cited for violations resulting from matters not within their control, such as equipment failures that were not avoidable by reasonable quality assurance measures, proper maintenance, or management controls. With regard to the issue of funding, however, DOE does not consider an asserted lack of funding to be a justification for noncompliance with classified information security requirements. Should a contractor believe that a shortage of funding precludes it from achieving compliance with one or more of these requirements, it may request, in writing, an exemption from the requirement(s) in question from the appropriate Secretarial Officer (SO). If no exemption is granted, the contractor, in conjunction with the SO, must take appropriate steps to modify, curtail, suspend or cease the activities which cannot be conducted in compliance with the classified information security requirement(s) in question.

d. DOE expects the contractors which operate its facilities to have the proper management and supervisory systems in place to assure that all activities at DOE facilities, regardless of who performs them, are carried out in compliance with all classified information security requirements. Therefore, contractors normally will be held responsible for the acts or omissions of their employees and subcontractor employees in the conduct of activities at DOE facilities.

2. Civil Penalty

a. A civil penalty is a monetary penalty that may be imposed for violations of applicable classified information security requirements, including compliance orders. Civil penalties are designed to emphasize the need for lasting remedial action, deter future violations, and underscore the importance of DOE contractor self-identification, reporting and correction of violations.

b. Absent mitigating circumstances as described below, or circumstances otherwise warranting the exercise of enforcement discretion by DOE as described in this section, civil penalties will be proposed for Severity Level I and II violations. Civil penalties also will be proposed for Severity Level III violations which are similar to previous violations for which the contractor did not take effective corrective action. “Similar” violations are those which could reasonably have been expected to have been prevented by corrective action for the previous violation. DOE normally considers civil penalties only for similar Severity Level III violations that occur over an extended period of time.

c. DOE will impose different base level civil penalties considering the severity level of the violation(s). Table 1 shows the daily base civil penalties for the various categories of severity levels. However, as described in Section V, the imposition of civil penalties will also take into account the gravity, circumstances, and extent of the violation or violations and, with respect to the violator, any history of prior similar violations and the degree of culpability and knowledge.

d. Regarding the factor of ability of DOE contractors to pay the civil penalties, it is not DOE's intention that the economic impact of a civil penalty is such that it puts a DOE contractor out of business. Contract termination, rather than civil penalties, is used when the intent is to terminate a contractor's management of a DOE facility. The deterrent effect of civil penalties is best served when the amount of such penalties takes this factor into account. However, DOE will evaluate the relationship of entities affiliated with the contractor (such as parent corporations) when it asserts that it cannot pay the proposed penalty.

e. DOE will review each case involving a proposed civil penalty on its own merit and adjust the base civil penalty values upward or downward appropriately. As indicated in paragraph 2.c of this section, Table 1 identifies the daily base civil penalty values for different severity levels. After considering all relevant circumstances, civil penalties may be escalated or mitigated based upon the adjustment factors described below in this section. In no instance will a civil penalty for any one violation exceed the \$120,000 statutory limit per violation. However, it should be noted that if a violation is a continuing one, under the statute, each day the violation continued constitutes a separate violation for purposes of computing the civil penalty. Thus, the per violation cap will not shield a DOE contractor that is or should have been aware of an ongoing violation and has not reported it to DOE and taken corrective action despite an opportunity to do so from liability significantly exceeding

\$120,000.. Further, as described in this section, the duration of a violation will be taken into account in determining the appropriate severity level of the base civil penalty.

TABLE 1—SEVERITY LEVEL BASE CIVIL PENALTIES

Severity level	Base civil penalty amount (percentage of maximum civil penalty per violation per day)
I	100
II	50
III	10

3. Adjustment Factors

a. DOE’s enforcement program is not an end in itself, but a means to achieve compliance with classified information security requirements, and civil penalties are not assessed for revenue purposes, but rather to emphasize the importance of compliance and to deter future violations. The single most important goal of the DOE enforcement program is to encourage early identification and reporting of security deficiencies and violations of classified information security requirements by the DOE contractors themselves rather than by DOE, and the prompt correction of any deficiencies and violations so identified. With respect to their own practices and those of their subcontractors, DOE believes that DOE contractors are in the best position to identify and promptly correct noncompliance with classified information security requirements. DOE expects that these contractors should have in place internal compliance programs which will ensure the detection, reporting and prompt correction of security-related problems that may constitute, or lead to, violations of classified information security requirements before, rather than after, DOE has identified such violations. Thus, DOE contractors are expected to be aware of and to address security problems before they are discovered by DOE. Obviously, protection of classified information is enhanced if deficiencies are discovered (and promptly corrected) by the DOE contractor, rather than by DOE, which may not otherwise become aware of a deficiency until later on, during the course of an inspection, performance assessment, or following an incident at the facility. Early identification of classified information security-related problems by DOE contractors can also have the added benefit of allowing information which could prevent such problems at other facilities in the DOE complex to be shared with other appropriate DOE contractors.

b. Pursuant to this enforcement philosophy, DOE will provide substantial incentive for the early self-identification, reporting

and prompt correction of problems which constitute, or could lead to, violations of classified information security requirements. Thus, application of the adjustment factors set forth below may result in no civil penalty being assessed for violations that are identified, reported, and promptly and effectively corrected by the DOE contractor.

c. On the other hand, ineffective programs for problem identification and correction are unacceptable. Thus, for example, where a contractor fails to disclose and promptly correct violations of which it was aware or should have been aware, substantial civil penalties are warranted and may be sought, including the assessment of civil penalties for continuing violations on a per day basis.

d. Further, in cases involving factors of willfulness, repeated violations, patterns of systematic violations, flagrant DOE-identified violations or serious breakdown in management controls, DOE intends to apply its full statutory enforcement authority where such action is warranted. Based on the degree of such factors, DOE may escalate the amount of civil penalties up to the statutory maximum of \$120,000 per violation per day for continuing violations.

4. Identification and Reporting

Reduction of up to 50% of the base civil penalty shown in Table 1 may be given when a DOE contractor identifies the violation and promptly reports the violation to the DOE. In weighing this factor, consideration will be given to, among other things, the opportunity available to discover the violation, the ease of discovery and the promptness and completeness of any required report. No consideration will be given to a reduction in penalty if the DOE contractor does not take prompt action to report the problem to DOE upon discovery, or if the immediate actions necessary to restore compliance with classified information security requirements or place the facility or operation in a safe configuration are not taken.

5. Self-Identification and Tracking Systems

a. DOE strongly encourages contractors to self-identify noncompliances with classified information security requirements before the noncompliances lead to a string of similar and potentially more significant events or consequences. When a contractor identifies a noncompliance through its own self-monitoring activity, DOE will normally allow a reduction in the amount of civil penalties, regardless of whether prior opportunities existed for contractors to identify the noncompliance. DOE normally will not allow a reduction in civil penalties for self-identification if DOE intervention was required to induce the contractor to report a noncompliance.

b. Self-identification of a noncompliance is possibly the single most important factor in considering a reduction in the civil penalty amount. Consideration of self-identification is linked to, among other things, whether prior opportunities existed to discover the violation, and if so, the age and number of such opportunities; the extent to which proper contractor controls should have identified or prevented the violation; whether discovery of the violation resulted from a contractor's self-monitoring activity; the extent of DOE involvement in discovering the violation or in prompting the contractor to identify the violation; and the promptness and completeness of any required report. Self-identification is also considered by DOE in deciding whether to pursue an investigation.

6. Self-Disclosing Events

a. DOE expects contractors to demonstrate acceptance of responsibility for security of classified information and to pro-actively identify noncompliance conditions in their programs and processes. In deciding whether to reduce any civil penalty proposed for violations revealed by the occurrence of a self-disclosing event (*e.g.* belated discovery of the disappearance of classified information or material subject to accountability rules), DOE will consider the ease with which a contractor could have discovered the noncompliance, *i.e.* failure to comply with classified information accountability rules, that contributed to the event and the prior opportunities that existed to discover the noncompliance. When the occurrence of an event discloses noncompliances that the contractor could have or should have identified before the event, DOE will not generally allow a reduction in civil penalties for self-identification. If a contractor simply reacts to events that disclose potentially significant consequences or downplays noncompliances which did not result in significant consequences, such contractor actions do not lead to the improvement in protection of classified information contemplated by the Act.

b. The key test is whether the contractor reasonably could have detected any of the underlying noncompliances that contributed to the event. Failure to utilize events and activities to address noncompliances may result in higher civil penalty assessments or a DOE decision not to reduce civil penalty amounts.

7. Corrective Action To Prevent Recurrence

The promptness (or lack thereof) and extent to which the DOE contractor takes corrective action, including actions to identify root causes and prevent recurrence, may result in up to a 50% increase or decrease in the base civil penalty shown in Table 1. For example, very extensive corrective action may result in reducing the proposed civil

penalty as much as 50% of the base value shown in Table 1. On the other hand, the civil penalty may be increased as much as 50% of the base value if initiation or corrective action is not prompt or if the corrective action is only minimally acceptable. In weighing this factor, consideration will be given to, among other things, the appropriateness, timeliness and degree of initiative associated with the corrective action. The comprehensiveness of the corrective action will also be considered, taking into account factors such as whether the action is focused narrowly to the specific violation or broadly to the general area of concern.

8. DOE's Contribution to a Violation

There may be circumstances in which a violation of a classified information security requirement results, in part or entirely, from a direction given by DOE personnel to a DOE contractor to either take, or forbear from taking an action at a DOE facility. In such cases, DOE may refrain from issuing a notice of violation, and may mitigate, either partially or entirely, any proposed civil penalty, provided that the direction upon which the DOE contractor relied is documented in writing, contemporaneously with the direction. It should be emphasized, however, that no interpretation of a classified information security requirement is binding upon DOE unless issued in writing by the General Counsel. Further, as discussed in this section of this policy statement, lack of funding by itself will not be considered as a mitigating factor in enforcement actions.

9. Exercise of Discretion

Because DOE wants to encourage and support DOE contractor initiative for prompt self-identification, reporting and correction of problems, DOE may exercise discretion as follows:

a. In accordance with the previous discussion, DOE may refrain from issuing a civil penalty for a violation which meets all of the following criteria:

(1) The violation is promptly identified and reported to DOE before DOE learns of it;

(2) The violation is not willful or a violation that could reasonably be expected to have been prevented by the DOE contractor's corrective action for a previous violation;

(3) The DOE contractor, upon discovery of the violation, has taken or begun to take prompt and appropriate action to correct the violation; and

(4) The DOE contractor has taken, or has agreed to take, remedial action satisfactory to DOE to preclude recurrence of the violation and the underlying conditions which caused it.

b. DOE may refrain from proposing a civil penalty for a violation involving a past problem that meets all of the following criteria:

(1) It was identified by a DOE contractor as a result of a formal effort such as an annual self assessment that has a defined scope and timetable which is being aggressively implemented and reported;

(2) Comprehensive corrective action has been taken or is well underway within a reasonable time following identification; and

(3) It was not likely to be identified by routine contractor efforts such as normal surveillance or quality assurance activities.

c. DOE will not issue a notice of violation for cases in which the violation discovered by the DOE contractor cannot reasonably be linked to the conduct of that contractor, provided that prompt and appropriate action is taken by the DOE contractor upon identification of the past violation to report to DOE and remedy the problem.

d. DOE may refrain from issuing a notice of violation for an act or omission constituting noncompliance that meets all of the following criteria:

(1) It was promptly identified by the contractor;

(2) It is normally classified at a Severity Level III;

(3) It was promptly reported to DOE;

(4) Prompt and appropriate corrective action will be taken, including measures to prevent recurrence; and

(5) It was not a willful violation or a violation that could reasonably be expected to have been prevented by the DOE contractor's corrective action for a previous violation.

e. DOE may refrain from issuing a notice of violation for an act or omission constituting noncompliance that meets all of the following criteria:

(1) It was an isolated Severity Level III violation identified during an inspection or evaluation conducted by the Office of Independent Oversight, or a DOE security survey, or during some other DOE assessment activity;

(2) The identified noncompliance was properly reported by the contractor upon discovery;

(3) The contractor initiated or completed appropriate assessment and corrective actions within a reasonable period, usually before the termination of the onsite inspection or integrated performance assessment; and

(4) The violation was not willful or one which could reasonably be expected to have been prevented by the DOE contractor's corrective action for a previous violation.

f. In situations where corrective actions have been completed before termination of an inspection or assessment, a formal response from the contractor is not required and the inspection or integrated performance assessment report serves to document the violation and the corrective action. However, in all instances, the contractor is required to report the noncompliance through established reporting mechanisms so the non-

compliance issue and any corrective actions can be properly tracked and monitored.

g. If DOE initiates an enforcement action for a violation at a Severity Level II or III and, as part of the corrective action for that violation, the DOE contractor identifies other examples of the violation with the same root cause, DOE may refrain from initiating an additional enforcement action. In determining whether to exercise this discretion, DOE will consider whether the DOE contractor acted reasonably and in a timely manner appropriate to the security significance of the initial violation, the comprehensiveness of the corrective action, whether the matter was reported, and whether the additional violation(s) substantially change the security significance or character of the concern arising out of the initial violation.

h. The preceding paragraphs are solely intended to be examples indicating when enforcement discretion may be exercised to forego the issuance of a civil penalty or, in some cases, the initiation of any enforcement action at all. However, notwithstanding these examples, a civil penalty may be proposed or notice of violation issued when, in DOE's judgment, such action is warranted on the basis of the circumstances of an individual case.

§ 830.1

APPENDIX A TO SUBPART B OF PART 830—GENERAL STATEMENT OF SAFETY BASIS POLICY

AUTHORITY: 42 U.S.C. 2201; 42 U.S.C. 7101 *et seq.*; and 50 U.S.C. 2401 *et seq.*

SOURCE: 66 FR 1818, Jan. 10, 2001, unless otherwise noted.

§ 830.1 Scope.

This part governs the conduct of DOE contractors, DOE personnel, and other persons conducting activities (including providing items and services) that affect, or may affect, the safety of DOE nuclear facilities.

§ 830.2 Exclusions.

This part does not apply to:

(a) Activities that are regulated through a license by the Nuclear Regulatory Commission (NRC) or a State under an Agreement with the NRC, including activities certified by the NRC under section 1701 of the Atomic Energy Act (Act);

(b) Activities conducted under the authority of the Director, Naval Nuclear Propulsion, pursuant to Executive Order 12344, as set forth in Public Law 106-65;

(c) Transportation activities which are regulated by the Department of Transportation;

(d) Activities conducted under the Nuclear Waste Policy Act of 1982, as amended, and any facility identified under section 202(5) of the Energy Reorganization Act of 1974, as amended; and

(e) Activities related to the launch approval and actual launch of nuclear energy systems into space.

§ 830.3 Definitions.

(a) The following definitions apply to this part:

Administrative controls means the provisions relating to organization and management, procedures, record-keeping, assessment, and reporting necessary to ensure safe operation of a facility.

Bases appendix means an appendix that describes the basis of the limits and other requirements in technical safety requirements.

Critical assembly means special nuclear devices designed and used to sustain nuclear reactions, which may be

10 CFR Ch. III (1–1–16 Edition)

subject to frequent core and lattice configuration change and which frequently may be used as mockups of reactor configurations.

Criticality means the condition in which a nuclear fission chain reaction becomes self-sustaining.

Design features means the design features of a nuclear facility specified in the technical safety requirements that, if altered or modified, would have a significant effect on safe operation.

Document means recorded information that describes, specifies, reports, certifies, requires, or provides data or results.

Documented safety analysis means a documented analysis of the extent to which a nuclear facility can be operated safely with respect to workers, the public, and the environment, including a description of the conditions, safe boundaries, and hazard controls that provide the basis for ensuring safety.

Environmental restoration activities means the process(es) by which contaminated sites and facilities are identified and characterized and by which contamination is contained, treated, or removed and disposed.

Existing DOE nuclear facility means a DOE nuclear facility in operation before April 9, 2001.

Fissionable materials means a nuclide capable of sustaining a neutron-induced chain reaction (*e.g.*, uranium-233, uranium-235, plutonium-238, plutonium-239, plutonium-241, neptunium-237, americium-241, and curium-244).

Graded approach means the process of ensuring that the level of analysis, documentation, and actions used to comply with a requirement in this part are commensurate with:

(1) The relative importance to safety, safeguards, and security;

(2) The magnitude of any hazard involved;

(3) The life cycle stage of a facility;

(4) The programmatic mission of a facility;

(5) The particular characteristics of a facility;

(6) The relative importance of radiological and nonradiological hazards; and

(7) Any other relevant factor.

Hazard means a source of danger (i.e., material, energy source, or operation) with the potential to cause illness, injury, or death to a person or damage to a facility or to the environment (without regard to the likelihood or credibility of accident scenarios or consequence mitigation).

Hazard controls means measures to eliminate, limit, or mitigate hazards to workers, the public, or the environment, including

- (1) Physical, design, structural, and engineering features;
- (2) Safety structures, systems, and components;
- (3) Safety management programs;
- (4) Technical safety requirements; and
- (5) Other controls necessary to provide adequate protection from hazards.

Item is an all-inclusive term used in place of any of the following: appurtenance, assembly, component, equipment, material, module, part, product, structure, subassembly, subsystem, system, unit, or support systems.

Limiting conditions for operation means the limits that represent the lowest functional capability or performance level of safety structures, systems, and components required for safe operations.

Limiting control settings means the settings on safety systems that control process variables to prevent exceeding a safety limit.

Low-level residual fixed radioactivity means the remaining radioactivity following reasonable efforts to remove radioactive systems, components, and stored materials. The remaining radioactivity is composed of surface contamination that is fixed following chemical cleaning or some similar process; a component of surface contamination that can be picked up by smears; or activated materials within structures. The radioactivity can be characterized as low-level if the smearable radioactivity is less than the values defined for removable contamination by 10 CFR Part 835, Appendix D, Surface Contamination Values, and the hazard analysis results show that no credible accident scenario or work practices would release the remaining fixed radioactivity or activation components at levels that would

prudently require the use of active safety systems, structures, or components to prevent or mitigate a release of radioactive materials.

Major modification means a modification to a DOE nuclear facility that is completed on or after April 9, 2001 that substantially changes the existing safety basis for the facility.

New DOE nuclear facility means a DOE nuclear facility that begins operation on or after April 9, 2001.

Nonreactor nuclear facility means those facilities, activities or operations that involve, or will involve, radioactive and/or fissionable materials in such form and quantity that a nuclear or a nuclear explosive hazard potentially exists to workers, the public, or the environment, but does not include accelerators and their operations and does not include activities involving only incidental use and generation of radioactive materials or radiation such as check and calibration sources, use of radioactive sources in research and experimental and analytical laboratory activities, electron microscopes, and X-ray machines.

Nuclear facility means a reactor or a nonreactor nuclear facility where an activity is conducted for or on behalf of DOE and includes any related area, structure, facility, or activity to the extent necessary to ensure proper implementation of the requirements established by this Part.

Operating limits means those limits required to ensure the safe operation of a nuclear facility, including limiting control settings and limiting conditions for operation.

Preliminary documented safety analysis means documentation prepared in connection with the design and construction of a new DOE nuclear facility or a major modification to a DOE nuclear facility that provides a reasonable basis for the preliminary conclusion that the nuclear facility can be operated safely through the consideration of factors such as

- (1) The nuclear safety design criteria to be satisfied;
- (2) A safety analysis that derives aspects of design that are necessary to satisfy the nuclear safety design criteria; and

(3) An initial listing of the safety management programs that must be developed to address operational safety considerations.

Process means a series of actions that achieves an end or result.

Quality means the condition achieved when an item, service, or process meets or exceeds the user's requirements and expectations.

Quality assurance means all those actions that provide confidence that quality is achieved.

Quality Assurance Program (QAP) means the overall program or management system established to assign responsibilities and authorities, define policies and requirements, and provide for the performance and assessment of work.

Reactor means any apparatus that is designed or used to sustain nuclear chain reactions in a controlled manner such as research, test, and power reactors, and critical and pulsed assemblies and any assembly that is designed to perform subcritical experiments that could potentially reach criticality; and, unless modified by words such as containment, vessel, or core, refers to the entire facility, including the housing, equipment and associated areas devoted to the operation and maintenance of one or more reactor cores.

Record means a completed document or other media that provides objective evidence of an item, service, or process.

Safety basis means the documented safety analysis and hazard controls that provide reasonable assurance that a DOE nuclear facility can be operated safely in a manner that adequately protects workers, the public, and the environment.

Safety class structures, systems, and components means the structures, systems, or components, including portions of process systems, whose preventive or mitigative function is necessary to limit radioactive hazardous material exposure to the public, as determined from safety analyses.

Safety evaluation report means the report prepared by DOE to document

(1) The sufficiency of the documented safety analysis for a hazard category 1, 2, or 3 DOE nuclear facility;

(2) The extent to which a contractor has satisfied the requirements of Subpart B of this part; and

(3) The basis for approval by DOE of the safety basis for the facility, including any conditions for approval.

Safety limits means the limits on process variables associated with those safety class physical barriers, generally passive, that are necessary for the intended facility function and that are required to guard against the uncontrolled release of radioactive materials.

Safety management program means a program designed to ensure a facility is operated in a manner that adequately protects workers, the public, and the environment by covering a topic such as: quality assurance; maintenance of safety systems; personnel training; conduct of operations; inadvertent criticality protection; emergency preparedness; fire protection; waste management; or radiological protection of workers, the public, and the environment.

Safety management system means an integrated safety management system established consistent with 48 CFR 970.5223–1.

Safety significant structures, systems, and components means the structures, systems, and components which are not designated as safety class structures, systems, and components, but whose preventive or mitigative function is a major contributor to defense in depth and/or worker safety as determined from safety analyses.

Safety structures, systems, and components means both safety class structures, systems, and components and safety significant structures, systems, and components.

Service means the performance of work, such as design, manufacturing, construction, fabrication, assembly, decontamination, environmental restoration, waste management, laboratory sample analyses, inspection, non-destructive examination/testing, environmental qualification, equipment qualification, repair, installation, or the like.

Surveillance requirements means requirements relating to test, calibration, or inspection to ensure that the necessary operability and quality of

safety structures, systems, and components and their support systems required for safe operations are maintained, that facility operation is within safety limits, and that limiting control settings and limiting conditions for operation are met.

Technical safety requirements (TSRs) means the limits, controls, and related actions that establish the specific parameters and requisite actions for the safe operation of a nuclear facility and include, as appropriate for the work and the hazards identified in the documented safety analysis for the facility: Safety limits, operating limits, surveillance requirements, administrative and management controls, use and application provisions, and design features, as well as a bases appendix.

Unreviewed Safety Question (USQ) means a situation where

- (1) The probability of the occurrence or the consequences of an accident or the malfunction of equipment important to safety previously evaluated in the documented safety analysis could be increased;
- (2) The possibility of an accident or malfunction of a different type than any evaluated previously in the documented safety analysis could be created;
- (3) A margin of safety could be reduced; or
- (4) The documented safety analysis may not be bounding or may be otherwise inadequate.

Unreviewed Safety Question process means the mechanism for keeping a safety basis current by reviewing potential unreviewed safety questions, reporting unreviewed safety questions to DOE, and obtaining approval from DOE prior to taking any action that involves an unreviewed safety question.

Use and application provisions means the basic instructions for applying technical safety requirements.

(b) Terms defined in the Act or in 10 CFR part 820 and not defined in this section of the rule are to be used consistent with the meanings given in the Act or in 10 CFR part 820.

§ 830.4 General requirements.

(a) No person may take or cause to be taken any action inconsistent with the requirements of this part.

(b) A contractor responsible for a nuclear facility must ensure implementation of, and compliance with, the requirements of this part.

(c) The requirements of this part must be implemented in a manner that provides reasonable assurance of adequate protection of workers, the public, and the environment from adverse consequences, taking into account the work to be performed and the associated hazards.

(d) If there is no contractor for a DOE nuclear facility, DOE must ensure implementation of, and compliance with, the requirements of this part.

§ 830.5 Enforcement.

The requirements in this part are DOE Nuclear Safety Requirements and are subject to enforcement by all appropriate means, including the imposition of civil and criminal penalties in accordance with the provisions of 10 CFR part 820.

§ 830.6 Recordkeeping.

A contractor must maintain complete and accurate records as necessary to substantiate compliance with the requirements of this part.

§ 830.7 Graded approach.

Where appropriate, a contractor must use a graded approach to implement the requirements of this part, document the basis of the graded approach used, and submit that documentation to DOE. The graded approach may not be used in implementing the unreviewed safety question (USQ) process or in implementing technical safety requirements.

Subpart A—Quality Assurance Requirements

§ 830.120 Scope.

This subpart establishes quality assurance requirements for contractors conducting activities, including providing items or services, that affect, or may affect, nuclear safety of DOE nuclear facilities.

§ 830.121 Quality Assurance Program (QAP).

(a) Contractors conducting activities, including providing items or services, that affect, or may affect, the nuclear safety of DOE nuclear facilities must conduct work in accordance with the Quality Assurance criteria in § 830.122.

(b) The contractor responsible for a DOE nuclear facility must:

(1) Submit a QAP to DOE for approval and regard the QAP as approved 90 days after submittal, unless it is approved or rejected by DOE at an earlier date.

(2) Modify the QAP as directed by DOE.

(3) Annually submit any changes to the DOE-approved QAP to DOE for approval. Justify in the submittal why the changes continue to satisfy the quality assurance requirements.

(4) Conduct work in accordance with the QAP.

(c) The QAP must:

(1) Describe how the quality assurance criteria of § 830.122 are satisfied.

(2) Integrate the quality assurance criteria with the Safety Management System, or describe how the quality assurance criteria apply to the Safety Management System.

(3) Use voluntary consensus standards in its development and implementation, where practicable and consistent with contractual and regulatory requirements, and identify the standards used.

(4) Describe how the contractor responsible for the nuclear facility ensures that subcontractors and suppliers satisfy the criteria of § 830.122.

§ 830.122 Quality assurance criteria.

The QAP must address the following management, performance, and assessment criteria:

(a) Criterion 1—Management/Program.

(1) Establish an organizational structure, functional responsibilities, levels of authority, and interfaces for those managing, performing, and assessing the work.

(2) Establish management processes, including planning, scheduling, and providing resources for the work.

(b) Criterion 2—Management/Personnel Training and Qualification.

(1) Train and qualify personnel to be capable of performing their assigned work.

(2) Provide continuing training to personnel to maintain their job proficiency.

(c) Criterion 3—Management/Quality Improvement.

(1) Establish and implement processes to detect and prevent quality problems.

(2) Identify, control, and correct items, services, and processes that do not meet established requirements.

(3) Identify the causes of problems and work to prevent recurrence as a part of correcting the problem.

(4) Review item characteristics, process implementation, and other quality-related information to identify items, services, and processes needing improvement.

(d) Criterion 4—Management/Documents and Records.

(1) Prepare, review, approve, issue, use, and revise documents to prescribe processes, specify requirements, or establish design.

(2) Specify, prepare, review, approve, and maintain records.

(e) Criterion 5—Performance/Work Processes.

(1) Perform work consistent with technical standards, administrative controls, and other hazard controls adopted to meet regulatory or contract requirements, using approved instructions, procedures, or other appropriate means.

(2) Identify and control items to ensure their proper use.

(3) Maintain items to prevent their damage, loss, or deterioration.

(4) Calibrate and maintain equipment used for process monitoring or data collection.

(f) Criterion 6—Performance/Design.

(1) Design items and processes using sound engineering/scientific principles and appropriate standards.

(2) Incorporate applicable requirements and design bases in design work and design changes.

(3) Identify and control design interfaces.

(4) Verify or validate the adequacy of design products using individuals or groups other than those who performed the work.

(5) Verify or validate work before approval and implementation of the design.

(g) Criterion 7—Performance/Procurement.

(1) Procure items and services that meet established requirements and perform as specified.

(2) Evaluate and select prospective suppliers on the basis of specified criteria.

(3) Establish and implement processes to ensure that approved suppliers continue to provide acceptable items and services.

(h) Criterion 8—Performance/Inspection and Acceptance Testing.

(1) Inspect and test specified items, services, and processes using established acceptance and performance criteria.

(2) Calibrate and maintain equipment used for inspections and tests.

(i) Criterion 9—Assessment/Management Assessment. Ensure managers assess their management processes and identify and correct problems that hinder the organization from achieving its objectives.

(j) Criterion 10—Assessment/Independent Assessment.

(1) Plan and conduct independent assessments to measure item and service quality, to measure the adequacy of work performance, and to promote improvement.

(2) Establish sufficient authority, and freedom from line management, for the group performing independent assessments.

(3) Ensure persons who perform independent assessments are technically qualified and knowledgeable in the areas to be assessed.

Subpart B—Safety Basis Requirements

§ 830.200 Scope.

This Subpart establishes safety basis requirements for hazard category 1, 2, and 3 DOE nuclear facilities.

§ 830.201 Performance of work.

A contractor must perform work in accordance with the safety basis for a hazard category 1, 2, or 3 DOE nuclear facility and, in particular, with the hazard controls that ensure adequate

protection of workers, the public, and the environment.

§ 830.202 Safety basis.

(a) The contractor responsible for a hazard category 1, 2, or 3 DOE nuclear facility must establish and maintain the safety basis for the facility.

(b) In establishing the safety basis for a hazard category 1, 2, or 3 DOE nuclear facility, the contractor responsible for the facility must:

(1) Define the scope of the work to be performed;

(2) Identify and analyze the hazards associated with the work;

(3) Categorize the facility consistent with DOE-STD-1027-92 (“Hazard Categorization and Accident Analysis Techniques for compliance with DOE Order 5480.23, Nuclear Safety Analysis Reports,” Change Notice 1, September 1997);

(4) Prepare a documented safety analysis for the facility; and (5) Establish the hazard controls upon which the contractor will rely to ensure adequate protection of workers, the public, and the environment.

(c) In maintaining the safety basis for a hazard category 1, 2, or 3 DOE nuclear facility, the contractor responsible for the facility must:

(1) Update the safety basis to keep it current and to reflect changes in the facility, the work and the hazards as they are analyzed in the documented safety analysis;

(2) Annually submit to DOE either the updated documented safety analysis for approval or a letter stating that there have been no changes in the documented safety analysis since the prior submission; and

(3) Incorporate in the safety basis any changes, conditions, or hazard controls directed by DOE.

§ 830.203 Unreviewed safety question process.

(a) The contractor responsible for a hazard category 1, 2, or 3 DOE nuclear facility must establish, implement, and take actions consistent with a USQ process that meets the requirements of this section.

(b) The contractor responsible for a hazard category 1, 2, or 3 DOE existing nuclear facility must submit for DOE

§ 830.204

approval a procedure for its USQ process by April 10, 2001. Pending DOE approval of the USQ procedure, the contractor must continue to use its existing USQ procedure. If the existing procedure already meets the requirements of this section, the contractor must notify DOE by April 10, 2001 and request that DOE issue an approval of the existing procedure.

(c) The contractor responsible for a hazard category 1, 2, or 3 DOE new nuclear facility must submit for DOE approval a procedure for its USQ process on a schedule that allows DOE approval in a safety evaluation report issued pursuant to section 207(d) of this Part.

(d) The contractor responsible for a hazard category 1, 2, or 3 DOE nuclear facility must implement the DOE-approved USQ procedure in situations where there is a:

(1) Temporary or permanent change in the facility as described in the existing documented safety analysis;

(2) Temporary or permanent change in the procedures as described in the existing documented safety analysis;

(3) Test or experiment not described in the existing documented safety analysis; or (4) Potential inadequacy of the documented safety analysis because the analysis potentially may not be bounding or may be otherwise inadequate.

(e) A contractor responsible for a hazard category 1, 2, or 3 DOE nuclear facility must obtain DOE approval prior to taking any action determined to involve a USQ.

(f) The contractor responsible for a hazard category 1, 2, or 3 DOE nuclear facility must annually submit to DOE a summary of the USQ determinations performed since the prior submission.

(g) If a contractor responsible for a hazard category 1, 2, or 3 DOE nuclear facility discovers or is made aware of a potential inadequacy of the documented safety analysis, it must:

(1) Take action, as appropriate, to place or maintain the facility in a safe condition until an evaluation of the safety of the situation is completed;

(2) Notify DOE of the situation;

(3) Perform a USQ determination and notify DOE promptly of the results; and (4) Submit the evaluation of the

10 CFR Ch. III (1–1–16 Edition)

safety of the situation to DOE prior to removing any operational restrictions initiated to meet paragraph (g)(1) of this section.

§ 830.204 Documented safety analysis.

(a) The contractor responsible for a hazard category 1, 2, or 3 DOE nuclear facility must obtain approval from DOE for the methodology used to prepare the documented safety analysis for the facility unless the contractor uses a methodology set forth in Table 2 of appendix A to this part.

(b) The documented safety analysis for a hazard category 1, 2, or 3 DOE nuclear facility must, as appropriate for the complexities and hazards associated with the facility:

(1) Describe the facility (including the design of safety structures, systems and components) and the work to be performed;

(2) Provide a systematic identification of both natural and man-made hazards associated with the facility;

(3) Evaluate normal, abnormal, and accident conditions, including consideration of natural and man-made external events, identification of energy sources or processes that might contribute to the generation or uncontrolled release of radioactive and other hazardous materials, and consideration of the need for analysis of accidents which may be beyond the design basis of the facility;

(4) Derive the hazard controls necessary to ensure adequate protection of workers, the public, and the environment, demonstrate the adequacy of these controls to eliminate, limit, or mitigate identified hazards, and define the process for maintaining the hazard controls current at all times and controlling their use;

(5) Define the characteristics of the safety management programs necessary to ensure the safe operation of the facility, including (where applicable) quality assurance, procedures, maintenance, personnel training, conduct of operations, emergency preparedness, fire protection, waste management, and radiation protection; and

(6) With respect to a nonreactor nuclear facility with fissionable material in a form and amount sufficient to pose

Department of Energy

§ 830.207

a potential for criticality, define a criticality safety program that:

- (i) Ensures that operations with fissionable material remain subcritical under all normal and credible abnormal conditions,
- (ii) Identifies applicable nuclear criticality safety standards, and
- (iii) Describes how the program meets applicable nuclear criticality safety standards.

§ 830.205 Technical safety requirements.

(a) A contractor responsible for a hazard category 1, 2, or 3 DOE nuclear facility must:

- (1) Develop technical safety requirements that are derived from the documented safety analysis;
- (2) Prior to use, obtain DOE approval of technical safety requirements and any change to technical safety requirements; and
- (3) Notify DOE of any violation of a technical safety requirement.

(b) A contractor may take emergency actions that depart from an approved technical safety requirement when no actions consistent with the technical safety requirement are immediately apparent, and when these actions are needed to protect workers, the public or the environment from imminent and significant harm. Such actions must be approved by a certified operator for a reactor or by a person in authority as designated in the technical safety requirements for nonreactor nuclear facilities. The contractor must report the emergency actions to DOE as soon as practicable.

(c) A contractor for an environmental restoration activity may follow the provisions of 29 CFR 1910.120 or 1926.65 to develop the appropriate hazard controls (rather than the provisions for technical safety requirements in paragraph (a) of this section), provided the activity involves either:

- (1) Work not done within a permanent structure, or
- (2) The decommissioning of a facility with only low-level residual fixed radioactivity.

§ 830.206 Preliminary documented safety analysis.

If construction begins after December 11, 2000, the contractor responsible for a hazard category 1, 2, or 3 new DOE nuclear facility or a major modification to a hazard category 1, 2, or 3 DOE nuclear facility must:

- (a) Prepare a preliminary documented safety analysis for the facility, and
- (b) Obtain DOE approval of:
 - (1) The nuclear safety design criteria to be used in preparing the preliminary documented safety analysis unless the contractor uses the design criteria in DOE Order 420.1, Facility Safety; and
 - (2) The preliminary documented safety analysis before the contractor can procure materials or components or begin construction; provided that DOE may authorize the contractor to perform limited procurement and construction activities without approval of a preliminary documented safety analysis if DOE determines that the activities are not detrimental to public health and safety and are in the best interests of DOE.

§ 830.207 DOE approval of safety basis.

(a) By April 10, 2003, a contractor responsible for a hazard category 1, 2, or 3 existing DOE nuclear facility must submit for DOE approval a safety basis that meets the requirements of this Subpart.

(b) Pending issuance of a safety evaluation report in which DOE approves a safety basis for a hazard category 1, 2, or 3 existing DOE nuclear facility, the contractor responsible for the facility must continue to perform work in accordance with the safety basis for the facility in effect on October 10, 2000, or as approved by DOE at a later date, and maintain the existing safety basis consistent with the requirements of this Subpart.

(c) If the safety basis for a hazard category 1, 2, or 3 existing DOE nuclear facility already meets the requirements of this Subpart and reflects the current work and hazards associated with the facility, the contractor responsible for the facility must, by April 9, 2001, notify DOE, document the adequacy of the existing safety basis

and request DOE to issue a safety evaluation report that approves the existing safety basis. If DOE does not issue a safety evaluation report by October 10, 2001, the contractor must submit a safety basis pursuant to paragraph (a) of this section.

(d) With respect to a hazard category 1, 2, or 3 new DOE nuclear facility or a major modification to a hazard category 1, 2, or 3 DOE nuclear facility, a contractor may not begin operation of the facility or modification prior to the issuance of a safety evaluation report in which DOE approves the safety basis for the facility or modification.

APPENDIX A TO SUBPART B OF PART 830—GENERAL STATEMENT OF SAFETY BASIS POLICY

A. INTRODUCTION

This appendix describes DOE's expectations for the safety basis requirements of 10 CFR Part 830, acceptable methods for implementing these requirements, and criteria DOE will use to evaluate compliance with these requirements. This Appendix does not create any new requirements and should be used consistently with DOE Policy 450.2A, "Identifying, Implementing and Complying with Environment, Safety and Health Requirements" (May 15, 1996).

B. PURPOSE

1. The safety basis requirements of Part 830 require the contractor responsible for a DOE nuclear facility to analyze the facility, the work to be performed, and the associated hazards and to identify the conditions, safe boundaries, and hazard controls necessary to protect workers, the public and the environ-

ment from adverse consequences. These analyses and hazard controls constitute the safety basis upon which the contractor and DOE rely to conclude that the facility can be operated safely. Performing work consistent with the safety basis provides reasonable assurance of adequate protection of workers, the public, and the environment.

2. The safety basis requirements are intended to further the objective of making safety an integral part of how work is performed throughout the DOE complex. Developing a thorough understanding of a nuclear facility, the work to be performed, the associated hazards and the needed hazard controls is essential to integrating safety into management and work at all levels. Performing work in accordance with the safety basis for a nuclear facility is the realization of that objective.

C. SCOPE

1. A contractor must establish and maintain a safety basis for a hazard category 1, 2, or 3 DOE nuclear facility because these facilities have the potential for significant radiological consequences. DOE-STD-1027-92 ("Hazard Categorization and Accident Analysis Techniques for compliance with DOE Order 5480.23, Nuclear Safety Analysis Reports," Change Notice 1, September 1997) sets forth the methodology for categorizing a DOE nuclear facility (see Table 1). The hazard categorization must be based on an inventory of all radioactive materials within a nuclear facility.

2. Unlike the quality assurance requirements of Part 830 that apply to all DOE nuclear facilities (including radiological facilities), the safety basis requirements only apply to hazard category 1, 2, and 3 nuclear facilities and do not apply to nuclear facilities below hazard category 3.

TABLE 1

A DOE nuclear facility categorized as * * *	Has the potential for * * *
Hazard category 1	Significant off-site consequences.
Hazard category 2	Significant on-site consequences beyond localized consequences.
Hazard category 3	Only local significant consequences.
Below category 3	Only consequences less than those that provide a basis for categorization as a hazard category 1, 2, or 3 nuclear facility.

D. INTEGRATED SAFETY MANAGEMENT

1. The safety basis requirements are consistent with integrated safety management. DOE expects that, if a contractor complies with the Department of Energy Acquisition Regulation (DEAR) clause on integration of environment, safety, and health into work planning and execution (48 CFR 970.5223-1,

Integration of Environment, Safety and Health into Work Planning and Execution) and the DEAR clause on laws, regulations, and DOE directives (48 CFR 970.5204-2, Laws, Regulations and DOE Directives), the contractor will have established the foundation to meet the safety basis requirements.

2. The processes embedded in a safety management system should lead to a contractor

establishing adequate safety bases and safety management programs that will meet the safety basis requirements of this Subpart. Consequently, the DOE expects if a contractor has adequately implemented integrated safety management, few additional requirements will stem from this Subpart and, in such cases, the existing safety basis prepared in accordance with integrated safety management provisions, including existing DOE safety requirements in contracts, should meet the requirements of this Subpart.

3. DOE does not expect there to be any conflict between contractual requirements and regulatory requirements. In fact, DOE expects that contract provisions will be used to provide more detail on implementation of safety basis requirements such as preparing a documented safety analysis, developing technical safety requirements, and implementing a USQ process.

E. ENFORCEMENT OF SAFETY BASIS REQUIREMENTS

1. Enforcement of the safety basis requirements will be performance oriented. That is, DOE will focus its enforcement efforts on whether a contractor operates a nuclear facility consistent with the safety basis for the facility and, in particular, whether work is performed in accordance with the safety basis.

2. As part of the approval process, DOE will review the content and quality of the safety basis documentation. DOE intends to use the approval process to assess the adequacy of a safety basis developed by a contractor to ensure that workers, the public, and the environment are provided reasonable assurance of adequate protection from identified hazards. Once approved by DOE, the safety basis documentation will not be subject to regulatory enforcement actions unless DOE determines that the information which supports the documentation is not complete and accurate in all material respects, as required by 10 CFR 820.11. This is consistent with the DOE enforcement provisions and policy in 10 CFR Part 820.

3. DOE does not intend the adoption of the safety basis requirements to affect the existing quality assurance requirements or the existing obligation of contractors to comply with the quality assurance requirements. In particular, in conjunction with the adoption of the safety basis requirements, DOE revised the language in 10 CFR 830.122(e)(1) to make clear that hazard controls are part of the work processes to which a contractor and other persons must adhere when performing work. This obligation to perform work consistent with hazard controls adopted to meet regulatory or contract requirements existed prior to the adoption of the safety basis requirements and is both con-

sistent with and independent of the safety basis requirements.

4. A documented safety analysis must address all hazards (that is, both radiological and nonradiological hazards) and the controls necessary to provide adequate protection to the public, workers, and the environment from these hazards. Section 234A of the Atomic Energy Act, however, only authorizes DOE to issue civil penalties for violations of requirements related to nuclear safety. Therefore, DOE will impose civil penalties for violations of the safety basis requirements (including hazard controls) only if they are related to nuclear safety.

F. DOCUMENTED SAFETY ANALYSIS

1. A documented safety analysis must demonstrate the extent to which a nuclear facility can be operated safely with respect to workers, the public, and the environment.

2. DOE expects a contractor to use a graded approach to develop a documented safety analysis and describe how the graded approach was applied. The level of detail, analysis, and documentation will reflect the complexity and hazard associated with a particular facility. Thus, the documented safety analysis for a simple, low hazard facility may be relatively short and qualitative in nature, while the documented safety analysis for a complex, high hazard facility may be quite elaborate and more quantitative. DOE will work with its contractors to ensure a documented safety analysis is appropriate for the facility for which it is being developed.

3. Because DOE has ultimate responsibility for the safety of its facilities, DOE will review each documented safety analysis to determine whether the rigor and detail of the documented safety analysis are appropriate for the complexity and hazards expected at the nuclear facility. In particular, DOE will evaluate the documented safety analysis by considering the extent to which the documented safety analysis (1) satisfies the provisions of the methodology used to prepare the documented safety analysis and (2) adequately addresses the criteria set forth in 10 CFR 830.204(b). DOE will prepare a Safety Evaluation Report to document the results of its review of the documented safety analysis. A documented safety analysis must contain any conditions or changes required by DOE.

4. In most cases, the contract will provide the framework for specifying the methodology and schedule for developing a documented safety analysis. Table 2 sets forth acceptable methodologies for preparing a documented safety analysis.

TABLE 2

The contractor responsible for * * *	May prepare its documented safety analyses by * * *
(1) A DOE reactor	Using the method in U.S. Nuclear Regulatory Commission Regulatory Guide 1.70, Standard Format and Content of Safety Analysis Reports for Nuclear Power Plants, or successor document.
(2) A DOE nonreactor nuclear facility	Using the method in DOE-STD-3009, Change Notice No. 1, January 2000, Preparation Guide for U.S. Department of Energy Nonreactor Nuclear Facility Safety Analysis Reports, July 1994, or successor document.
(3) A DOE nuclear facility with a limited operational life	Using the method in either: (1) DOE-STD-3009, Change Notice No. 1, January 2000, or successor document, or (2) DOE-STD-3011-94, Guidance for Preparation of DOE 5480.22 (TSR) and DOE 5480.23 (SAR) Implementation Plans, November 1994, or successor document.
(4) The deactivation or the transition surveillance and maintenance of a DOE nuclear facility.	Using the method in either: (1) DOE-STD-3009, Change Notice No. 1, January 2000, or successor document, or (2) DOE-STD-3011-94 or successor document.
(5) The decommissioning of a DOE nuclear facility	(1) Using the method in DOE-STD-1120-98, Integration of Environment, Safety, and Health into Facility Disposition Activities, May 1998, or successor document; (2) Using the provisions in 29 CFR 1910.120 (or 29 CFR 1926.65 for construction activities) for developing Safety and Health Programs, Work Plans, Health and Safety Plans, and Emergency Response Plans to address public safety, as well as worker safety; and (3) Deriving hazard controls based on the Safety and Health Programs, the Work Plans, the Health and Safety Plans, and the Emergency Response Plans.
(6) A DOE environmental restoration activity that involves either work not done within a permanent structure or the decommissioning of a facility with only low-level residual fixed radioactivity.	(1) Using the method in DOE-STD-1120-98 or successor document, and (2) Using the provisions in 29 CFR 1910.120 (or 29 CFR 1926.65 for construction activities) for developing a Safety and Health Program and a site-specific Health and Safety Plan (including elements for Emergency Response Plans, conduct of operations, training and qualifications, and maintenance management).
(7) A DOE nuclear explosive facility and the nuclear explosive operations conducted therein.	Developing its documented safety analysis in two pieces: (1) A Safety Analysis Report for the nuclear facility that considers the generic nuclear explosive operations and is prepared in accordance with DOE-STD-3009, Change Notice No. 1, January 2000, or successor document, and (2) A Hazard Analysis Report for the specific nuclear explosive operations prepared in accordance with DOE-STD-3016-99, Hazards Analysis Reports for Nuclear Explosive Operations, February 1999, or successor document.
(8) A DOE hazard category 3 nonreactor nuclear facility	Using the methods in Chapters 2, 3, 4, and 5 of DOE-STD-3009, Change Notice No. 1, January 2000, or successor document to address in a simplified fashion: (1) The basic description of the facility/activity and its operations, including safety structures, systems, and components; (2) A qualitative hazards analysis; and (3) The hazard controls (consisting primarily of inventory limits and safety management programs) and their bases.
(9) Transportation activities	(1) Preparing a Safety Analysis Report for Packaging in accordance with DOE-O-460.1A, Packaging and Transportation Safety, October 2, 1996, or successor document and (2) Preparing a Transportation Safety Document in accordance with DOE-G-460.1-1, Implementation Guide for Use with DOE O 460.1A, Packaging and Transportation Safety, June 5, 1997, or successor document.
(10) Transportation and onsite transfer of nuclear explosives, nuclear components, Naval nuclear fuel elements, Category I and Category II special nuclear materials, special assemblies, and other materials of national security.	(1) Preparing a Safety Analysis Report for Packaging in accordance with DOE-O-461.1, Packaging and Transportation of Materials of National Security Interest, September 29, 2000, or successor document and (2) Preparing a Transportation Safety Document in accordance with DOE-M-461.1-1, Packaging and Transfer of Materials of National Security Interest Manual, September 29, 2000, or successor document.

Department of Energy

Pt. 830, Subpt. B, App. A

5. Table 2 refers to specific types of nuclear facilities. These references are not intended to constitute an exhaustive list of the specific types of nuclear facilities. Part 830 defines nuclear facility broadly to include all those facilities, activities, or operations that involve, or will involve, radioactive and/or fissionable materials in such form and quantity that a nuclear or a nuclear explosive hazard potentially exists to the employees or

the general public, and to include any related area, structure, facility, or activity to the extent necessary to ensure proper implementation of the requirements established by Part 830. The only exceptions are those facilities specifically excluded such as accelerators. Table 3 defines the specific nuclear facilities referenced in Table 2 that are not defined in 10 CFR 830.3

TABLE 3

For purposes of Table 2, * * *	means * * *
(1) Deactivation	The process of placing a facility in a stable and known condition, including the removal of hazardous and radioactive materials
(2) Decontamination	The removal or reduction of residual radioactive and hazardous materials by mechanical, chemical, or other techniques to achieve a stated objective or end condition
(3) Decommissioning	Those actions taking place after deactivation of a nuclear facility to retire it from service and includes surveillance and maintenance, decontamination, and/or dismantlement.
(4) Environmental restoration activities	The process by which contaminated sites and facilities are identified and characterized and by which existing contamination is contained, or removed and disposed
(5) Generic nuclear explosive operation	A characterization that considers the collective attributes (such as special facility system requirements, physical weapon characteristics, or quantities and chemical/physical forms of hazardous materials) for all projected nuclear explosive operations to be conducted at a facility
(6) Nuclear explosive facility	A nuclear facility at which nuclear operations and activities involving a nuclear explosive may be conducted
(7) Nuclear explosive operation	Any activity involving a nuclear explosive, including activities in which main-charge, high-explosive parts and pits are collocated.
(8) Nuclear facility with a limited operational life	A nuclear facility for which there is a short remaining operational period before ending the facility's mission and initiating deactivation and decommissioning and for which there are no intended additional missions other than cleanup
(9) Specific nuclear explosive operation	A specific nuclear explosive subjected to the stipulated steps of an individual operation, such as assembly or disassembly
(10) Transition surveillance and maintenance activities	Activities conducted when a facility is not operating or during deactivation, decontamination, and decommissioning operations when surveillance and maintenance are the predominant activities being conducted at the facility. These activities are necessary for satisfactory containment of hazardous materials and protection of workers, the public, and the environment. These activities include providing periodic inspections, maintenance of structures, systems, and components, and actions to prevent the alteration of hazardous materials to an unsafe state

6. If construction begins after December 11, 2000, the contractor responsible for the design and construction of a new DOE nuclear facility or a major modification to an existing DOE nuclear facility must prepare a preliminary documented safety analysis. A preliminary documented safety analysis can ensure that substantial costs and time are not wasted in constructing a nuclear facility that will not be acceptable to DOE. If a contractor is required to prepare a preliminary documented safety analysis, the contractor must obtain DOE approval of the preliminary documented safety analysis prior to procuring materials or components or beginning construction. DOE, however, may au-

thorize the contractor to perform limited procurement and construction activities without approval of a preliminary documented safety analysis if DOE determines that the activities are not detrimental to public health and safety and are in the best interests of DOE. DOE Order 420.1, Facility Safety, sets forth acceptable nuclear safety design criteria for use in preparing a preliminary documented safety analysis. As a general matter, DOE does not expect preliminary documented safety analyses to be needed for activities that do not involve significant construction such as environmental restoration activities, decontamination and decommissioning activities, specific nuclear

explosive operations, or transition surveillance and maintenance activities.

G. HAZARD CONTROLS

1. Hazard controls are measures to eliminate, limit, or mitigate hazards to workers, the public, or the environment. They include (1) physical, design, structural, and engineering features; (2) safety structures, systems, and components; (3) safety management programs; (4) technical safety requirements; and (5) other controls necessary to provide adequate protection from hazards.

2. The types and specific characteristics of the safety management programs necessary for a DOE nuclear facility will be dependent on the complexity and hazards associated with the nuclear facility and the work being performed. In most cases, however, a contractor should consider safety management programs covering topics such as quality assurance, procedures, maintenance, personnel training, conduct of operations, criticality safety, emergency preparedness, fire protection, waste management, and radiation protection. In general, DOE Orders set forth DOE's expectations concerning specific topics. For example, DOE Order 420.1 provides DOE's expectations with respect to fire protection and criticality safety.

3. Safety structures, systems, and components require formal definition of minimum acceptable performance in the documented safety analysis. This is accomplished by first defining a safety function, then describing the structure, systems, and components, placing functional requirements on those portions of the structures, systems, and components required for the safety function, and identifying performance criteria that will ensure functional requirements are met.

Technical safety requirements are developed to ensure the operability of the safety structures, systems, and components and define actions to be taken if a safety structure, system, or component is not operable.

4. Technical safety requirements establish limits, controls, and related actions necessary for the safe operation of a nuclear facility. The exact form and contents of technical safety requirements will depend on the circumstances of a particular nuclear facility as defined in the documented safety analysis for the nuclear facility. As appropriate, technical safety requirements may have sections on (1) safety limits, (2) operating limits, (3) surveillance requirements, (4) administrative controls, (5) use and application, and (6) design features. It may also have an appendix on the bases for the limits and requirements. DOE Guide 423.X, Implementation Guide for Use in Developing Technical Safety Requirements (TSRs) provides a complete description of what technical safety requirements should contain and how they should be developed and maintained.

5. DOE will examine and approve the technical safety requirements as part of preparing the safety evaluation report and reviewing updates to the safety basis. As with all hazard controls, technical safety requirements must be kept current and reflect changes in the facility, the work and the hazards as they are analyzed in the documented safety analysis. In addition, DOE expects a contractor to maintain technical safety requirements, and other hazard controls as appropriate, as controlled documents with an authorized users list.

6. Table 4 sets forth DOE's expectations concerning acceptable technical safety requirements.

TABLE 4

As appropriate for a particular DOE nuclear facility, the section of the technical safety requirements on * * *	Will provide information on * * *
(1) Safety limits	The limits on process variables associated with those safety class physical barriers, generally passive, that are necessary for the intended facility function and that are required to guard against the uncontrolled release of radioactive materials. The safety limit section describes, as precisely as possible, the parameters being limited, states the limit in measurable units (pressure, temperature, flow, etc.), and indicates the applicability of the limit. The safety limit section also describes the actions to be taken in the event that the safety limit is exceeded. These actions should first place the facility in the safe, stable condition attainable, including total shutdown (except where such action might reduce the margin of safety) or should verify that the facility already is safe and stable and will remain so. The technical safety requirement should state that the contractor must obtain DOE authorization to restart the nuclear facility following a violation of a safety limit. The safety limit section also establishes the steps and time limits to correct the out-of-specification condition.
(2) Operating limits	Those limits which are required to ensure the safe operation of a nuclear facility. The operating limits section may include subsections on limiting control settings and limiting conditions for operation.

TABLE 4—Continued

As appropriate for a particular DOE nuclear facility, the section of the technical safety requirements on * * *	Will provide information on * * *
(3) Limiting control settings	The settings on safety systems that control process variables to prevent exceeding a safety limit. The limited control settings section normally contains the settings for automatic alarms and for the automatic or nonautomatic initiation of protective actions related to those variables associated with the function of safety class structures, systems, or components if the safety analysis shows that they are relied upon to mitigate or prevent an accident. The limited control settings section also identifies the protective actions to be taken at the specific settings chosen in order to correct a situation automatically or manually such that the related safety limit is not exceeded. Protective actions may include maintaining the variables within the requirements and repairing the automatic device promptly or shutting down the affected part of the process and, if required, the entire facility.
(4) Limiting conditions for operations	The limits that represent the lowest functional capability or performance level of safety structures, systems, and components required to perform an activity safely. The limiting conditions for operation section describes, as precisely as possible, the lowest functional capability or performance level of equipment required for continued safe operation of the facility. The limiting conditions for operation section also states the action to be taken to address a condition not meeting the limiting conditions for operation section. Normally this simply provides for the adverse condition being corrected in a certain time frame and for further action if this is impossible.
(5) Surveillance requirements	Requirements relating to test, calibration, or inspection to assure that the necessary operability and quality of safety structures, systems, and components is maintained; that facility operation is within safety limits; and that limiting control settings and limiting conditions for operation are met. If a required surveillance is not successfully completed, the contractor is expected to assume the systems or components involved are inoperable and take the actions defined by the technical safety requirement until the systems or components can be shown to be operable. If, however, a required surveillance is not performed within its required frequency, the contractor is allowed to perform the surveillance within 24 hours or the original frequency, whichever is smaller, and confirm operability.
(6) Administrative controls	Organization and management, procedures, recordkeeping, assessment, and reporting necessary to ensure safe operation of a facility consistent with the technical safety requirement. In general, the administrative controls section addresses (1) the requirements associated with administrative controls, (including those for reporting violations of the technical safety requirement); (2) the staffing requirements for facility positions important to safe conduct of the facility; and (3) the commitments to the safety management programs identified in the documented safety analysis as necessary components of the safety basis for the facility.
(7) Use and application provisions	The basic instructions for applying the safety restrictions contained in a technical safety requirement. The use and application section includes definitions of terms, operating modes, logical connectors, completion times, and frequency notations.
(8) Design features	Design features of the facility that, if altered or modified, would have a significant effect on safe operation.
(9) Bases appendix	The reasons for the safety limits, operating limits, and associated surveillance requirements in the technical safety requirements. The statements for each limit or requirement shows how the numeric value, the condition, or the surveillance fulfills the purpose derived from the safety documentation. The primary purpose for describing the basis of each limit or requirement is to ensure that any future changes to the limit or requirement is done with full knowledge of the original intent or purpose of the limit or requirement.

H. UNREVIEWED SAFETY QUESTIONS

1. The USQ process is an important tool to evaluate whether changes affect the safety basis. A contractor must use the USQ process to ensure that the safety basis for a DOE nuclear facility is not undermined by changes in the facility, the work performed, the associated hazards, or other factors that support the adequacy of the safety basis.

2. The USQ process permits a contractor to make physical and procedural changes to a nuclear facility and to conduct tests and experiments without prior approval, provided

these changes do not cause a USQ. The USQ process provides a contractor with the flexibility needed to conduct day-to-day operations by requiring only those changes and tests with a potential to impact the safety basis (and therefore the safety of the nuclear facility) be approved by DOE. This allows DOE to focus its review on those changes significant to safety. The USQ process helps keep the safety basis current by ensuring appropriate review of and response to situations that might adversely affect the safety basis.

Pt. 835

3. DOE Guide 424.X, Implementation Guide for Addressing Unreviewed Safety Question (USQ) Requirements, provides DOE's expectations for a USQ process. The contractor must obtain DOE approval of its procedure used to implement the USQ process.

I. FUNCTIONS AND RESPONSIBILITIES

1. The DOE Management Official for a DOE nuclear facility (that is, the Assistant Secretary, the Assistant Administrator, or the Office Director who is primarily responsible for the management of the facility) has primary responsibility within DOE for ensuring that the safety basis for the facility is adequate and complies with the safety basis requirements of Part 830. The DOE Management Official is responsible for ensuring the timely and proper (1) review of all safety basis documents submitted to DOE and (2) preparation of a safety evaluation report concerning the safety basis for a facility.

2. DOE will maintain a public list on the internet that provides the status of the safety basis for each hazard category 1, 2, or 3 DOE nuclear facility and, to the extent practicable, provides information on how to obtain a copy of the safety basis and related documents for a facility.

PART 835—OCCUPATIONAL RADIATION PROTECTION

Subpart A—General Provisions

- Sec.
- 835.1 Scope.
- 835.2 Definitions.
- 835.3 General rule.
- 835.4 Radiological units.

Subpart B—Management and Administrative Requirements

- 835.101 Radiation protection programs.
- 835.102 Internal audits.
- 835.103 Education, training and skills.
- 835.104 Written procedures.

Subpart C—Standards for Internal and External Exposure

- 835.201 [Reserved]
- 835.202 Occupational dose limits for general employees.
- 835.203 Combining internal and external equivalent doses.
- 835.204 Planned special exposures.
- 835.205 Determination of compliance for non-uniform exposure of the skin.
- 835.206 Limits for the embryo/fetus.
- 835.207 Occupational dose limits for minors.
- 835.208 Limits for members of the public entering a controlled area.
- 835.209 Concentrations of radioactive material in air.

10 CFR Ch. III (1–1–16 Edition)

Subpart D [Reserved]

Subpart E—Monitoring of Individuals and Areas

- 835.401 General requirements.
- 835.402 Individual monitoring.
- 835.403 Air monitoring.
- 835.404 [Reserved]
- 835.405 Receipt of packages containing radioactive material.

Subpart F—Entry Control Program

- 835.501 Radiological areas.
- 835.502 High and very high radiation areas.

Subpart G—Posting and Labeling

- 835.601 General requirements.
- 835.602 Controlled areas.
- 835.603 Radiological areas and radioactive material areas.
- 835.604 Exceptions to posting requirements.
- 835.605 Labeling items and containers.
- 835.606 Exceptions to labeling requirements.

Subpart H—Records

- 835.701 General provisions.
- 835.702 Individual monitoring records.
- 835.703 Other monitoring records.
- 835.704 Administrative records.

Subpart I—Reports to Individuals

- 835.801 Reports to individuals.

Subpart J—Radiation Safety Training

- 835.901 Radiation safety training.
- 835.902–835.903 [Reserved]

Subpart K—Design and Control

- 835.1001 Design and control.
- 835.1002 Facility design and modifications.
- 835.1003 Workplace controls.

Subpart L—Radioactive Contamination Control

- 835.1101 Control of material and equipment.
- 835.1102 Control of areas.

Subpart M—Sealed Radioactive Source Control

- 835.1201 Sealed radioactive source control.
- 835.1202 Accountable sealed radioactive sources.

Subpart N—Emergency Exposure Situations

- 835.1301 General provisions.
- 835.1302 Emergency exposure situations.
- 835.1303 [Reserved]
- 835.1304 Nuclear accident dosimetry.

Department of Energy

§ 835.2

APPENDIX A TO PART 835—DERIVED AIR CONCENTRATIONS (DAC) FOR CONTROLLING RADIATION EXPOSURE TO WORKERS AT DOE FACILITIES

APPENDIX B TO PART 835 [RESERVED]

APPENDIX C TO PART 835—DERIVED AIR CONCENTRATION (DAC) FOR WORKERS FROM EXTERNAL EXPOSURE DURING IMMERSION IN A CLOUD OF AIRBORNE RADIOACTIVE MATERIAL

APPENDIX D TO PART 835—SURFACE CONTAMINATION VALUES

APPENDIX E TO PART 835—VALUES FOR ESTABLISHING SEALED RADIOACTIVE SOURCE ACCOUNTABILITY AND RADIOACTIVE MATERIAL POSTING AND LABELING REQUIREMENTS

AUTHORITY: 42 U.S.C. 2201, 7191; 50 U.S.C. 2410.

SOURCE: 58 FR 65485, Dec. 14, 1993, unless otherwise noted.

Subpart A—General Provisions

§ 835.1 Scope.

(a) *General.* The rules in this part establish radiation protection standards, limits, and program requirements for protecting individuals from ionizing radiation resulting from the conduct of DOE activities.

(b) *Exclusion.* Except as provided in paragraph (c) of this section, the requirements in this part do not apply to:

(1) Activities that are regulated through a license by the Nuclear Regulatory Commission or a State under an Agreement with the Nuclear Regulatory Commission, including activities certified by the Nuclear Regulatory Commission under section 1701 of the Atomic Energy Act;

(2) Activities conducted under the authority of the Deputy Administrator for Naval Reactors, as described in Pub. L. 98-525 and 106-65;

(3) Activities conducted under the Nuclear Explosives and Weapons Surety Program relating to the prevention of accidental or unauthorized nuclear detonations;

(4) DOE activities conducted outside the United States on territory under the jurisdiction of a foreign government to the extent governed by occupational radiation protection requirements agreed to between the United States and the cognizant government;

(5) Background radiation, radiation doses received as a patient for the pur-

poses of medical diagnosis or therapy, or radiation doses received from participation as a subject in medical research programs; or

(6) Radioactive material on or within material, equipment, and real property which is approved for release when the radiological conditions of the material, equipment, and real property have been documented to comply with the criteria for release set forth in a DOE authorized limit which has been approved by a Secretarial Officer in consultation with the Associate Under Secretary for Environment, Health, Safety and Security.

(7) Radioactive material transportation not performed by DOE or a DOE contractor.

(c) Occupational doses received as a result of excluded activities and radioactive material transportation listed in paragraphs (b)(1) through (b)(4) and (b)(7) of this section, shall be included to the extent practicable when determining compliance with the occupational dose limits at §§ 835.202 and 835.207, and with the limits for the embryo/fetus at § 835.206. Occupational doses resulting from authorized emergency exposures and planned special exposures shall not be considered when determining compliance with the dose limits at §§ 835.202 and 835.207.

(d) The requirements in subparts F and G of this part do not apply to radioactive material transportation by DOE or a DOE contractor conducted:

(1) Under the continuous observation and control of an individual who is knowledgeable of and implements required exposure control measures, or

(2) In accordance with Department of Transportation regulations or DOE orders that govern such movements.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59679, Nov. 4, 1998; 71 FR 68733, Nov. 28, 2006; 72 FR 31922, June 8, 2007; 80 FR 5008, Jan. 30, 2015]

§ 835.2 Definitions.

(a) As used in this part:

Accountable sealed radioactive source means a sealed radioactive source having a half-life equal to or greater than 30 days and an isotopic activity equal to or greater than the corresponding value provided in appendix E of this part.

Activity Median Aerodynamic Diameter (AMAD) means a particle size in an aerosol where fifty percent of the activity in the aerosol is associated with particles of aerodynamic diameter greater than the AMAD.

Airborne radioactive material or airborne radioactivity means radioactive material dispersed in the air in the form of dusts, fumes, particulates, mists, vapors, or gases.

Airborne radioactivity area means any area, accessible to individuals, where:

(1) The concentration of airborne radioactivity, above natural background, exceeds or is likely to exceed the derived air concentration (DAC) values listed in appendix A or appendix C of this part; or

(2) An individual present in the area without respiratory protection could receive an intake exceeding 12 DAC-hours in a week.

ALARA means “As Low As is Reasonably Achievable,” which is the approach to radiation protection to manage and control exposures (both individual and collective) to the work force and to the general public to as low as is reasonable, taking into account social, technical, economic, practical, and public policy considerations. As used in this part, ALARA is not a dose limit but a process which has the objective of attaining doses as far below the applicable limits of this part as is reasonably achievable.

Annual limit on intake (ALI) means the derived limit for the amount of radioactive material taken into the body of an adult worker by inhalation or ingestion in a year. ALI is the smaller value of intake of a given radionuclide in a year by the reference man (ICRP Publication 23) that would result in a committed effective dose of 5 rems (0.05 sieverts (Sv)) (1 rem = 0.01 Sv) or a committed equivalent dose of 50 rems (0.5 Sv) to any individual organ or tissue. ALI values for intake by ingestion and inhalation of selected radionuclides are based on International Commission on Radiological Protection Publication 68, *Dose Coefficients for Intakes of Radionuclides by Workers*, published July, 1994 (ISBN 0 08 042651 4). This document is available from Elsevier Science Inc., Tarrytown, NY.

Authorized limit means a limit on the concentration of residual radioactive material on the surfaces or within the property that has been derived consistent with DOE directives including the as low as is reasonably achievable (ALARA) process requirements, given the anticipated use of the property and has been authorized by DOE to permit the release of the property from DOE radiological control.

Background means radiation from:

(1) Naturally occurring radioactive materials which have not been technologically enhanced;

(2) Cosmic sources;

(3) Global fallout as it exists in the environment (such as from the testing of nuclear explosive devices);

(4) Radon and its progeny in concentrations or levels existing in buildings or the environment which have not been elevated as a result of current or prior activities; and

(5) Consumer products containing nominal amounts of radioactive material or producing nominal amounts of radiation.

Bioassay means the determination of kinds, quantities, or concentrations, and, in some cases, locations of radioactive material in the human body, whether by direct measurement or by analysis and evaluation of radioactive materials excreted or removed from the human body.

Calibration means to adjust and/or determine either:

(1) The response or reading of an instrument relative to a standard (*e.g.*, primary, secondary, or tertiary) or to a series of conventionally true values; or

(2) The strength of a radiation source relative to a standard (*e.g.*, primary, secondary, or tertiary) or conventionally true value.

Contamination area means any area, accessible to individuals, where removable surface contamination levels exceed or are likely to exceed the removable surface contamination values specified in appendix D of this part, but do not exceed 100 times those values.

Controlled area means any area to which access is managed by or for DOE to protect individuals from exposure to radiation and/or radioactive material.

Declared pregnant worker means a woman who has voluntarily declared to

her employer, in writing, her pregnancy for the purpose of being subject to the occupational dose limits to the embryo/fetus as provided in § 835.206. This declaration may be revoked, in writing, at any time by the declared pregnant worker.

Derived air concentration (DAC) means, for the radionuclides listed in appendix A of this part, the airborne concentration that equals the ALI divided by the volume of air breathed by an average worker for a working year of 2000 hours (assuming a breathing volume of 2400 m³). For the radionuclides listed in appendix C of this part, the air immersion DACs were calculated for a continuous, non-shielded exposure via immersion in a semi-infinite cloud of radioactive material. Except as noted in the footnotes to appendix A of this part, the values are based on dose coefficients from International Commission on Radiological Protection Publication 68, *Dose Coefficients for Intakes of Radionuclides by Workers*, published July, 1994 (ISBN 0 08 042651 4) and the associated ICRP computer program, *The ICRP Database of Dose Coefficients: Workers and Members of the Public*, (ISBN 0 08 043 8768). These materials are available from Elsevier Science Inc., Tarrytown, NY.

Derived air concentration-hour (DAC-hour) means the product of the concentration of radioactive material in air (expressed as a fraction or multiple of the DAC for each radionuclide) and the time of exposure to that radionuclide, in hours.

Deterministic effects means effects due to radiation exposure for which the severity varies with the dose and for which a threshold normally exists (e.g., radiation-induced opacities within the lens of the eye).

DOE means the United States Department of Energy.

DOE activity means an activity taken for or by DOE in a DOE operation or facility that has the potential to result in the occupational exposure of an individual to radiation or radioactive material. The activity may be, but is not limited to, design, construction, operation, or decommissioning. To the extent appropriate, the activity may involve a single DOE facility or operation or a combination of facilities and

operations, possibly including an entire site or multiple DOE sites.

Entrance or access point means any location through which an individual could gain access to areas controlled for the purpose of radiation protection. This includes entry or exit portals of sufficient size to permit human entry, irrespective of their intended use.

General employee means an individual who is either a DOE or DOE contractor employee; an employee of a subcontractor to a DOE contractor; or an individual who performs work for or in conjunction with DOE or utilizes DOE facilities.

High contamination area means any area, accessible to individuals, where removable surface contamination levels exceed or are likely to exceed 100 times the removable surface contamination values specified in appendix D of this part.

High radiation area means any area, accessible to individuals, in which radiation levels could result in an individual receiving an equivalent dose to the whole body in excess of 0.1 rems (0.001 Sv) in 1 hour at 30 centimeters from the radiation source or from any surface that the radiation penetrates.

Individual means any human being.

Member of the public means an individual who is not a general employee. An individual is not a "member of the public" during any period in which the individual receives an occupational dose.

Minor means an individual less than 18 years of age.

Monitoring means the measurement of radiation levels, airborne radioactivity concentrations, radioactive contamination levels, quantities of radioactive material, or individual doses and the use of the results of these measurements to evaluate radiological hazards or potential and actual doses resulting from exposures to ionizing radiation.

Occupational dose means an individual's ionizing radiation dose (external and internal) as a result of that individual's work assignment. Occupational dose does not include doses received as a medical patient or doses resulting from background radiation or participation as a subject in medical research programs.

Person means any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, Government agency, any State or political subdivision of, or any political entity within a State, any foreign government or nation or other entity, and any legal successor, representative, agent or agency of the foregoing; provided that person does not include DOE or the United States Nuclear Regulatory Commission.

Radiation means ionizing radiation: alpha particles, beta particles, gamma rays, X-rays, neutrons, high-speed electrons, high-speed protons, and other particles capable of producing ions. Radiation, as used in this part, does not include non-ionizing radiation, such as radio waves or microwaves, or visible, infrared, or ultraviolet light.

Radiation area means any area, accessible to individuals, in which radiation levels could result in an individual receiving an equivalent dose to the whole body in excess of 0.005 rem (0.05 mSv) in 1 hour at 30 centimeters from the source or from any surface that the radiation penetrates.

Radioactive material area means any area within a controlled area, accessible to individuals, in which items or containers of radioactive material exist and the total activity of radioactive material exceeds the applicable values provided in appendix E of this part.

Radioactive material transportation means the movement of radioactive material by aircraft, rail, vessel, or highway vehicle. Radioactive material transportation does not include preparation of material or packagings for transportation, storage of material awaiting transportation, or application of markings and labels required for transportation.

Radiological area means any area within a controlled area defined in this section as a “radiation area,” “high radiation area,” “very high radiation area,” “contamination area,” “high contamination area,” or “airborne radioactivity area.”

Radiological worker means a general employee whose job assignment involves operation of radiation producing devices or working with radioactive materials, or who is likely to be rou-

tinely occupationally exposed above 0.1 rem (0.001 Sv) per year total effective dose.

Real property means land and anything permanently affixed to the land such as buildings, fences and those things attached to the buildings, such as light fixtures, plumbing and heating fixtures.

Real-time air monitoring means measurement of the concentrations or quantities of airborne radioactive materials on a continuous basis.

Respiratory protective device means an apparatus, such as a respirator, worn by an individual for the purpose of reducing the individual’s intake of airborne radioactive materials.

Sealed radioactive source means a radioactive source manufactured, obtained, or retained for the purpose of utilizing the emitted radiation. The sealed radioactive source consists of a known or estimated quantity of radioactive material contained within a sealed capsule, sealed between layer(s) of non-radioactive material, or firmly fixed to a non-radioactive surface by electroplating or other means intended to prevent leakage or escape of the radioactive material. Sealed radioactive sources do not include reactor fuel elements, nuclear explosive devices, and radioisotope thermoelectric generators.

Source leak test means a test to determine if a sealed radioactive source is leaking radioactive material.

Special tritium compound (STC) means any compound, except for H₂O, that contains tritium, either intentionally (e.g., by synthesis) or inadvertently (e.g., by contamination mechanisms).

Stochastic effects means malignant and hereditary diseases for which the probability of an effect occurring, rather than its severity, is regarded as a function of dose without a threshold, for radiation protection purposes.

Very high radiation area means any area, accessible to individuals, in which radiation levels could result in an individual receiving an absorbed dose in excess of 500 rads (5 grays) in one hour at 1 meter from a radiation source or from any surface that the radiation penetrates.

Week means a period of seven consecutive days.

Year means the period of time beginning on or near January 1 and ending on or near December 31 of that same year used to determine compliance with the provisions of this part. The starting and ending date of the year used to determine compliance may be changed, provided that the change is made at the beginning of the year and that no day is omitted or duplicated in consecutive years.

(b) As used in this part to describe various aspects of radiation dose:

Absorbed dose (D) means the average energy imparted by ionizing radiation to the matter in a volume element per unit mass of irradiated material. The absorbed dose is expressed in units of rad (or gray) (1 rad = 0.01 gray).

Committed effective dose (E₅₀) means the sum of the committed equivalent doses to various tissues or organs in the body (H_{T,50}), each multiplied by the appropriate tissue weighting factor (w_T)—that is, $E_{50} = \sum w_T H_{T,50} + w_{\text{Remainder}} H_{\text{Remainder},50}$. Where $w_{\text{Remainder}}$ is the tissue weighting factor assigned to the remainder organs and tissues and $H_{\text{Remainder},50}$ is the committed equivalent dose to the remainder organs and tissues. Committed effective dose is expressed in units of rem (or Sv).

Committed equivalent dose (H_{T,50}) means the equivalent dose calculated to be received by a tissue or organ over a 50-year period after the intake of a radionuclide into the body. It does not include contributions from radiation sources external to the body. Committed equivalent dose is expressed in units of rem (or Sv).

Cumulative total effective dose means the sum of all total effective dose values recorded for an individual plus, for occupational exposures received before the implementation date of this amendment, the cumulative total effective dose equivalent (as defined in the November 4, 1998 amendment to this rule) values recorded for an individual, where available, for each year occupational dose was received, beginning January 1, 1989.

Dose is a general term for absorbed dose, equivalent dose, effective dose, committed equivalent dose, committed effective dose, or total effective dose as defined in this part.

Effective dose (E) means the summation of the products of the equivalent dose received by specified tissues or organs of the body (H_T) and the appropriate tissue weighting factor (w_T)—that is, $E = \sum w_T H_T$. It includes the dose from radiation sources internal and/or external to the body. For purposes of compliance with this part, equivalent dose to the whole body may be used as effective dose for external exposures. The effective dose is expressed in units of rem (or Sv).

Equivalent dose (H_T) means the product of average absorbed dose (D_{T,R}) in rad (or gray) in a tissue or organ (T) and a radiation (R) weighting factor (w_R). For external dose, the equivalent dose to the whole body is assessed at a depth of 1 cm in tissue; the equivalent dose to the lens of the eye is assessed at a depth of 0.3 cm in tissue, and the equivalent dose to the extremity and skin is assessed at a depth of 0.007 cm in tissue. Equivalent dose is expressed in units of rem (or Sv).

External dose or exposure means that portion of the equivalent dose received from radiation sources outside the body (i.e., “external sources”).

Extremity means hands and arms below the elbow or feet and legs below the knee.

Internal dose or exposure means that portion of the equivalent dose received from radioactive material taken into the body (i.e., “internal sources”).

Radiation weighting factor (w_R) means the modifying factor used to calculate the equivalent dose from the average tissue or organ absorbed dose; the absorbed dose (expressed in rad or gray) is multiplied by the appropriate radiation weighting factor. The radiation weighting factors to be used for determining equivalent dose in rem are as follows:

RADIATION WEIGHTING FACTORS¹, w_R

Type and energy range	Radiation weighting factor
Photons, electrons and muons, all energies	1

RADIATION WEIGHTING FACTORS¹, w_R —Continued

Type and energy range	Radiation weighting factor
Neutrons, energy <10 keV ^{2 3}	5
Neutrons, energy 10 keV to 100 keV ^{2 3}	10
Neutrons, energy >100 keV to 2 MeV ^{2 3}	20
Neutrons, energy >2 MeV to 20 MeV ^{2 3}	10
Neutrons, energy >20 MeV ^{2 3}	5
Protons, other than recoil protons, energy >2 MeV	5
Alpha particles, fission fragments, heavy nuclei	20

¹ All values relate to the radiation incident on the body or, for internal sources, emitted from the source.
² When spectral data are insufficient to identify the energy of the neutrons, a radiation weighting factor of 20 shall be used.
³ When spectral data are sufficient to identify the energy of the neutrons, the following equation may be used to determine a neutron radiation weighting factor value:

$$w_R = 5 + 17 \exp \left[\frac{-(\ln(2E_n))^2}{6} \right] \text{ Where } E_n \text{ is the neutron energy in MeV.}$$

Tissue weighting factor (w_T) means the fraction of the overall health risk, resulting from uniform, whole body irradiation, attributable to specific tissue (T). The equivalent dose to tissue, (H_T), is multiplied by the appropriate tissue weighting factor to obtain the effective dose (E) contribution from that tissue. The tissue weighting factors are as follows:

TISSUE WEIGHTING FACTORS FOR VARIOUS ORGANS AND TISSUES

Organs or tissues, T	Tissue weighting factor, w_T
Gonads	0.20
Red bone marrow	0.12
Colon	0.12
Lungs	0.12
Stomach	0.12
Bladder	0.05
Breast	0.05
Liver	0.05
Esophagus	0.05
Thyroid	0.05
Skin	0.01
Bone surfaces	0.01
Remainder ¹	0.05
Whole body ²	1.00

¹ "Remainder" means the following additional tissues and organs and their masses, in grams, following parenthetically: adrenals (14), brain (1400), extrathoracic airways (15), small intestine (640), kidneys (310), muscle (28,000), pancreas (100), spleen (180), thymus (20), and uterus (80). The equivalent dose to the remainder tissues ($H_{\text{remainder}}$), is normally calculated as the mass-weighted mean dose to the preceding ten organs and tissues. In those cases in which the most highly irradiated remainder tissue or organ receives the highest equivalent dose of all the organs, a weighting factor of 0.025 (half of remainder) is applied to that tissue or organ and 0.025 (half of remainder) to the mass-weighted equivalent dose in the rest of the remainder tissues and organs to give the remainder equivalent dose.

² For the case of uniform external irradiation of the whole body, a tissue weighting factor (w_T) equal to 1 may be used in determination of the effective dose.

Total effective dose (TED) means the sum of the effective dose (for external exposures) and the committed effective dose.

Whole body means, for the purposes of external exposure, head, trunk (including male gonads), arms above and including the elbow, or legs above and including the knee.

(c) Terms defined in the Atomic Energy Act of 1954 or in 10 CFR part 820 and not defined in this part are used consistent with their meanings given in the Atomic Energy Act of 1954 or in 10 CFR part 820.

[72 FR 31922, June 8, 2007, as amended at 74 FR 18116, Apr. 21, 2009]

§ 835.3 General rule.

(a) No person or DOE personnel shall take or cause to be taken any action inconsistent with the requirements of:

- (1) This part; or
- (2) Any program, plan, schedule, or other process established by this part.

(b) With respect to a particular DOE activity, contractor management shall be responsible for compliance with the requirements of this part.

(c) Where there is no contractor for a DOE activity, DOE shall ensure implementation of and compliance with the requirements of this part.

Department of Energy

§ 835.104

(d) Nothing in this part shall be construed as limiting actions that may be necessary to protect health and safety.

(e) For those activities that are required by §§ 835.102, 835.901(e), 835.1202(a), and 835.1202(b), the time interval to conduct these activities may be extended by a period not to exceed 30 days to accommodate scheduling needs.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59682, Nov. 4, 1998]

§ 835.4 Radiological units.

Unless otherwise specified, the quantities used in the records required by this part shall be clearly indicated in special units of curie, rad, roentgen, or rem, including multiples and subdivisions of these units, or other conventional units, such as, dpm, dpm/100 cm² or mass units. The SI units, becquerel (Bq), gray (Gy), and sievert (Sv), may be provided parenthetically for reference with scientific standards.

[72 FR 31925, June 8, 2007]

Subpart B—Management and Administrative Requirements

§ 835.101 Radiation protection programs.

(a) A DOE activity shall be conducted in compliance with a documented radiation protection program (RPP) as approved by the DOE.

(b) The DOE may direct or make modifications to a RPP.

(c) The content of each RPP shall be commensurate with the nature of the activities performed and shall include formal plans and measures for applying the as low as reasonably achievable (ALARA) process to occupational exposure.

(d) The RPP shall specify the existing and/or anticipated operational tasks that are intended to be within the scope of the RPP. Except as provided in § 835.101(h), any task outside the scope of a RPP shall not be initiated until an update of the RPP is approved by DOE.

(e) The content of the RPP shall address, but shall not necessarily be limited to, each requirement in this part.

(f) The RPP shall include plans, schedules, and other measures for achieving compliance with regulations

of this part. Unless otherwise specified in this part, compliance with the amendments to this part published on June 8, 2007 shall be achieved no later than July 9, 2010.

(g) An update of the RPP shall be submitted to DOE:

(1) Whenever a change or an addition to the RPP is made;

(2) Prior to the initiation of a task not within the scope of the RPP; or

(3) Within 180 days of the effective date of any modifications to this part.

(h) Changes, additions, or updates to the RPP may become effective without prior Department approval only if the changes do not decrease the effectiveness of the RPP and the RPP, as changed, continues to meet the requirements of this part. Proposed changes that decrease the effectiveness of the RPP shall not be implemented without submittal to and approval by the Department.

(i) An initial RPP or an update shall be considered approved 180 days after its submission unless rejected by DOE at an earlier date.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59682, Nov. 4, 1998; 72 FR 31925, June 8, 2007]

§ 835.102 Internal audits.

Internal audits of the radiation protection program, including examination of program content and implementation, shall be conducted through a process that ensures that all functional elements are reviewed no less frequently than every 36 months.

[63 FR 59682, Nov. 4, 1998]

§ 835.103 Education, training and skills.

Individuals responsible for developing and implementing measures necessary for ensuring compliance with the requirements of this part shall have the appropriate education, training, and skills to discharge these responsibilities.

[63 FR 59682, Nov. 4, 1998]

§ 835.104 Written procedures.

Written procedures shall be developed and implemented as necessary to

§ 835.201

ensure compliance with this part, commensurate with the radiological hazards created by the activity and consistent with the education, training, and skills of the individuals exposed to those hazards.

[63 FR 59682, Nov. 4, 1998]

Subpart C—Standards for Internal and External Exposure

§ 835.201 [Reserved]

§ 835.202 Occupational dose limits for general employees.

(a) Except for planned special exposures conducted consistent with § 835.204 and emergency exposures authorized in accordance with § 835.1302, the occupational dose received by general employees shall be controlled such that the following limits are not exceeded in a year:

(1) A total effective dose of 5 rems (0.05 Sv);

(2) The sum of the equivalent dose to the whole body for external exposures and the committed equivalent dose to any organ or tissue other than the skin or the lens of the eye of 50 rems (0.5 Sv);

(3) An equivalent dose to the lens of the eye of 15 rems (0.15 Sv); and

(4) The sum of the equivalent dose to the skin or to any extremity for external exposures and the committed equivalent dose to the skin or to any extremity of 50 rems (0.5 Sv).

(b) All occupational doses received during the current year, except doses resulting from planned special exposures conducted in compliance with § 835.204 and emergency exposures authorized in accordance with § 835.1302, shall be included when demonstrating compliance with §§ 835.202(a) and 835.207.

(c) Doses from background, therapeutic and diagnostic medical radiation, and participation as a subject in medical research programs shall not be included in dose records or in the assessment of compliance with the occupational dose limits.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59682, Nov. 4, 1998; 72 FR 31926, June 8, 2007]

10 CFR Ch. III (1–1–16 Edition)

§ 835.203 Combining internal and external equivalent doses.

(a) The total effective dose during a year shall be determined by summing the effective dose from external exposures and the committed effective dose from intakes during the year.

(b) Determinations of the effective dose shall be made using the radiation and tissue weighting factor values provided in § 835.2.

[72 FR 31926, June 8, 2007]

§ 835.204 Planned special exposures.

(a) A planned special exposure may be authorized for a radiological worker to receive doses in addition to and accounted for separately from the doses received under the limits specified in § 835.202(a), provided that each of the following conditions is satisfied:

(1) The planned special exposure is considered only in an exceptional situation when alternatives that might prevent a radiological worker from exceeding the limits in § 835.202(a) are unavailable or impractical;

(2) The contractor management (and employer, if the employer is not the contractor) specifically requests the planned special exposure, in writing; and

(3) Joint written approval is received from the appropriate DOE Headquarters program office and the Secretarial Officer responsible for environment, safety and health matters.

(b) Prior to requesting an individual to participate in an authorized planned special exposure, the individual's dose from all previous planned special exposures and all doses in excess of the occupational dose limits shall be determined.

(c) An individual shall not receive a planned special exposure that, in addition to the doses determined in § 835.204(b), would result in a dose exceeding the following:

(1) In a year, the numerical values of the dose limits established at § 835.202(a); and

(2) Over the individual's lifetime, five times the numerical values of the dose limits established at § 835.202(a).

(d) Prior to a planned special exposure, written consent shall be obtained

Department of Energy

§ 835.208

from each individual involved. Each such written consent shall include:

(1) The purpose of the planned operations and procedures to be used;

(2) The estimated doses and associated potential risks and specific radiological conditions and other hazards which might be involved in performing the task; and

(3) Instructions on the measures to be taken to keep the dose ALARA considering other risks that may be present.

(e) Records of the conduct of a planned special exposure shall be maintained and a written report submitted within 30 days after the planned special exposure to the approving organizations identified in § 835.204(a)(3).

(f) The dose from planned special exposures is not to be considered in controlling future occupational dose of the individual under § 835.202(a), but is to be included in records and reports required under this part.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59682, Nov. 4, 1998]

§ 835.205 Determination of compliance for non-uniform exposure of the skin.

(a) Non-uniform exposures of the skin from X-rays, beta radiation, and/or radioactive material on the skin are to be assessed as specified in this section.

(b) For purposes of demonstrating compliance with § 835.202(a)(4), assessments shall be conducted as follows:

(1) *Area of skin irradiated is 100 cm² or more.* The non-uniform equivalent dose received during the year shall be averaged over the 100 cm² of the skin receiving the maximum dose, added to any uniform equivalent dose also received by the skin, and recorded as the equivalent dose to any extremity or skin for the year.

(2) *Area of skin irradiated is 10 cm² or more, but is less than 100 cm².* The non-uniform equivalent dose (H) to the irradiated area received during the year shall be added to any uniform equivalent dose also received by the skin and recorded as the equivalent dose to any extremity or skin for the year. H is the equivalent dose averaged over the 1 cm² of skin receiving the maximum absorbed dose, D, reduced by the fraction f, which is the irradiated area in cm²

divided by 100 cm² (i.e., $H = fD$). In no case shall a value of f less than 0.1 be used.

(3) *Area of skin irradiated is less than 10 cm².* The non-uniform equivalent dose shall be averaged over the 1 cm² of skin receiving the maximum dose. This equivalent dose shall:

(i) Be recorded in the individual's occupational exposure history as a special entry; and

(ii) Not be added to any other equivalent dose to any extremity or skin for the year.

[58 FR 65485, Dec. 14, 1993, as amended at 72 FR 31926, June 8, 2007]

§ 835.206 Limits for the embryo/fetus.

(a) The equivalent dose limit for the embryo/fetus from the period of conception to birth, as a result of occupational exposure of a declared pregnant worker, is 0.5 rem (0.005 Sv).

(b) Substantial variation above a uniform exposure rate that would satisfy the limits provided in § 835.206(a) shall be avoided.

(c) If the equivalent dose to the embryo/fetus is determined to have already exceeded 0.5 rem (0.005 Sv) by the time a worker declares her pregnancy, the declared pregnant worker shall not be assigned to tasks where additional occupational exposure is likely during the remaining gestation period.

[58 FR 65485, Dec. 14, 1993, as amended at 72 FR 31926, June 8, 2007]

§ 835.207 Occupational dose limits for minors.

The dose limits for minors occupationally exposed to radiation and/or radioactive materials at a DOE activity are 0.1 rem (0.001 Sv) total effective dose in a year and 10 percent of the occupational dose limits specified at § 835.202(a)(3) and (a)(4).

[72 FR 31926, June 8, 2007]

§ 835.208 Limits for members of the public entering a controlled area.

The total effective dose limit for members of the public exposed to radiation and/or radioactive material during access to a controlled area is 0.1 rem (0.001 Sv) in a year.

[72 FR 31926, June 8, 2007]

§ 835.209 Concentrations of radioactive material in air.

(a) The derived air concentration (DAC) values given in appendices A and C of this part shall be used in the control of occupational exposures to airborne radioactive material.

(b) The estimation of internal dose shall be based on bioassay data rather than air concentration values unless bioassay data are:

- (1) Unavailable;
- (2) Inadequate; or
- (3) Internal dose estimates based on air concentration values are demonstrated to be as or more accurate.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59682, Nov. 4, 1998]

Subpart D [Reserved]

Subpart E—Monitoring of Individuals and Areas

§ 835.401 General requirements.

(a) Monitoring of individuals and areas shall be performed to:

- (1) Demonstrate compliance with the regulations in this part;
- (2) Document radiological conditions;
- (3) Detect changes in radiological conditions;
- (4) Detect the gradual buildup of radioactive material;
- (5) Verify the effectiveness of engineered and administrative controls in containing radioactive material and reducing radiation exposure; and
- (6) Identify and control potential sources of individual exposure to radiation and/or radioactive material.

(b) Instruments and equipment used for monitoring shall be:

- (1) Periodically maintained and calibrated on an established frequency;
- (2) Appropriate for the type(s), levels, and energies of the radiation(s) encountered;
- (3) Appropriate for existing environmental conditions; and
- (4) Routinely tested for operability.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59682, Nov. 4, 1998; 72 FR 31926, June 8, 2007]

§ 835.402 Individual monitoring.

(a) For the purpose of monitoring individual exposures to external radi-

ation, personnel dosimeters shall be provided to and used by:

(1) Radiological workers who, under typical conditions, are likely to receive one or more of the following:

- (i) An effective dose of 0.1 rem (0.001 Sv) or more in a year;
- (ii) An equivalent dose to the skin or to any extremity of 5 rems (0.05 Sv) or more in a year;
- (iii) An equivalent dose to the lens of the eye of 1.5 rems (0.015 Sv) or more in a year;

(2) Declared pregnant workers who are likely to receive from external sources an equivalent dose to the embryo/fetus in excess of 10 percent of the applicable limit at § 835.206(a);

(3) Occupationally exposed minors likely to receive a dose in excess of 50 percent of the applicable limits at § 835.207 in a year from external sources;

(4) Members of the public entering a controlled area likely to receive a dose in excess of 50 percent of the limit at § 835.208 in a year from external sources; and

(5) Individuals entering a high or very high radiation area.

(b) External dose monitoring programs implemented to demonstrate compliance with § 835.402(a) shall be adequate to demonstrate compliance with the dose limits established in subpart C of this part and shall be:

(1) Accredited, or excepted from accreditation, in accordance with the DOE Laboratory Accreditation Program for Personnel Dosimetry; or

(2) Determined by the Secretarial Officer responsible for environment, safety and health matters to have performance substantially equivalent to that of programs accredited under the DOE Laboratory Accreditation Program for Personnel Dosimetry.

(c) For the purpose of monitoring individual exposures to internal radiation, internal dosimetry programs (including routine bioassay programs) shall be conducted for:

(1) Radiological workers who, under typical conditions, are likely to receive a committed effective dose of 0.1 rem (0.001 Sv) or more from all occupational radionuclide intakes in a year;

Department of Energy

§ 835.405

(2) Declared pregnant workers likely to receive an intake or intakes resulting in an equivalent dose to the embryo/fetus in excess of 10 percent of the limit stated at § 835.206(a);

(3) Occupationally exposed minors who are likely to receive a dose in excess of 50 percent of the applicable limit stated at § 835.207 from all radionuclide intakes in a year; or

(4) Members of the public entering a controlled area likely to receive a dose in excess of 50 percent of the limit stated at § 835.208 from all radionuclide intakes in a year.

(d) Internal dose monitoring programs implemented to demonstrate compliance with § 835.402(c) shall be adequate to demonstrate compliance with the dose limits established in subpart C of this part and shall be:

(1) Accredited, or excepted from accreditation, in accordance with the DOE Laboratory Accreditation Program for Radiobioassay; or,

(2) Determined by the Secretarial Officer responsible for environment, safety and health matters to have performance substantially equivalent to that of programs accredited under the DOE Laboratory Accreditation Program for Radiobioassay.

[63 FR 59683, Nov. 4, 1998, as amended at 72 FR 31926, June 8, 2007]

§ 835.403 Air monitoring.

(a) Monitoring of airborne radioactivity shall be performed:

(1) Where an individual is likely to receive an exposure of 40 or more DAC-hours in a year; or

(2) As necessary to characterize the airborne radioactivity hazard where respiratory protective devices for protection against airborne radionuclides have been prescribed.

(b) Real-time air monitoring shall be performed as necessary to detect and provide warning of airborne radioactivity concentrations that warrant immediate action to terminate inhalation of airborne radioactive material.

[63 FR 59683, Nov. 4, 1998]

§ 835.404 [Reserved]

§ 835.405 Receipt of packages containing radioactive material.

(a) If packages containing quantities of radioactive material in excess of a Type A quantity (as defined at 10 CFR 71.4) are expected to be received from radioactive material transportation, arrangements shall be made to either:

(1) Take possession of the package when the carrier offers it for delivery; or

(2) Receive notification as soon as practicable after arrival of the package at the carrier's terminal and to take possession of the package expeditiously after receiving such notification.

(b) Upon receipt from radioactive material transportation, external surfaces of packages known to contain radioactive material shall be monitored if the package:

(1) Is labeled with a Radioactive White I, Yellow II, or Yellow III label (as specified at 49 CFR 172.403 and 172.436-440); or

(2) Has been transported as low specific activity material (as defined at 10 CFR 71.4) on an exclusive use vehicle (as defined at 10 CFR 71.4); or

(3) Has evidence of degradation, such as packages that are crushed, wet, or damaged.

(c) The monitoring required by paragraph (b) of this section shall include:

(1) Measurements of removable contamination levels, unless the package contains only special form (as defined at 10 CFR 71.4) or gaseous radioactive material; and

(2) Measurements of the radiation levels, if the package contains a Type B quantity (as defined at 10 CFR 71.4) of radioactive material.

(d) The monitoring required by paragraph (b) of this section shall be completed as soon as practicable following receipt of the package, but not later than 8 hours after the beginning of the working day following receipt of the package.

(e) Monitoring pursuant to § 835.405(b) is not required for packages transported on a DOE site which have remained under the continuous observation and control of a DOE employee or DOE contractor employee who is

§ 835.501

knowledgeable of and implements required exposure control measures.

[63 FR 59683, Nov. 4, 1998, as amended at 72 FR 31926, June 8, 2007]

Subpart F—Entry Control Program

§ 835.501 Radiological areas.

(a) Personnel entry control shall be maintained for each radiological area.

(b) The degree of control shall be commensurate with existing and potential radiological hazards within the area.

(c) One or more of the following methods shall be used to ensure control:

- (1) Signs and barricades;
- (2) Control devices on entrances;
- (3) Conspicuous visual and/or audible alarms;
- (4) Locked entrance ways; or
- (5) Administrative controls.

(d) Written authorizations shall be required to control entry into and perform work within radiological areas. These authorizations shall specify radiation protection measures commensurate with the existing and potential hazards.

(e) No control(s) shall be installed at any radiological area exit that would prevent rapid evacuation of personnel under emergency conditions.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59684, Nov. 4, 1998]

§ 835.502 High and very high radiation areas.

(a) The following measures shall be implemented for each entry into a high radiation area:

(1) The area shall be monitored as necessary during access to determine the exposure rates to which the individuals are exposed; and

(2) Each individual shall be monitored by a supplemental dosimetry device or other means capable of providing an immediate estimate of the individual's integrated equivalent dose to the whole body during the entry.

(b) *Physical controls.* One or more of the following features shall be used for each entrance or access point to a high radiation area where radiation levels exist such that an individual could exceed an equivalent dose to the whole

10 CFR Ch. III (1–1–16 Edition)

body of 1 rem (0.01 sievert) in any one hour at 30 centimeters from the source or from any surface that the radiation penetrates:

(1) A control device that prevents entry to the area when high radiation levels exist or upon entry causes the radiation level to be reduced below that level defining a high radiation area;

(2) A device that functions automatically to prevent use or operation of the radiation source or field while individuals are in the area;

(3) A control device that energizes a conspicuous visible or audible alarm signal so that the individual entering the high radiation area and the supervisor of the activity are made aware of the entry;

(4) Entryways that are locked. During periods when access to the area is required, positive control over each entry is maintained;

(5) Continuous direct or electronic surveillance that is capable of preventing unauthorized entry;

(6) A control device that will automatically generate audible and visual alarm signals to alert personnel in the area before use or operation of the radiation source and in sufficient time to permit evacuation of the area or activation of a secondary control device that will prevent use or operation of the source.

(c) *Very high radiation areas.* In addition to the above requirements, additional measures shall be implemented to ensure individuals are not able to gain unauthorized or inadvertent access to very high radiation areas.

(d) No control(s) shall be established in a high or very high radiation area that would prevent rapid evacuation of personnel.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59684, Nov. 4, 1998; 72 FR 31926, June 8, 2007]

Subpart G—Posting and Labeling

§ 835.601 General requirements.

(a) Except as otherwise provided in this subpart, postings and labels required by this subpart shall include the standard radiation warning trefoil in black or magenta imposed upon a yellow background.

Department of Energy

§ 835.605

(b) Signs required by this subpart shall be clearly and conspicuously posted and may include radiological protection instructions.

(c) The posting and labeling requirements in this subpart may be modified to reflect the special considerations of DOE activities conducted at private residences or businesses. Such modifications shall provide the same level of protection to individuals as the existing provisions in this subpart.

[63 FR 59684, Nov. 4, 1998]

§ 835.602 Controlled areas.

(a) Each access point to a controlled area (as defined at § 835.2) shall be posted whenever radiological areas or radioactive material areas exist in the area. Individuals who enter only controlled areas without entering radiological areas or radioactive material areas are not expected to receive a total effective dose of more than 0.1 rem (0.001 sievert) in a year.

(b) Signs used for this purpose may be selected by the contractor to avoid conflict with local security requirements.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59684, Nov. 4, 1998; 72 FR 31926, June 8, 2007]

§ 835.603 Radiological areas and radioactive material areas.

Each access point to radiological areas and radioactive material areas (as defined at § 835.2) shall be posted with conspicuous signs bearing the wording provided in this section.

(a) *Radiation area.* The words "Caution, Radiation Area" shall be posted at each radiation area.

(b) *High radiation area.* The words "Caution, High Radiation Area" or "Danger, High Radiation Area" shall be posted at each high radiation area.

(c) *Very high radiation area.* The words "Grave Danger, Very High Radiation Area" shall be posted at each very high radiation area.

(d) *Airborne radioactivity area.* The words "Caution, Airborne Radioactivity Area" or "Danger, Airborne Radioactivity Area" shall be posted at each airborne radioactivity area.

(e) *Contamination area.* The words "Caution, Contamination Area" shall be posted at each contamination area.

(f) *High contamination area.* The words "Caution, High Contamination Area" or "Danger, High Contamination Area" shall be posted at each high contamination area.

(g) *Radioactive material area.* The words "Caution, Radioactive Material(s)" shall be posted at each radioactive material area.

[63 FR 59684, Nov. 4, 1998]

§ 835.604 Exceptions to posting requirements.

(a) Areas may be excepted from the posting requirements of § 835.603 for periods of less than 8 continuous hours when placed under continuous observation and control of an individual knowledgeable of, and empowered to implement, required access and exposure control measures.

(b) Areas may be excepted from the radioactive material area posting requirements of § 835.603(g) when:

(1) Posted in accordance with §§ 835.603(a) through (f); or

(2) Each item or container of radioactive material is labeled in accordance with this subpart such that individuals entering the area are made aware of the hazard; or

(3) The radioactive material of concern consists solely of structures or installed components which have been activated (i.e., such as by being exposed to neutron radiation or particles produced by an accelerator).

(c) Areas containing only packages received from radioactive material transportation labeled and in non-degraded condition need not be posted in accordance with § 835.603 until the packages are monitored in accordance with § 835.405.

[63 FR 59684, Nov. 4, 1998]

§ 835.605 Labeling items and containers.

Except as provided at § 835.606, each item or container of radioactive material shall bear a durable, clearly visible label bearing the standard radiation warning trefoil and the words "Caution, Radioactive Material" or "Danger, Radioactive Material." The label

§ 835.606

shall also provide sufficient information to permit individuals handling, using, or working in the vicinity of the items or containers to take precautions to avoid or control exposures.

[63 FR 59684, Nov. 4, 1998]

§ 835.606 Exceptions to labeling requirements.

(a) Items and containers may be exempted from the radioactive material labeling requirements of § 835.605 when:

(1) Used, handled, or stored in areas posted and controlled in accordance with this subpart and sufficient information is provided to permit individuals to take precautions to avoid or control exposures; or

(2) The quantity of radioactive material is less than one tenth of the values specified in appendix E of this part and less than 0.1 Ci; or

(3) Packaged, labeled, and marked in accordance with the regulations of the Department of Transportation or DOE Orders governing radioactive material transportation; or

(4) Inaccessible, or accessible only to individuals authorized to handle or use them, or to work in the vicinity; or

(5) Installed in manufacturing, process, or other equipment, such as reactor components, piping, and tanks; or

(6) The radioactive material consists solely of nuclear weapons or their components.

(b) Radioactive material labels applied to sealed radioactive sources may be exempted from the color specifications of § 835.601(a).

[63 FR 59684, Nov. 4, 1998, as amended at 72 FR 31927, June 8, 2007]

Subpart H—Records

§ 835.701 General provisions.

(a) Records shall be maintained to document compliance with this part and with radiation protection programs required by § 835.101.

(b) Unless otherwise specified in this subpart, records shall be retained until final disposition is authorized by DOE.

§ 835.702 Individual monitoring records.

(a) Except as authorized by § 835.702(b), records shall be maintained

10 CFR Ch. III (1–1–16 Edition)

to document doses received by all individuals for whom monitoring was conducted and to document doses received during planned special exposures, unplanned doses exceeding the monitoring thresholds of § 835.402, and authorized emergency exposures.

(b) Recording of the non-uniform equivalent dose to the skin is not required if the dose is less than 2 percent of the limit specified for the skin at § 835.202(a)(4). Recording of internal dose (committed effective dose or committed equivalent dose) is not required for any monitoring result estimated to correspond to an individual receiving less than 0.01 rem (0.1 mSv) committed effective dose. The bioassay or air monitoring result used to make the estimate shall be maintained in accordance with § 835.703(b) and the unrecorded internal dose estimated for any individual in a year shall not exceed the applicable monitoring threshold at § 835.402(c).

(c) The records required by this section shall:

(1) Be sufficient to evaluate compliance with subpart C of this part;

(2) Be sufficient to provide dose information necessary to complete reports required by subpart I of this part;

(3) Include the results of monitoring used to assess the following quantities for external dose received during the year:

(i) The effective dose from external sources of radiation (equivalent dose to the whole body may be used as effective dose for external exposure);

(ii) The equivalent dose to the lens of the eye;

(iii) The equivalent dose to the skin; and

(iv) The equivalent dose to the extremities.

(4) Include the following information for internal dose resulting from intakes received during the year:

(i) Committed effective dose;

(ii) Committed equivalent dose to any organ or tissue of concern; and

(iii) Identity of radionuclides.

(5) Include the following quantities for the summation of the external and internal dose:

(i) Total effective dose in a year;

(ii) For any organ or tissue assigned an internal dose during the year, the

Department of Energy

§ 835.801

sum of the equivalent dose to the whole body from external exposures and the committed equivalent dose to that organ or tissue; and

(iii) Cumulative total effective dose.

(6) Include the equivalent dose to the embryo/fetus of a declared pregnant worker.

(d) Documentation of all occupational doses received during the current year, except for doses resulting from planned special exposures conducted in compliance with § 835.204 and emergency exposures authorized in accordance with § 835.1302(d), shall be obtained to demonstrate compliance with § 835.202(a). If complete records documenting previous occupational dose during the year cannot be obtained, a written estimate signed by the individual may be accepted to demonstrate compliance.

(e) For radiological workers whose occupational dose is monitored in accordance with § 835.402, reasonable efforts shall be made to obtain complete records of prior years occupational internal and external doses.

(f) The records specified in this section that are identified with a specific individual shall be readily available to that individual.

(g) Data necessary to allow future verification or reassessment of the recorded doses shall be recorded.

(h) All records required by this section shall be transferred to the DOE upon cessation of activities at the site that could cause exposure to individuals.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59685, Nov. 4, 1998; 72 FR 31927, June 8, 2007]

§ 835.703 Other monitoring records.

The following information shall be documented and maintained:

(a) Results of monitoring for radiation and radioactive material as required by subparts E and L of this part, except for monitoring required by § 835.1102(d);

(b) Results of monitoring used to determine individual occupational dose from external and internal sources;

(c) Results of monitoring for the release and control of material and equipment as required by § 835.1101; and

(d) Results of maintenance and calibration performed on instruments and equipment as required by § 835.401(b).

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59685, Nov. 4, 1998]

§ 835.704 Administrative records.

(a) Training records shall be maintained, as necessary, to demonstrate compliance with §§ 835.901.

(b) Actions taken to maintain occupational exposures as low as reasonably achievable, including the actions required for this purpose by § 835.101, as well as facility design and control actions required by §§ 835.1001, 835.1002, and 835.1003, shall be documented.

(c) Records shall be maintained to document the results of internal audits and other reviews of program content and implementation.

(d) Written declarations of pregnancy, including the estimated date of conception, and revocations of declarations of pregnancy shall be maintained.

(e) Changes in equipment, techniques, and procedures used for monitoring shall be documented.

(f) Records shall be maintained as necessary to demonstrate compliance with the requirements of §§ 835.1201 and 835.1202 for sealed radioactive source control, inventory, and source leak tests.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59685, Nov. 4, 1998]

Subpart I—Reports to Individuals

§ 835.801 Reports to individuals.

(a) Radiation exposure data for individuals monitored in accordance with § 835.402 shall be reported as specified in this section. The information shall include the data required under § 835.702(c). Each notification and report shall be in writing and include: the DOE site or facility name, the name of the individual, and the individual's social security number, employee number, or other unique identification number.

(b) Upon the request from an individual terminating employment, records of exposure shall be provided to that individual as soon as the data are available, but not later than 90 days after termination. A written estimate

§ 835.901

10 CFR Ch. III (1–1–16 Edition)

of the radiation dose received by that employee based on available information shall be provided at the time of termination, if requested.

(c) Each DOE- or DOE-contractor-operated site or facility shall, on an annual basis, provide a radiation dose report to each individual monitored during the year at that site or facility in accordance with § 835.402.

(d) Detailed information concerning any individual's exposure shall be made available to the individual upon request of that individual, consistent with the provisions of the Privacy Act (5 U.S.C. 552a).

(e) When a DOE contractor is required to report to the Department, pursuant to Departmental requirements for occurrence reporting and processing, any exposure of an individual to radiation and/or radioactive material, or planned special exposure in accordance with § 835.204(e), the contractor shall also provide that individual with a report on his or her exposure data included therein. Such report shall be transmitted at a time not later than the transmittal to the Department.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59685, Nov. 4, 1998]

Subpart J—Radiation Safety Training

§ 835.901 Radiation safety training.

(a) Each individual shall complete radiation safety training on the topics established at § 835.901(c) commensurate with the hazards in the area and the required controls:

(1) Before being permitted unescorted access to controlled areas; and

(2) Before receiving occupational dose during access to controlled areas at a DOE site or facility.

(b) Each individual shall demonstrate knowledge of the radiation safety training topics established at § 835.901(c), commensurate with the hazards in the area and required controls, by successful completion of an examination and performance demonstrations:

(1) Before being permitted unescorted access to radiological areas; and

(2) Before performing unescorted assignments as a radiological worker.

(c) Radiation safety training shall include the following topics, to the extent appropriate to each individual's prior training, work assignments, and degree of exposure to potential radiological hazards:

(1) Risks of exposure to radiation and radioactive materials, including prenatal radiation exposure;

(2) Basic radiological fundamentals and radiation protection concepts;

(3) Physical design features, administrative controls, limits, policies, procedures, alarms, and other measures implemented at the facility to manage doses and maintain doses ALARA, including both routine and emergency actions;

(4) Individual rights and responsibilities as related to implementation of the facility radiation protection program;

(5) Individual responsibilities for implementing ALARA measures required by § 835.101; and

(6) Individual exposure reports that may be requested in accordance with § 835.801.

(d) When an escort is used in lieu of training in accordance with paragraph (a) or (b) of this section, the escort shall:

(1) Have completed radiation safety training, examinations, and performance demonstrations required for entry to the area and performance of the work; and

(2) Ensure that all escorted individuals comply with the documented radiation protection program.

(e) Radiation safety training shall be provided to individuals when there is a significant change to radiation protection policies and procedures that may affect the individual and at intervals not to exceed 24 months. Such training provided for individuals subject to the requirements of § 835.901(b)(1) and (b)(2) shall include successful completion of an examination.

[63 FR 59685, Nov. 4, 1998]

Department of Energy

§ 835.1101

§§ 835.902–835.903 [Reserved]

Subpart K—Design and Control

§ 835.1001 Design and control.

(a) Measures shall be taken to maintain radiation exposure in controlled areas ALARA through engineered and administrative controls. The primary methods used shall be physical design features (e.g., confinement, ventilation, remote handling, and shielding). Administrative controls shall be employed only as supplemental methods to control radiation exposure.

(b) For specific activities where use of engineered controls is demonstrated to be impractical, administrative controls shall be used to maintain radiation exposures ALARA.

[63 FR 59686, Nov. 4, 1998, as amended at 72 FR 31927, June 8, 2007]

§ 835.1002 Facility design and modifications.

During the design of new facilities or modification of existing facilities, the following objectives shall be adopted:

(a) Optimization methods shall be used to assure that occupational exposure is maintained ALARA in developing and justifying facility design and physical controls.

(b) The design objective for controlling personnel exposure from external sources of radiation in areas of continuous occupational occupancy (2000 hours per year) shall be to maintain exposure levels below an average of 0.5 millirem (5 μ Sv) per hour and as far below this average as is reasonably achievable. The design objectives for exposure rates for potential exposure to a radiological worker where occupancy differs from the above shall be ALARA and shall not exceed 20 percent of the applicable standards in § 835.202.

(c) Regarding the control of airborne radioactive material, the design objective shall be, under normal conditions, to avoid releases to the workplace atmosphere and in any situation, to control the inhalation of such material by workers to levels that are ALARA; confinement and ventilation shall normally be used.

(d) The design or modification of a facility and the selection of materials

shall include features that facilitate operations, maintenance, decontamination, and decommissioning.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59686, Nov. 4, 1998; 72 FR 31927, June 8, 2007]

§ 835.1003 Workplace controls.

During routine operations, the combination of engineered and administrative controls shall provide that:

(a) The anticipated occupational dose to general employees shall not exceed the limits established at § 835.202; and

(b) The ALARA process is utilized for personnel exposures to ionizing radiation.

[63 FR 59686, Nov. 4, 1998, as amended at 72 FR 31927, June 8, 2007]

Subpart L—Radioactive Contamination Control

SOURCE: 63 FR 59686, Nov. 4, 1998, unless otherwise noted.

§ 835.1101 Control of material and equipment.

(a) Except as provided in paragraphs (b) and (c) of this section, material and equipment in contamination areas, high contamination areas, and airborne radioactivity areas shall not be released to a controlled area if:

(1) Removable surface contamination levels on accessible surfaces exceed the removable surface contamination values specified in appendix D of this part; or

(2) Prior use suggests that the removable surface contamination levels on inaccessible surfaces are likely to exceed the removable surface contamination values specified in appendix D of this part.

(b) Material and equipment exceeding the removable surface contamination values specified in appendix D of this part may be conditionally released for movement on-site from one radiological area for immediate placement in another radiological area only if appropriate monitoring is performed and appropriate controls for the movement are established and exercised.

(c) Material and equipment with fixed contamination levels that exceed

§ 835.1102

the total contamination values specified in appendix D of this part may be released for use in controlled areas outside of radiological areas only under the following conditions:

(1) Removable surface contamination levels are below the removable surface contamination values specified in appendix D of this part; and

(2) The material or equipment is routinely monitored and clearly marked or labeled to alert personnel of the contaminated status.

§ 835.1102 Control of areas.

(a) Appropriate controls shall be maintained and verified which prevent the inadvertent transfer of removable contamination to locations outside of radiological areas under normal operating conditions.

(b) Any area in which contamination levels exceed the values specified in appendix D of this part shall be controlled in a manner commensurate with the physical and chemical characteristics of the contaminant, the radionuclides present, and the fixed and removable surface contamination levels.

(c) Areas accessible to individuals where the measured total surface contamination levels exceed, but the removable surface contamination levels are less than, corresponding surface contamination values specified in appendix D of this part, shall be controlled as follows when located outside of radiological areas:

(1) The area shall be routinely monitored to ensure the removable surface contamination level remains below the removable surface contamination values specified in appendix D of this part; and

(2) The area shall be conspicuously marked to warn individuals of the contaminated status.

(d) Individuals exiting contamination, high contamination, or airborne radioactivity areas shall be monitored, as appropriate, for the presence of surface contamination.

(e) Protective clothing shall be required for entry to areas in which removable contamination exists at levels exceeding the removable surface contamination values specified in appendix D of this part.

10 CFR Ch. III (1–1–16 Edition)

Subpart M—Sealed Radioactive Source Control

SOURCE: 63 FR 59686, Nov. 4, 1998, unless otherwise noted.

§ 835.1201 Sealed radioactive source control.

Sealed radioactive sources shall be used, handled, and stored in a manner commensurate with the hazards associated with operations involving the sources.

§ 835.1202 Accountable sealed radioactive sources.

(a) Each accountable sealed radioactive source shall be inventoried at intervals not to exceed six months. This inventory shall:

(1) Establish the physical location of each accountable sealed radioactive source;

(2) Verify the presence and adequacy of associated postings and labels; and

(3) Establish the adequacy of storage locations, containers, and devices.

(b) Except for sealed radioactive sources consisting solely of gaseous radioactive material or tritium, each accountable sealed radioactive source shall be subject to a source leak test upon receipt, when damage is suspected, and at intervals not to exceed six months. Source leak tests shall be capable of detecting radioactive material leakage equal to or exceeding 0.005 μCi .

(c) Notwithstanding the requirements of paragraph (b) of this section, an accountable sealed radioactive source is not subject to periodic source leak testing if that source has been removed from service. Such sources shall be stored in a controlled location, subject to periodic inventory as required by paragraph (a) of this section, and subject to source leak testing prior to being returned to service.

(d) Notwithstanding the requirements of paragraphs (a) and (b) of this section, an accountable sealed radioactive source is not subject to periodic inventory and source leak testing if that source is located in an area that is unsafe for human entry or otherwise inaccessible.

(e) An accountable sealed radioactive source found to be leaking radioactive

material shall be controlled in a manner that minimizes the spread of radioactive contamination.

[63 FR 59686, Nov. 4, 1998, as amended at 72 FR 31927, June 8, 2007]

Subpart N—Emergency Exposure Situations

§ 835.1301 General provisions.

(a) A general employee whose occupational dose has exceeded the numerical value of any of the limits specified in §835.202 as a result of an authorized emergency exposure may be permitted to return to work in radiological areas during the current year providing that all of the following conditions are met:

(1) Approval is first obtained from the contractor management and the Head of the responsible DOE field organization;

(2) The individual receives counseling from radiological protection and medical personnel regarding the consequences of receiving additional occupational exposure during the year; and

(3) The affected employee agrees to return to radiological work.

(b) All doses exceeding the limits specified in §835.202 shall be recorded in the affected individual's occupational dose record.

(c) When the conditions under which a dose was received in excess of the limits specified in §835.202, except those received in accordance with §835.204, have been eliminated, operating management shall notify the Head of the responsible DOE field organization.

(d) Operations which have been suspended as a result of a dose in excess of the limits specified in §835.202, except those received in accordance with §835.204, may be resumed only with the approval of DOE.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59687, Nov. 4, 1998; 72 FR 31927, June 8, 2007]

§ 835.1302 Emergency exposure situations.

(a) The risk of injury to those individuals involved in rescue and recovery operations shall be minimized.

(b) Operating management shall weigh actual and potential risks against the benefits to be gained.

(c) No individual shall be required to perform a rescue action that might involve substantial personal risk.

(d) Each individual authorized to perform emergency actions likely to result in occupational doses exceeding the values of the limits provided at §835.202(a) shall be trained in accordance with §835.901(b) and briefed beforehand on the known or anticipated hazards to which the individual will be subjected.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59687, Nov. 4, 1998]

§ 835.1303 [Reserved]

§ 835.1304 Nuclear accident dosimetry.

(a) Installations possessing sufficient quantities of fissile material to potentially constitute a critical mass, such that the excessive exposure of individuals to radiation from a nuclear accident is possible, shall provide nuclear accident dosimetry for those individuals.

(b) Nuclear accident dosimetry shall include the following:

(1) A method to conduct initial screening of individuals involved in a nuclear accident to determine whether significant exposures to radiation occurred;

(2) Methods and equipment for analysis of biological materials;

(3) A system of fixed nuclear accident dosimeter units; and

(4) Personal nuclear accident dosimeters.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59687, Nov. 4, 1998]

APPENDIX A TO PART 835—DERIVED AIR CONCENTRATIONS (DAC) FOR CONTROLLING RADIATION EXPOSURE TO WORKERS AT DOE FACILITIES

The data presented in appendix A are to be used for controlling individual internal doses in accordance with §835.209, identifying the need for air monitoring in accordance with §835.403, and identifying and posting airborne radioactivity areas in accordance with §835.603(d).

The DAC values are given for individual radionuclides. For known mixtures of radionuclides, determine the sum of the ratio of the observed concentration of a particular

radionuclide and its corresponding DAC for all radionuclides in the mixture. If this sum exceeds unity (1), then the DAC has been exceeded. For unknown radionuclides, the most restrictive DAC (lowest value) for those isotopes not known to be absent shall be used. For any single radionuclide not listed in appendix A with decay mode other than alpha emission or spontaneous fission and with radioactive half-life greater than two hours, the DAC value shall be 4 E-11 $\mu\text{Ci/mL}$ (1 Bq/ m^3). For any single radionuclide not listed in appendix A that decays by alpha emission or spontaneous fission the DAC value shall be 2 E-13 $\mu\text{Ci/mL}$ (8 E-03 Bq/ m^3).

The DACs for limiting radiation exposures through inhalation of radionuclides by workers are listed in this appendix. The values are based on either a stochastic (committed effective dose) dose limit of 5 rems (0.05 Sv) or a deterministic (organ or tissue) dose limit of 50 rems (0.5 Sv) per year, whichever is more limiting.

NOTE: The 15 rems (0.15 Sv) dose limit for the lens of the eye does not appear as a critical organ dose limit.

The columns in this appendix contain the following information: (1) Radionuclide; (2) inhaled air DAC for type F (fast), type M (moderate), and type S (slow) materials in units of $\mu\text{Ci/mL}$; (3) inhaled air DAC for type F (fast), type M (moderate), and type S (slow) materials in units of Bq/ m^3 ; (4) an indication of whether or not the DAC for each class is controlled by the stochastic (effective dose) or deterministic (organ or tissue) dose. The absorption types (F, M, and S) have been established to describe the absorption type of the materials from the respiratory tract into the blood. The range of half-times for the absorption types correspond to: Type F, 100% at 10 minutes; Type M, 10% at 10 minutes and 90% at 140 days; and Type S 0.1% at 10 minutes and 99.9% at 7000 days. The DACs are listed by radionuclide, in order of increasing atomic mass, and are based on the assumption that the particle size distribution of 5 micrometers AMAD is used. For situations where the particle size distribution is known to differ significantly from 5 micrometers AMAD, appropriate corrections may be made to both the estimated dose to workers and the DACs.

FOOTNOTES FOR APPENDIX A

¹A determination of whether the DACs are controlled by stochastic (St) or deterministic (organ or tissue) dose, or if they both give the same result (E), for each absorption type, is given in this column. The key to the organ notation for deterministic dose is: BS = Bone surface, ET = Extrathoracic, K = Kidney, L = Liver, and T = Thyroid. A blank indicates that no calculations were performed for the absorption type shown.

²The ICRP identifies these materials as soluble or reactive gases and vapors or highly soluble or reactive gases and vapors. For tritiated water, the inhalation DAC values allow for an additional 50% absorption through the skin, as described in ICRP Publication No. 68, Dose Coefficients for Intakes of Radionuclides by Workers. For elemental tritium, the DAC values include a factor that irradiation from gas within the lungs might increase the dose by 20%.

³A dash indicates no values given for this data category.

⁴DAC values derived using hafnium tritide particle and are based on "observed activity" (i.e., only radiation emitted from the particle is considered). DAC values derived using methodology found in Radiological Control Programs for Special Tritium Compounds, DOE-HDBK-1184-2004.

⁵These values are appropriate for protection from radon combined with its short-lived decay products and are based on information given in ICRP Publication 65: Protection Against Radon-222 at Home and at Work and in DOE-STD-1121-98: Internal Dosim-

etry. The values given are for 100% equilibrium concentration conditions of the short-lived radon decay products with the parent. To allow for an actual measured equilibrium concentration or a demonstrated equilibrium concentration, the values given in this table should be multiplied by the ratio (100%/actual %) or (100%/demonstrated %), respectively. Alternatively, the DAC values for Rn-220 and Rn-222 may be replaced by 2.5 working level (WL) and 0.83 WL, respectively, for appropriate limiting of decay product concentrations. A WL is any combination of short-lived radon decay products, in one liter of air without regard to the degree of equilibrium, that will result in the ultimate emission of 1.3 E + 05 MeV of alpha energy.

[72 FR 31927, June 8, 2007]

APPENDIX B TO PART 835 [RESERVED]

APPENDIX C TO PART 835—DERIVED AIR CONCENTRATION (DAC) FOR WORKERS FROM EXTERNAL EXPOSURE DURING IMMERSION IN A CLOUD OF AIRBORNE RADIOACTIVE MATERIAL

a. The data presented in appendix C are to be used for controlling occupational exposures in accordance with §835.209, identifying the need for air monitoring in accordance with §835.403 and identifying the need for posting of airborne radioactivity areas in accordance with §835.603(d).

b. The air immersion DAC values shown in this appendix are based on a stochastic dose

limit of 5 rems (0.05 Sv) per year. Four columns of information are presented: (1) Radionuclide; (2) half-life in units of seconds (s), minutes (min), hours (h), days (d), or years (yr); (3) air immersion DAC in units of $\mu\text{Ci/mL}$; and (4) air immersion DAC in units of Bq/m^3 . The data are listed by radionuclide in order of increasing atomic mass. The air immersion DACs were calculated for a continuous, nonshielded exposure via immersion in a semi-infinite cloud of airborne radioactive material. The DACs listed in this appendix may be modified to allow for submergence in a cloud of finite dimensions.

c. The DAC values are given for individual radionuclides. For known mixtures of radionuclides, determine the sum of the ratio of the observed concentration of a particular radionuclide and its corresponding DAC for all radionuclides in the mixture. If this sum exceeds unity (1), then the DAC has been exceeded. For unknown radionuclides, the most restrictive DAC (lowest value) for those isotopes not known to be absent shall be used.

AIR IMMERSION DAC

Radionuclide	Half-life	($\mu\text{Ci/mL}$)	(Bq/m^3)
Ar-37	35.02 d	3E + 00	1E + 11
Ar-39	269 yr	1E-03	5E + 07
Ar-41	1.827 h	3E-06	1E + 05
Kr-74	11.5 min	3E-06	1E + 05
Kr-76	14.8 h	1E-05	3E + 05

Kr-83m	1.83 h	7E-02	2E + 09
Kr-85	10.72 yr	7E-04	2E + 07
Kr-85m	4.48 h	2E-05	1E + 06

SURFACE CONTAMINATION VALUES ¹ IN $\text{DPM}/100 \text{ CM}^2$

Radionuclide	Removable ^{2,4}	Total (Fixed + Removable) ^{2,3}
U-nat, U-235, U-238, and associated decay products	7,000	75,000
Transuranics, Ra-226, Ra-228, Th-230, Th-228, Pa-231, Ac-227, I-125, I-129	20	500
Th-nat, Th-232, Sr-90, Ra-223, Ra-224, U-232, I-126, I-131, I-133	200	1,000
Beta-gamma emitters (nuclides with decay modes other than alpha emission or spontaneous fission) except Sr-90 and others noted above ⁵	1,000	5,000
Tritium and STCs ⁶	10,000	See Footnote 6

¹The values in this appendix, with the exception noted in footnote 6 below, apply to radioactive contamination deposited on, but not incorporated into the interior or matrix of, the contaminated item. Where surface contamination by both alpha- and beta-gamma-emitting nuclides exists, the limits established for alpha- and beta-gamma-emitting nuclides apply independently.

²As used in this table, dpm (disintegrations per minute) means the rate of emission by radioactive material as determined by correcting the counts per minute observed by an appropriate detector for background, efficiency, and geometric factors associated with the instrumentation.

³The levels may be averaged over one square meter provided the maximum surface activity in any area of 100 cm^2 is less than three times the value specified. For purposes of averaging, any square meter of surface shall be considered to be above the surface contamination value if: (1) From measurements of a representative number of sections it is determined that the average contamination level exceeds the applicable value; or (2) it is determined that the sum of the activity of all isolated spots or particles in any 100 cm^2 area exceeds three times the applicable value.

⁴The amount of removable radioactive material per 100 cm^2 of surface area should be determined by swiping the area with dry filter or soft absorbent paper, applying moderate pressure, and then assessing the amount of radioactive material on the swipe with an appropriate instrument of known efficiency. (Note—The use of dry material may not be appropriate for tritium.) When removable contamination on objects of surface area less than 100 cm^2 is determined, the activity per unit area shall be based on the actual area and the entire surface shall be wiped. It is not necessary to use swiping techniques to measure removable contamination levels if direct scan surveys indicate that the total residual surface contamination levels are within the limits for removable contamination.

⁵This category of radionuclides includes mixed fission products, including the Sr-90 which is present in them. It does not apply to Sr-90 which has been separated from the other fission products or mixtures where the Sr-90 has been enriched.

AIR IMMERSION DAC—Continued

Radionuclide	Half-life	($\mu\text{Ci/mL}$)	(Bq/m^3)
Kr-87	76.3 min	4E-06	1E + 05
Kr-88	2.84 h	1E-06	7E + 04
Xe-120	40.0 min	1E-05	4E + 05
Xe-121	40.1 min	2E-06	8E + 04
Xe-122	20.1 h	8E-05	3E + 06
Xe-123	2.14 h	6E-06	2E + 05
Xe-125	16.8 h	1E-05	6E + 05
Xe-127	36.406 d	1E-05	6E + 05
Xe-129m	8.89 d	2E-04	7E + 06
Xe-131m	11.84 d	5E-04	1E + 07
Xe-133	5.245 d	1E-04	5E + 06
Xe-133m	2.19 d	1E-04	5E + 06
Xe-135	9.11 h	1E-05	6E + 05
Xe-135m	15.36 min	1E-05	3E + 05
Xe-138	14.13 min	3E-06	1E + 05

For any single radionuclide not listed above with decay mode other than alpha emission or spontaneous fission and with radioactive half-life less than two hours, the DAC value shall be $6 \text{ E}-06 \mu\text{Ci/mL}$ ($2 \text{ E} + 04 \text{ Bq/m}^3$).

[72 FR 31940, June 8, 2007, as amended at 76 FR 20489, Apr. 13, 2011]

APPENDIX D TO PART 835—SURFACE CONTAMINATION VALUES

The data presented in appendix D are to be used in identifying the need for posting of contamination and high contamination areas in accordance with §835.603(e) and (f) and identifying the need for surface contamination monitoring and control in accordance with §§835.1101 and 835.1102.

⁶Tritium contamination may diffuse into the volume or matrix of materials. Evaluation of surface contamination shall consider the extent to which such contamination may migrate to the surface in order to ensure the surface contamination value provided in this appendix is not exceeded. Once this contamination migrates to the surface, it may be removable, not fixed; therefore, a "Total" value does not apply. In certain cases, a "Total" value of 10,000 dpm/100 cm² may be applicable either to metals, of the types which form insoluble special tritium compounds that have been exposed to tritium; or to bulk materials to which particles of insoluble special tritium compound are fixed to a surface.

⁷These limits only apply to the alpha emitters within the respective decay series.

[58 FR 65485, Dec. 14, 1993, as amended at 63 FR 59688, Nov. 4, 1998; 72 FR 31940, June 8, 2007; 74 FR 18116, Apr. 21, 2009]

APPENDIX E TO PART 835—VALUES FOR ESTABLISHING SEALED RADIOACTIVE SOURCE ACCOUNTABILITY AND RADIOACTIVE MATERIAL POSTING AND LABELING REQUIREMENTS

The data presented in appendix E are to be used for identifying accountable sealed radioactive sources and radioactive material areas as those terms are defined at §835.2(a), establishing the need for radioactive material area posting in accordance with §835.603(g), and establishing the need for radioactive material labeling in accordance with §835.605.

Any alpha emitting radionuclide not listed in appendix E and mixtures of alpha emitters of unknown composition have a value of 10 μCi.

With the exception that any type of STC has a value of 10 Ci, any radionuclide other than alpha emitting radionuclides not listed in appendix E and mixtures of beta emitters of unknown composition have a value of 100 μCi.

NOTE: Where there is involved a mixture of radionuclides in known amounts, derive the value for the mixture as follows: determine, for each radionuclide in the mixture, the ratio between the quantity present in the mixture and the value otherwise established for the specific radionuclide when not in the mixture. If the sum of such ratios for all radionuclides in the mixture exceeds unity (1), then the accountability criterion has been exceeded.

PART 840—EXTRAORDINARY NUCLEAR OCCURRENCES

Sec.

840.1 Scope and purpose.

840.2 Procedures.

840.3 Determination of extraordinary nuclear occurrence.

840.4 Criterion I—Substantial discharge of radioactive material or substantial radiation levels offsite.

840.5 Criterion II—Substantial damages to persons offsite or property offsite.

AUTHORITY: Sec. 161 of the Atomic Energy Act of 1954, Pub. L. 83-703, 68 Stat. 919 (42 U.S.C. 2201); sec. 170 of the Atomic Energy Act of 1954, Pub. L. 85-256, 71 Stat. 576, as amended by Pub. L. 89-645, 80 Stat. 891 (42 U.S.C. 2210); Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 565-613 (42 U.S.C. 7101-7352).

§ 840.1

10 CFR Ch. III (1-1-16 Edition)

SOURCE: 49 FR 21473, May 21, 1984, unless otherwise noted.

§ 840.1 Scope and purpose.

(a) *Scope.* This subpart applies to those DOE contractor activities to which the nuclear hazards indemnity provisions in 41 CFR 9-50.704-6 apply, and to other persons indemnified with respect to such activities.

(b) *Purpose.* One purpose of this subpart is to set forth the criteria which the DOE proposes to follow in order to determine whether there has been an “extraordinary nuclear occurrence.” The other purpose is to establish the conditions of the waivers of defenses proposed for incorporation in indemnity agreements.

(1) The system is to come into effect only where the discharge or dispersal constitutes a substantial amount of source, special nuclear or byproduct material, or has caused substantial radiation levels offsite. The various limits in present DOE regulations are not appropriate for direct application in the determination of an “extraordinary nuclear occurrence,” for they were arrived at with other purposes in mind, and those limits have been set at a level which is conservatively arrived at by incorporating a significant safety factor. Thus, a discharge or dispersal which exceeds the limits in DOE regulations, or in DOE orders, although possible cause for concern, is not one which would be expected to cause substantial injury or damage unless it exceeds by some significant multiple the appropriate regulatory limit. Accordingly, in arriving at the values in the criteria to be deemed “substantial” it is more appropriate to adopt values separate from DOE health and safety orders, and, of course the selection of these values will not in any way affect such orders. A substantial discharge, for purposes of the criteria, represents a perturbation of the environment which is clearly above that which could be anticipated from the conduct of normal activities. The criteria are intended solely for the purposes of administration of DOE statutory responsibilities under Pub. L. 89-645, and are not intended to indicate a level of discharge or dispersal at which damage is likely to occur, or even a level at

which some type of protective action is indicated. It should be clearly understood that the criteria in no way establish or indicate that there is a specific threshold of exposure at which biological damage from radiation will take place. It cannot be emphasized too frequently that the levels set to be used as criteria for the first part of the determination, that is, the criteria for amounts offsite or radiation levels offsite which are substantial, are not meant to indicate that, because such amounts or levels are determined to be substantial for purposes of administration, they are “substantial” in terms of their propensity for causing injury or damage.

(2) It is the purpose of the second part of the determination that DOE decide whether there have in fact been or will probably be substantial damages to persons offsite or property offsite. The criteria for substantial damages were formulated, and the numerical values selected, on a wholly different basis from that on which the criteria used for the first part of the determination with respect to substantial discharge were derived. The only interrelation between the values selected for the discharge criteria and the damage criteria is that the discharge values are set so low that it is extremely unlikely the damage criteria could be satisfied unless the discharge values have been exceeded.

(3) The first part of the test is designed so that DOE can assure itself that something exceptional has occurred; that something untoward and unexpected has in fact taken place and that this event is of sufficient significance to raise the possibility that some damage to persons or property offsite has resulted or may result. If there appears to be no damage, the waivers will not apply because DOE will be unable, under the second part of the test, to make a determination that “substantial damages” have resulted or will probably result. If damages have resulted or will probably result, they could vary from de minimis to serious, and the waivers will not apply until the damages, both actual and probable, are determined to be “substantial” within the second part of the test.

(4) The presence or absence of an extraordinary nuclear occurrence determination does not concomitantly determine whether or not a particular claimant will recover on his claim. In effect, it is intended primarily to determine whether certain potential obstacles to recovery are to be removed from the route the claimant would ordinarily follow to seek compensation for his injury or damage. If there has not been an extraordinary nuclear occurrence determination, the claimant must proceed (in the absence of settlement) with a tort action subject to whatever issues must be met, and whatever defenses are available to the defendant, under the law applicable in the relevant jurisdiction. If there has been an extraordinary nuclear occurrence determination, the claimant must still proceed (in the absence of settlement) with a tort action, but the claimant's burden is substantially eased by the elimination of certain issues which may be involved and certain defenses which may be available to the defendant. In either case the defendant may defend with respect to such of the following matters as are in issue in any given claim: the nature of the claimant's alleged damages, the causal relationship between the event and the alleged damages, and the amount of the alleged damages.

§ 840.2 Procedures.

(a) DOE may initiate, on its own motion, the making of a determination as to whether or not there has been an extraordinary nuclear occurrence. In the event DOE does not so initiate the making of a determination, any affected person, or any person with whom an indemnity agreement is executed may petition DOE for a determination of whether or not there has been an extraordinary nuclear occurrence. If DOE does not have, or does not expect to have, within 7 days after it has received notification of an alleged event, enough information available to make a determination that there has been an extraordinary nuclear occurrence, DOE will publish a notice in the FEDERAL REGISTER setting forth the date and place of the alleged event and requesting any persons

having knowledge thereof to submit their information to DOE.

(b) When a procedure is initiated under paragraph (a) of this section, the principal staff which will begin immediately to assemble the relevant information and prepare a report on which the DOE can make its determination will consist of the Directors or their designees of the following Divisions or Offices: Office of Nuclear Safety, Office of Operational Safety, Office of Health and Environmental Research, the General Counsel or his designee, and a representative of the program division whose facility or device may be involved.

§ 840.3 Determination of extraordinary nuclear occurrence.

If the DOE determines that both of the criteria set forth in § 840.4 and § 840.5 have been met, it will make the determination that there has been an extraordinary nuclear occurrence. If the DOE publishes a notice in the FEDERAL REGISTER in accordance with § 840.2(a) and does not make a determination within 90 days thereafter that there has been an extraordinary nuclear occurrence, the alleged event will be deemed not to be an extraordinary nuclear occurrence. The time for the making of a determination may be extended by DOE by notice published in the FEDERAL REGISTER.

§ 840.4 Criterion I—Substantial discharge of radioactive material or substantial radiation levels offsite.

DOE will determine that there has been a substantial discharge or dispersal of radioactive material offsite, or that there have been substantial levels of radiation offsite, when as a result of an event comprised of one or more related happenings, radioactive material is released from its intended place of confinement or radiation levels occur offsite and either of the following findings are also made:

(a) DOE finds that one or more persons offsite were, could have been, or might be exposed to radiation or to radioactive material, resulting in a dose or in a projected dose in excess of one of the levels in the following table:

§ 840.5

10 CFR Ch. III (1-1-16 Edition)

TOTAL PROJECTED RADIATION DOSES

Critical organ	Dose (rems)
Thyroid	30
Whole Body	20
Bone Marrow	20
Skin	60
Other organs or tissues	30

Exposures from the following types of sources of radiation shall be included:

- (1) Radiation from sources external to the body;
- (2) Radioactive material that may be taken into the body from its occurrence in air or water; and
- (3) Radioactive material that may be taken into the body from its occurrence in food or on terrestrial surfaces.

(b) DOE finds that—

(1) Surface contamination of at least a total of any 100 square meters of off-site property has occurred as the result of a release of radioactive material from a production or utilization facility or device and such contamination is characterized by levels of radiation in excess of one of the values listed in column 1 or column 2 of the following table, or

(2) Surface contamination of any off-site property has occurred as the result of a release of radioactive material in the course of transportation and such contamination is characterized by levels of radiation in excess of one of the values listed in column 2 of the following table:

TOTAL SURFACE CONTAMINATION LEVELS ¹

Type of emitter	Column 1—Offsite property ²	Column 2—Other offsite property
Alpha emission from transuranic isotopes.	3.5 microcuries per square meter.	0.35 microcuries per square meter.
Alpha emission from isotopes other than transuranic isotopes.	35 microcuries per square meter.	3.5 microcuries per square meter.
Beta or gamma emission.	40 millirads/hour 1 cm (measured through not more than 7 milligrams per square centimeter of total absorber).	4 millirads/hour 1 cm (measured through not more than 7 milligrams per square centimeter of total absorber).

¹The maximum levels (above background), observed or projected, 8 or more hours after initial deposition.

²Contiguous to site, owned or leased by person with whom an indemnity agreement is executed.

[49 FR 21473, May 21, 1984; 49 FR 24374, June 13, 1984]

§ 840.5 Criterion II—Substantial damages to persons offsite or property offsite.

(a) After DOE has determined that an event has satisfied Criterion I, DOE will determine that the event has resulted or will probably result in substantial damages to persons offsite or property offsite if any of the following findings are made:

(1) DOE finds that such event has resulted in the death or hospitalization, within 30 days of the event, of five or more people located offsite showing objective clinical evidence of physical injury from exposure to the radioactive, toxic, explosive, or other hazardous properties of source, special nuclear, or byproduct material; or

(2) DOE finds that \$2,500,000 or more of damage offsite has been or will probably be sustained by any one person, or \$5 million or more of such damage in the aggregate has been or will probably be sustained, as the result of such event; or

(3) DOE finds that \$5,000 or more of damage offsite has been or will probably be sustained by each of 50 or more persons, provided that \$1 million or more of such damage in the aggregate has been or will probably be sustained, as the result of such event.

(b) As used in paragraphs (a) (2) and (3) of this section “damage” shall be that arising out of or resulting from the radioactive, toxic, explosive, or other hazardous properties of source, special nuclear, or byproduct material, and shall be based upon estimates of one or more of the following:

(1) Total cost necessary to put affected property back into use.

(2) Loss of use of affected property.

(3) Value of affected property where not practical to restore to use.

(4) Financial loss resulting from protective actions appropriate to reduce or avoid exposure to radiation or to radioactive materials.

SOURCE: 64 FR 68905, Dec. 8, 1999, unless otherwise noted.

Subpart A—General Provisions

§ 850.1 Scope.

This part provides for establishment of a chronic beryllium disease prevention program (CBDPP) that supplements and is deemed an integral part

of the worker safety and health program under part 851 of this chapter.

[71 FR 6931, Feb. 9, 2006]

§ 850.2 Applicability.

- (a) This part applies to:
 - (1) DOE offices responsible for operations or activities that involve present or past exposure, or the potential for exposure, to beryllium at DOE facilities;
 - (2) DOE contractors with operations or activities that involve present or past exposure, or the potential for exposure, to beryllium at DOE facilities; and
 - (3) Any current DOE employee, DOE contractor employee, or other worker at a DOE facility who is or was exposed or potentially exposed to beryllium at a DOE facility.
- (b) This part does not apply to:
 - (1) Beryllium articles; and
 - (2) DOE laboratory operations that meet the definition of laboratory use of hazardous chemicals in 29 CFR 1910.1450, Occupational Exposure to Hazardous Chemical in Laboratories.

§ 850.3 Definitions.

- (a) As used in this part:
 - Action level* means the level of airborne concentration of beryllium established pursuant to section 850.23 of this part that, if met or exceeded, requires the implementation of worker protection provisions specified in that section.
 - Authorized person* means any person required by work duties to be in a regulated area.
 - Beryllium* means elemental beryllium and any insoluble beryllium compound or alloy containing 0.1 percent beryllium or greater that may be released as an airborne particulate.
 - Beryllium activity* means an activity taken for, or by, DOE at a DOE facility that can expose workers to airborne beryllium, including but not limited to design, construction, operation, maintenance, or decommissioning, and which may involve one DOE facility or operation or a combination of facilities and operations.
 - Beryllium article* means a manufactured item that is formed to a specific shape or design during manufacture, that has end-use functions that depend

in whole or in part on its shape or design during end use, and that does not release beryllium or otherwise result in exposure to airborne concentrations of beryllium under normal conditions of use.

Beryllium-associated worker means a current worker who is or was exposed or potentially exposed to airborne concentrations of beryllium at a DOE facility, including:

- (1) A beryllium worker;
- (2) A current worker whose work history shows that the worker may have been exposed to airborne concentrations of beryllium at a DOE facility;
- (3) A current worker who exhibits signs or symptoms of beryllium exposure; and
- (4) A current worker who is receiving medical removal protection benefits.

Beryllium emergency means any occurrence such as, but not limited to, equipment failure, container rupture, or failure of control equipment or operations that results in an unexpected and significant release of beryllium at a DOE facility.

Beryllium-induced lymphocyte proliferation test (Be-LPT) is an in vitro measure of the beryllium antigen-specific, cell-mediated immune response.

Beryllium worker means a current worker who is regularly employed in a DOE beryllium activity.

Breathing zone is defined as a hemisphere forward of the shoulders, centered on the mouth and nose, with a radius of 6 to 9 inches.

DOE means the U.S. Department of Energy.

DOE contractor means any entity under contract with DOE (or its subcontractor) that has responsibility for performing beryllium activities at DOE facilities.

DOE facility means any facility operated by or for DOE.

Head of DOE Field Element means an individual who is the manager or head of the DOE operations office or field office, or any official to whom the Head of DOE Field Element delegates his or her functions under this part.

High-efficiency particulate air (HEPA) filter means a filter capable of trapping and retaining at least 99.97 percent of 0.3 micrometer monodispersed particles.

Immune response refers to the series of cellular events by which the immune system reacts to challenge by an antigen.

Medical removal protection benefits means the employment rights established by section 850.35 of this part for beryllium-associated workers who voluntarily accept temporary or permanent medical removal from beryllium areas following a recommendation by the Site Occupational Medicine Director.

Operational area means an area where workers are routinely in the presence of beryllium as part of their work activity.

Regulated area means an area demarcated by the responsible employer in which the airborne concentration of beryllium exceeds, or can reasonably be expected to exceed, the action level.

Removable contamination means beryllium contamination that can be removed from surfaces by nondestructive means, such as casual contact, wiping, brushing or washing.

Responsible employer means:

- (1) For DOE contractor employees, the DOE contractor office that is directly responsible for the safety and health of DOE contractor employees while performing a beryllium activity or other activity at a DOE facility; or
- (2) For DOE employees, the DOE office that is directly responsible for the safety and health of DOE Federal employees while performing a beryllium activity or other activity at a DOE facility; and
- (3) Any person acting directly or indirectly for such office with respect to terms and conditions of employment of beryllium-associated workers.

Site Occupational Medical Director (SOMD) means the physician responsible for the overall direction and operation of the site occupational medicine program.

Unique identifier means the part of a paired set of labels, used in records that contain confidential information, that does not identify individuals except by using the matching label.

Worker means a person who performs work for or on behalf of DOE, including

Department of Energy

§ 850.10

a DOE employee, an independent contractor, a DOE contractor or subcontractor employee, or any other person who performs work at a DOE facility.

Worker exposure means the exposure of a worker to airborne beryllium that would occur if the worker were not using respiratory protective equipment.

(b) Terms undefined in this part that are defined in the Atomic Energy Act of 1954 shall have the same meaning as under that Act.

§ 850.4 Enforcement.

DOE may take appropriate steps pursuant to part 851 of this chapter to enforce compliance by contractors with this part and any DOE-approved CBDPP.

[71 FR 6931, Feb. 9, 2006]

§ 850.5 Dispute resolution.

(a) Subject to paragraphs (b) and (c) of this section, any worker who is adversely affected by an action taken, or failure to act, under this part may petition the Office of Hearings and Appeals for relief in accordance with 10 CFR part 1003, Subpart G.

(b) The Office of Hearings and Appeals may not accept a petition from a worker unless the worker requested the responsible employer to correct the violation, and the responsible employer refused or failed to take corrective action within a reasonable time.

(c) If the dispute relates to a term or condition of employment that is covered by a grievance-arbitration provision in a collective bargaining agreement, the worker must exhaust all applicable grievance-arbitration procedures before filing a petition for relief with the Office of Hearings and Appeals. A worker is deemed to have exhausted all applicable grievance-arbitration procedures if 150 days have passed since the filing of a grievance and a final decision on it has not been issued.

Subpart B—Administrative Requirements

§ 850.10 Development and approval of the CBDPP.

(a) *Preparation and submission of initial CBDPP to DOE.* (1) The responsible employer at a DOE facility must ensure that a CBDPP is prepared for the facility and submitted to the appropriate Head of DOE Field Element before beginning beryllium activities, but no later than April 6, 2000 of this part.

(2) If the CBDPP has separate sections addressing the activities of multiple contractors at the facility, the Head of DOE Field Element will designate a single DOE contractor to review and approve the sections prepared by other contractors, so that a single consolidated CBDPP for the facility is submitted to the Head of DOE Field Element for review and approval.

(b) *DOE review and approval.* The appropriate Head of DOE Field Element must review and approve the CBDPP.

(1) The initial CBDPP and any updates are deemed approved 90 days after submission if they are not specifically approved or rejected by DOE earlier.

(2) The responsible employer must furnish a copy of the approved CBDPP, upon request, to the DOE Associate Under Secretary for Environment, Health, Safety and Security or designee, DOE program offices, and affected workers or their designated representatives.

(c) *Update.* The responsible employer must submit an update of the CBDPP to the appropriate Head of DOE Field Element for review and approval whenever a significant change or significant addition to the CBDPP is made or a change in contractors occurs. The Head of DOE Field Element must review the CBDPP at least annually and, if necessary, require the responsible employer to update the CBDPP.

(d) *Labor Organizations.* If a responsible employer employs or supervises beryllium-associated workers who are represented for collective bargaining by a labor organization, the responsible employer must:

§ 850.11

(1) Give the labor organization timely notice of the development and implementation of the CBDPP and any updates thereto; and

(2) Upon timely request, bargain concerning implementation of this part, consistent with the Federal labor laws.

[64 FR 68905, Dec. 8, 1999, as amended at 71 FR 68733, Nov. 28, 2006; 80 FR 5008, Jan. 30, 2015]

§ 850.11 General CBDPP requirements.

(a) The CBDPP must specify the existing and planned operational tasks that are within the scope of the CBDPP. The CBDPP must augment and, to the extent feasible, be integrated into the existing worker protection programs that cover activities at the facility.

(b) The detail, scope, and content of the CBDPP must be commensurate with the hazard of the activities performed, but in all cases the CBDPP must:

(1) Include formal plans and measures for maintaining exposures to beryllium at or below the permissible exposure level prescribed in § 850.22;

(2) Satisfy each requirement in subpart C of this part;

(3) Contain provisions for:

(i) Minimizing the number of workers exposed and potentially exposed to beryllium;

(ii) Minimizing the number of opportunities for workers to be exposed to beryllium;

(iii) Minimizing the disability and lost work time of workers due to chronic beryllium disease, beryllium sensitization and associated medical care; and

(iv) Setting specific exposure reduction and minimization goals that are appropriate for the beryllium activities covered by the CBDPP to further reduce exposure below the permissible exposure limit prescribed in § 850.22.

§ 850.12 Implementation.

(a) The responsible employer must manage and control beryllium exposures in all DOE beryllium activities consistent with the approved CBDPP.

(b) No person employed by DOE or a DOE contractor may take or cause any action inconsistent with the requirements of:

10 CFR Ch. III (1–1–16 Edition)

(1) This part,

(2) An approved CBDPP, and

(3) Any other Federal statute or regulation concerning the exposure of workers to beryllium at DOE facilities.

(c) No task involving potential exposure to airborne beryllium that is outside the scope of the existing CBDPP may be initiated until an update of the CBDPP is approved by the Head of DOE Field Element, except in an unexpected situation and, then, only upon approval of the Head of DOE Field Element.

(d) Nothing in this part precludes a responsible employer from taking any additional protective action that it determines to be necessary to protect the health and safety of workers.

(e) Nothing in this part affects the responsibilities of DOE officials under the Federal Employee Occupational Safety and Health Program (29 CFR part 1960) and related DOE directives.

§ 850.13 Compliance.

(a) The responsible employer must conduct activities in compliance with its CBDPP.

(b) The responsible employer must achieve compliance with all elements of its CBDPP no later than January 7, 2002.

(c) With respect to a particular beryllium activity, the contractor in charge of the activity is responsible for complying with this part. If no contractor is responsible for a beryllium activity, DOE must ensure implementation of, and compliance with, this part.

Subpart C—Specific Program Requirements

§ 850.20 Baseline beryllium inventory.

(a) The responsible employer must develop a baseline inventory of the locations of beryllium operations and other locations of potential beryllium contamination, and identify the workers exposed or potentially exposed to beryllium at those locations.

(b) In conducting the baseline inventory, the responsible employer must:

(1) Review current and historical records;

(2) Interview workers;

(3) Document the characteristics and locations of beryllium at the facility; and

Department of Energy

§ 850.24

(4) Conduct air, surface, and bulk sampling.

(c) The responsible employer must ensure that:

(1) The baseline beryllium inventory is managed by a qualified individual (e.g., a certified industrial hygienist); and

(2) The individuals assigned to this task have sufficient knowledge and experience to perform such activities properly.

§ 850.21 Hazard assessment.

(a) If the baseline inventory establishes the presence of beryllium, the responsible employer must conduct a beryllium hazard assessment that includes an analysis of existing conditions, exposure data, medical surveillance trends, and the exposure potential of planned activities. The exposure determinants, characteristics and exposure potential of activities must be prioritized so that the activities with the greatest risks of exposure are evaluated first.

(b) The responsible employer must ensure that:

(1) The hazard assessment is managed by a qualified individual (e.g., a certified industrial hygienist); and

(2) The individuals assigned to this task have sufficient knowledge and experience to perform such activities properly.

§ 850.22 Permissible exposure limit.

The responsible employer must assure that no worker is exposed to an airborne concentration of beryllium greater than the permissible exposure limit established in 29 CFR 1910.1000, as measured in the worker's breathing zone by personal monitoring, or a more stringent TWA PEL that may be promulgated by the Occupational Safety and Health Administration as a health standard.

§ 850.23 Action level.

(a) The responsible employer must include in its CBDPP an action level that is no greater than 0.2 µg/m³, calculated as an 8-hour TWA exposure, as measured in the worker's breathing zone by personal monitoring.

(b) If an airborne concentration of beryllium is at or above the action level,

the responsible employer must implement §§ 850.24(c) (periodic monitoring), 850.25 (exposure reduction and minimization), 850.26 (regulated areas), 850.27 (hygiene facilities and practices), 850.28 (respiratory protection), 850.29 (protective clothing and equipment), and 850.38 (warning signs) of this part.

§ 850.24 Exposure monitoring.

(a) *General.* The responsible employer must ensure that:

(1) Exposure monitoring is managed by a qualified individual (e.g., a certified industrial hygienist); and

(2) The individuals assigned to this task have sufficient industrial hygiene knowledge and experience to perform such activities properly.

(b) *Initial monitoring.* The responsible employer must perform initial monitoring in areas that may have airborne beryllium, as shown by the baseline inventory and hazard assessment. The responsible employer must apply statistically-based monitoring strategies to obtain a sufficient number of sample results to adequately characterize exposures, before reducing or terminating monitoring.

(1) The responsible employer must determine workers' 8-hour TWA exposure levels by conducting personal breathing zone sampling.

(2) Exposure monitoring results obtained within the 12 months preceding the effective date of this part may be used to satisfy this requirement if the measurements were made as provided in paragraph (b)(1) of this section.

(c) *Periodic exposure monitoring.* The responsible employer must conduct periodic monitoring of workers who work in areas where airborne concentrations of beryllium are at or above the action level. The monitoring must be conducted in a manner and at a frequency necessary to represent workers' exposure, as specified in the CBDPP. This periodic exposure monitoring must be performed at least every 3 months (quarterly).

(d) *Additional exposure monitoring.* The responsible employer must perform additional monitoring if operations, maintenance or procedures change, or when the responsible employer has any reason to suspect such a change has occurred.

§ 850.25

(e) *Accuracy of monitoring.* The responsible employer must use a method of monitoring and analysis that has an accuracy of not less than plus or minus 25 percent, with a confidence level of 95 percent, for airborne concentrations of beryllium at the action level.

(f) *Analysis.* The responsible employer must have all samples collected to satisfy the monitoring requirements of this part analyzed in a laboratory accredited for metals by the American Industrial Hygiene Association (AIHA) or a laboratory that demonstrates quality assurance for metals analysis that is equivalent to AIHA accreditation.

(g) *Notification of monitoring results.*

(1) The responsible employer must, within 10 working days after receipt of any monitoring results, notify the affected workers of monitoring results in writing. This notification of monitoring results must be:

(i) Made personally to the affected worker; or

(ii) Posted in location(s) that is readily accessible to the affected worker, but in a manner that does not identify the individual to other workers.

(2) If the monitoring results indicate that a worker's exposure is at or above the action level, the responsible employer must include in the notice:

(i) A statement that the action level has been met or exceeded; and

(ii) A description of the corrective action being taken by the responsible employer to reduce the worker's exposure to below the action level, if practicable.

(3) If the monitoring results indicate that worker exposure is at or above the action level, the responsible employer must also notify DOE and the SOMD of these results within 10 working days after receipt.

§ 850.25 Exposure reduction and minimization.

(a) The responsible employer must ensure that no worker is exposed above the exposure limit prescribed in § 850.22.

(b) The responsible employer must, in addition:

(1) Where exposure levels are at or above the action level, establish a formal exposure reduction and minimization program to reduce exposure levels

10 CFR Ch. III (1–1–16 Edition)

to below the action level, if practicable. This program must be described in the responsible employer's CBDPP and must include:

(i) Annual goals for exposure reduction and minimization;

(ii) A rationale for and a strategy for meeting the goals;

(iii) Actions that will be taken to achieve the goals; and

(iv) A means of tracking progress towards meeting the goals or demonstrating that the goals have been met.

(2) Where exposure levels are below the action level, implement actions for reducing and minimizing exposures, if practicable. The responsible employer must include in the CBDPP a description of the steps to be taken for exposure reduction and minimization and a rationale for those steps.

(c) The responsible employer must implement exposure reduction and minimization actions using the conventional hierarchy of industrial hygiene controls (*i.e.*, engineering controls, administrative controls, and personal protective equipment in that order).

§ 850.26 Regulated areas.

(a) If airborne concentrations of beryllium in areas in DOE facilities are measured at or above the action level, the responsible employer must establish regulated areas for those areas.

(b) The responsible employer must demarcate regulated areas from the rest of the workplace in a manner that adequately alerts workers to the boundaries of such areas.

(c) The responsible employer must limit access to regulated areas to authorized persons.

(d) The responsible employer must keep records of all individuals who enter regulated areas. These records must include the name, date, time in and time out, and work activity.

§ 850.27 Hygiene facilities and practices.

(a) *General.* The responsible employer must assure that in areas where workers are exposed to beryllium at or above the action level, without regard to the use of respirators:

Department of Energy

§ 850.29

(1) Food or beverage and tobacco products are not used;

(2) Cosmetics are not applied, except in change rooms or areas and shower facilities required under paragraphs (b) and (c) of this section; and

(3) Beryllium workers are prevented from exiting areas that contain beryllium with contamination on their bodies or their personal clothing.

(b) *Change rooms or areas.* The responsible employer must provide clean change rooms or areas for beryllium workers who work in regulated areas.

(1) Separate facilities free of beryllium must be provided for beryllium workers to change into, and store, personal clothing, and clean protective clothing and equipment to prevent cross-contamination;

(2) The change rooms or areas that are used to remove beryllium-contaminated clothing and protective equipment must be maintained under negative pressure or located so as to minimize dispersion of beryllium into clean areas; and

(c) *Showers and handwashing facilities.*

(1) The responsible employer must provide handwashing and shower facilities for beryllium workers who work in regulated areas.

(2) The responsible employer must assure that beryllium workers who work in regulated areas shower at the end of the work shift.

(d) *Lunchroom facilities.* (1) The responsible employer must provide lunchroom facilities that are readily accessible to beryllium workers, and ensure that tables for eating are free of beryllium, and that no worker in a lunchroom facility is exposed at any time to beryllium at or above the action level.

(2) The responsible employer must assure that beryllium workers do not enter lunchroom facilities with protective work clothing or equipment unless the surface beryllium has been removed from clothing and equipment by HEPA vacuuming or other method that removes beryllium without dispersing it.

(e) The change rooms or areas, shower and handwashing facilities, and lunchroom facilities must comply with 29 CFR 1910.141, Sanitation.

§ 850.28 Respiratory protection.

(a) The responsible employer must establish a respiratory protection program that complies with the respiratory protection program requirements of 29 CFR 1910.134, Respiratory Protection.

(b) The responsible employer must provide respirators to, and ensure that they are used by, all workers who:

(1) Are exposed to an airborne concentration of beryllium at or above the action level, or

(2) Are performing tasks for which analyses indicate the potential for exposures at or above the action level.

(c) The responsible employer must include in the respiratory protection program any beryllium-associated worker who requests to use a respirator for protection against airborne beryllium, regardless of measured exposure levels.

(d) The responsible employer must select for use by workers:

(1) Respirators approved by the National Institute for Occupational Safety and Health (NIOSH) if NIOSH-approved respirators exist for a specific DOE task; or

(2) Respirators that DOE has accepted under the DOE Respiratory Protection Acceptance Program if NIOSH-approved respirators do not exist for specific DOE tasks.

§ 850.29 Protective clothing and equipment.

(a) The responsible employer must provide protective clothing and equipment to beryllium workers and ensure its appropriate use and maintenance, where dispersible forms of beryllium may contact worker's skin, enter openings in workers' skin, or contact workers' eyes, including where:

(1) Exposure monitoring has established that airborne concentrations of beryllium are at or above the action level;

(2) Surface contamination levels measured or presumed prior to initiating work are above the level prescribed in § 850.30;

(3) Surface contamination levels results obtained to confirm housekeeping efforts are above the level prescribed in § 850.30; and

§ 850.30

(4) Any beryllium-associated worker who requests the use of protective clothing and equipment for protection against airborne beryllium, regardless of measured exposure levels.

(b) The responsible employer must comply with 29 CFR 1910.132, Personal Protective Equipment General Requirements, when workers use personal protective clothing and equipment.

(c) The responsible employer must establish procedures for donning, doffing, handling, and storing protective clothing and equipment that:

(1) Prevent beryllium workers from exiting areas that contain beryllium with contamination on their bodies or their personal clothing; and

(2) Include beryllium workers exchanging their personal clothing for full-body protective clothing and footwear before they begin work in regulated areas.

(d) The responsible employer must ensure that no worker removes beryllium-contaminated protective clothing and equipment from areas that contain beryllium, except for workers authorized to launder, clean, maintain, or dispose of the clothing and equipment.

(e) The responsible employer must prohibit the removal of beryllium from protective clothing and equipment by blowing, shaking, or other means that may disperse beryllium into the air.

(f) The responsible employer must ensure that protective clothing and equipment is cleaned, laundered, repaired, or replaced as needed to maintain effectiveness. The responsible employer must:

(1) Ensure that beryllium-contaminated protective clothing and equipment, when removed for laundering, cleaning, maintenance, or disposal, is placed in containers that prevent the dispersion of beryllium dust and that are labeled in accordance with § 850.38 of this part; and

(2) Inform organizations that launder or clean DOE beryllium-contaminated protective clothing or equipment that exposure to beryllium is potentially harmful, and that clothing and equipment should be laundered or cleaned in a manner prescribed by the responsible employer to prevent the release of airborne beryllium.

10 CFR Ch. III (1–1–16 Edition)

§ 850.30 Housekeeping.

(a) Where beryllium is present in operational areas of DOE facilities, the responsible employer must conduct routine surface sampling to determine housekeeping conditions. Surfaces contaminated with beryllium dusts and waste must not exceed a removable contamination level of 3 µg/100 cm² during non-operational periods. This sampling would not include the interior of installed closed systems such as enclosures, glove boxes, chambers, or ventilation systems.

(b) When cleaning floors and surfaces in areas where beryllium is present at DOE facilities, the responsible employer must clean beryllium-contaminated floors and surfaces using a wet method, vacuuming or other cleaning methods, such as sticky tack cloths, that avoid the production of airborne dust. Compressed air or dry methods must not be used for such cleaning.

(c) The responsible employer must equip the portable or mobile vacuum units that are used to clean beryllium-contaminated areas with HEPA filters, and change the filters as often as needed to maintain their capture efficiency.

(d) The responsible employer must ensure that the cleaning equipment that is used to clean beryllium-contaminated surfaces is labeled, controlled, and not used for non-hazardous materials.

§ 850.31 Release criteria.

(a) The responsible employer must clean beryllium-contaminated equipment and other items to the lowest contamination level practicable, but not to exceed the levels established in paragraphs (b) and (c) of this section, and label the equipment or other items, before releasing them to the general public or a DOE facility for non-beryllium use, or to another facility for work involving beryllium.

(b) Before releasing beryllium-contaminated equipment or other items to the general public or for use in a non-beryllium area of a DOE facility, the responsible employer must ensure that:

(1) The removable contamination level of equipment or item surfaces does not exceed the higher of 0.2 µg/100

Department of Energy

§ 850.34

cm² or the concentration level of beryllium in soil at the point of release, whichever is greater;

(2) The equipment or item is labeled in accordance with § 850.38(b); and

(3) The release is conditioned on the recipient's commitment to implement controls that will prevent foreseeable beryllium exposure, considering the nature of the equipment or item and its future use and the nature of the beryllium contamination.

(c) Before releasing beryllium-contaminated equipment or other items to another facility performing work with beryllium, the responsible employer must ensure that:

(1) The removable contamination level of equipment or item surfaces does not exceed 3 µg/100 cm²;

(2) The equipment or item is labeled in accordance with § 850.38(b); and

(3) The equipment or item is enclosed or placed in sealed, impermeable bags or containers to prevent the release of beryllium dust during handling and transportation.

§ 850.32 Waste disposal.

(a) The responsible employer must control the generation of beryllium-containing waste, and beryllium-contaminated equipment and other items that are disposed of as waste, through the application of waste minimization principles.

(b) Beryllium-containing waste, and beryllium-contaminated equipment and other items that are disposed of as waste, must be disposed of in sealed, impermeable bags, containers, or enclosures to prevent the release of beryllium dust during handling and transportation. The bags, containers, and enclosures that are used for disposal of beryllium waste must be labeled according to § 850.38.

§ 850.33 Beryllium emergencies.

(a) The responsible employer must comply with 29 CFR 1910.120(l) for handling beryllium emergencies related to decontamination and decommissioning operations.

(b) The responsible employer must comply with 29 CFR 1910.120(q) for handling beryllium emergencies related to all other operations.

§ 850.34 Medical surveillance.

(a) *General.* (1) The responsible employer must establish and implement a medical surveillance program for beryllium-associated workers who voluntarily participate in the program.

(2) The responsible employer must designate a Site Occupational Medical Director (SOMD) who is responsible for administering the medical surveillance program.

(3) The responsible employer must ensure that the medical evaluations and procedures required by this section are performed by, or under the supervision of, a licensed physician who is familiar with the health effects of beryllium.

(4) The responsible employer must establish, and maintain, a list of beryllium-associated workers who may be eligible for protective measures under this part. The list must be:

(i) Based on the hazard assessment, exposure records, and other information regarding the identity of beryllium-associated workers; and

(ii) Adjusted at regular intervals based on periodic evaluations of beryllium-associated workers performed under paragraph (b)(2) of this section;

(5) The responsible employer must provide the SOMD with the information needed to operate and administer the medical surveillance program, including the:

(i) List of beryllium-associated workers required by paragraph (a)(4) of this section;

(ii) Baseline inventory;

(iii) Hazard assessment and exposure monitoring data;

(iv) Identity and nature of activities or operations on the site that are covered under the CBDPP, related duties of beryllium-associated workers; and

(v) Type of personal protective equipment used.

(6) The responsible employer must provide the following information to the SOMD and the examining physician:

(i) A copy of this rule and its preamble;

(ii) A description of the worker's duties as they pertain to beryllium exposure;

(iii) Records of the worker's beryllium exposure; and

(iv) A description of the personal protective and respiratory protective equipment used by the worker in the past, present, or anticipated future use.

(b) *Medical evaluations and procedures.* The responsible employer must provide, to beryllium-associated workers who voluntarily participate in the medical surveillance program, the medical evaluations and procedures required by this section at no cost and at a time and place that is reasonable and convenient to the worker.

(1) *Baseline medical evaluation.* The responsible employer must provide a baseline medical evaluation to beryllium-associated workers. This evaluation must include:

(i) A detailed medical and work history with emphasis on past, present, and anticipated future exposure to beryllium;

(ii) A respiratory symptoms questionnaire;

(iii) A physical examination with special emphasis on the respiratory system, skin and eyes;

(iv) A chest radiograph (posterior-anterior, 14 × 17 inches) interpreted by a National Institute for Occupational Safety and Health (NIOSH) B-reader of pneumoconiosis or a board-certified radiologist (unless a baseline chest radiograph is already on file);

(v) Spirometry consisting of forced vital capacity (FVC) and forced expiratory volume at 1 second (FEV1);

(vi) A Be-LPT; and

(vii) Any other tests deemed appropriate by the examining physician for evaluating beryllium-related health effects.

(2) *Periodic evaluation.* (i) The responsible employer must provide to beryllium workers a medical evaluation annually, and to other beryllium-associated workers a medical evaluation every three years. The periodic medical evaluation must include:

(A) A detailed medical and work history with emphasis on past, present, and anticipated future exposure to beryllium;

(B) A respiratory symptoms questionnaire;

(C) A physical examination with emphasis on the respiratory system;

(D) A Be-LPT; and

(E) Any other medical evaluations deemed appropriate by the examining physician for evaluating beryllium-related health effects.

(ii) The responsible employer must provide to beryllium-associated workers a chest radiograph every five years.

(3) *Emergency evaluation.* The responsible employer must provide a medical evaluation as soon as possible to any worker who may have been exposed to beryllium because of a beryllium emergency. The medical evaluation must include the requirements of paragraph (b)(2) of this section.

(c) *Multiple physician review.* The responsible employer must establish a multiple physician review process for beryllium-associated workers that allows for the review of initial medical findings, determinations, or recommendations from any medical evaluation conducted pursuant to paragraph (b) of this section.

(1) If the responsible employer selects the initial physician to conduct any medical examination or consultation provided to a beryllium-associated worker, the worker may designate a second physician to:

(i) Review any findings, determinations, or recommendations of the initial physician; and

(ii) Conduct such examinations, consultations and laboratory tests, as the second physician deems necessary to facilitate this review.

(2) The responsible employer must promptly notify a beryllium-associated worker in writing of the right to seek a second medical opinion after the initial physician provided by the responsible employer conducts a medical examination or consultation.

(3) The responsible employer may condition its participation in, and payment for, multiple physician review upon the beryllium-associated worker doing the following within fifteen (15) days after receipt of the notice, or receipt of the initial physician's written opinion, whichever is later:

(i) Informing the responsible employer in writing that he or she intends to seek a second medical opinion; and

(ii) Initiating steps to make an appointment with a second physician.

(4) If the findings, determinations, or recommendations of the second physician differ from those of the initial physician, then the responsible employer and the beryllium-associated worker must make efforts to encourage and assist the two physicians to resolve any disagreement.

(5) If, despite the efforts of the responsible employer and the beryllium-associated worker, the two physicians are unable to resolve their disagreement, then the responsible employer and the worker, through their respective physicians, must designate a third physician to:

(i) Review any findings, determinations, or recommendations of the other two physicians; and

(ii) Conduct such examinations, consultations, laboratory tests, and consultations with the other two physicians, as the third physician deems necessary to resolve the disagreement among them.

(6) The SOMD must act consistently with the findings, determinations, and recommendations of the third physician, unless the SOMD and the beryllium-associated worker reach an agreement that is consistent with the recommendations of at least one of the other two physicians.

(d) *Alternate physician determination.* The responsible employer and the beryllium-associated worker or the worker's designated representative may agree upon the use of any alternate form of physician determination in lieu of the multiple physician review process provided by paragraph (c) of this section, so long as the alternative is expeditious and at least as protective of the worker.

(e) *Written medical opinion and recommendation.* (1) Within two weeks of receipt of results, the SOMD must provide to the responsible employer a written, signed medical opinion for each medical evaluation performed on each beryllium-associated worker. The written opinion must take into account the findings, determinations and recommendations of the other examining physicians who may have examined the beryllium-associated worker. The SOMD's opinion must contain:

(i) The diagnosis of the worker's condition relevant to occupational expo-

sure to beryllium, and any other medical condition that would place the worker at increased risk of material impairment to health from further exposure to beryllium;

(ii) Any recommendation for removal of the worker from DOE beryllium activities, or limitation on the worker's activities or duties or use of personal protective equipment, such as a respirator; and

(iii) A statement that the SOMD or examining physician has clearly explained to the worker the results of the medical evaluation, including all tests results and any medical condition related to beryllium exposure that requires further evaluation or treatment.

(2) The SOMD's written medical opinion must not reveal specific records, findings, and diagnoses that are not related to medical conditions that may be affected by beryllium exposure.

(f) *Information provided to the beryllium-associated worker.* (1) The SOMD must provide each beryllium-associated worker with a written medical opinion containing the results of all medical tests or procedures, an explanation of any abnormal findings, and any recommendation that the worker be referred for additional testing for evidence of CBD, within 10 working days after the SOMD's receipt of the results of the medical tests or procedures.

(2) The responsible employer must, within 30 days after a request by a beryllium-associated worker, provide the worker with the information the responsible employer is required to provide the examining physician under paragraph (a)(6) of this section.

(g) *Reporting.* The responsible employer must report on the applicable OSHA reporting form beryllium sensitization, CBD, or any other abnormal condition or disorder of workers caused or aggravated by occupational exposure to beryllium.

(h) *Data analysis.* (1) The responsible employer must routinely and systematically analyze medical, job, and exposure data with the aim of identifying individuals or groups of individuals potentially at risk for CBD and working conditions that are contributing to that risk.

§ 850.35

10 CFR Ch. III (1–1–16 Edition)

(2) The responsible employer must use the results of these analyses to identify additional workers to whom the responsible employer must provide medical surveillance and to determine the need for additional exposure controls.

§ 850.35 Medical removal.

(a) *Medical removal protection.* The responsible employer must offer a beryllium-associated worker medical removal from exposure to beryllium if the SOMD determines in a written medical opinion that it is medically appropriate to remove the worker from such exposure. The SOMD's determination must be based on one or more positive Be-LPT results, chronic beryllium disease diagnosis, an examining physician's recommendation, or any other signs or symptoms that the SOMD deems medically sufficient to remove a worker.

(1) *Temporary removal pending final medical determination.* The responsible employer must offer a beryllium-associated worker temporary medical removal from exposure to beryllium on each occasion that the SOMD determines in a written medical opinion that the worker should be temporarily removed from such exposure pending a final medical determination of whether the worker should be removed permanently.

(i) In this section, "final medical determination" means the outcome of the multiple physician review process or the alternate medical determination process provided for in paragraphs (c) and (d) of § 850.34.

(ii) If a beryllium-associated worker is temporarily removed from beryllium exposure pursuant to this section, the responsible employer must transfer the worker to a comparable job for which the worker is qualified (or for which the worker can be trained in a short period) and where beryllium exposures are as low as possible, but in no event at or above the action level.

(iii) The responsible employer must maintain the beryllium-associated worker's total normal earnings, seniority, and other worker rights and benefits as if the worker had not been removed.

(iv) If there is no such job available, the responsible employer must provide to the beryllium-associated worker the medical removal protection benefits specified in paragraph (b)(2) of this section, until a job becomes available or for one year, whichever comes first.

(2) *Permanent medical removal.* (i) The responsible employer must offer a beryllium-associated worker permanent medical removal from exposure to beryllium if the SOMD determines in a written medical opinion that the worker should be permanently removed from exposure to beryllium.

(ii) If a beryllium-associated worker is removed permanently from beryllium exposure based on the SOMD's recommendation pursuant to this section, the responsible employer must provide the worker the medical removal protection benefits specified in paragraph (b) of this section.

(3) *Worker consultation before temporary or permanent medical removal.* If the SOMD determines that a beryllium-associated worker should be temporarily or permanently removed from exposure to beryllium, the SOMD must:

(i) Advise the beryllium-associated worker of the determination that medical removal is necessary to protect the worker's health;

(ii) Provide the beryllium-associated worker with a copy of this rule and its preamble, and any other information the SOMD deems necessary on the risks of continued exposure to beryllium and the benefits of removal;

(iii) Provide the beryllium-associated worker the opportunity to have any questions concerning medical removal answered; and

(iv) Obtain the beryllium-associated worker's signature acknowledging that the worker has been advised to accept medical removal from beryllium exposure as provided in this section, and has been provided with the information specified in this paragraph, on the benefits of removal and the risks of continued exposure to beryllium.

(4) *Return to work after medical removal.* (i) The responsible employer, subject to paragraph (a)(4)(ii) of this section, must not return a beryllium-associated worker who has been permanently removed under this section to

the worker's former job status unless the SOMD first determines in a written medical opinion that continued medical removal is no longer necessary to protect the worker's health.

(ii) Notwithstanding paragraph (a)(4) (i) of this section, if, in the SOMD's opinion, continued exposure to beryllium will not pose an increased risk to the beryllium-associated worker's health, and medical removal is an inappropriate remedy in the circumstances, the SOMD must fully discuss these matters with the worker and then, in a written determination, may authorize the responsible employer to return the worker to his or her former job status. Thereafter, the returned beryllium-associated worker must continue to be provided with medical surveillance under § 850.34 of this part.

(b) *Medical removal protection benefits.*

(1) If a beryllium-associated worker has been permanently removed from beryllium exposure pursuant to paragraph (a)(2) of this section, the responsible employer must provide the beryllium-associated worker:

(i) The opportunity to transfer to another position which is available, or later becomes available, for which the beryllium-associated worker is qualified (or for which the worker can be trained in a short period) and where beryllium exposures are as low as possible, but in no event at or above the action level; or

(ii) If the beryllium-associated worker cannot be transferred to a comparable job where beryllium exposures are below the action level, a maximum of 2 years of permanent medical removal protection benefits (specified in paragraph (b)(2) of this section).

(2) If required by this section to provide medical removal protection benefits, the responsible employer must maintain the removed worker's total normal earnings, seniority and other worker rights and benefits, as though the worker had not been removed.

(3) If a removed beryllium-associated worker files a claim for workers' compensation payments for a beryllium-related disability, then the responsible employer must continue to provide medical removal protection benefits pending disposition of the claim. The responsible employer must receive no

credit for the workers' compensation payments received by the worker for treatment related expenses.

(4) The responsible employer's obligation to provide medical removal protection benefits to a removed beryllium-associated worker is reduced to the extent that the worker receives compensation for earnings lost during the period of removal either from a publicly- or employer-funded compensation program, or from employment with another employer made possible by virtue of the worker's removal.

(5) For the purposes of this section, the requirement that a responsible employer provide medical removal protection benefits is not intended to expand upon, restrict, or change any rights to a specific job classification or position under the terms of an applicable collective bargaining agreement.

(6) The responsible employer may condition the provision of medical removal protection benefits upon the beryllium-associated worker's participation in medical surveillance provided in accordance with § 850.34 of this part.

§ 850.36 Medical consent.

(a) The responsible employer must provide each beryllium-associated worker with a summary of the medical surveillance program established in § 850.34 at least one week before the first medical evaluation or procedure or at any time requested by the worker. This summary must include:

(1) The type of data that will be collected in the medical surveillance program;

(2) How the data will be collected and maintained;

(3) The purpose for which the data will be used; and

(4) A description of how confidential data will be protected.

(b) Responsible employers must also provide each beryllium-associated worker with information on the benefits and risks of the medical tests and examinations available to the worker at least one week prior to any such examination or test, and an opportunity to have the worker's questions answered.

§ 850.37

10 CFR Ch. III (1–1–16 Edition)

(c) The responsible employer must have the SOMD obtain a beryllium-associated worker's signature on the informed consent form found in Appendix A to this part, before performing medical evaluations or any tests.

§ 850.37 Training and counseling.

(a) The responsible employer must develop and implement a beryllium training program and ensure participation for:

- (1) Beryllium-associated workers;
- (2) All other individuals who work at a site where beryllium activities are conducted.

(b) The training provided for workers identified in paragraph (a)(1) of this section, must:

- (1) Be in accordance with 29 CFR 1910.1200, Hazard Communication;
- (2) Include the contents of the CBDPP; and
- (3) Include potential health risks to beryllium worker family members and others who may come in contact with beryllium on beryllium workers or beryllium workers' personal clothing or other personal items as the result of a beryllium control failure at a DOE facility.

(c) The training provided for workers identified in paragraph (a)(2) of this section must consist of general awareness about beryllium hazards and controls.

(d) The responsible employer must provide the training required by this section before or at the time of initial assignment and at least every two years thereafter.

(e) The employer must provide re-training when the employer has reason to believe that a beryllium worker lacks the proficiency, knowledge, or understanding needed to work safely with beryllium, including at least the following situations:

- (1) To address any new beryllium hazards resulting from a change to operations, procedures, or beryllium controls about which the beryllium worker was not previously trained; and
 - (2) If a beryllium worker's performance involving beryllium work indicates that the worker has not retained the requisite proficiency.
- (f) The responsible employer must develop and implement a counseling pro-

gram to assist beryllium-associated workers who are diagnosed by the SOMD to be sensitized to beryllium or to have CBD. This counseling program must include communicating with beryllium-associated workers concerning:

- (1) The medical surveillance program provisions and procedures;
- (2) Medical treatment options;
- (3) Medical, psychological, and career counseling;
- (4) Medical benefits;
- (5) Administrative procedures and workers rights under applicable Workers' Compensation laws and regulations;
- (6) Work practice procedures limiting beryllium-associated worker exposure to beryllium; and
- (7) The risk of continued beryllium exposure after sensitization.

§ 850.38 Warning signs and labels.

(a) *Warning signs.* The responsible employer must post warning signs at each access point to a regulated area with the following information:

DANGER
BERYLLIUM CAN CAUSE LUNG DAMAGE
CANCER HAZARD
AUTHORIZED PERSONNEL ONLY

(b) *Warning labels.* (1) The responsible employer must affix warning labels to all containers of beryllium, beryllium compounds, or beryllium-contaminated clothing, equipment, waste, scrap, or debris.

(2) Warning labels must contain the following information:

DANGER
CONTAMINATED WITH BERYLLIUM
DO NOT REMOVE DUST BY BLOWING OR
SHAKING
CANCER AND LUNG DISEASE HAZARD

(c) Warning signs and labels must be in accordance with 29 CFR 1910.1200, Hazard Communication.

§ 850.39 Recordkeeping and use of information.

(a) The responsible employer must establish and maintain accurate records of all beryllium inventory information, hazard assessments, exposure measurements, exposure controls, and medical surveillance.

(b) Heads of DOE Departmental Elements must:

(1) Designate all record series as required under this rule as agency records and, therefore, subject to all applicable agency records management and access laws; and

(2) Ensure that these record series are retained for a minimum of seventy-five years.

(c) The responsible employer must convey to DOE or its designee all record series required under this rule if the employer ceases to be involved in the CBDPP.

(d) The responsible employer must link data on workplace conditions and health outcomes in order to establish a basis for understanding the beryllium health risk.

(e) The responsible employer must ensure the confidentiality of all work-related records generated under this rule by ensuring that:

(1) All records that are transmitted to other parties do not contain names, social security numbers or any other variables, or combination of variables, that could be used to identify particular individuals; and

(2) Individual medical information generated by the CBDPP is:

(i) Either included as part of the worker's site medical records and maintained by the SOMD, or is maintained by another physician designated by the responsible employer;

(ii) Maintained separately from other records; and

(iii) Used or disclosed by the responsible employer only in conformance with any applicable requirements imposed by the Americans with Disabilities Act, the Privacy Act of 1974, the Freedom of Information Act, and any other applicable law.

(f) The responsible employer must maintain all records required by this part in current and accessible electronic systems, which include the ability readily to retrieve data in a format that maintains confidentiality.

(g) The responsible employer must transmit all records generated as required by this rule, in a format that protects the confidentiality of individuals, to the DOE Chief Health, Safety and Security Officer on request.

(h) The responsible employer must semi-annually transmit to the Office of Domestic and International Health

Studies, Office of Environment, Health, Safety and Security an electronic registry of beryllium-associated workers that protects confidentiality, and the registry must include, but is not limited to, a unique identifier, date of birth, gender, site, job history, medical screening test results, exposure measurements, and results of referrals for specialized medical evaluations.

[64 FR 68905, Dec. 8, 1999, as amended at 71 FR 68733, Nov. 28, 2006; 80 FR 5008, Jan. 30, 2015]

EDITORIAL NOTE: At 80 FR 5008, Jan. 30, 2015, §850.39 was amended; however, the amendment could not be incorporated due to inaccurate amendatory instruction.

§ 850.40 Performance feedback.

(a) The responsible employer must conduct periodic analyses and assessments of monitoring activities, hazards, medical surveillance, exposure reduction and minimization, and occurrence reporting data.

(b) To ensure that information is available to maintain and improve all elements of the CBDPP continuously, the responsible employer must give results of periodic analyses and assessments to the line managers, planners, worker protection staff, workers, medical staff, and labor organizations representing beryllium-associated workers who request such information.

APPENDIX A TO PART 850—CHRONIC BERYLLIUM DISEASE PREVENTION PROGRAM INFORMED CONSENT FORM

I, _____ have carefully read and understand the attached information about the Be-LPT and other medical tests. I have had the opportunity to ask any questions that I may have had concerning these tests.

I understand that this program is voluntary and I am free to withdraw at any time from all or any part of the medical surveillance program. I understand that the tests are confidential, but not anonymous. I understand that if the results of any test suggest a health problem, the examining physician will discuss the matter with me, whether or not the result is related to my work with beryllium. I understand that my employer will be notified of my diagnosis only if I have a beryllium sensitization or chronic beryllium disease. My employer will not receive the results or diagnoses of any health conditions not related to beryllium exposure.

I understand that, if the results of one or more of these tests indicate that I have a health problem that is related to beryllium, additional examinations will be recommended. If additional tests indicate I do have a beryllium sensitization or CBD, the Site Occupational Medical Director may recommend that I be removed from working with beryllium. If I agree to be removed, I understand that I may be transferred to another job for which I am qualified (or can be trained for in a short period) and where my beryllium exposures will be as low as possible, but in no case above the action level. I will maintain my total normal earnings, seniority, and other benefits for up to two years if I agree to be permanently removed.

I understand that if I apply for another job or for insurance, I may be requested to release my medical records to a future employer or an insurance company.

I understand that my employer will maintain all medical information relative to the tests performed on me in segregated medical files separate from my personnel files, treated as confidential medical records, and used or disclosed only as provided by the Americans with Disability Act, the Privacy Act of 1974, or as required by a court order or under other law.

I understand that the results of my medical tests for beryllium will be included in the Beryllium Registry maintained by DOE, and that a unique identifier will be used to maintain the confidentiality of my medical information. Personal identifiers will not be included in any reports generated from the DOE Beryllium Registry. I understand that the results of my tests and examinations may be published in reports or presented at meetings, but that I will not be identified.

I consent to having the following medical evaluations:

- // Physical examination concentrating on my lungs and breathing
- // Chest X-ray
- // Spirometry (a breathing test)
- // Blood test called the beryllium-induced lymphocyte proliferation test or Be-LPT
- // Other test(s). Specify:

Signature of Participant: _____

Date: _____

I have explained and discussed any questions that the employee expressed concerning the Be-LPT, physical examination, and other medical testing as well as the implications of those tests.

Name of Examining Physician: _____

Signature of Examining Physician: _____

Dated: _____

PART 851—WORKER SAFETY AND HEALTH PROGRAM

Subpart A—General Provisions

- Sec.
- 851.1 Scope and purpose.
- 851.2 Exclusions.
- 851.3 Definitions.
- 851.4 Compliance order.
- 851.5 Enforcement.
- 851.6 Petitions for generally applicable rule-making.
- 851.7 Request for a binding interpretive ruling.
- 851.8 Informal requests for information.

Subpart B—Program Requirements

- 851.10 General requirements.
- 851.11 Development and approval of worker safety and health program.
- 851.12 Implementation.
- 851.13 Compliance.

Subpart C—Specific Program Requirements

- 851.20 Management responsibilities and worker rights and responsibilities.
- 851.21 Hazard identification and assessment.
- 851.22 Hazard prevention and abatement.
- 851.23 Safety and health standards.
- 851.24 Functional areas.
- 851.25 Training and information.
- 851.26 Recordkeeping and reporting.
- 851.27 Reference sources.

Subpart D—Variances

- 851.30 Consideration of variances.
- 851.31 Variance process.
- 851.32 Action on variance requests.
- 851.33 Terms and conditions.
- 851.34 Requests for conferences.

Subpart E—Enforcement Process

- 851.40 Investigations and inspections.
- 851.41 Settlement.
- 851.42 Preliminary notice of violation.
- 851.43 Final notice of violation.
- 851.44 Administrative appeal.
- 851.45 Direction to NNSA contractors.

APPENDIX A TO PART 851—WORKER SAFETY AND HEALTH FUNCTIONAL AREAS

APPENDIX B TO PART 851—GENERAL STATEMENT OF ENFORCEMENT POLICY

AUTHORITY: 42 U.S.C. 2201(i)(3), (p); 42 U.S.C. 2282c; 42 U.S.C. 5801 *et seq.*; 42 U.S.C. 7101 *et seq.*; 50 U.S.C. 2401 *et seq.*

SOURCE: 71 FR 6931, Feb. 9, 2006, unless otherwise noted.

Subpart A—General Provisions**§ 851.1 Scope and purpose.**

(a) The worker safety and health requirements in this part govern the conduct of contractor activities at DOE sites.

(b) This part establishes the:

(1) Requirements for a worker safety and health program that reduces or prevents occupational injuries, illnesses, and accidental losses by providing DOE contractors and their workers with safe and healthful workplaces at DOE sites; and

(2) Procedures for investigating whether a violation of a requirement of this part has occurred, for determining the nature and extent of any such violation, and for imposing an appropriate remedy.

§ 851.2 Exclusions.

(a) This part does not apply to work at a DOE site:

(1) Regulated by the Occupational Safety and Health Administration; or

(2) Operated under the authority of the Director, Naval Nuclear Propulsion, pursuant to Executive Order 12344, as set forth in Public Law 98-525, 42 U.S.C. 7158 note.

(b) This part does not apply to radiological hazards or nuclear explosives operations to the extent regulated by 10 CFR Parts 20, 820, 830 or 835.

(c) This part does not apply to transportation to or from a DOE site.

(d) This part does not require compliance with any Occupational Safety and Health Administration beryllium requirement except for any permissible exposure limit for beryllium in 29 CFR 1910.1000.

[71 FR 6931, Feb. 9, 2006, as amended at 80 FR 69566, Nov. 10, 2015]

§ 851.3 Definitions.

(a) As used in this part:

AEA means the Atomic Energy Act of 1954, 42 U.S.C. 2011 *et seq.*

Affected worker means a worker who would be affected by the granting or denial of a variance, or any authorized representative of the worker, such as a collective bargaining agent.

Closure facility means a facility that is non-operational and is, or is ex-

pected to be permanently closed and/or demolished, or title to which is expected to be transferred to another entity for reuse.

Closure facility hazard means a facility-related condition within a closure facility involving deviations from the technical requirements of § 851.23 of this part that would require costly and extensive structural/engineering modifications to be in compliance.

Cognizant Secretarial Officer means, with respect to a particular situation, the Assistant Secretary, Deputy Administrator, Program Office Director, or equivalent DOE official who has primary line management responsibility for a contractor, or any other official to whom the CSO delegates in writing a particular function under this part.

Compliance order means an order issued by the Secretary to a contractor that mandates a remedy, work stoppage, or other action to address a situation that violates, potentially violates, or otherwise is inconsistent with a requirement of this part.

Consent order means any written document, signed by the Director and a contractor, containing stipulations or conclusions of fact or law and a remedy acceptable to both DOE and the contractor.

Construction means combination of erection, installation, assembly, demolition, or fabrication activities involved to create a new facility or to alter, add to, rehabilitate, dismantle, or remove an existing facility. It also includes the alteration and repair (including dredging, excavating, and painting) of buildings, structures, or other real property, as well as any construction, demolition, and excavation activities conducted as part of environmental restoration or remediation efforts.

Construction contractor means the lowest tiered contractor with primary responsibility for the execution of all construction work described within a construction procurement or authorization document (*e.g.*, construction contract, work order).

Construction manager means the individual or firm responsible to DOE for the supervision and administration of a

§ 851.3

10 CFR Ch. III (1–1–16 Edition)

construction project to ensure the construction contractor's compliance with construction project requirements.

Construction project means the full scope of activities required on a construction worksite to fulfill the requirements of the construction procurement or authorization document.

Construction worksite is the area within the limits necessary to perform the work described in the construction procurement or authorization document. It includes the facility being constructed or renovated along with all necessary staging and storage areas as well as adjacent areas subject to project hazards.

Contractor means any entity, including affiliated entities, such as a parent corporation, under contract with DOE, or a subcontractor at any tier, that has responsibilities for performing work at a DOE site in furtherance of a DOE mission.

Covered workplace means a place at a DOE site where a contractor is responsible for performing work in furtherance of a DOE mission.

Director means a DOE Official to whom the Secretary assigns the authority to investigate the nature and extent of compliance with the requirements of this part.

DOE means the United States Department of Energy, including the National Nuclear Security Administration.

DOE Enforcement Officer means a DOE official to whom the Director assigns the authority to investigate the nature and extent of compliance with the requirements of this part.

DOE site means a DOE-owned or -leased area or location or other area or location controlled by DOE where activities and operations are performed at one or more facilities or places by a contractor in furtherance of a DOE mission.

Final notice of violation means a document that determines a contractor has violated or is continuing to violate a requirement of this part and includes:

- (1) A statement specifying the requirement of this part to which the violation relates;
- (2) A concise statement of the basis for the determination;

(3) Any remedy, including the amount of any civil penalty; and

(4) A statement explaining the reasoning behind any remedy.

Final Order means an order of DOE that represents final agency action and, if appropriate, imposes a remedy with which the recipient of the order must comply.

General Counsel means the General Counsel of DOE.

Head of DOE Field Element means an individual who is the manager or head of the DOE operations office or field office.

Interpretative ruling means a statement by the General Counsel concerning the meaning or effect of a requirement of this part which relates to a specific factual situation but may also be a ruling of general applicability if the General Counsel determines such action to be appropriate.

National defense variance means relief from a safety and health standard, or portion thereof, to avoid serious impairment of a national defense mission.

NNSA means the National Nuclear Security Administration.

Nuclear explosive means an assembly containing fissionable and/or fusionable materials and main charge high-explosive parts or propellants capable of producing a nuclear detonation (e.g., a nuclear weapon or test device).

Nuclear explosive operation means any activity involving a nuclear explosive, including activities in which main charge high-explosive parts and pit are collocated.

Occupational medicine provider means the designated site occupational medicine director (SOMD) or the individual providing medical services.

Permanent variance means relief from a safety and health standard, or portion thereof, to contractors who can prove that their methods, conditions, practices, operations, or processes provide workplaces that are as safe and healthful as those that follow the workplace safety and health standard required by this part.

Preliminary notice of violation means a document that sets forth the preliminary conclusions that a contractor has violated or is continuing to violate a requirement of this part and includes:

Department of Energy

§ 851.4

(1) A statement specifying the requirement of this part to which the violation relates;

(2) A concise statement of the basis for alleging the violation;

(3) Any remedy, including the amount of any proposed civil penalty; and

(4) A statement explaining the reasoning behind any proposed remedy.

Pressure systems means all pressure vessels, and pressure sources including cryogenics, pneumatic, hydraulic, and vacuum. Vacuum systems should be considered pressure systems due to their potential for catastrophic failure due to backfill pressurization. Associated hardware (*e.g.*, gauges and regulators), fittings, piping, pumps, and pressure relief devices are also integral parts of the pressure system.

Remedy means any action (including, but not limited to, the assessment of civil penalties, the reduction of fees or other payments under a contract, the requirement of specific actions, or the modification, suspension or rescission of a contract) necessary or appropriate to rectify, prevent, or penalize a violation of a requirement of this part, including a compliance order issued by the Secretary pursuant to this part.

Safety and health standard means a standard that addresses a workplace hazard by establishing limits, requiring conditions, or prescribing the adoption or use of one or more practices, means, methods, operations, or processes, reasonably necessary or appropriate to provide safe and healthful workplaces.

Secretary means the Secretary of Energy.

Temporary variance means a short-term relief for a new safety and health standard when the contractor cannot comply with the requirements by the prescribed date because the necessary construction or alteration of the facility cannot be completed in time or when technical personnel, materials, or equipment are temporarily unavailable.

Unauthorized discharge means the discharge of a firearm under circumstances other than: (1) during firearms training with the firearm properly pointed down range (or toward a target), or (2) the intentional firing at

hostile parties when deadly force is authorized.

Under Secretary means, with respect to a particular situation, the DOE official who serves as the Under Secretary for Science and Energy, or Under Secretary for Management and Performance, or the Under Secretary for Nuclear Security/Administrator for National Nuclear Security Administration who has primary line management responsibility for a contractor.

Variance means an exception to compliance with some part of a safety and health standard granted by the Under Secretary to a contractor.

Worker means an employee of a DOE contractor person who performs work in furtherance of a DOE mission at a covered workplace.

Workplace hazard means a physical, chemical, biological, or safety hazard with any potential to cause illness, injury, or death to a person.

(b) Terms undefined in this part that are defined in the Atomic Energy Act of 1954 must have the same meaning as under that Act.

[71 FR 6931, Feb. 9, 2006, as amended at 80 FR 5008, Jan. 30, 2015]

§ 851.4 Compliance order.

(a) The Secretary may issue to any contractor a Compliance Order that:

(1) Identifies a situation that violates, potentially violates, or otherwise is inconsistent with a requirement of this part;

(2) Mandates a remedy, work stoppage, or other action; and,

(3) States the reasons for the remedy, work stoppage, or other action.

(b) A Compliance Order is a final order that is effective immediately unless the Order specifies a different effective date.

(c) Within 15 calendar days of the issuance of a Compliance Order, the recipient of the Order may request the Secretary to rescind or modify the Order. A request does not stay the effectiveness of a Compliance Order unless the Secretary issues an order to that effect.

(d) A copy of the Compliance Order must be prominently posted, once issued, at or near the location where the violation, potential violation, or

§ 851.5

inconsistency occurred until it is corrected.

§ 851.5 Enforcement.

(a) A contractor that is indemnified under section 170d. of the AEA (or any subcontractor or supplier thereto) and that violates (or whose employee violates) any requirement of this part shall be subject to a civil penalty of up to \$80,000 for each such violation. If any violation under this subsection is a continuing violation, each day of the violation shall constitute a separate violation for the purpose of computing the civil penalty.

(b) A contractor that violates any requirement of this part may be subject to a reduction in fees or other payments under a contract with DOE, pursuant to the contract's *Conditional Payment of Fee* clause, or other contract clause providing for such reductions.

(c) DOE may not penalize a contractor under both paragraphs (a) and (b) of this section for the same violation of a requirement of this part.

(d) For contractors listed in subsection d. of section 234A of the AEA, 42 U.S.C. 2282a(d), the total amount of civil penalties under paragraph (a) and contract penalties under paragraph (b) of this section may not exceed the total amount of fees paid by DOE to the contractor in that fiscal year.

(e) DOE shall not penalize a contractor under both sections 234A and 234C of the AEA for the same violation.

(f) DOE enforcement actions through civil penalties under paragraph (a) of this section, start on February 9, 2007.

[71 FR 6931, Feb. 9, 2006, as amended at 74 FR 66033, Dec. 14, 2009; 79 FR 20, Jan. 2, 2014]

§ 851.6 Petitions for generally applicable rulemaking.

(a) *Right to file.* Any person may file a petition for generally applicable rulemaking to amend or interpret provisions of this part.

(b) *How to file.* Any person who wants to file a petition for generally applicable rulemaking pursuant to this section must file by mail or messenger in an envelope addressed to the Office of General Counsel, GC-1, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

10 CFR Ch. III (1-1-16 Edition)

(c) *Content of rulemaking petitions.* A petition under this section must:

(1) Be labeled "Petition for Rulemaking Under 10 CFR 851;"

(2) Describe with particularity the provision of this part to be amended and the text of regulatory language to be added; and

(3) Explain why, if relevant, DOE should not choose to make policy by precedent through adjudication of petitions for assessment of civil penalty.

(d) *Determinations upon rulemaking petitions.* After considering the petition and other information DOE deems relevant, DOE may grant the petition and issue an appropriate rulemaking notice, or deny the petition because the rule being sought:

(1) Would be inconsistent with statutory law;

(2) Would establish a generally applicable policy in a subject matter area that should be left to case-by-case determinations; or

(3) For other good cause.

§ 851.7 Requests for a binding interpretive ruling.

(a) *Right to file.* Any person subject to this part shall have the right to file a request for an interpretive ruling that is binding on DOE with regard to a question as to how the regulations in this part would apply to particular facts and circumstances.

(b) *How to file.* Any person who wants to file a request under this section must file by mail or messenger in an envelope addressed to the Office of General Counsel, GC-1, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

(c) *Content of request for interpretive ruling.* A request under this section must:

(1) Be in writing;

(2) Be labeled "Request for Interpretive Ruling Under 10 CFR 851;"

(3) Identify the name, address, telephone number, e-mail address, and any designated representative of the person filing the request;

(4) State the facts and circumstances relevant to the request;

(5) Be accompanied by copies of relevant supporting documents if any;

(6) Specifically identify the pertinent regulations and the related question on

Department of Energy

§ 851.10

which an interpretive ruling is sought; and

(7) Include explanatory discussion in support of the interpretive ruling being sought.

(d) *Public comment.* DOE may give public notice of any request for an interpretive ruling and provide an opportunity for public comment.

(e) *Opportunity to respond to public comment.* DOE may provide an opportunity to any person who requests an interpretive ruling to respond to public comments relating to the request.

(f) *Other sources of information.* DOE may:

(1) Conduct an investigation of any statement in a request;

(2) Consider any other source of information in evaluating a request for an interpretive ruling; and

(3) Rely on previously issued interpretive rulings with addressing the same or a related issue.

(g) *Informal conference.* DOE may convene an informal conference with the person requesting the interpretive ruling.

(h) *Effect of interpretive ruling.* Except as provided in paragraph (i) of this section, an interpretive ruling under this section is binding on DOE only with respect to the person who requested the ruling.

(i) *Reliance on interpretive ruling.* If DOE issues an interpretive ruling under this section, then DOE may not subject the person who requested the ruling to an enforcement action for civil penalties for actions reasonably taken in reliance on the ruling, but a person may not act in reliance on an interpretive ruling that is administratively rescinded or modified after opportunity to comment, judicially invalidated, or overruled by statute or regulation.

(j) *Denial of requests for an interpretive ruling.* DOE may deny a request for an interpretive ruling if DOE determines that:

(1) There is insufficient information upon which to base an interpretive ruling;

(2) The interpretive question posed should be treated in a general notice of proposed rulemaking;

(3) There is an adequate procedure elsewhere in this part for addressing

the interpretive question such as a petition for variance; or

(4) For other good cause.

(k) *Public availability of interpretive rulings.* For information of interested members of the public, DOE may file a copy of interpretive rulings on a DOE internet web site.

[71 FR 6931, Feb. 9, 2006; 71 FR 36661, June 28, 2006]

§ 851.8 Informal requests for information.

(a) Any person may informally request information under this section as to how to comply with the requirements of this part, instead of applying for a binding interpretive ruling under § 851.7. DOE responses to informal requests for information under this section are not binding on DOE and do not preclude enforcement actions under this part.

(b) Inquiries regarding the technical requirements of the standards required by this part must be directed to the Office of Environment, Health, Safety and Security, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

(c) Information regarding the general statement of enforcement policy in the appendix to this part must be directed to the Office of Enterprise Assessments, Office of Enforcement, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

[71 FR 6931, Feb. 9, 2006, as amended at 71 FR 68733, Nov. 28, 2006; 80 FR 5009, Jan. 30, 2015]

Subpart B—Program Requirements

§ 851.10 General requirements.

(a) With respect to a covered workplace for which a contractor is responsible, the contractor must:

(1) Provide a place of employment that is free from recognized hazards that are causing or have the potential to cause death or serious physical harm to workers; and

(2) Ensure that work is performed in accordance with:

(i) All applicable requirements of this part; and

(ii) The worker safety and health program for that workplace.

§ 851.11

10 CFR Ch. III (1–1–16 Edition)

(b) The written worker safety and health program must describe how the contractor complies with the:

(1) Requirements set forth in subpart C of this part that are applicable to the hazards associated with the contractor's scope of work; and

(2) Any compliance order issued by the Secretary pursuant to § 851.4.

[71 FR 6931, Feb. 9, 2006, as amended at 80 FR 5009, Jan. 30, 2015]

§ 851.11 Development and approval of worker safety and health program.

(a) *Preparation and submission of worker safety and health program.* By February 26, 2007, contractors must submit to the appropriate Head of DOE Field Element for approval a written worker safety and health program that provides the methods for implementing the requirements of subpart C of this part.

(1) If a contractor is responsible for more than one covered workplace at a DOE site, the contractor must establish and maintain a single worker safety and health program for the covered workplaces for which the contractor is responsible.

(2) If more than one contractor is responsible for covered workplaces, each contractor must:

(i) Establish and maintain a worker safety and health program for the workplaces for which the contractor is responsible; and

(ii) Coordinate with the other contractors responsible for work at the covered workplaces to ensure that there are clear roles, responsibilities and procedures to ensure the safety and health of workers at multi-contractor workplaces.

(3) The worker safety and health program must describe how the contractor will:

(i) Comply with the requirements set forth in subpart C of this part that are applicable to the covered workplace, including the methods for implementing those requirements; and

(ii) Integrate the requirements set forth in subpart C of this part that are applicable to a covered workplace with other related site-specific worker protection activities and with the integrated safety management system.

(b) *DOE evaluation and approval.* The Head of DOE Field Element must complete a review and provide written approval of the contractor's worker safety and health program, within 90 days of receiving the document. The worker safety and health program and any updates are deemed approved 90 days after submission if they are not specifically approved or rejected by DOE earlier.

(1) Beginning May 25, 2007, no work may be performed at a covered workplace unless an approved worker safety and health program is in place for the workplace.

(2) Contractors must send a copy of the approved program to the Associate Under Secretary for Environment, Health, Safety and Security.

(3) Contractors must furnish a copy of the approved worker safety and health program, upon written request, to the affected workers or their designated representatives.

(c) *Updates.* (1) Contractors must submit an update of the worker safety and health program to the appropriate Head of DOE Field Element, for review and approval whenever a significant change or addition to the program is made, or a change in contractors occurs.

(2) Contractors must submit annually to DOE either an updated worker safety and health program for approval or a letter stating that no changes are necessary in the currently approved worker safety and health program.

(3) Contractors must incorporate in the worker safety and health program any changes, conditions, or workplace safety and health standards directed by DOE consistent with the requirements of this part and DEAR 970.5204-2, Laws, Regulations and DOE Directives (December, 2000) and associated contract clauses.

(d) *Labor Organizations.* If a contractor employs or supervises workers who are represented for collective bargaining by a labor organization, the contractor must:

(1) Give the labor organization timely notice of the development and implementation of the worker safety and health program and any updates thereto; and

Department of Energy

§ 851.20

(2) Upon timely request, bargain concerning implementation of this part, consistent with the Federal labor laws.

[71 FR 6931, Feb. 9, 2006, as amended at 71 FR 68733, Nov. 28, 2006; 80 FR 5009, Jan. 30, 2015]

§ 851.12 Implementation.

(a) Contractors must implement the requirements of this part.

(b) Nothing in this part precludes a contractor from taking any additional protective action that is determined to be necessary to protect the safety and health of workers.

§ 851.13 Compliance.

(a) Contractors must achieve compliance with all the requirements of Subpart C of this part, and their approved worker safety and health program no later than May 25, 2007. Contractors may be required to comply contractually with the requirements of this rule before February 9, 2007.

(b) In the event a contractor has established a written safety and health program, an Integrated Safety Management System (ISMS) description pursuant to the DEAR Clause, or an approved Work Smart Standards (WSS) process before the date of issuance of the final rule, the Contractor may use that program, description, or process as the worker safety and health program required by this part if the appropriate Head of the DOE Field Element approves such use on the basis of written documentation provided by the contractor that identifies the specific portions of the program, description, or process, including any additional requirements or implementation methods to be added to the existing program, description, or process, that satisfy the requirements of this part and that provide a workplace as safe and healthful as would be provided by the requirements of this part.

(c) Nothing in this part shall be construed to limit or otherwise affect contractual obligations of a contractor to comply with contractual requirements that are not inconsistent with the requirements of this part.

Subpart C—Specific Program Requirements

§ 851.20 Management responsibilities and worker rights and responsibilities.

(a) *Management responsibilities.* Contractors are responsible for the safety and health of their workforce and must ensure that contractor management at a covered workplace:

(1) Establish written policy, goals, and objectives for the worker safety and health program;

(2) Use qualified worker safety and health staff (*e.g.*, a certified industrial hygienist, or safety professional) to direct and manage the program;

(3) Assign worker safety and health program responsibilities, evaluate personnel performance, and hold personnel accountable for worker safety and health performance;

(4) Provide mechanisms to involve workers and their elected representatives in the development of the worker safety and health program goals, objectives, and performance measures and in the identification and control of hazards in the workplace;

(5) Provide workers with access to information relevant to the worker safety and health program;

(6) Establish procedures for workers to report without reprisal job-related fatalities, injuries, illnesses, incidents, and hazards and make recommendations about appropriate ways to control those hazards;

(7) Provide for prompt response to such reports and recommendations;

(8) Provide for regular communication with workers about workplace safety and health matters;

(9) Establish procedures to permit workers to stop work or decline to perform an assigned task because of a reasonable belief that the task poses an imminent risk of death, serious physical harm, or other serious hazard to workers, in circumstances where the workers believe there is insufficient time to utilize normal hazard reporting and abatement procedures; and

(10) Inform workers of their rights and responsibility by appropriate means, including posting the DOE-designated Worker Protection Poster in

§ 851.21

the workplace where it is accessible to all workers.

(b) *Worker rights and responsibilities.* Workers must comply with the requirements of this part, including the worker safety and health program, which are applicable to their own actions and conduct. Workers at a covered workplace have the right, without reprisal, to:

(1) Participate in activities described in this section on official time;

(2) Have access to:

(i) DOE safety and health publications;

(ii) The worker safety and health program for the covered workplace;

(iii) The standards, controls, and procedures applicable to the covered workplace;

(iv) The safety and health poster that informs the worker of relevant rights and responsibilities;

(v) Limited information on any recordkeeping log (OSHA Form 300). Access is subject to Freedom of Information Act requirements and restrictions; and

(vi) The DOE Form 5484.3 (the DOE equivalent to OSHA Form 301) that contains the employee's name as the injured or ill worker;

(3) Be notified when monitoring results indicate the worker was overexposed to hazardous materials;

(4) Observe monitoring or measuring of hazardous agents and have the results of their own exposure monitoring;

(5) Have a representative authorized by employees accompany the Director or his authorized personnel during the physical inspection of the workplace for the purpose of aiding the inspection. When no authorized employee representative is available, the Director or his authorized representative must consult, as appropriate, with employees on matters of worker safety and health;

(6) Request and receive results of inspections and accident investigations;

(7) Express concerns related to worker safety and health;

(8) Decline to perform an assigned task because of a reasonable belief that, under the circumstances, the task poses an imminent risk of death or serious physical harm to the worker coupled with a reasonable belief that

10 CFR Ch. III (1–1–16 Edition)

there is insufficient time to seek effective redress through normal hazard reporting and abatement procedures; and

(9) Stop work when the worker discovers employee exposures to imminently dangerous conditions or other serious hazards; provided that any stop work authority must be exercised in a justifiable and responsible manner in accordance with procedures established in the approved worker safety and health program.

§ 851.21 Hazard identification and assessment.

(a) Contractors must establish procedures to identify existing and potential workplace hazards and assess the risk of associated workers injury and illness. Procedures must include methods to:

(1) Assess worker exposure to chemical, physical, biological, or safety workplace hazards through appropriate workplace monitoring;

(2) Document assessment for chemical, physical, biological, and safety workplace hazards using recognized exposure assessment and testing methodologies and using of accredited and certified laboratories;

(3) Record observations, testing and monitoring results;

(4) Analyze designs of new facilities and modifications to existing facilities and equipment for potential workplace hazards;

(5) Evaluate operations, procedures, and facilities to identify workplace hazards;

(6) Perform routine job activity-level hazard analyses;

(7) Review site safety and health experience information; and

(8) Consider interaction between workplace hazards and other hazards such as radiological hazards.

(b) Contractors must submit to the Head of DOE Field Element a list of closure facility hazards and the established controls within 90 days after identifying such hazards. The Head of DOE Field Element, with concurrence by the Cognizant Secretarial Officer, has 90 days to accept the closure facility hazard controls or direct additional actions to either:

(1) Achieve technical compliance; or

Department of Energy

§ 851.23

(2) Provide additional controls to protect the workers.

(c) Contractors must perform the activities identified in paragraph (a) of this section, initially to obtain baseline information and as often thereafter as necessary to ensure compliance with the requirements in this Subpart.

§ 851.22 Hazard prevention and abatement.

(a) Contractors must establish and implement a hazard prevention and abatement process to ensure that all identified and potential hazards are prevented or abated in a timely manner.

(1) For hazards identified either in the facility design or during the development of procedures, controls must be incorporated in the appropriate facility design or procedure.

(2) For existing hazards identified in the workplace, contractors must:

(i) Prioritize and implement abatement actions according to the risk to workers;

(ii) Implement interim protective measures pending final abatement; and

(iii) Protect workers from dangerous safety and health conditions;

(b) Contractors must select hazard controls based on the following hierarchy:

(1) Elimination or substitution of the hazards where feasible and appropriate;

(2) Engineering controls where feasible and appropriate;

(3) Work practices and administrative controls that limit worker exposures; and

(4) Personal protective equipment.

(c) Contractors must address hazards when selecting or purchasing equipment, products, and services.

§ 851.23 Safety and health standards.

(a) Contractors must comply with the following safety and health standards that are applicable to the hazards at their covered workplace:

(1) Title 10 Code of Federal Regulations (CFR) 850, "Chronic Beryllium Disease Prevention Program."

(2) Title 29 CFR, Parts 1904.4 through 1904.11, 1904.29 through 1904.33; 1904.44, and 1904.46, "Recording and Reporting Occupational Injuries and Illnesses."

(3) Title 29 CFR, Part 1910, "Occupational Safety and Health Standards," excluding 29 CFR 1910.1096, "Ionizing Radiation, and 29 CFR 1910.1000, *Beryllium*"

(4) Title 29 CFR, Part 1915, "Shipyard Employment."

(5) Title 29 CFR, Part 1917, "Marine Terminals."

(6) Title 29 CFR, Part 1918, "Safety and Health Regulations for Longshoring."

(7) Title 29 CFR, Part 1926, "Safety and Health Regulations for Construction."

(8) Title 29 CFR, Part 1928, "Occupational Safety and Health Standards for Agriculture."

(9) American Conference of Governmental Industrial Hygienists (ACGIH), "Threshold Limit Values for Chemical Substances and Physical Agents and Biological Exposure Indices," (2005) (incorporated by reference, see § 851.27) when the ACGIH Threshold Limit Values (TLVs) are lower (more protective) than permissible exposure limits in 29 CFR 1910. When the ACGIH TLVs are used as exposure limits, contractors must nonetheless comply with the other provisions of any applicable expanded health standard found in 29 CFR 1910.

(10) American National Standards Institute (ANSI) Z88.2, "American National Standard for Respiratory Protection," (1992) (incorporated by reference, see § 851.27).

(11) ANSI Z136.1, "Safe Use of Lasers," (2000) (incorporated by reference, see § 851.27).

(12) ANSI Z49.1, "Safety in Welding, Cutting and Allied Processes," sections 4.3 and E4.3 (1999) (incorporated by reference, see § 851.27).

(13) National Fire Protection Association (NFPA) 70, "National Electrical Code," (2005) (incorporated by reference, see § 851.27).

(14) NFPA 70E, "Standard for Electrical Safety in the Workplace," (2004) (incorporated by reference, see § 851.27).

(b) Nothing in this part must be construed as relieving a contractor from complying with any additional specific safety and health requirement that it

§ 851.24

determines to be necessary to protect the safety and health of workers.

[71 FR 6931, Feb. 9, 2006, as amended at 80 FR 69566, Nov. 10, 2015]

§ 851.24 Functional areas.

(a) Contractors must have a structured approach to their worker safety and health program which at a minimum, include provisions for the following applicable functional areas in their worker safety and health program: construction safety; fire protection; firearms safety; explosives safety; pressure safety; electrical safety; industrial hygiene; occupational medicine; biological safety; and motor vehicle safety.

(b) In implementing the structured approach required by paragraph (a) of this section, contractors must comply with the applicable standards and provisions in appendix A of this part, entitled "Worker Safety and Health Functional Areas."

§ 851.25 Training and information.

(a) Contractors must develop and implement a worker safety and health training and information program to ensure that all workers exposed or potentially exposed to hazards are provided with the training and information on that hazard in order to perform their duties in a safe and healthful manner.

(b) The contractor must provide:

(1) Training and information for new workers, before or at the time of initial assignment to a job involving exposure to a hazard;

(2) Periodic training as often as necessary to ensure that workers are adequately trained and informed; and

(3) Additional training when safety and health information or a change in workplace conditions indicates that a new or increased hazard exists.

(c) Contractors must provide training and information to workers who have worker safety and health program responsibilities that is necessary for them to carry out those responsibilities.

§ 851.26 Recordkeeping and reporting.

(a) *Recordkeeping.* Contractors must:

(1) Establish and maintain complete and accurate records of all hazard in-

10 CFR Ch. III (1–1–16 Edition)

ventory information, hazard assessments, exposure measurements, and exposure controls.

(2) Ensure that the work-related injuries and illnesses of its workers and subcontractor workers are recorded and reported accurately and consistent with DOE Manual 231.1–1A, Environment, Safety and Health Reporting Manual, September 9, 2004 (incorporated by reference, see § 851.27).

(3) Comply with the applicable occupational injury and illness record-keeping and reporting workplace safety and health standards in § 851.23 at their site, unless otherwise directed in DOE Manual 231.1–1A.

(4) Not conceal nor destroy any information concerning non-compliance or potential noncompliance with the requirements of this part.

(b) *Reporting and investigation.* Contractors must:

(1) Report and investigate accidents, injuries and illness; and

(2) Analyze related data for trends and lessons learned (reference DOE Order 225.1A, Accident Investigations, November 26, 1997).

§ 851.27 Reference sources.

(a) *Materials incorporated by reference*—(1) *General.* The following standards which are not otherwise set forth in part 851 are incorporated by reference and made a part of part 851. The standards listed in this section have been approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51.

(2) *Availability of standards.* The standards incorporated by reference are available for inspection at:

(i) National Archives and Records Administration (NARA). For more information on the availability of this material at NARA, call 202-741-6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html

[71 FR 6931, Feb. 9, 2006, as amended at 71 FR 68733, Nov. 28, 2006; 80 FR 5009, Jan. 30, 2015]

Subpart D—Variances

§ 851.30 Consideration of variances.

(a) Variances shall be granted by the Under Secretary after considering the recommendation of the Associate Under Secretary for Environment, Health, Safety and Security. The authority to grant a variance cannot be delegated.

(b) The application must satisfy the requirements for applications specified in § 851.31.

[71 FR 6931, Feb. 9, 2006, as amended at 71 FR 68733, Nov. 28, 2006; 80 FR 5009, Jan. 30, 2015]

§ 851.31 Variance process.

(a) *Application.* Contractors desiring a variance from a safety and health standard, or portion thereof, may submit a written application containing the information in paragraphs (c) and (d) of this section to the appropriate CSO.

(1) The CSO may forward the application to the Associate Under Secretary for Environment, Health, Safety and Security.

(2) If the CSO does not forward the application to the Associate Under Secretary for Environment, Health, Safety and Security, the CSO must return the application to the contractor with a written statement explaining why the application was not forwarded.

(3) Upon receipt of an application from a CSO, the Associate Under Secretary for Environment, Health, Safety and Security must review the application for a variance and make a written recommendation to:

§ 851.31

10 CFR Ch. III (1–1–16 Edition)

- (i) Approve the application;
- (ii) Approve the application with conditions; or
- (iii) Deny the application.

(b) *Defective applications.* If an application submitted pursuant to § 851.31(a) is determined by the Associate Under Secretary for Environment, Health, Safety and Security to be incomplete, the Associate Under Secretary may:

(1) Return the application to the contractor with a written explanation of what information is needed to permit consideration of the application; or

(2) Request the contractor to provide necessary information.

(c) *Content.* All variance applications submitted pursuant to paragraph (a) of this section must include:

(1) The name and address of the contractor;

(2) The address of the DOE site or sites involved;

(3) A specification of the standard, or portion thereof, from which the contractor seeks a variance;

(4) A description of the steps that the contractor has taken to inform the affected workers of the application, which must include giving a copy thereof to their authorized representative, posting a statement, giving a summary of the application and specifying where a copy may be examined at the place or places where notices to workers are normally posted; and

(5) A description of how affected workers have been informed of their right to petition the Associate Under Secretary for Environment, Health, Safety and Security or designee for a conference; and

(6) Any requests for a conference, as provided in § 851.34.

(d) *Types of variances.* Contractors may apply for the following types of variances:

(1) *Temporary variance.* Applications for a temporary variance pursuant to paragraph (a) of this section must be submitted at least 30 days before the effective date of a new safety and health standard and, in addition to the content required by paragraph (c) of this section, must include:

(i) A statement by the contractor explaining the contractor is unable to comply with the standard or portion thereof by its effective date and a de-

tailed statement of the factual basis and representations of qualified persons that support the contractor's statement;

(ii) A statement of the steps the contractor has taken and plans to take, with specific dates if appropriate, to protect workers against the hazard covered by the standard;

(iii) A statement of when the contractor expects to be able to comply with the standard and of what steps the contractor has taken and plans to take, with specific dates if appropriate, to come into compliance with the standard;

(iv) A statement of the facts the contractor would show to establish that:

(A) The contractor is unable to comply with the standard by its effective date because of unavailability of professional or technical personnel or materials and equipment needed to come into compliance with the standard or because necessary construction or alteration of facilities cannot be completed by the effective date;

(B) The contractor is taking all available steps to safeguard the workers against the hazards covered by the standard; and

(C) The contractor has an effective program for coming into compliance with the standard as quickly as practicable.

(2) *Permanent variance.* An application submitted for a permanent variance pursuant to paragraph (a) of this section must, in addition to the content required in paragraph (c) of this section, include:

(i) A description of the conditions, practices, means, methods, operations, or processes used or proposed to be used by the contractor; and

(ii) A statement showing how the conditions, practices, means, methods, operations, or processes used or proposed to be used would provide workers a place of employment which is as safe and healthful as would result from compliance with the standard from which a variance is sought.

(3) *National defense variance.* (i) An application submitted for a national defense variance pursuant to paragraph (a) of this section must, in addition to the content required in paragraph (c) of this section, include:

Department of Energy

§ 851.32

(A) A statement by the contractor showing that the variance sought is necessary to avoid serious impairment of national defense; and

(B) A statement showing how the conditions, practices, means, methods, operations, or processes used or proposed to be used would provide workers a safe and healthful place of employment in a manner that, to the extent practical taking into account the national defense mission, is consistent with the standard from which a variance is sought.

(ii) A national defense variance may be granted for a maximum of six months, unless there is a showing that a longer period is essential to carrying out a national defense mission.

[71 FR 6931, Feb. 9, 2006; 71 FR 36661, June 28, 2006, as amended at 71 FR 68733, Nov. 28, 2006; 80 FR 5009, Jan. 30, 2015]

§ 851.32 Action on variance requests.

(a) *Procedures for an approval recommendation.* (1) If the Associate Under Secretary for Environment, Health, Safety and Security recommends approval of a variance application, the Associate Under Secretary must forward to the Under Secretary the variance application and the approval recommendation including a discussion of the basis for the recommendation and any terms and conditions proposed for inclusion as part of the approval.

(2) If the Under Secretary approves a variance, the Under Secretary must notify the Associate Under Secretary for Environment, Health, Safety and Security who must notify the Office of Enforcement and the CSO who must promptly notify the contractor.

(3) The notification must include a reference to the safety and health standard or portion thereof that is the subject of the application, a detailed description of the variance, the basis for the approval and any terms and conditions of the approval.

(4) If the Under Secretary denies a variance, the Under Secretary must notify the Associate Under Secretary for Environment, Health, Safety and Security who must notify the appropriate CSO who must notify the contractor.

(5) The notification must include the grounds for denial.

(b) *Approval criteria.* A variance may be granted if the variance:

(1) Is consistent with section 3173 of the NDAA;

(2) Does not present an undue risk to worker safety and health;

(3) Is warranted under the circumstances;

(4) Satisfies the requirements of § 851.31 of this part for the type of variance requested.

(c) *Procedures for a denial recommendation.* (1) If the Associate Under Secretary for Environment, Health, Safety and Security recommends denial of a variance application, the Associate Under Secretary must notify the CSO of the denial recommendation and the grounds for the denial recommendation.

(2) Upon receipt of a denial recommendation, the CSO may:

(i) Notify the contractor that the variance application is denied on the grounds cited by the Associate Under Secretary for Environment, Health, Safety and Security; or

(ii) Forward to the Under Secretary the variance application, the denial recommendation, the grounds for the denial recommendation, and any information that supports an action different than that recommended by the Associate Under Secretary for Environment, Health, Safety and Security.

(3) If the CSO forwards the application to the Under Secretary, the procedures in paragraphs (a)(2), (3), (4) and (5) of this section apply.

(4) A denial of an application pursuant to this section shall be without prejudice to submitting of another application

(d) *Grounds for denial of a variance.* A variance may be denied if:

(1) Enforcement of the violation would be handled as a *de minimis* violation (defined as a deviation from the requirement of a standard that has no direct or immediate relationship to safety or health, and no enforcement action will be taken);

(2) When a variance is not necessary for the conditions, practice, means, methods, operations, or processes used or proposed to be used by contractor;

§ 851.33

(3) Contractor does not demonstrate that the approval criteria are met.

[71 FR 6931, Feb. 9, 2006, as amended at 71 FR 68733, Nov. 28, 2006; 80 FR 5009, Jan. 30, 2015]

§ 851.33 Terms and conditions.

A variance may contain appropriate terms and conditions including, but not limited to, provisions that:

- (a) Limit its duration;
- (b) Require alternative action;
- (c) Require partial compliance; and
- (d) Establish a schedule for full or partial compliance.

§ 851.34 Requests for conferences.

(a) Within the time allotted by a notice of the filling of an application, any affected contractor or worker may file with the Associate Under Secretary for Environment, Health, Safety and Security a request for a conference on the application for a variance.

(b) A request for a conference filed pursuant to paragraph (a) of this section must include:

- (1) A concise statement explaining how the contractor or worker would be affected by the variance applied for, including relevant facts;
- (2) A specification of any statement or representation in the application which is denied, and a concise summary of the evidence that would be adduced in support of each denial; and
- (3) Any other views or arguments on any issue of fact or law presented.

(c) The Associate Under Secretary for Environment, Health, Safety and Security, or designee, must respond to a request within fifteen days and, if the request is granted, indicate the time and place of the conference and the DOE participants in the conference.

[71 FR 6931, Feb. 9, 2006, as amended at 71 FR 68733, Nov. 28, 2006; 80 FR 5009, Jan. 30, 2015]

Subpart E—Enforcement Process

§ 851.40 Investigations and inspections.

(a) The Director may initiate and conduct investigations and inspections relating to the scope, nature and extent of compliance by a contractor with the requirements of this part and take such action as the Director deems necessary and appropriate to the con-

10 CFR Ch. III (1–1–16 Edition)

duct of the investigation or inspection. DOE Enforcement Officers have the right to enter work areas without delay to the extent practicable, to conduct inspections under this subpart.

(b) Contractors must fully cooperate with the Director during all phases of the enforcement process and provide complete and accurate records and documentation as requested by the Director during investigation or inspection activities.

(c) Any worker or worker representative may request that the Director initiate an investigation or inspection pursuant to paragraph (a) of this section. A request for an investigation or inspection must describe the subject matter or activity to be investigated or inspected as fully as possible and include supporting documentation and information. The worker or worker representative has the right to remain anonymous upon filing a request for an investigation or inspection.

(d) The Director must inform any contractor that is the subject of an investigation or inspection in writing at the initiation of the investigation or inspection and must inform the contractor of the general purpose of the investigation or inspection.

(e) DOE shall not disclose information or documents that are obtained during any investigation or inspection unless the Director directs or authorizes the public disclosure of the investigation. Prior to such authorization, DOE must determine that disclosure is not precluded by the Freedom of Information Act, 5 U.S.C. 552 and part 1004 of this title. Once disclosed pursuant to the Director's authorization, the information or documents are a matter of public record.

(f) A request for confidential treatment of information for purposes of the Freedom of Information Act does not prevent disclosure by the Director if the Director determines disclosure to be in the public interest and otherwise permitted or required by law.

(g) During the course of an investigation or inspection, any contractor may submit any document, statement of facts, or memorandum of law for the purpose of explaining the contractor's position or furnish information which the contractor considers relevant to a

Department of Energy

§ 851.42

matter or activity under investigation or inspection.

(h) The Director may convene an informal conference to discuss any situation that might be a violation of a requirement of this part, its significance and cause, any corrective action taken or not taken by the contractor, any mitigating or aggravating circumstances, and any other information. A conference is not normally open to the public and DOE does not make a transcript of the conference. The Director may compel a contractor to attend the conference.

(i) If facts disclosed by an investigation or inspection indicate that further action is unnecessary or unwarranted, the Director may close the investigation without prejudice.

(j) The Director may issue enforcement letters that communicate DOE's expectations with respect to any aspect of the requirements of this part, including identification and reporting of issues, corrective actions, and implementation of the contractor's safety and health program; provided that an enforcement letter may not create the basis for any legally enforceable requirement pursuant to this part.

(k) The Director may sign, issue and serve subpoenas.

§ 851.41 Settlement.

(a) DOE encourages settlement of a proceeding under this subpart at any time if the settlement is consistent with this part. The Director and a contractor may confer at any time concerning settlement. A settlement conference is not open to the public and DOE does not make a transcript of the conference.

(b) Notwithstanding any other provision of this part, the Director may resolve any issues in an outstanding proceeding under this subpart with a consent order.

(1) The Director and the contractor, or a duly authorized representative thereto, must sign the consent order and indicate agreement to the terms contained therein.

(2) A contractor is not required to admit in a consent order that a requirement of this part has been violated.

(3) DOE is not required to make a finding in a consent order that a contractor has violated a requirement of this part.

(4) A consent order must set forth the relevant facts that form the basis for the order and what remedy, if any, is imposed.

(5) A consent order shall constitute a final order.

§ 851.42 Preliminary notice of violation.

(a) Based on a determination by the Director that there is a reasonable basis to believe a contractor has violated or is continuing to violate a requirement of this part, the Director may issue a preliminary notice of violation (PNOV) to the contractor.

(b) A PNOV must indicate:

(1) The date, facts, and nature of each act or omission upon which each alleged violation is based;

(2) The particular requirement involved in each alleged violation;

(3) The proposed remedy for each alleged violation, including the amount of any civil penalty; and

(4) The obligation of the contractor to submit a written reply to the Director within 30 calendar days of receipt of the PNOV.

(c) A reply to a PNOV must contain a statement of all relevant facts pertaining to an alleged violation.

(1) The reply must:

(i) State any facts, explanations and arguments that support a denial of the alleged violation;

(ii) Demonstrate any extenuating circumstances or other reason why a proposed remedy should not be imposed or should be mitigated;

(iii) Discuss the relevant authorities that support the position asserted, including rulings, regulations, interpretations, and previous decisions issued by DOE; and

(iv) Furnish full and complete answers to any questions set forth in the preliminary notice.

(2) Copies of all relevant documents must be submitted with the reply.

(d) If a contractor fails to submit a written reply within 30 calendar days of receipt of a PNOV:

§ 851.43

(1) The contractor relinquishes any right to appeal any matter in the preliminary notice; and

(2) The preliminary notice, including any proposed remedies therein, constitutes a final order.

(e) A copy of the PNOV must be prominently posted, once final, at or near the location where the violation occurred until the violation is corrected.

§ 851.43 Final notice of violation.

(a) If a contractor submits a written reply within 30 calendar days of receipt of a preliminary notice of violation (PNOV), that presents a disagreement with any aspect of the PNOV and civil penalty, the Director must review the submitted reply and make a final determination whether the contractor violated or is continuing to violate a requirement of this part.

(b) Based on a determination by the Director that a contractor has violated or is continuing to violate a requirement of this part, the Director may issue to the contractor a final notice of violation that states concisely the determined violation and any remedy, including the amount of any civil penalty imposed on the contractor. The final notice of violation must state that the contractor may petition the Office of Hearings and Appeals for review of the final notice in accordance with 10 CFR part 1003, subpart G.

(c) If a contractor fails to submit a petition for review to the Office of Hearings and Appeals within 30 calendar days of receipt of a final notice of violation pursuant to § 851.42:

(1) The contractor relinquishes any right to appeal any matter in the final notice; and

(2) The final notice, including any remedies therein, constitutes a final order.

§ 851.44 Administrative appeal.

(a) Any contractor that receives a final notice of violation may petition the Office of Hearings and Appeals for review of the final notice in accordance with part 1003, subpart G of this title, within 30 calendar days from receipt of the final notice.

(b) In order to exhaust administrative remedies with respect to a final

10 CFR Ch. III (1–1–16 Edition)

notice of violation, the contractor must petition the Office of Hearings and Appeals for review in accordance with paragraph (a) of this section.

§ 851.45 Direction to NNSA contractors.

(a) Notwithstanding any other provision of this part, the NNSA Administrator, rather than the Director, signs, issues and serves the following actions that direct NNSA contractors:

(1) Subpoenas;

(2) Orders to compel attendance;

(3) Disclosures of information or documents obtained during an investigation or inspection;

(4) Preliminary notices of violations; and

(5) Final notices of violations.

(b) The NNSA Administrator shall act after consideration of the Director's recommendation.

APPENDIX A TO PART 851—WORKER SAFETY AND HEALTH FUNCTIONAL AREAS

This appendix establishes the mandatory requirements for implementing the applicable functional areas required by § 851.24.

1. CONSTRUCTION SAFETY

(a) For each separately definable construction activity (e.g., excavations, foundations, structural steel, roofing) the construction contractor must:

(1) Prepare and have approved by the construction manager an activity hazard analysis prior to commencement of affected work. Such analyses must:

(i) Identify foreseeable hazards and planned protective measures;

(ii) Address further hazards revealed by supplemental site information (e.g., site characterization data, as-built drawings) provided by the construction manager;

(iii) Provide drawings and/or other documentation of protective measures for which applicable Occupational Safety and Health Administration (OSHA) standards require preparation by a Professional Engineer or other qualified professional, and

(iv) Identify competent persons required for workplace inspections of the construction activity, where required by OSHA standards.

(2) Ensure workers are aware of foreseeable hazards and the protective measures described within the activity analysis prior to beginning work on the affected activity.

(3) Require that workers acknowledge being informed of the hazards and protective

measures associated with assigned work activities. Those workers failing to utilize appropriate protective measures must be subject to the construction contractor's disciplinary process.

(b) During periods of active construction (*i.e.*, excluding weekends, weather delays, or other periods of work inactivity), the construction contractor must have a designated representative on the construction worksite who is knowledgeable of the project's hazards and has full authority to act on behalf of the construction contractor. The contractor's designated representative must make frequent and regular inspections of the construction worksite to identify and correct any instances of noncompliance with project safety and health requirements.

(c) Workers must be instructed to report to the construction contractor's designated representative, hazards not previously identified or evaluated. If immediate corrective action is not possible or the hazard falls outside of project scope, the construction contractor must immediately notify affected workers, post appropriate warning signs, implement needed interim control measures, and notify the construction manager of the action taken. The contractor or the designated representative must stop work in the affected area until appropriate protective measures are established.

(d) The construction contractor must prepare a written construction project safety and health plan to implement the requirements of this section and obtain approval of the plan by the construction manager prior to commencement of any work covered by the plan. In the plan, the contractor must designate the individual(s) responsible for on-site implementation of the plan, specify qualifications for those individuals, and provide a list of those project activities for which subsequent hazard analyses are to be performed. The level of detail within the construction project safety and health plan should be commensurate with the size, complexity and risk level of the construction project. The content of this plan need not duplicate those provisions that were previously submitted and approved as required by §851.11.

2. FIRE PROTECTION

(a) Contractors must implement a comprehensive fire safety and emergency response program to protect workers commensurate with the nature of the work that is performed. This includes appropriate facility and site-wide fire protection, fire alarm notification and egress features, and access to a fully staffed, trained, and equipped emergency response organization that is capable of responding in a timely and effective manner to site emergencies.

(b) An acceptable fire protection program must include those fire protection criteria

and procedures, analyses, hardware and systems, apparatus and equipment, and personnel that would comprehensively ensure that the objective in paragraph 2(a) of this section is met. This includes meeting applicable building codes and National Fire Protection Association codes and standards.

3. EXPLOSIVES SAFETY

(a) Contractors responsible for the use of explosive materials must establish and implement a comprehensive explosives safety program.

(b) Contractors must comply with the policy and requirements specified in the DOE Manual 440.1-1A, DOE Explosives Safety Manual, Contractor Requirements Document (Attachment 2), January 9, 2006 (incorporated by reference, see §851.27). A Contractor may choose a successor version, if approved by DOE.

(c) Contractors must determine the applicability of the explosives safety directive requirements to research and development laboratory type operations consistent with the DOE level of protection criteria described in the explosives safety directive.

4. PRESSURE SAFETY

(a) Contractors must establish safety policies and procedures to ensure that pressure systems are designed, fabricated, tested, inspected, maintained, repaired, and operated by trained and qualified personnel in accordance with applicable and sound engineering principles.

(b) Contractors must ensure that all pressure vessels, boilers, air receivers, and supporting piping systems conform to:

(1) The applicable American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code (2004); sections I through section XII including applicable Code Cases (incorporated by reference, see §851.27)

(2) The applicable ASME B31 (Code for Pressure Piping) standards as indicated below; and or as indicated in paragraph (b)(3) of this section:

(i) B31.1—2001—Power Piping, and B31.1a—2002—Addenda to ASME B31.1—2001 (incorporated by reference, see §851.27);

(ii) B31.2—1968—Fuel Gas Piping (incorporated by reference, see §851.27);

(iii) B31.3—2002—Process Piping (incorporated by reference, see §851.27);

(iv) B31.4—2002—Pipeline Transportation Systems for Liquid Hydrocarbons and Other Liquids (incorporated by reference, see §851.27);

(v) B31.5—2001—Refrigeration Piping and Heat Transfer Components, and B31.5a—2004, Addenda to ASME B31.5—2001 (incorporated by reference, see §851.27);

(vi) B31.8—2003—Gas Transmission and Distribution Piping Systems (incorporated by reference, see §851.27);

(vii) B31.8S—2001—Managing System Integrity of Gas Pipelines (incorporated by reference, see §851.27);

(viii) B31.9—1996—Building Services Piping (incorporated by reference, see §851.27);

(ix) B31.11—2002—Slurry Transportation Piping Systems (incorporated by reference, see §851.27); and

(x) B31G—1991—Manual for Determining Remaining Strength of Corroded Pipelines (incorporated by reference, see §851.27).

(3) The strictest applicable state and local codes.

(c) When national consensus codes are not applicable (because of pressure range, vessel geometry, use of special materials, etc.), contractors must implement measures to provide equivalent protection and ensure a level of safety greater than or equal to the level of protection afforded by the ASME or applicable state or local code. Measures must include the following:

(1) Design drawings, sketches, and calculations must be reviewed and approved by a qualified independent design professional (*i.e.*, professional engineer). Documented organizational peer review is acceptable.

(2) Qualified personnel must be used to perform examinations and inspections of materials, in-process fabrications, non-destructive tests, and acceptance test.

(3) Documentation, traceability, and accountability must be maintained for each unique pressure vessel or system, including descriptions of design, pressure conditions, testing, inspection, operation, repair, and maintenance.

5. FIREARMS SAFETY

(a) A contractor engaged in DOE activities involving the use of firearms must establish firearms safety policies and procedures for security operations, and training to ensure proper accident prevention controls are in place.

(1) Written procedures must address firearms safety, engineering and administrative controls, as well as personal protective equipment requirements.

(2) As a minimum, procedures must be established for:

(i) Storage, handling, cleaning, inventory, and maintenance of firearms and associated ammunition;

(ii) Activities such as loading, unloading, and exchanging firearms. These procedures must address use of bullet containment devices and those techniques to be used when no bullet containment device is available;

(iii) Use and storage of pyrotechnics, explosives, and/or explosive projectiles;

(iv) Handling misfires, duds, and unauthorized discharges;

(v) Live fire training, qualification, and evaluation activities;

(vi) Training and exercises using engagement simulation systems;

(vii) Medical response at firearms training facilities; and

(viii) Use of firing ranges by personnel other than DOE or DOE contractor protective forces personnel.

(b) Contractors must ensure that personnel responsible for the direction and operation of the firearms safety program are professionally qualified and have sufficient time and authority to implement the procedures under this section.

(c) Contractors must ensure that firearms instructors and armorers have been certified by the Safeguards and Security National Training Center to conduct the level of activity provided. Personnel must not be allowed to conduct activities for which they have not been certified.

(d) Contractors must conduct formal appraisals assessing implementation of procedures, personnel responsibilities, and duty assignments to ensure overall policy objectives and performance criteria are being met by qualified personnel.

(e) Contractors must implement procedures related to firearms training, live fire range safety, qualification, and evaluation activities, including procedures requiring that:

(1) Personnel must successfully complete initial firearms safety training before being issued any firearms. Authorization to remain in armed status will continue only if the employee demonstrates the technical and practical knowledge of firearms safety semi-annually;

(2) Authorized armed personnel must demonstrate through documented limited scope performance tests both technical and practical knowledge of firearms handling and safety on a semi-annual basis;

(3) All firearms training lesson plans must incorporate safety for all aspects of firearms training task performance standards. The lesson plans must follow the standards set forth by the Safeguards and Security Central Training Academy's standard training programs;

(4) Firearms safety briefings must immediately precede training, qualifications, and evaluation activities involving live fire and/or engagement simulation systems;

(5) A safety analysis approved by the Head of DOE Field Element must be developed for the facilities and operation of each live fire range prior to implementation of any new training, qualification, or evaluation activity. Results of these analyses must be incorporated into procedures, lesson plans, exercise plans, and limited scope performance tests;

(6) Firing range safety procedures must be conspicuously posted at all range facilities; and

(7) Live fire ranges, approved by the Head of DOE Field Element, must be properly sited to protect personnel on the range, as

Department of Energy

Pt. 851, App. A

well as personnel and property not associated with the range.

(f) Contractors must ensure that the transportation, handling, placarding, and storage of munitions conform to the applicable DOE requirements.

6. INDUSTRIAL HYGIENE

Contractors must implement a comprehensive industrial hygiene program that includes at least the following elements:

(a) Initial or baseline surveys and periodic resurveys and/or exposure monitoring as appropriate of all work areas or operations to identify and evaluate potential worker health risks;

(b) Coordination with planning and design personnel to anticipate and control health hazards that proposed facilities and operations would introduce;

(c) Coordination with cognizant occupational medical, environmental, health physics, and work planning professionals;

(d) Policies and procedures to mitigate the risk from identified and potential occupational carcinogens;

(e) Professionally and technically qualified industrial hygienists to manage and implement the industrial hygiene program; and

(f) Use of respiratory protection equipment tested under the DOE Respirator Acceptance Program for Supplied-air Suits (DOE-Technical Standard-1167-2003) when National Institute for Occupational Safety and Health-approved respiratory protection does not exist for DOE tasks that require such equipment. For security operations conducted in accordance with Presidential Decision Directive 39, U.S. POLICY ON COUNTER TERRORISM, use of Department of Defense military type masks for respiratory protection by security personnel is acceptable.

7. BIOLOGICAL SAFETY

(a) Contractors must establish and implement a biological safety program that:

(1) Establishes an Institutional Biosafety Committee (IBC) or equivalent. The IBC must:

(i) Review any work with biological etiologic agents for compliance with applicable Centers for Disease Control and Prevention (CDC), National Institutes of Health (NIH), World Health Organization (WHO), United States Department of Agriculture Animal and Plant Health Inspection Service (USDA/APHIS), and other international, Federal, State, and local guidelines and assess the containment level, facilities, procedures, practices, and training and expertise of personnel; and

(ii) Review the site's security, safeguards, and emergency management plans and procedures to ensure they adequately consider work involving biological etiologic agents.

(2) Maintains an inventory and status of biological etiologic agents, and provide to the responsible field and area office, through the laboratory IBC (or its equivalent), an annual status report describing the status and inventory of biological etiologic agents and the biological safety program.

(3) Provides for submission to the appropriate Head of DOE Field Element, for review and concurrence before transmittal to the Federal Select Agent Program, each Laboratory Registration/Select Agent Program registration application package (APHIS/CDC Form 1, Application for Registration for Possession, Use, and Transfer of Select Agents and Toxins) requesting registration of (or amendment to a previously approved registration) a laboratory facility for the purpose of possessing, using, or transferring biological select agents and/or toxins.

(4) Provides for submission to the appropriate Head of DOE Field Element, a copy of each APHIS/CDC Form 2, Request to Transfer Select Agents and Toxins, upon initial submission of APHIS/CDC Form 2 to a vendor or other supplier requesting or ordering a biological select agent or toxin for transfer, receipt, and handling in the registered facility; and submission to the appropriate Head of DOE Field Element the completed copy of the APHIS/CDC Form 2, documenting final disposition and/or destruction of the select agent or toxin, within 10 days of completion of the APHIS/CDC Form 2.

(5) Confirms that the site safeguards and security plans and emergency management programs address biological etiologic agents, with particular emphasis on biological select agents.

(6) Establishes an immunization policy for personnel working with biological etiologic agents based on the evaluation of risk and benefit of immunization.

(b) [Reserved]

8. OCCUPATIONAL MEDICINE

(a) Contractors must establish and provide comprehensive occupational medicine services to workers employed at a covered work place who:

(1) Work on a DOE site for more than 30 days in a 12-month period; or

(2) Are enrolled for any length of time in a medical or exposure monitoring program required by this rule and/or any other applicable Federal, State or local regulation, or other obligation.

(b) The occupational medicine services must be under the direction of a graduate of a school of medicine or osteopathy who is licensed for the practice of medicine in the state in which the site is located.

(c) Occupational medical physicians, occupational health nurses, physician's assistants, nurse practitioners, psychologists, employee assistance counselors, and other occupational health personnel providing occupational medicine services must be licensed, registered, or certified as required by Federal or State law where employed.

(d) Contractors must provide the occupational medicine providers access to hazard information by promoting its communication, coordination, and sharing among operating and environment, safety, and health protection organizations.

(1) Contractors must provide the occupational medicine providers with access to information on the following:

(i) Current information about actual or potential work-related site hazards (chemical, radiological, physical, biological, or ergonomic);

(ii) Employee job-task and hazard analysis information, including essential job functions;

(iii) Actual or potential work-site exposures of each employee; and

(iv) Personnel actions resulting in a change of job functions, hazards or exposures.

(2) Contractors must notify the occupational medicine providers when an employee has been absent because of an injury or illness for more than 5 consecutive workdays (or an equivalent time period for those individuals on an alternative work schedule);

(3) Contractors must provide the occupational medicine provider information on, and the opportunity to participate in, worker safety and health team meetings and committees;

(4) Contractors must provide occupational medicine providers access to the workplace for evaluation of job conditions and issues relating to workers' health.

(e) A designated occupational medicine provider must:

(1) Plan and implement the occupation medicine services; and

(2) Participate in worker protection teams to build and maintain necessary partnerships among workers, their representatives, managers, and safety and health protection specialists in establishing and maintaining a safe and healthful workplace.

(f) A record, containing any medical, health history, exposure history, and demographic data collected for the occupational medicine purposes, must be developed and maintained for each employee for whom medical services are provided. All occupational medical records must be maintained in accordance with Executive Order 13335, Incentives for the Use of Health Information Technology.

(1) Employee medical, psychological, and employee assistance program (EAP) records must be kept confidential, protected from

unauthorized access, and stored under conditions that ensure their long-term preservation. Psychological records must be maintained separately from medical records and in the custody of the designated psychologist in accordance with 10 CFR 712.38(b)(2).

(2) Access to these records must be provided in accordance with DOE regulations implementing the Privacy Act and the Energy Employees Occupational Illness Compensation Program Act.

(g) The occupational medicine services provider must determine the content of the worker health evaluations, which must be conducted under the direction of a licensed physician, in accordance with current sound and acceptable medical practices and all pertinent statutory and regulatory requirements, such as the Americans with Disabilities Act.

(1) Workers must be informed of the purpose and nature of the medical evaluations and tests offered by the occupational medicine provider.

(i) The purpose, nature and results of evaluations and tests must be clearly communicated verbally and in writing to each worker provided testing;

(ii) The communication must be documented in the worker's medical record; and

(2) The following health evaluations must be conducted when determined necessary by the occupational medicine provider for the purpose of providing initial and continuing assessment of employee fitness for duty.

(i) At the time of employment entrance or transfer to a job with new functions and hazards, a medical placement evaluation of the individual's general health and physical and psychological capacity to perform work will establish a baseline record of physical condition and assure fitness for duty.

(ii) Periodic, hazard-based medical monitoring or qualification-based fitness for duty evaluations required by regulations and standards, or as recommended by the occupational medicine services provider, will be provided on the frequency required.

(iii) Diagnostic examinations will evaluate employee's injuries and illnesses to determine work-relatedness, the applicability of medical restrictions, and referral for definitive care, as appropriate.

(iv) After a work-related injury or illness or an absence due to any injury or illness lasting 5 or more consecutive workdays (or an equivalent time period for those individuals on an alternative work schedule), a return to work evaluation will determine the individual's physical and psychological capacity to perform work and return to duty.

(v) At the time of separation from employment, individuals shall be offered a general health evaluation to establish a record of physical condition.

(h) The occupational medicine provider must monitor ill and injured workers to facilitate their rehabilitation and safe return to work and to minimize lost time and its associated costs.

(1) The occupational medicine provider must place an individual under medical restrictions when health evaluations indicate that the worker should not perform certain job tasks. The occupational medicine provider must notify the worker and contractor management when employee work restrictions are imposed or removed.

(i) Occupational medicine provider physician and medical staff must, on a timely basis, communicate results of health evaluations to management and safety and health protection specialists to facilitate the mitigation of worksite hazards.

(j) The occupational medicine provider must include measures to identify and manage the principal preventable causes of premature morbidity and mortality affecting worker health and productivity.

(1) The contractor must include programs to prevent and manage these causes of morbidity when evaluations demonstrate their cost effectiveness.

(2) Contractors must make available to the occupational medicine provider appropriate access to information from health, disability, and other insurance plans (de-identified as necessary) in order to facilitate this process.

(k) The occupational medicine services provider must review and approve the medical and behavioral aspects of employee counseling and health promotional programs, including the following types:

(1) Contractor-sponsored or contractor-supported EAPs;

(2) Contractor-sponsored or contractor-supported alcohol and other substance abuse rehabilitation programs; and

(3) Contractor-sponsored or contractor-supported wellness programs.

(4) The occupational medicine services provider must review the medical aspects of immunization programs, blood-borne pathogens programs, and bio-hazardous waste programs to evaluate their conformance to applicable guidelines.

(5) The occupational medicine services provider must develop and periodically review medical emergency response procedures included in site emergency and disaster preparedness plans. The medical emergency responses must be integrated with nearby community emergency and disaster plans.

9. MOTOR VEHICLE SAFETY

(a) Contractors must implement a motor vehicle safety program to protect the safety and health of all drivers and passengers in Government-owned or -leased motor vehicles and powered industrial equipment (*i.e.*, fork trucks, tractors, platform lift trucks, and

other similar specialized equipment powered by an electric motor or an internal combustion engine).

(b) The contractor must tailor the motor vehicle safety program to the individual DOE site or facility, based on an analysis of the needs of that particular site or facility.

(c) The motor vehicle safety program must address, as applicable to the contractor's operations:

(1) Minimum licensing requirements (including appropriate testing and medical qualification) for personnel operating motor vehicles and powered industrial equipment;

(2) Requirements for the use of seat belts and provision of other safety devices;

(3) Training for specialty vehicle operators;

(4) Requirements for motor vehicle maintenance and inspection;

(5) Uniform traffic and pedestrian control devices and road signs;

(6) On-site speed limits and other traffic rules;

(7) Awareness campaigns and incentive programs to encourage safe driving; and

(8) Enforcement provisions.

10. ELECTRICAL SAFETY

Contractors must implement a comprehensive electrical safety program appropriate for the activities at their site. This program must meet the applicable electrical safety codes and standards referenced in §851.23.

11. NANOTECHNOLOGY SAFETY—RESERVED

The Department has chosen to reserve this section since policy and procedures for nanotechnology safety are currently being developed. Once these policies and procedures have been approved, the rule will be amended to include them through a rulemaking consistent with the Administrative Procedure Act.

12. WORKPLACE VIOLENCE PREVENTION—RESERVED

The Department has chosen to reserve this section since the policy and procedures for workplace violence prevention are currently being developed. Once these policies and procedures have been approved, the rule will be amended to include them through a rulemaking consistent with the Administrative Procedure Act.

[71 FR 6931, Feb. 9, 2006; 71 FR 36661, June 28, 2006; 80 FR 69566, Nov. 10, 2015]

APPENDIX B TO PART 851—GENERAL STATEMENT OF ENFORCEMENT POLICY

I. INTRODUCTION

(a) This policy statement sets forth the general framework through which the U.S.

Department of Energy (DOE) will seek to ensure compliance with its worker safety and health regulations, and, in particular, exercise the civil penalty authority provided to DOE in section 3173 of Public Law 107–314, Bob Stump National Defense Authorization Act for Fiscal Year 2003 (December 2, 2002) (“NDAA”), amending the Atomic Energy Act (AEA) to add section 234C. The policy set forth herein is applicable to violations of safety and health regulations in this part by DOE contractors, including DOE contractors who are indemnified under the Price-Anderson Act, 42 U.S.C. 2210(d), and their subcontractors and suppliers (hereafter collectively referred to as DOE contractors). This policy statement is not a regulation and is intended only to provide general guidance to those persons subject to the regulations in this part. It is not intended to establish a “cookbook” approach to the initiation and resolution of situations involving non-compliance with the regulations in this part. Rather, DOE intends to consider the particular facts of each noncompliance in determining whether enforcement sanctions are appropriate and, if so, the appropriate magnitude of those sanctions. DOE may well deviate from this policy statement when appropriate in the circumstances of particular cases. This policy statement is not applicable to activities and facilities covered under E.O. 12344, 42 U.S.C. 7158 note, pertaining to Naval Nuclear Propulsion, or otherwise excluded from the scope of the rule.

(b) The DOE goal in the compliance arena is to enhance and protect the safety and health of workers at DOE facilities by fostering a culture among both the DOE line organizations and the contractors that actively seeks to attain and sustain compliance with the regulations in this part. The enforcement program and policy have been developed with the express purpose of achieving safety inquisitiveness and voluntary compliance. DOE will establish effective administrative processes and positive incentives to the contractors for the open and prompt identification and reporting of noncompliances, performance of effective root cause analysis, and initiation of comprehensive corrective actions to resolve both noncompliance conditions and program or process deficiencies that led to noncompliance.

(c) In the development of the DOE enforcement policy, DOE recognizes that the reasonable exercise of its enforcement authority can help to reduce the likelihood of serious incidents. This can be accomplished by placing greater emphasis on a culture of safety in existing DOE operations, and strong incentives for contractors to identify and correct noncompliance conditions and processes in order to protect human health and the environment. DOE wants to facilitate, encourage, and support contractor ini-

tiatives for the prompt identification and correction of noncompliances. DOE will give due consideration to such initiatives and activities in exercising its enforcement discretion.

(d) DOE may modify or remit civil penalties in a manner consistent with the adjustment factors set forth in this policy with or without conditions. DOE will carefully consider the facts of each case of noncompliance and will exercise appropriate discretion in taking any enforcement action. Part of the function of a sound enforcement program is to assure a proper and continuing level of safety vigilance. The reasonable exercise of enforcement authority will be facilitated by the appropriate application of safety requirements to DOE facilities and by promoting and coordinating the proper contractor and DOE safety compliance attitude toward those requirements.

II. PURPOSE

The purpose of the DOE enforcement program is to promote and protect the safety and health of workers at DOE facilities by:

- (a) Ensuring compliance by DOE contractors with the regulations in this part.
- (b) Providing positive incentives for DOE contractors based on:
 - (1) Timely self-identification of worker safety noncompliances;
 - (2) Prompt and complete reporting of such noncompliances to DOE;
 - (3) Prompt correction of safety noncompliances in a manner that precludes recurrence; and
 - (4) Identification of modifications in practices or facilities that can improve worker safety and health.
- (c) Deterring future violations of DOE requirements by a DOE contractor.
- (d) Encouraging the continuous overall improvement of operations at DOE facilities.

III. STATUTORY AUTHORITY

The Department of Energy Organization Act, 42 U.S.C. 7101–7385o, the Energy Reorganization Act of 1974 (ERA), 42 U.S.C. 5801–5911, and the Atomic Energy Act of 1954, as amended, (AEA) 42 U.S.C. 2011, require DOE to protect the public safety and health, as well as the safety and health of workers at DOE facilities, in conducting its activities, and grant DOE broad authority to achieve this goal. Section 234C of the AEA makes DOE contractors (and their subcontractors and suppliers thereto) covered by the DOE Price-Anderson indemnification system, subject to civil penalties for violations of the worker safety and health requirements promulgated in this part. 42 U.S.C. 2282c.

IV. RESPONSIBILITIES

(a) The Director, as the principal enforcement officer of the DOE, has been delegated the authority to:

- (1) Conduct enforcement inspections, investigations, and conferences;
- (2) Issue Notices of Violations and proposed civil penalties, Enforcement Letters, Consent Orders, and subpoenas; and
- (3) Issue orders to compel attendance and disclosure of information or documents obtained during an investigation or inspection. The Secretary issues Compliance Orders.

(b) The NNSA Administrator, rather than the Director, signs, issues and serves the following actions that direct NNSA contractors:

- (1) Subpoenas;
- (2) Orders to compel attendance; and
- (3) Determines to disclose information or documents obtained during an investigation or inspection, PNOVs, Notices of Violations, and Final Notices of Violations. The NNSA Administrator acts after consideration of the Director's recommendation.

V. PROCEDURAL FRAMEWORK

(a) Title 10 CFR part 851 sets forth the procedures DOE will use in exercising its enforcement authority, including the issuance of Notices of Violation and the resolution of an administrative appeal in the event a DOE contractor elects to petition the Office of Hearings and Appeals for review.

(b) Pursuant to 10 CFR part 851 subpart E, the Director initiates the enforcement process by initiating and conducting investigations and inspections and issuing a Preliminary Notice of Violation (PNOV) with or without a proposed civil penalty. The DOE contractor is required to respond in writing to the PNOV within 30 days, either: (1) Admitting the violation and waiving its right to contest the proposed civil penalty and paying it; (2) admitting the violation but asserting the existence of mitigating circumstances that warrant either the total or partial remission of the civil penalty; or (3) denying that the violation has occurred and providing the basis for its belief that the PNOV is incorrect. After evaluation of the DOE contractor's response, the Director may determine: (1) That no violation has occurred; (2) that the violation occurred as alleged in the PNOV but that the proposed civil penalty should be remitted in whole or in part; or (3) that the violation occurred as alleged in the PNOV and that the proposed civil penalty is appropriate, notwithstanding the asserted mitigating circumstances. In the latter two instances, the Director will issue a Final Notice of Violation (FNOV) or an FNOV and proposed civil penalty.

(c) An opportunity to challenge an FNOV is provided in administrative appeal provisions. See 10 CFR 851.44. Any contractor that

receives an FNOV may petition the Office of Hearings and Appeals for review of the final notice in accordance with 10 CFR part 1003, Subpart G, within 30 calendar days from receipt of the final notice. An administrative appeal proceeding is not initiated until the DOE contractor against which an FNOV has been issued requests an administrative hearing rather than waiving its right to contest the FNOV and proposed civil penalty, if any, and paying the civil penalty. However, it should be emphasized that DOE encourages the voluntary resolution of a noncompliance situation at any time, either informally prior to the initiation of the enforcement process or by consent order before or after any formal proceeding has begun.

VI. SEVERITY OF VIOLATIONS

(a) Violations of the worker safety and health requirements in this part have varying degrees of safety and health significance. Therefore, the relative safety and health risk of each violation must be identified as the first step in the enforcement process. Violations of the worker safety and health requirements are categorized in two levels of severity to identify their relative seriousness. Notices of Violation issued for non-compliance when appropriate, propose civil penalties commensurate with the severity level of the violations involved.

(b) To assess the potential safety and health impact of a particular violation, DOE will categorize the potential severity of violations of worker safety and health requirements as follows:

(1) A Severity Level I violation is a serious violation. A serious violation shall be deemed to exist in a place of employment if there is a potential that death or serious physical harm could result from a condition which exists, or from one or more practices, means, methods, operations, or processes which have been adopted or are in use, in such place of employment. A Severity Level I violation would be subject to a base civil penalty of up to 100% of the maximum base civil penalty of \$80,000.

(2) A Severity Level II violation is an other-than-serious violation. An other-than-serious violation occurs where the most serious injury or illness that would potentially result from a hazardous condition cannot reasonably be predicted to cause death or serious physical harm to employees but does have a direct relationship to their safety and health. A Severity Level II violation would be subject to a base civil penalty up to 50% of the maximum base civil penalty (\$40,000).

(c) De minimis violations, defined as a deviation from the requirement of a standard that has no direct or immediate relationship to safety or health, will not be the subject of formal enforcement action through the issuance of a Notice of Violation.

VII. ENFORCEMENT CONFERENCES

(a) The purpose of the enforcement conference is to:

(1) Assure the accuracy of the facts upon which the preliminary determination to consider enforcement action is based;

(2) Discuss the potential or alleged violations, their significance and causes, and the nature of and schedule for the DOE contractor's corrective actions;

(3) Determine whether there are any aggravating or mitigating circumstances; and

(4) Obtain other information which will help determine whether enforcement action is appropriate and, if so, the extent of that enforcement action.

(b) All enforcement conferences are convened at the discretion of the Director.

(c) The PNOV will normally be issued promptly, before the opportunity for an enforcement conference, following the inspection/investigation. In some cases an enforcement conference may be conducted onsite at the conclusion of an inspection/investigation.

(d) The contractor may request an enforcement conference if they believe additional information pertinent to the enforcement action could best be conveyed through a meeting.

(e) DOE contractors will be informed prior to a meeting when that meeting is considered to be an enforcement conference. Such conferences are informal mechanisms for candid discussions regarding potential or alleged violations and will not normally be open to the public. In circumstances for which immediate enforcement action is necessary in the interest of worker safety and health, such action will be taken prior to the enforcement conference, which may still be held after the necessary DOE action has been taken.

VIII. ENFORCEMENT LETTER

(a) In cases where DOE has decided not to conduct an investigation or inspection or issue a Preliminary Notice of Violation (PNOV), DOE may send an Enforcement Letter, signed by the Director to the contractor. The Enforcement Letter is intended to communicate the basis of the decision not to pursue enforcement action for a noncompliance. The Enforcement Letter is intended to direct contractors to the desired level of worker safety and health performance. It may be used when DOE concludes that the specific noncompliance at issue is not of the level of significance warranted to conduct an investigation or inspection or for issuance of a PNOV. Even where a noncompliance may be significant, the Enforcement Letter may recognize that the contractor's actions may have attenuated the need for enforcement action. The Enforcement Letter will typically recognize how the contractor handled

the circumstances surrounding the non-compliance, address additional areas requiring the contractor's attention, and address DOE's expectations for corrective action.

(b) In general, Enforcement Letters communicate DOE's expectations with respect to any aspect of the requirements of this part, including identification and reporting of issues, corrective actions, and implementation of the contractor's safety and health program. DOE might, for example, wish to recognize some action of the contractor that is of particular benefit to worker safety and health that is a candidate for emulation by other contractors. On the other hand, DOE may wish to bring a program shortcoming to the attention of the contractor that, but for the lack of worker safety and health significance of the immediate issue, might have resulted in the issuance of a PNOV. An Enforcement Letter is not an enforcement action.

(c) With respect to many noncompliances, an Enforcement Letter may not be required. When DOE decides that a contractor has appropriately corrected a noncompliance or that the significance of the noncompliance is sufficiently low, it may close out its review simply through an annotation in the DOE Noncompliance Tracking System (NTS). A closeout of a noncompliance with or without an Enforcement Letter may only take place after DOE has confirmed that corrective actions have been completed.

IX. ENFORCEMENT ACTIONS

(a) This section describes the enforcement sanctions available to DOE and specifies the conditions under which each may be used. The basic sanctions are Notices of Violation and civil penalties.

(b) The nature and extent of the enforcement action is intended to reflect the seriousness of the violation. For the vast majority of violations for which DOE assigns severity levels as described previously, a Notice of Violation will be issued, requiring a formal response from the recipient describing the nature of and schedule for corrective actions it intends to take regarding the violation.

1. Notice of Violation

(a) A Notice of Violation (either a Preliminary or Final Notice) is a document setting forth the conclusion of DOE and the basis to support the conclusion, that one or more violations of the worker safety and health requirements have occurred. Such a notice normally requires the recipient to provide a written response which may take one of several positions described in section V of this policy statement. In the event that the recipient concedes the occurrence of the violation, it is required to describe corrective steps which have been taken and the results

achieved; remedial actions which will be taken to prevent recurrence; and the date by which full compliance will be achieved.

(b) DOE will use the Notice of Violation as the standard method for formalizing the existence of a violation and, in appropriate cases as described in this section, the Notice of Violation will be issued in conjunction with the proposed imposition of a civil penalty. In certain limited instances, as described in this section, DOE may refrain from the issuance of an otherwise appropriate Notice of Violation. However, a Notice of Violation will virtually always be issued for willful violations, or if past corrective actions for similar violations have not been sufficient to prevent recurrence and there are no other mitigating circumstances.

(c) DOE contractors are not ordinarily cited for violations resulting from matters not within their control, such as equipment failures that were not avoidable by reasonable quality assurance measures, proper maintenance, or management controls. With regard to the issue of funding, however, DOE does not consider an asserted lack of funding to be a justification for noncompliance with the worker safety and health requirements.

(d) DOE expects its contractors to have the proper management and supervisory systems in place to assure that all activities at covered workplaces, regardless of who performs them, are carried out in compliance with all the worker safety and health requirements. Therefore, contractors are normally held responsible for the acts of their employees and subcontractor employees in the conduct of activities at covered workplaces. Accordingly, this policy should not be construed to excuse personnel errors.

(e) The limitations on remedies under section 234C will be implemented as follows:

(1) DOE may assess civil penalties of up to \$80,000 per violation per day on contractors (and their subcontractors and suppliers) that are indemnified by the Price-Anderson Act, 42 U.S.C. 2210(d). See 10 CFR 851.5(a).

(2) DOE may seek contract fee reductions through the contract's *Conditional Payment of Fee* Clause in the Department of Energy Acquisition Regulation (DEAR). See 10 CFR 851.4(b); 48 CFR parts 923, 952, 970. Policies for contract fee reductions are not established by this policy statement. The Director and appropriate contracting officers will coordinate their efforts in compliance with the statute. See 10 CFR 851.5(b).

(3) For the same violation of a worker safety and health requirement in this part, DOE may pursue either civil penalties (for indemnified contractors and their subcontractors and suppliers) or a contract fee reduction, but not both. See 10 CFR 851.5(c).

(4) A ceiling applies to civil penalties assessed on certain contractors specifically listed in 170d. of the Atomic Energy Act, 42 U.S.C. 2282a(d), for activities conducted at

specified facilities. For these contractors, the total amount of civil penalties and contract penalties in a fiscal year may not exceed the total amount of fees paid by DOE to that entity in that fiscal year. See 10 CFR 851.5(d).

2. Civil Penalty

(a) A civil penalty is a monetary penalty that may be imposed for violations of requirements of this part. See 10 CFR 851.5(a). Civil penalties are designed to emphasize the need for lasting remedial action, deter future violations, and underscore the importance of DOE contractor self-identification, reporting, and correction of violations of the worker safety and health requirements in this part.

(b) Absent mitigating circumstances as described below, or circumstances otherwise warranting the exercise of enforcement discretion by DOE as described in this section, civil penalties will be proposed for Severity Level I and II violations.

(c) DOE will impose different base level penalties considering the severity level of the violation. Table A-1 shows the daily base civil penalties for the various categories of severity levels. However, as described below in section IX, paragraph b.3, the imposition of civil penalties will also take into account the gravity, circumstances, and extent of the violation or violations and, with respect to the violator, any history of prior similar violations and the degree of culpability and knowledge.

(d) Enforcement personnel will use risk-based criteria to assist the Director in determining appropriate civil penalties for violations found during investigations and inspections.

(e) Regarding the factor of ability of DOE contractors to pay the civil penalties, it is not DOE's intention that the economic impact of a civil penalty be such that it puts a DOE contractor out of business. Contract termination, rather than civil penalties, is used when the intent is to terminate these activities. The deterrent effect of civil penalties is best served when the amount of such penalties takes this factor into account. However, DOE will evaluate the relationship of affiliated entities to the contractor (such as parent corporations) when the contractor asserts that it cannot pay the proposed penalty.

(f) DOE will review each case on its own merits and adjust the base civil penalty values upward or downward. As indicated below, Table A-1 identifies the daily base civil penalty values for different severity levels. After considering all relevant circumstances, civil penalties may be adjusted up or down based on the mitigating or aggravating factors described later in this section. In no instance will a civil penalty for any one violation exceed the statutory limit of \$80,000 per

day. In cases where the DOE contractor had knowledge of a violation and has not reported it to DOE and taken corrective action despite an opportunity to do so, DOE will consider utilizing its per day civil penalty authority. Further, as described in this section, the duration of a violation will be taken into account in adjusting the base civil penalty.

TABLE A–1—SEVERITY LEVEL BASE CIVIL PENALTIES

Severity level	Base civil penalty amount (Percentage of maximum per violation per day)
I	100
II	50

3. Adjustment Factors

(a) DOE may reduce a penalty based on mitigating circumstances or increase a penalty based on aggravating circumstances. DOE’s enforcement program is not an end in itself, but a means to achieve compliance with the worker safety and health requirements in this part. Civil penalties are intended to emphasize the importance of compliance and to deter future violations. The single most important goal of the DOE enforcement program is to encourage early identification and reporting of violations of the worker safety and health requirements in this part by the DOE contractors themselves rather than by DOE, and the prompt correction of any violations so identified. DOE believes that DOE contractors are in the best position to identify and promptly correct noncompliance with the worker safety and health requirements in this part. DOE expects that these contractors should have in place internal compliance programs which will ensure the detection, reporting, and prompt correction of conditions that may constitute, or lead to, violations of the worker safety and health requirements in this part, before, rather than after, DOE has identified such violations. Thus, DOE contractors should almost always be aware of worker safety and health noncompliances before they are discovered by DOE. Obviously, worker safety and health is enhanced if non-compliances are discovered (and promptly corrected) by the DOE contractor, rather than by DOE, which may not otherwise become aware of a noncompliance until later, during the course of an inspection, performance assessment, or following an incident at the facility. Early identification of worker safety and health-related noncompliances by DOE contractors has the added benefit of allowing information that could prevent such noncompliances at other facilities in the

DOE complex to be shared with other appropriate DOE contractors.

(b) Pursuant to this enforcement philosophy, DOE will provide substantial incentive for the early self-identification, reporting, and prompt correction of conditions which constitute, or could lead to, violations of the worker safety and health requirements. Thus, the civil penalty may be reduced for violations that are identified, reported, and promptly and effectively corrected by the DOE contractor.

(c) On the other hand, ineffective programs for problem identification and correction are aggravating circumstances and may increase the penalty amount. Thus, for example, where a contractor fails to disclose and promptly correct violations of which it was aware or should have been aware, substantial civil penalties are warranted and may be sought, including the assessment of civil penalties for continuing violations on a per day basis.

(d) Further, in cases involving factors of willfulness, repeated violations, death, serious injury, patterns of systemic violations, DOE-identified flagrant violations, repeated poor performance in an area of concern, or serious breakdown in management controls, DOE intends to apply its full statutory enforcement authority where such action is warranted.

(e) Additionally, adjustment to the amount of civil penalty will be dependent, in part, on the degree of culpability of the DOE contractor with regard to the violation. Thus, inadvertent violations will be viewed differently from those in which there is gross negligence, deception, or willfulness. In addition to the severity of the underlying violation and level of culpability involved, DOE will also consider the position, training and experience of those involved in the violation. Thus, for example, a violation may be deemed to be more significant if a senior manager of an organization is involved rather than a foreman or non-supervisory employee.

(f) Other factors that will be considered in determining the civil penalty amount are the duration of the violation (how long the condition has presented a potential exposure to workers), the extent of the condition (number of instances of the violation), the frequency of the exposure (how often workers are exposed), the proximity of the workers to the exposure, and the past history of similar violations.

(g) DOE expects contractors to provide full, complete, timely, and accurate information and reports. Accordingly, the penalty amount for a violation involving either a failure to make a required report or notification to the DOE or an untimely report or notification, will be based upon the circumstances surrounding the matter that should have been reported. A contractor will

not normally be cited for a failure to report a condition or event unless the contractor was aware or should have been aware of the condition or event that it failed to report.

4. Identification and Reporting

Reduction of up to 50% of the base civil penalty shown in Table A-1 may be given when a DOE contractor identifies the violation and promptly reports the violation to the DOE. Consideration will be given to, among other things, the opportunity available to discover the violation, the ease of discovery and the promptness and completeness of any required report. No consideration will be given to a reduction in penalty if the DOE contractor does not take prompt action to report the problem to DOE upon discovery, or if the immediate actions necessary to restore compliance with the worker safety and health requirements are not taken.

5. Self-Identification and Tracking Systems

(a) DOE strongly encourages contractors to self-identify noncompliances with the worker safety and health requirements before the noncompliances lead to a string of similar and potentially more significant events or consequences. When a contractor identifies a noncompliance, DOE will normally allow a reduction in the amount of civil penalties, unless prior opportunities existed for contractors to identify the noncompliance. DOE will normally not allow a reduction in civil penalties for self-identification if significant DOE intervention was required to induce the contractor to report a noncompliance.

(b) Self-identification of a noncompliance is possibly the single most important factor in considering a reduction in the civil penalty amount. Consideration of self-identification is linked to, among other things, whether prior opportunities existed to discover the violation, and if so, the age and number of such opportunities; the extent to which proper contractor controls should have identified or prevented the violation; whether discovery of the violation resulted from a contractor's self-monitoring activity; the extent of DOE involvement in discovering the violation or in prompting the contractor to identify the violation; and the promptness and completeness of any required report. Self-identification is also considered by DOE in deciding whether to pursue an investigation.

(c) DOE will use the voluntary Noncompliance Tracking System (NTS) which allows contractors to elect to report noncompliances. In the guidance document supporting the NTS, DOE will establish reporting thresholds for reporting noncompliances of potentially greater worker safety and health significance into the NTS. Contractors are

expected, however, to use their own self-tracking systems to track noncompliances below the reporting threshold. This self-tracking is considered to be acceptable self-reporting as long as DOE has access to the contractor's system and the contractor's system notes the item as a noncompliance with a DOE safety and health requirement. For noncompliances that are below the NTS reportability thresholds, DOE will credit contractor self-tracking as representing self-reporting. If an item is not reported in NTS but only tracked in the contractor's system and DOE subsequently determines that the noncompliance was significantly mischaracterized, DOE will not credit the internal tracking as representing appropriate self-reporting.

6. Self-Disclosing Events

(a) DOE expects contractors to demonstrate acceptance of responsibility for worker safety and health by proactively identifying noncompliances. When the occurrence of an event discloses noncompliances that the contractor could have or should have identified before the event, DOE will not generally reduce civil penalties for self-identification, even if the underlying noncompliances were reported to DOE. In deciding whether to reduce any civil penalty proposed for violations revealed by the occurrence of a self-disclosing event, DOE will consider the ease with which a contractor could have discovered the noncompliance and the prior opportunities that existed to discover the noncompliance. If a contractor simply reacts to events that disclose potentially significant consequences or downplays noncompliances which did not result in significant consequences to worker safety and health, such contractor actions do not constitute the type of proactive behavior necessary to prevent significant events from occurring and thereby to improve worker safety and health.

(b) The key test is whether the contractor reasonably could have detected any of the underlying noncompliances that contributed to the event. Examples of events that provide opportunities to identify noncompliances include, but are not limited to:

(1) Prior notifications of potential problems such as those from DOE operational experience publications or vendor equipment deficiency reports;

(2) Normal surveillance, quality assurance performance assessments, and post-maintenance testing;

(3) Readily observable parameter trends; and

(4) Contractor employee or DOE observations of potential worker safety and health problems.

(c) Failure to utilize these types of events and activities to address noncompliances

may result in higher civil penalty assessments or a DOE decision not to reduce civil penalty amounts.

(d) Alternatively, if, following a self-disclosing event, DOE finds that the contractor's processes and procedures were adequate and the contractor's personnel generally behaved in a manner consistent with the contractor's processes and procedures, DOE could conclude that the contractor could not have been reasonably expected to find the single noncompliance that led to the event and thus, might allow a reduction in civil penalties.

7. Corrective Action To Prevent Recurrence

The promptness (or lack thereof) and extent to which the DOE contractor takes corrective action, including actions to identify root cause and prevent recurrence, may result in an increase or decrease in the base civil penalty shown in Table A-1. For example, appropriate corrective action may result in DOE's reducing the proposed civil penalty up to 50% from the base value shown in Table A-1. On the other hand, the civil penalty may be increased if initiation of corrective action is not prompt or if the corrective action is only minimally acceptable. In weighing this factor, consideration will be given to, among other things, the appropriateness, timeliness and degree of initiative associated with the corrective action. The comprehensiveness of the corrective action will also be considered, taking into account factors such as whether the action is focused narrowly to the specific violation or broadly to the general area of concern.

8. DOE's Contribution to a Violation

There may be circumstances in which a violation of a DOE worker safety and health requirement results, in part or entirely, from a direction given by DOE personnel to a DOE contractor to either take or forbear from taking an action at a DOE facility. In such cases, DOE may refrain from issuing an NOV, or may mitigate, either partially or entirely, any proposed civil penalty, provided that the direction upon which the DOE contractor relied is documented in writing, contemporaneously with the direction. It should be emphasized, however, that pursuant to 10 CFR 851.7, interpretative ruling of a requirement of this part must be issued in accordance with the provisions of 851.7 to be binding. Further, as discussed above in this policy statement, lack of funding by itself will not be considered as a mitigating factor in enforcement actions.

9. Exercise of Discretion

Because DOE wants to encourage and support DOE contractor initiative for prompt self-identification, reporting and correction

of noncompliances, DOE may exercise discretion as follows:

(a) In accordance with the previous discussion, DOE may refrain from issuing a civil penalty for a violation that meets all of the following criteria:

(1) The violation is promptly identified and reported to DOE before DOE learns of it or the violation is identified by a DOE independent assessment, inspection or other formal program effort.

(2) The violation is not willful or is not a violation that could reasonably be expected to have been prevented by the DOE contractor's corrective action for a previous violation.

(3) The DOE contractor, upon discovery of the violation, has taken or begun to take prompt and appropriate action to correct the violation.

(4) The DOE contractor has taken, or has agreed to take, remedial action satisfactory to DOE to preclude recurrence of the violation and the underlying conditions that caused it.

(b) DOE will not issue a Notice of Violation for cases in which the violation discovered by the DOE contractor cannot reasonably be linked to the conduct of that contractor in the design, construction or operation of the DOE facility involved, provided that prompt and appropriate action is taken by the DOE contractor upon identification of the past violation to report to DOE and remedy the problem.

(c) In situations where corrective actions have been completed before termination of an inspection or assessment, a formal response from the contractor is not required and the inspection report serves to document the violation and the corrective action. However, in all instances, the contractor is required to report the noncompliance through established reporting mechanisms so the noncompliance and any corrective actions can be properly tracked and monitored.

(d) If DOE initiates an enforcement action for a violation, and as part of the corrective action for that violation, the DOE contractor identifies other examples of the violation with the same root cause, DOE may refrain from initiating an additional enforcement action. In determining whether to exercise this discretion, DOE will consider whether the DOE contractor acted reasonably and in a timely manner appropriate to the severity of the initial violation, the comprehensiveness of the corrective action, whether the matter was reported, and whether the additional violation(s) substantially change the significance or character of the concern arising out of the initial violation.

(e) The preceding paragraphs are examples indicating when enforcement discretion may be exercised to forego the issuance of a civil penalty or, in some cases, the initiation of

any enforcement action at all. However, notwithstanding these examples, a civil penalty may be proposed or Notice of Violation issued when, in DOE's judgment, such action is warranted.

X. INACCURATE AND INCOMPLETE INFORMATION

(a) A violation of the worker safety and health requirements to provide complete and accurate information to DOE, 10 CFR 851.40, can result in the full range of enforcement sanctions, depending upon the circumstances of the particular case and consideration of the factors discussed in this section. Violations involving inaccurate or incomplete information or the failure to provide significant information identified by a DOE contractor normally will be categorized based on the guidance in section IX, "Enforcement Actions."

(b) DOE recognizes that oral information may in some situations be inherently less reliable than written submittals because of the absence of an opportunity for reflection and management review. However, DOE must be able to rely on oral communications from officials of DOE contractors concerning significant information. In determining whether to take enforcement action for an oral statement, consideration will be given to such factors as:

- (1) The degree of knowledge that the communicator should have had regarding the matter in view of his or her position, training, and experience;
- (2) The opportunity and time available prior to the communication to assure the accuracy or completeness of the information;
- (3) The degree of intent or negligence, if any, involved;
- (4) The formality of the communication;
- (5) The reasonableness of DOE reliance on the information;
- (6) The importance of the information that was wrong or not provided; and
- (7) The reasonableness of the explanation for not providing complete and accurate information.

(c) Absent gross negligence or willfulness, an incomplete or inaccurate oral statement normally will not be subject to enforcement action unless it involves significant information provided by an official of a DOE contractor. However, enforcement action may be taken for an unintentionally incomplete or inaccurate oral statement provided to DOE by an official of a DOE contractor or others on behalf of the DOE contractor, if a record was made of the oral information and provided to the DOE contractor thereby permitting an opportunity to correct the oral information, such as if a transcript of the communication or meeting summary containing the error was made available to the DOE contractor and was not subsequently corrected in a timely manner.

(d) When a DOE contractor has corrected inaccurate or incomplete information, the decision to issue a citation for the initial inaccurate or incomplete information normally will be dependent on the circumstances, including the ease of detection of the error, the timeliness of the correction, whether DOE or the DOE contractor identified the problem with the communication, and whether DOE relied on the information prior to the correction. Generally, if the matter was promptly identified and corrected by the DOE contractor prior to reliance by DOE, or before DOE raised a question about the information, no enforcement action will be taken for the initial inaccurate or incomplete information. On the other hand, if the misinformation is identified after DOE relies on it, or after some question is raised regarding the accuracy of the information, then some enforcement action normally will be taken even if it is in fact corrected.

(e) If the initial submission was accurate when made but later turns out to be erroneous because of newly discovered information or advances in technology, a citation normally would not be appropriate if, when the new information became available, the initial submission was promptly corrected.

(f) The failure to correct inaccurate or incomplete information that the DOE contractor does not identify as significant normally will not constitute a separate violation. However, the circumstances surrounding the failure to correct may be considered relevant to the determination of enforcement action for the initial inaccurate or incomplete statement. For example, an unintentionally inaccurate or incomplete submission may be treated as a more severe matter if a DOE contractor later determines that the initial submission was in error and does not promptly correct it or if there were clear opportunities to identify the error.

[71 FR 6931, Feb. 9, 2006, as amended at 74 FR 66033, Dec. 14, 2009; 79 FR 20, Jan. 2, 2014]

PART 860—TRESPASSING ON DEPARTMENT OF ENERGY PROPERTY

- Sec.
- 860.1 Purpose.
 - 860.2 Scope.
 - 860.3 Trespass.
 - 860.4 Unauthorized introduction of weapons or dangerous materials.
 - 860.5 Violations and penalties.
 - 860.6 Posting.
 - 860.7 Effective date of prohibition on designated locations.
 - 860.8 Applicability of other laws.

AUTHORITY: Sec. 161, 68 Stat. 948, sec. 229, 70 Stat. 1070; (42 U.S.C. 2201; 2278a); sec. 104, 88

§ 860.1

Stat. 1237, sec. 105, 88 Stat. 1238 (42 U.S.C. 5814, 5815); sec. 5, Pub. L. 100-185, 101 Stat. 1279 (18 U.S.C. 3559); sec. 6, Pub. L. 100-185, 101 Stat. 1280 (18 U.S.C. 3571); sec. 7041, Pub. L. 100-690, 102 Stat. 4899 (18 U.S.C. 3559).

SOURCE: 58 FR 47985, Sept. 14, 1993, unless otherwise noted.

§ 860.1 Purpose.

The regulations in this part are issued for the protection and security of facilities, installations and real property subject to the jurisdiction or administration, or in the custody of, the Department of Energy.

§ 860.2 Scope.

The regulations in this part apply to all facilities, installations and real property subject to the jurisdiction or administration of the Department of Energy or in its custody which have been posted with a notice of the prohibitions and penalties set forth in this part.

§ 860.3 Trespass.

Unauthorized entry upon any facility, installation or real property subject to this part is prohibited.

§ 860.4 Unauthorized introduction of weapons or dangerous materials.

Unauthorized carrying, transporting, or otherwise introducing or causing to be introduced any dangerous weapon, explosive, or other dangerous instrument or material likely to produce substantial injury or damage to persons or property, into or upon any facility, installation or real property subject to this part, is prohibited.

§ 860.5 Violations and penalties.

(a) Whoever willfully violates either § 860.3 or § 860.4 shall, upon conviction, be guilty of an infraction punishable by a fine of not more than \$5,000.

(b) Whoever willfully violates either § 860.3 or § 860.4 with respect to any facility, installation or real property enclosed by a fence, wall, floor, roof, or other structural barrier shall upon conviction, be guilty of a Class A misdemeanor punishable by a fine not to exceed \$100,000 or imprisonment for not more than one year, or both.

10 CFR Ch. III (1-1-16 Edition)

§ 860.6 Posting.

Notices stating the pertinent prohibitions of §§ 860.3 and 860.4 and penalties of § 860.5 will be conspicuously posted at all entrances of each designated facility, installation or parcel of real property and at such intervals along the perimeter as will provide reasonable assurance of notice to persons about to enter.

§ 860.7 Effective date of prohibition on designated locations.

The prohibitions in §§ 860.3 and 860.4 shall take effect as to any facility, installation or real property on publication in the FEDERAL REGISTER of the notice designating the facility, installation or real property and posting in accordance with § 860.6.

§ 860.8 Applicability of other laws.

Nothing in this part shall be construed to affect the applicability of the provisions of State or other Federal laws.

PART 861—CONTROL OF TRAFFIC AT NEVADA TEST SITE

Sec.

- 861.1 Purpose.
- 861.2 Scope.
- 861.3 Definitions.
- 861.4 Use of site streets.
- 861.5 Penalties.
- 861.6 Posting and distribution.
- 861.7 Applicability of other laws.

APPENDIX A TO PART 861—PERIMETER DESCRIPTION OF DOE'S NEVADA TEST SITE

AUTHORITY: 42 U.S.C. 2201.

SOURCE: 41 FR 56788, Dec. 30, 1976, unless otherwise noted.

§ 861.1 Purpose.

The regulations in this part are designed to facilitate the control of traffic at the Nevada Test Site.

§ 861.2 Scope.

This part applies to all persons who use the streets of the Nevada Test Site.

§ 861.3 Definitions.

As used in this part:

(a) *DOE* means the Department of Energy.

Department of Energy

§861.6

(b) *Nevada Test Site* means DOE's Nevada Test Site located in Nye County, Nev. A perimeter description is attached as Appendix A to this part.

(c) *Nevada Test Site Traffic Regulations* means the traffic directives promulgated by the Manager of the Nevada Site Office pursuant to §861.4.

(d) *Person* means every natural person, firm, trust partnership, association or corporation.

(e) *Street* means the entire width between the boundary lines of every way when any part thereof is open to the use of those admitted to the Nevada Test Site for purposes of vehicular travel.

(f) *Traffic* means pedestrians, ridden or herded animals, vehicles, and other conveyances, either singly or together, while using any roadway for purposes of travel.

(g) *Vehicle* means every device in, upon or by which any person or property is or may be transported or drawn upon a roadway, excepting devices moved by human power or used exclusively upon stationary rails or tracks.

[41 FR 56788, Dec. 30, 1976, as amended at 71 FR 68734, Nov. 28, 2006]

§861.4 Use of site streets.

All persons using the streets of the Nevada Test Site shall do so in a careful and safe manner.

(a) The Nevada Test Site Traffic Regulations supplement this section by identifying the specific traffic requirements relating to such matters as:

(1) Enforcement and obedience to Traffic Regulations, including the authority of police officers and traffic regulations, and responsibility to report accidents.

(2) Traffic signs, signals, and markings, including required compliance with traffic lanes and traffic control devices, and prohibitions on display of unauthorized traffic signs, signals, or marking or interference with authorized traffic control devices.

(3) Speeding or driving under the influence of intoxicating liquor or drugs, including prohibitions on reckless driving, and promulgation of maximum permissible speeds.

(4) Turning movements, including required position and method of turning at intersections, limitations on turning

around, and obedience to turning markers and no-turn signs.

(5) Stopping and yielding, including obedience to stop and yield signs, requirements, when entering stop or yield intersections, emerging from alleys, driveways, or buildings, operation of vehicles on approach of authorized emergency vehicles and stops when traffic is obstructed.

(6) Pedestrians' rights and duties, including pedestrian's right-of-way in crosswalks, when a pedestrian must yield, required use or right half of crosswalks and requirements concerning walking along roadways and prohibited pedestrian crossings.

(7) Parking, stopping, and standing, specifying when parking, stopping, and standing are prohibited, including special provisions applicable to buses, requirements that parking not obstruct traffic and be close to curb, and concerning lamps on parked vehicles.

(8) Privileges of drivers of authorized emergency vehicles, including exemptions from parking and standing, stopping, speeding and turning limitations, under specified circumstances and within specified limitations.

(9) Miscellaneous driving rules, including requirements for convoys, and limitations on backing, opening and closing vehicle doors, following fire apparatus, crossing a fire hose, driving through a safety zone, through convoys, on sidewalks or shoulders of roadways, boarding or alighting from vehicles, passing a bus on the right, and unlawful riding.

(b) The Nevada Test Site Traffic Regulations, when posted and distributed as specified in §861.6, shall have the same force and effect as if made a part hereof.

§861.5 Penalties.

Any person doing any act forbidden or failing to do any act required by the Nevada Test Site Traffic Regulations shall, upon conviction, be punishable by a fine of not more than \$50 or imprisonment for not more than 30 days, or both.

§861.6 Posting and distribution.

Notices including the provisions of the Nevada Test Site Traffic Regulations will be conspicuously posted at

§ 861.7

the Nevada Test Site. Such other distribution of the Nevada Test Site Regulations will be made by the Manager as will provide reasonable assurance of notice to persons subject to the regulations.

§ 861.7 Applicability of other laws.

Nothing in this part shall be construed to affect the applicability of the provisions of State laws or of other Federal laws.

APPENDIX A TO PART 861—PERIMETER DESCRIPTION OF DOE'S NEVADA TEST SITE

The Nevada Test Site, containing approximately 858,764 acres located in Nye County, Nev., is described as follows:

Beginning at the northwesterly corner of the tract of land hereinafter described, said corner being at latitude 37°20'45", longitude 116°34'20";

Thence easterly approximately 6.73 miles, to a point at latitude 37°20'45" longitude 116°27'00";

Thence northeasterly approximately 4.94 miles to a point at latitude 37°23'07", longitude 116°22'30";

Thence easterly approximately 4.81 miles to a point at latitude 37°23'07", longitude 116°17'15";

Thence southeasterly approximately 6.77 miles to a point at latitude 37°19'47", longitude 116°11'10";

Thence southerly approximately 5.27 miles to a point at latitude 37°15'12.043", longitude 116°11'10";

Thence easterly approximately 14.21 miles to a point at latitude 37°15'07.268", longitude 115°55'42.268";

Thence southerly approximately 39.52 miles to a point at latitude 36°40'43.752", longitude 115°55'37.687";

Thence westerly approximately 2.87 miles to a point at latitude 36°40'40.227", longitude 115°58'43.956";

Thence southerly approximately 5.23 miles to a point at latitude 36°36'07.317", longitude 115°58'41.227";

Thence southwestward along a perimeter distance approximately 5.82 miles to a point at latitude 36°34'39.754", longitude 116°04'11.167";

Thence northerly approximately 3.20 miles to a point at latitude 36°37'26.804", longitude 116°04'11.355";

Thence northwesterly approximately 5.16 miles to a point at latitude 36°40'28.854", longitude 116°08'17.749";

Thence westerly approximately 8.63 miles to a point at latitude 36°40'23.246", longitude 116°17'37.466";

10 CFR Ch. III (1–1–16 Edition)

Thence southerly approximately 0.19 mile to a point at latitude 36°40'13.330", longitude 116°17'37.461";

Thence westerly approximately 8.49 miles to a point at latitude 36°40'13.666", longitude 116°26'47.915";

Thence northerly approximately 32.87 miles to a point at latitude 37°08'50", longitude 116°26'44.125";

Thence northwesterly approximately 15.37 miles to a point at latitude 37°20'45", longitude 116°34'20", the point of beginning herein.

[41 FR 56788, Dec. 30, 1978, as amended at 44 FR 37939, June 29, 1979]

PART 862—RESTRICTIONS ON AIRCRAFT LANDING AND AIR DELIVERY AT DEPARTMENT OF ENERGY NUCLEAR SITES

Sec.

- 862.1 Purpose.
- 862.2 Scope.
- 862.3 Definitions.
- 862.4 Prohibitions and penalties.
- 862.5 Procedures for removal of downed aircraft.
- 862.6 Voluntary minimum altitude.
- 862.7 Designation of sites.

AUTHORITY: 42 U.S.C. 2201(b), 2201(i) and 2278(a).

SOURCE: 52 FR 29838, Aug. 12, 1987, unless otherwise noted.

§ 862.1 Purpose.

The purpose of this part is to set forth Department of Energy, hereinafter "DOE", security policy regarding aircraft and air delivery on nuclear sites under the jurisdiction of DOE pursuant to the Atomic Energy Act of 1954, as amended (42 U.S.C. 2011 *et seq.*).

§ 862.2 Scope.

(a) This part applies to all persons or aircraft entering or otherwise within or above areas within the boundaries of lands or waters subject to the jurisdiction, administration, or in the custody of the DOE at sites designated by DOE.

(b) This part is not applicable to:

- (1) Aircraft operating pursuant to official business of the Federal Government;
- (2) Aircraft over-flying or in the process of landing pursuant to official business of a state or local law enforcement

authority with prior notification to DOE; or

(3) Aircraft in the process of landing on a DOE site due to circumstances beyond the control of the operator and with prior notification to DOE, if possible.

(c) Aircraft in paragraphs (b)(2) and (b)(3) of this section are within the scope of this part upon landing at a DOE designated site.

§ 862.3 Definitions.

(a) *Air delivery.* Delivering or retrieving a person or object by airborne means, including but not limited to, aircraft.

(b) *Aircraft.* A manned or unmanned device or any portion thereof, that is commonly used or intended to be used for flight in the air, including powerless flight. Such devices include but are not limited to any parachute, hovercraft, helicopter, glider, airplane or lighter than air vehicle.

(c) *Boundary.* A delineation on a map of Federal interest in land or water utilized by DOE pursuant to the Atomic Energy Act of 1954, as amended:

(1) Authorized by Congress, or

(2) Published pursuant to law in the FEDERAL REGISTER, or

(3) Filed or recorded with a State or political subdivision in accordance with applicable law.

(d) *Designated site.* An area of land or water identified in accordance with § 862.7 of this part.

(e) *Downed aircraft.* An aircraft that is on a designated site due to emergency landing or for any other reason.

(f) *Manager of Operations.* The manager of a DOE field office, the Manager of the Pittsburgh Naval Reactors Office, the Manager of the Schneckady Naval Reactors Office and, for designated sites administered directly by DOE Headquarters, the Chief Health, Safety and Security Officer.

[52 FR 29838, Aug. 12, 1987, as amended at 71 FR 68734, Nov. 28, 2006]

§ 862.4 Prohibitions and penalties.

(a) The following activities are prohibited by this part:

(1) Operation or use of aircraft on lands or waters of designated sites.

(2) Air delivery to or from designated sites.

(3) Removal or movement of downed aircraft, or participation in the removal or movement of downed aircraft, from or on a designated site unless prior authorization is obtained pursuant to § 862.5 of this part.

(4) Failure to remove a downed aircraft from a designated site in accordance with an order issued by the cognizant DOE Manager of Operations under § 862.5 of this part.

(5) Violation of Federal Aviation Administration regulations regarding minimum altitudes and prohibited flight maneuvers over a designated site.

(b) A person willfully engaging in activities prohibited by this part may be subject to the imposition of criminal penalties set forth in sections 223 and 229 of the Atomic Energy Act, as amended (42 U.S.C. 2273 and 2278(a)).

§ 862.5 Procedures for removal of downed aircraft.

(a) An aircraft on or brought on to a designated site, except as provided in § 862.2 (b)(1), shall not be moved within or removed from such areas except as provided for in this section. All such aircraft are subject to full inspection by DOE security personnel upon landing upon order of the Manager of Operations or his designee. Any attempt to depart or remove the aircraft from a designated site without clearance obtained pursuant to this section, may be assumed to be indicative of hostile intent by security forces at such sites.

(b)(1) The cognizant DOE Manager of Operations for a designated site may, on his own initiative, issue a written order to the owner or operator of a downed aircraft to require the removal of that aircraft from the site within 20 days of this notice. Such an order shall specify:

(i) The date upon which removal operations must be completed;

(ii) The times and means of access to and from the downed aircraft to be removed;

(iii) The manner of removal; and

(iv) An estimate of the cost of removal to DOE for which the owner or operator will be held liable if removal is accomplished by DOE.

§ 862.6

(2) The owner or operator of the downed aircraft may file a written petition, supported by affidavits, to the cognizant Manager of Operations requesting that the order be modified or set aside. The petition may be granted by the Manager of Operations for good cause shown, upon a finding that it is clearly consistent with the national security, public safety, and federal property interests. Such petition must be filed at least 10 days prior to the date upon which removal is to be initiated, as specified in the order. The written decision of the Manager of Operations shall be a final agency action.

(c)(1) The owner of a downed aircraft may petition the cognizant Manager of Operations of permission to move or remove the downed aircraft from or within a designated site. The petition must provide assurances that the owner will fully compensate DOE for all costs incurred or damages experienced as a result of landing or removal through a contract for services. The Manager of Operations may, for good cause shown, waive part or all of the compensation which might otherwise be due DOE.

(2) The Manager of Operations may deny such petition in whole or part and prohibit removal of a downed aircraft upon finding that:

(i) The removal of a downed aircraft would create an unacceptable safety or security risk;

(ii) The removal of a downed aircraft would result in excessive resource loss of property damage or an unacceptable disruption of federal activities;

(iii) The removal of downed aircraft is impracticable or impossible;

(iv) The owner has failed to provide adequate assurances that all costs incurred or damages experienced by DOE due to landing or removal of aircraft will be fully paid immediately upon removal by the owner under a contract for services;

(v) An inspection of the aircraft has not been conducted by DOE security personnel.

(3) In the event that such petition is granted in whole or part, the cognizant Manager of Operations may issue an order, as set forth in (b)(1) (i) through (iv) of this section. In the event that a petition is denied in whole or part, the Manager of Operations shall issue a

10 CFR Ch. III (1–1–16 Edition)

written decision which shall set forth the reasons for such denial.

(d) Failure to comply with an order issued by the Manager of Operations pursuant to this section is basis for DOE to consider the downed aircraft to be abandoned property. DOE may take whatever measures it deems necessary when it determines that downed aircraft is abandoned property.

(e) Notwithstanding paragraphs (b) and (c) of this section, the Manager of Operations may move or remove a downed aircraft from such an area upon oral or written notification to the owner or operator of such aircraft upon a finding that national security or operational requirements necessitate expedited movement or removal. The owner or operator may be held jointly and separately liable for all expenses incurred by DOE in the movement or removal of such aircraft. Such expenses shall be deemed to be incurred through an implied contract at law for services.

§ 862.6 Voluntary minimum altitude.

In addition to complying with all applicable FAA prohibitions or restrictions, aircraft are requested to maintain a minimum altitude of 2,000 feet above the terrain of a designated site. Applicable FAA prohibitions or restrictions take precedence over this voluntary minimum altitude.

§ 862.7 Designation of sites.

(a) DOE shall designate sites covered by this part as deemed necessary, consistent with the national security and public safety, through notice in the FEDERAL REGISTER.

(b) This part shall be effective as to any facility, installation, or real property on publication in the FEDERAL REGISTER of the notice designating the site.

(c) Upon designation of a site, the cognizant Manager of Operations may inform the public of such designation through press release or posting of notice at airfields in the vicinity of the designated site.

PART 871—AIR TRANSPORTATION OF PLUTONIUM

Sec.
871.1 National security exemption.

Department of Energy

§ 871.4

871.2 Public health and safety exemption.

871.3 Records.

871.4 Limitation on redelegation of authority.

AUTHORITY: Pub. L. 94-187, 88 Stat. 1077, 1078 (42 U.S.C. 2391 *et seq.*); Energy Reorganization Act, Pub. L. 93-438, 88 Stat. 1233 (42 U.S.C. 5801 *et seq.*); secs. 2, 3, 91, 123, and 161 of the Atomic Energy Act of 1954, as amended.

SOURCE: 42 FR 48332, Sept. 23, 1977, unless otherwise noted.

§ 871.1 National security exemption.

(a) The following DOE air shipments of plutonium are considered as being made for the purposes of national security within the meaning of section 502(2) of Public Law 94-187:

(1) Shipments made in support of the development, production, testing, sampling, maintenance, repair, modification, or retirement of atomic weapons or devices;

(2) Shipments made pursuant to international agreements for cooperation for mutual defense purposes; and

(3) Shipments necessary to respond to an emergency situation involving a possible threat to the national security.

(b) The Deputy Administrator for Defense Programs may authorize air shipments falling within paragraph (a)(1) of this section, on a case-by-case basis: *Provided*, That the Deputy Administrator for Defense Programs determines that such shipment is required to be made by aircraft either because:

(1) The delay resulting from using ground transportation methods would have serious adverse impact upon a national security requirement;

(2) Safeguards or safety considerations dictate the use of air transportation;

(3) The nature of the item to be shipped necessitates the use of air transportation in order to avoid possible damage which may be expected from other available transportation environments; or

(4) The nature of the item being shipped necessitates rapid shipment by air in order to preserve the chemical, physical, or isotopic properties of the item.

The Deputy Administrator for Defense Programs may also authorize air shipments falling within paragraph (a)(2) of this section in all cases since the inherent time delays of surface transportation for such shipments are considered unacceptable. The Deputy Administrator for Defense Programs may also authorize air shipments falling within paragraph (a)(3) of this section in cases where failure to make shipments by air could jeopardize the national security of the United States.

[42 FR 48332, Sept. 23, 1977, as amended at 71 FR 68734, Nov. 28, 2006]

§ 871.2 Public health and safety exemption.

The Deputy Administrator for Defense Programs may authorize, on a case-by-case basis, DOE air shipments of plutonium where the Deputy Administrator determines that rapid shipment by air is required to respond to an emergency situation involving possible loss of life, serious personal injuries, considerable property damage, or other significant threat to the public health and safety.

[42 FR 48332, Sept. 23, 1977, as amended at 71 FR 68734, Nov. 28, 2006]

§ 871.3 Records.

Determinations made by the Deputy Administrator for Defense Programs pursuant to these rules shall be matters of record. Such authorizations shall be reported to the Administrator of the National Nuclear Security Administration within twenty-four hours after authorization is granted.

[42 FR 48332, Sept. 23, 1977, as amended at 71 FR 68734, Nov. 28, 2006]

§ 871.4 Limitation on redelegation of authority.

The authority delegated in this part may not be redelegated without the prior approval of the Administrator of the National Nuclear Security Administration.

[42 FR 48332, Sept. 23, 1977, as amended at 71 FR 68734, Nov. 28, 2006]

**PART 900—COORDINATION OF
FEDERAL AUTHORIZATIONS FOR
ELECTRIC TRANSMISSION FACILI-
TIES**

Sec.

- 900.1 Purpose.
- 900.2 Applicability.
- 900.3 Definitions.
- 900.4 Pre-application mechanism.
- 900.5 Request for coordination.
- 900.6 Coordination of permitting and related environmental reviews.

AUTHORITY: 16 U.S.C. 824p(h).

SOURCE: 73 FR 54459, Sept. 19, 2008, unless otherwise noted.

§ 900.1 Purpose.

This part provides a process for the timely coordination of Federal authorizations for proposed transmission facilities pursuant to section 216(h) of the Federal Power Act (FPA). The regulations provide for the compilation of a single environmental review document in order to coordinate all permitting and environmental reviews required to be issued under Federal law. They also provide an opportunity for non-Federal entities to coordinate their own separate non-Federal permitting and environmental reviews with that of the permitting entities.

§ 900.2 Applicability.

(a) DOE accepts requests for coordination of Federal authorizations under this part only for facilities that are used for the transmission of electric energy in interstate commerce for the sale of electric energy at wholesale.

(b) DOE does not accept requests for coordination under this part of Federal authorizations for electric transmission facilities located within the Electric Reliability Council of Texas interconnection.

(c) DOE does not accept requests for coordination under this part from persons that have submitted an application to the Federal Energy Regulatory Commission (FERC) for issuance of a permit for construction or modification of a transmission facility under 18 CFR 50.6 or have initiated pre-filing procedures under 18 CFR 50.5.

(d) DOE, in exercising its responsibilities under this part, will consult regularly with FERC, electric reliability

organizations, and transmission organizations approved by FERC.

§ 900.3 Definitions.

As used in this part:

Applicant means a person or entity who is seeking a Federal authorization.

Director means the Director of Permitting and Siting in the Office of Electricity Delivery and Energy Reliability within DOE.

DOE means the U.S. Department of Energy.

Federal authorization means any authorization required under Federal law to site a transmission facility, including permits, special use authorizations, certifications, opinions, or other approvals. This term includes authorizations issued by Federal and non-Federal entities that are responsible for issuing authorizations under Federal law for a transmission facility.

FERC means the Federal Energy Regulatory Commission.

FPA means the Federal Power Act (16 U.S.C. 791–828c).

Indian tribe has the same meaning as provided in 25 U.S.C. 450b(e).

NEPA means the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*)

Non-federal entity means Indian tribes, multistate entities, and State agencies.

Permitting entity means any Federal or non-Federal entity that is responsible for issuing Federal authorizations.

Request for coordination means a request to DOE for coordination of Federal authorizations under this part.

Requester means an applicant that is seeking DOE coordination of Federal authorizations under this part.

Single Environmental Review Document means the total material that the permitting entities develop—with the lead agency for preparing the NEPA document being primarily responsible—and that DOE shall assemble, along with any other material considered necessary and made available by DOE, in order to fulfill Federal obligations for preparing NEPA compliance documents and all other analyses required to comply with all environmental, cultural and historic preservation statutes and regulations under Federal

Department of Energy

§ 900.5

law. This information shall be available to the applicant, all permitting entities, DOE, and all Indian tribes, multistate entities, and State agencies that have their own separate non-Federal permitting and environmental reviews.

§ 900.4 Pre-Application mechanism.

(a) An applicant, or prospective applicant, for a Federal authorization seeking information from a permitting entity pursuant to 16 U.S.C. 824p(h)(4)(C) must request information pursuant to the terms specified in this section with a permitting entity, and notify the Director of the request to the permitting entity.

(b) Any request for information filed under this section shall specify in sufficient detail the information sought from the permitting entity and shall contain sufficient information for the permitting entity to provide the requested information pursuant to 16 U.S.C. 824p(h)(4)(C).

(c) Within 60 days of receipt of such a request for information, a permitting entity shall provide, to the extent permissible under existing law, information concerning the request to the applicant, or prospective applicant, and the Director.

§ 900.5 Request for coordination.

(a) A requester shall file a request for coordination with the Director.

(b) The request shall contain:

(1) The exact legal name of the requester; its principal place of business; whether the requester is an individual, partnership, corporation, or other entity; the State laws under which the requester is organized or authorized; and the name, title, and mailing address of the person or persons to whom communications concerning the request for coordination are to be addressed;

(2) A concise general description of the proposed transmission facility sufficient to explain its scope and purpose, including:

(i) The voltage and type of current (alternating or direct);

(ii) The length of the transmission line;

(iii) The design and height of the support structures;

(iv) The proposed route (including the beginning and ending nodes of the transmission project, and a brief geographical description of the proposed route);

(v) A map of the proposed route (if available);

(vi) Any ancillary facilities associated with the proposed route;

(vii) The proposed dates for the beginning and completion of construction and the commencement of service;

(viii) Whether the applicant for a Federal authorization of the proposed transmission facility has submitted an interconnection request with a transmission organization or electric reliability organization approved by FERC; and

(ix) The anticipated length of time the proposed transmission facility will be in service;

(3) A list of all permitting entities from which Federal authorizations pertaining to the proposed transmission facility are needed, including the docket numbers of pending applications with permitting entities;

(4) A list of non-Federal entities that have their own separate non-Federal permitting and environmental reviews pertaining to the proposed transmission facility, including the docket numbers of relevant applications;

(5) A signed statement to the Director that the requester has served a copy of the request for coordination to all permitting entities, and all non-Federal entities that have their own separate non-Federal permitting and environmental reviews; and

(6) A statement by the requester certifying that it has informed the non-Federal entities that have their own separate non-Federal permitting and environmental reviews pertaining to the proposed transmission facility that they may coordinate their permitting and environmental reviews with DOE and the permitting entities pursuant to section 16 U.S.C. 824p(h)(4)(A). The statement should list the specific persons served and other pertinent contact information at all permitting entities and all non-Federal entities.

(c) The written request for coordination may be filed by mail or hand delivery with the Director at 1000 Independence Avenue, SW., Washington, DC

§ 900.6

20585, or electronically in MS Word or PDF formats at SEC216h@hq.doe.gov. Electronic filing is DOE's preferred method. If filing by hand or mail, DOE requests that an electronic copy be filed as well.

(d) Upon receipt, DOE will post and make publicly available at http://www.oe.energy.gov/fed_transmission.htm each request for coordination and any subsequent correspondence and material filed with DOE in connection with the request, except for information exempt from disclosure under the Freedom of Information Act.

§ 900.6 Coordination of permitting and related environmental reviews.

(a)(1) Upon receipt of a request for coordination, DOE, as the coordinator of all applicable Federal authorizations and related environmental reviews, and the permitting entities shall jointly determine the appropriate level of coordination required, and, where applicable, the appropriate permitting entity to be the lead agency for preparing NEPA compliance documents, including all documents required to support a final agency decision, and all other analyses used as the basis for all decisions on a proposed transmission facility under Federal law. Designation of the lead agency for preparing NEPA documents shall be in compliance with regulations issued by the Council on Environmental Quality at 40 CFR 1500 *et seq.*

(2) Non-Federal entities that have their own separate non-Federal permitting and environmental reviews may elect to participate in the coordination process under paragraph (a)(2) of this section.

(b)(1) DOE as the agency coordinating federal authorizations shall establish, maintain, and utilize, to the extent practicable and in compliance with Federal law, a single location to store and display (electronically if practicable) all of the information assembled in order to fulfill Federal obligations for preparing NEPA compliance documents and all other analyses required to comply with all environmental and cultural statutes and regulations under Federal law. This information shall be available to the applicant, all permitting entities, DOE, and

10 CFR Ch. III (1–1–16 Edition)

all Indian tribes, multistate entities, and State agencies that have their own separate non-Federal permitting and environmental reviews.

(2) DOE shall establish and maintain, to the extent practicable and in compliance with Federal law, a single location to store and display the information utilized by the permitting entities as the basis for their decisions on the proposed project under Federal law, including all environmental, cultural protection and natural resource protection statutes and regulations.

(3) In coordinating the preparation of a single environmental review document, DOE will rely upon the permitting entities, as appropriate, to ensure compliance with all applicable requirements of Federal law.

(4) The single environmental review document shall be made available to all permitting entities for making their agency decisions in order to ensure that each permitting entity's environmental review is in compliance with the statutory mandates and regulatory requirements applicable to action by that permitting entity.

PART 903—POWER AND TRANSMISSION RATES

Subpart A—Procedures for Public Participation in Power and Transmission Rate Adjustments and Extensions for the Alaska, Southeastern, Southwestern, and Western Area Power Administrations

Sec.

903.1 Purpose and scope; application.

903.2 Definitions.

903.11 Advance announcement of rate adjustment.

903.13 Notice of proposed rates.

903.14 Consultation and comment period.

903.15 Public information forums.

903.16 Public comment forums.

903.17 Informal public meetings for minor rate adjustments.

903.18 Revision of proposed rates.

903.21 Completion of rate development; provisional rates.

903.22 Final rate approval.

903.23 Rate extensions.

AUTHORITY: Secs. 301(b), 302(a), and 644 of Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7101 *et seq.*); sec. 5 of the Flood Control Act of 1944 (16 U.S.C. 825s); the Reclamation Act of 1902 (43 U.S.C. 372 *et*

Department of Energy

§ 903.2

seq.), as amended and supplemented by subsequent enactments, particularly sec. 9(c) of the Reclamation Project Act of 1939 (43 U.S.C. 485h(c)); and the Acts specifically applicable to individual projects or power systems.

SOURCE: 50 FR 37837, Sept. 18, 1985, unless otherwise noted.

Subpart A—Procedures for Public Participation in Power and Transmission Rate Adjustments and Extensions for the Alaska, Southeastern, Southwestern, and Western Area Power Administrations

§ 903.1 Purpose and scope; application.

(a) Except as otherwise provided herein, these regulations establish procedures for the development of power and transmission rates by the Administrators of the Alaska, Southeastern, Southwestern, and Western Area Power Administrations; for the providing of opportunities for interested members of the public to participate in the development of such rates; for the confirmation, approval, and placement in effect on an interim basis by the Deputy Secretary of the Department of Energy of such rates; and for the submission of such rates to the Federal Energy Regulatory Commission with or without prior interim approval. These regulations supplement Delegation Order No. 0204-108 of the Secretary of Energy, which was published in the FEDERAL REGISTER and became effective on December 14, 1983 (48 FR 55664), with respect to the activities of the Deputy Secretary and the Administrators.

(b) These procedures shall apply to all power and transmission rate adjustment proceedings for the Power Marketing Administrations (PMAs) which are commenced after these regulations become effective or were in process on the effective date of these regulations, but for which the FERC had not issued any substantive orders on or before December 14, 1983. These procedures supersede "Procedures for Public Participation in Power and Transmission Rate Adjustments and Extensions for the Alaska, Southeastern, Southwestern, and Western Area Power Administrations" published in 45 FR 86983 (Decem-

ber 31, 1980) and amended at 46 FR 6864 (January 22, 1981) and 46 FR 25427 (May 7, 1981).

(c) Except to the extent deemed appropriate by the Administrator in accordance with applicable law, these procedures do not apply to rates for short term sales of capacity, energy, or transmission service.

[50 FR 37837, Sept. 18, 1985; 50 FR 48075, Nov. 21, 1985]

§ 903.2 Definitions.

As used herein—

(a) *Administrator* means the Administrator of the PMA whose rate is involved in the rate adjustment, or anyone acting in such capacity.

(b) *Department* means the Department of Energy, including the PMAs but excluding the Federal Energy Regulatory Commission.

(c) *Deputy Secretary* means the Deputy Secretary of the Department of Energy, or anyone acting in such capacity.

(d) *FERC* means the Federal Energy Regulatory Commission.

(e) *Major rate adjustment* means a rate adjustment other than a minor rate adjustment.

(f) *Minor rate adjustment* means a rate adjustment which (1) will produce less than 1 percent change in the annual revenues of the power system or (2) is for a power system which has either annual sales normally less than 100 million kilowatt hours or an installed capacity of less than 20,000 kilowatts.

(g) *Notice* means the statement which informs customers and the general public of Proposed Rates or proposed rate extensions, opportunities for consultation and comment, and public forums. The Notice shall be by and effective on the date of publication in the FEDERAL REGISTER. Whenever a time period is provided, the date of publication in the FEDERAL REGISTER shall determine the commencement of the time period, unless otherwise provided in the Notice. The Notice shall include the name, address, and telephone number of the person to contact if participation or further information is sought.

§ 903.11

10 CFR Ch. III (1-1-16 Edition)

(h) *Power Marketing Administration* or *PMA* means the Alaska Power Administration, Southeastern Power Administration, Southwestern Power Administration, or Western Area Power Administration.

(i) *Power system* means a powerplant or a group of powerplants and related facilities, including transmission facilities, or a transmission system, that the PMA treats as one unit for the purposes of establishing rates and demonstrating repayment.

(j) *Proposed Rate* means a rate revision or a rate for a new service which is under consideration by the Department on which public comment is invited.

(k) *Provisional Rate* means a rate which has been confirmed, approved, and placed in effect on an interim basis by the Deputy Secretary.

(l) *Rate* means the monetary charge or the formula for computing such a charge for any electric service provided by the PMA, including but not limited to charges for capacity (or demand), energy, or transmission service; however, it does not include leasing fees, service facility charges, or other types of facility use charges. A rate may be set forth in a rate schedule or in a contract.

(m) *Rate adjustment* means a change in an existing rate or rates, or the establishment of a rate or rates for a new service. It does not include a change in rate schedule provisions or in contract terms, other than changes in the price per unit of service, nor does it include changes in the monetary charge pursuant to a formula stated in a rate schedule or a contract.

(n) *Rate schedule* means a document identified as a "rate schedule," "schedule of rates," or "schedule rate" which designates the rate or rates applicable to a class of service specified therein and may contain other terms and conditions relating to the service.

(o) *Short term sales* means sales that last for no longer than one year.

(p) *Substitute Rate* means a rate which has been developed in place of the rate that was disapproved by the FERC.

[50 FR 37837, Sept. 18, 1985; 50 FR 48075, Nov. 21, 1985]

§ 903.11 Advance announcement of rate adjustment.

The Administrator may announce that the development of rates for a new service or revised rates for an existing service is under consideration. The announcement shall contain pertinent information relevant to the rate adjustment. The announcement may be through direct contact with customers, at public meetings, by press release, by newspaper advertisement, and/or by FEDERAL REGISTER publication. Written comments relevant to rate policy and design and to the rate adjustment process may be submitted by interested parties in response to the announcement. Any comments received shall be considered in the development of Proposed Rates.

§ 903.13 Notice of proposed rates.

(a) The Administrator shall give Notice that Proposed Rates have been prepared and are under consideration. The Notice shall include:

- (1) The Proposed Rates;
- (2) An explanation of the need for and derivation of the Proposed Rates;
- (3) The locations at which data, studies, reports, or other documents used in developing the Proposed Rates are available for inspection and/or copying;
- (4) The dates, times, and locations of any initially scheduled public forums; and
- (5) Address to which written comments relative to the Proposed Rates and requests to be informed of FERC actions concerning the rates may be submitted.

(b) Upon request, customers of the power system and other interested persons will be provided with copies of the principal documents used in developing the Proposed Rates.

§ 903.14 Consultation and comment period.

All interested persons will have the opportunity to consult with and obtain information from the PMA, to examine backup data, and to make suggestions for modification of the Proposed Rates for a period ending (a) 90 days in the case of major rate adjustments, or 30 days in the case of minor rate adjustments, after the Notice of Proposed

Department of Energy

§ 903.16

Rates is published in the FEDERAL REGISTER, except that such periods may be shortened for good cause shown; (b) 15 days after any answer which may be provided pursuant to §903.15(b) hereof; (c) 15 days after the close of the last public forum; or (d) such other time as the Administrator may designate; whichever is later. At anytime during this period, interested persons may submit written comments to the PMA regarding the Proposed Rates. The Administrator may also provide additional time for the submission of written rebuttal comments. All written comments shall be available at a designated location for inspection, and copies also will be furnished on request for which the Administrator may assess a fee. Prior to the action described in §903.21, the Administrator may, by appropriate announcement postpone any procedural date or make other procedural changes for good cause shown at the request of any party or on the Administrator's own motion. The Administrator shall maintain, and distribute on request, a list of interested persons.

§ 903.15 Public information forums.

(a) One or more public information forums shall be held for major rate adjustments, except as otherwise provided in paragraph (c) of this section, and may be held for minor adjustments, to explain, and to answer questions concerning, the Proposed Rates and the basis of and justification for proposing such rates. The number, dates, and locations of such forums will be determined by the Administrator in accordance with the anticipated or demonstrated interest in the Proposed Rates. Notice shall be given in advance of such forums. A public information forum may be combined with a public comment forum held in accordance with §903.16.

(b) The Administrator shall appoint a forum chairperson. Questions raised at the forum concerning the Proposed Rates and the studies shall be answered by PMA representatives at the forum, at a subsequent forum, or in writing at least 15 days before the end of the consultation and comment period. However, questions that involve voluminous data contained in the PMA

records may be answered by providing an opportunity for consultation and for a review of the records at the PMA offices. As a minimum, the proceedings of the forum held at the principal location shall be transcribed. Copies of all documents introduced, and of questions and written answers shall be available at a designated location for inspection and copies will be furnished by the Administrator on request, for which a fee may be assessed. Copies of the transcript may be obtained from the transcribing service.

(c) No public information forum need be held for major rate adjustments if, after the Administrator has given Notice of a scheduled forum, no person indicates in writing by a prescribed date an intent to appear at such public forum.

§ 903.16 Public comment forums.

(a) One or more public comment forums shall be held for major rate adjustments, except as otherwise provided in paragraph (c) of this section, and may be held for minor rate adjustments, to provide interested persons an opportunity for oral presentation of views, data, and arguments regarding the Proposed Rates. The number, dates, and locations of such forums will be determined by the Administrator in accordance with the anticipated or demonstrated interest in the Proposed Rates. Notice shall be given at least 30 days in advance of the first public comment forum at each location and shall include the purpose, date, time, place, and other information relative to the forum, as well as the locations where pertinent documents are available for examination and/or copying.

(b) The Administrator shall designate a forum chairperson. At the forum, PMA representatives may question those persons making oral statements and comments. The chairperson shall have discretion to establish the sequence of, and the time limits for, oral presentations and to determine if the comments are relevant and noncumulative. Forum proceedings shall be transcribed. Copies of all documents introduced shall be available at a designated location for inspection, and copies shall be furnished on request for which the Administrator may assess a

§ 903.17

fee. Copies of the transcript may be obtained from the transcribing service.

(c) No public comment forum need be held for major rate adjustments if, after the Administrator has given notice of a scheduled forum, no person indicates in writing by a prescribed date an intent to appear at such public forum.

§ 903.17 Informal public meetings for minor rate adjustments.

In lieu of public information or comment forums in conjunction with a minor rate adjustment, informal public meetings may be held if deemed appropriate by the Administrator. Such informal meetings will not require a Notice or a transcription.

§ 903.18 Revision of proposed rates.

During or after the consultation and comment period and review of the oral and written comments on the Proposed Rates, the Administrator may revise the Proposed Rates. If the Administrator determines that further public comment should be invited, the Administrator shall afford interested persons an appropriate period to submit further written comments to the PMA regarding the revised Proposed Rates. The Administrator may convene one or more additional public information and/or public comment forums. The Administrator shall give Notice of any such additional forums.

§ 903.21 Completion of rate development; provisional rates.

(a) Following completion of the consultation and comment period and review of any oral and written comments on the Proposed Rates, the Administrator may: (1) Withdraw the proposal; (2) develop rates which in the Administrator's and the Deputy Secretary's judgment should be confirmed, approved, and placed into effect on an interim basis (Provisional Rates); or (3) develop rates which in the Administrator's judgment should be confirmed, approved, and placed into effect by the FERC on a final basis without being placed into effect on an interim basis. A statement shall be prepared and made available to the public setting forth the principal factors on which the Deputy Secretary's or the Administra-

10 CFR Ch. III (1-1-16 Edition)

tor's decision was based. The statement shall include an explanation responding to the major comments, criticisms, and alternatives offered during the comment period. The Administrator shall certify that the rates are consistent with applicable law and that they are the lowest possible rates to customers consistent with sound business principles. The rates shall be submitted promptly to the FERC for confirmation and approval on a final basis.

(b) The Deputy Secretary shall set the effective date for Provisional Rates. The effective date shall be at least 30 days after the Deputy Secretary's decision except that the effective date may be sooner when appropriate to meet a contract deadline, to avoid financial difficulties, to provide a rate for a new service, or to make a minor rate adjustment.

(c) The effective date may be adjusted by the Administrator to coincide with the beginning of the next billing period following the effective date set by the Deputy Secretary for the Provisional Rates.

(d) Provisional Rates shall remain in effect on an interim basis until: (1) They are confirmed and approved on a final basis by the FERC; (2) they are disapproved and the rates last previously confirmed and approved on a final basis become effective; (3) they are disapproved and higher Substitute Rates are confirmed and approved on a final basis and placed in effect by the FERC; (4) they are disapproved and lower Substitute Rates are confirmed and approved on a final basis by the FERC; or (5) they are superseded by other Provisional Rates placed in effect by the Deputy Secretary, whichever occurs first.

§ 903.22 Final rate approval.

(a) Any rate submitted to the FERC for confirmation and approval on a final basis shall be accompanied with such supporting data, studies, and documents as the FERC may require, and also with the transcripts of forums, written answers to questions, written comments, the Administrator's certification, and the statement of principal factors leading to the decision. The FERC shall also be furnished a listing

of those customers and other participants in the rate proceeding who have requested they be informed of FERC action concerning the rates.

(b) If the FERC confirms and approves Provisional Rates on a final basis, such confirmation and approval shall be effective as of the date such rates were placed in effect by the Deputy Secretary, as such date may have been adjusted by the Administrator. If the FERC confirms and approves on a final basis rates submitted by the Administrator without interim approval, such confirmation and approval shall be effective on a date set by the FERC.

(c) If the FERC disapproves Provisional Rates or other submitted rates, the Administrator shall develop Substitute Rates which take into consideration the reasons given by the FERC for its disapproval. If, in the Administrator's judgment, public comment should be invited upon proposed Substitute Rates, the Administrator may provide for a public consultation and comment period before submitting the Substitute Rates. Whether or not such public consultation and comment periods are provided, the Administrator will, upon request, provide customers of the power system and other interested persons with copies of the principal documents used in the development of the Substitute Rates. Within 120 days of the date of FERC disapproval of submitted rates, including Substitute Rates, or such additional time periods as the FERC may provide, the Administrator will submit the Substitute Rates to the FERC. A statement explaining the Administrator's decision shall accompany the submission.

(d) A Provisional Rate that is disapproved by the FERC shall remain in effect until higher or lower rates are confirmed and approved by the FERC on a final basis or are superseded by other rates placed into effect by the Deputy Secretary on an interim basis: *Provided*, That if the Administrator does not file a Substitute Rate within 120 days of the disapproval or such greater time as the FERC may provide, and if the rate has been disapproved because the FERC determined that it would result in total revenues in excess of those required by law, the rate last

previously confirmed and approved on a final basis will become effective on a date and for a period determined by the FERC and revenues collected in excess of such rate during such period will be refunded in accordance with paragraph (g) of this section.

(e) If a Substitute Rate confirmed and approved on a final basis by the FERC is higher than the provisional rate which was disapproved, the Substitute Rate shall become effective on a subsequent date set by the FERC, unless a subsequent Provisional Rate even higher than the Substitute Rate has been put into effect. FERC confirmation and approval of the higher Substitute Rate shall constitute final confirmation and approval of the lower disapproved Provisional Rate during the interim period that it was in effect.

(f) If a Substitute Rate confirmed and approved by the FERC on a final basis is lower than the disapproved provisional rate, such lower rate shall be effective as of the date the higher disapproved rate was placed in effect.

(g) Any overpayment shall be refunded with interest unless the FERC determines that the administrative cost of a refund would exceed the amount to be refunded, in which case no refund will be required. The interest rate applicable to any refund will be determined by the FERC.

(h) A rate confirmed and approved by the FERC on a final basis shall remain in effect for such period or periods as the FERC may provide or until a different rate is confirmed, approved and placed in effect on an interim or final basis: *Provided*, That the Deputy Secretary may extend a rate on an interim basis beyond the period specified by the FERC.

§ 903.23 Rate extensions.

(a) The following regulations shall apply to the extension of rates which were previously confirmed and approved by the FERC or the Federal Power Commission, or established by the Secretary of the Interior, and for which no adjustment is contemplated:

(1) The Administrator shall give Notice of the proposed extension at least 30 days before the expiration of the

prior confirmation and approval, except that such period may be shortened for good cause shown.

(2) The Administrator may allow for consultation and comment, as provided in these procedures, for such period as the Administrator may provide. One or more public information and comment forums may be held, as provided in these procedures, at such times and locations and with such advance Notice as the Administrator may provide.

(3) Following notice of the proposed extension and the conclusion of any consultation and comment period, the Deputy Secretary may extend the rates on an interim basis.

(b) Provisional Rates and other existing rates may be extended on a temporary basis by the Deputy Secretary without advance notice or comment pending further action pursuant to these regulations or by the FERC. The Deputy Secretary shall publish notice in the FEDERAL REGISTER of such extension and shall promptly advise the FERC of the extension.

SOURCE: 51 FR 43154, Nov. 28, 1986, unless otherwise noted.

Subpart A—Power Marketing

§ 904.1 Purpose.

(a) The Secretary of Energy, acting by and through the Administrator of the Western Area Power Administration (Administrator), is authorized and directed to promulgate charges for the sale of power generated at the Boulder Canyon Project powerplant, and also to promulgate such general regulations as the Secretary finds necessary and appropriate in accordance with the power marketing authorities in the Reclamation Act of 1902 (32 Stat. 388) and all acts amendatory thereof and supplementary thereto, and the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*).

(b) In accordance with the Boulder Canyon Project Act of 1928 (43 U.S.C. 617 *et seq.*), as amended and supplemented (Project Act); the Boulder Canyon Project Adjustment Act of 1940 (43 U.S.C. 618 *et seq.*), as amended and supplemented (Adjustment Act); the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*); and the Hoover Power Plant Act of 1984 (98 Stat. 1333 (43 U.S.C. 619 *et seq.*)) (Hoover Power Plant Act); the Western Area Power Administration (Western) promulgates these General Regulations for the Charges for the Sale of Power From the Boulder Canyon Project (General Regulations) defining the methodology to be used in the computation of the charges for the sale of power from the Boulder Canyon Project.

§ 904.2 Scope.

These General Regulations are effective June 1, 1987, and shall apply as the basis for computation of all charges applicable to any sale of power from the Boulder Canyon Project after May 31, 1987. “General Regulations for Power Generation, Operation, Maintenance, and Replacement at the Boulder Canyon Project, Arizona/Nevada” are the subject of a separate rulemaking of the Department of the Interior under 43 CFR part 431. The “General Regulations for Generation and Sale of Power in Accordance with the Boulder Canyon Project Adjustment Act” (1941

Department of Energy

§ 904.4

General Regulations) dated May 20, 1941, and the "General Regulations for Lease of Power" dated April 25, 1930, terminate May 31, 1987.

§ 904.3 Definitions.

The following terms wherever used herein shall have the following meanings:

(a) *Billing Period* shall mean the service period beginning on the first day and extending through the last day of any calendar month.

(b) *Boulder City Area Projects* shall mean the Boulder Canyon Project, the Parker-Davis Project, and the United States entitlement in the Navajo Generating Station (a feature of the Central Arizona Project).

(c) *Capacity* shall mean the aggregate of contingent capacity specified in section 105(a)(1)(A) and the contingent capacity specified in section 105(A)(1)(B) of the Hoover Power Plant Act (43 U.S.C. 619).

(d) *Central Arizona Project* shall mean those works as described in section 1521(a) of the Colorado River Basin Project Act of 1968 (43 U.S.C. 1501 *et seq.*), as amended.

(e) *Colorado River Dam Fund* or *Fund* shall mean that special fund established by section 2 of the Project Act and which is to be used only for the purposes specified in the Project Act, the Adjustment Act, the Colorado River Basin Project Act of 1968, and the Hoover Power Plant Act.

(f) *Contract* shall mean any contract for the sale of Boulder Canyon Project capacity and energy for delivery after May 31, 1987, between Western and any contractor.

(g) *Contractor* shall mean the entities entering into contracts with Western for electric service pursuant to the Hoover Power Plant Act.

(h) *Excess Capacity* shall mean capacity which is in excess of the lesser of: (1) Capacity that Hoover Powerplant is capable of generating with all units in service at a net effective head of 498 feet, or (2) 1,951,000 kW.

(i) *Excess Energy* shall mean energy obligated from the Project pursuant to section 105(a)(1)(C) of the Hoover Power Plant Act (43 U.S.C. 619).

(j) *Firm Energy* shall mean energy obligated from the Project pursuant to

section 105(a)(1)(A) and section 105(a)(1)(B) of the Hoover Power Plant Act (43 U.S.C. 619).

(k) *Overruns* shall mean the use of capacity or energy, without the approval of Western, in amounts greater than Western's contract delivery obligation in effect for each type of service provided for in the Contract.

(l) *Project* or *Boulder Canyon Project* shall mean all works authorized by the Project Act, the Hoover Power Plant Act, and any future additions authorized by Congress, to be constructed and owned by the United States, but exclusive of the main canal and appurtenances authorized by the Project Act, now known as the All-American Canal.

(m) *Replacements* shall mean such work, materials, equipment, or facilities as determined by the United States to be necessary to keep the Project in good operating condition, but shall not include (except where used in conjunction with the word "emergency" or the phrase "however necessitated") work, materials, equipment, or facilities made necessary by any act of God, or of the public enemy, or by any major catastrophe.

(n) *Upgrading Program* shall mean the program authorized by section 101(a) of the Hoover Power Plant Act (43 U.S.C. 619(a)) for increasing the capacity of existing generating equipment and appurtenances at the Hoover Powerplant, as generally described in the report of the Department of the Interior, Bureau of Reclamation, entitled "Hoover Powerplant Upgrading, Special Report," issued in May 1980, as supplemented in the report entitled, "January 1985 Supplement (revised September 1985) to Hoover Powerplant Upgrading, Special Report-May 1980."

§ 904.4 Marketing responsibilities.

(a) Capacity and energy available from the Project will be marketed by Western under terms of the Conformed General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects (Conformed Criteria) published in the FEDERAL REGISTER (49 FR 50582) on December 28, 1984. Western shall dispose of capacity

§ 904.5

10 CFR Ch. III (1–1–16 Edition)

and energy from the Project in accordance with section 105(a)(1) of the Hoover Power Plant Act (43 U.S.C. 619(a)(1)), these General Regulations, and the Contracts between the Contractors and Western.

(b) Procedures for the scheduling and delivery of capacity and energy shall be provided for in the Contracts between the Contractors and Western.

§ 904.5 Revenue requirements.

(a) Western shall collect all electric service revenues from the Project in accordance with applicable statutes and regulations and deposit such revenues into the Colorado River Dam Fund. All receipts from the Project shall be available for payment of the costs and financial obligations associated with the Project. The Secretary of the Interior is responsible for the administration of the Colorado River Dam Fund.

(b) The electric service revenue of the Project shall be collected through a charge, computed to be sufficient, together with other net revenues from the Project, to recover the following costs and financial obligations associated with the Project over the appropriate repayment periods set out in paragraph (c) of this section:

(1) Annual costs of operation and maintenance;

(2) Annual interest on unpaid investments in accordance with appropriate statutory authorities;

(3) Annual repayment of funds, and all reasonable costs incurred in obtaining such funds, advanced by non-Federal Contractors to the Secretary of the Interior for the Uprating Program;

(4) The annual payment of \$300,000 to each of the States of Arizona and Nevada provided for in section 618(c) of the Adjustment Act and section 1543(c)(2) of the Colorado River Basin Project Act (43 U.S.C. 1501 *et seq.*) (Basin Act), as amended or supplemented;

(5) Capital costs of investments and Replacements, including amounts re-advanced from the United States Treasury (Treasury);

(6) Repayment to the Treasury of the advances to the Colorado River Dam Fund for the Project made prior to May 31, 1987, for which payment was

deferred because of a deficiency in firm energy generation due to a shortage of available water, as provided for in article 14(a) of the 1941 General Regulations and section 8 of the Boulder City Act of 1958 (72 Stat. 1726), as shown on the books of accounts of Reclamation as of May 31, 1987;

(7) Repayment to the Treasury of the first \$25,000,000 of advances made to the Colorado River Dam Fund deemed to be allocated to flood control by section 617a(b) of the Project Act as provided by section 618f of the Adjustment Act; and

(8) Any other financial obligations of the Project imposed in accordance with law.

(c) The Project repayment period shall extend to the final year allowed under applicable cost recovery criteria. The revenue for the costs and financial obligations set out in paragraph (b) of this section shall be collected over the following repayment periods:

(1) The repayment period for advances made to the Colorado River Dam Fund from funds advanced to the Secretary of the Interior by non-Federal entities for the Uprating Program and associated work shall be the period commencing with the first day of the month following completion of each segment of the Uprating Program, or June 1, 1987, whichever is later, and ending September 30, 2017;

(2) The repayment period for the payments to the Treasury of the advances to the Colorado River Dam Fund for the Project which were payable prior to May 31, 1987, but which were deferred pursuant to article 14(a) of the 1941 General Regulations and section 8 of the Boulder City Act of 1958, shall be the power contract period beginning June 1, 1987, and ending September 30, 2017. Such repayment period is based on a 50-year repayment period beginning June 1, 1937, adjusted for the periods the initial payments were deferred;

(3) The repayment period for the payment to the Treasury of the first \$25,000,000 of advances made to the Colorado River Dam Fund deemed to be allocated to flood control by section 617a(b) of the Project Act and deferred by section 618(f) of the Adjustment Act shall be the 50-year period beginning June 1, 1987;

Department of Energy

§ 904.7

(4) The repayment period for advances to the Colorado River Dam Fund for the Project made on or after June 1, 1937, and prior to June 1, 1987, shall be the 50-year period beginning June 1 immediately following the year of operation in which the funds were advanced;

(5) The repayment period for investments, other than for the visitor facilities authorized by section 101(a) of the Hoover Power Plant Act (43 U.S.C. 619(a)), made from Federal appropriations on or after June 1, 1987, shall be a 50-year period beginning with the first day of the fiscal year following the fiscal year the investment is placed in service; and

(6) The repayment period for the visitor facilities authorized by section 101(a) of the Hoover Power Plant Act (43 U.S.C. 619(a)) shall be the 50-year period beginning June 1, 1987, or when substantially completed, as determined by the Secretary of the Interior, if later.

(d) Annual costs for operation and maintenance and payments to States as set out in paragraph (b) of this section shall be collected as long as revenues accrue from the operation of the Project.

(e) Surplus revenues will also be collected for transfer from the Colorado River Dam Fund for contribution to the Lower Colorado River Basin Development Fund pursuant to section 1543(c)(2) of the Basin Act as amended by the Hoover Power Plant Act to provide revenue for the purposes of sections 1543(f) and 1543(g) of the Basin Act.

(f) All annual costs will be calculated based on a Federal fiscal year. To accommodate the transition from the pre-1987 operating year of June 1 to May 31 to a fiscal year, there will be a 4-month transition period beginning June 1, 1987, and ending September 30, 1987.

(g) If integrated operation of the Boulder Canyon Project with other Boulder City Area Projects and other Federal projects on the Colorado River, as provided in §904.9 of these General Regulations, confers a direct power benefit upon such other Boulder City Area Projects and such other Federal projects, or if a direct power benefit is

conferred by other Boulder City Area Projects or other Federal projects on the Colorado River upon the Boulder Canyon Project, Western shall equitably apportion such benefits and appropriate charges among the Boulder Canyon Project, other Boulder City Area Projects, and other Federal projects on the Colorado River.

§904.6 Charge for capacity and firm energy.

The charge for Capacity and Firm Energy from the Project shall be composed of two separate charges; a charge to provide for the basic revenue requirements, as identified in paragraphs (b), (c), and (d) of §904.5 of these General Regulations (Base Charge), and a charge to provide the surplus revenue for the Lower Colorado River Basin Development Fund contribution, as identified in paragraph (e) of §904.5 of these General Regulations (Lower Basin Development Fund Contribution Charge).

§904.7 Base charge.

(a) The Base Charge shall be developed by the Administrator and promulgated in accordance with appropriate DOE regulations. The Base Charge shall be composed of a capacity component and an energy component.

(b) The capacity component of the Base Charge shall be a dollar per kilowattmonth amount determined by (1) multiplying the estimated average annual revenue requirement developed pursuant to paragraphs (b), (c), and (d) of §904.5 of these General Regulations by 50 percent, and (2) dividing the results of that multiplication by the estimated average annual kW rating of the Project, and (3) dividing the quotient by 12. The total estimated kW rating will be based on the powerplant output capability with all units in service at 498 feet of net effective head or 1,951,000 kW, whichever is less. The capacity component of the Base Charge shall be applied each billing period to each kW of rated output to which each Contractor is entitled by Contract. Adjustments to the application of the capacity component shall be made during outages which cause significant reductions in capacity as provided by the Contract.

§ 904.8

(c) The energy component of the Base Charge shall be a mills per kWh amount determined by (1) multiplying the estimated average annual revenue requirements developed pursuant to paragraphs (b), (c), and (d) of §904.5 of these General Regulations by 50 percent and (2) dividing the results of that multiplication by the average annual kWh estimated to be available from the Project. The energy component of the Base Charge shall be applied to each kWh made available to each Contractor, as provided for by Contract, except for the energy purchased by Western, at the request of a Contractor, to meet that Contractor's deficiency in Firm Energy pursuant to section 105(a)(2) of the Hoover Power Plant Act (43 U.S.C. 619(a)(2)) and section F of the Conformed Criteria, and that Contractor's Uprating Program credit carry forward, as provided by Contract.

(d) Application of the Base Charge to capacity and energy overruns will be provided for by Contract. The capacity component and the energy component of the Base Charge shall be applied each billing period for each Contractor.

(e) The Base Charge shall be reviewed annually. The Base Charge shall be adjusted either upward or downward, when necessary and administratively feasible, to assure sufficient revenues to effect payment of all costs and financial obligations associated with the Project pursuant to paragraphs (b), (c), and (d) of §904.5 of these General Regulations. The Administrator shall provide all Contractors an opportunity to comment on any proposed adjustment to the Base Charge pursuant to the DOE's power rate adjustment procedures then in effect.

§904.8 Lower basin development fund contribution charge.

(a) The Lower Basin Development Fund Contribution Charge will be developed by the Administrator of Western on the basis that the equivalent of 4½ mills or 2½ mills per kWh, as appropriate, required to be included in the rates charged to purchasers pursuant to section 1543(c)(2) of the Basin Act, as amended by the Hoover Power Plant Act, shall be collected from the energy sales of the Project.

10 CFR Ch. III (1-1-16 Edition)

(b) The Lower Basin Development Fund Contribution Charge shall be applied to each kWh made available to each Contractor, as provided for by Contract, except for the energy purchased by Western at the request of a Contractor to meet:

(1) That Contractor's deficiency in Firm Energy, pursuant to section 105(a)(2) of the Hoover Power Plant Act (43 U.S.C. 619(a)(2)) and section F of the Conformed Criteria; and

(2) That Contractor's Uprating Program credit carry forward as provided by Contract. A 4½ mills per kWh charge shall be applied to each kWh made available to an Arizona Contractor, and a 2½ mills per kWh charge shall be applied to each kWh made available to a California or Nevada Contractor; provided, that after the repayment period of the Central Arizona Project, a 2½ mills per kWh charge shall be applied to each kWh made available to the Arizona, California, and Nevada Contractors. The Lower Basin Development Fund Contribution Charge shall be applied to energy overruns. The Lower Basin Development Fund Contribution Charge shall be applied each billing period for each Contractor.

§904.9 Excess capacity.

(a) If the Uprating Program results in Excess Capacity, Western shall be entitled to such Excess Capacity to integrate the operation of the Boulder City Area Projects and other Federal Projects on the Colorado River. Specific criteria for the use of Excess Capacity by Western will be provided by Contract. All Excess Capacity not required by Western for the purposes specified by Contract will be available to all Contractors at no additional cost on a pro rata basis based on the ratio of each Contractor's Capacity allocation to the total Capacity allocation.

(b) Credits for benefits resulting from project integration shall be determined by Western and such benefits shall be apportioned in accordance with paragraph (9) of §904.5 of these General Regulations.

§904.10 Excess energy.

(a) If excess Energy is determined by the United States to be available, it

Department of Energy

§ 904.13

shall be made available to the Contractors, in accordance with the priority entitlement of section 105(a)(1)(C) of the Hoover Power Plant Act (43 U.S.C. 619(a)(1)(c)). After the annual first- and second-priority entitlement to excess energy has been obligated for delivery, Western will make available one-third of the third-priority excess energy to the Arizona Power Authority, one-third to the Colorado River Commission of Nevada, and one-third to the California Contractors.

(b) Western will make available third-priority excess energy to the California Contractors based on the following formula:

$F = \frac{1}{2} (A/B + C/D) (E)$; Where:

A = Contractor's allocated Capacity

B = Total California allocated Capacity

C = Contractor's allocated Firm Energy

D = Total California allocated Firm Energy

E = Third-priority Excess Energy available to California

F = Contractor's third-priority Excess Energy

(c) The charge for all Excess Energy shall be the charge for Boulder Canyon Project Firm Energy existing at the time the Excess Energy is made available to the Contractor, including the appropriate Lower Basin Development Fund Contribution Charge.

§ 904.11 Lay off of energy.

(a) If any Contractor determines that it is temporarily unable to utilize Firm Energy or Excess Energy, Western will, at the Contractor's request, attempt to lay off the Firm Energy or Excess Energy the Contractor declares to be available for lay off, pursuant to the provisions for lay off of energy specified in the Contract.

(b) If Western is unable to lay off such energy, or if the Contractor fails to request Western to attempt to lay off the energy, the Contractor will be billed for the Firm Energy or Excess Energy that was available to the Contractor but could not be delivered to the Contractor or sold to another customer.

(c) In the event that Western must lay off the Firm Energy or Excess Energy at a rate lower than the effective Firm Energy rate, the Contractor will be billed for the difference between the amount that Western would have re-

ceived at the then existing Firm Energy rate, including the appropriate Lower Basin Development Fund Contribution Charge, and the amount actually received.

§ 904.12 Payments to contractors.

(a) Funds advanced to the Secretary of the Interior for the Uprating Program and costs reasonably incurred by the Contractor in advancing such funds, as approved by Western, shall be returned to the Contractor advancing the funds during the Contract period through credits on that Contractor's power bills. Appropriate credits will be developed and applied pursuant to terms and conditions agreed to by contract or agreement.

(b) All other obligations of the United States to return funds to a Contractor shall be repaid to such Contractor through credits on power bills, with or without interest, pursuant to terms and conditions agreed to by contract or agreement.

§ 904.13 Disputes.

(a) All actions by the Secretary of Energy, acting by and through the Administrator of Western, shall be binding unless or until reversed or modified in accordance with provisions contained herein.

(b) Any disputes or disagreements as to interpretation or performance of the provisions of these General Regulations under the responsibility of Western shall first be presented to and decided by the Administrator. The Administrator shall be deemed to have denied the Contractor's contention or claim if it is not acted upon within ninety (90) days of its having been presented.

(c) The decision of the Administrator shall be final unless, within thirty (30) days from the date of such decision, a written request for arbitration is received by the Administrator. The Administrator shall have ninety (90) days from the date of receipt of a request for arbitration either to concur in or deny in writing the request for such arbitration. Failure by the Administrator to take any action within the ninety (90) day period shall be deemed a denial of the request for arbitration. In the

§ 904.14

event of a denial of a request for arbitration, the decision of the Administrator shall become final. Upon a decision becoming final, the disputing Contractor's remedy lies with the appropriate Federal court. Any claim that a final decision of the Administrator violates any right accorded the Contractor under the Project Act, the Adjustment Act, or Title I of the Hoover Power Plant Act is barred unless suit asserting such claim is filed in a Federal court of competent jurisdiction within one (1) year after final refusal by the Administrator to correct the action complained of, in accordance with section 105(h) of the Hoover Power Plant Act.

(d) When a timely request for arbitration is received by the Administrator and the Administrator concurs in writing, the disputing Contractor and the Administrator shall, within thirty (30) days after receipt of notice of such concurrence, each name one arbitrator to the panel of arbitrators which will decide the dispute. All arbitrators shall be skilled and experienced in the field pertaining to the dispute. In the event there is more than one disputing Contractor, the disputing Contractors shall collectively name one arbitrator to the panel of arbitrators. In the event of their failure collectively to name such an arbitrator within fifteen (15) days after their first meeting, that arbitrator shall be named as provided in the Commercial Arbitration Rules of the American Arbitration Association. The two arbitrators thus selected shall name a third arbitrator within thirty (30) days of their first meeting. In the event of their failure to so name such third arbitrator, that arbitrator shall be named as provided in the Commercial Arbitration Rules of the American Arbitration Association. The third arbitrator shall act as chairperson of the panel. The arbitration shall be governed by the Commercial Arbitration Rules of the American Arbitration Association. The arbitration shall be limited to the issue submitted. The panel of arbitrators shall not rewrite, change, or amend these General Regulations or the Contracts of any of the parties to the dispute. The panel of arbitrators shall render a final decision in this dispute within sixty (60) days

10 CFR Ch. III (1-1-16 Edition)

after the date of the naming of the third arbitrator. A decision of any two of the three arbitrators named to the panel shall be final and binding on all parties involved in the dispute.

§ 904.14 Future regulations.

(a) Western may from time to time promulgate such additional or amendatory regulations as deemed necessary for the administration of the Project in accordance with applicable law; *Provided*, That no right under any Contract shall be impaired or obligation thereunder be extended thereby.

(b) Any modification, extension, or waiver of any provision of these General Regulations granted for the benefit of any one or more Contractors shall not be denied to any other Contractor.

(c) Western reserves the right to terminate, modify, or extend these regulations, either partially or in their entirety, to the extent permitted by law or existing contract.

PART 905—ENERGY PLANNING AND MANAGEMENT PROGRAM

Subpart A—General Provisions

Sec.

905.1 What are the purposes of the Energy Planning and Management Program?

Subpart A—General Provisions

SOURCE: 65 FR 16795, Mar. 30, 2000, unless otherwise noted.

§ 905.1 What are the purposes of the Energy Planning and Management Program?

The purposes of the Energy Planning and Management Program (EPAMP) are to meet the objectives of Section 114 of the Energy Policy Act of 1992 (EPAct) and to extend long-term firm power resource commitments while supporting customer integrated resource planning (IRP); demand-side management (DSM), including energy efficiency, conservation, and load management; and the use of renewable energy. Subpart B, Integrated Resource Planning, allows customers of the Western Area Power Administration (Western) to meet the objectives of section 114 of EPAct through integrated resource planning or by other means, such as attaining a minimum level of

investment in energy efficiency and/or renewable energy, collecting a charge to support defined public benefits, or complying with a mandated energy efficiency and/or renewable energy reporting requirement.

§ 905.2 What are the key definitions of this part?

Administrator means Western's Administrator.

Customer means any entity that purchases firm capacity, with or without energy, from Western under a long-term firm power contract. The term also includes a member-based association (MBA) and its distribution or user members that receive direct benefit from Western's power, regardless of which holds the contract with Western.

Energy efficiency and/or renewable energy (EE/RE) report means the report documenting energy efficiency and/or renewable energy activities imposed by a State, Tribal, or the Federal Government upon a State, Tribal, or Federal end-use customer within its jurisdiction.

Integrated resource planning means a planning process for new energy resources that evaluates the full range of alternatives, including new generating capacity, power purchases, energy conservation and efficiency, cogeneration and district heating and cooling applications, and renewable energy resources, to provide adequate and reliable service to a customer's electric consumers.

Integrated resource planning cooperative (IRP cooperative) means a group of Western's customers and/or their distribution or user members with geographic, resource supply, or other similarities that have joined together, with Western's approval, to complete an IRP.

Member-based association (MBA) means:

(1) An entity composed of member utilities or user members, or

(2) An entity that acts as an agent for, or subcontracts with, but does not assume power supply responsibility for its principals or subcontractors, who are its members.

§ 905.10

Minimum investment report means the report documenting a mandatory minimum level of financial or resource investment in demand-side management (DSM) initiatives, including energy efficiency and load management, and/or renewable energy activities, such as investment of a set minimum percentage of the utility's gross revenues in renewable energy, which is imposed by State, Tribal, or Federal law upon a customer under its jurisdiction. For the purposes of this part, the minimum investment report includes reports about public benefits charges, as well.

Public benefits charge means a mandatory financial charge imposed by State, Tribal, or Federal law upon a customer under its jurisdiction to support one or more of the following: energy efficiency, conservation, or demand-side management; renewable energy; efficiency or alternative energy-related research and development; low-income energy assistance; and/or other similar programs defined by applicable State, Tribal, or Federal law. This term is also known as a public goods or system benefit charge in the utility industry.

Region means a Western regional office or management center, and the geographic territory served by that regional office or management center: the Desert Southwest Customer Service Region, the Rocky Mountain Customer Service Region, the Sierra Nevada Customer Service Region, the Upper Great Plains Customer Service Region, or the Colorado River Storage Project Management Center.

Renewable energy means any source of electricity that is self-renewing, including plant-based biomass, waste-based biomass, geothermal, hydropower, ocean thermal, solar (active and passive), and wind.

Small customer means a utility customer with total annual sales and usage of 25 gigawatthours (GWh) or less, as averaged over the previous 5 years, which is not a member of a joint-action agency or generation and transmission cooperative with power supply responsibility; or any end-use customer.

Western means the Western Area Power Administration.

10 CFR Ch. III (1–1–16 Edition)

Subpart B—Integrated Resource Planning

SOURCE: 65 FR 16796, Mar. 30, 2000, unless otherwise noted.

§ 905.10 Who must comply with the integrated resource planning and reporting regulations in this subpart?

(a) *Integrated resource plans (IRP) and alternatives.* Each Western customer must address its power resource needs in an IRP prepared and submitted to Western as described in this subpart. Alternatively, Western customers may submit a small customer plan, minimum investment report or EE/RE report as provided in this subpart.

(b) *Rural Utility Service and state utility commission reports.* For customers subject to IRP filings or other electrical resource use reports from the Rural Utilities Service or a state utility commission, nothing in this part requires a customer to take any action inconsistent with those requirements.

§ 905.11 What must an IRP include?

(a) *General.* Integrated resource planning is a planning process for new energy resources that evaluates the full range of alternatives, including new generating capacity, power purchases, energy conservation and efficiency, cogeneration and district heating and cooling applications, and renewable energy resources, to provide adequate and reliable service to a customer's electric consumers. An IRP supports customer-developed goals and schedules. The plan must take into account necessary features for system operation, such as diversity, reliability, dispatchability, and other risk factors; must take into account the ability to verify energy savings achieved through energy efficiency and the projected durability of such savings measured over time; and must treat demand and supply resources on a consistent and integrated basis.

(b) *IRP criteria.* IRPs must consider electrical energy resource needs and may consider, at the customer's option, water, natural gas, and other energy resources. Each IRP submitted to Western must include:

Department of Energy

§ 905.11

(1) *Identification of resource options.* Identification and comparison of resource options is an assessment and comparison of existing and future supply-and demand-side resource options available to a customer based upon its size, type, resource needs, geographic area, and competitive situation. Resource options evaluated by the specific customer must be identified. The options evaluated should relate to the resource situation unique to each Western customer as determined by profile data (such as service area, geographical characteristics, customer mix, historical loads, projected growth, existing system data, rates, and financial information) and load forecasts. Specific details of the customer's resource comparison need not be provided in the IRP itself. They must, however, be made available to Western upon request.

(i) Supply-side options include, but are not limited to, purchased power contracts and conventional and renewable generation options.

(ii) Demand-side options alter the customer's use pattern to provide for an improved combination of energy services to the customer and the ultimate consumer.

(iii) Considerations that may be used to develop potential options include cost, market potential, consumer preferences, environmental impacts, demand or energy impacts, implementation issues, revenue impacts, and commercial availability.

(iv) The IRP discussion of resource options must describe the options chosen by the customer, clearly demonstrating that decisions were based on a reasonable analysis of the options. The IRP may strike a balance among the applicable resource evaluation factors.

(2) *Action plan.* IRPs must include an action plan describing specific actions the customer will take to implement its IRP.

(i) The IRP must state the time period that the action plan covers, and the action plan must be updated and resubmitted to Western when this time period expires. The customer may submit a revised action plan with the annual IRP progress report discussed in § 905.14.

(ii) For those customers not experiencing or anticipating load growth, the action plan requirement for the IRP may be satisfied by a discussion of current actions and procedures in place to periodically reevaluate the possible future need for new resources. The action plan must include a summary of:

(A) Actions the customer expects to take in accomplishing the goals identified in the IRP;

(B) Milestones to evaluate accomplishment of those actions during implementation; and

(C) Estimated energy and capacity benefits for each action planned.

(3) *Environmental effects.* To the extent practical, the customer must minimize adverse environmental effects of new resource acquisitions and document these efforts in the IRP. Customers are neither precluded from nor required to include a quantitative analysis of environmental externalities as part of the IRP process. IRPs must include a qualitative analysis of environmental effects in summary format.

(4) *Public participation.* The customer must provide ample opportunity for full public participation in preparing and developing an IRP (or any IRP revision or amendment). The IRP must include a brief description of public involvement activities, including how the customer gathered information from the public, identified public concerns, shared information with the public, and responded to public comments. Customers must make additional documentation identifying or supporting the full public process available to Western upon request.

(i) As part of the public participation process for an MBA, the governing body of an MBA must approve the IRP in accordance with the MBA's by-laws, confirming that all requirements have been met. To indicate approval in the case of an individual IRP submitted by an entity with a board of directors or city council, a responsible official must sign the IRP submitted to Western or the customer must document passage of an approval resolution by the appropriate governing body included or referred to in the IRP.

(ii) For Western customers that do not purchase electricity for resale, such as some State, Tribal, and Federal

§ 905.12

agencies, the customer can satisfy the public participation requirement by having a top management official with resource acquisition responsibility review and concur on the IRP. The customer must note this concurrence in the IRP.

(5) *Load forecasting.* An IRP must include a statement that the customer conducted load forecasting. Load forecasting should include data that reflects the size, type, resource conditions, and demographic nature of the customer using an accepted load forecasting method, including but not limited to the time series, end-use, and econometric methods. The customer must make the load forecasting data available to Western upon request.

(6) *Measurement strategies.* The IRP must include a brief description of measurement strategies for options identified in the IRP to determine whether the IRP's objectives are being met. These validation methods must include identification of the baseline from which a customer will measure the benefits of its IRP implementation. A reasonable balance may be struck between the cost of data collection and the benefits resulting from obtaining exact information. Customers must make performance validation and evaluation data available to Western upon request.

(c) *IRP criteria for certain customers not qualifying for "small customer" status.* Customers with limited economic, managerial, and resource capability and total annual sales and usage of 25 gigawatthours (GWh) or less who are members of joint-action agencies and generation and transmission cooperatives with power supply responsibility are eligible for the criteria specified in paragraphs (c)(1) and (c)(2) of this section.

(1) Each IRP submitted by a customer under paragraph (c) of this section must:

(i) Consider all reasonable opportunities to meet future energy service requirements using DSM techniques, renewable energy resources, and other programs; and

(ii) Minimize, to the extent practical, adverse environmental effects.

10 CFR Ch. III (1–1–16 Edition)

(2) Each IRP submitted by a customer under paragraph (c) of this section must include, in summary form:

(i) Customer name, address, phone number, email and Website if applicable, and contact person;

(ii) Customer type;

(iii) Current energy and demand profiles, and data on total annual energy sales and usage for the past 5 years, which Western will use to verify that customers qualify for these criteria;

(iv) Future energy services projections;

(v) How items in paragraphs (c)(1)(i) and (c)(1)(ii) of this section were considered; and

(vi) Actions to be implemented over the customer's planning timeframe.

[65 FR 16795, Mar. 30, 2000, as amended at 73 FR 35062, June 20, 2008]

§ 905.12 How must IRPs be submitted?

(a) *Number of IRPs submitted.* Except as provided in paragraph (c) of this section, one IRP is required per customer, regardless of the number of long-term firm power contracts between the customer and Western.

(b) *Method of submitting IRPs.* Customers must submit IRPs to Western under one of the following options:

(1) Customers may submit IRPs individually.

(2) MBAs may submit IRPs for each of their members or submit one IRP on behalf of all or some of their members. An IRP submitted by an MBA must specify the responsibilities and participation levels of individual members and the MBA. Any member of an MBA may submit an individual IRP to Western instead of being included in an MBA IRP.

(3) Customers may submit IRPs as regional/IRP cooperatives when previously approved by Western. Western encourages customers to prepare "regional" IRPs. Regional IRPs are voluntary and participants need not be members of an MBA or a Western customer. Regional/IRP cooperatives may also submit small customer plans, minimum investment reports, and EE/RE reports on behalf of eligible IRP cooperative members.

(c) *Alternatives to submitting individual IRPs.* Customers with Western approval

Department of Energy

§ 905.15

to submit small customer plans, minimum investment or EE/RE reports may substitute the applicable plan or report instead of an IRP. Each customer that intends to seek approval for IRP cooperative, small customer, minimum investment report or EE/RE report status must provide advance written notification to Western. A new customer must provide this notification to the Western Regional Manager of the Region in which the customer is located within 30 days from the time it becomes a customer. Any customer may resubmit an IRP or notify Western of its plan to change its compliance method at any time so long as there is no period of noncompliance.

[65 FR 16795, Mar. 30, 2000, as amended at 73 FR 35062, June 20, 2008]

§ 905.13 When must IRPs be submitted?

(a) *Submitting the initial IRP.* Except as provided in paragraph (c) of this section, customers that have not previously had an IRP approved by Western must submit the initial IRP to the appropriate Regional Manager no later than 1 year after May 1, 2000, or after becoming a customer, whichever is later.

(b) *Updates and amendments to IRPs.* Customers must submit updated IRPs to the appropriate Regional Manager every 5 years after Western's approval of the initial IRP. Customers that complied with Western's IRP regulations in effect before May 1, 2000 must maintain their submission and resubmission schedules previously in effect. Customers may submit amendments and revisions to IRPs at any time.

(c) *IRP cooperatives.* Customers with geographic, resource supply, and other similarities may join together and request, in writing, Western's approval to become an IRP cooperative. Western will respond to IRP cooperative status requests within 30 days of receiving a request. If Western disapproves a request for IRP cooperative status, the requesting participants must maintain their currently applicable integrated resource or small customer plans, or submit the initial IRPs no later than 1 year after the date of the disapproval letter. Western's approval of IRP cooperative status will not be based on any

potential participant's contractual status with Western. Each IRP cooperative must submit an IRP for its participants within 18 months after Western approves IRP cooperative status.

§ 905.14 Does Western require annual IRP progress reports?

Yes, customers must submit IRP progress reports each year within 30 days of the anniversary date of the approval of the currently applicable IRP. The reports must describe the customer's accomplishments achieved under the action plan, including projected goals and implementation schedules, and energy and capacity benefits and renewable energy developments achieved as compared to those anticipated. Western prefers measured values, but will accept reasonable estimates if measurement is infeasible or not cost-effective. Instead of a separate progress report, the customer may use any other annual report that the customer submits to Western or another entity, at the customer's discretion, if that report contains all required data for the previous full year and is submitted within 30 days of the approval anniversary date of the currently applicable IRP. With Western's approval, customers may submit reports outside of the 30-day anniversary date window.

§ 905.15 What are the requirements for the small customer plan alternative?

(a) *Requesting small customer status.* Small customers may submit a request to prepare a small customer plan instead of an IRP. Requests for small customer status from electric utilities must include data on total annual energy sales and usage for the 5 years prior to the request. Western will average this data to determine overall annual energy sales and usage so that uncontrollable events, such as extreme weather, do not distort leveled energy sales and usage. Requests from end-use customers must only document that the customer does not purchase electricity for resale. Western will respond to small customer status requests within 30 days of receiving the request. If Western disapproves a request, the customer must maintain its currently applicable IRP, or submit the

§ 905.16

10 CFR Ch. III (1–1–16 Edition)

initial IRP no later than 1 year after the date of the disapproval letter. Alternatively, the customer may submit a request for minimum investment report or EE/RE report status, as appropriate.

(b) *Small customer plan contents.* Small customer plans must:

(1) Consider all reasonable opportunities to meet future energy service requirements using demand-side management techniques, renewable energy resources, and other programs that provide retail consumers with electricity at reasonable cost;

(2) Minimize, to the extent practical, adverse environmental effects; and

(3) Present in summary form the following information:

(i) Customer name, address, phone number, email and Website if applicable, and contact person;

(ii) Type of customer;

(iii) Current energy and demand profiles and data on total annual energy sales and usage for the previous 5 years for utility customers, or current energy and demand use for end-use customers;

(iv) Future energy services projections;

(v) How items in paragraphs (b)(1) and (b)(2) of this section were considered; and

(vi) Actions to be implemented over the customer’s planning timeframe.

(c) *When to submit small customer plans.* Small customers must submit the first small customer plan to the appropriate Western Regional Manager within 1 year after Western approves the request for small customer status. Small customers must submit, in writing, a small customer plan every 5 years.

(d) *Maintaining small customer status.*

(1) Every year on the anniversary of Western’s approval of the plan, small customers must submit a letter to Western verifying that either their annual energy sales and usage is 25 GWh or less averaged over the previous 5 years, or they continue to be end-use customers. The letter must also identify their achievements against targeted action plans, as well as the revised summary of actions if the previous summary of actions has expired.

(2) Western will use the letter for overall program evaluation and comparison with the customer’s plan, and for verification of continued small customer status. Customers may submit annual update letters outside of the anniversary date if previously agreed to by Western so long as the letter contains all required data for the previous full year.

(e) *Losing eligibility for small customer status.* (1) A customer ceases to be a small customer if it:

(i) Is a utility customer and exceeds total annual energy sales and usage of 25 GWh, as averaged over the previous 5 years; or

(ii) Is no longer an end-use customer.

(2) Western will work with a customer that loses small customer status to develop an appropriate schedule for submitting an IRP or other report required under this subpart.

§ 905.16 What are the requirements for the minimum investment report alternative?

(a) *Request to submit the minimum investment report.* Customers may submit a request to prepare a minimum investment report instead of an IRP. Minimum investment reports may be submitted by MBAs on behalf of the MBA or its members, and by IRP cooperatives on behalf of its participants. Requests to submit minimum investment reports must include data on:

(1) The source of the minimum investment requirement (number, title, date, and jurisdiction of law);

(2) The initial, annual, and other reporting requirement(s) of the mandate, if any; and

(3) The mandated minimum level of investment or public benefits charge for DSM and/or renewable energy.

(b) *Minimum investment requirement.* The minimum investment must be either:

(1) A mandatory set percentage of customer gross revenues or other specific minimum investment in DSM and/or renewable energy mandated by a State, Tribal, or Federal Government with jurisdictional authority; or

(2) A required public benefits charge, including charges to be collected for and spent on DSM; renewable energy;

Department of Energy

§ 905.16

efficiency and alternative energy-related research and development; low-income energy assistance; and any other applicable public benefits category, mandated by a State, Tribal, or Federal Government with jurisdictional authority. Participation in a public benefits program requires either a mandatory set percentage of customer gross revenues or other specific charges to be applied toward the programs as determined by the applicable State, Tribal, or Federal authority. The revenues from the public benefits charge may be expended directly by the customer, or by another entity on behalf of the customer as determined by the applicable State, Tribal, or Federal authority.

(c) *Multi-state entities.* For those customers with service territories lying in more than one State or Tribal jurisdiction, and where at least one of the States or Tribal jurisdictions has a mandated minimum investment requirement, to meet this alternative customers must use the highest requirement from the State or Tribe within the customer's service territory and additionally apply it to all members in those States or Tribal jurisdictions in which there is no requirement. Alternatively, if each State or Tribe has a requirement, customers may satisfy Western's requirement by reporting on compliance with each applicable minimum investment requirement. Western will work with multi-state entities to ensure the most effective, and least burdensome, compliance mechanism.

(d) *Western's response to minimum investment report requests.* Western will respond to requests to accept minimum investment reports within 30 days of receiving the request. If Western disapproves a request to allow use of the minimum investment report, the customer must maintain its currently applicable IRP or small customer plan, or submit its initial IRP no later than 1 year after the date of the disapproval letter. Alternatively, the customer may submit a request for small customer plan or EE/RE report status, as appropriate.

(e) *Minimum investment report contents.* Reports documenting compliance with a minimum level of investment in

DSM and/or renewable energy must include:

(1) Customer name, address, phone number, email and Website if applicable, and contact person;

(2) Authority or requirement to undertake a minimum investment, including the source of the minimum investment requirement (number, title, date, and jurisdiction of law or regulation); and

(3) A description of the minimum investment, including:

(i) Minimum percentage or other minimum requirement for DSM and/or renewable energy, including any charges to be collected for and spent on DSM, renewable energy, efficiency or alternative energy-related research and development, low-income energy assistance, and any other applicable public benefits categories;

(ii) Actual or estimated energy and/or capacity savings resulting from minimum investments in DSM, if known;

(iii) Actual or estimated energy and/or capacity resulting from minimum investments in renewable energy, if known; and

(iv) A description of the DSM and/or renewable energy activities to be undertaken over the next 2 years as a result of the requirement for minimum investment, if known.

(f) *Minimum investment report approval.* Western will approve the minimum investment report when it meets the requirements in paragraph (e) of this section.

(g) *When to submit the minimum investment report.* The customer must submit the first minimum investment report to the appropriate Western Regional Manager within 1 year after Western approves the request to accept the minimum investment report. Customers choosing this option must maintain IRP or small customer plan compliance with Western's IRP regulations in effect before May 1, 2000, including submitting annual progress reports or update letters, until submitting the first minimum investment report, to ensure there is no gap in complying with section 114 of EPA Act. Customers must submit, in writing, a minimum investment report every 5 years.

(h) *Maintaining minimum investment reports.* (1) Every year on the anniversary of Western’s approval of the first minimum investment report, customers choosing this option must submit a letter to Western verifying that they remain in compliance with the minimum investment requirement. The letter must also contain summary information identifying annual energy and capacity savings associated with minimum investments in DSM, if known, and energy and capacity associated with minimum investments in renewable energy, if known. The letter must also include a revised description of customer DSM and/or renewable energy activities if the description from the minimum investment report has changed or expired.

(2) Western will use the letter for overall program evaluation and to ensure customers remain in compliance. Customers may submit letters outside of the anniversary date if previously agreed to by Western, and if the letter contains all required data for the previous full year. Instead of a separate letter, a customer choosing this option may submit the State, Tribal, or Federal required annual report documenting the minimum investment and associated DSM and/or renewable energy savings and/or use, if known.

(i) *Loss of eligibility to submit the minimum investment report.* (1) A customer ceases to be eligible to submit a minimum investment report if:

(i) A State, Tribal, or Federal mandate no longer applies to the customer, or

(ii) The customer does not comply with the minimum level of investment in applicable State, Tribal, or Federal law.

(2) Western will work with a customer no longer eligible to submit a minimum investment report to develop an appropriate schedule to submit an IRP or other plan or report required under this subpart.

§ 905.17 What are the requirements for the energy efficiency and/or renewable energy report (EE/RE report) alternative?

(a) *Requests to submit an EE/RE report.* End-use customers may submit a request to prepare an EE/RE report in-

stead of an IRP. Requests to submit EE/RE reports must include data on:

(1) The source of the EE/RE reporting requirement (number, title, date, and jurisdiction of law or regulation);

(2) The initial, annual, and other reporting requirement(s) of the report; and

(3) A summary outline of the EE/RE report’s required data or components, including any requirements for documenting customer energy efficiency and renewable energy activities.

(b) *EE/RE report requirement.* The EE/RE report is based on a mandate by a State, Tribal, or Federal Government to implement energy efficiency and/or renewable energy activities within a specified timeframe, for which there is also an associated reporting requirement. The EE/RE report may include only electrical resource use and energy efficiency and/or renewable energy activities, or may additionally include other resource information, such as water and natural gas data. At a minimum, the EE/RE report must annually document energy efficiency and/or renewable energy activities undertaken by the end-use customer.

(c) *Western’s response to EE/RE report requests.* Western will respond to requests to accept EE/RE reports within 30 days of receiving the request. If Western disapproves a request to allow use of the EE/RE report, the customer must maintain its currently applicable IRP or small customer plan, or submit its initial IRP no later than 1 year after the date of the disapproval letter. Alternatively, the customer may submit a request for small customer plan or minimum investment report, as appropriate, within 30 days after the date of the disapproval letter.

(d) *EE/RE report contents.* EE/RE reports must include:

(1) Customer name, address, phone number, email and Website if applicable, and contact person;

(2) Authority or requirement to complete the EE/RE report, including the source of the requirement (number, title, date, and jurisdiction of law); and

(3) A description of the customer’s required energy efficiency and/or renewable energy activities, including:

(i) Level of investment or expenditure in energy efficiency and/or renewable energy, and quantifiable energy savings or use goals, if defined by the EE/RE reporting requirement;

(ii) Annual actual or estimated energy and/or capacity savings, if any, associated with energy efficiency and resulting from the EE/RE reporting requirement;

(iii) Actual or estimated energy and/or capacity, if any, associated with renewable energy and resulting from the EE/RE reporting requirement;

(iv) A description of the energy efficiency and/or renewable energy activities to be undertaken over the next 2 years as a result of the EE/RE reporting requirement.

(e) *EE/RE report approval.* Western will approve the EE/RE report when the report meets the requirements in paragraph (d) of this section.

(f) *When to submit the EE/RE report.* The customer must submit the first EE/RE report to the appropriate Western Regional Manager within 1 year after Western approves the request to accept the EE/RE report. Customers choosing this option must maintain IRP or small customer plan compliance with Western's IRP regulations in effect before May 1, 2000, including submitting annual progress reports or update letters, until submitting the first EE/RE report to ensure there is no gap in complying with section 114 of EPAct. Customers must submit, in writing, an EE/RE report every 5 years.

(g) *Maintaining EE/RE reports.* (1) Every year on the anniversary of Western's approval of the first EE/RE report, customers choosing this option must submit an annual EE/RE letter to Western. The letter must contain summary information identifying customer annual energy and capacity savings associated with energy efficiency, if any, and annual customer energy and capacity associated with renewable energy, if any. The letter must also verify that the customer remains in compliance with the EE/RE reporting requirement. Additionally, the letter must include a revised description of customer DSM and/or renewable energy activities if the description from the EE/RE report has changed or expired. If this information is contained in an EE/RE report

sent to another authority, the customer may submit that report instead of a separate letter.

(2) Customers may submit annual EE/RE letters outside of the anniversary date if previously agreed to by Western if the letter contains all required data for the previous full year.

(h) *Loss of eligibility to submit the EE/RE report.* (1) A customer ceases to be eligible to submit a EE/RE report if:

(i) The EE/RE reporting requirement no longer applies to the customer, or

(ii) The customer does not comply with the EE/RE reporting requirements in applicable State, Tribal, or Federal law.

(2) Western will work with a customer no longer eligible to submit an EE/RE report to develop an appropriate schedule to submit a small customer plan or other plan or report required under this subpart.

§ 905.18 What are the criteria for Western's approval of submittals?

(a) *Approval criteria.* Western will approve all plans and reports based upon:

(1) Whether the plan or report satisfactorily addresses the criteria in the regulations in this subpart; and

(2) The reasonableness of the plan or report given the size, type, resource needs, geographic area, and competitive situation of the customer.

(b) *Review of resource choices.* Western will review resource choices using section 114 of EPAct and this subpart. Western will disapprove plans and reports if Western deems that they do not meet the reasonableness criteria in paragraph (a)(2) of this section or the provisions of section 114 of EPAct.

(c) *Accepting plans and reports under other initiatives.* If a customer or group of customers implements integrated resource planning under a program responding to other Federal, Tribal, or State initiatives, Western will accept and approve the plan or report as long as it substantially complies with the requirements of this subpart.

(d) *Water-based plans and reports.* In evaluating a plan or report, Western will consider water planning, efficiency improvements, and conservation in the same manner it considers energy planning and efficiencies. Customers that

provide water utility services and customers that service irrigation load as part of their overall load may include water conservation activities in their plans or reports. To the extent practical, customers should convert reported water savings to energy values.

§ 905.19 How are plans and reports reviewed and approved?

Western will review all plans and reports submitted under this subpart and notify the submitting entity of the plan's or report's acceptability within 120 days after receiving it. If a plan or report submittal is insufficient, Western will provide a notice of deficiencies to the entity that submitted the plan or report. Western, working together with the entity, will determine the time allowable for resubmitting the plan or report. However, the time allowed for resubmittal will not be greater than 9 months after the disapproval date, unless otherwise provided by applicable contract language.

§ 905.20 When are customers in non-compliance with the regulations in this subpart, and how does Western ensure compliance?

(a) *Good faith effort to comply.* If it appears that a customer's activities may be inconsistent with the applicable IRP, small customer plan, minimum investment report or EE/RE report, Western will notify the customer and offer the customer 30 days to provide evidence of its good faith effort to comply. If the customer does not correct the specified deficiency or submit such evidence, or if Western finds, after receiving information from the customer, that a good faith effort has not been made, Western will impose a penalty.

(b) *Penalties for noncompliance.* Western will impose a penalty on long-term firm power customers for failing to submit or resubmit an acceptable IRP and action plan, small customer plan, minimum investment report or EE/RE report as required by this subpart. Western will also impose a penalty when the customer's activities are not consistent with the applicable plan or report unless Western finds that a good faith effort has been made to comply with the approved plan or report.

(c) *Written notification of penalty.* Western will provide written notice of a penalty to the customer, and to the MBA or IRP cooperative when applicable. The notice will specify the reasons for the penalty.

(d) *Penalty options.* (1) Beginning with the first full billing period following the notice specified in paragraph (c) of this section, Western will impose a surcharge of 10 percent of the monthly power charges until the deficiency specified in the notice is cured, or until 12 months pass. However, Western will not immediately impose a penalty if the customer or its MBA or IRP cooperative requests reconsideration by filing a written appeal under § 905.21.

(2) The surcharge increases to 20 percent for the second 12 months and to 30 percent per year thereafter until the deficiency is cured.

(3) After the first 12 months of the surcharge and instead of imposing any further surcharge, Western may impose a penalty that would reduce the resource delivered under a customer's long-term firm power contract(s) by 10 percent. Western may impose this resource reduction either:

- (i) When it appears to be more effective to ensure customer compliance, or
- (ii) When such reduction may be more cost-effective for Western.

(4) The penalty provisions in existing contracts will continue to be in effect and administered and enforced according to applicable contract provisions.

(e) *Assessing and ceasing penalties.* Western will assess the surcharge on the total charges for all power obtained by a customer from Western and will not be limited to surcharges on only firm power sales. When a customer resolves the deficiencies, Western will cease imposing the penalty, beginning with the first full billing period after compliance is achieved.

(f) *Penalties on MBAs and IRP cooperatives.* In situations involving a plan or report submitted by an MBA on behalf of its members where a single member does not comply, Western will impose a penalty upon the MBA on a pro rata basis in proportion to that member's share of the total MBA's power received from Western. In situations involving noncompliance by a participant of an IRP cooperative, Western

Department of Energy

§ 905.23

will impose any applicable penalty directly upon that participant if it has a firm power contract with Western. If the IRP cooperative participant does not have a firm power contract with Western, then Western will impose a penalty upon the participant's MBA on a pro rata basis in proportion to that participant's share of the total MBA's power received from Western.

§ 905.21 What is the administrative appeal process?

(a) *Filing written appeals with Western.* If a customer disagrees with Western's decision on the acceptability of its IRP, small customer plan, minimum investment report or EE/RE report submittal, its compliance with an approved plan or report, or any other compliance issue, the customer may request reconsideration by filing a written appeal with the appropriate Regional Manager. Customers may submit appeals any time such disagreements occur and should be specific as to the nature of the issue, the reasons for the disagreement, and any other pertinent facts the customer believes should be brought to Western's attention. The Regional Manager will respond within 45 days of receiving the appeal. If resolution is not achieved at the Regional Office level, the customer may appeal to the Administrator, who will respond within 30 days of receiving the appeal.

(b) *Alternative dispute resolution.* Upon request, Western will agree to use mutually agreeable alternative dispute resolution procedures, to the extent allowed by law, to resolve issues or disputes relating to compliance with the regulations in this subpart.

(c) *Penalties during appeal.* Western will not impose a penalty while an appeal process is pending. However, if the appeal is unsuccessful for the customer, Western will impose the penalty retroactively from the date the penalty would have been assessed if an appeal had not been filed.

(d) *Meeting other requirements during appeal process.* A written appeal or use of alternative dispute resolution procedures does not suspend other reporting and compliance requirements.

§ 905.22 How does Western periodically evaluate customer actions?

(a) *Periodic review of customer actions.* Western will periodically evaluate customer actions to determine whether they are consistent with the approved IRP or minimum investment report. Small customer plans and EE/RE reports are not subject to this periodic review.

(b) *Reviewing representative samples of plans and reports.* Western will periodically review a representative sample of IRPs and minimum investment reports, and the customer's implementation of the applicable plan or report from each of Western's Regions. The samples will reflect the diverse characteristics and circumstances of the customers that purchase power from Western. These reviews will be in addition to, and separate and apart from, the review of initial and updated IRPs and minimum investment reports to ensure compliance with this subpart.

(c) *Scope of periodic reviews.* Periodic reviews may consist of any combination of review of the customer's annual IRP progress reports, minimum investment letters, telephone interviews, or on-site visits. Western will document these periodic reviews and may report on the results of the reviews in Western's annual report.

§ 905.23 What are the opportunities for using the Freedom of Information Act to request plan and report data?

IRPs, small customer plans, minimum investment reports and EE/RE reports and associated data submitted to Western are subject to the Freedom of Information Act (FOIA) and may be made available to the public upon request. IRPs must be posted on a customer's publicly available Web site or on Western's Web site. Customers posting their IRPs on their own Web site must notify Western of this decision when they submit their IRP. A hotlink on Western's Web site to IRPs posted on customer Web sites gives interested parties ready access to those IRPs. Western will post on its Web site the IRPs of customers that do not post on their own Web sites. Prior to posting, Western will provide the customer the opportunity to submit its views on

§ 905.24

whether information contained in the IRP is exempt from the FOIA's mandatory public disclosure requirements. Customers may request confidential treatment of all or part of a submitted document consistent with FOIA exemptions. Western will determine whether particular information is exempt from public access. Western will not disclose to the public information it has determined to be exempt, recognizing that certain competition-related customer information may be proprietary.

[73 FR 35062, June 20, 2008]

§ 905.24 Will Western conduct reviews of this program?

Yes, Western may periodically initiate a public process to review the regulations in this subpart to determine whether they should be revised to reflect changes in technology, needs, or other developments.

Subpart C—Power Marketing Initiative

§ 905.30 Purpose and applicability.

(a) The Power Marketing Initiative (PMI) provides a framework for marketing Western's long-term firm hydroelectric resources. For covered projects, Western will make a major portion of the resources currently under contract available to existing long-term firm power customers for a period of time beyond the expiration date of their current contracts.

(b) The Western projects covered by this subpart are the Pick-Sloan Missouri Basin Program—Eastern Division and the Loveland Area Projects (LAP). The PMI applies to covered projects to the extent it is consistent with other contractual and legal rights, and subject to any applicable project-specific environmental requirements.

§ 905.31 Term.

Western will extend resource commitments for 20 years from the date existing contracts expire to existing customers with long-term firm power contracts from projects identified in section 905.30(b).

10 CFR Ch. III (1–1–16 Edition)

§ 905.32 Resource extensions and resource pool size.

(a) Western will extend a project-specific percentage of the marketable resource, determined to be available at the time future resource extensions begin, to existing customers with long-term firm power contracts. The remaining unextended power will be used to establish project-specific resource pools. An initial level of 96 percent of the marketable resource will be extended for the Pick-Sloan Missouri Basin Program—Eastern Division and the Loveland Area Projects.

(b) At two 5-year intervals after the effective date of the extension to existing customers, Western shall create a project-specific resource pool increment of up to an additional 1 percent of the long-term marketable resource under contract at the time. The size of the additional resource pool increment shall be determined by Western based on consideration of the actual fair-share needs of eligible new customers and other appropriate purposes.

(c) The initial pool percentages shall be applied to the marketable resource determined to be available at the time future resource extensions begin. Subsequent percentages shall be applied to the resource under contract at the time.

(d) The additional resource pool increments shall be established by pro rata withdrawals, on 2 years' notice, from then-existing customers. Withdrawals could be mitigated or delayed if good water conditions exist.

(e) Once the extensions for existing customers and allocations to new customers from the resource pool have been made, additional power resources may become available for various reasons. Any additional available resources will be used as follows:

(1) If power is reserved for new customers but not allocated, or resources are offered but not placed under contract, this power will be offered on a pro rata basis to customers that contributed to the resource pool through application of the extension formula in § 905.33.

(2) If power resources become available as a result of the enhancement of existing generation, project-use load efficiency upgrades, the development of

Department of Energy

§ 905.35

new resources, or resources turned back to Western, Western may elect to use this power to reduce the need to acquire firming resources, retain the power for operational flexibility, sell these resources on a short-term basis, or allocate the power.

(3) If resources become available due to imposition of penalties pursuant to §905.17, Western may make such resources available within the marketing area to existing customers that are in compliance with subpart B, subject to withdrawal.

§ 905.33 Extension formula.

(a) The amount of power to be extended to an existing customer shall be determined according to this formula:

Customer Contract Rate of Delivery (CROD) today/total project CROD under contract today × project-specific percentage × marketable resource determined to be available at the time future resource extensions begin = CROD extended.

(b) Where contract rates of delivery vary by season, the formula shall be used on a seasonal basis to determine the extended power resource. A similar pro rata approach shall be used for energy extensions.

(c) Determination of the amount of resource available after existing contracts expire, if significantly different from existing resource commitments, shall take place only after an appropriate public process.

(d) The formula set forth in paragraph (a) of this section also should be used to determine the amounts of firm power subject to withdrawal at 5-year intervals after the effective date of the extension to existing customers, except that the percentage used would be up to 1 percent for each of the two withdrawal opportunities, and the formula would use the customer CROD, project CROD and the resource under contract at the time.

§ 905.34 Adjustment provisions.

Western reserves the right to adjust marketable resources committed to all customers with long-term firm power contracts only as required to respond to changes in hydrology and river operations, except as otherwise expressly provided in these regulations. Under

contracts that extend resources under this PMI, existing customers shall be given at least 5 years' notice before adjustments are made. New customers may receive less notice. The earliest that any notice under this section shall become effective is the date that existing contractual commitments expire. Any adjustment shall only take place after an appropriate public process. Withdrawals to serve project use and other purposes provided for by contract shall continue to take place based on existing contract/marketing criteria principles.

§ 905.35 New customer eligibility.

(a) Allocations to new customers from the project-specific resource pools established under §905.32 shall be determined through separate public processes in each project's marketing area. New customers receiving an allocation must execute a long-term firm power contract to receive the allocated power and are required to comply with the IRP requirements in this part. Contracts with new customers shall expire on the same date as firm power contracts with all other customers of a project.

(b) To be eligible for an allocation, a potential new customer must be a preference entity, as defined in Reclamation law, within the currently established marketing area for a project.

(c) Entities that desire to purchase power from Western for resale to consumers, including municipalities, cooperatives, public utility districts and public power districts, must have utility status. Native American tribes are not subject to this requirement. Utility status means that the entity has responsibility to meet load growth, has a distribution system, and is ready, willing, and able to purchase power from Western on a wholesale basis for resale to retail consumers. To be eligible to apply for power available from a project's initial resource pool, those entities that desire to purchase Western power for resale to consumers must have attained utility status by December 31, 1996, for the Pick-Sloan Missouri Basin Program—Eastern Division, and by September 30, 2000, for the Loveland Area Projects. To be eligible

§ 905.36

to apply for power from subsequent resource pool increments, these entities must have attained utility status no later than 3 years prior to availability of the incremental addition to the resource pool. Deadlines for attaining utility status for other projects will be established at a later date.

§ 905.36 Marketing criteria.

Western shall retain applicable provisions of existing marketing criteria for projects where resource commitments are extended beyond the current expiration date of long-term firm power sales contracts. Western must retain important marketing plan provisions such as classes of service, marketing area, and points of delivery, to the extent that these provisions are consistent with the PMI. The PMI, eligibility and allocation criteria for potential new customers, retained or amended provisions of existing marketing criteria, the project-specific resource definition, and the size of a project-specific resource pool shall constitute the future marketing plan for each project.

§ 905.37 Process.

Modified contractual language shall be required to place resource extensions under contract. Resource extensions and allocations to new customers from the initial resource pool will take effect when existing contracts expire. These dates are December 31, 2000, for the Pick-Sloan Missouri Basin Program—Eastern Division and September 30, 2004, for the Loveland Area Projects. For the Pick-Sloan Missouri Basin Program—Eastern Division, Western will offer contracts to existing customers for resource extensions no sooner than the effective date of the final regulations. For the Loveland Area Projects, existing contracts provide for potential adjustments to marketable resources in 1999. No contracts will be offered to existing customers for post-2004 Loveland Area Projects resources until the analysis of potential resource adjustments in 1999 has been completed and any adjustments are implemented. Existing power sales contracts require that this analysis be completed by 1996.

10 CFR Ch. III (1–1–16 Edition)

Subpart D—Energy Services

§ 905.40 Technical assistance.

Western shall establish a program that provides technical assistance to customers to conduct integrated resource planning, implement applicable IRPs and small customer plans, and otherwise comply with the requirements of these regulations.

Subpart E—Final Principles of Integrated Resource Planning for Western Resource Acquisition

SOURCE: 79 FR 56481, Sept. 22, 2014, unless otherwise noted.

§ 905.50 Resource acquisition principles.

Western's resource acquisition activities will be determined by project-specific power marketing plans, hydro-power production capability, and the application of the following principles of IRP:

(a) Western will consider a full range of resource options, both supply-side and demand-side, as well as renewable resource options.

(b) On a project-by-project basis, Western, through a public process involving interested stakeholders will develop criteria to be used in evaluating power resource alternatives.

(c) Evaluation criteria will address cost, environmental impact, dependability, dispatchability, risk, diversity, and the ability to verify demand-side alternatives. Evaluation criteria will be reviewed as the need for resources changes or when long-term commitments to purchase power expire.

(d) Evaluation criteria will be consistent with Western's power marketing policy, which states that Federal power is to be marketed in such a manner as to encourage the most widespread use thereof at the lowest possible rates to consumers consistent with sound business principles. The policy, found in Delegation Order No. 00–037.00A, is derived from statutes authorizing the sale of power from both Department of the Army and Department of the Interior hydroelectric projects. These statutes include section 5 of the Flood Control Act of 1944, 16

Department of Energy

§ 950.3

U.S.C. 825(s) and section 9(c) of the Reclamation Project Act of 1939.

(e) Resource acquisition planning will be consistent with power marketing plans and associated contractual obligations.

(f) Resource acquisition decisions will be documented and made available to Western's power customers and the public.

§ 905.51 Transmission planning principles.

Western's transmission planning is conducted to assess the capability of the Federal transmission system to provide adequate and reliable electric service to its customers and the interconnected power grid. These planning efforts occur as part of its participation in regional and sub-regional planning entities as well as Western's Open Access Transmission Tariff.

PART 950—STANDBY SUPPORT FOR CERTAIN NUCLEAR PLANT DELAYS

Subpart A—General Provisions

Sec.

950.1 Purpose.

950.2 Scope and applicability.

SOURCE: 71 FR 46325, Aug. 11, 2006, unless otherwise noted.

Subpart A—General Provisions

§ 950.1 Purpose.

The purpose of this part is to facilitate the construction and full power operation of new advanced nuclear facilities by providing risk insurance for certain delays attributed to the Nuclear Regulatory Commission regulatory process or to litigation.

§ 950.2 Scope and applicability.

This part sets forth the policies and procedures for the award and administration of Standby Support Contracts between the Department and sponsors of new advanced nuclear facilities.

§ 950.3 Definitions.

For the purposes of this part:

Act means the Energy Policy Act of 2005.

Advanced nuclear facility means any nuclear facility the reactor design for which is approved after December 31, 1993, by the Nuclear Regulatory Commission (and such design or a substantially similar design of comparable capacity was not approved on or before that date).

Available indemnification means \$500 million with respect to the initial two reactors and \$250 million with respect to the subsequent four reactors.

Claims administrator means the official in the Department of Energy responsible for the administration of the

Standby Support Contracts, including the responsibility to approve or disapprove claims submitted by a sponsor for payment of covered costs under the Standby Support Contract.

Combined license means a combined construction and operating license (COL) for an advanced nuclear facility issued by the Commission.

Commencement of construction means the point in time when a sponsor initiates the pouring of safety-related concrete for the reactor building.

Commission means the Nuclear Regulatory Commission (NRC).

Conditional Agreement means a contractual agreement between the Department and a sponsor under which the Department will execute a Standby Support Contract with the sponsor if and only if the sponsor is one of the first six sponsors to satisfy the conditions precedent to execution of a Standby Support Contract, and if funding and other applicable contractual, statutory and regulatory requirements are satisfied.

Construction means the construction activities related to the advanced nuclear facility encompassed in the time period after commencement of construction and before the initiation of fuel load for the advanced nuclear facility.

Covered cost means:

(1) Principal or interest on any debt obligation financing an advanced nuclear facility (but excluding charges due to a borrower's failure to meet a debt obligation unrelated to the delay); and

(2) Incremental costs that are incurred as a result of covered delay.

Covered delay means a delay in the attainment of full power operation of an advanced nuclear facility caused by a covered event, as defined by this section.

Covered event means an event that may result in a covered delay due to:

(1) The failure of the Commission to comply with schedules for review and approval of inspections, tests, analyses and acceptance criteria established under the combined license;

(2) The conduct of pre-operational hearings by the Commission for the advanced nuclear facility; or

(3) Litigation that delays the commencement of full power operations of the advanced nuclear facility.

Department means the United States Department of Energy.

Full power operation means the point at which the sponsor first synchronizes the advanced nuclear facility to the electrical grid.

Grant account means the account established by the Secretary that receives appropriations or non-Federal funds in an amount sufficient to cover the amount of incremental costs for which indemnification is available under a Standby Support Contract.

Incremental costs means the incremental difference between:

(1) The fair market price of power purchased to meet the contractual supply agreements that would have been met by the advanced nuclear facility but for a covered delay; and

(2) The contractual price of power from the advanced nuclear facility subject to the delay.

Initial two reactors means the first two reactors covered by Standby Support Contracts that receive a combined license and commence construction.

Litigation means adjudication in Federal, State, local or tribal courts, including appeals of Commission decisions related to the combined license process to such courts, but excluding administrative litigation that occurs at the Commission related to the combined license process.

Loan cost means the net present value of the estimated cash flows of:

(1) Payments by the government to cover defaults and delinquencies, interest subsidies, or other payments; and

(2) Payments to the government including origination and other fees, penalties and recoveries, as outlined under the Federal Credit Reform Act of 1990.

Pre-operational hearing means any Commission hearing that is provided for in 10 CFR part 52, after issuance of the combined license.

Program account means the account established by the Secretary that receives appropriations or loan guarantee fees in an amount sufficient to cover the loan costs.

Program administrator means the Department official authorized by the Secretary to represent the Department

Department of Energy

§ 950.10

in the administration and management of the Standby Support Program, including negotiating with and entering into a Conditional Agreement or a Standby Support Contract with a sponsor.

Related party means the sponsor's parent company, a subsidiary of the sponsor, or a subsidiary of the parent company of the sponsor.

Secretary means the Secretary of Energy or a designee.

Sponsor means a person whose application for a combined license for an advanced nuclear facility has been docketed by the Commission.

Standby Support Contract means the contract that, when entered into by a sponsor and the Program Administrator pursuant to section 638 of the Energy Policy Act of 2005 after satisfaction of the conditions in §950.12 and any other applicable contractual, statutory and regulatory requirements, establishes the obligation of the Department to compensate covered costs in the event of a covered delay subject to the terms and conditions specified in the Standby Support Contract.

Standby Support Program means the program established by section 638 of the Act as administered by the Department of Energy.

Subsequent four reactors means the next four reactors covered by Standby Support Contracts, after the initial two reactors, which receive a combined license and commence construction.

System-level construction schedule means an electronic critical path method schedule identifying the dates and durations of plant systems installation (but excluding details of components or parts installation), sequences and interrelationships, and milestone dates from commencement of construction through full power operation, using software acceptable to the Department.

Subpart B—Standby Support Contract Process

§ 950.10 Conditional agreement.

(a) *Purpose.* The Department and a sponsor may enter into a Conditional Agreement. The Department will enter into a Standby Support Contract with the first six sponsors to satisfy the

specified conditions precedent for a Standby Support Contract if and only if all funding and other contractual, statutory and regulatory requirements have been satisfied.

(b) *Eligibility.* A sponsor is eligible to enter into a Conditional Agreement with the Program Administrator after the sponsor has submitted to the Department the following information but before the sponsor receives approval of the combined license application from the Commission:

(1) An electronic copy of the combined license application docketed by the Commission pursuant to 10 CFR part 52, and if applicable, an electronic copy of the design certification or early site permit, or environmental report referenced or included with the sponsor's combined license application;

(2) A summary schedule identifying the projected dates of construction, testing, and full power operation;

(3) A detailed business plan that includes intended financing for the project including the credit structure and all sources and uses of funds for the project, the most recent private credit rating or other similar credit analysis for project related covered financing, and the projected cash flows for all debt obligations of the advanced nuclear facility which would be covered under the Standby Support Contract;

(4) The sponsor's estimate of the amount and timing of the Standby Support payments for debt service under covered delays; and

(5) The estimated dollar amount to be allocated to the sponsor's covered costs for principal or interest on the debt obligation of the advanced nuclear facility and for incremental costs, including whether these amounts would be different if the advanced nuclear facility is one of the initial two reactors or one of the subsequent four reactors.

(c) The Program Administrator shall enter into a Conditional Agreement with a sponsor upon a determination by the Department that the sponsor is eligible for a Conditional Agreement, the information provided by the sponsor under paragraph (b) of this section is accurate and complete, and the Conditional Agreement is consistent with applicable laws and regulations.

§ 950.11

10 CFR Ch. III (1–1–16 Edition)

EFFECTIVE DATE NOTE: At 71 FR 46325, Aug. 11, 2006, § 950.10 was revised, effective Sept. 11, 2006. Paragraph (b) of this text contains information collection and recordkeeping requirements and will not become effective until approval has been given by the Office of Management and Budget.

§ 950.11 Terms and conditions of the Conditional Agreement.

(a) *General.* Each Conditional Agreement shall include a provision specifying that the Program Administrator and the sponsor will enter into a Standby Support Contract provided that the sponsor is one of the first six sponsors to fulfill the conditions precedent specified in § 950.12, subject to certain funding requirements and limitations specified in § 950.12 and any other applicable contractual, statutory and regulatory requirements.

(b) *Allocation of Coverage.* Each Conditional Agreement shall include a provision specifying the amount of coverage to be allocated under the Standby Support Contract to cover principal or interest costs and to cover incremental costs, including a provision on whether the allocation shall be different if the advanced nuclear facility is one of the initial two reactors or one of the subsequent four reactors, subject to paragraphs (c) and (d) of this section. A sponsor may elect to allocate 100 percent of the coverage to either the Program Account or the Grant Account.

(c) *Funding.* Each Conditional Agreement shall contain a provision that the Program Account or Grant Account shall be funded in advance of execution of the Standby Support Contract and in the following manner, subject to the conditions of paragraphs (d) and (e) of this section. Under no circumstances will the amount of the coverage for payments of principal or interest under a Standby Support Contract exceed 80 percent of the total of the financing guaranteed under that Contract.

(1) The Program Account shall receive funds appropriated to the Department, loan guarantee fees, or a combination of appropriated funds and loan guarantee fees that are in an amount equal to the loan costs associated with the amount of principal or interest covered by the available indemnification. Loan costs may not be paid from the proceeds of debt guaranteed or

funded by the Federal government. The parties shall specify in the Conditional Agreement the anticipated amount or anticipated percentage of the total funding in the Program Account to be contributed by appropriated funds to the Department, by the sponsor, by a non-federal source, or by a combination of these funding sources. Covered costs paid through the Program Account are backed by the full faith and credit of the United States.

(2) The Grant Account shall receive funds appropriated to the Department, funds from a sponsor, funds from a non-Federal source, or a combination of appropriated funds and funds from the sponsor or other non-Federal source, in an amount equal to the incremental costs. The parties shall specify in the Conditional Agreement the anticipated amount or anticipated percentage of the total funding in the Grant Account to be contributed by appropriated funds to the Department, by the sponsor, by a non-Federal source, or by a combination of these funding sources.

(d) *Reconciliation.* Each Conditional Agreement shall include a provision that the sponsor shall provide no later than ninety (90) days prior to execution of a Standby Support Contract sufficient information for the Program Administrator to recalculate the loan costs and the incremental costs associated with the advanced nuclear facility, taking into account whether the sponsor's advanced nuclear facility is one of the initial two reactors or the subsequent four reactors.

(e) *Limitations.* Each Conditional Agreement shall contain a provision that limits the Department's contribution of Federal funding to the Program Account or the Grant Account to only those amounts, if any, that are appropriated to the Department in advance of the Standby Support Contract for the purpose of funding the Program Account or Grant Account. In the event the amount of appropriated funds to the Department for deposit in the Program Account or Grant Account is not sufficient to result in an amount equal to the full amount of the loan costs or incremental costs resulting from the allocation of coverage under the Conditional Agreement pursuant to § 950.11(b), the sponsor shall no later than sixty

Department of Energy

§ 950.12

(60) days prior to execution of the Standby Support Contract:

(1) Notify the Department that it shall not execute a Standby Support Contract; or

(2) Notify the Department that it shall provide the anticipated contributions to the Program Account or Grant Account as specified in the Conditional Agreement pursuant to 950.11(c)(1). The sponsor shall have the option to provide additional funds to the Program Account or Grant Account up to the amount equal to the full amount of loan costs or incremental costs. In the event the sponsor does not provide sufficient additional funds to fund the Program Account or the Grant Account in an amount equal to the full amount of loan costs or incremental costs, then the amounts of coverage available under the Standby Support Contract shall be reduced to reflect the amounts deposited in the Program Account or Grant Account. If the sponsor elects less than the full amount of coverage available under the law, then the sponsor shall not have recourse against, and the Department is not liable for, any claims for an amount of covered costs in excess of that reduced amount of coverage or the amount deposited in the Grant Account upon execution of the Standby Support Contract, notwithstanding any other provision of law.

(f) *Termination of Conditional Agreements.* Each Conditional Agreement shall include a provision that the Conditional Agreement remains in effect until such time as:

(1) The sponsor enters into a Standby Support Contract with the Program Administrator;

(2) The sponsor has commenced construction on an advanced nuclear facility and has not entered into a Standby Support Contract with the Program Administrator within thirty (30) days after commencement of construction;

(3) The sponsor notifies the Program Administrator in writing that it wishes to terminate the Conditional Agreement, thereby extinguishing any rights or obligations it may have under the Conditional Agreement;

(4) The Program Administrator has entered into Standby Support Contracts that cover three different reac-

tor designs, and the Conditional Agreement is for an advanced nuclear facility of a different reactor design than those covered under existing Standby Support Contracts; or

(5) The Program Administrator has entered into six Standby Support Contracts.

§ 950.12 Standby Support Contract Conditions.

(a) *Conditions Precedent.* If Program Administrator has not entered into six Standby Support Contracts, the Program Administrator shall enter into a Standby Support Contract with the sponsor, consistent with applicable statutes and regulations and subject to the conditions set forth in paragraphs (b) and (c) of this section, upon a determination by the Department that all the conditions precedent to a Standby Support Contract have been fulfilled, including that the sponsor has:

(1) A Conditional Agreement with the Department, consistent with this subpart;

(2) A combined license issued by the Commission;

(3) Documentation that it possesses all Federal, State, or local permits required by law to commence construction;

(4) Documentation that it has commenced construction of the advanced nuclear facility;

(5) Documented coverage of insurance required for the project by the Commission and lenders;

(6) Paid any required fees into the Program Account and the Grant Account, as set forth in the Conditional Agreement and paragraph (b) of this section;

(7) Provided to the Program Administrator, no later than ninety (90) days prior to execution of the contract, the sponsor's detailed schedule for completing the inspections, tests, analyses and acceptance criteria in the combined license and informing the Commission that the acceptance criteria have been met; and the sponsor's proposed schedule for review of such inspections, tests, analyses and acceptance criteria by the Commission, consistent with § 950.14(a) of this part and which the Department will evaluate and approve; and

§ 950.13

(8) Provided to the Program Administrator, no later than ninety (90) days prior to execution of the contract, a detailed systems-level construction schedule that includes a schedule identifying projected dates of construction, testing and full power operation of the advanced nuclear facility.

(9) Provided to the Program Administrator, no later than ninety (90) days prior to the execution of the contract, a detailed and up-to-date plan of financing for the project including the credit structure and all sources and uses of funds for the project, and the projected cash flows for all debt obligations of the advanced nuclear facility.

(b) *Funding.* No later than thirty (30) days prior to execution of the contract, and consistent with section 638(b)(2)(C), funds in amounts determined pursuant to § 950.11(e) have been made available and shall be deposited in the Program Account or the Grant Account respectively.

(c) *Limitations.* The Department shall not enter into a Standby Support Contract, if:

(1) *Program Account.* The contract provides coverage of principal or interest costs for which the loan costs exceed the amount of funds deposited in the Program Account; or

(2) *Grant Account.* The contract provides coverage of incremental costs that exceed the amount of funds deposited in the Grant Account.

(d) *Cancellation by Abandonment.* (1) If the Program Administrator cancels a Standby Support Contract for abandonment pursuant to 950.13(f)(1), the Program Administrator may re-execute a Standby Support Contract with a sponsor other than a sponsor or that sponsor's assignee with whom the Department had a cancelled contract, provided that such replacement Standby Support Contract is executed in accordance with the terms and conditions set forth in this part, and shall be deemed to be one of the subsequent four reactors under this part.

(2) Not more than two Standby Support Contracts may be re-executed in situations involving abandonment and cancellation by the Program Administrator.

EFFECTIVE DATE NOTE: At 71 FR 46325, Aug. 11, 2006, § 950.12 was revised, effective Sept.

10 CFR Ch. III (1–1–16 Edition)

11, 2006. Paragraph (a) of this text contains information collection and recordkeeping requirements and will not become effective until approval has been given by the Office of Management and Budget.

§ 950.13 Standby Support Contract: General provisions.

(a) *Purpose.* Each Standby Support Contract shall include a provision setting forth an agreement between the parties in which the Department shall provide compensation for covered costs incurred by a sponsor for covered events that result in a covered delay of full power operation of an advanced nuclear facility.

(b) *Covered facility.* Each Standby Support Contract shall include a provision of coverage only for an advanced nuclear facility which is not a federal entity. Each Standby Support Contract shall also include a provision to specify the advanced nuclear facility to be covered, along with the reactor design, and the location of the advanced nuclear facility.

(c) *Sponsor contribution.* Each Standby Support Contract shall include a provision to specify the amount that a sponsor has contributed to funding each type of account.

(d) *Maximum compensation.* Each Standby Support Contract shall include a provision to specify that the Program Administrator shall not pay compensation under the contract:

(1) In an aggregate amount that exceeds the amount of coverage up to \$500 million each for the initial two reactors or up to \$250 million each for the subsequent four reactors;

(2) In an amount for principal or interest costs for which the loan costs exceed the amount deposited in the Program Account; and

(3) In an amount for incremental costs that exceed the amount deposited in the Grant Account.

(e) *Term.* Each Standby Support Contract shall include a provision to specify the date at which the contract commences as well as the term of the contract. The contract shall enter into force on the date it has been signed by both the sponsor and the Program Administrator. Subject to the cancellation provisions set forth in paragraph (f) of this section, the contract shall terminate when all claims have been

Department of Energy

§ 950.14

paid up to the full amounts to be covered under the Standby Support Contract, or all disputes involving claims under the contract have been resolved in accordance with subpart D of this part.

(f) *Cancellation provisions.* Each Standby Support Contract shall provide for cancellation in the following circumstances:

(1) If the sponsor abandons construction, and the abandonment is not caused by a covered event or force majeure, the Program Administrator may cancel the Standby Support Contract by giving written notice thereof to the sponsor and the parties have no further rights or obligations under the contract.

(2) If the sponsor does not require continuing coverage under the contract, the sponsor may cancel the Standby Support Contract by giving written notice thereof to the Program Administrator and the parties have no further rights or obligations under the contract.

(3) For such other cause as agreed to by the parties.

(g) *Termination by sponsor.* Each Standby Support Contract shall include a provision that prohibits a sponsor or any related party from executing another Standby Support Contract, if the sponsor elects to terminate its original existing Standby Support Contract, unless the sponsor has cancelled or terminated construction of the reactor covered by its original existing Standby Support Contract.

(h) *Assignment.* Each Standby Support Contract shall include a provision on assignment of a sponsor's rights and obligations under the contract and assignment of payment of covered costs. The Program Administrator shall permit the assignment of payment of covered costs with prior written notice to the Department. The Program Administrator shall permit assignment of rights and obligations under the contract with the Department's prior approval. The sponsor may not assign its rights and obligations under the contract without the prior written approval of the Program Administrator and any attempt to do so is null and void.

(i) *Claims administration.* Each Standby Support Contract shall include a provision to specify a mechanism for administering claims pursuant to the procedures set forth in subpart C of this part.

(j) *Dispute resolution.* Consistent with the Administrative Dispute Resolution Act, each Standby Support Contract shall include a provision to specify a mechanism for resolving disputes pursuant to the procedures set forth in subpart D of this part.

(k) *Re-estimation.* Consistent with the Federal Credit Reform Act (FCRA) of 1990, the sponsor shall provide all needed documentation as required in § 950.12 to allow the Department to annually re-estimate the loan cost needed in the financing account as that term is used in 2 U.S.C. 661a(7) and funded by the Program Account. "The sponsor is neither responsible for any increase in loan costs, nor entitled to recoup fees for any decrease in loan costs, resulting from the re-estimation conducted pursuant to FCRA.

§ 950.14 Standby Support Contract: Covered events, exclusions, covered delay and covered cost provisions.

(a) *Covered events.* Subject to the exclusions set forth in paragraph (b) of this section, each Standby Support Contract shall include a provision setting forth the type of events that are covered events under the contract. The type of events shall include:

(1) The Commission's failure to review the sponsor's inspections, tests, analyses and acceptance criteria in accordance with the Commission's rules, guidance, audit procedures, or formal opinions, in the case where the Commission has in place any rules, guidance, audit procedures or formal opinions setting schedules for its review of inspections, tests, analyses, and acceptance criteria under a combined license or the sponsor's combined license;

(2) The Commission's failure to review the sponsor's inspections, tests, analyses, and acceptance criteria on the schedule for such review proposed by the sponsor, subject to the Department's review and approval of such

schedule, including review of any informal guidance or opinion of the Commission that has been provided to the sponsor or the Department, in the case where the Commission has not provided any rules, guidance, audit procedures or formal Commission opinions setting schedules for review of inspections, tests, analyses and acceptance criteria under a combined license, or under the sponsor's combined license;

(3) The conduct of pre-operational Commission hearings, that are provided for in 10 CFR part 52, after issuance of the combined license; and

(4) Litigation in State, Federal, local, or tribal courts, including appeals of Commission decisions related to an application for a combined license to such courts, and excluding administrative litigation that occurs at the Commission related to the combined license.

(b) *Exclusions.* Each Standby Support Contract shall include a provision setting forth the exclusions from covered costs under the contract, and for which any associated delay in the attainment of full power operations is not a covered delay. The exclusions are:

(1) The failure of the sponsor to take any action required by law, regulation, or ordinance, including but not limited to the following types of events:

(i) The sponsor's failure to comply with environmental laws or regulations such as those related to pollution abatement or human health and the environment;

(ii) The sponsor's re-performance of any inspections, tests, analyses or re-demonstration that acceptance criteria have been met due to Commission non-acceptance of the sponsor's submitted results of inspections, tests, analyses, and demonstration of acceptance criteria;

(iii) Delays attributable to the sponsor's actions to redress any deficiencies in inspections, tests, analyses or acceptance criteria as a result of a Commission disapproval of fuel loading; or

(2) Events within the control of the sponsor, including but not limited to delays attributable to the following types of events:

(i) Project planning and construction problems;

(ii) Labor-management disputes;

(iii) The sponsor's failure to perform inspections, tests, analyses and to demonstrate acceptance criteria are met or failure to inform the Commission of the successful completion of inspections, tests, analyses and demonstration of meeting acceptance criteria in accordance with its schedule; or

(iv) The lack of adequate funding for construction and testing of the advanced nuclear facility.

(3) Normal business risks, including but not limited to the following types of events:

(i) Delays attributable to force majeure events such as a strike or the failure of power or other utility services supplied to the location, or natural events such as severe weather, earthquake, landslide, mudslide, volcanic eruption, other earth movement, or flood;

(ii) Government action meaning the seizure or destruction of property by order of governmental authority;

(iii) War or military action;

(iv) Acts or decisions, including the failure to act or decide, of any government body (excluding those acts or decisions or failure to act or decide by the Commission that are covered events);

(v) Supplier or subcontractor delays in performance;

(vi) Litigation, whether initiated by the sponsor or another party, that is not a covered event under paragraph (a) of this section; or

(vii) Failure to timely obtain regulatory permits or approvals that are not covered events under paragraph (a) of this section.

(c) *Covered delay.* Each Standby Support Contract shall include a provision for the payment of covered costs, in accordance with the procedures in subpart C of this part for the payment of covered costs, if a covered event(s) is determined to be the cause of delay in attainment of full power operation, provided that:

(1) Under Standby Support Contracts for the subsequent four reactors, covered delay may occur only after the initial 180-day period of delay, and

(2) The sponsor has used due diligence to mitigate, shorten, and end, the covered delay and associated costs

Department of Energy

§ 950.22

covered by the Standby Support Contract.

(d) *Covered costs.* Each Standby Support Contract shall include a provision to specify the type of costs for which the Department shall provide payment to a sponsor for covered delay in accordance with the procedures set forth in subparts C and D of this part. The types of costs shall be limited to either or both, dependent upon the terms of the contract:

(1) The principal or interest on which the loan costs for the Program Account was calculated; and

(2) The incremental costs on which funding for the Grant Account was calculated.

(e) *ITAAC Schedule.* Each Standby Support Contract shall provide for adjustments to the ITAAC review schedule when the parties deem necessary, in the case where the Commission has not provided any rules, guidance, audit procedures or formal Commission opinions setting schedules for review of inspections, tests, analyses and acceptance criteria under a combined license, upon review and approval by the Department and the sponsor. Adjustments to the ITAAC review schedule must be in writing, expressly approved by the Department and the sponsor, and remain in effective for determining covered events unless and until a subsequently issued ITAAC review schedule is approved by the parties.

Subpart C—Claims Administration Process

§ 950.20 General provisions.

The parties shall include provisions in the Standby Support Contract to specify the procedures and conditions set forth in this subpart for the submission of claims and the payment of covered costs under the Standby Support Contract. A sponsor is required to establish that there is a covered event, a covered delay and a covered cost; the Department is required to establish an exclusion in accordance with § 950.14(b).

§ 950.21 Notification of covered event.

(a) A sponsor shall submit in writing to the Claims Administrator a notification that a covered event has occurred that has delayed the schedule for con-

struction or testing and that may cause covered delay. The sponsor shall submit the notification to the Claims Administrator no later than thirty (30) days of the end of the covered event and contain the following information:

(1) A description and explanation of the covered event, including supporting documentation of the event;

(2) The duration of the delay in the schedule for construction, testing and full power operation, and the schedule for inspections, tests, analyses and acceptance criteria, if applicable;

(3) The sponsor's projection of the duration of covered delay;

(4) A revised schedule for construction, testing and full power operation, including the dates of system level construction or testing that had been conducted prior to the event; and

(5) A revised inspections, tests, analyses, and acceptance criteria schedule, if applicable, including the dates of Commission review of inspections, tests, analyses, and acceptance criteria that had been conducted prior to the event.

(b) An authorized representative of the sponsor shall sign the notification of a covered event, certify the notification is made in good faith and the covered event is not an exclusion as specified in § 950.14(b), and represent that the supporting information is accurate and complete to the sponsor's knowledge and belief.

§ 950.22 Covered event determination.

(a) *Completeness review.* Upon notification of a covered event from the sponsor, the Claims Administrator shall review the notification for completeness within thirty (30) days of receipt. If the notification is not complete, the Claims Administrator shall return the notification within thirty (30) days of receipt and specify the incomplete information for submission by the sponsor to the Claims Administrator in time for a determination by the Claims Administrator in accordance with paragraph (c) of this section.

(b) *Covered Event Determination.* The Claims Administrator shall review the notification and supporting information to determine whether there is

§ 950.23

10 CFR Ch. III (1–1–16 Edition)

agreement by the Claims Administrator with the sponsor's representation of the event as a covered event (Covered Event Determination) based on a review of the contract conditions for covered events and exclusions.

(1) If the Claims Administrator believes the event is an exclusion as set forth in § 950.14(b), the Claims Administrator shall request within 30 days of receipt of the notification of a covered event information in the sponsor's possession that is relevant to the exclusion. The sponsor shall provide the requested information to the Administrator within 20 days of receipt of the Administrator's request.

(2) The sponsor's failure to provide the requested information in a complete or timely manner constitutes a basis for the Claims Administrator to disagree with the sponsor's covered event notification as provided in paragraph (c) of this section, and to deny a claim for covered costs related to the exclusion as provided in § 950.24 of this part.

(c) *Timing.* The Claims Administrator shall notify the sponsor within sixty (60) days of receipt of the notification whether the Administrator agrees with the sponsor's representation, disagrees with the representation, requires further information, or is an exclusion. If the sponsor disagrees with the Covered Event Determination, the parties shall resolve the dispute in accordance with the procedures set forth in subpart D of this part.

§ 950.23 Claims process for payment of covered costs.

(a) *General.* No more than 120 days of when a sponsor was scheduled to attain full power operation and expects it will incur covered costs, the sponsor may make a claim upon the Department for the payment of its covered costs under the Standby Support Contract. The sponsor shall file a Certification of Covered Costs and thereafter such Supplementary Certifications of Covered Costs as may be necessary to receive payment under the Standby Support Contract for covered costs.

(b) *Certification of Covered Costs.* The Certification of Covered Costs shall include the following:

(1) A Claim Report, including the information specified in paragraph (c) of this section;

(2) A certification by the sponsor that:

(i) The covered costs listed on the Claim Report filed pursuant to this section are losses to be incurred by the sponsor;

(ii) The claims for the covered costs were processed in accordance with appropriate business practices and the procedures specified in this subpart; and

(iii) The sponsor has used due diligence to mitigate, shorten, and end, the covered delay and associated costs covered by the Standby Support Contract.

(c) *Claim Report.* For purposes of this part, a "Claim Report" is a report of information about a sponsor's underlying claims that, in the aggregate, constitute the sponsor's covered costs. The Claim Report shall include, but is not limited to:

(1) Detailed information substantiating the duration of the covered delay;

(2) Detailed information about the covered costs associated with covered delay, including as applicable:

(i) The amount of payment for principal or interest during the covered delay, including the relevant dates of payment, amounts of payment and any other information deemed relevant by the Department, and the name of the holder of the debt, if the debt obligation is held by a Federal agency; or

(ii) The underlying payment during the covered delay related to the incremental cost of purchasing power to meet contractual agreements, including any documentation deemed relevant by the Department to calculate the fair market price of power.

(d) *Supplementary Certification of Covered Cost.* If the total amount of the covered costs due to a sponsor under the Standby Support Contract has not been determined at the time the Certification of Covered Costs has been filed, the sponsor shall file monthly, or on a schedule otherwise determined by the Claims Administrator, Supplementary Certifications of Covered

Department of Energy

§ 950.25

Costs updating the amount of the covered costs owed to the sponsor. Supplementary Certifications of Covered Costs shall include a Claim Report and a certification as described in this section.

(e) *Supplementary information.* In addition to the information required in paragraphs (b) and (c) of this section, the Claims Administrator may request such additional supporting documentation as required to ascertain the allowable covered costs sustained by a sponsor.

EFFECTIVE DATE NOTE: At 71 FR 46325, Aug. 11, 2006, §950.23 was revised, effective Sept. 11, 2006. This text contains information collection and recordkeeping requirements and will not become effective until approval has been given by the Office of Management and Budget.

§ 950.24 Claims determination for covered costs.

(a) No later than thirty (30) days from the sponsor's submission of a Certification of Covered Costs, the Claims Administrator shall issue a Claim Determination identifying those claimed costs deemed to be allowable based on an evaluation of:

(1) The duration of covered delay, taking into account contributory or concurrent delays resulting from exclusions from coverage as established by the Claims Administrator in accordance with §950.22;

(2) The covered costs associated with covered delay, including an assessment of the sponsor's due diligence in mitigating or ending covered costs, as set forth in §950.23;

(3) Any adjustments to the covered costs, as set forth in §950.26; and

(4) Other information as necessary and appropriate.

(b) The Claim Determination shall state the Claims Administrator's determination that the claim shall be paid in full, paid in an adjusted amount as deemed allowable by the Claims Administrator, or rejected in full.

(c) Should the Claims Administrator conclude that the sponsor has not supplied the required information in the Certification of Covered Costs or any supporting documentation sufficient to allow reasonable verification of the duration of the covered delay or covered

costs, the Claims Administrator shall so inform the sponsor and specify the nature of additional documentation requested, in time for the sponsor to supply supplemental documentation and for the Claims Administrator to issue the Claim Determination.

(d) Should the Claims Administrator find that any claimed covered costs are not allowable or otherwise should be considered excluded costs under the Standby Support Contract, the Claims Administrator shall identify such costs and state the reason(s) for that decision in writing. A determination by the Claims Administrator that an event is an exclusion or that the sponsor has not provided complete or timely information relevant to the exclusion as specified in §950.22 shall provide a basis for the Claims Administrator to find covered costs are not allowable. If the parties cannot agree on the covered costs, they shall resolve the dispute in accordance with the requirements in subpart D of this part.

§ 950.25 Calculation of covered costs.

(a) The Claims Administrator shall calculate the allowable amount of the covered costs claimed in the Certification of Covered Costs as follows:

(1) *Costs covered through Program Account.* The principal or interest on any debt obligation financing the advanced nuclear facility for the duration of covered delay to the extent the debt obligation was included in the calculation of the loan cost; and

(2) *Costs covered by Grant Account.* The incremental costs calculated for the duration of the covered delay. In calculating the incremental cost of power, the Claims Administrator shall consider:

(i) *Fair Market Price.* The fair market price may be determined by the lower of the two options: The actual cost of the short-term supply contract for replacement power, purchased by the sponsor, during the period of delay, or for each day of replacement power by its day-ahead weighted average index price in \$/MWh at the hub geographically nearest to the advanced nuclear facility as posted on the previous day by the Intercontinental Exchange (ICE) or an alternate electronic marketplace deemed reliable by the Department.

§ 950.26

The daily MWh assumed to be covered is no more than its nameplate capacity multiplied by 24 hours; multiplied by the capacity-weighted U.S. average capacity factor in the previous calendar year, including in the calculation any and all commercial nuclear power units that operated in the United States for any part of the previous calendar year; and multiplied by the average of the ratios of the net generation to the grid for calculating payments to the Nuclear Waste Fund to the nameplate capacity for each nuclear unit included. In addition, the Claims Administrator may consider “fair market price” from other published indices or prices at regional trading hubs and bilateral contracts for similar delivered firm power products and the costs incurred, including acquisition costs, to move the power to the contract-specified point of delivery, as well as the provisions of the covered contract regarding replacement power costs for delivery default; and

(ii) *Contractual price of power.* The contractual price of power shall be determined as the daily weighted average price in equivalent \$/MWh under a contractual supply agreement(s) for delivery of firm power that the sponsor entered into prior to any covered event. The daily MWh assumed to be covered is no more than the advanced nuclear facility’s nameplate capacity multiplied by 24 hours; multiplied by the capacity-weighted U.S. average capacity factor in the previous calendar year, including in the calculation any and all commercial nuclear power units that operated in the United States for any part of the previous calendar year; and multiplied by the average of the ratios of the net generation to the grid for calculating payments to the Nuclear Waste Fund to the nameplate capacity for each nuclear unit included.

§ 950.26 Adjustments to claim for payment of covered costs.

(a) *Aggregate amount of covered costs.* The sponsor’s aggregate amount of covered costs shall be reduced by any amounts that are determined to be either excluded or not covered.

(b) *Amount of Department share of covered costs.* The Department share of

10 CFR Ch. III (1–1–16 Edition)

covered costs shall be adjusted as follows:

(1) *No excess recoveries.* The share of covered costs paid by the Department to a sponsor shall not be greater than the limitations set forth in § 950.27(d).

(2) *Reduction of amount payable.* The share of covered costs paid by the Department shall be reduced by the appropriate amount consistent with the following:

(i) *Excluded claims.* The Department shall ensure that no payment shall be made for costs resulting from events that are not covered under the contract as specified in § 950.14; and

(ii) *Sponsor due diligence.* Each sponsor shall ensure and demonstrate that it uses due diligence to mitigate, shorten, and to end the covered delay and associated costs covered by the Standby Support Contract.

§ 950.27 Conditions for payment of covered costs.

(a) *General.* The Department shall pay the covered costs associated with a Standby Support Contract in accordance with the Claim Determination issued by the Claims Administrator under § 950.24 or the Final Claim Determination under § 950.34, provided that:

(1) Neither the sponsor’s claim for covered costs nor any other document submitted to support the underlying claim is fraudulent, collusive, made in bad faith, dishonest or otherwise designed to circumvent the purposes of the Act and regulations;

(2) The losses submitted for payment are within the scope of coverage issued by the Department under the terms and conditions of the Standby Support Contract as specified in subpart B of this part; and

(3) The procedures specified in this subpart have been followed and all conditions for payment have been met.

(b) *Adjustments to Payments.* In the event of fraud or miscalculation, the Department may subsequently adjust, including an adjustment obligating the sponsor to repay any payment made under paragraph (a) of this section.

(c) *Suspension of payment for covered costs.* If the Department paid or is paying covered costs under paragraph (a) of this section, and subsequently makes a determination that a sponsor

Department of Energy

§ 950.31

has failed to meet any of the requirements for payment specified in paragraph (a) of this section for a particular covered cost, the Department may suspend payment of covered costs pending investigation and audit of the sponsor's covered costs.

(d) *Amount payable.* The Department's share of compensation for the initial two reactors is 100 percent of the covered costs of covered delay but not more than the coverage in the contract or \$500 million per contract, whichever is less; and for the subsequent four reactors, not more than 50 percent of the covered costs of the covered delay but not more than the coverage in the contract or \$250 million per contract, whichever is less. The Department's share of compensation for the subsequent four reactors is further limited in that the payment is for covered costs of a covered delay that occurs after the initial 180-day period of covered delay.

§ 950.28 Payment of covered costs.

(a) *General.* The Department shall pay to a sponsor covered costs in accordance with this subpart and the terms of the Standby Support Contract. Payment shall be made in such installments and on such conditions as the Department determines appropriate. Any overpayments by the Department of the covered costs shall be offset from future payments to the sponsor or returned by the sponsor to the Department within forty-five (45) days. If there is a dispute, then the Department shall pay the undisputed costs and defer payment of the disputed portion upon resolution of the dispute in accordance with the procedures in subpart D of this part. If the covered costs include principal or interest owed on a loan made or guaranteed by a Federal agency, the Department shall instead pay that Federal agency the covered costs, rather than the sponsor.

(b) *Timing of Payment.* The sponsor may receive payment of covered costs when:

(1) The Department has approved payment of the covered cost as specified in this subpart; and

(2) The sponsor has incurred and is obligated to pay the costs for which payment is requested.

(c) *Payment process.* The covered costs shall be paid to the sponsor designated on the Certification of Covered Costs required by § 950.23, or to the sponsor's assignee as permitted by § 950.13(h). A sponsor that requests payment of the covered costs must receive payment through electronic funds transfer.

Subpart D—Dispute Resolution Process

§ 950.30 General.

The parties, i.e., the sponsor and the Department, shall include provisions in the Standby Support Contract that specify the procedures set forth in this subpart for the resolution of disputes under a Standby Support Contract. Sections 950.31 and 950.32 address disputes involving covered events; §§ 950.33 and 950.34 address disputes involving covered costs; and §§ 950.36 and 950.37 address disputes involving other contract matters.

§ 950.31 Covered event dispute resolution.

(a) If a sponsor disagrees with the Covered Event Determination rendered in accordance with § 950.22 and cannot resolve the dispute informally with the Claims Administrator, then the disagreement is subject to resolution as follows:

(1) A sponsor shall, within thirty (30) days of receipt of the Covered Event Determination, deliver to the Claims Administrator written notice of a sponsor's rebuttal which sets forth reasons for its disagreement, including any expert opinion obtained by the sponsor.

(2) After submission of the sponsor's rebuttal to the Claims Administrator, the parties shall have fifteen (15) days during which time they must informally and in good faith participate in mediation to attempt to resolve the disagreement before instituting the process under paragraph (b) of this section. If the parties reach agreement through mediation, the agreement shall constitute a Final Determination on Covered Events.

§ 950.32

(3) The parties shall jointly select the mediator(s). The parties shall share equally the cost of the mediation.

(b) If the parties cannot resolve the disagreement through mediation under the timeframe established under paragraph (a)(2) of this section and the sponsor elects to continue pursuing the claim, the sponsor shall within ten (10) days submit any remaining issues in controversy to the Civilian Board of Contract Appeals (Civilian Board) or its successor, for resolution by an Administrative Judge of the Civilian Board utilizing the Civilian Board's Summary Binding Decision procedure. The parties shall abide by the procedures of the Civilian Board for Summary Binding Decision. The parties agree that the decision of the Civilian Board constitutes a Final Determination on Covered Events.

§ 950.32 Final determination on covered events.

(a) If the parties reach a Final Determination on Covered Events through mediation, or Summary Binding Decision as set forth in this subpart, the Final Determination on Covered Events is a final settlement of the issue, made by the sponsor and the Program Administrator. The sponsor, and the Department, may rely on, and neither may challenge, the Final Determination on Covered Events in any future Certification of Covered Costs related to the covered event that was the subject of that Initial Determination.

(b) The parties agree that no appeal shall be taken or further review sought, and that the Final Determination on Covered Events is final, conclusive, non-appealable and may not be set aside, except for fraud.

§ 950.33 Covered costs dispute resolution.

(a) If a sponsor disagrees with the Claim Determination rendered in accordance with § 950.24 and cannot resolve the dispute informally with the Claims Administrator, then the parties agree that any dispute must be resolved as follows:

(1) A sponsor shall, within thirty (30) days of receipt of the Claim Determination, deliver to the Claims Admin-

10 CFR Ch. III (1-1-16 Edition)

istrator in writing notice of and reasons for its disagreement (Sponsor's Rebuttal), including any expert opinion obtained by the sponsor.

(2) After submission of the sponsor's rebuttal to the Claims Administrator, the parties have fifteen (15) days to informally and in good faith participate in mediation to resolve the disagreement before instituting the process under paragraph (b) of this section. If the parties reach agreement through mediation, the agreement shall constitute a Final Claim Determination.

(3) The parties shall jointly select the mediator(s). The parties shall share equally the cost of the mediator(s).

(b) If the parties cannot resolve the disagreement through mediation under the timeframe established under paragraph (a)(2) of this section, any remaining issues in controversy shall be submitted by the sponsor within ten (10) days to the Civilian Board or its successor, for resolution by an Administrative Judge of the Civilian Board utilizing the Board's Summary Binding Decision procedure. The parties shall abide by the procedures of the Civilian Board for Summary Binding Decision. The parties agree that the decision of the Civilian Board shall constitute a Final Claim Determination.

§ 950.34 Final claim determination.

(a) If the parties reach a Final Claim Determination through mediation, or Summary Binding Decision as set forth in this subpart, the Final Claim Determination is a final settlement of the issue, made by the sponsor and the Program Administrator.

(b) The parties agree that no appeal shall be taken or further review sought and that the Final Claim Determination is final, conclusive, non-appealable, and may not be set aside, except for fraud.

§ 950.35 Payment of final claim determination.

Once a Final Claim Determination is reached by the methods set forth in this subpart, the parties intend that such a Final Claim Determination shall constitute a final settlement of the claim and the sponsor may immediately present to the Department a

Department of Energy

§ 950.42

Final Claim Determination for payment.

§ 950.36 Other contract matters in dispute.

(a) If the parties disagree over terms or conditions of the Standby Support Contract other than disagreements related to covered events or covered costs, then the parties shall engage in informal dispute resolution as follows:

(1) The parties shall engage in good faith efforts to resolve the dispute after written notification by one party to the other that there is a contract matter in dispute.

(2) If the parties cannot reach a resolution of the matter in disagreement within thirty (30) days of the written notification of the matter in dispute, then the parties shall have fifteen (15) days during which time they must informally and in good faith participate in mediation to attempt to resolve the disagreement before instituting the process under paragraph (b) of this section. If the parties reach agreement through mediation, the agreement shall constitute a Final Agreement on the matter in dispute.

(3) The parties shall jointly select the mediator(s). The parties shall share equally the cost of the mediation.

(b) If the parties cannot resolve the disagreement through mediation under the timeframe established in paragraph (a)(2) of this section and either party elects to continue pursuing the disagreement, that party shall within ten (10) days submit any remaining issues in controversy to the Civilian Board or its successor, for resolution by an Administrative Judge of the Civilian Board utilizing the Civilian Board's Summary Binding Decision procedure. The parties shall abide by the procedures of the Civilian Board for Summary Binding Decision. The parties shall agree that the decision of the Civilian Board constitutes a Final Decision on the matter in dispute.

§ 950.37 Final agreement or final decision.

(a) If the parties reach a Final Agreement on a contract matter in dispute through mediation, or a Final Decision on a contract matter in dispute through a Summary Binding Decision

as set forth in this subpart, the Final Agreement or Final Decision is a final settlement of the contract matter in dispute, made by the sponsor and the Program Administrator.

(b) The parties agree that no appeal shall be taken or further review sought, and that the Final Agreement or Final Decision is final, conclusive, non-appealable and may not be set aside, except for fraud.

Subpart E—Audit and Investigations and Other Provisions

§ 950.40 General.

The parties shall include a provision in the Standby Support Contract that specifies the procedures in this subpart for the monitoring, auditing and disclosure of information under a Standby Support Contract.

§ 950.41 Monitoring/Auditing.

The Department has the right to audit any and all costs associated with the Standby Support Contracts. Auditors who are employees of the United States government, who are designated by the Secretary of Energy or by the Comptroller General of the United States, shall have access to, and the right to examine, at the sponsor's site or elsewhere, any pertinent documents and records of a sponsor at reasonable times under reasonable circumstances. The Secretary may direct the sponsor to submit to an audit by a public accountant or equivalent acceptable to the Secretary.

§ 950.42 Disclosure.

Information received from a sponsor by the Department may be available to the public subject to the provision of 5 U.S.C. 552, 18 U.S.C. 1905 and 10 CFR part 1004; provided that:

(a) Subject to the requirements of law, information such as trade secrets, commercial and financial information that a sponsor submits to the Department in writing shall not be disclosed without prior notice to the sponsor in accordance with Department regulations concerning the public disclosure of information. Any submitter asserting that the information is privileged or confidential should appropriately identify and mark such information.

(b) Upon a showing satisfactory to the Program Administrator that any information or portion thereof obtained under this regulation would, if made public, divulge trade secrets or other proprietary information, the Department may not disclose such information.

PART 960—GENERAL GUIDELINES FOR THE PRELIMINARY SCREENING OF POTENTIAL SITES FOR A NUCLEAR WASTE REPOSITORY

Subpart A—General Provisions

Sec.

- 960.1 Applicability.
- 960.2 Definitions.

Subpart B—Implementation Guidelines

- 960.3 Implementation guidelines.
- 960.3-1 Siting provisions.
- 960.3-1-1 Diversity of geohydrologic settings.
- 960.3-1-2 Diversity of rock types.
- 960.3-1-3 Regionality.
- 960.3-1-4 Evidence for siting decisions.
- 960.3-1-4-1 Site identification as potentially acceptable.
- 960.3-1-4-2 Site nomination for characterization.
- 960.3-1-4-3 Site recommendation for characterization.
- 960.3-1-5 Basis for site evaluations.
- 960.3-2 Siting process.
- 960.3-2-1 Site screening for potentially acceptable sites.
- 960.3-2-2 Nomination of sites as suitable for characterization.
- 960.3-2-2-1 Evaluation of all potentially acceptable sites.
- 960.3-2-2-2 Selection of sites within geohydrologic settings.
- 960.3-2-2-3 Comparative evaluation of all sites proposed for nomination.
- 960.3-2-2-4 The environmental assessment.
- 960.3-2-2-5 Formal site nomination.
- 960.3-2-3 Recommendation of sites for characterization.
- 960.3-3 Consultation.
- 960.3-4 Environmental impacts.

Subpart C—Postclosure Guidelines

- 960.4 Postclosure guidelines.
- 960.4-1 System guideline.
- 960.4-2 Technical guidelines.
- 960.4-2-1 Geohydrology.
- 960.4-2-2 Geochemistry.
- 960.4-2-3 Rock characteristics.
- 960.4-2-4 Climatic changes.
- 960.4-2-5 Erosion.
- 960.4-2-6 Dissolution.

- 960.4-2-7 Tectonics.
- 960.4-2-8 Human interference.
- 960.4-2-8-1 Natural resources.
- 960.4-2-8-2 Site ownership and control.

Subpart D—Preclosure Guidelines

- 960.5 Preclosure guidelines.
- 960.5-1 System guidelines.
- 960.5-2 Technical guidelines.

PRECLOSURE RADIOLOGICAL SAFETY

- 960.5-2-1 Population density and distribution.
- 960.5-2-2 Site ownership and control.
- 960.5-2-3 Meteorology.
- 960.5-2-4 Offsite installations and operations.

ENVIRONMENT, SOCIOECONOMICS, AND TRANSPORTATION

- 960.5-2-5 Environmental quality.
- 960.5-2-6 Socioeconomic impacts.
- 960.5-2-7 Transportation.

EASE AND COST OF SITING, CONSTRUCTION, OPERATION, AND CLOSURE

- 960.5-2-8 Surface characteristics.
- 960.5-2-9 Rock characteristics.
- 960.5-2-10 Hydrology.
- 960.5-2-11 Tectonics.

APPENDIX I TO PART 960—NRC AND EPA REQUIREMENTS FOR POSTCLOSURE REPOSITORY PERFORMANCE

APPENDIX II TO PART 960—NRC AND EPA REQUIREMENTS FOR PRECLOSURE REPOSITORY PERFORMANCE

APPENDIX III TO PART 960—APPLICATION OF THE SYSTEM AND TECHNICAL GUIDELINES DURING THE SITING PROCESS

APPENDIX IV TO PART 960—TYPES OF INFORMATION FOR THE NOMINATION OF SITES AS SUITABLE FOR CHARACTERIZATION

AUTHORITY: 42 U.S.C. 2011 *et seq.*, 42 U.S.C. 7101 *et seq.*, 42 U.S.C. 10101 *et seq.*

SOURCE: 49 FR 47752, Dec. 6, 1984, unless otherwise noted.

Subpart A—General Provisions

§ 960.1 Applicability.

These guidelines were developed in accordance with the requirements of Section 112(a) of the Nuclear Waste Policy Act of 1982 for use by the Secretary of Energy in evaluating the suitability of sites. The guidelines will be used for suitability evaluations and determinations made pursuant to Section 112(b). The guidelines set forth in this part are intended to complement the requirements set forth in the Act, 10 CFR part 60, and 40 CFR part 191.

The DOE recognizes NRC jurisdiction for the resolution of differences between the guidelines and 10 CFR part 60. The guidelines have received the concurrence of the NRC. The DOE contemplates revising the guidelines from time to time, as permitted by the Act, to take into account revisions made to the above regulations and to otherwise update the guidelines as necessary. The DOE will submit the revisions to the NRC and obtain its concurrence before issuance.

[49 FR 47752, Dec. 6, 1984, as amended at 66 FR 57334, Nov. 14, 2001]

§ 960.2 Definitions.

As used in this part:

Accessible environment means the atmosphere, the land surface, surface water, oceans, and the portion of the lithosphere that is outside the controlled area.

Act means the Nuclear Waste Policy Act of 1982, as amended.

Active fault means a fault along which there is recurrent movement, which is usually indicated by small, periodic displacements or seismic activity.

Affected area means either the area of socioeconomic impact or the area of environmental impact, each of which will vary in size among potential repository sites.

Affected Indian tribe means any Indian tribe (1) within whose reservation boundaries a repository for radioactive waste is proposed to be located or (2) whose federally defined possessory or usage rights to other lands outside the reservation's boundaries arising out of congressionally ratified treaties may be substantially and adversely affected by the locating of such a facility: *Provided*, That the Secretary of the Interior finds, upon the petition of the appropriate governmental officials of the tribe, that such effects are both substantial and adverse to the tribe.

Affected State means any State that (1) has been notified by the DOE in accordance with Section 116(a) of the Act as containing a potentially acceptable site; (2) contains a candidate site for site characterization or repository development; or (3) contains a site selected for repository development.

Application means the act of making a finding of compliance or noncompliance with the qualifying or disqualifying conditions specified in the guidelines of subparts C and D of this part.

Aquifer means a formation, a group of formations, or a part of a formation that contains sufficient saturated permeable material to yield significant quantities of water to wells and springs.

Barrier means any material or structure that prevents or substantially delays the movement of water or radionuclides.

Candidate site means an area, within a geohydrologic setting, that is recommended by the Secretary of Energy under section 112 of the Act for site characterization, approved by the President under section 112 of the Act for characterization, or undergoing site characterization under section 113 of the Act.

Closure means final backfilling of the remaining open operational areas of the underground facility and boreholes after the termination of waste emplacement, culminating in the sealing of shafts.

Confining unit means a body of impermeable or distinctly less permeable material stratigraphically adjacent to one or more aquifers.

Containment means the confinement of radioactive waste within a designated boundary.

Controlled area means a surface location, to be marked by suitable monuments, extending horizontally no more than 10 kilometers in any direction from the outer boundary of the underground facility, and the underlying subsurface, which area has been committed to use as a geologic repository and from which incompatible activities would be prohibited before and after permanent closure.

Cumulative releases of radionuclides means the total number of curies of radionuclides entering the accessible environment in any 10,000-year period, normalized on the basis of radiotoxicity in accordance with 40 CFR part 191. The peak cumulative release of radionuclides refers to the 10,000-year period during which any such release attains its maximum predicted value.

Decommissioning means the permanent removal from service of surface facilities and components necessary for preclosure operations only, after repository closure, in accordance with regulatory requirements and environmental policies.

Determination means a decision by the Secretary that a site is suitable for site characterization for the selection of a repository, consistent with applications of the guidelines of subparts C and D of this part in accordance with the provisions set forth in subpart B of this part.

Disposal means the emplacement in a repository of high-level radioactive waste, spent nuclear fuel, or other highly radioactive material with no foreseeable intent of recovery, whether or not such emplacement permits the recovery of such waste, and the isolation of such waste from the accessible environment.

Disqualifying condition means a condition that, if present at a site, would eliminate that site from further consideration.

Disturbed zone means that portion of the controlled area, excluding shafts, whose physical or chemical properties are predicted to change as a result of underground facility construction or heat generated by the emplaced radioactive waste such that the resultant change of properties could have a significant effect on the performance of the geologic repository.

DOE means the U.S. Department of Energy or its duly authorized representatives.

Effective porosity means the amount of interconnected pore space and fracture openings available for the transmission of fluids, expressed as the ratio of the volume of interconnected pores and openings to the volume of rock.

Engineered-barrier system means the manmade components of a disposal system designed to prevent the release of radionuclides from the underground facility or into the geohydrologic setting. Such term includes the radioactive-waste form, radioactive-waste canisters, materials placed over and around such canisters, any other components of the waste package, and barriers used to seal penetrations in and into the underground facility.

Environmental assessment means the document required by section 112(b)(1)(E) of the Nuclear Waste Policy Act of 1982.

Environmental impact statement means the document required by section 102(2)(C) of the National Environmental Policy Act of 1969. Sections 114(a) and 114(f) of the Nuclear Waste Policy Act of 1982 include certain limitations on the National Environmental Policy Act requirements as they apply to the preparation of an environmental impact statement for the development of a repository at a characterized site.

EPA means the U.S. Environmental Protection Agency or its duly authorized representatives.

Evaluation means the act of carefully examining the characteristics of a site in relation to the requirements of the qualifying or disqualifying conditions specified in the guidelines of subparts C and D. Evaluation includes the consideration of favorable and potentially adverse conditions.

Excepted means assumed to be probable or certain on the basis of existing evidence and in the absence of significant evidence to the contrary.

Expected repository performance means the manner in which the repository is predicted to function, consideration those conditions, processes, and events that are likely to prevail or may occur during the time period of interest.

Facility means any structure, system, or system component, including engineered barriers, created by the DOE to meet repository-performance or functional objectives.

Fault means a fracture or a zone of fractures along which there has been displacement of the side relative to one another parallel to the fracture or zone of fractures.

Faulting means the process of fracturing and displacement that produces a fault.

Favorable condition means a condition that, though not necessary to qualify a site, is presumed, if present, to enhance confidence that the qualifying condition of a particular guideline can be met.

Finding means a conclusion that is reached after evaluation.

Geohydrologic setting means the system of geohydrologic units that is located within a given geologic setting.

Geohydrologic system means the geohydrologic units within a geologic setting, including any recharge, discharge, interconnections between units, and any natural or man-induced processes or events that could affect ground-water flow within or among those units.

Geohydrologic unit means an aquifer, a confining unit, or a combination of aquifers and confining units comprising a framework for a reasonably distinct geohydrologic system.

Geologic repository means a system, requiring licensing by the NRC, that is intended to be used, or may be used, for the disposal of radioactive waste in excavated geologic media. A geologic repository includes (1) the geologic-repository operations area and (2) the portion of the geologic setting that provides isolation of the radioactive waste and is located within the controlled area.

Geologic-repository operations area means a radioactive-waste facility that is part of the geologic repository, including both surface and subsurface areas and facilities where waste-handling activities are conducted.

Geologic setting means the geologic, hydrologic, and geochemical systems of the region in which a geologic-repository operations area is or may be located.

Geomorphic processes means geologic processes that are responsible for the general configuration of the Earth's surface, including the development of present landforms and their relationships to underlying structures, and are responsible for the geologic changes recorded by these surface features.

Ground water means all subsurface water as distinct from surface water.

Ground-water flux means the rate of ground-water flow per unit area of porous or fractured media measured perpendicular to the direction of flow.

Ground-water sources means aquifers that have been or could be economically and technologically developed as sources of water in the foreseeable future.

Ground-water travel time means the time required for a unit volume of

ground water to travel between two locations. The travel time is the length of the flow path divided by the velocity, where velocity is the average ground-water flux passing through the cross-sectional area of the geologic medium through which flow occurs, perpendicular to the flow direction, divided by the effective porosity along the flow path. If discrete segments of the flow path have different hydrologic properties, the total travel time will be the sum of the travel times for each discrete segment.

Guideline means a statement of policy or procedure that may include, when appropriate, qualifying, disqualifying, favorable, or potentially adverse conditions as specified in the "guidelines."

Guidelines means part 960 of title 10 of the Code of Federal Regulations—General Guidelines for the Recommendation of Sites for Nuclear Waste Repositories.

High-level radioactive waste means (1) the highly radioactive material resulting from the reprocessing of spent nuclear fuel, including liquid waste produced directly in reprocessing and any solid material derived from such liquid waste that contains fission products in sufficient concentrations and (2) other highly radioactive material that the NRC, consistent with existing law, determines by rule requires permanent isolation.

Highly populated area means any incorporated place (recognized by the decennial reports of the U.S. Bureau of the Census) of 2,500 or more persons, or any census designated place (as defined and delineated by the Bureau) of 2,500 or more persons, unless it can be demonstrated that any such place has a lower population density than the mean value for the continental United States. Counties or county equivalents, whether incorporated or not, are specifically excluded from the definition of "place" as used herein.

Host rock means the geologic medium in which the waste is emplaced, specifically the geologic materials that directly encompass and are in close proximity to the underground facility.

Hydraulic conductivity means the volume of water that will move through a medium in a unit of time under a unit

hydraulic gradient through a unit area measured perpendicular to the direction of flow.

Hydraulic gradient means a change in the static pressure of ground water, expressed in terms of the height of water above a datum, per unit of distance in a given direction.

Hydrologic process means any hydrologic phenomenon that exhibits a continuous change in time, whether slow or rapid.

Hydrologic properties means those properties of a rock that govern the entrance of water and the capacity to hold, transmit, and deliver water, such as porosity, effective porosity, specific retention, permeability, and the directions of maximum and minimum permeabilities.

Igneous activity means the emplacement (intrusion) of molten rock material (magma) into material in the Earth's crust or the expulsion (extrusion) of such material onto the Earth's surface or into its atmosphere or surface water.

Isolation means inhibiting the transport of radioactive material so that the amounts and concentrations of this material entering the accessible environment will be kept within prescribed limits.

Likely means processing or displaying the qualities, characteristics, or attributes that provide a reasonable basis for confidence that what is expected indeed exists or will occur.

Lithosphere means the solid part of the Earth, including any ground water contained within it.

Member of the public means any individual who is not engaged in operations involving the management, storage, and disposal of radioactive waste. A worker so engaged is a member of the public except when on duty at the geologic-repository operations area.

Mitigation means: (1) Avoiding the impact altogether by not taking a certain action or parts of an action; (2) minimizing impacts by limiting the degree or magnitude of the action and its implementation; (3) rectifying the impact by repairing, rehabilitating, or restoring the affected environment; (4) reducing or eliminating the impact over time by preservation and maintenance operations during the life of the

action; or (5) compensating for the impact by replacing or providing substitute resources or environments.

Model means a conceptual description and the associated mathematical representation of a system, subsystem, component, or condition that is used to predict changes from a baseline state as a function of internal and/or external stimuli and as a function of time and space.

NRC means the U.S. Nuclear Regulatory Commission or its duly authorized representatives.

Perched ground water means unconfined ground water separated from an underlying body of ground water by an unsaturated zone. Its water table is a perched water table. Perched ground water is held up by a perching bed whose permeability is so low that water percolating downward through it is not able to bring water in the underlying unsaturated zone above atmospheric pressure.

Performance assessment means any analysis that predicts the behavior of a system or system component under a given set of constant and/or transient conditions. Performance assessments will include estimates of the effects of uncertainties in data and modeling.

Permanent closure is synonymous with "closure."

Postclosure means the period of time after the closure of the geologic repository.

Potentially acceptable site means any site at which, after geologic studies and field mapping but before detailed geologic data gathering, the DOE undertakes preliminary drilling and geophysical testing for the definition of site location.

Potentially adverse condition means a condition that is presumed to detract from expected system performance, but further evaluation, additional data, or the identification of compensating or mitigating factors may indicate that its effect on the expected system performance is acceptable.

Preclosure means the period of time before and during the closure of the geologic repository.

Pre-waste-emplacment means before the authorization of repository construction by the NRC.

Qualifying condition means a condition that must be satisfied for a site to be considered acceptable with respect to a specific guideline.

Quaternary Period means the second period of the Cenozoic Era, following the Tertiary, beginning 2 to 3 million years ago and extending to the present.

Radioactive waste or “waste” means high-level radioactive waste and other radioactive materials, including spent nuclear fuel, that are received for emplacement in a geologic repository.

Radioactive-waste facility means a facility subject to the licensing and related regulatory authority of the NRC pursuant to Sections 202(3) and 202(4) of the Energy Reorganization Act of 1974 (88 Stat. 1244).

Radionuclide retardation means the process or processes that cause the time required for a given radionuclide to move between two locations to be greater than the ground-water travel time, because of physical and chemical interactions between the radionuclide and the geohydrologic unit through which the radionuclide travels.

Reasonably available technology means technology which exists and has been demonstrated or for which the results of any requisite development, demonstration, or confirmatory testing efforts before application will be available within the required time period.

Repository is synonymous with “geologic repository.”

Repository closure is synonymous with “closure.”

Repository construction means all excavation and mining activities associated with the construction of shafts, shaft stations, rooms, and necessary openings in the underground facility, preparatory to radioactive-waste emplacement, as well as the construction of necessary surface facilities, but excluding site-characterization activities.

Repository operation means all of the functions at the site leading to and involving radioactive-waste emplacement in the underground facility, including receiving, transportation, handling, emplacement, and, if necessary, retrieval.

Repository support facilities means all permanent facilities constructed in support of site-characterization activi-

ties and repository construction, operation, and closure activities, including surface structures, utility lines, roads, railroads, and similar facilities, but excluding the underground facility.

Restricted area means any area access to which is controlled by the DOE for purposes of protecting individuals from exposure to radiation and radioactive materials before repository closure, but not including any areas used as residential quarters, although a separate room or rooms in a residential building may be set apart as a restricted area.

Retrieval means the act of intentionally removing radioactive waste before repository closure from the underground location at which the waste had been previously emplaced for disposal.

Saturated zone means that part of the Earth’s crust beneath the water table in which all voids, large and small, are ideally filled with water under pressure greater than atmospheric.

Secretary means the Secretary of Energy.

Site means a potentially acceptable site or a candidate site, as appropriate, until such time as the controlled area has been established, at which time the site and the controlled area are the same.

Site characterization means activities, whether in the laboratory or in the field, undertaken to establish the geologic conditions and the ranges of the parameters of a candidate site relevant to the location of a repository, including borings, surface excavations, excavations of exploratory shafts, limited subsurface lateral excavations and borings, and in situ testing needed to evaluate the suitability of a candidate site for the location of a repository, but not including preliminary borings and geophysical testing needed to assess whether site characterization should be undertaken.

Siting means the collection of exploration, testing, evaluation, and decision-making activities associated with the process of site screening, site nomination, site recommendation, and site approval for characterization or repository development.

Source term means the kinds and amounts of radionuclides that make up

§ 960.3

the source of a potential release of radioactivity.

Spent nuclear fuel means fuel that has been withdrawn from a nuclear reactor following irradiation, the constituent elements of which have not been separated by reprocessing.

Surface facilities means repository support facilities within the restricted area.

Surface water means any waters on the surface of the Earth, including fresh and salt water, ice, and snow.

System means the geologic setting at the site, the waste package, and the repository, all acting together to contain and isolate the waste.

System performance means the complete behavior of a repository system in response to the conditions, processes, and events that may affect it.

Tectonic means of, or pertaining to, the forces involved in, or the resulting structures or features of, *tectonics*.

Tectonics means the branch of geology dealing with the broad architecture of the outer part of the Earth, that is, the regional assembling of structural or deformational features and the study of their mutual relations, origin, and historical evolution.

To the extent practicable means the degree to which an intended course of action is capable of being effected in a manner that is reasonable and feasible within a framework of constraints.

Underground facility means the underground structure and the rock required for support, including mined openings and backfill materials, but excluding shafts, boreholes, and their seals.

Unsaturated zone means the zone between the land surface and the water table. Generally, water in this zone is under less than atmospheric pressure, and some of the voids may contain air or other gases at atmospheric pressure. Beneath flooded areas or in perched water bodies, the water pressure locally may be greater than atmospheric.

Waste form means the radioactive waste materials and any encapsulating or stabilizing matrix.

Waste package means the waste form and any containers, shielding, packing, and other sorbent materials immediately surrounding an individual waste container.

10 CFR Ch. III (1–1–16 Edition)

Water table means that surface in a body of ground water at which the water pressure is atmospheric.

[49 FR 47752, Dec. 6, 1984, as amended at 66 FR 57334, Nov. 14, 2001]

Subpart B—Implementation Guidelines

§ 960.3 Implementation guidelines.

The guidelines of this subpart establish the procedure and basis for applying the postclosure and the preclosure guidelines of subparts C and D, respectively, to evaluations of the suitability of sites. As may be appropriate during the siting process, this procedure requires consideration of a variety of geohydrologic settings and rock types, regionality, and environmental impacts and consultation with affected States, affected Indian tribes, and Federal agencies.

[49 FR 47752, Dec. 6, 1984, as amended at 66 FR 57334, Nov. 14, 2001]

§ 960.3–1 Siting provisions.

The siting provisions establish the framework for the implementation of the siting process specified in § 960.3–2. Sections 960.3–1–1 and 960.3–1–2 require that consideration be given to sites situated in different geohydrologic settings and different types of host rock, respectively. These diversity guidelines are intended to balance the process of site selection by requiring consideration of a variety of geologic conditions and media, and thereby enhance confidence in the technical suitability of sites selected for the development of repositories. As required by the Act, § 960.3–1–3 specifies consideration of a regional distribution of repositories after recommendation of a site for development of the first repository. Section 960.3–1–4 describes the evidence that is required to support siting decisions. Section 960.3–1–5 establishes the basis for site evaluations against the postclosure and the preclosure guidelines of subparts C and D during the various phases of the siting process.

§ 960.3–1–1 Diversity of geohydrologic settings.

Consideration shall be given to a variety of geohydrologic settings in

Department of Energy

§ 960.3-1-4-2

which sites for the development of repositories may be located. To the extent practicable, sites recommended as candidate sites for characterization shall be located in different geohydrologic settings.

§ 960.3-1-2 Diversity of rock types.

Consideration shall be given to a variety of geologic media in which sites for the development of repositories may be located. To the extent practicable, and with due consideration of candidate sites characterized previously or approved for such characterization if the circumstances apply, sites recommended as candidate sites for characterization shall have different types of host rock.

§ 960.3-1-3 Regionality.

In making site recommendations for repository development after the site for the first repository has been recommended, the Secretary shall give due consideration to the need for, and the advantages of, a regional distribution in the siting of subsequent repositories. Such consideration shall take into account the proximity of sites to locations at which waste is generated or temporarily stored and at which other repositories have been or are being developed.

§ 960.3-1-4 Evidence for siting decisions.

The siting process involves a sequence of four decisions: The identification of potentially acceptable sites; the nomination of sites as suitable for characterization; the recommendation of sites as candidate sites for site characterization; and after the completion of site characterization and nongeologic data gathering, the recommendation of a candidate site for the development of a repository. Each of these decisions will be supported by the evidence specified below.

§ 960.3-1-4-1 Site identification as potentially acceptable.

The evidence for the identification of a potentially acceptable site shall be the types of information specified in appendix IV of this part. Such evidence will be relatively general and less detailed than that required for the nomi-

nation of a site as suitable for characterization. Because the gathering of detailed geologic data will not take place until after the recommendation of a site for characterization, the levels of information may be relatively greater for the evaluation of those guidelines in subparts C and D that pertain to surface-identifiable factors for such site. The sources of information shall include the literature in the public domain and the private sector, when available, and will be supplemented in some instances by surface investigations and conceptual engineering design studies conducted by the DOE. Geologic surface investigations may include the mapping of identifiable rock masses, fracture and joint characteristics, and fault zones. Other surface investigations will consider the aquatic and terrestrial ecology; water rights and uses; topography; potential offsite hazards; natural resource concentrations; national or State protected resources; existing transportation systems; meteorology and climatology; population densities, centers, and distributions; and general socioeconomic characteristics.

§ 960.3-1-4-2 Site nomination for characterization.

The evidence required to support the nomination of a site as suitable for characterization shall include the types of information specified in appendix IV of this part and shall be contained or referenced in the environmental assessments to be prepared in accordance with the requirements of the Act. The source of this information shall include the literature and related studies in the public domain and the private sector, when available, and various meteorological, environmental, socioeconomic, and transportation studies conducted by the DOE in the affected area; exploratory boreholes in the region of such site, including lithologic logging and hydrologic and geophysical testing of such boreholes, laboratory testing of core samples for the evaluation of geochemical and engineering rock properties, and chemical analyses of water samples from such boreholes; surface investigations, including geologic mapping and geophysical surveys, and compilations of

§ 960.3-1-4-3

satellite imagery data; in situ or laboratory testing of similar rock types under expected repository conditions; evaluations of natural and man-made analogs of the repository and its subsystems, such as geothermally active areas, underground excavations, and case histories of socioeconomic cycles in areas that have experienced intermittent large-scale construction and industrial activities; and extrapolations of regional data to estimate site-specific characteristics and conditions. The exact types and amounts of information to be collected within the above categories, including such details as the specific types of hydrologic tests, combinations of geophysical tests, or number of exploratory boreholes, are dependent on the site-specific needs for the application of the guidelines of subparts C and D, in accordance with the provisions of this subpart and the application requirements set forth in appendix III of this part. The evidence shall also include those technical evaluations that use the information specified above and that provide additional bases for evaluating the ability of a site to meet the qualifying conditions of the guidelines of subparts C and D. In developing the above-mentioned bases for evaluation, as may be necessary, assumptions that approximate the characteristics or conditions considered to exist at a site, or expected to exist or occur in the future, may be used. These assumptions will be realistic but conservative enough to underestimate the potential for a site to meet the qualifying condition of a guideline; that is, the use of such assumptions should not lead to an exaggeration of the ability of a site to meet the qualifying condition.

§ 960.3-1-4-3 Site recommendation for characterization.

The evidence required to support the recommendation of a site as a candidate site for characterization shall consist of the evaluations and data contained or referenced in the environmental assessment for such site, unless the Secretary certifies that such information, in the absence of additional preliminary borings or excavations, will not be adequate to satisfy applicable requirements of the Act.

10 CFR Ch. III (1-1-16 Edition)

§ 960.3-1-5 Basis for site evaluations.

(a) Evaluations of individual sites and comparisons between and among sites shall be based on the postclosure and preclosure guidelines specified in subparts C and D of this part, respectively. Except for screening of potentially acceptable sites as specified in § 960.3-2-1, such evaluations shall place primary significance on the postclosure guidelines and secondary significance on the preclosure guidelines, with each set of guidelines considered collectively for such purposes. Both the postclosure and the preclosure guidelines consist of a system guideline or guidelines and corresponding groups of technical guidelines.

(b) The postclosure guidelines of subpart C of this part contain eight technical guidelines in one group. The preclosure guidelines of subpart D of this part contain eleven technical guidelines separated into three groups that represent, in decreasing order of importance, preclosure radiological safety; environment, socioeconomics, and transportation; and ease and cost of siting, construction, operation, and closure.

(c) The relative significance of any technical guideline to its corresponding system guideline is site specific. Therefore, for each technical guideline, an evaluation of compliance with the qualifying condition shall be made in the context of the collection of system elements and the evidence related to that guideline, considering on balance the favorable conditions and the potentially adverse conditions identified at a site. Similarly, for each system guideline, such evaluation shall be made in the context of the group of technical guidelines and the evidence related to that system guideline.

(d) For purposes of recommending sites for development as repositories, such evidence shall include analyses of expected repository performance to assess the likelihood of demonstrating compliance with 40 CFR part 191 and 10 CFR part 60, in accordance with § 960.4-1. A site shall be disqualified at any time during the siting process if the evidence supports a finding by the DOE that a disqualifying condition exists or the qualifying condition of any system or technical guideline cannot be met.

(e) Comparisons between and among sites shall be based on the system guidelines, to the extent practicable and in accordance with the levels of relative significance specified above for the postclosure and the preclosure guidelines. Such comparisons are intended to allow comparative evaluations of sites in terms of the capabilities of the natural barriers for waste isolation and to identify innate deficiencies that could jeopardize compliance with such requirements. If the evidence for the sites is not adequate to substantiate such comparisons, then the comparisons shall be based on the groups of technical guidelines under the postclosure and the preclosure guidelines, considering the levels of relative significance appropriate to the postclosure and the preclosure guidelines and the order of importance appropriate to the subordinate groups within the preclosure guidelines. Comparative site evaluations shall place primary importance on the natural barriers of the site. In such evaluations for the postclosure guidelines of subpart C of this part, engineered barriers shall be considered only to the extent necessary to obtain realistic source terms for comparative site evaluations based on the sensitivity of the natural barriers to such realistic engineered barriers. For a better understanding of the potential effects of engineered barriers on the overall performance of the repository system, these comparative evaluations shall consider a range of levels in the performance of the engineered barriers. That range of performance levels shall vary by at least a factor of 10 above and below the engineered-barrier performance requirements set forth in 10 CFR 60.113, and the range considered shall be identical for all sites compared. The comparisons shall assume equivalent engineered barrier performance for all sites compared and shall be structured so that engineered barriers are not relied upon to compensate for deficiencies in the geologic media. Furthermore, engineered barriers shall not be used to compensate for an inadequate site; mask the innate deficiencies of a site; disguise the strengths and weaknesses of a site and the overall system; and mask differences between sites when

they are compared. Releases of different radionuclides shall be combined by the methods specified in appendix A of 40 CFR part 191.

(f) The comparisons specified in paragraph (e) of this section shall consist of two comparative evaluations that predict radionuclide releases for 100,000 years after repository closure and shall be conducted as follows. First, the sites shall be compared by means of evaluations that emphasize the performance of the natural barriers at the site. Second, the sites shall be compared by means of evaluations that emphasize the performance of the total repository system. These second evaluations shall consider the expected performance of the repository system; be based on the expected performance of waste packages and waste forms, in compliance with the requirements of 10 CFR 60.113, and on the expected hydrological and geochemical conditions at each site; and take credit for the expected performance of all other engineered components of the repository system. The comparison of isolation capability shall be one of the significant considerations in the recommendation of sites for the development of repositories. The first of the two comparative evaluations specified in the paragraph (e) of this section shall take precedence unless the second comparative evaluation would lead to substantially different recommendations. In the latter case, the two comparative evaluations shall receive comparable consideration. Sites with predicted isolation capabilities that differ by less than a factor of 10, with similar uncertainties, may be assumed to provide equivalent isolation.

[66 FR 57334, Nov. 14, 2001]

§ 960.3-2 Siting process.

The siting process begins with site screening for the identification of potentially acceptable sites. This process was completed for purposes of the first repository before the enactment of the Act, and the identification of such sites was made after enactment in accordance with the provisions of section 116(a) of the Act. The screening process for the identification of potentially acceptable sites for the second and subsequent repositories shall be conducted

§ 960.3-2-1

in accordance with the requirements specified in § 960.3-2-1 of this subpart. The nomination of any site as suitable for characterization shall follow the process specified in § 960.3-2-2, and such nomination shall be accompanied by an environmental assessment as specified in section 112(b)(1)(E) of the Act. The recommendation of sites as candidate sites for characterization shall be accomplished in accordance with the requirements specified in § 960.3-2-3.

[49 FR 47752, Dec. 6, 1984, as amended at 66 FR 57335, Nov. 14, 2001]

§ 960.3-2-1 Site screening for potentially acceptable sites.

To identify potentially acceptable sites for the development of other than the first repository, the process shall begin with site-screening activities that consider large land masses that contain rock formations of suitable depth, thickness, and lateral extent and have structural, hydrologic, and tectonic features favorable for waste containment and isolation. Within those large land masses, subsequent site-screening activities shall focus on successively smaller and increasingly more suitable land units. This process shall be developed in consultation with the States that contain land units under consideration. It shall be implemented in a sequence of steps that first applies the applicable disqualifying conditions to eliminate land units on the basis of the evidence specified in § 960.3-1-4-1 and in accordance with the application requirements set forth in appendix III of this part. After the disqualifying conditions have been applied, the favorable and potentially adverse conditions, as identified for each remaining land unit, shall be evaluated. The presence of favorable conditions shall favor a given land unit, while the presence of potentially adverse conditions shall penalize that land unit. Recognizing that favorable conditions and potentially adverse conditions for different technical guidelines can exist in the same land unit, the DOE shall seek to evaluate the composite favorability of each land unit. Land units that, in the aggregate, exhibit potentially adverse conditions shall be deferred in favor of land units that exhibit favorable condi-

10 CFR Ch. III (1-1-16 Edition)

tions. The siting provisions that require diversity of geohydrologic settings and rock types and consideration of regionality, as specified in §§ 960.3-1-1, 960.3-1-2, and 960.3-1-3, respectively, may be used to discriminate between land units and to establish the range of options in site screening. To identify a site as potentially acceptable, the evidence shall support a finding that the site is not disqualified in accordance with the application requirements set forth in appendix III of this part and shall support the decision by the DOE to proceed the continued investigation of the site on the basis of the favorable and potentially adverse conditions identified to date. In continuation of the screening process after such identification and before site nomination, the DOE may defer from further consideration land units or potentially acceptable sites or portions thereof on the basis of additional information or by the application of the siting provisions for diversity of geohydrologic settings, diversity of rock types, and regionality (§§ 960.3-1-1, 960.3-1-2, and 960.3-1-3, respectively). The deferral of potentially acceptable sites will be described in the environmental assessments that accompany the nomination of at least five sites as suitable for characterization. In order to identify potentially acceptable sites for the second and subsequent repositories, the Secretary shall *first* identify the State within which the site is located in a decision-basis document that describes the process and the considerations that led to the identification of such site and that has been issued previously in draft for review and comment by such State. *Second*, when such document is final, the Secretary shall notify the Governor and the legislature of that State and the tribal council of any affected Indian tribe of the potentially acceptable site.

§ 960.3-2-2 Nomination of sites as suitable for characterization.

From the sites identified as potentially acceptable, the Secretary shall nominate at least five sites determined suitable for site characterization for the selection of each repository site. For the second repository, at least three of the sites shall not have been

nominated previously. Any site nominated as suitable for characterization for the first repository, but not recommended as a candidate site for characterization, may not be nominated as suitable for characterization for the second repository. The nomination of a site as suitable for characterization shall be accompanied by an environmental assessment as specified in section 112(b)(1)(E) of the Act. Such nomination shall be based on evaluations in accordance with the guidelines of this part, and the bases and relevant details of those evaluations and of the decision processes involved therein shall be contained in the environmental assessment for the site in the manner specified in this subpart. The evidence required to support such evaluations and siting decisions is specified in § 960.3-1-4-2.

§ 960.3-2-2-1 Evaluation of all potentially acceptable sites.

First, in considering sites for nomination, each of the potentially acceptable sites shall be evaluated on the basis of the disqualifying conditions specified in the technical guidelines of subparts C and D, in accordance with the application requirements set forth in appendix III of this part. This evaluation shall support a finding by the DOE that such sites is not disqualified.

§ 960.3-2-2-2 Selection of sites within geohydrologic settings.

Second, the siting provision requiring diversity of geohydrologic settings, as specified in § 960.3-1-1, shall be applied to group all potentially acceptable sites according to their geohydrologic settings. *Third*, for those geohydrologic settings that contain more than one potentially acceptable site, the preferred site shall be selected on the basis of a comparative evaluation of all potentially acceptable sites in that setting. This evaluation shall consider the distinguishing characteristics displayed by the potentially acceptable sites within the setting and the related guidelines from subparts C and D. That is, the appropriate guidelines shall be selected primarily on the basis of the kinds of evidence among sites for which distinguishing characteristics can be identified. Such comparative

evaluation shall be made on the basis of the qualifying conditions for those guidelines, considering, on balance, the favorable conditions and potentially adverse conditions identified at each site. Due consideration shall also be given to the siting provisions specifying the basis for site evaluations in § 960.3-1-5, to the extent practicable, and diversity of rock types in § 960.3-1-2, if the circumstances so apply. If less than five geohydrologic settings are available for consideration, the above process shall be used to select two or more preferred sites from those settings that contain more than one potentially acceptable site, as required to obtain the number of sites to be nominated as suitable for characterization. For purposes of the second and subsequent repositories, due consideration shall also be given to the siting provision for regionality as specified in § 960.3-1-3. *Fourth*, each preferred site within a geohydrologic setting shall be evaluated as to whether such site is suitable for the development of a repository under the qualifying condition of each guideline specified in subparts C and D that does not require site characterization as a prerequisite for the application of such guideline. The guidelines considered appropriate to this evaluation have been selected on the basis of their exclusion under the definition of site characterization as specified in § 960.2. Although the final application of these guidelines, in accordance with the provisions set forth in appendix III of this part, does not require geologic data from site-characterization activities, such application will require additional data beyond those specified in appendix IV of this part, which will be obtained concurrently with site characterization. Such guidelines include those specified in § 960.4-2-8-2 (Site Ownership and Control) of subpart C; §§ 960.5-1(a)(1) and 960.5-1(a)(2) of subpart D (preclosure system guidelines for radiological safety and environmental quality, socioeconomic, and transportation); and §§ 960.5-2-1 through 960.5-2-7 of subpart D (Population Density and Distribution, Site Ownership and Control, Meteorology, Offsite Installations and Operations, Environmental Quality,

§ 960.3-2-2-3

Socioeconomic Impacts, and Transportation). This evaluation shall consider on balance those favorable conditions and potentially adverse conditions identified as such at a preferred site in relation to the qualifying condition of each such guideline. For each such guideline, this evaluation shall focus on the suitability of the site for the development of a repository by considering the activities from the start of site characterization through decommissioning and shall support a finding by the DOE in accordance with the application requirements set forth in appendix III of this part. *Fifth*, each preferred site within a geohydrologic setting shall be evaluated as to whether such site is suitable for site characterization under the qualifying conditions of those guidelines specified in subparts C and D that require characterization (i.e., subsurface geologic, hydrologic, and geochemical data gathering). Such guidelines include those specified in § 960.4-1(a) (postclosure system guideline); §§ 960.4-2-1 through 960.4-2-8-1 of subpart C (Geohydrology, Geochemistry, Rock Characteristics, Climatic Changes, Erosion, Dissolution, Tectonics, Human Interference, and Natural Resources); § 960.5-1(a)(3) (preclosure system guideline for ease and cost of siting, construction, operation, and closure); and § 960.5-2-8 through 960.5-2-11 of subpart D (Surface Characteristics, Rock Characteristics, Hydrology, and Tectonics). This evaluation shall consider on balance the favorable conditions and potentially adverse conditions identified as such at a preferred site in relation to the qualifying condition of each such guideline. For each such guideline, this evaluation shall focus on the suitability of the site for characterization and shall support a finding by the DOE in accordance with the application requirements set forth in appendix III of this part.

§ 960.3-2-2-3 Comparative evaluation of all sites proposed for nomination.

Sixth, for those potentially acceptable sites to be proposed for nomination, as determined by the process specified in § 960.3-2-2-2, a reasonable comparative evaluation of each such site with all other such sites shall be

10 CFR Ch. III (1-1-16 Edition)

made. For each site and for each guideline specified in subparts C and D, the DOE shall summarize the evaluations and findings specified under § 960.3-2-2-1 and under the fourth and fifth provisions of § 960.3-2-2. Each such summary shall allow comparisons to be made among sites on this basis of each guideline.

§ 960.3-2-2-4 The environmental assessment.

To document the process specified above, and in compliance with section 112(b)(1)(E) of the Act, an environmental assessment shall be prepared for each site proposed for nomination as suitable for characterization. Each such environmental assessment shall describe the decision process by which such site was proposed for nomination as described in the preceding six steps and shall contain or reference the evidence that supports such process according to the requirements of § 960.3-1-4-2 and appendix IV of this part. As specified in the Act, each environmental assessment shall include an evaluation of the effects of the site-characterization activities at the site on public health and safety and the environment; a discussion of alternative activities related to site characterization that may be taken to avoid such impact; and an assessment of the regional and local impacts of locating a repository at the site. The draft environmental assessment for each site proposed for nomination as suitable for characterization shall be made available by the DOE for public comment after the Secretary has notified the Governor and legislature of the State in which the site is located, and the governing body of the affected Indian tribe where such site is located, of such impending availability.

§ 960.3-2-2-5 Formal site nomination.

After the final environmental assessments have been prepared, the Secretary shall nominate at least five sites that he determines suitable for site characterization for the selection of a repository site, and, in so doing, he shall cause to have published in the FEDERAL REGISTER a notice specifying the sites so nominated and announcing

the availability of the final environmental assessments for such sites. This determination by the Secretary shall be based on the final environmental assessments for such sites, including, in particular, consideration of the available evidence, evaluations, and the resultant findings for the guidelines of subparts C and D so specified under the fourth and fifth provisions of § 960.3-2-2. Before nominating a site, the Secretary shall notify the Governor and legislature of the State in which the site is located, and the governing body of the affected Indian tribe where such site is located, of such nomination and the basis for such nomination.

§ 960.3-2-3 Recommendation of sites for characterization.

After the nomination of at least five sites as suitable for site characterization for the selection of the first repository, the Secretary shall recommend in writing to the President not less than three candidate sites for such characterization. The recommendation decision shall be based on the available geophysical, geologic, geochemical, and hydrologic data; other information; associated evaluations and findings reported in the environmental assessments accompanying the nominations; and the considerations specified below, unless the Secretary certifies that such available data will not be adequate to satisfy applicable requirements of the Act in the absence of further preliminary borings or excavations. On the basis of the evidence and in accordance with the siting provision specifying the basis for site evaluations in § 960.3-1-5, the sites nominated as suitable for characterization shall be considered as to their order of preference as candidate sites for characterization. Subsequently, the siting provisions specifying diversity of geohydrologic settings, diversity of rock types, and, after the first repository, consideration of regionality in §§ 960.3-1-1, 960.3-1-2, and 960.3-1-3, respectively, shall be considered to determine a final order of preference for the characterization of such sites. Considering this order of preference together with the available siting alternatives specified in the Act, the sites recommended as candidate sites for char-

acterization shall offer, on balance, the most advantageous combination of characteristics and conditions for the successful development of repositories at such sites. The process for the recommendation of sites as candidate sites for characterization for the selection of any subsequent repository shall be the same as that specified above for the first repository.

§ 960.3-3 Consultation.

The DOE shall provide to designated officials of the affected States and to the governing bodies of any affected Indian tribe timely and complete information regarding determinations or plans made with respect to the siting, site characterization, design, development, construction, operation, closure, decommissioning, licensing, or regulation of a repository. Written responses to written requests for information from the designated officials of affected States or affected Indian tribes will be provided within 30 days after receipt of the written requests. In performing any study of an area for the purpose of determining the suitability of such area for the development of a repository, the DOE shall consult and cooperate with the Governor and the legislature of an affected State and the governing body of an affected Indian tribe in an effort to resolve concerns regarding public health and safety, environmental impacts, socioeconomic impacts, and technical aspects of the siting process. After notifying affected States and affected Indian tribes that potentially acceptable sites have been identified, or that a site has been approved for characterization, the DOE shall seek to enter into binding written agreements with such affected States or affected Indian tribes in accordance with the requirements of the Act. The DOE shall also consult, as appropriate, with other Federal agencies.

§ 960.3-4 Environmental impacts.

Environmental impacts shall be considered by the DOE throughout the site characterization, site selection, and repository development process. The DOE shall mitigate significant adverse environmental impacts, to the extent

practicable, during site characterization and repository construction, operation, closure, and decommissioning.

Subpart C—Postclosure Guidelines

§ 960.4 Postclosure guidelines.

The guidelines in this subpart specify the factors to be considered in evaluating and comparing sites on the basis of expected repository performance after closure. The postclosure guidelines are separated into a system guideline and eight technical guidelines. The system guideline establishes waste containment and isolation requirements that are based on NRC and EPA regulations. These requirements must be met by the repository system, which contains natural barriers and engineered barriers. The engineered barriers will be designed to complement the natural barriers, which provide the primary means for waste isolation.

§ 960.4–1 System guideline.

(a) *Qualifying Condition.* The geologic setting at the site shall allow for the physical separation of radioactive waste from the accessible environment after closure in accordance with the requirements of 40 CFR part 191, subpart B, as implemented by the provisions of 10 CFR part 60. The geologic setting at the site will allow for the use of engineered barriers to ensure compliance with the requirements of 40 CFR part 191 and 10 CFR part 60 (see appendix I of this part).

§ 960.4–2 Technical guidelines.

The technical guidelines in this subpart set forth qualifying, favorable, potentially adverse, and, in five guidelines, disqualifying conditions on the characteristics, processes, and events that may influence the performance of a repository system after closure. The favorable conditions and the potentially adverse conditions under each guideline are *not* listed in any assumed order of importance. Potentially adverse conditions will be considered if they affect waste isolation within the controlled area even though such conditions may occur outside the controlled area. The technical guidelines that follow establish conditions that shall be considered in determining

compliance with the qualifying condition of the postclosure system guideline. For each technical guideline, an evaluation of qualification or disqualification shall be made in accordance with the requirements specified in subpart B.

§ 960.4–2–1 Geohydrology.

(a) *Qualifying condition.* The present and expected geohydrologic setting of a site shall be compatible with waste containment and isolation. The geohydrologic setting, considering the characteristics of and the processes operating within the geologic setting, shall permit compliance with (1) the requirements specified in § 960.4–1 for radionuclide releases to the accessible environment and (2) the requirements specified in 10 CFR 60.113 for radionuclide releases from the engineered-barrier system using reasonably available technology.

(b) *Favorable conditions.* (1) Site conditions such that the pre-waste-emplacement ground-water travel time along any path of likely radionuclide travel from the disturbed zone to the accessible environment would be more than 10,000 years.

(2) The nature and rates of hydrologic processes operating within the geologic setting during the Quaternary Period would, if continued into the future, not affect or would favorably affect the ability of the geologic repository to isolate the waste during the next 100,000 years.

(3) Sites that have stratigraphic, structural, and hydrologic features such that the geohydrologic system can be readily characterized and modeled with reasonable certainty.

(4) For disposal in the saturated zone, at least one of the following pre-waste-emplacement conditions exists:

(i) A host rock and immediately surrounding geohydrologic units with low hydraulic conductivities.

(ii) A downward or predominantly horizontal hydraulic gradient in the host rock and in the immediately surrounding geohydrologic units.

(iii) A low hydraulic gradient in and between the host rock and the immediately surrounding geohydrologic units.

(iv) High effective porosity together with low hydraulic conductivity in rock units along paths of likely radionuclide travel between the host rock and the accessible environment.

(5) For disposal in the unsaturated zone, at least one of the following pre-waste-emplacement conditions exists:

(i) A low and nearly constant degree of saturation in the host rock and in the immediately surrounding geohydrologic units.

(ii) A water table sufficiently below the underground facility such that the fully saturated voids continuous with the water table do not encounter the host rock.

(iii) A geohydrologic unit above the host rock that would divert the downward infiltration of water beyond the limits of the emplaced waste.

(iv) A host rock that provides for free drainage.

(v) A climatic regime in which the average annual historical precipitation is a small fraction of the average annual potential evapotranspiration.

NOTE: The DOE will, in accordance with the general principles set forth in §960.1 of these regulations, revise the guidelines as necessary, to ensure consistency with the final NRC regulations on the unsaturated zone, which were published as a proposed rule on February 16, 1984, in 49 FR 5934.

(c) *Potentially adverse conditions.* (1) Expected changes in geohydrologic conditions—such as changes in the hydraulic gradient, the hydraulic conductivity, the effective porosity, and the ground-water flux through the host rock and the surrounding geohydrologic units—sufficient to significantly increase the transport of radionuclides to the accessible environment as compared with pre-waste-emplacement conditions.

(2) The presence of ground-water sources, suitable for crop irrigation or human consumption without treatment, along ground-water flow paths from the host rock to the accessible environment.

(3) The presence in the geologic setting of stratigraphic or structural features—such as dikes, sills, faults, shear zones, folds, dissolution effects, or brine pockets—if their presence could significantly contribute to the dif-

ficulty of characterizing or modeling the geohydrologic system.

(d) *Disqualifying condition.* A site shall be disqualified if the pre-waste-emplacement ground-water travel time from the disturbed zone to the accessible environment is expected to be less than 1,000 years along any pathway of likely and significant radionuclide travel.

§ 960.4-2-2 Geochemistry.

(a) *Qualifying condition.* The present and expected geochemical characteristics of a site shall be compatible with waste containment and isolation. Considering the likely chemical interactions among radionuclides, the host rock, and the ground water, the characteristics of and the processes operating within the geologic setting shall permit compliance with (1) the requirements specified in §960.4-1 for radionuclide releases to the accessible environment and (2) the requirements specified in 10 CFR 60.113 for radionuclide releases from the engineered-barrier system using reasonably available technology.

(b) *Favorable conditions.* (1) The nature and rates of the geochemical processes operating within the geologic setting during the Quaternary Period would, if continued into the future, not affect or would favorably affect the ability of the geologic repository to isolate the waste during the next 100,000 years.

(2) Geochemical conditions that promote the precipitation, diffusion into the rock matrix, or sorption of radionuclides; inhibit the formation of particulates, colloids, inorganic complexes, or organic complexes that increase the mobility of radionuclides; or inhibit the transport of radionuclides by particulates, colloids, or complexes.

(3) Mineral assemblages that, when subjected to expected repository conditions, would remain unaltered or would alter to mineral assemblages with equal or increased capability to retard radionuclide transport.

(4) A combination of expected geochemical conditions and a volumetric flow rate of water in the host rock that would allow less than 0.001 percent per

§ 960.4-2-3

year of the total radionuclide inventory in the repository at 1,000 years to be dissolved.

(5) Any combination of geochemical and physical retardation processes that would decrease the predicted peak cumulative releases of radionuclides to the accessible environment by a factor of 10 as compared to those predicted on the basis of ground-water travel time without such retardation.

(c) *Potentially adverse conditions.* (1) Ground-water conditions in the host rock that could affect the solubility or the chemical reactivity of the engineered-barrier system to the extent that the expected repository performance could be compromised.

(2) Geochemical processes or conditions that could reduce the sorption of radionuclides or degrade the rock strength.

(3) Pre-waste-emplacment ground-water conditions in the host rock that are chemically oxidizing.

§ 960.4-2-3 Rock characteristics.

(a) *Qualifying condition.* The present and expected characteristics of the host rock and surrounding units shall be capable of accommodating the thermal, chemical, mechanical, and radiation stresses expected to be induced by repository construction, operation, and closure and by expected interactions among the waste, host rock, ground water, and engineered components. The characteristics of and the processes operating within the geologic setting shall permit compliance with (1) the requirements specified in § 960.4-1 for radionuclide releases to the accessible environment and (2) the requirements set forth in 10 CFR 60.113 for radionuclide releases from the engineered-barrier system using reasonably available technology.

(b) *Favorable Conditions.* (1) A host rock that is sufficiently thick and laterally extensive to allow significant flexibility in selecting the depth, configuration, and location of the underground facility to ensure isolation.

(2) A host rock with a high thermal conductivity, a low coefficient of thermal expansion, or sufficient ductility to seal fractures induced by repository construction, operation, or closure or by interactions among the waste, host

10 CFR Ch. III (1-1-16 Edition)

rock, ground water, and engineered components.

(c) *Potentially adverse conditions.* (1) Rock conditions that could require engineering measures beyond reasonably available technology for the construction, operation, and closure of the repository, if such measures are necessary to ensure waste containment or isolation.

(2) Potential for such phenomena as thermally induced fractures, the hydration or dehydration of mineral components, brine migration, or other physical, chemical, or radiation-related phenomena that could be expected to affect waste containment or isolation.

(3) A combination of geologic structure, geochemical and thermal properties, and hydrologic conditions in the host rock and surrounding units such that the heat generated by the waste could significantly decrease the isolation provided by the host rock as compared with pre-waste-emplacment conditions.

§ 960.4-2-4 Climatic changes.

(a) *Qualifying condition.* The site shall be located where future climatic conditions will not be likely to lead to radionuclide releases greater than those allowable under the requirements specified in § 960.4-1. In predicting the likely future climatic conditions at a site, the DOE will consider the global, regional, and site climatic patterns during the Quaternary Period, considering the geomorphic evidence of the climatic conditions in the geologic setting.

(b) *Favorable conditions.* (1) A surface-water system such that expected climatic cycles over the next 100,000 years would not adversely affect waste isolation.

(2) A geologic setting in which climatic changes have had little effect on the hydrologic system throughout the Quaternary Period.

(c) *Potentially adverse conditions.* (1) Evidence that the water table could rise sufficiently over the next 10,000 years to saturate the underground facility in a previously unsaturated host rock.

(2) Evidence that climatic changes over the next 10,000 years could cause

Department of Energy

§ 960.4-2-7

perturbations in the hydraulic gradient, the hydraulic conductivity, the effective porosity, or the ground-water flux through the host rock and the surrounding geohydrologic units, sufficient to significantly increase the transport of radionuclides to the accessible environment.

§ 960.4-2-5 Erosion.

(a) *Qualifying condition.* The site shall allow the underground facility to be placed at a depth such that erosional processes acting upon the surface will not be likely to lead to radionuclide releases greater than those allowable under the requirements specified in § 960.4-1. In predicting the likelihood of potentially disruptive erosional processes, the DOE will consider the climatic, tectonic, and geomorphic evidence of rates and patterns of erosion in the geologic setting during the Quaternary Period.

(b) *Favorable conditions.* (1) Site conditions that permit the emplacement of waste at a depth of at least 300 meters below the directly overlying ground surface.

(2) A geologic setting where the nature and rates of the erosional processes that have been operating during the Quaternary Period are predicted to have less than one chance in 10,000 over the next 10,000 years of leading to releases of radionuclides to the accessible environment.

(3) Site conditions such that waste exhumation would not be expected to occur during the first one million years after repository closure.

(c) *Potentially adverse conditions.* (1) A geologic setting that shows evidence of extreme erosion during the Quaternary Period.

(2) A geologic setting where the nature and rates of geomorphic processes that have been operating during the Quaternary Period could, during the first 10,000 years after closure, adversely affect the ability of the geologic repository to isolate the waste.

(d) *Disqualifying condition.* The site shall be *disqualified* if site conditions do not allow all portions of the underground facility to be situated at least 200 meters below the directly overlying ground surface.

§ 960.4-2-6 Dissolution.

(a) *Qualifying condition.* The site shall be located such that any subsurface rock dissolution will not be likely to lead to radionuclide releases greater than those allowable under the requirements specified in § 960.4-1. In predicting the likelihood of dissolution within the geologic setting at a site, the DOE will consider the evidence of dissolution within that setting during the Quaternary Period, including the locations and characteristics of dissolution fronts or other dissolution features, if identified.

(b) *Favorable condition.* No evidence that the host rock within the site was subject to significant dissolution during the Quaternary Period.

(c) *Potentially adverse condition.* Evidence of dissolution within the geologic setting—such as breccia pipes, dissolution cavities, significant volumetric reduction of the host rock or surrounding strata, or any structural collapse—such that a hydraulic interconnection leading to a loss of waste isolation could occur.

(d) *Disqualifying condition.* The site shall be *disqualified* if it is likely that, during the first 10,000 years after closure, active dissolution, as predicted on the basis of the geologic record, would result in a loss of waste isolation.

§ 960.4-2-7 Tectonics.

(a) *Qualifying condition.* The site shall be located in a geologic setting where future tectonic processes or events will not be likely to lead to radionuclide releases greater than those allowable under the requirements specified in § 960.4-1. In predicting the likelihood of potentially disruptive tectonic processes or events, the DOE will consider the structural, stratigraphic, geophysical, and seismic evidence for the nature and rates of tectonic processes and events in the geologic setting during the Quaternary Period.

(b) *Favorable condition.* The nature and rates of igneous activity and tectonic processes (such as uplift, subsidence, faulting, or folding), if any, operating within the geologic setting during the Quaternary Period would, if continued into the future, have less than one chance in 10,000 over the first 10,000 years after closure of leading to

releases of radionuclides to the accessible environment.

(c) *Potentially adverse conditions.* (1) Evidence of active folding, faulting, diapirism, uplift, subsidence, or other tectonic processes or igneous activity within the geologic setting during the Quaternary Period.

(2) Historical earthquakes within the geologic setting of such magnitude and intensity that, if they recurred, could affect waste containment or isolation.

(3) Indications, based on correlations of earthquakes with tectonic processes and features, that either the frequency of occurrence or the magnitude of earthquakes within the geologic setting may increase.

(4) More-frequent occurrences of earthquakes or earthquakes of higher magnitude than are representative of the region in which the geologic setting is located.

(5) Potential for natural phenomena such as landslides, subsidence, or volcanic activity of such magnitudes that they could create large-scale surface-water impoundments that could change the regional ground-water flow system.

(6) Potential for tectonic deformations—such as uplift, subsidence, folding, or faulting—that could adversely affect the regional ground-water flow system.

(d) *Disqualifying condition.* A site shall be disqualified if, based on the geologic record during the Quaternary Period, the nature and rates of fault movement or other ground motion are expected to be such that a loss of waste isolation is likely to occur.

§ 960.4-2-8 Human interference.

The site shall be located such that activities by future generations at or near the site will not be likely to affect waste containment and isolation. In assessing the likelihood of such activities, the DOE will consider the estimated effectiveness of the permanent markers and records required by 10 CFR part 60, taking into account site-specific factors, as stated in §§ 960.4-2-8-1 and 960.4-2-8-2, that could compromise their continued effectiveness.

§ 960.4-2-8-1 Natural resources.

(a) *Qualifying condition.* This site shall be located such that—considering

permanent markers and records and reasonable projections of value, scarcity, and technology—the natural resources, including ground water suitable for crop irrigation or human consumption without treatment, present at or near the site will not be likely to give rise to interference activities that would lead to radionuclide releases greater than those allowable under the requirements specified in § 960.4-1.

(b) *Favorable conditions.* (1) No known natural resources that have or are projected to have in the foreseeable future a value great enough to be considered a commercially extractable resource.

(2) Ground water with 10,000 parts per million or more of total dissolved solids along any path of likely radionuclide travel from the host rock to the accessible environment.

(c) *Potentially adverse conditions.* (1) Indications that the site contains naturally occurring materials, whether or not actually identified in such form that (i) economic extraction is potentially feasible during the foreseeable future or (ii) such materials have a greater gross value, net value, or commercial potential than the average for other areas of similar size that are representative of, and located in, the geologic setting.

(2) Evidence of subsurface mining or extraction for resources within the site if it could affect waste containment or isolation.

(3) Evidence of drilling within the site for any purpose other than repository-site evaluation to a depth sufficient to affect waste containment and isolation.

(4) Evidence of a significant concentration of any naturally occurring material that is not widely available from other sources.

(5) Potential for foreseeable human activities—such as ground-water withdrawal, extensive irrigation, subsurface injection of fluids, underground pumped storage, military activities, or the construction of large-scale surface-water impoundments—that could adversely change portions of the ground-water flow system important to waste isolation.

(d) *Disqualifying conditions.* A site shall be disqualified if—

Department of Energy

§ 960.5-2

(1) Previous exploration, mining, or extraction activities for resources of commercial importance at the site have created significant pathways between the projected underground facility and the accessible environment; or

(2) Ongoing or likely future activities to recover presently valuable natural mineral resources outside the controlled area would be expected to lead to an inadvertent loss of waste isolation.

§ 960.4-2-8-2 Site ownership and control.

(a) *Qualifying condition.* The site shall be located on land for which the DOE can obtain, in accordance with the requirements of 10 CFR part 60, ownership, surface and subsurface rights, and control of access that are required in order that potential surface and subsurface activities as the site will not be likely to lead to radionuclide releases greater than those allowable under the requirements specified in § 960.4-1.

(b) *Favorable condition.* Present ownership and control of land and all surface and subsurface rights by the DOE.

(c) *Potentially adverse condition.* Projected land-ownership conflicts that cannot be successfully resolved through voluntary purchase-sell agreements, nondisputed agency-to-agency transfers of title, or Federal condemnation proceedings.

Subpart D—Preclosure Guidelines

§ 960.5 Preclosure guidelines.

The guidelines in this subpart specify the factors to be considered in evaluating and comparing sites on the basis of expected repository performance before closure. The preclosure guidelines are separated into three system guidelines and eleven technical guidelines.

§ 960.5-1 System guidelines.

(a) *Qualifying conditions*—(1) *Preclosure radiological safety.* Any projected radiological exposures of the general public and any projected releases of radioactive materials to restricted and unrestricted areas during repository operation and closure shall meet the applicable safety requirements set forth in 10 CFR part 20, 10

CFR part 60, and 40 CFR 191, subpart A (see appendix II of this part).

(2) *Environment, socioeconomics, and transportation.* During repository siting, construction, operation, closure, and decommissioning the public and the environment shall be adequately protected from the hazards posed by the disposal of radioactive waste.

(3) *Ease and cost of siting, construction, operation, and closure.* Repository siting, construction, operation, and closure shall be demonstrated to be technically feasible on the basis of reasonably available technology, and the associated costs shall be demonstrated to be reasonable relative to other available and comparable siting options.

§ 960.5-2 Technical guidelines.

The technical guidelines in this subpart set forth qualifying, favorable, potentially adverse, and, in seven guidelines, disqualifying conditions for the characteristics, processes, and events that influence the suitability of a site relative to the preclosure system guidelines. These conditions are separated into three main groups: Preclosure radiological safety; environment, socioeconomics, and transportation; and ease and cost of siting, construction, operation, and closure. The first group includes conditions on population density and distribution, site ownership and control, meteorology, and offsite installations and operations. The second group includes conditions related to environmental quality and socioeconomic impacts in areas potentially affected by a repository and to the transportation of waste to a repository site. The third group includes conditions on the surface characteristics of the site, the characteristics of the host rock and surrounding strata, hydrology, and tectonics. The individual technical guidelines within each group, as well as the favorable conditions and the potentially adverse conditions under each guideline, are not listed in any assumed order of importance. The technical guidelines that follow establish conditions that shall be considered in determining compliance with the qualifying conditions of the preclosure system guidelines. For

§ 960.5-2-1

each technical guideline, an evaluation of qualification or disqualification shall be made in accordance with the requirements specified in subpart B.

PRECLOSURE RADIOLOGICAL SAFETY

§ 960.5-2-1 Population density and distribution.

(a) *Qualifying condition.* The site shall be located such that, during repository operation and closure, (1) the expected average radiation dose to members of the public within any highly populated area will not be likely to exceed a small fraction of the limits allowable under the requirements specified in § 960.5-1(a)(1), and (2) the expected radiation dose to any member of the public in an unrestricted area will not be likely to exceed the limit allowable under the requirements specified in § 960.5-1(a)(1).

(b) *Favorable conditions.* (1) A low population density in the general region of the site.

(2) Remoteness of site from highly populated areas.

(c) *Potentially adverse conditions.* (1) High residential, seasonal, or daytime population density within the projected site boundaries.

(2) Proximity of the site to highly populated areas, or to areas having at least 1,000 individuals in an area 1 mile by 1 mile as defined by the most recent decennial count of the U.S. census.

(d) *Disqualifying conditions.* A site shall be *disqualified* if—

(1) Any surface facility of a repository would be located in a highly populated area; or

(2) Any surface facility of a repository would be located adjacent to an area 1 mile by 1 mile having a population of not less than 1,000 individuals as enumerated by the most recent U.S. census; or

(3) The DOE could not develop an emergency preparedness program which meets the requirements specified in DOE Order 5500.3 (Reactor and Non-Reactor Facility Emergency Planning, Preparedness, and Response Program for Department of Energy Operations) and related guides or, when issued by the NRC, in 10 CFR part 60, subpart I, “Emergency Planning Criteria.”

10 CFR Ch. III (1-1-16 Edition)

§ 960.5-2-2 Site ownership and control.

(a) *Qualifying condition.* The site shall be located on land for which the DOE can obtain, in accordance with the requirements of 10 CFR 60.121, ownership, surface and subsurface rights, and control of access that are required in order that surface and subsurface activities during repository operation and closure will not be likely to lead to radionuclide releases to an unrestricted area greater than those allowable under the requirements specified in § 960.5-1(a)(1).

(b) *Favorable condition.* Present ownership and control of land and all surface and subsurface mineral and water rights by the DOE.

(c) *Potentially adverse condition.* Projected land-ownership conflicts that cannot be successfully resolved through voluntary purchase-sell agreements, nondisputed agency-to-agency transfers of title, or Federal condemnation proceedings.

§ 960.5-2-3 Meteorology.

(a) *Qualifying condition.* The site shall be located such that expected meteorological conditions during repository operation and closure will not be likely to lead to radionuclide releases to an unrestricted area greater than those allowable under the requirements specified in § 960.5-1(a)(1).

(b) *Favorable condition.* Prevailing meteorological conditions such that any radioactive releases to the atmosphere during repository operation and closure would be effectively dispersed, thereby reducing significantly the likelihood of unacceptable exposure to any member of the public in the vicinity of the repository.

(c) *Potentially adverse conditions.* (1) Prevailing meteorological conditions such that radioactive emissions from repository operation or closure could be preferentially transported toward localities in the vicinity of the repository with higher population densities than are the average for the region.

(2) History of extreme weather phenomena—such as hurricanes, tornadoes, severe floods, or severe and frequent winter storms—that could significantly affect repository operation or closure.

§ 960.5-2-4 Offsite installations and operations.

(a) *Qualifying condition.* The site shall be located such that present projected effects from nearby industrial, transportation, and military installations and operations, including atomic energy defense activities, (1) will not significantly affect repository siting, construction, operation, closure, or decommissioning or can be accommodated by engineering measures and (2), when considered together with emissions from repository operation and closure, will not be likely to lead to radionuclide releases to an unrestricted area greater than those allowable under the requirements specified in § 960.5-1(a)(1).

(b) *Favorable condition.* Absence of contributing radioactive releases from other nuclear installations and operations that must be considered under the requirements of 40 CFR 191, subpart A.

(c) *Potentially adverse conditions.* (1) The presence of nearby potentially hazardous installations or operations that could adversely affect repository operation or closure.

(2) Presence of other nuclear installations and operations, subject to the requirements of 40 CFR part 190 or 40 CFR part 191, subpart A, with actual or projected releases near the maximum value permissible under those standards.

(d) *Disqualifying condition.* A site shall be disqualified if atomic energy defense activities in proximity to the site are expected to conflict irreconcilably with repository siting, construction, operation, closure, or decommissioning.

ENVIRONMENT, SOCIOECONOMICS, AND
TRANSPORTATION**§ 960.5-2-5 Environmental quality.**

(a) *Qualifying condition.* The site shall be located such that (1) the quality of the environment in the affected area during this and future generations will be adequately protected during repository siting, construction, operation, closure, and decommissioning, and projected environmental impacts in the affected area can be mitigated to an acceptable degree, taking into account programmatic, technical, social, eco-

nomic, and environmental factors; and (2) the requirements specified in § 960.5-1(a)(2) can be met.

(b) *Favorable conditions.* (1) Projected ability to meet, within time constraints, all Federal, State, and local procedural and substantive environmental requirements applicable to the site and the activities proposed to take place thereon.

(2) Potential significant adverse environmental impacts to present and future generations can be mitigated to an insignificant level through the application of reasonable measures, taking into account programmatic, technical, social, economic, and environmental factors.

(c) *Potentially adverse conditions.* (1) Projected major conflict with applicable Federal, State, or local environmental requirements.

(2) Projected significant adverse environmental impacts that cannot be avoided or mitigated.

(3) Proximity to, or projected significant adverse environmental impacts of the repository or its support facilities on, a component of the National Park System, the National Wildlife Refuge System, the National Wild and Scenic Rivers System, the National Wilderness Preservation System, or National Forest Land.

(4) Proximity to, and projected significant adverse environmental impacts of the repository or its support facilities on, a significant State or regional protected resource area, such as a State park, a wildlife area, or a historical area.

(5) Proximity to, and projected significant adverse environmental impacts of the repository and its support facilities on, a significant Native American resource, such as a major Indian religious site, or other sites of unique cultural interest.

(6) Presence of critical habitats for threatened or endangered species that may be compromised by the repository or its support facilities.

(d) *Disqualifying conditions.* Any of the following conditions shall *disqualify* a site:

(1) During repository siting, construction, operation, closure, or decommissioning the quality of the environment in the affected area could not be

§ 960.5-2-6

10 CFR Ch. III (1-1-16 Edition)

adequately protected or projected environmental impacts in the affected area could not be mitigated to an acceptable degree, taking into account programmatic, technical, social, economic, and environmental factors.

(2) Any part of the restricted area or repository support facilities would be located within the boundaries of a component of the National Park System, the National Wildlife Refuge System, the National Wilderness Preservation System, or the National Wild and Scenic Rivers System.

(3) The presence of the restricted area or the repository support facilities would conflict irreconcilably with the previously designated resource-preservation use of a component of the National Park System, the National Wildlife Refuge System, the National Wilderness Preservation System, the National Wild and Scenic Rivers System, or National Forest Lands, or any comparably significant State protected resource that was dedicated to resource preservation at the time of the enactment of the Act.

§ 960.5-2-6 Socioeconomic impacts.

(a) *Qualifying condition.* The site shall be located such that (1) any significant adverse social and/or economic impacts induced in communities and surrounding regions by repository siting, construction, operation, closure, and decommissioning can be offset by reasonable mitigation or compensation, as determined by a process of analysis, planning, and consultation among the DOE, affected State and local government jurisdictions, and affected Indian tribes; and (2) the requirements specified in § 960.5-1(a)(2) can be met.

(b) *Favorable conditions.* (1) Ability of an affected area to absorb the project-related population changes without significant disruptions of community services and without significant impacts on housing supply and demand.

(2) Availability of an adequate labor force in the affected area.

(3) Projected net increases in employment and business sales, improved community services, and increased government revenues in the affected area.

(4) No projected substantial disruption of primary sectors of the economy of the affected area.

(c) *Potentially adverse conditions.* (1) Potential for significant repository-related impacts on community services, housing supply and demand, and the finances of State and local government agencies in the affected area.

(2) Lack of an adequate labor force in the affected area.

(3) Need for repository-related purchase or acquisition of water rights, if such rights could have significant adverse impacts on the present or future development of the affected area.

(4) Potential for major disruptions of primary sectors of the economy of the affected area.

(d) *Disqualifying condition.* A site shall be disqualified if repository construction, operation, or closure would significantly degrade the quality, or significantly reduce the quantity, of water from major sources of offsite supplies presently suitable for human consumption or crop irrigation and such impacts cannot be compensated for, or mitigated by, reasonable measures.

§ 960.5-2-7 Transportation.

(a) *Qualifying condition.* The site shall be located such that (1) the access routes constructed from existing local highways and railroads to the site (i) will not conflict irreconcilably with the previously designated use of any resource listed in § 960.5-2-5(d) (2) and (3); (ii) can be designed and constructed using reasonably available technology; (iii) will not require transportation system components to meet performance standards more stringent than those specified in the applicable DOT and NRC regulations, nor require the development of new packaging containment technology; (iv) will allow transportation operations to be conducted without causing an unacceptable risk to the public or unacceptable environmental impacts, taking into account programmatic, technical, social, economic, and environmental factors; and (2) the requirements of § 960.5-1(a)(2) can be met.

(b) *Favorable conditions.* (1) Availability of access routes from local existing highways and railroads to the

Department of Energy

§ 960.5-2-9

site which have any of the following characteristics:

(i) Such routes are relatively short and economical to construct as compared to access routes for other comparable siting options.

(ii) Federal condemnation is not required to acquire rights-of-way for the access routes.

(iii) Cuts, fills, tunnels, or bridges are not required.

(iv) Such routes are free of sharp curves or steep grades and are not likely to be affected by landslides or rock slides.

(v) Such routes bypass local cities and towns.

(2) Proximity to local highways and railroads that provide access to regional highways and railroads and are adequate to serve the repository without significant upgrading or reconstruction.

(3) Proximity to regional highways, mainline railroads, or inland waterways that provide access to the national transportation system.

(4) Availability of a regional railroad system with a minimum number of interchange points at which train crew and equipment changes would be required.

(5) Total projected life-cycle cost and risk for transportation of all wastes designated for the repository site which are significantly lower than those for comparable siting options, considering locations of present and potential sources of waste, interim storage facilities, and other repositories.

(6) Availability of regional and local carriers—truck, rail, and water—which have the capability and are willing to handle waste shipments to the repository.

(7) Absence of legal impediment with regard to compliance with Federal regulations for the transportation of waste in or through the affected State and adjoining States.

(8) Plans, procedures, and capabilities for response to radioactive waste transportation accidents in the affected State that are completed or being developed.

(9) A regional meteorological history indicating that significant transpor-

tation disruptions would not be routine seasonal occurrences.

(c) *Potentially adverse conditions.* (1) Access routes to existing local highways and railroads that are expensive to construct relative to comparable siting options.

(2) Terrain between the site and existing local highways and railroads such that steep grades, sharp switchbacks, rivers, lakes, landslides, rock slides, or potential sources of hazard to incoming waste shipments will be encountered along access routes to the site.

(3) Existing local highways and railroads that could require significant reconstruction or upgrading to provide adequate routes to the regional and national transportation system.

(4) Any local condition that could cause the transportation-related costs, environmental impacts, or risk to public health and safety from waste transportation operations to be significantly greater than those projected for other comparable siting options.

EASE AND COST OF SITING, CONSTRUCTION, OPERATION, AND CLOSURE

§ 960.5-2-8 Surface characteristics.

(a) *Qualifying condition.* The site shall be located such that, considering the surface characteristics and conditions of the site and surrounding area, including surface-water systems and the terrain, the requirements specified in § 960.5-1(a)(3) can be met during repository siting, construction, operation, and closure.

(b) *Favorable conditions.* (1) Generally flat terrain.

(2) Generally well-drained terrain.

(c) *Potentially adverse condition.* Surface characteristics that could lead to the flooding of surface or underground facilities by the occupancy and modification of flood plains, the failure of existing or planned man-made surface-water impoundments, or the failure of engineered components of the repository.

§ 960.5-2-9 Rock characteristics.

(a) *Qualifying condition.* The site shall be located such that (1) the thickness and lateral extent and the characteristics and composition of the host rock

will be suitable for accommodation of the underground facility; (2) repository construction, operation, and closure will not cause undue hazard to personnel; and (3) the requirements specified in § 960.5-1(a)(3) can be met.

(b) *Favorable conditions.* (1) A host rock that is sufficiently thick and laterally extensive to allow significant flexibility in selecting the depth, configuration, and location of the underground facility.

(2) A host rock with characteristics that would require minimal or no artificial support for underground openings to ensure safe repository construction, operation, and closure.

(c) *Potentially adverse conditions.* (1) A host rock that is suitable for repository construction, operation, and closure, but is so thin or laterally restricted that little flexibility is available for selecting the depth, configuration, or location of an underground facility.

(2) In situ characteristics and conditions that could require engineering measures beyond reasonably available technology in the construction of the shafts and underground facility.

(3) Geomechanical properties that could necessitate extensive maintenance of the underground openings during repository operation and closure.

(4) Potential for such phenomena as thermally induced fracturing, the hydration and dehydration of mineral components, or other physical, chemical, or radiation-related phenomena that could lead to safety hazards or difficulty in retrieval during repository operation.

(5) Existing faults, shear zones, pressurized brine pockets, dissolution effects, or other stratigraphic or structural features that could compromise the safety of repository personnel because of water inflow or construction problems.

(d) *Disqualifying condition.* The site shall be *disqualified* if the rock characteristics are such that the activities associated with repository construction, operation, or closure are predicted to cause significant risk to the health and safety of personnel, taking into account mitigating measures that use reasonably available technology.

§ 960.5-2-10 Hydrology.

(a) *Qualifying condition.* The site shall be located such that the geohydrologic setting of the site will (1) be compatible with the activities required for repository construction, operation, and closure; (2) not compromise the intended functions of the shaft liners and seals; and (3) permit the requirements specified in § 960.5-1(a)(3) to be met.

(b) *Favorable conditions.* (1) Absence of aquifers between the host rock and the land surface.

(2) Absence of surface-water systems that could potentially cause flooding of the repository.

(3) Availability of the water required for repository construction, operation, and closure.

(c) *Potentially adverse condition.* Ground-water conditions that could require complex engineering measures that are beyond reasonably available technology for repository construction, operation, and closure.

(d) *Disqualifying condition.* A site shall be disqualified if, based on expected ground-water conditions, it is likely that engineering measures that are beyond reasonably available technology will be required for exploratory-shaft construction or for repository construction, operation, or closure.

§ 960.5-2-11 Tectonics.

(a) *Qualifying Conditions.* The site shall be located in a geologic setting in which any projected effects of expected tectonic phenomena or igneous activity on repository construction, operation, or closure will be such that the requirements specified in § 960.5-1(a)(3) can be met.

(b) *Favorable Condition.* The nature and rates of faulting, if any, within the geologic setting are such that the magnitude and intensity of the associated seismicity are significantly less than those generally allowable for the construction and operation of nuclear facilities.

(c) *Potentially Adverse Conditions.* (1) Evidence of active faulting within the geologic setting.

(2) Historical earthquakes or past man-induced seismicity that, if either were to recur, could produce ground motion at the site in excess of reasonable design limits.

(3) Evidence, based on correlations of earthquakes with tectonic processes and features, (e.g., faults) within the geologic setting, that the magnitude of earthquakes at the site during repository construction, operation, and closure may be larger than predicted from historical seismicity.

(d) *Disqualifying Condition.* A site shall be disqualified if, based on the expected nature and rates of fault movement or other ground motion, it is likely that engineering measures that are beyond reasonably available technology will be required for exploratory-shaft construction or for repository construction, operation, or closure.

APPENDIX I TO PART 960—NRC AND EPA REQUIREMENTS FOR POSTCLOSURE REPOSITORY PERFORMANCE

Under proposed 40 CFR part 191, subpart B—*Environmental Standards for Disposal*, §191.13, “Containment Requirements”, specifies that for 10,000 years after disposal (a) releases of radioactive materials to the accessible environment that are estimated to have more than one chance in 100 of occurring over a 10,000 year period (“reasonably foreseeable releases”) shall be projected to be less than the quantities permitted by Table 2 of that regulation’s appendix; and (b) for “very unlikely releases” (i.e., those estimated to have between one chance in 100 and one chance in 10,000 of occurring over a 10,000 year period), the limits specified in Table 2 would be multiplied by 10. The basis for Table 2 is an upper limit on long term risks of 1,000 health effects over 10,000 years for a repository containing wastes generated from 100,000 metric tons of heavy metal of reactor fuel. For releases involving more than one radionuclide, the allowed release for each radionuclide is reduced to the fraction of its limit that insures that the overall limit on harm is not exceeded. Additionally, to provide confidence needed for compliance with the containment requirements specified above, §191.14, “Assurance Requirements”, specifies the disposal of radioactive waste in accordance with seven requirements, relating to prompt disposal of waste; selection and design of disposal systems to keep releases to the accessible environment as small as reasonably achievable; engineered and natural barriers; nonreliance on active institutional controls after closure; passive controls after closure; natural resource areas; and design of disposal systems to allow future recovery of wastes.

The guidelines will be revised as necessary after the adoption of final regulations by the EPA.

The implementation of 40 CFR part 191, subpart B is required by 10 CFR 60.112. 10 CFR 60.113 establishes minimum conditions to be met for engineered components and ground-water flow; specifically: (1) Containment of radioactive waste within the waste packages will be substantially complete for a period to be determined by the NRC taking into account the factors specified in 10 CFR 60.113(b) provided that such period shall be not less than 300 years nor more than 1,000 years after permanent closure of the geologic repository; (2) the release rate of any radionuclide from the engineered barrier system following the containment period shall not exceed one part in 100,000 per year of the inventory of that radionuclide calculated to be present at 1,000 years following permanent closure, or such other fraction of the inventory as may be approved or specified by the NRC, provided that this requirement does not apply to any radionuclide which is released at a rate less than 0.1% of the calculated total release rate limit. The calculated total release rate limit shall be taken to be one part in 100,000 per year of the inventory of radioactive waste originally emplaced in the underground facility that remains after 1,000 years of radioactive decay; and (3) the geologic repository shall be located so that pre-waste-emplacment ground-water travel time along the fastest path of likely radionuclide travel from the disturbed zone to the accessible environment shall be at least 1,000 years or such other travel time as may be approved or specified by the NRC.

The guidelines will be revised as necessary to ensure consistency with 10 CFR part 60.

APPENDIX II TO PART 960—NRC AND EPA REQUIREMENTS FOR PRECLOSURE REPOSITORY PERFORMANCE

Under proposed 40 CFR part 191, subpart A—*Environmental Standards for Management and Storage*, Section 191.03, “Standards for Normal Operations”, specifies: (1) That operations should be conducted so as to reduce exposure to members of the public to the extent reasonably achievable, taking into account technical, social, and economic considerations; and (2) that, except for variances permitted for unusual operations under Section 191.04 as an upper limit, normal operations shall be conducted in such a manner as to provide reasonable assurance that the combined annual dose equivalent to any member of the public due to: (i) operations covered by 40 CFR part 190, (ii) planned discharges of radioactive material to the general environment from operations covered by this subpart, and (iii) direct radiation from these operations; shall not exceed 25 millirems to the whole body, 75 millirems to

the thyroid, or 25 millirems to any other organ.

The guidelines will be revised as necessary after the adoption of final regulations by the EPA.

The implementation of 40 CFR part 191, subpart A and 10 CFR part 20 is required by 10 CFR 60.111. 10 CFR 60.111 also specifies requirements for waste retrieval, if necessary, including considerations of design, back-filling, and schedule. 10 CFR part 20 establishes (a) exposure limits for operating personnel and (b) permissible concentrations of radionuclides in uncontrolled areas for air and water. The latter are generally less restrictive than 40 CFR 191, subpart A, but may be limiting under certain conditions (i.e., if used as a maximum for short durations rather than annual averages).

The guidelines will be revised as necessary to ensure consistency with 10 CFR part 60.

APPENDIX III TO PART 960—APPLICATION OF THE SYSTEM AND TECHNICAL GUIDELINES DURING THE SITING PROCESS

1. This appendix presents a table that specifies how the guidelines of subparts C and D are to be applied at certain decision points of the siting process. The decision points, as referenced in the table, are defined as follows:

“Potentially acceptable” means the decision point at which a site is identified as potentially acceptable.

“Nomination and recommendation” means the decision point at which a site is nominated as suitable for characterization or recommended as a candidate site for characterization.

2. The findings resulting from the application of a disqualifying condition for any particular guideline at a given decision point are denoted in the table by the numeral 1 or 2. The numerals 1 and 2 signify the types of

findings that are required and are defined as follows:

“1” means *either* of the following:

(a) The evidence does *not* support a finding that the site is disqualified.

or

(b) The evidence supports a finding that the site is disqualified.

“2” means *either* of the following:

(a) The evidence supports a finding that the site is *not* disqualified on the basis of that evidence and is *not* likely to be disqualified.

or

(b) The evidence supports a finding that the site is disqualified or is likely to be disqualified.

3. The findings resulting from the application of a qualifying condition for any particular guideline at a given decision point are denoted in the table by the numeral 3 or 4. The numerals 3 and 4 signify the types of findings that are required and are defined as follows:

“3” means *either* of the following:

(a) The evidence does *not* support a finding that the site is *not* likely to meet the qualifying condition.

or

(b) The evidence supports a finding that the site is *not* likely to meet the qualifying condition, and therefore the site is disqualified.

4. If performance assessments are used to substantiate any of the above findings, those assessments shall include estimates of the effects of uncertainties in data and modeling.

5. For both the disqualifying and qualifying conditions of any guideline, a higher finding (e.g., a “2” finding rather than “1”) shall be made if there is sufficient evidence to support such a finding.

FINDINGS RESULTING FROM THE APPLICATION OF THE QUALIFYING AND DISQUALIFYING CONDITIONS OF THE TECHNICAL GUIDELINES AT MAJOR SITING DECISIONS

[49 FR 47752, Dec. 6, 1984, as amended at 66 FR 57335, Nov. 14, 2001]

APPENDIX IV TO PART 960—TYPES OF INFORMATION FOR THE NOMINATION OF SITES AS SUITABLE FOR CHARACTERIZATION

The types of information specified below are those that the DOE expects will be included in the evidence used for evaluations and applications of the guidelines of subparts C and D at the time of nomination of a site as suitable for characterization. The types of information listed under each guideline are considered to be the most significant for the evaluation of that guideline. However, the types of information listed under any particular guideline will be used, as necessary, for the evaluation of any other guideline. As stated in §960.3-1-4-2, the DOE will use technically conservative assumptions or extrapolations of regional data, where necessary, to supplement this information. The information specified below will be supplemented with conceptual models, as appropriate, and analyses of uncertainties in the data.

Before site-characterization studies and related nongeologic data gathering activities, the evidence is not expected to provide precise information, but, rather, to provide a

reasonable basis for assessing the merits or shortcomings of the site against the guidelines of subparts C and D. Consequently, the types of information described below should be interpreted so as to accommodate differences among sites and differences in the information acquired before detailed studies.

The specific information required for the guideline applications set forth in appendix III of this part is expected to differ from site to site because of site-specific factors, both with regard to favorable and potentially adverse conditions and with regard to the sources and reliability of the information. The types of information specified in this appendix will be used except where the findings set forth in appendix III of this part can be arrived at by reasonable alternative means or the information is not required for the particular site.

Section 960.4-2-1 Geohydrology.

Description of the geohydrologic setting of the site, in context with its geologic setting, in order to estimate the pre-waste-emplacement ground-water flow conditions. The types of information to support this description should include—

- Location and estimated hydraulic properties of aquifers, confining units, and aquitards.
- Potential areas and modes of recharge and discharge for aquifers.
- Regional potentiometric surfaces of aquifers.
- Likely flow paths from the repository to locations in the expected accessible environment, as based on regional data.
- Preliminary estimates of ground-water travel times along the likely flow paths from the repository to locations in the expected accessible environment.
- Current use of principal aquifers and State or local management plans for such use.

Section 960.4–2–2 Geochemistry.

Description of the geochemical and hydrochemical conditions of the host rock, of the surrounding geohydrologic units, and along likely ground-water paths to locations in the expected accessible environment, in order to estimate the potential for the migration of radionuclides. The types of information to support this description should include—

- Petrology of the rocks.
- Mineralogy of the rocks and general characteristics of fracture fillings.
- Geochemical and mechanical stability of the minerals under expected repository conditions.
- General characteristics of the ground-water chemistry (e.g., reducing/oxidizing conditions and the principal ions that may affect the waste package or radionuclide behavior).
- Geochemical properties of minerals as related to radionuclide transport.

Section 960.4–2–3 Rock characteristics.

Description of the geologic and geomechanical characteristics of the site, in context with the geologic setting, in order to estimate the capability of the host rock and surrounding rock units to accommodate the thermal, mechanical, chemical, and radiation stresses expected to be induced by repository construction, operation, and closure and by expected interactions among the waste, host rock, ground-water, and engineered components of the repository system. The types of information to support this description should include—

- Approximate geology and stratigraphy of the site, including the depth, thickness, and lateral extent of the host rock and surrounding rock units.
- Approximate structural framework of the rock units and any major discontinuities identified from core samples.
- Approximate thermal, mechanical, and thermomechanical properties of the rocks, with consideration of the effects of time,

stress, temperature, dimensional scale, and any major identified structural discontinuities.

- Estimates of the magnitude and direction of in situ stress and of temperature in the host rock and surrounding rock units.

Section 960.4–2–4 Climatic changes.

Description of the climatic conditions of the site region, in context with global and regional patterns of climatic changes during the Quaternary Period, in order to project likely future changes in climate such that potential impacts on the repository can be estimated. The types of information to support this description should include—

- Expected climatic conditions and cycles, based on extrapolation of climates during the Quaternary Period.
- Geomorphology of the site region and evidence of changes due to climatic changes.
- Estimated effects of expected climatic cycles on the surface-water and the ground-water systems.

Section 960.4–2–5 Erosion.

Description of the structure, stratigraphy, and geomorphology of the site, in context with the geologic setting, in order to estimate the depth of waste emplacement and the likelihood for erosional processes to uncover the waste in less than one million years. The types of information to support this description should include—

- Depth, thickness, and lateral extent of the host rock and the overlying rock units.
- Lithology of the stratigraphic units above the host rock.
- Nature and rates of geomorphic processes during the Quaternary Period.

Section 960.4–2–6 Dissolution.

Description of the stratigraphy, structure, hydrology, and geochemistry of the site, in context with the geologic setting, to delineate the approximate limits of subsurface rock dissolution, if any. This description should include such information as the following:

- The stratigraphy of the site, including rock units largely comprised of water-soluble minerals.
- The approximate extent and configuration of features indicative of dissolution within the geologic setting.

Section 960.4–2–7 Tectonics.

Description of the tectonic setting of the site, in context with its geologic setting, in order to project the tectonic stability of the site over the next 10,000 years and to identify tectonic features and processes that could be reasonably expected to have a potentially adverse effect on the performance of the repository. The types of information to support this description should include—

Department of Energy

Pt. 960, App. IV

- The tectonic history and framework of the geologic setting and the site.
- Quaternary faults in the geologic setting, including their length, displacement, and any information regarding the age of latest movement.
- Active tectonic processes, such as uplift, diapirism, tilting, subsidence, faulting, and volcanism.
- Estimate of the geothermal gradient.
- Estimate of the regional in situ stress field.
- The historical seismicity of the geologic setting.

Section 960.4-2-8 Human interference.

Section 960.4-2-8-1 Natural resources.

Description of the mineral and energy resources of the site, in order to project whether past or future exploration and recovery could have a potentially adverse effect on the performance of the repository. The types of information to support this description should include—

- Known occurrences of energy and mineral resources, including ground water.
- Estimates of the present and projected value of these resources compared with resources contained in other areas of similar size in the geologic setting.
- Past and present drilling and mining operations in the vicinity of the site.

Section 960.4-2-8-2 Site ownership and control.

Description of the ownership of land for the geologic-repository operations area and the controlled area, in order to evaluate whether the DOE can obtain ownership of, and control access to, the site. The types of information to support this description should include—

- Present land ownership.

Section 960.5-2-1 Population density and distribution.

Description of the population density and distribution of the site region, in order to identify highly populated areas and the nearest 1 mile by 1 mile area having a population greater than 1,000 persons. The types of information to support this description should include—

- The most-recent U.S. census, including population composition, distribution, and density.

Section 960.5-2-2 Site ownership and control.

Description of current ownership of land, including surface and subsurface mineral and water rights, in order to evaluate whether the DOE can obtain control of land within the projected restricted area. The types of information to support this description should include—

- Present land ownership.

Section 960.5-2-3 Meteorology.

The meteorological setting, as determined from the closest recording station, in order to project meteorological conditions during repository operation and closure and their potential effects on the transport of airborne emissions. The types of information to support this description should include—

- Wind and atmospheric-dispersion characteristics.
- Precipitation characteristics.
- Extreme weather phenomena.

Section 960.5-2-4 Offsite installations and operations.

Description of offsite installations and operations in the vicinity of the site in order to estimate their projected effects on repository construction, operation, or closure. The types of information to support this description should include—

- Location and nature of nearby industrial, transportation, and military installations and operations, including atomic energy defense activities.

Section 960.5-2-5 Environmental quality.

Description of environmental conditions in order to estimate potential impacts on public health and welfare and on environmental quality. The types of information to support this description should include—

- Applicable Federal, State, and local procedural and substantive environmental requirements.
- Existing air quality and trends.
- Existing surface-water and ground-water quality and quantity.
- Existing land resources and uses.
- Existing terrestrial and aquatic vegetation and wildlife.
- Location of any identified critical habitats for threatened or endangered species.
- Existing aesthetic characteristics.
- Location of components of the National Park System, the National Wildlife Refuge System, the National Wild and Scenic Rivers System, the National Wilderness Preservation System, or National Forest Land.
- Location of significant State or regional protected resource areas, such as State parks, wildlife areas, or historical areas.
- Location of significant Native American resources such as major Indian religious sites, or other sites of unique cultural interest.

Section 960.5-2-6 Socioeconomic impacts.

Description of the socioeconomic conditions of the site, including population density and distribution, economics, community services and facilities, social conditions, and fiscal and government structure, in order to estimate the impacts that might result from site characterization and from the development of a repository at that site. The types

of information to support this description should include—

- Population composition, density, and distribution.
- Economic base and economic activity, including major sectors of local economy.
- Employment distribution and trends by economic sector.
- Resource usage.
- Community services and infrastructure, including trends in use and current capacity utilization.
- Housing supply and demand.
- Life style and indicators of the quality of life.
- Existing social problems.
- Sources of, and trends in, local government expenditures and revenues.

Section 960.5–2–7 Transportation.

Description of the transportation facilities in the vicinity of the site in order to evaluate existing or required access routes or improvements. The types of information to support this description should include—

- Estimates of the overall cost and risk of transporting waste to the site.
- Description of the road and rail network between the site and the nearest Interstate highways and major rail lines; also, description of the waterway system, if any.
- Analyses of the adequacy of the existing regional transportation network to handle waste shipments; the movement of supplies for repository construction, operation, and closure; removal of nonradioactive waste from the site; and the transportation of the labor force.
- Improvements anticipated to be required in the transportation network and their feasibility, cost, and environmental impacts.
- Compatibility of the required transportation network improvements with the local and regional transportation and land-use plans.
- Analysis of weather impacts on transportation.
- Analysis of emergency response requirements and capabilities related to transportation.

Section 960.5–2–8 Surface characteristics.

Description of the surface characteristics of the site, in order to evaluate whether repository construction, operation, and closure are feasible on the basis of site characteristics that influence those activities. The types of information to support this description should include—

- Topography of the site.
- Existing and planned surface bodies of water.
- Definition of areas of landslides and other potentially unstable slopes, poorly

drained material, or materials of low bearing strength or of high liquefaction potential.

Section 960.5–2–9 Rock characteristics.

Description of the geologic and geomechanical characteristics of the site, in context with the geologic setting, in order to project the capability of the host rock and the surrounding rock units to provide the space required for the underground facility and safe underground openings during repository construction, operation, and closure. The types of information to support this description should include—

- Depth, thickness, and lateral extent of the host rock.
- Stratigraphic and structural features within the host rock and adjacent rock units.
- Thermal, mechanical, and thermomechanical properties and constructibility characteristics of the rocks, with consideration of the effects of time, stress, temperature, dimensional scale, and any major identified structural discontinuities.
- Fluid inclusions and gas content in the host rock.
- Estimates of the magnitude and direction of in situ stress and of temperature in the host rock.

Section 960.5–2–10 Hydrology.

Description of the hydrology of the site, in context with its geologic setting, in order to project compatibility with repository construction, operation, and closure. The types of information to support this description should include—

- Surface-water systems, including recharge and runoff characteristics, and potential for flooding of the repository.
- Nature and location of aquifers, confining units, and aquitards.
- Potentiometric surfaces of aquifers.
- Hydraulic properties of geohydrologic units.

Section 960.5–2–11 Tectonics.

Description of the tectonic setting of the site, in context with the regional setting, in order to estimate any expected effects of tectonic activity on repository construction, operation, or closure. The types of information to support this description should include—

- Quaternary faults.
- Active tectonic processes.
- Preliminary estimates of expected ground motion caused by the maximum potential earthquake within the geologic setting.

PART 961—STANDARD CONTRACT FOR DISPOSAL OF SPENT NUCLEAR FUEL AND/OR HIGH-LEVEL RADIOACTIVE WASTE

Subpart A—General

- Sec.
- 961.1 Purpose.
- 961.2 Applicability.
- 961.3 Definitions.
- 961.4 Deviations.
- 961.5 Federal agencies.

Subpart B—Standard Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste

- 961.11 Text of the contract.

AUTHORITY: Sec. 644, Pub. L. 95-91, 91 Stat. 599 (42 U.S.C. 7254) and sec. 302, Pub. L. 97-425, 96 Stat. 2257 (42 U.S.C. 10222).

SOURCE: 48 FR 16599, Apr. 18, 1983, unless otherwise noted.

Subpart A—General

§ 961.1 Purpose.

This part establishes the contractual terms and conditions under which the Department of Energy (DOE) will make available nuclear waste disposal services to the owners and generators of spent nuclear fuel (SNF) and high-level radioactive waste (HLW) as provided in section 302 of the Nuclear Waste Policy Act of 1982 (Pub. L. 97-425). Under the contract set forth in §961.11 of this part, DOE will take title to, transport, and dispose of spent nuclear fuel and/or high-level radioactive waste delivered to DOE by those owners or generators of such fuel or waste who execute the contract. In addition, the contract will specify the fees owners and generators of SNF and/or HLW will pay for these services. All receipts, proceeds, and revenues realized by DOE under the contract will be deposited in the Nuclear Waste Fund, an account established by the Act in the U.S. Treasury. This fund will pay for DOE's radioactive waste disposal activities, the full costs of which will be borne by the owners and generators under contract with DOE for disposal services.

§ 961.2 Applicability.

This part applies to the Secretary of Energy or his designee and any person

who owns or generates spent nuclear fuel or high-level radioactive waste, of domestic origin, generated in a civilian nuclear power reactor. If executed in a timely manner, the contract contained in this part will commit DOE to accept title to, transport, and dispose of such spent fuel and waste. In exchange for these services, the owners or generators of such fuel or waste shall pay fees specified in the contract which are intended to recover fully the costs of the disposal services to be furnished by DOE. The contract must be signed by June 30, 1983, or by the date on which such owner or generator commences generation of, or takes title to, such spent fuel or waste, whichever occurs later.

§ 961.3 Definitions.

For purposes of this part—

Act means the Nuclear Waste Policy Act of 1982, Public Law 97-425, 96 Stat. 2201 *et seq.*, 42 U.S.C. 10101 *et seq.*

Contract means the agreement set forth in §961.11 of this part and any duly executed amendment or modification thereto.

Generator means any person who is licensed by the Nuclear Regulatory Commission to use a utilization or production facility under the authority of section 103 or 104 of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134).

Owner means any person who has title to spent nuclear fuel or high-level radioactive waste.

Purchaser means any person, other than a Federal agency, who is licensed by the Nuclear Regulatory Commission to use a utilization or production facility under the authority of sections 103 or 104 of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134) or who has title to spent nuclear fuel or high level radioactive waste and who has executed a contract with DOE.

Secretary means the Secretary of Energy of his designee.

Other definitions relating to the subject matter of this rule are set forth in Article II of the contract which is contained in §961.11, Text of the contract, of this part.

§ 961.4 Deviations.

Requests for authority to deviate from this part shall be submitted in

§961.5

writing to the Contracting Officer, who shall forward the request for approval to the Senior Procurement Official, Headquarters. Each request for deviation shall contain the following information:

- (a) A statement of the deviation desired, including identification of the specific paragraph number(s) of the contract;
(b) A description of the intended effect of the deviation;
(c) The reason why the deviation is considered necessary or would be in the best interests of the Government;
(d) The name of the owner or generator seeking the deviation and nuclear power reactor(s) affected;
(e) A statement as to whether the deviation has been requested previously and, if so, circumstances of the previous request;
(f) A statement of the period of time for which the deviation is needed; and
(g) Any pertinent background information will contribute to a full understanding of the desired deviation.

§961.5 Federal agencies.

Federal agencies or departments requiring DOE's disposal services for SNF and/or HLW will be accommodated by a suitable interagency agreement reflecting, as appropriate, the terms and conditions set forth in the contract in §961.11; Provided, however, that the fees to be paid by Federal agencies will be equivalent to the fees that would be paid under the contract.

Subpart B—Standard Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste

§961.11 Text of the contract.

The text of the standard contract for disposal of spent nuclear fuel and/or high-level radioactive waste follows:

U.S. DEPARTMENT OF ENERGY CONTRACT NO.

Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste

THIS CONTRACT, entered into this day of 19, by and between the UNITED STATES OF AMERICA (hereinafter referred to as the "Government"), represented by the UNITED

STATES DEPARTMENT OF ENERGY (hereafter referred to as "DOE") and (hereinafter referred to as the "Purchaser"), a corporation organized and existing under the laws of the State of [add as applicable: "acting on behalf of itself and ..."]

Witnesseth that:

Whereas, the DOE has the responsibility for the disposal of spent nuclear fuel and high-level radioactive waste of domestic origin from civilian nuclear power reactors in order to protect the public health and safety, and the environment; and

Whereas, the DOE has the responsibility, following commencement of operation of a repository, to take title to the spent nuclear fuel or high-level radioactive waste involved as expeditiously as practicable upon the request of the generator or owner of such waste or spent nuclear fuel; and

Whereas, all costs associated with the preparation, transportation, and the disposal of spent nuclear fuel and high-level radioactive waste from civilian nuclear power reactors shall be borne by the owners and generators of such fuel and waste; and

Whereas, the DOE is required to collect a full cost recovery fee from owners and generators delivering to the DOE such spent nuclear fuel and/or high level radioactive waste; and

Whereas, the DOE is authorized to enter into contracts for the permanent disposal of spent nuclear fuel and/or high-level radioactive waste of domestic origin in DOE facilities; and

Whereas, the Purchaser desires to obtain disposal services from DOE; and

Whereas, DOE is obligated and willing to provide such disposal services, under the terms and conditions hereinafter set forth; and

Whereas, this contract is made and entered into under the authority of the DOE Organization Act (Pub. L. 95-91, 42 U.S.C. 7101 et seq.) and the Nuclear Waste Policy Act of 1982 (Pub. L. 97-425, 42 U.S.C. 10101 et seq.)

Now, therefore, the parties hereto do hereby agree as follows:

ARTICLE I—DEFINITIONS

As used throughout this contract, the following terms shall have the meanings set forth below:

1. The term assigned three-month period means the period that each Purchaser will be assigned by DOE, giving due consideration to the Purchaser's assignment preference, for purposes of reporting kilowatt hours generated by the Purchaser's nuclear power reactor and for establishing fees due and payable to DOE.

2. The term cask means a container for shipping spent nuclear fuel and/or high-level radioactive waste which meets all applicable regulatory requirements.

3. The term *civilian nuclear power reactor* means a civilian nuclear powerplant required to be licensed under sections 103 or 104(b) of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2133, 2134(b)).

4. The term *Commission* means the United States Nuclear Regulatory Commission.

5. The term *contract* means this agreement and any duly executed amendment or modification thereto.

6. The term *Contracting Officer* means the person executing this contract on behalf of the Government, and any other officer or civilian employee who is a properly designated Contracting Officer of the DOE; and the term includes, except as otherwise provided in this contract, the authorized representative of a Contracting Officer acting within the limits of his authority.

7. The term *delivery* means the transfer of custody, f.o.b. carrier, of spent nuclear fuel or high-level radioactive waste from Purchaser to DOE at the Purchaser's civilian nuclear power reactor or such other domestic site as may be designated by the Purchaser and approved by DOE.

8. The term *disposal* means the emplacement in a repository of high-level radioactive waste, spent nuclear fuel, or other highly radioactive waste with no foreseeable intent of recovery, whether or not such emplacement permits recovery of such waste.

9. The term *DOE* means the United States Department of Energy or any duly authorized representative thereof, including the Contracting Officer.

10. The term *DOE facility* means a facility operated by or on behalf of DOE for the purpose of disposing of spent nuclear fuel and/or high-level radioactive waste, or such other facility(ies) to which spent nuclear fuel and/or high-level radioactive waste may be shipped by DOE prior to its transportation to a disposal facility.

11. The term *full cost recovery*, means the recoupment by DOE, through Purchaser fees and any interest earned, of all direct costs, indirect costs, and all allocable overhead, consistent with generally accepted accounting principles consistently applied, of providing disposal services and conducting activities authorized by the Nuclear Waste Policy Act of 1982 (Pub. L. 97-425). As used herein, the term *cost* includes the application of Nuclear Waste Fund moneys for those uses expressly set forth in section 302 (d) and (e) of the said Act and all other uses specified in the Act.

12. The term *high-level radioactive waste* (HLW) means—

(a) the highly radioactive material resulting from the reprocessing of spent nuclear fuel, including liquid waste produced directly in reprocessing and any solid material derived from such liquid waste that contains fission products in sufficient concentrations; and

(b) other highly radioactive material that the Commission, consistent with existing law, determines by rule requires permanent isolation.

13. The term *electricity (kilowatt hours) generated and sold* means gross electrical output produced by a civilian nuclear power reactor measured at the output terminals of the turbine generator minus the normal onsite nuclear station service loads during the time electricity is being generated multiplied by the total energy adjustment factor. For purposes of this provision, the following definition shall apply:

a. The term *Total Energy Adjustment Factor (TEAF)* means the sum of individual owners' weighted energy adjustment factors.

b. The term *Weighted Energy Adjustment Factor (WEAF)* means the product of an owner's energy adjustment factor times the owner's share of the plant.

c. The term *Owner's Energy Adjustment Factor (OEAF)* means the sum of the individual owner's adjustment for sales to ultimate consumers and adjustment for sales for resale.

d. The term *Owner's Share of the plant (OS)* means the owner's fraction of metered electricity sales, the owner's fraction of plant ownership, or the sponsor company's fixed entitlement percentage of the plant's output. This definition includes joint owners of generating companies or participants in a generation and transmission cooperative.

e. The term *Adjustment for Sales to ultimate Consumer (ASC)* means the owner's fraction of sales to the ultimate consumer multiplied by the owner's sales to ultimate consumer adjustment factor.

f. The term *Fraction of Sales to ultimate Consumer (FSC)* means the owner's fractional quantity of electricity sold to the ultimate consumer relative to the total of electricity sales (sales to ultimate consumers plus the sales for resale).

g. The term *Sales to ultimate Consumer Adjustment Factor (SCAF)* means one minus the quotient of all electricity lost or otherwise not sold for each owner divided by the total electricity available for disposition to ultimate consumers. Electricity lost or otherwise not sold includes:

- (1) Energy furnished without charge;
- (2) Energy used by the company;
- (3) Transmission losses;
- (4) Distribution losses; and
- (5) Other unaccounted losses as reported to

the Federal Government "Annual Report of Major Electric Utilities, Licensees and Others," Federal Energy Regulatory Commission (FERC) Form No.1; Rural Electrification Administration (REA) Forms 7 and 11 if appropriate; or the "Annual Electric Utility Report," Energy Information Administration (EIA) Form EIA-861.

h. The term *Total Electricity Available for Disposition to Ultimate Consumers* means the

reporting year's total of all of a utility's electricity supply which is available for disposition, expressed in kilowatt hours, and is equal to the sum of the energy sources minus the electricity sold for resale by the utility.

i. The term *Adjustment for Sales for Resale (ASR)* means the owner's fraction of sales for resale multiplied by the national average adjustment factor.

j. The term *Fraction of Sales for Resale (FSR)* means the owner's fractional quantity of electricity sold for resale by the utility relative to the total of electricity sales.

k. The term *National Average Adjustment Factor (NAF)* means the ratio of the national total of electricity sold to the national total of electricity available for disposition, based on the most recent 3 years of national data provided to the Federal Government, and will be set by the Contracting Officer. This term will be evaluated annually and revised in increments of .005.

l. Pumped storage losses. If the proportion of nuclear generated electricity consumed by a pumped-storage hydro facility can be measured or estimated and if the electricity losses associated with pumped storage facilities can be documented (e.g. based on routine and uniform records of district power data on contributions from different electricity sources), a prorated nuclear share shall be allowed as an offset to gross electricity generation reported on the annex A of appendix G, NWP-830G form. Specific methodologies for calculating these offsets must be approved by the Contracting Officer in advance.

Instructions to annex A of appendix G, NWP-830G provide the necessary information to calculate the energy adjustment factors.

14. The term *metric tons uranium* means that measure of weight, equivalent to 2,204.6 pounds of uranium and other fissile and fertile material that are loaded into a reactor core as fresh fuel.

15. The term *Purchaser's site* means the location of Purchaser's civilian nuclear power reactor or such other location as the Purchaser may designate.

16. The term *quarterly Treasury rate* means the current value of funds rate as specified by the Treasury Fiscal Requirements Manual, Volume 1, Part 6, section 8020.20. This rate is published quarterly in the FEDERAL REGISTER prior to the beginning of the affected quarter.

17. The term *shipping lot* means a specified quantity of spent nuclear fuel or high-level radioactive waste designated by Purchaser for delivery to DOE beginning on a specified date.

18. The term *spent nuclear fuel (SNF)* means fuel that has been withdrawn from a nuclear reactor following irradiation, the constituent elements of which have not been separated by reprocessing.

19. The term *spent nuclear fuel and high-level radioactive waste of domestic origin* means irradiated fuel material used, and radioactive wastes resulting from such use, in nuclear power reactors located only in the United States.

20. The term *year* means the period which begins on October 1 and ends on September 30.

ARTICLE II—SCOPE

This contract applies to the delivery by Purchaser to DOE of SNF and/or HLW of domestic origin from civilian nuclear power reactors, acceptance of title by DOE to such SNF and/or HLW, subsequent transportation, and disposal of such SNF and/or HLW and, with respect to such material, establishes the fees to be paid by the Purchaser for the services to be rendered hereunder by DOE. The SNF and/or HLW shall be specified in a delivery commitment schedule as provided in Article V below. The services to be provided by DOE under this contract shall begin, after commencement of facility operations, not later than January 31, 1998 and shall continue until such time as all SNF and/or HLW from the civilian nuclear power reactors specified in appendix A, annexed hereto and made a part hereof, has been disposed of.

ARTICLE III—TERM

The term of this contract shall be from the date of execution until such time as DOE has accepted, transported from the Purchaser's site(s) and disposed of all SNF and/or HLW of domestic origin from the civilian nuclear power reactor(s) specified in appendix A.

ARTICLE IV—RESPONSIBILITIES OF THE PARTIES

A. Purchaser's Responsibilities

1. Discharge Information.

(a) On an annual basis, commencing October 1, 1983, the Purchaser shall provide DOE with information on actual discharges to date and projected discharges for the next ten (10) years in the form and content set forth in appendix B, annexed hereto and made a part hereof. The information to be provided will include estimates and projections and will not be Purchaser's firm commitment with respect to discharges or deliveries.

(b) No later than October 1, 1983, the Purchaser shall provide DOE with specific information on:

(1) Total spent nuclear fuel inventory as of April 7, 1983;

(2) Total number of fuel assemblies removed from the particular reactor core prior to 12:00 a.m. April 7, 1983 for which there are plans for reinsertion in the core, indicating the current planned dates for reinsertion in

the core. Estimates of the burned and unburned portion of each individual assembly are to be provided.

(c) In the event that the Purchaser fails to provide the annual forecast in the form and content required by DOE, DOE may, in its sole discretion, require a rescheduling of any delivery commitment schedule then in effect.

2. *Preparation for Transportation.*

(a) The Purchaser shall arrange for, and provide, all preparation, packaging, required inspections, and loading activities necessary for the transportation of SNF and/or HLW to the DOE facility. The Purchaser shall notify DOE of such activities sixty (60) days prior to the commencement of such activities. The preparatory activities by the Purchaser shall be made in accordance with all applicable laws and regulations relating to the Purchaser's responsibilities hereunder. DOE may designate a representative to observe the preparatory activities conducted by the Purchaser at the Purchaser's site, and the Purchaser shall afford access to such representative.

(b) Except as otherwise agreed to by DOE, the Purchaser shall advise DOE, in writing as specified in appendix F, annexed hereto and made a part hereof, as to the description of the material in each shipping lot sixty (60) days prior to scheduled DOE transportation of that shipping lot.

(c) The Purchaser shall be responsible for incidental maintenance, protection and preservation of any and all shipping casks furnished to the Purchaser by DOE for the performance of this contract. The Purchaser shall be liable for any loss of or damage to such DOE-furnished property, and for expenses incidental to such loss or damage while such casks are in the possession and control of the Purchaser except as otherwise provided for hereunder. Routine cask maintenance, such as scheduled overhauls, shall not be the responsibility of the Purchaser.

B. *DOE Responsibilities*

1. DOE shall accept title to all SNF and/or HLW, of domestic origin, generated by the civilian nuclear power reactor(s) specified in appendix A, provide subsequent transportation for such material to the DOE facility, and dispose of such material in accordance with the terms of this contract.

2. DOE shall arrange for, and provide, a cask(s) and all necessary transportation of the SNF and/or HLW from the Purchaser's site to the DOE facility. Such cask(s) shall be furnished sufficiently in advance to accommodate scheduled deliveries. Such cask(s) shall be suitable for use at the Purchaser's site, meet applicable regulatory requirements, and be accompanied by pertinent information including, but not limited to, the following:

(a) Written procedures for cask handling and loading, including specifications on Purchaser-furnished cannisters for containment of failed fuel;

(b) Training for Purchaser's personnel in cask handling and loading, as may be necessary;

(c) Technical information, special tools, equipment, lifting trunnions, spare parts and consumables needed to use and perform incidental maintenance on the cask(s); and

(d) Sufficient documentation on the equipment supplied by DOE.

3. DOE may fulfill any of its obligations, or take any action, under this contract either directly or through contractors.

4. DOE shall annually provide to the Purchaser pertinent information on the waste disposal program including information on cost projections, project plans and progress reports.

5. (a) Beginning on April 1, 1991, DOE shall issue an annual acceptance priority ranking for receipt of SNF and/or HLW at the DOE repository. This priority ranking shall be based on the age of SNF and/or HLW as calculated from the date of discharge of such material from the civilian nuclear power reactor. The oldest fuel or waste will have the highest priority for acceptance, except as provided in paragraphs B and D of Article V and paragraph B.3 of Article VI hereof.

(b) Beginning not later than July 1, 1987, DOE shall issue an annual capacity report for planning purposes. This report shall set forth the projected annual receiving capacity for the DOE facility(ies) and the annual acceptance ranking relating to DOE contracts for the disposal of SNF and/or HLW including, to the extent available, capacity information for ten (10) years following the projected commencement of operation of the initial DOE facility.

ARTICLE V—DELIVERY OF SNF AND/OR HLW

A. *Description of SNF and HLW*

The Purchaser shall deliver to DOE and DOE shall, as provided in this contract, accept the SNF and/or HLW which is described in accordance with Article VI.A. of this contract, for disposal thereof.

B. *Delivery Commitment Schedule*

1. Delivery commitment schedule(s), in the form set forth in appendix C annexed hereto and made a part hereof, for delivery of SNF and/or HLW shall be furnished to DOE by Purchaser. After DOE has issued its proposed acceptance priority ranking, as described in paragraph B.5 of Article IV hereof, beginning January 1, 1992 the Purchaser shall submit to DOE the delivery commitment schedule(s) which shall identify all SNF and/or HLW the Purchaser wishes to deliver to DOE beginning sixty-three (63) months thereafter. DOE shall approve or disapprove such schedules

within three (3) months after receipt. In the event of disapproval, DOE shall advise the Purchaser in writing of the reasons for such disapproval and request a revised schedule from the Purchaser, to be submitted to DOE within thirty (30) days after receipt of DOE's notice of disapproval.

2. DOE shall approve or disapprove such revised schedule(s) within sixty (60) days after receipt. In the event of disapproval, DOE shall advise the Purchaser in writing of the reasons for such disapproval and shall submit its proposed schedule(s). If these are not acceptable to the Purchaser, the parties shall promptly seek to negotiate mutually acceptable schedule(s). Purchaser shall have the right to adjust the quantities of SNF and/or HLW plus or minus (\pm) twenty percent (20%), and the delivery schedule up to two (2) months, until the submission of the final delivery schedule.

C. Final Delivery Schedule

Final delivery schedule(s), in the form set forth in appendix D, annexed hereto and made a part hereof, for delivery of SNF and/or HLW covered by an approved delivery commitment schedule(s) shall be furnished to DOE by Purchaser. The Purchaser shall submit to DOE final delivery schedules not less than twelve (12) months prior to the delivery date specified therein. DOE shall approve or disapprove a final delivery schedule within forty-five (45) days after receipt. In the event of disapproval, DOE shall advise the Purchaser in writing of the reasons for such disapproval and shall request a revised schedule from the Purchaser, to be submitted to DOE within thirty (30) days after receipt of DOE's notice of disapproval. DOE shall approve or disapprove such revised schedule(s) within sixty (60) days after receipt. In the event of disapproval, DOE shall advise the Purchaser in writing of the reasons for such disapproval and shall submit its proposed schedule(s). If these are not acceptable to the Purchaser, the parties shall promptly seek to negotiate mutually acceptable schedule(s).

D. Emergency Deliveries

Emergency deliveries of SNF and/or HLW may be accepted by DOE before the date provided in the delivery commitment schedule upon prior written approval by DOE.

E. Exchanges

Purchaser shall have the right to determine which SNF and/or HLW is delivered to DOE; *provided, however*, that Purchaser shall comply with the requirements of this contract. Purchaser shall have the right to exchange approved delivery commitment schedules with parties to other contracts with DOE for disposal of SNF and/or HLW; *provided, however*, that DOE shall, in ad-

vance, have the right to approve or disapprove, in its sole discretion, any such exchanges. Not less than six (6) months prior to the delivery date specified in the Purchaser's approved delivery commitment schedule, the Purchaser shall submit to DOE an exchange request, which states the priority rankings of both the Purchaser hereunder and any other Purchaser with whom the exchange of approved delivery commitment schedules is proposed. DOE shall approve or disapprove the proposed exchange within thirty (30) days after receipt. In the event of disapproval, DOE shall advise the Purchaser in writing of the reasons for such disapproval.

ARTICLE VI—CRITERIA FOR DISPOSAL

A. General Requirements

1. Criteria.

(a) Except as otherwise provided in this contract, DOE shall accept hereunder only such SNF and/or HLW which meets the General Specifications for such fuel and waste as set forth in appendix E, annexed hereto and made a part hereof.

(b) Purchaser shall accurately classify SNF and/or HLW prior to delivery in accordance with paragraphs B and D of appendix E.

2. Procedures.

(a) Purchaser shall provide to DOE a detailed description of the SNF and/or HLW to be delivered hereunder in the form and content as set forth in appendix F, annexed hereto and made a part hereof. Purchaser shall promptly advise DOE of any changes in said SNF and/or HLW as soon as they become known to the purchaser.

(b) DOE's obligation for disposing of SNF under this contract also extends to other than standard fuel; however, for any SNF which has been designated by the Purchaser as other than standard fuel, as that term is defined in appendix E, the Purchaser shall obtain delivery and procedure confirmation from DOE prior to delivery. DOE shall advise Purchaser within sixty (60) days after receipt of such confirmation request as to the technical feasibility of disposing of such fuel on the currently agreed to schedule and any schedule adjustment for such services.

B. Acceptance Procedures

1. Acceptance Priority Ranking.

Delivery commitment schedules for SNF and/or HLW may require the disposal or more material than the annual capacity of the DOE disposal facility (or facilities) can accommodate. The following acceptance priority ranking will be utilized:

(a) Except as may be provided for in subparagraph (b) below and Article V.D. of this contract, acceptance priority shall be based upon the age of the SNF and/or HLW as calculated from the date of discharge of such material from the civilian nuclear power reactor. DOE will first accept from Purchaser

Department of Energy

§ 961.11

the oldest SNF and/or HLW for disposal in the DOE facility, except as otherwise provided for in paragraphs B and D of Article V.

(b) Notwithstanding the age of the SNF and/or HLW, priority may be accorded any SNF and/or HLW removed from a civilian nuclear power reactor that has reached the end of its useful life or has been shut down permanently for whatever reason.

2. Verification of SNF and/or HLW.

During cask loading and prior to acceptance by DOE for transportation to the DOE facility, the SNF and/or HLW description of the shipping lot shall be subject to verification by DOE. To the extent the SNF and/or HLW is consistent with the description submitted and approved, in accordance with appendices E and F, DOE agrees to accept such SNF and/or HLW for disposal when DOE has verified the SNF and/or HLW description, determined the material is properly loaded, packaged, marked, labeled and ready for transportation, and has taken custody, as evidenced in writing, of the material at the Purchaser's site, f.o.b. carrier. A properly executed off-site radioactive shipment record describing cask contents must be prepared by the Purchaser along with a signed certification which states: "This is to certify that the above-named materials are properly described, classified, packaged, marked and labeled and are in proper condition for transfer according to the applicable regulations of the U. S. Department of Transportation."

3. Improperly described SNF and/or HLW.

(a) *Prior to Acceptance*— If SNF and/or HLW is determined by DOE to be improperly described prior to acceptance by DOE at the Purchaser's site, DOE shall promptly notify the Purchaser in writing of such determination. DOE reserves the right, in its sole discretion, to refuse to accept such SNF and/or HLW until the SNF and/or HLW has been properly described. The Purchaser shall not transfer such SNF and/or HLW to DOE unless DOE agrees to accept such SNF and/or HLW under such other arrangements as may be agreed to, in writing, by the parties.

(b) *After Acceptance*— If subsequent to its acceptance DOE finds that such SNF and/or HLW is improperly described, DOE shall promptly notify the Purchaser, in writing, of such finding. In the event of such notification, Purchaser shall provide DOE with a proper designation within thirty (30) days. In the event of a failure by the Purchaser to provide such proper designation, DOE may hold in abeyance any and all deliveries scheduled hereunder.

ARTICLE VII—TITLE

Title to all SNF and/or HLW accepted by DOE for disposal shall pass to DOE at the Purchaser's site as provided for in Article VI hereof. DOE shall be solely responsible for control of all material upon passage of title. DOE shall have the right to dispose as it sees

fit of any SNF and/or HLW to which it has taken title. The Purchaser shall have no claim against DOE or the Government with respect to such SNF or HLW nor shall DOE or the Government be obligated to compensate the Purchaser for such material.

ARTICLE VIII—FEES AND TERMS OF PAYMENT

A. Fees

1. Effective April 7, 1983, Purchaser shall be charged a fee in the amount of 1.0 mill per kilowatt hour (1M/kWh) electricity generated and sold.

2. For SNF, or solidified high-level radioactive waste derived from SNF, which fuel was used to generate electricity in a civilian nuclear power reactor prior to April 7, 1983, a one-time fee will be assessed by applying industry-wide average dollar per kilogram charges to four (4) distinct ranges of fuel burnup so that the integrated cost across all discharged (i.e. spent) fuel is equivalent to an industry-wide average charge of 1.0 mill per kilowatt-hour. For purposes of this contract, discharged nuclear fuel is that fuel removed from the reactor core with no plans for reinsertion. In the event that any such fuel withdrawn with plans for reinsertion is not reinserted, then the applicable fee for such fuel shall be calculated as set forth in this paragraph 2. The categories of spent nuclear fuel burnup and the fee schedule are listed below:

[In 1982 dollars]

Nuclear spent fuel burnup range	Dollars per kilogram
0 to 5,000 MWDT/MTU	\$80.00
5,000 to 10,000 MWDT/MTU	142.00
10,000 to 20,000 MWDT/MTU	162.00
Over 20,000 MWDT/MTU	184.00

This fee shall not be subject to adjustment, and the payment thereof by the Purchaser shall be made to DOE as specified in paragraph B of this Article VIII.

3. For in-core fuel as of April 7, 1983, that portion of the fuel burned through April 6, 1983 shall be subject to the one-time fee as calculated in accordance with the following methodology: [a] determine the total weight in kilograms of uranium loaded initially in the particular core; [b] determine the total megawatt-days (thermal) which have been generated by all of the fuel assemblies in the said core as of 12:00 A.M. April 7, 1983; [c] divide the megawatt-days (thermal) generated in the said core by the total metric tons of initially loaded uranium in that core and multiply the quotient by the conversion factor 0.0078 to obtain a value in dollars per kilogram; and [d] multiply the dollars per kilogram value by the kilograms determined in [a] above to derive the dollar charge for

the one-time fee to be paid for the specified in-core fuel as of 12:00 A.M. April 7, 1983. For purposes of this contract, in-core fuel is that fuel in the reactor core as of the date specified, plus any fuel removed from the reactor with plans for reinsertion. That portion of such fuel unburned as of 12:00 A.M. April 7, 1983 shall be subject to the 1.0 mill per kilowatt-hour charge.

4. DOE will annually review the adequacy of the fees and adjust the 1M/KWH fee, if necessary, in order to assure full cost recovery by the Government. Any proposed adjustment to the said fee will be transmitted to Congress and shall be effective after a period of ninety (90) days of continuous session has elapsed following receipt of such transmittal unless either House of Congress adopts a resolution disapproving the proposed adjustment. Any adjustment to the 1M/KWH fee under paragraph A.1. of this Article VIII shall be prospective.

B. Payment

1. For electricity generated and sold by the Purchaser's civilian nuclear power reactor(s) on or after April 7, 1983, fees shall be paid quarterly by the Purchaser and must be received by DOE not later than the close of the last business day of the month following the end of each assigned 3-month period. The first payment shall be due on July 31, 1983, for the period April 7, 1983, to June 30, 1983. (Add as applicable: A one-time adjustment period payment shall be due on _____, for the period _____ to _____.) The assigned 3-month period, for purposes of payment and reporting of electricity generated and sold shall begin _____.

2. For SNF discharged prior to April 7, 1983, and for in-core burned fuel as of 12:00 A.M. April 7, 1983, the Purchaser shall, within two (2) years of contract execution, select one of the following fee payment options:

(a) *Option 1*— The Purchaser's financial obligation for said fuel shall be prorated evenly over forty (40) quarters and will consist of the fee plus interest on the outstanding fee balance. The interest from April 7, 1983, to date of the first payment is to be calculated based upon the 13-week Treasury bill rate, as reported on the first such issuance following April 7, 1983, and compounded quarterly thereafter by the 13-week Treasury bill rates as reported on the first such issuance of each succeeding assigned three-month period. Beginning with the first payment, interest is to be calculated on Purchaser's financial obligation plus accrued interest, at the ten-year Treasury note rate in effect on the date of the first payment. In no event shall the end of the forty (40) quarters extend beyond the first scheduled delivery date as reflected in the DOE-approved delivery commitment schedule. All payments shall be made concurrently with the assigned three month period payments. At any time prior to the end

of the forty (40) quarters, Purchaser may, without penalty, make a full or partial lump sum payment at any of the assigned three month period payment dates. Subsequent quarterly payments will be appropriately reduced to reflect the reduction in the remaining balance in the fee due and payable. The remaining financial obligation, if any, will be subject to interest at the same ten-year Treasury note rate over the remainder of the ten year period.

(b) *Option 2*— The Purchaser's financial obligation shall be paid in the form of a single payment anytime prior to the first delivery, as reflected in the DOE approved delivery commitment schedule, and shall consist of the fee plus interest on the outstanding fee balance. Interest is to be calculated from April 7, 1983, to the date of the payment based upon the 13-week Treasury bill rate, as reported on the first such issuance following April 7, 1983, and compounded quarterly thereafter by the 13-week Treasury bill rates as reported on the first such issuance of each succeeding assigned three-month period until payment.

(c) *Option 3*— The Purchaser's financial obligation shall be paid prior to June 30, 1985, or prior to two (2) years after contract execution, whichever comes later, in the form of a single payment and shall consist of all outstanding fees for SNF and in-core fuel burned prior to April 7, 1983. Under this option, no interest shall be due to DOE from April 7, 1983, to the date of full payment on the outstanding fee balance.

3. Method of Payment:

(a) Payments shall be made by wire transfer, in accordance with instructions specified by DOE in appendix G, annexed hereto and made a part hereof, and must be received within the time periods specified in paragraph B.1. of this Article VIII.

(b) The Purchaser will complete a Standard Remittance Advice, as set forth in appendix G, for each assigned three month period payment, and mail it postmarked no later than the last business day of the month following each assigned three month period to Department of Energy, Office of Controller, Cash Management Division, Box 500, Room D-208, Germantown, Maryland 20874.

4. Any fees not paid on a timely basis or underpaid because of miscalculation will be subject to interest as specified in paragraph C of this Article VIII.

C. Interest on Late Fees

1. DOE will notify the Purchaser of amounts due only when unpaid or underpaid by the dates specified in paragraph B above. Interest will be levied according to the following formula:

Interest = Unpaid balance due to DOE for assigned three month period × Quarterly Treasury rate plus six percent (6%) ×

Department of Energy

§ 961.11

Number of months late including month of payment (fractions rounded up to whole months) + 12

2. Interest is payable at any time prior to the due date for the subsequent assigned three month period fee payment. Non-payment by the end of the subsequent assigned three month period will result in compounding of interest due. Purchaser shall complete a Standard Remittance Advice of interest payments.

3. Following the assessment of a late fee by DOE, payments will be applied against accrued interest first and the principal thereafter.

D. Effect of Payment

Upon payment of all applicable fees, interest and penalties on unpaid or underpaid amounts, the Purchaser shall have no further financial obligation to DOE for the disposal of the accepted SNF and/or HLW.

E. Audit

1. The DOE or its representative shall have the right to perform any audits or inspections necessary to determine whether Purchaser is paying the correct amount under the fee schedule and interest provisions set forth in paragraphs A, B and C above.

2. Nothing in this contract shall be deemed to preclude an audit by the General Accounting Office of any transaction under this contract.

3. The Purchaser shall furnish DOE with such records, reports and data as may be necessary for the determination of quantities delivered hereunder and for final settlement of amounts due under this contract and shall retain and make available to DOE and its authorized representative examination at all reasonable times such records, reports and data for a period of three (3) years from the completion of delivery of all material under this contract.

ARTICLE IX—DELAYS

A. Unavoidable Delays by Purchaser or DOE

Neither the Government nor the Purchaser shall be liable under this contract for damages caused by failure to perform its obligations hereunder, if such failure arises out of causes beyond the control and without the fault or negligence of the party failing to perform. In the event circumstances beyond the reasonable control of the Purchaser or DOE—such as acts of God, or of the public enemy, acts of Government in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes and unusually severe weather—cause delay in scheduled delivery, acceptance or transport of SNF and/or HLW, the party experiencing the delay will notify the other party as soon as possible after such

delay is ascertained and the parties will re-adjust their schedules, as appropriate, to accommodate such delay.

B. Avoidable Delays by Purchaser or DOE

In the event of any delay in the delivery, acceptance or transport of SNF and/or HLW to or by DOE caused by circumstances within the reasonable control of either the Purchaser or DOE or their respective contractors or suppliers, the charges and schedules specified by this contract will be equitably adjusted to reflect any estimated additional costs incurred by the party not responsible for or contributing to the delay.

ARTICLE X—SUSPENSION

A. In addition to any other rights DOE may have hereunder, DOE reserves the right, at no cost to the Government, to suspend this contract or any portion thereof upon written notice to the Purchaser within ninety (90) days of the Purchaser's failure to perform its obligations hereunder, and the Purchaser's failure to take corrective action within thirty (30) days after written notice of such failure to perform as provided above, unless such failure shall arise from causes beyond the control and without the fault or negligence of the Purchaser, its contractors or agents. However, the Purchaser's obligation to pay fees required hereunder shall continue unaffected by any suspension. Any such suspension shall be rescinded if and when DOE determines that Purchaser has completed corrective action.

B. The DOE reserves the right to suspend any scheduled deliveries in the event that a national emergency requires that priority be given to Government programs to the exclusion of the work under this contract. In the event of such a suspension by the Government, the DOE shall refund that portion of payments representing services not delivered as determined by the Contracting Officer to be an equitable adjustment. Any disagreement arising from the refund payment, if any, shall be resolved as provided in the clause of this contract, entitled "DISPUTES."

ARTICLE XI—REMEDIES

Nothing in this contract shall be construed to preclude either party from asserting its rights and remedies under the contract or at law.

ARTICLE XII—NOTICES

All notices and communications between the parties under this contract (except notices published in the FEDERAL REGISTER) shall be in writing and shall be sent to the following addressees:

To DOE: _____

To the Purchaser: _____

However, the parties may change the addresses or addressees for such notices or communications without formal modification to this contract; *provided, however*, that notice of such changes shall be given by registered mail.

ARTICLE XIII—REPRESENTATION CONCERNING
NUCLEAR HAZARDS INDEMNITY

A. DOE represents that it will include in its contract(s) for the operation of any DOE facility an indemnity agreement based upon Section 170(d) of the Atomic Energy Act of 1954, as amended, a copy of which agreement shall be furnished to the Purchaser; that under said agreement, DOE shall have agreed to indemnify the contractor and other persons indemnified against claims for public liability (as defined in said Act) arising out of or in connection with contractual activities; that the indemnity shall apply to covered nuclear incidents which (1) take place at a contract location; or (2) arise out of or in the course of transportation of source, special nuclear or by-product material to or from a contract location. The obligation of DOE to indemnify shall be subject to the conditions stated in the indemnity agreement.

B. The provisions of this Article XIII shall continue beyond the term of this contract.

ARTICLE XIV—ASSIGNMENT

The rights and duties of the Purchaser may be assignable with transfer of title to the SNF and/or HLW involved; *provided, however*, that notice of any such transfer shall be made to DOE within ninety (90) days of transfer.

ARTICLE XV—AMENDMENTS

The provisions of this contract has been developed in the light of uncertainties necessarily attendant upon long-term contracts. Accordingly, at the request of either DOE or Purchaser, the parties will negotiate and, to the extent mutually agreed, amend this contract as the parties may deem to be necessary or proper to reflect their respective interests; *provided, however*, that any such amendment shall be consistent with the DOE final rule published in the FEDERAL REGISTER on April 18, 1983 entitled, "Standard Contract for Disposal or SNF and/or HLW", as the same may be amended from time to time.

ARTICLE XVI—DISPUTES

A. Except as otherwise provided in this contract, any dispute concerning a question of fact arising under this contract which is not disposed of by agreement shall be decided by the Contracting Officer, who shall reduce his decision to writing and mail or

otherwise furnish a copy thereof to the Purchaser. The decision of the Contracting Officer shall be final and conclusive unless within ninety (90) days from the date of receipt of such copy, the Purchaser mails or otherwise furnishes to the Contracting Officer a written appeal addressed to the DOE Board of Contract Appeals (Board). The decision of the Board shall be final and conclusive unless determined by a court of competent jurisdiction to have been fraudulent, or capricious, or arbitrary, or so grossly erroneous as necessarily to imply bad faith or not supported by substantial evidence. In connection with any appeal proceeding under this clause, the Purchaser shall proceed diligently with the performance of the contract and in accordance with the Contracting Officer's decision.

B. For Purchaser claims of more than \$50,000, the Purchaser shall submit with the claim a certification that the claim is made in good faith; the supporting data are accurate and complete to the best of the Purchaser's knowledge and belief; and the amount requested accurately reflects the contract adjustment for which the Purchaser believes the Government is liable. The certification shall be executed by the Purchaser if an individual. When the Purchaser is not an individual, the certification shall be executed by a senior company official in charge at the Purchaser's plant or location involved, or by an officer or general partner of the Purchaser having overall responsibility for the conduct of the Purchaser's affairs.

C. For Purchaser claims of \$50,000 or less, the Contracting Officer must render a decision within sixty (60) days. For Purchaser claims in excess of \$50,000, the Contracting Officer must decide the claim within sixty (60) days or notify the Purchaser of the date when the decision will be made.

D. This "Disputes" clause does not preclude consideration of law questions in connection with decisions provided for in paragraph A above; *provided, however*, that nothing in this contract shall be construed as making final the decision of any administrative official, representative, or board on a question of law.

ARTICLE XVII—OFFICIALS NOT TO BENEFIT

No member of or delegate to Congress or resident commissioner shall be admitted to any share or part of this contract, or to any benefit that may arise therefrom, but this provision shall not be construed to extend to this contract if made with a corporation for its general benefit.

ARTICLE XVIII—COVENANT AGAINST
CONTINGENT FEES

The Purchaser warrants that no person or selling agency has been employed or retained to solicit or secure this contract upon an

Department of Energy

§ 961.11

agreement or understanding for a commission, percentage, brokerage, or contingent fee, excepting bona fide employees or bona fide established commercial or selling agencies maintained by the Purchaser for the purpose of securing business. For breach or violation of this warranty, the Government shall have the right to annul this contract without liability or in its discretion to increase the contract price or consideration, or otherwise recover, the full amount of such commission, brokerage, or contingent fee.

ARTICLE XIX—EXAMINATION OF RECORDS

The Purchaser agrees that the Comptroller General of the United States or any of his duly authorized representatives shall have access to and the right to examine any directly pertinent books, documents, papers and records of the Purchaser involving transactions related to this contract until the expiration of three years after final payment under this contract.

ARTICLE XX—PERMITS

The Government and the Purchaser shall procure all necessary permits or licenses (including any special nuclear material licenses) and comply with all applicable laws and regulations of the United States, States and municipalities necessary to execute their respective responsibilities and obligations under this contract.

ARTICLE XXI—RIGHTS IN TECHNICAL DATA

A. Definitions.

1. *Technical data* means recorded information regardless of form or characteristic, of a specific or technical nature. It may, for example, document research, experimental, developmental, or demonstration, or engineering work, or be usable or used to define a design or process, or to procure, produce, support, maintain or operate material. The data may be graphic or pictorial delineations in media such as drawings or photographs, text in specifications or related performance or design-type documents or computer software (including computer programs, computer software data bases, and computer software documentation). Examples of technical data include research and engineering data, engineering drawings and associated lists, specifications, standards, process sheets, manuals, technical reports, catalog item identification, and related information. Technical data as used herein do not include financial reports, cost analyses, and other information incidental to contract administration.

2. *Proprietary data* means technical data which embody trade secrets developed at private expense, such as design procedures or techniques, chemical composition of materials, or manufacturing methods, processes,

or treatments, including minor modifications thereof, provided that such data:

(a) Are not generally known or available from other sources without obligation concerning their confidentiality;

(b) Have not been made available by the owner to others without obligation concerning its confidentiality; and

(c) Are not already available to the Government without obligation concerning their confidentiality.

3. *Contract data* means technical data first produced in the performance of the contract, technical data which are specified to be delivered under the contract, or technical data actually delivered in connection with the contract.

4. *Unlimited rights* means rights to use, duplicate, or disclose technical data, in whole or in part, in any manner and for any purpose whatsoever, and to permit others to do so.

B. Allocation of Rights.

1. The Government shall have:

(a) Unlimited rights in contract data except as otherwise provided below with respect to proprietary data properly marked as authorized by this clause;

(b) The right to remove, cancel, correct or ignore any marking not authorized by the terms of this contract on any technical data furnished hereunder, if in response to a written inquiry by DOE concerning the proprietary nature of the markings, the Purchaser fails to respond thereto within 60 days or fails to substantiate the proprietary nature of the markings. In either case, DOE will notify the Purchaser of the action taken;

(c) No rights under this contract in any technical data which are not contract data.

2. Subject to the foregoing provisions of this rights in technical data clause, the Purchaser shall have the right to mark proprietary data it furnishes under the contract with the following legend and no other, the terms of which shall be binding on the Government:

LIMITED RIGHTS LEGEND

This "proprietary data," furnished under "Contract No. ____" with the U.S. Department of Energy may be duplicated and used by the Government with the express limitations that the "proprietary data" may not be disclosed outside the Government or be used for purposes of manufacture without prior permission of the Purchaser, except that further disclosure or use may be made solely for the following purposes:

(a) This "proprietary data" may be disclosed for evaluation purposes under the restriction that the "proprietary data" be retained in confidence and not be further disclosed;

§961.11

10 CFR Ch. III (1-1-16 Edition)

(b) This "proprietary data" may be disclosed to contractors participating in the Government's program of which this contract is a part, for information or use in connection with the work performed under their contracts and under the restriction that the "proprietary data" be retained in confidence and not be further disclosed; or

(c) This "proprietary data" may be used by the Government or others on its behalf for emergency work under the restriction that the "proprietary data" be retained in confidence and not be further disclosed. This legend shall be marked on any reproduction of this data in whole or in part.

3. In the event that proprietary data of a third party, with respect to which the Purchaser is subject to restrictions on use or disclosure, is furnished with the Limited Rights Legend above, Purchaser shall secure the agreement of such third party to the rights of the Government as set forth in the Limited Rights Legend. DOE shall upon request furnish the names of those contractors to which proprietary data has been disclosed.

ARTICLE XXII—ENTIRE CONTRACT

A. This contract, which consists of Articles I through XXII and appendices A through G, annexed hereto and made a part hereof, contains the entire agreement between the parties with respect to the subject matter hereof. Any representation, promise, or condition not incorporated in this contract shall not be binding on either party. No course of dealing or usage of trade or course of performance shall be relevant to explain or supplement any provision contained in this contract.

B. Nothing in this contract is intended to affect in any way the contractual obligation of any other persons with whom the Purchaser may have contracted with respect to assuming some or all disposal costs or to accept title to SNF and/or HLW.

APPENDIX E

General Specifications

A. Fuel Category Identification

1. Categories—Purchaser shall use reasonable efforts, utilizing technology equivalent to and consistent with the commercial practice, to properly classify Spent Nuclear Fuel (SNF) prior to delivery to DOE, as follows:

a. *Standard Fuel* means SNF that meets all the General Specifications therefor set forth in paragraph B below.

b. *Nonstandard Fuel* means SNF that does not meet one or more of the General Specifications set forth in subparagraphs 1 through 5 of paragraph B below, and which is classified as Nonstandard Fuel Classes NS-1 through NS-5, pursuant to paragraph B below.

c. *Failed Fuel* means SNF that meets the specifications set forth in subparagraphs 1 through 3 of paragraph B below, and which is

classified as Failed Fuel Class F-1 through F-3 pursuant to subparagraph 6 of paragraph B below.

d. Fuel may have “Failed Fuel” and/or several “Nonstandard Fuel” classifications

B. Fuel Description and Subclassification—
 General Specifications

1. Maximum Nominal Physical Dimensions.

	Boiling water reactor (BWR)	Pressurized water reactor (PWR)
Overall Length	14 feet, 11 inches	14 feet, 10 inches.
Active Fuel Length	12 feet, 6 inches ..	12 feet, 0 inches.
Cross Section ¹	6 inches × 6 inches.	9 inches × 9 inches.

¹The cross section of the fuel assembly shall not include the channel.

NOTE: Fuel that does not meet these specifications shall be classified as Nonstandard Fuel—Class NS-1.

2. *Nonfuel Components.* Nonfuel components including, but not limited to, control spiders, burnable poison rod assemblies, control rod elements, thimble plugs, fission chambers, and primary and secondary neutron sources, that are contained within the fuel assembly, or BWR channels that are an integral part of the fuel assembly, which do not require special handling, may be included as part of the spent nuclear fuel delivered for disposal pursuant to this contract.

NOTE: Fuel that does not meet these specifications shall be classified as Nonstandard Fuel—Class NS-2.

3. *Cooling.* The minimum cooling time for fuel is five (5) years.

NOTE: Fuel that does not meet this specification shall be classified as Nonstandard Fuel—Class NS-3.

4. *Non-LWR Fuel.* Fuel from other than LWR power facilities shall be classified as Nonstandard Fuel—Class NS-4. Such fuel may be unique and require special handling, storage, and disposal facilities.

5. *Consolidated Fuel Rods.* Fuel which has been disassembled and stored with the fuel rods in a consolidated manner shall be classified as Nonstandard Fuel Class NS-5.

6. *Failed Fuel.*

a. Visual Inspection.

Assemblies shall be visually inspected for evidence of structural deformity or damage to cladding or spacers which may require special handling. Assemblies which [i] are structurally deformed or have damaged cladding to the extent that special handling may be required or [ii] for any reason cannot be handled with normal fuel handling equipment shall be classified as Failed Fuel—Class F-1.

b. Previously Encapsulated Assemblies.

Assemblies encapsulated by Purchaser prior to classification hereunder shall be classified as Failed Fuel—Class F-3. Purchaser shall advise DOE of the reason for the

Department of Energy

§ 961.11

prior encapsulation of assemblies in sufficient detail so that DOE may plan for appropriate subsequent handling.

c. Regulatory Requirements.

Spent fuel assemblies shall be packaged and placed in casks so that all applicable regulatory requirements are met.

C. Summary of Fuel Classifications

1. *Standard Fuel:*

- a. Class S-1: PWR
- b. Class S-2: BWR

2. *Nonstandard Fuel:*

- a. Class NS-1: Physical Dimensions
- b. Class NS-2: Non Fuel Components
- c. Class NS-3: Short Cooled
- d. Class NS-4: Non-LWR
- e. Class NS-5: Consolidated Fuel Rods.

3. *Failed Fuel:*

- a. Class F-1: Visual Failure or Damage
- b. Class F-2: Radioactive "Leakage"
- c. Class F-3: Encapsulated

D. High-Level Radioactive Waste

The DOE shall accept high-level radioactive waste. Detailed acceptance criteria and general specifications for such waste will be issued by the DOE no later than the date on which DOE submits its license application to the Nuclear Regulatory Commission for the first disposal facility.

APPENDIX F

Detailed Description of Purchaser's Fuel

This information shall be provided by Purchaser for each distinct fuel type within a Shipping Lot not later than sixty (60) days prior to the schedule transportation date.

Purchaser _____

Contract Number/Date ____ / _____

Reactor/Facility Name _____

I. Drawings included in generic dossier:

- 1. Fuel Assembly DWG# _____

2. Upper & Lower end fittings DWG# _____

Dossier Number: _____

DOE Shipping Lot #: _____

Assemblies Described:

- _____ BWR
- _____ PWR
- _____ Other

II. *Design Material Descriptions.*

Fuel Element:

- 1. Element type ____ (rod, plate, etc.)
- 2. Total length ____/(in.)
- 3. Active length ____ (in.)
- 4. Cladding material ____ (Zr, s.s., etc.)

Assembly Description:

- 1. Number of Elements _____
- 2. Overall dimensions (length ____ (cross section) ____ (in.))
- 3. Overall weight _____

III. Describe any distortions, cladding damage or other damage to the spent fuel, or nonfuel components within this Shipping Lot which will require special handling procedures. (Attach additional pages if needed.)

IV. Assembly Number _____

Shipping Lot # _____

	Irradiation history cycle No.				
	1	2	3	4	5
1. Startup date (mo/day/yr)
2. Shutdown date (mo/day/yr)
3. Cumulative fuel exposure (mwd/mtu)
4. Avg. reactor power (mwh)
5. Total heat output/assembly in watts, using an approved calculational method: _____ as of Date _____					

Any false, fictitious or fraudulent statement may be punishable by fine or imprisonment (U.S. Code, Title 18, Section 1001).

Appendix G - Standard Remittance Advice for Payment of Fees

This information is being collected under mandatory authorities vested in the U.S. Department of Energy under Public Law 97-425. Late filing, failure to file or to otherwise comply with the instructions provided may result in interest penalties as provided by Article VIII C of the Standard Contract for Disposal of Spent Nuclear Fuel and/or High Level Radioactive Waste. For information concerning confidentiality of information see Item 6 of the instructions. Public reporting burden for this collection of information is estimated to average 40 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Office of Statistical Standards, E1-73, Mail Station: 2H-087, 1000 Independence Ave., S.W., Washington, D.C. 20545; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

DEPARTMENT OF ENERGY
Germantown, MD 20875

APPENDIX G - STANDARD REMITTANCE ADVICE FOR PAYMENT OF FEES

General Information

1. **Purpose**
Standard Remittance Advice (RA) form is designed to serve as the source document for entries into the Department's accounting records to transmit data from Purchasers concerning payment of their contribution to the Nuclear Waste Fund.
2. **Who Shall Submit**
The RA must be submitted by Purchasers who signed the Standard Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste. Submit Copy 1, 2, and 3 to DOE, Office of the Controller, Special Accounts and Payroll Division and retain Copy 4.
3. **Where to Submit**
Purchasers shall forward completed RA to:
U.S. Department of Energy
Office of the Controller
Special Accounts and Payroll Division (C-216 GTN)
Box 500
Germantown, MD 20875-0500
Request for further information, additional forms, and instructions may be directed in writing to the address above or by telephone to (301) 353-4014.
4. **When to Submit**
For electricity generated on or after 4-7-83 fees shall be paid quarterly by the Purchaser and must be received by DOE not later than the close of the last business day of the month following the end of each assigned three month period. Payment is by electronic wire transfer only.
5. **Sanctions**
The timely submission of RA by a Purchaser is mandatory. Failure to file may result in late penalty fees as provided by Article VIII.C of the Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste.
6. **Provisions Regarding the Confidentiality of Information**
The information contained in these forms may be (i) information which is exempt from disclosure to the public under the exemption for trade secrets and confidential commercial information specified in the Freedom of Information Act of 5 USC 522(b)(4)(FOIA) or (ii) prohibited from public release by 18 USC 1905. However, before a determination can be made that particular information is within the coverage of either of these statutory provisions, the person submitting the information must make a showing satisfactory to the Department concerning its confidential nature.
Therefore, respondents should state briefly and specifically (on an element-by-element basis if possible), in a letter accompanying submission of the form why they consider the information concerned to be a trade secret or other proprietary information, whether such information is customarily treated as confidential information by their companies and the industry, and the type of competitive hardship that would result from disclosure of the information. In accordance with the provisions of 10 CFR 1004.11 of DOE's FOIA regulations, DOE will determine whether any information submitted should be withheld from public disclosure.
If DOE receives a response and does not receive a request, with substantive justification, that the information submitted should not be released to the public, DOE may assume that the respondent does not object to disclosure to the public of any information submitted on the form.
A new written justification need not be submitted each time the NWPA-830G is submitted if:
a. views concerning information items identified as privileged or confidential have not changed and
b. a written justification setting forth respondent's views in this regard was previously submitted.
In accordance with the cited statutes and other applicable authority, the information must be made available upon request, to the Congress or any committee of Congress, the General Accounting Office, and other Federal agencies authorized by law to receive such information.

INSTRUCTIONS FOR COMPLETING STANDARD REMITTANCE
ADVICE FOR PAYMENT OF FEES

- Section 1.0 **Identification Information**
 - 1.1 Name of Purchaser as it appears on the Standard Contract, the mailing address, state, and zip code.
 - 1.2 Name and telephone number of person responsible for the completion of this form.
 - 1.3 Standard Contract identification number as assigned by DOE.
 - 1.4 Period covered by this advice and date of this payment. Any period different from the assigned three month period should be explained on a separate attachment.
- Section 2.0 **Spent Nuclear Fuel (SNF) Fee**
 - 2.1 Enter the number of reactors for which the Purchaser had irradiated fuel as of midnight between 6/7 April 1983 (equal to the number of Annex B Forms attached).
 - 2.2 Total amount owed to the Nuclear Waste Fund for spent fuel used to generate electricity prior to April 7, 1983 (See Annex B for calculation).
 - 2.3 Self explanatory.
 - 2.4 Ten year Treasury Note rate on the date the payment is made, to be used if payments are being made using the 40 quarter option or if lump sum payment is made after June 30, 1985.
 - 2.5 Unpaid balance before this payment is made.
 - 2.6 Enter the payment option (1, 2, or 3) chosen. The selection of payment option must be made within two years of Standard Contract execution.
 - 2.7 Total payment of fee which this advice represents. Show principal, interest, and total.
- Section 3.0 **Fee for Electricity Generated and Sold (MkWh)**
 - 3.1 Enter the number of reactors the Purchaser is reporting on during this reporting period.
 - 3.2 Enter total electricity generated and sold during the reporting period from all reactors being reported. This is the sum of Station Total figures of line 4.2 from all Annex A forms attached, expressed in megawatt hours.
 - 3.3 Current Fee Rate as provided by DOE (initially 1.0 MkWh which is equal to 1.0 \$/MWh).
 - 3.4 Total Fee for Electricity Generated and Sold (MkWh) represented by this advice.
- Section 4.0 **Underpayment/Late payment (as notified by DOE)**
 - 4.1 - 4.6 Self Explanatory.
- Section 5.0 **Other Credits Claimed**
Represents all items for which a Purchaser may receive credit, as specified in the Standard Contract.
- Section 6.0 **Total Remittance**
 - 6.1 - 6.6 This section is a summary of the payments made in the previously mentioned categories with this remittance.
- Section 7.0 **Certification**
Enter the name and title of the individual your company has designated to certify the accuracy of the data. Sign the "Certification" block and enter the current date.

Annex A to Appendix G
Standard Remittance Advice for Payment of Fees

OMB No. 1901-0260
 (Expires 11/30/93)

Annex A Instructions

0. General Information
0.1 Purpose: To report the calculations of fees due the Department of Energy's Nuclear Waste Fund.
0.2 Please read all instructions before completing this form.
0.3 Complete a separate Annex A for each nuclear station. For a nuclear station that has different ownership arrangements for more than one reactor, a separate Annex A will be required for each reactor.
0.4 Submit Annex A Quarterly with Appendix G.
0.5 Where to submit:

 U.S. DOE, Office of the Controller
 Special Accounts & Payroll Division
 (C-216 GTN), Box 500
 Germantown, MD 20875-0500

Section 1. Identification Information: (Self explanatory)
Section 2. Net Electricity Generated Calculation
2.1 Unit ID Code: Enter the Reactor Unit Identification (ID) Code as assigned by DOE, for each reactor in the station.
2.2 Gross Thermal Energy Generated (MWh): Utility shall report the thermal output of the nuclear steam supply system during the gross hours of the reporting period.
2.3 Gross Electricity Generated (MWh): Utility shall report this amount for each unit in the appropriate column, and the total in the column labeled "Station Total." This amount is measured at the output terminals of the generator during the reporting period.
2.4 Nuclear Station Use While At Least One Nuclear Unit Is In Service (MWh): Utility shall report this amount for each unit in the appropriate column, and the total in the column called "Station Total." The utility is to report consumption of electricity by the nuclear portion of the station during days in which at least one of the station's nuclear units was on-line and producing electricity. A utility unable to meter an individual unit shall report the estimated unit use, and shall explain in item 2.7 how the unit data were estimated. **Note that:**
 A. During days in which nuclear station use exceeds nuclear station generation, the utility shall treat all resulting negative values as zero for fee calculation purposes.
 B. A utility that has multiple nuclear units at one station:
 • when at least 1 nuclear unit is operating and when generation from that unit exceeds the nuclear station's use, the utility may assume that the operating unit is supplying electricity for nuclear station use whether or not the electricity has been metered separately or the units terminate to a common electrical busbar; and
 • shall report under item 2.5 any electricity use by the nuclear portion of the station during the days in which all nuclear units at the station were out of service simultaneously.
 C. A utility that has a metered transmission line connecting an off-station nuclear reactor with another nuclear station may treat the off-station plant as part of this station for fee calculation purposes if it is not double counted.
 D. Utility may deduct small quantities of unmetered non-nuclear electricity generation included in "Gross Electricity Generated," provided that it is identified and explained in item 2.7.
 E. A utility may deduct nuclear electricity generation which is not sold and does not pass the busbar, provided they identify and explain the deduction in item 2.7 and that the deduction is not double counted.
2.5 Nuclear Station Use While All Nuclear Units Are Out Of Service (MWh): Utility shall report this amount for each unit in the appropriate column, and the total in the "Station Total" column. In this row, the utility shall report the consumption of electricity by the nuclear portion of the station during days in which total nuclear unit use exceeds nuclear generation (e.g., a day in which all nuclear units at the station were out of service at once). Note that a utility unable to meter individual unit use will report estimated unit use, and shall explain in item 2.7 how the unit data were estimated.

2.6 Net Electricity Generated (MWh): The utility shall report this amount for each unit in the appropriate column, and the total in the "Station Total" column. This amount is the result of subtracting items 2.4 from items 2.3.
2.7 Footnote (if any): Utilities that are unable to meter individual unit use shall explain here how the unit data were estimated.
Section 3. Total Energy Adjustment Factor Calculation:
 The reporting utility shall obtain necessary data from all owners to calculate the Total Energy Adjustment Factor and maintain consistent, accurate, and complete records to support these submissions. The values provided in this section must be accurate to 4 significant digits. If there are more than 12 owners, use a continuation sheet. For a nuclear station with more than one reactor and different ownerships for each reactor, a separate Annex A will be required for each reactor.
3.1 Weighted Energy Adjustment Factor Calculation:
Name of Nuclear Station Owner(s): provide the name(s) in items 1. thru 12, of 3.1. If more than 12 names, use a continuation sheet.
Adjustment for Sales to ultimate Consumer (ASC): is the product of Fraction of Sales to ultimate Consumer (FSC) and the Sales to ultimate Consumer Adjustment Factor (SCAF).
Fraction of Sales to ultimate Consumer (FSC): is determined by dividing the owner's previous year's annual sales to the ultimate consumer by the sum of the owner's previous year's annual sales to the ultimate consumer plus the owner's previous year's annual sales for resale. These figures can be found on the Energy Information Administration (EIA) Form EIA-861 or the Federal Energy Regulatory Commission (FERC) Form No. 1.
Sales to ultimate Consumer Adjustment Factor (SCAF): is equal to one minus the quotient of all electricity lost or otherwise not sold for each owner, divided by the total electricity available for disposition to ultimate consumers. The total electricity available is the reporting year total of all of an owner's electricity supply which is available for disposition, expressed in kilowatt hours. Electricity lost or otherwise not sold includes: (a) energy furnished without charge; (b) energy used by the company; (c) transmission losses; (d) distribution losses; (e) other unaccounted losses as reported on the Form EIA-861 or the FERC Form No. 1.
Adjustment for Sales for Resale (ASR): is the product of Fraction of Sales for Resale (FSR) and National average Adjustment Factor (NAF).
Fraction of Sales for Resale (FSR): is determined by dividing the owner's previous year's annual sales for resale by the sum of the owner's previous year's annual sales to the ultimate consumer plus the owner's previous year's annual sales for resale. These figures can be found on the Form EIA-861 or the FERC Form No. 1.
National average Adjustment Factor (NAF): is the quotient of the national total of electricity sold divided by the national total of electricity available for disposition.
Owner's Energy Adjustment Factor (OEAF): is the Owner's fraction of metered electricity
Weighted Energy Adjustment Factor (WEAF): is the product of an Owner's Energy Adjustment Factor (OEAF) times the Owner's Share (OS).
3.2 Total Energy Adjustment Factor (TEAF): is the sum of individual owner's Weighted Energy Adjustment Factors (WEAF).
Section 4. Fee Calculation for Electricity Generated and Sold:
4.1 Total Energy Adjustment Factor: Enter the value from item 3.2 as appropriate.
4.2 Electricity Generated and Sold: Multiply the values in item 4.1 by the "Unit" values in item 2.6. Sum these values and enter in "Station Total".
4.3 Current Fee Due (Dollars): Multiply the values in item 4.2 by one (1) dollar/megawatt hour (or 1.0 mill/kWh), which is the current fee. Add this station fee to the current fee due for all other reactors operated by the Purchaser, and then enter the sum on line 3.4 of the Appendix G, Remittance Advice.

ANNEX B TO APPENDIX G

Standard Remittance of Advice (RA) for
Payment of Fees

This Annex should be completed only for SNF burned before midnight between April 6/7, 1983.

I. Identification

A. Purchaser: _____

1. Burnup ¹ (MWD/MTU)	0-	5,000-	10,000	20,000

A. Discharged nuclear fuel

AUTHORITY: The Atomic Energy Act of 1954 (42 U.S.C. 2011 *et seq.*); Energy Reorganization Act of 1974 (42 U.S.C. 5801 *et seq.*); Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*); Nuclear Waste Policy Act (Pub. L. 97-425, 96 Stat. 2201).

SOURCE: 52 FR 15940, May 1, 1987, unless otherwise noted.

§962.1 Scope.

This part applies only to radioactive waste substances which are owned or produced by the Department of Energy at facilities owned or operated by or for the Department of Energy under the Atomic Energy Act of 1954 (42 U.S.C. 2011 *et seq.*). This part does not apply to substances which are not owned or produced by the Department of Energy.

§962.2 Purpose.

The purpose of this part is to clarify the meaning of the term “byproduct material” under section 11e(1) of the Atomic Energy Act of 1954 (42 U.S.C. 2014(e)(1)) for use only in determining the Department of Energy’s obligations under the Resource Conservation and Recovery Act (42 U.S.C. 6901 *et seq.*) with regard to radioactive waste substances owned or produced by the Department of Energy pursuant to the exercise of its responsibilities under the Atomic Energy Act of 1954. This part does not affect materials defined as byproduct material under section 11e(2) of the Atomic Energy Act of 1954 (42 U.S.C. 2014(e)(2)).

§ 962.3 Byproduct material.

(a) For purposes of this part, the term *byproduct material* means any radioactive material (except special nuclear material) yielded in or made radioactive by exposure to the radiation incident to the process of producing or utilizing special nuclear material.

(b) For purposes of determining the applicability of the Resource Conservation and Recovery Act (42 U.S.C. 6901 *et seq.*) to any radioactive waste substance owned or produced by the Department of Energy pursuant to the exercise of its atomic energy research, development, testing and production responsibilities under the Atomic Energy Act of 1954 (42 U.S.C. 2011 *et seq.*), the words “any radioactive material,” as used in paragraph (a) of this section, refer only to the actual radionuclides dispersed or suspended in the waste substance. The nonradioactive hazardous component of the waste substance will be subject to regulation under the Resource Conservation and Recovery Act.

PART 963—YUCCA MOUNTAIN SITE SUITABILITY GUIDELINES**Subpart A—General Provisions**

963.1 Purpose.

963.2 Definitions.

Subpart B—Site Suitability Determination, Methods, and Criteria

963.10 Scope.

963.11 Suitability determination.

963.12 Preclosure suitability determination.

963.13 Preclosure suitability evaluation method.

963.14 Preclosure suitability criteria.

963.15 Postclosure suitability determination.

963.16 Postclosure suitability evaluation method.

963.17 Postclosure suitability criteria.

AUTHORITY: 42 U.S.C. 2011 *et seq.*; 42 U.S.C. 7101 *et seq.*; 42 U.S.C. 10101, *et seq.*

SOURCE: 66 FR 57336, Nov. 14, 2001, unless otherwise noted.

Subpart A—General Provisions**§ 963.1 Purpose.**

(a) The purpose of this part is to establish DOE methods and criteria for determining the suitability of the Yucca Mountain site for the location of a geologic repository. DOE will use these methods and criteria in analyzing the data from the site characterization activities required under section 113 of the Nuclear Waste Policy Act.

(b) This part does not address other information that must be considered and submitted to the President, and made available to the public, by the Secretary under section 114 of the Nuclear Waste Policy Act if the Yucca Mountain site is recommended for development as a geologic repository.

§ 963.2 Definitions.

For purposes of this part:

Applicable radiation protection standard means (1) For the preclosure period, the preclosure numerical radiation dose limits in 10 CFR 63.111(a) and (b) and 63.204; and

(2) For the postclosure period, the postclosure numerical radiation dose limits in 10 CFR 63.311 and 63.321 and radionuclide concentration limits in 10 CFR 63.331.

Barrier means any material, structure or feature that prevents or substantially reduces the rate of movement of water or radionuclides from the Yucca Mountain repository to the accessible environment, or prevents the release or substantially reduces the release rate of radionuclides from the waste. For example, a barrier may be a geologic feature, an engineered structure, a canister, a waste form with physical and chemical characteristics that significantly decrease the mobility of radionuclides, or a material placed over and around the waste, provided that the material substantially delays movement of water or radionuclides.

Cladding is the metallic outer sheath of a fuel rod element; it is generally made of a corrosion resistant zirconium alloy or stainless steel, and is intended to isolate the fuel from the external environment.

Closure means the final closing of the remaining open operational areas of the underground facility and boreholes after termination of waste emplacement, culminating in the sealing of shafts and ramps, except those openings that may be designed for ventilation or monitoring.

Colloid means any fine-grained material in suspension, or any such material that can be easily suspended.

Criteria means the characterizing traits relevant to assessing the performance of a geologic repository, as defined by this section, at the Yucca Mountain site.

Design means a description of the engineered structures, systems, components and equipment of a geologic repository at Yucca Mountain that includes the engineered barrier system.

Design bases means that information that identifies the specific functions to be performed by a structure, system, or component of a facility and the specific values or ranges of values chosen for controlling parameters as reference bounds for design. These values may be constraints derived from generally accepted “state-of-the-art” practices for achieving functional goals or requirements derived from analysis (based on calculation or experiments) of the effects of a postulated event under which a structure, system, or component must meet its functional goals. The values for controlling parameters for external events include:

(1) Estimates of severe natural events to be used for deriving design bases that will be based on consideration of historical data on the associated parameters, physical data, or analysis of upper limits of the physical processes involved; and

(2) Estimates of severe external human-induced events to be used for deriving design bases, that will be based on analysis of human activity in the region, taking into account the site characteristics and the risks associated with the event.

DOE means the U.S. Department of Energy, or its duly authorized representatives.

Engineered barrier system means the waste packages, including engineered components and systems other than

the waste package (e.g., drip shields), and the underground facility.

Event sequence means a series of actions and/or occurrences within the natural and engineered components of a geologic repository operations area that could potentially lead to exposure of individuals to radiation. An event sequence includes one or more initiating events and associated combinations of repository system component failures, including those produced by the action or inaction of operating personnel. Those event sequences that are expected to occur one or more times before permanent closure of the geologic repository operations area are referred to as Category 1 event sequences. Other event sequences that have at least one chance in 10,000 of occurring before permanent closure are referred to as Category 2 event sequences.

Geologic repository means a system that is intended to be used for, or may be used for, the disposal of radioactive wastes in excavated geologic media. A geologic repository includes the engineered barrier system and the portion of the geologic setting that provides isolation of the radioactive waste.

Geologic repository operations area means a high-level radioactive waste facility that is part of a geologic repository, including both surface and subsurface areas, where waste handling activities are conducted.

Geologic setting means geologic, hydrologic, and geochemical system of the region in which a geologic repository is or may be located.

High-level radioactive waste means

(1) The highly radioactive material resulting from the reprocessing of spent nuclear fuel, including liquid waste produced directly in reprocessing and any solid material derived from such liquid waste that contains fission products in sufficient concentration; and

(2) Other highly radioactive material that the Commission, consistent with existing law, determines by rule requires permanent isolation.

Human intrusion means breaching of any portion of the Yucca Mountain disposal system within the repository footprint by any human activity.

Infiltration means the flow of a fluid into a solid substance through pores or small openings; specifically, the movement of water into soil and fractured or porous rock.

Initiating event means a natural or human induced event that causes an event sequence.

Near-field means the region where the adjacent natural geohydrologic system has been significantly impacted by the excavation of the repository and the emplacement of the waste.

NRC means the U.S. Nuclear Regulatory Commission or its duly authorized representatives.

Perched water means ground water of limited lateral extent separated from an underlying body of ground water by an unsaturated zone.

Preclosure means the period of time before and during closure of the geologic repository.

Preclosure safety evaluation means a preliminary assessment of the adequacy of repository support facilities to prevent or mitigate the effects of postulated initiating events and event sequences and their consequences (including fire, radiation, criticality, and chemical hazards), and the site, structures, systems, components, equipment, and operator actions that would be relied on for safety.

Postclosure means the period of time after the closure of the geologic repository.

Radioactive waste or waste means high-level radioactive waste and other radioactive materials, including spent nuclear fuel, that are received for emplacement in the geologic repository.

Reasonably maximally exposed individual means the hypothetical person meeting the criteria specified at 10 CFR 63.312.

Reference biosphere means the description of the environment, inhabited by the reasonably maximally exposed individual. The reference biosphere comprises the set of specific biotic and abiotic characteristics of the environment, including, but not limited to, climate, topography, soils, flora, fauna, and human activities.

Seepage means the inflow of ground water moving in fractures or pore spaces of permeable rock to an open

space in the rock such as an excavated drift.

Sensitivity study means an analytic or numerical technique for examining the effects on model outcomes, such as radionuclide releases, of varying specified parameters, such as the infiltration rate due to precipitation.

Site characterization means activities, whether in the laboratory or in the field, undertaken to establish the geologic conditions and the ranges of the parameters of a candidate site relevant to the location of a repository, including borings, surface excavations, excavations of exploratory shafts, limited subsurface lateral excavations and borings, and in situ testing needed to evaluate the suitability of a candidate site for the location of a repository, but not including preliminary borings and geophysical testing needed to assess whether site characterization should be undertaken.

Surface facilities means all permanent facilities within the restricted area constructed in support of site characterization activities and repository construction, operation, and closure activities, including surface structures, utility lines, roads, railroads, and similar facilities, but excluding the underground facility.

System performance means the complete behavior of a geologic repository system at Yucca Mountain in response to the features, events, and processes that may affect it.

Total system performance assessment means a probabilistic analysis that is used to:

- (1) Identify the features, events and processes (except human intrusion) that might affect the Yucca Mountain disposal system and their probabilities of occurring during 10,000 years after disposal;

- (2) Examine the effects of those features, events, processes, and sequences of events and processes (except human intrusion) on the performance of the Yucca Mountain disposal system; and

- (3) Estimate the dose incurred by the reasonably maximally exposed individual, including associated uncertainties, as a result of releases caused by all significant features, events, processes, and sequences of events and

§963.10

processes, weighted by their probability of occurrence.

Underground facility means the underground structure, backfill materials, if any, and openings that penetrate the underground structure (e.g., ramps, shafts and boreholes, including their seals).

Waste form means the radioactive waste materials and any encapsulating or stabilizing matrix.

Waste package means the waste form and any containers, shielding, packing, and other absorbent materials immediately surrounding an individual waste container.

Yucca Mountain disposal system means the combination of underground engineered and natural barriers within the controlled area that prevents or substantially reduces releases from the waste.

Yucca Mountain site means the candidate site in the State of Nevada recommended by the Secretary to the President under section 112(b)(1)(B) of the Nuclear Waste Policy Act of 1982 (NWPA) (42 U.S.C. 1032(b)(1)(B)) on May 27, 1986.

Subpart B—Site Suitability Determination, Methods, and Criteria

§963.10 Scope.

(a) The scope of this subpart includes the following for both the preclosure and postclosure periods:

(1) The bases for the suitability determination for the Yucca Mountain site as a location for a geologic repository;

(2) The suitability evaluation methods for applying the site suitability criteria to a geologic repository at the Yucca Mountain site; and

(3) The site suitability criteria that DOE will apply in accordance with section 113(b)(1)(A)(iv) of the NWPA.

(b) DOE will seek NRC concurrence on any future revisions to this subpart.

§963.11 Suitability determination.

DOE will evaluate whether the Yucca Mountain site is suitable for the location of a geologic repository on the basis of the preclosure and postclosure determinations described in §§963.12 and 963.15. If DOE's evaluation of the

10 CFR Ch. III (1–1–16 Edition)

Yucca Mountain site for the location of a geologic repository under §§963.12 and 963.15 shows that the geologic repository is likely to meet the applicable radiation protection standards for the preclosure and postclosure periods, then DOE may determine that the site is a suitable location for the development of such a repository.

§963.12 Preclosure suitability determination.

DOE will apply the method and criteria described in §§963.13 and 963.14 to evaluate the suitability of the Yucca Mountain site for the preclosure period. If DOE finds that the results of the preclosure safety evaluation conducted under §963.13 show that the Yucca Mountain site is likely to meet the applicable radiation protection standard, DOE may determine the site suitable for the preclosure period.

§963.13 Preclosure suitability evaluation method.

(a) DOE will evaluate preclosure suitability using a preclosure safety evaluation method. DOE will evaluate the performance of the geologic repository at the Yucca Mountain site using the method described in paragraph (b) of this section and the criteria in §963.14. DOE will consider the performance of the system in terms of the criteria to evaluate whether the geologic repository is likely to comply with the applicable radiation protection standard.

(b) The preclosure safety evaluation method, using preliminary engineering specifications, will assess the adequacy of the repository facilities to perform their intended functions and prevent or mitigate the effects of postulated Category 1 and 2 event sequences. The preclosure safety evaluation will consider:

(1) A preliminary description of the site characteristics, the surface facilities and the underground operating facilities;

(2) A preliminary description of the design bases for the operating facilities and a preliminary description of any associated limits on operation;

(3) A preliminary description of potential hazards, event sequences, and their consequences; and

(4) A preliminary description of the structures, systems, components, equipment, and operator actions intended to mitigate or prevent accidents.

§ 963.14 Preclosure suitability criteria.

DOE will evaluate preclosure suitability using the following criteria:

(a) Ability to contain radioactive material and to limit releases of radioactive materials;

(b) Ability to implement control and emergency systems to limit exposure to radiation;

(c) Ability to maintain a system and components that perform their intended safety functions; and

(d) Ability to preserve the option to retrieve wastes during the preclosure period.

§ 963.15 Postclosure suitability determination.

DOE will apply the method and criteria described in §§ 963.16 and 963.17 to evaluate the suitability of the Yucca Mountain site for the postclosure period. If DOE finds that the results of the total system performance assessments conducted under § 963.16 show that the Yucca Mountain site is likely to meet the applicable radiation protection standard, DOE may determine the site suitable for the postclosure period.

§ 963.16 Postclosure suitability evaluation method.

(a) DOE will evaluate postclosure suitability using the total system performance assessment method. DOE will conduct a total system performance assessment to evaluate the ability of the geologic repository to meet the applicable radiation protection standard under the following circumstances:

(1) DOE will conduct a total system performance assessment to evaluate the ability of the Yucca Mountain disposal system to limit radiological doses and radionuclide concentrations in the case where there is no human intrusion into the repository. DOE will model the performance of the Yucca Mountain disposal system using the method described in paragraph (b) of this section and the criteria in § 963.17. DOE will consider the performance of

the system in terms of the criteria to evaluate whether the Yucca Mountain disposal system is likely to comply with the applicable radiation protection standard.

(2) DOE will conduct a separate total system performance assessment to evaluate the ability of the Yucca Mountain disposal system to limit radiological doses in the case where there is a human intrusion as specified by 10 CFR 63.322. DOE will model the performance of the Yucca Mountain disposal system using the method described in paragraph (b) of this section and the criteria in § 963.17. If required by applicable NRC regulations regarding a human intrusion standard, § 63.321, DOE will consider the performance of the system in terms of the criteria to evaluate whether the Yucca Mountain disposal system is likely to comply with the applicable radiation protection standard.

(b) In conducting a total system performance assessment under this section, DOE will:

(1) Include data related to the suitability criteria in § 963.17;

(2) Account for uncertainties and variabilities in parameter values and provide the technical basis for parameter ranges, probability distributions, and bounding values;

(3) Consider alternative models of features and processes that are consistent with available data and current scientific understanding, and evaluate the effects that alternative models would have on the estimated performance of the Yucca Mountain disposal system ;

(4) Consider only events that have at least one chance in 10,000 of occurring over 10,000 years;

(5) Provide the technical basis for either inclusion or exclusion of specific features, events, and processes of the geologic setting, including appropriate details as to magnitude and timing regarding any exclusions that would significantly change the dose to the reasonably maximally exposed individual;

(6) Provide the technical basis for either inclusion or exclusion of degradation, deterioration, or alteration processes of engineered barriers, including those processes that would adversely

§963.17

affect natural barriers, (such as degradation of concrete liners affecting the pH of ground water or precipitation of minerals due to heat changing hydrologic processes), including appropriate details as to magnitude and timing regarding any exclusions that would significantly change the dose to the reasonably maximally exposed individual;

(7) Provide the technical basis for models used in the total system performance assessment such as comparisons made with outputs of detailed process-level models and/or empirical observations (for example, laboratory testing, field investigations, and natural analogs);

(8) Identify natural features of the geologic setting and design features of the engineered barrier system important to isolating radioactive waste;

(9) Describe the capability of the natural and engineered barriers important to isolating radioactive waste, taking into account uncertainties in characterizing and modeling such barriers;

(10) Provide the technical basis for the description of the capability of the natural and engineered barriers important to isolating radioactive waste;

(11) Use the reference biosphere and reasonably maximally exposed individual assumptions specified in applicable NRC regulations; and

(12) Conduct appropriate sensitivity studies.

§963.17 Postclosure suitability criteria.

(a) DOE will evaluate the postclosure suitability of a geologic repository at the Yucca Mountain site through suitability criteria that reflect both the processes and the models used to simulate those processes that are important to the total system performance of the geologic repository. The applicable criteria are:

(1) Site characteristics, which include:

(i) Geologic properties of the site—for example, stratigraphy, rock type and physical properties, and structural characteristics;

(ii) Hydrologic properties of the site—for example, porosity, permeability, moisture content, saturation, and potentiometric characteristics;

(iii) Geophysical properties of the site—for example, densities, velocities and water contents, as measured or deduced from geophysical logs; and

(iv) Geochemical properties of the site—for example, precipitation, dissolution characteristics, and sorption properties of mineral and rock surfaces.

(2) Unsaturated zone flow characteristics, which include:

(i) Climate—for example, precipitation and postulated future climatic conditions;

(ii) Infiltration—for example, precipitation entering the mountain in excess of water returned to the atmosphere by evaporation and plant transpiration;

(iii) Unsaturated zone flux—for example, water movement through the pore spaces, or flowing along fractures or through perched water zones above the repository;

(iv) Seepage—for example, water dripping into the underground repository openings from the surrounding rock.

(3) Near field environment characteristics, which include:

(i) Thermal hydrology—for example, effects of heat from the waste on water flow through the site, and the temperature and humidity at the engineered barriers.

(ii) Near field geochemical environment—for example, the chemical reactions and products resulting from water contacting the waste and the engineered barrier materials.

(4) Engineered barrier system degradation characteristics, which include:

(i) Engineered barrier system component performance—for example, drip shields, backfill, coatings, or chemical modifications, and

(ii) Waste package degradation—for example, the corrosion of the waste package materials within the near-field environment.

(5) Waste form degradation characteristics, which include:

(i) Cladding degradation—for example, corrosion or break-down of the cladding on the spent fuel pellets;

(ii) Waste form dissolution—for example, the ability of individual radionuclides to dissolve in water penetrating breached waste packages.

10 CFR Ch. III (1–1–16 Edition)

Department of Energy

§ 963.17

(6) Engineered barrier system degradation, flow, and transport characteristics, which include:

(i) Colloid formation and stability—for example, the formation of colloidal particles and the ability of radionuclides to adhere to these particles as they may migrate through the remaining barriers; and

(ii) Engineered barrier transport—for example, the movement of radionuclides dissolved in water or adhering to colloidal particles to be transported through the remaining engineered barriers and in the underlying unsaturated zone.

(7) Unsaturated zone flow and transport characteristics, which include:

(i) Unsaturated zone transport—for example, the movement of water with dissolved radionuclides or colloidal particles through the unsaturated zone underlying the repository, including retardation mechanisms such as sorption on rock or mineral surfaces;

(ii) Thermal hydrology—for example, effects of heat from the waste on water flow through the site.

(8) Saturated zone flow and transport characteristics, which include:

(i) Saturated zone transport—for example, the movement of water with dissolved radionuclides or colloidal particles through the saturated zone underlying and beyond the repository, including retardation mechanisms such as sorption on rock or mineral surfaces; and

(ii) Dilution—for example, diffusion of radionuclides into pore spaces, dispersion of radionuclides along flow

paths, and mixing with non-contaminated ground water.

(9) Biosphere characteristics, which include:

(i) Reference biosphere and reasonably maximally exposed individual—for example, biosphere water pathways, location and behavior of reasonably maximally exposed individual; and

(ii) Biosphere transport and uptake—for example, the consumption of ground or surface waters through direct extraction or agriculture, including mixing with non-contaminated waters and exposure to contaminated agricultural products.

(b) DOE will evaluate the postclosure suitability of the Yucca Mountain disposal system using criteria that consider disruptive processes and events important to the total system performance of the geologic repository. The applicable criteria related to disruptive processes and events include:

(1) Volcanism—for example, the probability and potential consequences of a volcanic eruption intersecting the repository;

(2) Seismic events—for example, the probability and potential consequences of an earthquake on the underground facilities or hydrologic system; and

(3) Nuclear criticality—for example, the probability and potential consequences of a self-sustaining nuclear reaction as a result of chemical or physical processes affecting the waste either in or after release from breached waste packages.

PART 1000—TRANSFER OF PROCEEDINGS TO THE SECRETARY OF ENERGY AND THE FEDERAL ENERGY REGULATORY COMMISSION

§ 1000.1 Transfer of proceedings.

(a) *Scope.* This part establishes the transfer of proceedings pending with regard to those functions of various agencies which have been consolidated in the Department of Energy and identifies those proceedings which are transferred into the jurisdiction of the Secretary and those which are transferred into the jurisdiction of the Federal Energy Regulatory Commission.

(b) *Proceedings transferred to the Secretary.* The following proceedings are transferred to the Secretary:

(1) All Notices of Proposed Rule-making, pending and outstanding, which have been proposed by the Department of Energy and the Department of Energy;

(2) All Notices of Inquiry which have been issued by the Department of Energy;

(3) All Requests for Interpretations which have been filed pursuant to 10 CFR part 205, subpart F, and on which no interpretation has been issued, with the Office of General Counsel of the Department of Energy;

(4) All Applications for Exception Relief which have been filed pursuant to 10 CFR part 205, subpart D, and on which no final decision and order has been issued, with the Office of Exceptions and Appeals of the Department of Energy;

(5) All petitions for special redress, relief or other extraordinary assistance which have been filed pursuant to 10 CFR part 205, subpart R, and on which no order has been issued, with the Office of Private Grievances and Redress of the Department of Energy;

(6) All appeals from Remedial Orders, Exception Decisions and Orders, Interpretations issued by the Office of General Counsel, and other agency orders which have been filed pursuant to 10 CFR part 205, subpart H, and on which no order has been issued prior to October 1, 1977, with the Office of Exceptions and Appeals of the Department of Energy;

(7) All applications for modification or rescission of any DOE order or interpretation which have been filed pursuant to 10 CFR part 205, subpart J, and on which no order has been issued prior to October 1, 1977, with the Office of Exceptions and Appeals of the Federal Energy Administration;

NOTE: For a document relating to procedures for natural gas import and export proceedings see 42 FR 61856, Dec. 7, 1977.

(8) All applications for temporary stays and stays which have been filed pursuant to 10 CFR part 205, subpart I, and on which no order has been issued, with the Office of Exceptions and Appeals of the Department of Energy;

(9) All applications which have been filed with the Office of Regulatory Programs of the Department of Energy and on which no final order has been issued;

(10) All investigations which have been instituted and have not been resolved by the Office of Compliance of the Department of Energy;

(11) All Notices of Probable Violation which have been issued prior to October 1, 1977, by the Office of Compliance of Department of Energy;

(12) All Notices of Proposed Disallowance which have been issued prior to October 1, 1977, by the Office of Compliance of Department of Energy;

(13) All Prohibition Orders which have been issued pursuant to 10 CFR part 303 and as to which no Notice of Effectiveness has been issued;

(14) From the Department of the Interior:

(i) The tentative power rate adjustments for the Central Valley Project, California, proposed on September 12, 1977 (42 FR 46619, September 16, 1977).

(15) From the Interstate Commerce Commission:

(i) Ex Parte No. 308 (Sub-No. 1)—Investigation of Common Carrier Pipelines.

(16) From the Federal Power Commission:

(i) Cases:
(A) Northwest Pipeline Corporation, Docket No. CP75-340.

(B) Midwestern Gas Transmission Co., Docket No. CP77-458, *et al.*

(C) St. Lawrence Gas Company, Docket No. G-17500.

§ 1000.1

10 CFR Ch. X (1-1-16 Edition)

(D) U.S.D.I. Bonneville Power Administration, Docket No. E-9563.

(E) U.S.D.I. Southwestern Power Administration, Docket No. E-7201.

(F) U.S.D.I. Southeastern Power Administration, Docket No. E-6957.

(G) Tenneco InterAmerica, Inc., Docket No. CP77-561.

(ii) Applications:

(A) Maine Public Service Co., Docket No. E-6751. (ERA Docket No. IE-78-1).

(B) Northern States Power Co., Docket No. E-9589, (ERA Docket No. IE-78-2).

(C) Arizona Public Service Co., Docket No. IT-5331. (ERA Docket No. IE-78-3).

(D) Niagara Mohawk Power Corp., Docket No. E-7022. (ERA Docket No. IE-77-6).

(E) Maine Public Service Co., Docket No. IT-6027. (ERA Docket No. PP-12).

(F) Boise Cascade, Docket No. E-7765. (ERA Docket No. PP-52).

(G) Bonneville Power Administration, Docket No. IT-5959. (ERA Docket No. PP-10).

(H) EPR—Oregon (Geothermal Steam Leases).

(I) EPR—Utah (Geothermal Steam Leases).

(J) EPR—Idaho (Geothermal Steam Leases).

(K) EPR—Oregon (Geothermal Steam Leases).

(L) EPR—Idaho (Geothermal Steam Leases).

(iii) Rulemakings:

(A) Implementation of sections 382(b) and 382(c) of the Energy Policy and Conservation Act of 1975. Docket No. RM77-3.

(B) New Form Nos:

151, Docket No. RM76-19.

153, Docket No. RM76-27.

154, Docket No. RM76-33.

156, Docket No. RM76-32.

157, Docket No. RM76-21.

158, Docket No. RM76-31.

159, Docket No. RM76-23.

160, Docket No. RM76-20.

161, Docket No. RM76-26.

162, Docket No. RM76-34.

155, Docket No. RM76-28.

163, Docket No. RM76-30.

164, Docket No. RM76-25.

(C) Procedures for the Filing of Federal Rate Schedules Docket No. RM77-9.

(iv) Project withdrawals and power site revocations:

(A) Project 1021, 1226, 1606, and 1772—(Wyoming)—U.S. Forest Service (Applicant).

(B) Project Nos. 1021, 1226, 1606, and 1772—(Wyoming)—U.S. Forest Service (Applicant).

(C) Project Nos. 220 and 691—(Wyoming)—Cliff Gold Mining Co. (Applicant for P-691) The Colowyo Gold Mining Co. (Applicant for P-220).

(D) Project No. 1203—(Wyoming)—F. D. Foster (Applicant).

(E) Project No. 1241—(Wyoming)—F. B. Hommel (Applicant).

(F) Project No. 847—(Oregon)—H. L. Vorse (Applicant).

(G) Project No. 907—(Colorado)—S. B. Collins (Applicant).

(H) Project No. 941—(Colorado)—Marian Mining Company (Applicant).

(I) Project Nos. 347 and 418—(Colorado)—Jones Brothers (Applicant for P-347) Frank Gay et al. (Applicant for P-418).

(J) Project Nos. 373, 521, 937, 1024, 1415, 1546, 1547, and 1025—()—U.S. Forest (Applicant).

(K) Project No. 163—(Colorado)—James F. Meyser and Edward E. Drach (Applicants).

(L) Project Nos. 385, 445, 506, 519, 1220, 1296, 1418, 1519, 1576, 1615, 1616, 1618, 1678, 1682, and 1750—(Colorado)—U.S. Forest Service (Applicant).

(M) DA-117—(Alaska)—Bureau of Land Management (Applicant).

(N) Project No. 114—(Alaska)—Elizabeth H. Graff et al. (Applicant).

(O) DA-222—(Washington)—Bureau of Land Management (Applicant).

(P) DA-562—(Oregon)—U.S. Geological Survey (Applicant).

(Q) DA-601—(Idaho)—Bureau of Land Management (Applicant).

(R) DA-509—(Colorado)—Fed. Highway Admin. (Applicant).

(S) DA-616—(Idaho)—U.S. Forest Service (Applicant).

(T) DA-1—(South Carolina)—U.S. Forest Service (Applicant).

(U) DA-1116—(California)—U.S. Geological Survey (Applicant).

(V) DA-154—(Arizona)—U.S. Geological Survey (Applicant).

Department of Energy

§ 1000.1

(W) DA-1098—(California)—Merced Irrigation District (Applicant).

(c) *Proceedings transferred to the Commission.* There are hereby transferred to the jurisdiction of the Federal Energy Regulatory Commission the following proceedings:

(1) From the Interstate Commerce Commission:

(i) Ex Parte No. 308—Valuation of Common Carrier Pipelines.

(ii) I&S 9164—Trans Alaska Pipeline System—Rate Filings (including I&S 9164 (Sub-No. 1), NOR 36611, NOR 36611 (Sub-No. 1), NOR 36611 (Sub-No. 2), NOR 36611 (Sub-No. 3), NOR 36611 (Sub-No. 4)).

(iii) I&S 9089—General Increase, December 1975, Williams Pipeline Company.

(iv) I&S 9128—Anhydrous Ammonia, Gulf Central Pipeline Company.

(v) NOR 35533 (Sub-No. 3)—Petroleum Products, Southwest & Midwest Williams Pipeline.

(vi) NOR 35794—Northville Dock Pipeline Corp. et al.

(vii) NOR 35895—Inexco Oil Company v. Belle Fourche Pipeline Co. et al.

(viii) NOR 36217—Department of Defense v. Interstate Storage & Pipeline Corp.

(ix) NOR 36423—Petroleum Products Southwest to Midwest Points.

(x) NOR 36520—Williams Pipeline Company—Petroleum Products Midwest.

(xi) NOR 36553—Kerr-McGee Refining Corporation v. Texoma Pipeline Co.

(xii) Suspension Docket 67124—Williams Pipe Line Co.—General Increase.

(xiii) Valuation Docket 1423—Williams Pipeline Company (1971-1974 inclusive).

(2) To remain with the Commission until forwarding to the Secretary:

The following proceedings will continue in effect under the jurisdiction of the Commission until the timely filing of all briefs on and opposing exceptions to the initial decision of the presiding Administration Law Judge, at which time the Commission shall forward the record of the proceeding to the Secretary for decision on those matters within his jurisdiction:

(i) *El Paso Eastern Co., et al.*, Docket No. CP 77-330, et al.

(ii) *Tenneco Atlantic Pipeline Co., et al.*, Docket No. CP 77-100, et al.

(iii) *Distrigas of Massachusetts Corp., et al.*, Docket No. CP 70-196, et al.

(iv) *Distrigas of Massachusetts Corp., et al.*, Docket No. CP 77-216, et al.

(v) *Eascogas LNG, Inc., et al.*, Docket No. CP 73-47, et al.

(vi) *Pacific Indonesia LNG Co., et al.*, Docket No. CP74-160, et al., (except as provided in paragraph (c)(3) of this section).

(3) The Amendment to Application of Western LNG Terminal Associates, filed on November 11, 1977, in *Pacific Indonesia LNG Co., et al.*, FPC Docket No. CP74-160, et al., ERA Docket No. 77-001-LNG, is transferred to the jurisdiction of the Commission until timely filing of all briefs on and opposing exceptions to the Initial Decision of the presiding Administrative Law Judge on that Amendment, at which time the Commission shall forward a copy of the record of that proceeding to the Secretary of Energy for decision on those matters within his jurisdiction. (If the Commission waives the preparation of an initial decision, the Commission will forward a copy of the record after completion of the hearing, or after the timely filing of any briefs submitted to the Commission, whichever occurs later.)

(d) *Residual clause.* All proceedings (other than proceedings described in paragraphs (b) and (c) of this section) pending with regard to any function of the Department of Energy, the Department of Energy, Department of the Interior, the Department of Commerce, the Department of Housing and Urban Development, the Department of Navy, and the Naval Reactor and Military Applications Programs which is transferred to the Department of Energy (DOE) by the DOE Organization Act, will be conducted by the Secretary. All proceedings (other than proceedings described in paragraphs (b) and (c) of this section) before the Federal Power Commission or Interstate Commerce Commission will be conducted by the

PART 1002—OFFICIAL SEAL AND DISTINGUISHING FLAG

Subpart A—General

Sec.

1002.1 Purpose.

1002.2 Definitions.

1002.3 Custody of official seal and distinguishing flags.

Subpart B—Official Seal

1002.11 Description of official seal.

1002.12 Use of replicas, reproductions, and embossing seals.

Subpart C—Distinguishing Flag

1002.21 Description of distinguishing flag.

1002.22 Use of distinguishing flag.

Subpart D—Unauthorized Uses

1002.31 Unauthorized uses of the seal and flag.

AUTHORITY: 42 U.S.C. 7264.

SOURCE: 43 FR 20782, May 15, 1978, unless otherwise noted.

Subpart A—General

§ 1002.1 Purpose.

The purpose of this part is to describe the official seal and distinguishing flag of the Department of Energy, and to prescribe rules for their custody and use.

§ 1002.2 Definitions.

For purposes of this part—

(a) *DOE* means all organizational units of the Department of Energy.

(b) *Embossing seal* means a display of the form and content of the official seal made on a die so that the seal can be embossed on paper or other medium.

(c) *Official seal* means the original(s) of the seal showing the exact form, content, and colors thereof.

(d) *Replica* means a copy of the official seal displaying the identical form, content, and colors thereof.

(e) *Reproduction* means a copy of the official seal displaying the form and content thereof, reproduced in only one color.

(f) *Secretary* means the Secretary of DOE.

§ 1002.3 Custody of official seal and distinguishing flags.

The Secretary or his designee shall:

(a) Have custody of:

(1) The official seal and prototypes thereof, and masters, molds, dies, and all other means of producing replicas, reproductions, and embossing seals; and

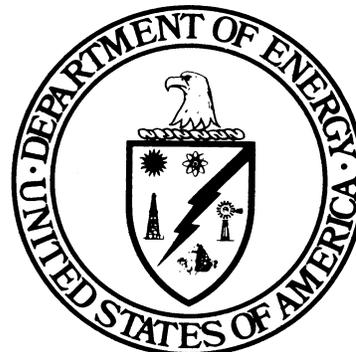

(2) Production, inventory and loan records relating to items specified in paragraph (a)(1) of this section; and

(b) Have custody of distinguishing flags, and be responsible for production, inventory, and loan records thereof.

Subpart B—Official Seal

§ 1002.11 Description of official seal.

The Department of Energy hereby prescribes as its official seal, of which judicial notice shall be taken pursuant to section 654 of the Department of Energy Organization Act of 1977, 42 U.S.C. 7264, the imprint illustrated below and described as follows:

(a)(1) The official seal includes a green shield bisected by a gold-colored lightning bolt, on which is emblazoned a gold-colored symbolic sun, atom, oil derrick, windmill, and dynamo. It is

Department of Energy

§ 1002.12

crested by the white head of an eagle, atop a white rope. Both appear on a blue field surrounded by concentric circles in which the name of the agency, in gold, appears on a green background. Detailing is in black.

(2) The colors used in the configuration are dark green, dark blue, gold, black, and white.

(3) The eagle represents the care in planning and the purposefulness of efforts required to respond to the Nation's increasing demands for energy. The sun, atom, oil derrick, windmill, and dynamo serve as representative technologies whose enhanced development can help meet these demands. The rope represents the cohesiveness in the development of the technologies and their link to our future capabilities. The lightning bolt represents the power of the natural forces from which energy is derived and the Nation's challenge in harnessing the forces.

(4) The color scheme is derived from nature, symbolizing both the source of energy and the support of man's existence. The blue field represents air and water, green represents mineral resources and the earth itself, and gold represents the creation of energy in the release of natural forces. By invoking this symbolism, the color scheme represents the Nation's commitment to meet its energy needs in a manner consistent with the preservation of the natural environment.

§ 1002.12 Use of replicas, reproductions, and embossing seals.

(a) The Secretary and his designees are authorized to affix replicas, reproductions, and embossing seals to appropriate documents, certifications, and other material for all purposes as authorized by this section.

(b) Replicas may be used only for:

(1) Display in or adjacent to DOE facilities, in Department auditoriums, presentation rooms, hearing rooms, lobbies, and public document rooms.

(2) Offices of senior officials.

(3) Official DOE distinguishing flags, adopted and utilized pursuant to subpart C.

(4) Official awards, certificates, medals, and plaques.

(5) Motion picture film, video tape and other audiovisual media prepared by or for DOE and attributed thereto.

(6) Official prestige publications which represent the achievements or mission of DOE.

(7) Non-DOE facilities in connection with events and displays sponsored by DOE, and public appearances of the Secretary or other designated senior DOE Officials.

(8) For other such purposes as determined by the Director of the Office of Administrative Services.

(c) Reproductions may be used only on:

(1) DOE letterhead stationery.

(2) Official DOE identification cards and security credentials.

(3) Business cards for DOE employees.

(4) Official DOE signs.

(5) Official publications or graphics issued by and attributed to DOE, or joint statements of DOE with one or more Federal agencies, State or local governments, or foreign governments.

(6) Official awards, certificates, and medals.

(7) Motion picture film, video tape, and other audiovisual media prepared by or for DOE and attributed thereto.

(8) For other such purposes as determined by the Director of the Office of Administrative Services.

(d) Embossing seals may be used only on:

(1) DOE legal documents, including interagency or intergovernmental agreements, agreements with States, foreign patent applications, and similar documents.

(2) For other such purposes as determined by the General Counsel or the Director of Administration.

(e) Any person who uses the official seal, replicas, reproductions, or embossing seals in a manner inconsistent with this part shall be subject to the provisions of 18 U.S.C. 1017, providing penalties for the wrongful use of an official seal, and to other provisions of law as applicable.

(f) The official seal is being registered with the World Intellectual Property Organization through the U.S. Patent and Trademark Office.

§ 1002.21

10 CFR Ch. X (1–1–16 Edition)

Subpart C—Distinguishing Flag

Subpart D—Unauthorized Uses

§ 1002.21 Description of distinguishing flag.

§ 1002.31 Unauthorized uses of the seal and flag.

(a) The base or field of the flag shall be white, and a replica of the official seal shall appear on both sides thereof.

The official seal and distinguishing flag shall not be used except as authorized by the Director of Administration in connection with:

(b)(1) The indoor flag shall be of rayon banner, measure 44" on hoist by 56" on the fly, exclusive of heading and hems, and be fringed on three edges with yellow rayon fringe, 2½" wide.

- (a) Contractor-operated facilities.
- (b) Souvenir or novelty items.
- (c) Toys or commercial gifts or premiums.

(2) The outdoor flag shall be of heavy weight nylon, and measure either 3' on the hoist by 5' on the fly or 5' on the hoist by 8' on the fly, exclusive of heading and hems.

(d) Letterhead design, except on official Departmental stationery.

(c) Each flag shall be manufactured in accordance with U.S. Department of Defense Military Specification Mil-F-2692. The official seal shall be screen printed on both sides, and on each side, the lettering shall read from left to right. Headings shall be Type II in accordance with the Institute of Heraldry Drawing No. 5–1–45E.

(e) Matchbook covers, calendars, and similar items.

(f) Civilian clothing or equipment.
(g) Any article which may disparage the seal or flag or reflect unfavorably upon DOE.

§ 1002.22 Use of distinguishing flag.

(h) Any manner which implies Departmental endorsement of commercial products or services, or of the user's policies or activities.

(a) DOE distinguishing flags may be used only:

PART 1003—OFFICE OF HEARINGS AND APPEALS PROCEDURAL REGULATIONS

Subpart A—General Provisions

(1) In the offices of the Secretarial of-ficers, Chairman of the Federal Energy Regulatory Commission, and heads of field locations designated below:

- Sec.
- 1003.1 Purpose and scope.
- 1003.2 Definitions.
- 1003.3 Appearance before the OHA.
- 1003.4 Filing of documents.
- 1003.5 Computation of time.
- 1003.6 Extension of time.
- 1003.7 Service.
- 1003.8 Subpoenas, special report orders, oaths, witnesses.
- 1003.9 General filing requirements.
- 1003.10 Effective date of orders.
- 1003.11 Address for filing documents.
- 1003.12 Ratification of prior directives, orders and actions.
- 1003.13 Public reference room.
- 1003.14 Notice of proceedings.

- Power Administrations.
- Regional Offices.
- Operations Offices.
- Certain Field Offices and other locations as designated by the Director of Administration.

Subpart B—Exceptions

(2) At official DOE ceremonies.
(3) In Department auditoriums, official presentation rooms, hearing rooms, lobbies, public document rooms, and in non-DOE facilities in connection with events or displays sponsored by DOE, and public appearances of DOE officials.

- 1003.20 Purpose and scope.
- 1003.21 What to file.
- 1003.22 Where to file.
- 1003.23 Notice.
- 1003.24 Contents.
- 1003.25 OHA evaluation.
- 1003.26 Decision and Order.
- 1003.27 Appeal of exception order.

(4) On or in front of DOE installation buildings.

Subpart C—Appeals

(5) Other such purposes as determined by the Director of Administration.

- 1003.30 Purpose and scope.

Department of Energy

§ 1003.2

- 1003.31 Who may file.
- 1003.32 What to file.
- 1003.33 Where to file.
- 1003.34 Notice.
- 1003.35 Contents.
- 1003.36 OHA evaluation.
- 1003.37 Decision and Order.

Subpart D—Stays

- 1003.40 Purpose and scope.
- 1003.41 What to file.
- 1003.42 Where to file.
- 1003.43 Notice.
- 1003.44 Contents.
- 1003.45 OHA evaluation.
- 1003.46 Decision and Order.

Subpart E—Modification or Rescission

- 1003.50 Purpose and scope.
- 1003.51 What to file.
- 1003.52 Where to file.
- 1003.53 Notice.
- 1003.54 Contents.
- 1003.55 OHA evaluation.
- 1003.56 Decision and Order.

Subpart F—Conferences and Hearings

- 1003.60 Purpose and scope.
- 1003.61 Conferences.
- 1003.62 Hearings.

Subpart G—Private Grievances and Redress

- 1003.70 Purpose and scope.
- 1003.71 Who may file.
- 1003.72 What to file.
- 1003.73 Where to file.
- 1003.74 Notice.
- 1003.75 Contents.
- 1003.76 OHA evaluation of request.
- 1003.77 Decision and Order.

AUTHORITY: 15 U.S.C. 761 *et seq.*; 42 U.S.C. 7101 *et seq.*

SOURCE: 60 FR 15006, Mar. 21, 1995, unless otherwise noted.

Subpart A—General Provisions

§ 1003.1 Purpose and scope.

This part establishes the procedures to be utilized and identifies the sanctions that are available in most proceedings before the Office of Hearings and Appeals of the Department of Energy. These procedures provide standard rules of practice in a variety of informal adjudications when jurisdiction is vested in the Office of Hearings and Appeals. Any or all of the procedures contained in this part may be incor-

porated by reference in another DOE rule or regulation which invokes the adjudicatory authority of the Office of Hearings and Appeals. The procedures may also be made applicable at the direction of an appropriate DOE official if incorporated by reference in the delegation. These rules do not apply in instances in which DOE regulations themselves contain procedures governing OHA proceedings conducted under authority of those particular regulations. (E.g., 10 CFR part 708—DOE Contractor Employee Protection Program; 10 CFR part 710—Criteria and Procedures for Determining Eligibility for Access to Classified Matter or Special Nuclear Material.) These rules also do not apply to matters before the DOE Board of Contract Appeals or other procurement and financial assistance appeals boards, which are covered by their own rules.

[60 FR 15006, Mar. 21, 1995, as amended at 61 FR 35114, July 5, 1996]

§ 1003.2 Definitions.

(a) As used in this part:

Action means an order issued, or a rulemaking undertaken, by the DOE.

Aggrieved, with respect to a person, means adversely affected by an action of the DOE.

Conference means an informal meeting between the Office of Hearings and Appeals and any person aggrieved by an action of the DOE.

Director means the Director of the Office of Hearings and Appeals or duly authorized delegate.

DOE means the Department of Energy, created by the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*).

Duly authorized representative means a person who has been designated to appear before the Office of Hearings and Appeals in connection with a proceeding on behalf of a person interested in or aggrieved by an action of the DOE. Such appearance may consist of the submission of a written document, a personal appearance, verbal communication, or any other participation in the proceeding.

Exception means the waiver or modification of the requirements of a rule, regulation or other DOE action having the effect of a rule as defined by 5

§ 1003.3

10 CFR Ch. X (1–1–16 Edition)

U.S.C. 551(4) under a specific set of facts, pursuant to subpart B of this part.

Federal legal holiday means the first day of January, the third Monday of January, the third Monday of February, the last Monday of May, the fourth day of July, the first Monday of September, the second Monday of October, the eleventh day of November, the fourth Thursday of November, the twenty-fifth day of December, or any other calendar day designated as a holiday by federal statute or Executive order.

OHA means the Office of Hearings and Appeals of the Department of Energy.

Order means the whole or a part of a final disposition, whether affirmative, negative, injunctive, or declaratory in form, of DOE in a matter other than rulemaking but including licensing. This definition does not include internal DOE orders and directives issued by the Secretary of Energy or delegate in the management and administration of departmental elements and functions.

Person means any individual, firm, estate, trust, sole proprietorship, partnership, association, company, joint-venture, corporation, governmental unit or instrumentality thereof, or a charitable, educational or other institution, and includes any officer, director, owner or duly authorized representative thereof.

Proceeding means the process and activity, and any part thereof, instituted by the OHA, either on its own initiative or in response to an application, complaint, petition or request submitted by a person, that may lead to an action by the OHA.

SRO means a special report order issued pursuant to §1003.8(b) of this part.

(b) Throughout this part the use of a word or term in the singular shall include the plural, and the use of the male gender shall include the female gender.

§ 1003.3 Appearance before the OHA.

(a) A person may make an appearance, including personal appearances in the discretion of the OHA, and participate in any proceeding described in this part on his own behalf or by a duly

authorized representative. Any application, appeal, petition, or request filed by a duly authorized representative shall contain a statement by such person certifying that he is a duly authorized representative. Falsification of such certification will subject such person to the sanctions stated in 18 U.S.C. 1001.

(b) *Suspension and disqualification.* The OHA may deny, temporarily or permanently, the privilege of participating in proceedings, including oral presentation, to any individual who is found by the OHA—

(1) To have made false or misleading statements, either verbally or in writing;

(2) To have filed false or materially altered documents, affidavits or other writings;

(3) To lack the specific authority to represent the person seeking an OHA action; or

(4) To have engaged in or to be engaged in contumacious conduct that substantially disrupts a proceeding.

§ 1003.4 Filing of documents.

(a) Any document filed with the OHA must be addressed as required by §1003.11, and should conform to the requirements contained in §1003.9. All documents and exhibits submitted become part of an OHA file and will not be returned.

(b) A document submitted in connection with any proceeding transmitted by first class United States mail and properly addressed is considered to be filed upon mailing.

(c) Hand-delivered documents to be filed with the OHA shall be submitted to 950 L'Enfant Plaza, SW., Washington, DC, during normal business hours.

(d) Documents hand delivered or received electronically after regular business hours are deemed filed on the next regular business day.

[60 FR 15006, Mar. 21, 1995, as amended at 63 FR 58289, Oct. 30, 1998]

§ 1003.5 Computation of time.

(a) *Days.* (1) Except as provided in paragraph (b) of this section, in computing any period of time prescribed or allowed by these regulations or by an order of the OHA, the day of the act,

event, or default from which the designated period of time begins to run is not to be included. The last day of the period so computed is to be included unless it is a Saturday, Sunday, or federal legal holiday, in which event the period runs until the end of the next day that is not a Saturday, Sunday, or a federal legal holiday.

(2) Saturdays, Sundays and federal legal holidays shall be excluded from the computation of time when the period of time allowed or prescribed is 7 days or less.

(b) *Hours.* If the period of time prescribed in an order issued by the OHA is stated in hours rather than days, the period of time shall begin to run upon actual notice of such order, whether by verbal or written communication, to the person directly affected, and shall run without interruption, unless otherwise provided in the order, or unless the order is stayed, modified, suspended or rescinded. When a written order is transmitted by verbal communication, the written order shall be served as soon thereafter as is feasible.

(c) *Additional time after service by mail.* Whenever a person is required to perform an act, to cease and desist therefrom, or to initiate a proceeding under this part within a prescribed period of time after issuance to such person of an order, notice or other document and the order, notice or other document is served solely by mail, 3 days shall be added to the prescribed period.

§ 1003.6 Extension of time.

When a document is required to be filed within a prescribed time, an extension of time to file may be granted by the OHA upon good cause shown.

§ 1003.7 Service.

(a) All documents required to be served under this part shall be served personally or by first class United States mail, except as otherwise provided.

(b) Service upon a person's duly authorized representative shall constitute service upon that person.

(c) Official United States Postal Service receipts from certified mailing shall constitute evidence of service.

§ 1003.8 Subpoenas, special report orders, oaths, witnesses.

(a) In accordance with the provisions of this section and as otherwise authorized by law, the Director may sign, issue and serve subpoenas; administer oaths and affirmations; take sworn testimony; compel attendance of and sequester witnesses; control dissemination of any record of testimony taken pursuant to this section; subpoena and reproduce books, papers, correspondence, memoranda, contracts, agreements, or other relevant records or tangible evidence including, but not limited to, information retained in computerized or other automated systems in possession of the subpoenaed person.

(b) The Director may issue a Special Report Order requiring any person subject to the jurisdiction of the OHA to file a special report providing information relating to the OHA proceeding, including but not limited to written answers to specific questions. The SRO may be in addition to any other reports required.

(c) The Director, for good cause shown, may extend the time prescribed for compliance with the subpoena or SRO and negotiate and approve the terms of satisfactory compliance.

(d) Prior to the time specified for compliance, but in no event more than 10 days after the date of service of the subpoena or SRO, the person upon whom the document was served may file a request for review of the subpoena or SRO with the Director. The Director then shall provide notice of receipt to the person requesting review, may extend the time prescribed for compliance with the subpoena or SRO, and may negotiate and approve the terms of satisfactory compliance.

(e) If the subpoena or SRO is not modified or rescinded within 10 days of the date of the Director's notice of receipt:

(1) The subpoena or SRO shall be effective as issued; and

(2) The person upon whom the document was served shall comply with the subpoena or SRO within 20 days of the date of the Director's notice of receipt, unless otherwise notified in writing by the Director.

§ 1003.8

10 CFR Ch. X (1-1-16 Edition)

(f) There is no administrative appeal of a subpoena or SRO.

(g) A subpoena or SRO shall be served upon a person named in the document by delivering a copy of the document to the person named.

(h) Delivery of a copy of a subpoena or SRO to a natural person may be made by:

(1) Handing it to the person;

(2) Leaving it at the person's office with the person in charge of the office;

(3) Leaving it at the person's dwelling or usual place of abode with a person of suitable age and discretion who resides there;

(4) Mailing it to the person by certified mail, at his last known address; or

(5) Any method that provides the person with actual notice prior to the return date of the document.

(i) Delivery of a copy of a subpoena or SRO to a person who is not a natural person may be made by:

(1) Handing it to a registered agent of the person;

(2) Handing it to any officer, director, or agent in charge of any office of such person;

(3) Mailing it to the last known address of any registered agent, officer, director, or agent in charge of any office of the person by certified mail; or

(4) Any method that provides any registered agent, officer, director, or agent in charge of any office of the person with actual notice of the document prior to the return date of the document.

(j) A witness subpoenaed by the OHA may be paid the same fees and mileage as paid to a witness in the district courts of the United States.

(k) If in the course of a proceeding a subpoena is issued at the request of a person other than an officer or agency of the United States, the witness fees and mileage shall be paid by the person who requested the subpoena. However, at the request of the person, the witness fees and mileage may be paid by the OHA if the person shows:

(1) The presence of the subpoenaed witness will materially advance the proceeding; and

(2) The person who requested that the subpoena be issued would suffer a seri-

ous hardship if required to pay the witness fees and mileage.

(1) If any person upon whom a subpoena or SRO is served pursuant to this section refuses or fails to comply with any provision of the subpoena or SRO, an action may be commenced in the appropriate United States District Court to enforce the subpoena or SRO.

(m) Documents produced in response to a subpoena shall be accompanied by the sworn certification, under penalty of perjury, of the person to whom the subpoena was directed or his authorized agent that:

(1) A diligent search has been made for each document responsive to the subpoena; and

(2) To the best of his knowledge, information, and belief each document responsive to the subpoena is being produced.

(n) Any information furnished in response to an SRO shall be accompanied by the sworn certification, under penalty of perjury, of the person to whom it was directed or his authorized agent who actually provides the information that:

(1) A diligent effort has been made to provide all information required by the SRO; and

(2) All information furnished is true, complete, and correct.

(o) If any document responsive to a subpoena is not produced or any information required by an SRO is not furnished, the certification shall include a statement setting forth every reason for failing to comply with the subpoena or SRO. If a person to whom a subpoena or SRO is directed withholds any document or information because of a claim of attorney-client or other privilege, the person submitting the certification required by paragraph (m) or (n) of this section also shall submit a written list of the documents or the information withheld indicating a description of each document or information, the date of the document, each person shown on the document as having received a copy of the document, each person shown on the document as having prepared or been sent the document, the privilege relied upon as the basis for withholding the document or information, and an identification of

the person whose privilege is being asserted.

(p) If testimony is taken pursuant to a subpoena, the Director shall determine whether the testimony shall be recorded and the means by which the testimony is recorded.

(q) A witness whose testimony is recorded may procure a copy of his testimony by making a written request for a copy and paying the appropriate fees. However, the Director may deny the request for good cause. Upon proper identification, any witness or his attorney has the right to inspect the official transcript of the witness' own testimony.

(r) The Director may sequester any person subpoenaed to furnish documents or give testimony. Unless permitted by the Director, neither a witness nor his attorney shall be present during the examination of any other witnesses.

(s) A witness whose testimony is taken may be accompanied, represented and advised by his attorney as follows:

(1) Upon the initiative of the attorney or witness, the attorney may advise his client, in confidence, with respect to the question asked his client, and if the witness refuses to answer any question, the witness or his attorney is required to briefly state the legal grounds for such refusal; and

(2) If the witness claims a privilege to refuse to answer a question on the grounds of self-incrimination, the witness must assert the privilege personally.

(t) The Director shall take all necessary action to regulate the course of testimony and to avoid delay and prevent or restrain contemptuous or obstructionist conduct or contemptuous language. OHA may take actions as the circumstances may warrant in regard to any instances where any attorney refuses to comply with directions or provisions of this section.

§ 1003.9 General filing requirements.

(a) *Purpose and scope.* The provisions of this section shall apply to all documents required or permitted to be filed with the OHA. One copy of each document must be filed with the original, except as provided in paragraph (f) of

this section. A telefax filing of a document will be accepted only if immediately followed by the filing by mail or hand-delivery of the original document.

(b) *Signing.* Any document that is required to be signed, shall be signed by the person filing the document. Any document filed by a duly authorized representative shall contain a statement by such person certifying that he is a duly authorized representative. (A false certification is unlawful under the provisions of 18 U.S.C. 1001.) The signature by the person or duly authorized representative constitutes a certificate by the signer that the signer has read the document and that to the best of the signer's knowledge, information and belief formed after reasonable inquiry, the document is well grounded in fact, warranted under existing law, and submitted in good faith and not for any improper purpose such as to harass or to cause unnecessary delay. If a document is signed in violation of this section, OHA may impose the sanctions specified in section 1003.3 and other sanctions determined to be appropriate.

(c) *Labeling.* An application, petition, or other request for action by the OHA should be clearly labeled according to the nature of the action involved both on the document and on the outside of the envelope in which the document is transmitted.

(d) *Obligation to supply information.* A person who files an application, petition, appeal or other request for action is under a continuing obligation during the proceeding to provide the OHA with any new or newly discovered information that is relevant to that proceeding. Such information includes, but is not limited to, information regarding any other application, petition, appeal or request for action that is subsequently filed by that person with any DOE office.

(e) *The same or related matters.* A person who files an application, petition, appeal or other request for action by the OHA shall state whether, to the best knowledge of that person, the same or related issue, act or transaction has been or presently is being considered or investigated by any other

§ 1003.10

DOE office, other federal agency, department or instrumentality; or by a state or municipal agency or court; or by any law enforcement agency, including, but not limited to, a consideration or investigation in connection with any proceeding described in this part. In addition, the person shall state whether contact has been made by the person or one acting on his behalf with any person who is employed by the DOE with regard to the same issue, act or transaction or a related issue, act or transaction arising out of the same factual situation; the name of the person contacted; whether the contact was verbal or in writing; the nature and substance of the contact; and the date or dates of the contact.

(f) *Request for confidential treatment.*

(1) If any person filing a document with the OHA claims that some or all of the information contained in the document is exempt from the mandatory public disclosure requirements of the Freedom of Information Act (5 U.S.C. 552), is information referred to in 18 U.S.C. 1905, or is otherwise exempt by law from public disclosure, and if such person requests the OHA not to disclose such information, such person shall file together with the document two copies of the document from which has been deleted the information for which such person wishes to claim confidential treatment. The person shall indicate in the original document that it is confidential or contains confidential information and must file a statement specifying the justification for non-disclosure of the information for which confidential treatment is claimed. If the person states that the information comes within the exception codified at 5 U.S.C. 552(b)(4) for trade secrets and commercial or financial information, such person shall include a statement specifying why such information is privileged or confidential. If the person filing a document does not submit two copies of the document with the confidential information deleted, the OHA may assume that there is no objection to public disclosure of the document in its entirety.

(2) The OHA retains the right to make its own determination with regard to any claim of confidentiality, under criteria specified in 10 CFR

10 CFR Ch. X (1-1-16 Edition)

1004.11. Notice of the decision by the OHA to deny such claim, in whole or in part, and an opportunity to respond shall be given to a person claiming confidentiality of information no less than five days prior to its public disclosure.

(g) Each application, petition or request for OHA action shall be submitted as a separate document, even if the applications, petitions, or requests deal with the same or a related issue, act or transaction, or are submitted in connection with the same proceeding.

§ 1003.10 Effective date of orders.

Any order issued by the OHA under this part is effective as against all persons having actual or constructive notice thereof upon issuance, in accordance with its terms, unless and until it is stayed, modified, suspended, or rescinded. An order is deemed to be issued on the date, as specified in the order, on which it is signed by the Director of the OHA or his designee, unless the order provides otherwise.

§ 1003.11 Address for filing documents.

All applications, requests, petitions, appeals, written communications and other documents to be submitted to or filed with the OHA, as provided in this part or otherwise, shall be addressed to the Office of Hearings and Appeals, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585-0107. The OHA has facilities for the receipt of transmissions via FAX, at FAX Number (202) 426-1415.

[60 FR 15006, Mar. 21, 1995, as amended at 63 FR 58289, Oct. 30, 1998]

§ 1003.12 Ratification of prior directives, orders and actions.

All orders and other directives issued, all proceedings initiated, and all other actions taken in accordance with 10 CFR part 205 prior to the effective date of this part, are hereby confirmed and ratified, and shall remain in full force and effect as if issued under this part, unless or until they are altered, amended, modified or rescinded in accordance with the provisions of this part.

Department of Energy

§ 1003.23

§ 1003.13 Public reference room.

A public reference room shall be maintained at the OHA, 950 L'Enfant Plaza, S.W., Washington, DC. In this room, the following information shall be made available for public inspection and copying, during normal business hours:

(a) A list of all persons who have applied for an exception, or filed an appeal or petition, and a digest of each application;

(b) Each Decision and Order, with confidential information deleted, issued in response to an application for an exception, petition or other request, or at the conclusion of an appeal; and

(c) Any other information in the possession of OHA which is required by statute to be made available for public inspection and copying, and any other information that the OHA determines should be made available to the public.

[60 FR 15006, Mar. 21, 1995, as amended at 63 FR 58289, Oct. 30, 1998]

§ 1003.14 Notice of proceedings.

At regular intervals, the OHA shall publish on its Internet World Wide Web site, a digest of the applications, appeals, petitions and other requests filed, and a summary of the Decisions and Orders issued by the OHA, pursuant to proceedings conducted under this part. The OHA's web site is located at <http://www.oha.doe.gov>.

[60 FR 15006, Mar. 21, 1995, as amended at 63 FR 58289, Oct. 30, 1998]

Subpart B—Exceptions

§ 1003.20 Purpose and scope.

(a) This subpart establishes the procedures for applying for an exception or exemption, as provided for in section 504 (42 U.S.C. 7194) of the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*), from a rule, regulation or DOE action having the effect of a rule as defined by 5 U.S.C. 551(4), based on an assertion of serious hardship, gross inequity or unfair distribution of burdens, and for consideration of such application by the OHA. The procedures contained in this subpart may be incorporated by reference in another DOE rule or regulation which invokes the adjudicatory authority of the Office of

Hearings and Appeals. The procedures may also be made applicable to proceedings undertaken at the direction of an appropriate DOE official if incorporated by reference in the delegation.

(b) The filing of an application for an exception shall not constitute grounds for noncompliance with the requirements from which an exception is sought, unless a stay has been issued in accordance with subpart D of this part.

[60 FR 15006, Mar. 21, 1995, as amended at 61 FR 35114, July 5, 1996]

§ 1003.21 What to file.

A person seeking relief under this subpart shall file an "Application for Exception," which should be clearly labeled as such both on the application and on the outside of the envelope in which the application is transmitted, and shall be in writing. The general filing requirements stated in §1003.9 shall be complied with in addition to the requirements stated in this subpart.

§ 1003.22 Where to file.

All applications for exception shall be filed with the OHA at the address provided in §1003.11.

§ 1003.23 Notice.

(a) The applicant shall send by United States mail a copy of the application and any subsequent amendments or other documents relating to the application, or a copy from which confidential information has been deleted in accordance with §1003.9(f), to each person who is reasonably ascertainable by the applicant as a person who would be aggrieved by the OHA action sought. The copy of the application shall be accompanied by a statement that the person may submit comments regarding the application within 10 days. The application filed with the OHA shall include certification to the OHA that the applicant has complied with the requirements of this paragraph and shall include the names and addresses of each person to whom a copy of the application was sent.

(b) Notwithstanding the provision of paragraph (a) of this section, if an applicant determines that compliance with paragraph (a) of this section would be impracticable, the applicant shall:

§ 1003.24

(1) Comply with the requirements of paragraph (a) of this section with regard to those persons whom it is reasonable and practicable to notify; and

(2) Include with the application a description of the persons or class or classes of persons to whom notice was sent. The OHA may require the applicant to provide additional or alternative notice, may determine that the notice required by paragraph (a) of this section is not impracticable, or may determine that notice should be published in the FEDERAL REGISTER.

(c) The OHA shall serve notice on any other person readily identified by the OHA as one who would be aggrieved by the OHA action sought and may serve notice on any other person that written comments regarding the application will be accepted if filed within 10 days of service of such notice.

(d) Any person submitting written comments to the OHA with respect to an application filed under this subpart shall send a copy of the comments, or a copy from which confidential information has been deleted in accordance with §1003.9(f), to the applicant. The person shall certify to the OHA that he has complied with the requirements of this paragraph. The OHA may notify other persons participating in the proceeding of such comments and provide an opportunity for such persons to respond.

§ 1003.24 Contents.

(a) The application shall contain a full and complete statement of all relevant facts pertaining to the circumstances, act or transaction that is the subject of the application and to the OHA action sought. Such facts shall include the names and addresses of all affected persons (if reasonably ascertainable); a complete statement of the business or other reasons that justify the act or transaction; a description of the acts or transactions that would be affected by the requested OHA action; and a full discussion of the pertinent provisions and relevant facts contained in the documents submitted with the application. Copies of all relevant contracts, agreements, leases, instruments, and other documents shall be submitted with the application.

10 CFR Ch. X (1-1-16 Edition)

(b) The applicant shall state whether he requests or intends to request that there be a conference or hearing regarding the application. Any request not made at the time the application is filed shall be made as soon thereafter as possible. The request and the OHA determination on the request shall be made in accordance with subpart F of this part.

(c) The application shall include a discussion of all relevant authorities, including, but not limited to, DOE rules, regulations, and decisions on appeals and exceptions relied upon to support the particular action sought therein.

(d) The application shall specify the exact nature and extent of the relief requested.

§ 1003.25 OHA evaluation.

(a)(1) OHA may initiate an investigation of any statement in an application and utilize in its evaluation any relevant facts obtained by such investigation. The OHA may solicit and accept submissions from third persons relevant to any application provided that the applicant is afforded an opportunity to respond to all third person submissions. In evaluating an application, the OHA may consider any other source of information. The OHA on its own initiative may convene a hearing or conference, if, in its discretion, it considers that such hearing or conference will advance its evaluation of the application. The OHA may issue appropriate orders as warranted in the proceeding.

(2) If the OHA determines that there is insufficient information upon which to base a decision and if upon request additional information is not submitted by the applicant, the OHA may dismiss the application without prejudice. If the failure to supply additional information is repeated or willful, the OHA may dismiss the application with prejudice. If the applicant fails to provide the notice required by §1003.23, the OHA may dismiss the application without prejudice.

(b)(1) The OHA shall consider an application for an exception only when it determines that a more appropriate proceeding is not provided by DOE regulations.

Department of Energy

§ 1003.34

(2) An application for an exception may be granted to alleviate or prevent serious hardship, gross inequity or unfair distribution of burdens.

(3) An application for an exception shall be decided in a manner that is, to the extent possible, consistent with the disposition of previous applications for exception.

§ 1003.26 Decision and Order.

(a) Upon consideration of the application and other relevant information received or obtained during the proceeding, the OHA shall issue an order granting or denying the application, in whole or in part.

(b) The Decision and Order shall include a written statement setting forth the relevant facts and the legal basis of the order. The Decision and Order shall provide that any person aggrieved thereby may file an appeal in accordance with §1003.27.

(c) The OHA shall serve a copy of the Decision and Order upon the applicant, any other person who participated in the proceeding, and upon any other person readily identifiable by the OHA as one who is aggrieved by such Decision and Order.

§ 1003.27 Appeal of exception order.

(a) Except as provided in paragraph (b) of this section, any person aggrieved by an order issued by the OHA under this subpart may file an appeal with the OHA in accordance with subpart C of this part. Any appeal filed under this paragraph must be filed within 30 days of service, or constructive service under §1003.14, of the order from which the appeal is taken.

(b) Any person aggrieved or adversely affected by the denial of a request for exception relief filed pursuant to §504 of the Department of Energy Organization Act (42 U.S.C. 7194) may appeal to the Federal Energy Regulatory Commission, in accordance with the Commission's regulations.

Subpart C—Appeals

§ 1003.30 Purpose and scope.

This subpart establishes the procedures for the filing of an administrative appeal of a DOE order and for the consideration of the appeal by the Of-

fice of Hearings and Appeals. Unless a program rule or regulation or a DOE delegation of authority provides otherwise, a person aggrieved by a DOE order appealable under this subpart has not exhausted his or her administrative remedies until an appeal has been filed under this subpart and an order granting or denying the appeal has been issued. A person filing an appeal must also file an "Application for Stay" under subpart D of this part if the grant of a stay is necessary under Section 10(c) of the Administrative Procedure Act (5 U.S.C. 704) to preclude judicial review pending final action on the appeal.

§ 1003.31 Who may file.

Any person may file an appeal under this subpart who is so authorized by §1003.27, a program rule or regulation, or a DOE delegation of authority.

§ 1003.32 What to file.

A person filing under this subpart shall file an "Appeal of Order" which should be clearly labeled as such both on the appeal and on the outside of the envelope in which the appeal is transmitted, and shall be in writing. The general filing requirements stated in §1003.9 shall be complied with in addition to the requirements stated in this subpart.

§ 1003.33 Where to file.

The appeal shall be filed with the OHA at the address provided in §1003.11.

§ 1003.34 Notice.

(a) The appellant shall send by United States mail a copy of the appeal and any subsequent amendments or other documents relating to the appeal, or a copy from which confidential information has been deleted in accordance with §1003.9(f), to each person who is reasonably ascertainable by the appellant as a person who would be aggrieved by the OHA action sought, including those who participated in the process that led to the issuance of the order from which the appeal has been taken. The copy of the appeal shall be accompanied by a statement that the person may submit comments regarding the appeal to the OHA within 10

§ 1003.35

days. The appeal filed with the OHA shall include certification to the OHA that the appellant has complied with the requirements of this paragraph and shall include the names and addresses of each person to whom a copy of the appeal was sent.

(b) Notwithstanding the provisions of paragraph (a) of this section, if any appellant determines that compliance with paragraph (a) of this section would be impracticable, the appellant shall:

(1) Comply with the requirements of paragraph (a) of this section with regard to those persons whom it is reasonable and possible to notify; and

(2) Include with the appeal a description of the persons or class or classes of persons to whom notice was not sent. The OHA may require the appellant to provide additional or alternative notice, may determine that the notice required by paragraph (a) of this section is not impracticable, or may determine that notice should be published in the FEDERAL REGISTER.

(c) The OHA shall serve notice on any other person readily identifiable by the OHA as one who would be aggrieved by the OHA action sought and may serve notice on any other person that written comments regarding the appeal will be accepted if filed within 10 days of the service of that notice.

(d) Any person submitting written comments to the OHA with respect to an appeal filed under this subpart shall send a copy of the comments, or a copy from which confidential information has been deleted in accordance with §1003.9(f), to the appellant. The person shall certify to the OHA that he has complied with the requirements of this paragraph. The OHA may notify other persons participating in the proceeding of such comments and provide an opportunity for such persons to respond.

§ 1003.35 Contents.

(a) The appeal shall contain a concise statement of grounds upon which it is brought and a description of the relief sought. It shall include a discussion of all relevant authorities, including, but not limited to, DOE rules, regulations, and decisions on appeals and exceptions relied upon to support the appeal. If the appeal includes a request for re-

10 CFR Ch. X (1-1-16 Edition)

lief based on significantly changed circumstances, there shall be a complete description of the events, acts, or transactions that comprise the significantly changed circumstances, and the appellant shall state why, if the significantly changed circumstance is new or newly discovered facts, such facts were not or could not have been presented during the process that led to the issuance of the order from which the appeal has been taken. For purposes of this subpart, the term "significantly changed circumstances" shall mean—

(1) The discovery of material facts that were not known or could not have been known at the time of the process that led to the issuance of the order from which the appeal has been taken;

(2) The discovery of a law, rule, regulation, order or decision on an appeal or any exception that was in effect at the time of the process that led to the issuance of the order from which the appeal has been taken, and which, if such had been made known to DOE, would have been relevant and would have substantially altered the outcome; or

(3) A substantial change in the facts or circumstances upon which an outstanding and continuing order affecting the appellant was issued, which change has occurred during the interval between issuance of the order and the date of the appeal and was caused by forces or circumstances beyond the control of the appellant.

(b) A copy of the order that is the subject of the appeal shall be submitted with the appeal.

(c) The appellant shall state whether he requests or intends to request that there be a conference or hearing regarding the appeal. Any request not made at the time the appeal is filed shall be made as soon thereafter as possible. The request and the OHA determination on the request shall be made in accordance with subpart F of this part.

§ 1003.36 OHA evaluation.

(a)(1) The OHA may initiate an investigation of any statement in an appeal and utilize in its evaluation any relevant facts obtained by such investigation. The OHA may solicit and accept

submissions from third persons relevant to any appeal provided that the appellant is afforded an opportunity to respond to all third person submissions. In evaluating an appeal, the OHA may consider any other source of information. The OHA on its own initiative may convene a conference or hearing if, in its discretion, it considers that such conference or hearing will advance its evaluation of the appeal.

(2) If the OHA determines that there is insufficient information upon which to base a decision and if, upon request, the necessary additional information is not submitted, the OHA may dismiss the appeal with leave to refile within a specified time. If the failure to supply additional information is repeated or willful, the OHA may dismiss the appeal with prejudice. If the appellant fails to provide the notice required by §1003.34, the OHA may dismiss the appeal without prejudice.

(b) The OHA may issue an order summarily denying the appeal if—

(1) It is not filed in a timely manner, unless good cause is shown; or

(2) It is defective on its face for failure to state, and to present facts and legal argument in support thereof, that the DOE action was erroneous in fact or in law, or that it was arbitrary or capricious.

(c) The OHA may deny any appeal if the appellant does not establish that—

(1) The appeal was filed by a person aggrieved by a DOE action;

(2) The DOE's action was erroneous in fact or in law; or

(3) The DOE's action was arbitrary or capricious.

§ 1003.37 Decision and Order.

(a) Upon consideration of the appeal and other relevant information received or obtained during the proceeding, the OHA shall enter an appropriate order, which may include the modification of the order that is the subject of the appeal.

(b) The Decision and Order shall include a written statement setting forth the relevant facts and the legal basis of the Decision and Order. The Decision and Order shall state that it is a final order of the DOE of which the appellant may seek judicial review.

(c) The OHA shall serve a copy of the Decision and Order upon the appellant, any other person who participated in the proceeding, and upon any other person readily identifiable by the OHA as one who is aggrieved by such Decision and Order.

Subpart D—Stays

§ 1003.40 Purpose and scope.

(a) This subpart establishes the procedures for applying for a stay. It also specifies the nature of the relief which may be effectuated through the approval of a stay.

(b) An application for a stay will be considered if it is incident to a submission over which OHA has jurisdiction. An application for stay may also be considered if the stay is requested pending judicial review of an order issued by the OHA.

(c) All applicable DOE rules, regulations, orders, and generally applicable requirements shall be complied with unless and until an application for a stay is granted.

§ 1003.41 What to file.

A person filing under this subpart shall file an "Application for Stay" which should be clearly labeled as such both on the application and on the outside of the envelope in which the application is transmitted. The application shall be in writing. The general filing requirements stated in §1003.9 shall be complied with in addition to the requirements stated in this subpart.

§ 1003.42 Where to file.

An Application for Stay shall be filed with the OHA at the address provided in §1003.11.

§ 1003.43 Notice.

(a) An applicant for stay shall notify each person readily identifiable as one who will be directly aggrieved by the OHA action sought that it has filed an Application for Stay. The applicant shall serve the application on each identified person and shall notify each such person that the OHA will receive and endeavor to consider, subject to

§ 1003.44

time constraints imposed by the urgency of the proceeding, written comments on the application that are submitted immediately.

(b) Any person submitting written comments to the OHA with respect to an application filed under this subpart shall send a copy of the comments, or a copy from which confidential information has been deleted in accordance with §1003.9(f), to the applicant. The person shall certify to the OHA that he has complied with the requirements of this paragraph. The OHA may notify other persons participating in the proceeding of such comments and provide an opportunity for such persons to respond.

(c) The OHA shall require the applicant to take reasonable measures depending on the circumstances and urgency of the case to notify each person readily identified as one that would be directly aggrieved by the OHA action sought of the date, time and place of any hearing or other proceedings in the matter. However, if the Director of the OHA concludes that the circumstances presented by the applicant justify immediate action, the OHA may issue a Decision on the Application for Stay prior to receipt of written comments or the oral presentation of views by adversely affected parties.

§ 1003.44 Contents.

(a) An Application for Stay shall contain a full and complete statement of all relevant facts pertaining to the act or transaction that is the subject of the application and to the OHA action sought. Such facts shall include, but not be limited to, all information that relates to satisfaction of the criteria in §1003.45(b).

(b) The application shall include a description of the proceeding incident to which the stay is being sought. This description shall contain a discussion of all DOE actions relevant to the proceeding.

(c) The applicant shall state whether he requests that a conference or hearing be convened regarding the application, as provided in subpart F of this part.

10 CFR Ch. X (1-1-16 Edition)

§ 1003.45 OHA evaluation.

(a)(1) The OHA may initiate an investigation of any statement in an application and utilize in its evaluation any relevant facts obtained by such investigation. The OHA may order the submission of additional information, and may solicit and accept submissions from third persons relevant to an application provided that the applicant is afforded an opportunity to respond to all third person submissions. In evaluating an application, the OHA may also consider any other source of information, and may conduct hearings or conferences either in response to requests by parties in the proceeding or on its own initiative.

(2) If the OHA determines that there is insufficient information upon which to base a decision and if upon request additional information is not submitted by the applicant, the OHA may dismiss the application without prejudice. If the failure to supply additional information is repeated or willful, the OHA may dismiss the application with prejudice.

(3) The OHA shall process applications for stay as expeditiously as possible. When administratively feasible, the OHA shall grant or deny an Application for Stay within 10 business days after receipt of the application.

(4) Notwithstanding any other provision of the DOE regulations, the OHA may make a decision on any Application for Stay prior to the receipt of written comments.

(b) The criteria to be considered and weighed by the OHA in determining whether a stay should be granted are:

(1) Whether a showing has been made that an irreparable injury will result in the event that the stay is denied;

(2) Whether a showing has been made that a denial of the stay will result in a more immediate hardship or inequity to the applicant than a grant of the stay would cause to other persons affected by the proceeding;

(3) Whether a showing has been made that it would be desirable for public policy reasons to grant immediate relief pending a decision by OHA on the merits;

(4) Whether a showing has been made that it is impossible for the applicant

Department of Energy

§ 1003.53

to fulfill the requirements of an outstanding order or regulatory provision; and

(5) Whether a showing has been made that there is a strong likelihood of success on the merits.

§ 1003.46 Decision and Order.

(a) In reaching a decision with respect to an Application for Stay, the OHA shall consider all relevant information in the record. An Application for Stay may be decided by the issuance of an order either during the course of a hearing or conference in which an official transcript is maintained or in a separate written Decision and Order. Any such order shall include a statement of the relevant facts and the legal basis of the decision. The approval or denial of a stay is not an order of the OHA that is subject to administrative or judicial review.

(b) In its discretion and upon a determination that it would be desirable to do so in order to further the objectives stated in the regulations or in the statutes the DOE is responsible for administering, the OHA may order a stay on its own initiative.

Subpart E—Modification or Rescission

§ 1003.50 Purpose and scope.

This subpart establishes the procedures for the filing of an application for modification or rescission of a DOE order. An application for modification or rescission is a summary proceeding that will be initiated only if the criteria described in §1003.55(b) are satisfied.

§ 1003.51 What to file.

A person filing under this subpart shall file an “Application for Modification (or Rescission),” which should be clearly labeled as such both on the application and on the outside of the envelope in which the application is transmitted, and shall be in writing. The general filing requirements stated in §1003.9 shall be complied with in addition to the requirements stated in this subpart.

§ 1003.52 Where to file.

The application shall be filed with the OHA at the address provided in §1003.11.

§ 1003.53 Notice.

(a) The applicant shall send by United States mail a copy of the application and any subsequent amendments or other documents relating to the application, from which confidential information has been deleted in accordance with §1003.9(f), to each person who is reasonably ascertainable by the applicant as a person who would be aggrieved by the OHA action sought, including persons who participated in the process that led to the issuance of the order for which the modification or rescission is sought. The copy of the application shall be accompanied by a statement that the person may submit comments regarding the application to the OHA within 10 days. The application filed with the OHA shall include certification to the OHA that the applicant has complied with the requirements of this paragraph and shall include the names and addresses of all persons to whom a copy of the application was sent.

(b) If an applicant determines that compliance with paragraph (a) of this section would be impracticable, the applicant shall:

(1) Comply with the requirements of paragraph (a) of this section with regard to those persons whom it is reasonable and possible to notify; and

(2) Include with the application a description of the persons or class or classes of persons to whom notice was not sent. The OHA may require the applicant to provide additional or alternative notice, may determine that the notice required by paragraph (a) of this section is not impracticable, or may determine that notice should be published in the FEDERAL REGISTER.

(c) The OHA shall serve notice on any other person readily identifiable by the OHA as one who would be aggrieved by the OHA action sought and may serve notice on any other person that written comments regarding the application will be accepted if filed within 10 days of service of that notice.

(d) Any person submitting written comments to the OHA with respect to

§ 1003.54

an application filed under this subpart shall send a copy of the comments, or a copy from which confidential information has been deleted in accordance with §1003.9(f), to the applicant. The person shall certify to the OHA that he has complied with the requirement of this paragraph. The OHA may notify other persons participating in the proceeding of such comments and provide an opportunity for such persons to respond.

§ 1003.54 Contents.

(a) The application shall contain a full and complete statement of all relevant facts pertaining to the circumstances, act or transaction that is the subject of the application and to the OHA action sought. Such facts shall include the names and addresses of all affected persons (if reasonably ascertainable), a complete statement of the business or other reasons that justify the act or transaction, a description of the acts or transactions that would be affected by the requested action, and a full description of the pertinent provisions and relevant facts contained in any relevant documents. Copies of all contracts, agreements, leases, instruments, and other documents relevant to the application shall be submitted to the OHA upon its request. A copy of the order of which modification or rescission is sought shall be included with the application.

(b) The applicant shall state whether he requests or intends to request that there be a conference regarding the application. Any request not made at the time the application is filed shall be made as soon thereafter as possible. The request and the OHA determination on the request shall be made in accordance with subpart F of this part.

(c) The applicant shall fully describe the events, acts, or transactions that comprise the significantly changed circumstances, as defined in §1003.55(b)(2), upon which the application is based. The applicant shall state why, if the significantly changed circumstance is new or newly discovered facts, such facts were not or could not have been presented during the process that led to the issuance of the order for which modification or rescission is sought.

10 CFR Ch. X (1–1–16 Edition)

(d) The application shall include a discussion of all relevant authorities, including, but not limited to, DOE rules, regulations, and decisions on appeal and exceptions relied upon to support the action sought therein.

§ 1003.55 OHA evaluation.

(a)(1) The OHA may initiate an investigation of any statement in an application and utilize in its evaluation any relevant facts obtained by such investigation. The OHA may solicit and accept submissions from third persons relevant to any application for modification or rescission provided that the applicant is afforded an opportunity to respond to all third person submissions. In evaluating an application for modification or rescission, the OHA may convene a conference, on its own initiative, if, in its discretion, it considers that such conference will advance its evaluation of the application.

(2) If the OHA determines that there is insufficient information upon which to base a decision and if upon request the necessary additional information is not submitted, the OHA may dismiss the application without prejudice. If the failure to supply additional information is repeated or willful, the OHA may dismiss the application with prejudice. If the applicant fails to provide the notice required by §1003.53, the OHA may dismiss the application without prejudice.

(b)(1) An application for modification or rescission of an order shall be processed only if—

(i) The application demonstrates that it is based on significantly changed circumstances; and

(ii) The period within which a person may file an appeal has lapsed or, if an appeal has been filed, a final order has been issued.

(2) For purposes of this subpart, the term “significantly changed circumstances” shall mean—

(i) The discovery of material facts that were not known or could not have been known at the time of the proceeding and action upon which the application is based;

(ii) The discovery of a law, rule, regulation, order or decision on appeal or exception that was in effect at the time

of the proceeding upon which the application is based and which, if such had been made known to the OHA, would have been relevant to the proceeding and would have substantially altered the outcome; or

(iii) There has been a substantial change in the facts or circumstances upon which an outstanding and continuing order of the OHA affecting the applicant was issued, which change has occurred during the interval between issuance of such order and the date of the application and was caused by forces or circumstances beyond the control of the applicant.

§ 1003.56 Decision and Order.

(a) Upon consideration of the application and other relevant information received or obtained during the proceeding, the OHA shall issue a Decision and Order granting or denying the application.

(b) The Decision and Order shall include a written statement setting forth the relevant facts and the legal basis of the Decision and Order. When appropriate, the Decision and Order shall state that it is a final order of which the applicant may seek judicial review.

(c) The OHA shall serve a copy of the Decision and Order upon the applicant, any other person who participated in the proceeding and upon any other person readily identifiable by the OHA as one who is aggrieved by such Decision and Order.

Subpart F—Conferences and Hearings

§ 1003.60 Purpose and scope.

This subpart establishes the procedures for requesting and conducting an OHA conference or hearing. Such proceedings shall be convened in the discretion of the OHA, consistent with OHA requirements.

§ 1003.61 Conferences.

(a) The OHA in its discretion may direct that a conference be convened, on its own initiative or upon request by a person, when it appears that such conference will materially advance the proceeding. The determination as to who may attend a conference convened under this subpart shall be in the dis-

cretion of the OHA, but a conference will usually not be open to the public.

(b) A conference may be requested in connection with any proceeding of the OHA by any person who would be aggrieved by that proceeding. The request may be made in writing or verbally, but must include a specific showing as to why such conference will materially advance the proceeding. The request shall be addressed to the OHA, as provided in §1003.11.

(c) A conference may only be convened after actual notice of the time, place and nature of the conference is provided to the person who requested the conference.

(d) When a conference is convened in accordance with this section, each person may present views as to the issues involved. Documentary evidence may be presented at the conference, but will be treated as if submitted in the regular course of the proceeding. A transcript of the conference will not usually be prepared. However, the OHA in its discretion may have a verbatim transcript prepared.

(e) Because a conference is solely for the exchange of views incident to a proceeding, there will be no formal reports or findings unless the OHA in its discretion determines that such would be advisable.

§ 1003.62 Hearings.

(a) The OHA in its discretion may direct that a hearing be convened on its own initiative or upon request by a person, when it appears that such hearing will materially advance the proceeding. All hearings convened pursuant to this subpart shall be conducted by the Director of the OHA or his designee. The determination as to who may attend a hearing convened under this subpart shall be in the discretion of OHA. Hearings will be open to the public, but may be closed at the discretion of OHA if the reason is put in the record.

(b) A hearing may be requested by an applicant, appellant, or any other person who would be aggrieved by the OHA action sought. The request shall be in writing and shall include a specific showing as to why such hearing will materially advance the proceeding. The request shall be addressed

§ 1003.70

to the OHA at the address provided in § 1003.11.

(c) A hearing may be convened only after actual notice of the time, place, and nature of the hearing is provided both to the applicant or appellant and to any other person readily identifiable by the OHA as one who would be aggrieved by the OHA action involved. The notice shall include, as appropriate:

(1) A statement that such person may participate in the hearing; or

(2) A statement that such person may request a separate conference or hearing regarding the application or appeal.

(d) When a hearing is convened in accordance with this section, each person may present views as to the issue or issues involved. Documentary evidence may be presented at the hearing, but will be treated as if submitted in the regular course of the proceeding. A transcript of the hearing will be prepared.

(e) If material factual issues remain in dispute after an application or appeal has been filed, the Director of the OHA or his designee may issue an order convening an evidentiary hearing in which witnesses shall testify under oath, subject to cross-examination, for the record and in the presence of a Presiding Officer. A Motion for Evidentiary Hearing should specify the type of witness or witnesses whose testimony is sought, the scope of questioning that is anticipated, and the relevance of the questioning to the proceeding. A motion may be summarily denied for lack of sufficient specificity, because an evidentiary hearing would place an undue burden on another person or the DOE, or because an evidentiary hearing would cause undue delay.

(f) A Motion for Evidentiary Hearing must be served on any person from whom information is sought and on parties to the underlying administrative action. Any person who wishes to respond to a Motion for Evidentiary Hearing must do so within ten days of service.

(g) In reaching a decision with respect to a request for a hearing or motion filed under this subpart, the OHA shall consider all relevant information in the record. If an order is issued

10 CFR Ch. X (1–1–16 Edition)

granting a hearing or evidentiary hearing, in whole or in part, the order shall specify the parties, any limitations on the participation of a party, and the issues to be considered. An order of the OHA issued under this section is an interlocutory order which is subject to further administrative review or appeal only upon issuance of a final Decision and Order in the proceeding concerned.

(h) At any evidentiary hearing, the parties shall have the opportunity to present material evidence that directly relates to a particular issue set forth for hearing. The Presiding Officer may administer oaths or affirmations, rule on objections to the presentation of evidence, receive relevant material, require the advance submission of documents offered as evidence, dispose of procedural requests, determine the format of the hearing, modify any order granting a Motion for Evidentiary Hearing, direct that written motions, documents or briefs be filed with respect to issues raised during the course of the hearing, ask questions of witnesses, issue subpoenas, direct that documentary evidence be served upon other parties (under protective order if such evidence is deemed confidential) and otherwise regulate the conduct of the hearing.

Subpart G—Private Grievances and Redress

§ 1003.70 Purpose and scope.

The OHA shall receive and consider petitions that seek special redress relief or other extraordinary assistance as provided for in the Federal Energy Administration Act of 1974, Section 21 (15 U.S.C. 780), apart from or in addition to the other proceedings described in this part. This subpart may also apply if cross referenced in another DOE rule or regulation, or in a DOE delegation of authority. Petitions under this subpart shall include those seeking special assistance based on an assertion that DOE is not complying with its rules, regulations, or orders.

§ 1003.71 Who may file.

Any person may file a petition under this subpart who is adversely affected by any DOE rule, regulation or order

Department of Energy

§ 1003.76

subject to 15 U.S.C. 780 or who is so authorized by a program rule or regulation or a DOE delegation of authority.

§ 1003.72 What to file.

The person seeking relief under this subpart shall file a "Petition for Special Redress or Other Relief," which shall be clearly labeled as such both on the petition and on the outside of the envelope in which it is transmitted, and shall be in writing. The general filing requirements stated in §1003.9 shall be complied with in addition to the requirements stated in this subpart.

§ 1003.73 Where to file.

A petition shall be filed with the OHA at the address provided in §1003.11.

§ 1003.74 Notice.

(a) The person filing the petition, except a petition that asserts that the DOE is not complying with agency rules, regulations, or orders, shall send by United States mail a copy of the petition and any subsequent amendments or other documents relating to the petition, or a copy from which confidential information has been deleted in accordance with §1003.9(f), to each person who is reasonably ascertainable by the petitioner as a person who would be aggrieved by the OHA action sought. The copy of the petition shall be accompanied by a statement that the person may submit comments regarding the petition to the OHA within 10 days. The copy filed with the OHA shall include certification that the requirements of this paragraph have been complied with and shall include the names and addresses of each person to whom a copy of the petition was sent.

(b) Notwithstanding the provisions of paragraph (a) of this section, if the petitioner determines that compliance with paragraph (a) of this section would be impracticable, the petitioner shall:

(1) Comply with the requirements of paragraph (a) of this section with regard to those persons whom it is reasonable and practicable to notify; and

(2) Include with the petition a description of the persons or class or classes of persons to whom notice was not sent.

(3) The OHA may require the petitioner to provide additional or alternative notice, or may determine that the notice required by paragraph (a) of this section is not impracticable, or may determine that notice should be published in the FEDERAL REGISTER.

(c) The OHA shall serve notice on any other person readily identifiable by the OHA as one who would be aggrieved by the OHA action sought and may serve notice on any other person that written comments regarding the petition will be accepted if filed within 10 days of service of that notice.

(d) Any person submitting written comments to the OHA regarding a petition filed under his subpart shall send a copy of the comments, or a copy from which confidential information has been deleted in accordance with §1003.9(f), to the petitioner. The person shall certify to the OHA that he has complied with the requirements of this paragraph. The OHA may notify other persons participating in the proceeding of such comments and provide an opportunity for such persons to respond.

§ 1003.75 Contents.

The petition shall contain a full and complete statement of all relevant facts pertaining to the circumstances, act or transaction that is the subject of the petition and to the OHA action sought. Such facts shall include, but not be limited to, the names and addresses of all affected persons (if reasonably ascertainable); a complete statement of the business or other reasons that justify the act or transaction, if applicable; a description of the act or transaction, if applicable; a description of the acts or transactions that would be affected by the requested action; a full discussion of the pertinent provisions and relevant facts contained in the documents submitted with the petition, and an explanation of how the petitioner is aggrieved by DOE's position. Copies of all contracts, agreements, leases, instruments, and other documents relevant to the petition shall be submitted to the OHA upon its request.

§ 1003.76 OHA evaluation of request.

(a)(1) The OHA may initiate an investigation of any statement in a petition

§ 1003.77

and utilize in its evaluation any relevant facts obtained by such investigation. The OHA may solicit and accept submissions from third persons relevant to any petition provided that the petitioner is afforded an opportunity to respond to all third person submissions. In evaluating a petition, the OHA may consider any other source of information. The OHA on its own initiative may convene a conference, if, in its discretion, it considers that such will advance its evaluation of the petition.

(2) If the OHA determines that there is insufficient information upon which to base a decision and if, upon request, the necessary additional information is not submitted, the OHA may dismiss the petition without prejudice. If the failure to supply additional information is repeated or willful, the OHA may dismiss the petition with prejudice. If the petitioner fails to provide the notice required by §1003.74, the OHA may dismiss the petition without prejudice.

(b)(1) The OHA will dismiss without prejudice a "Petition for Special Redress or Other Relief" if it determines that another more appropriate proceeding is provided by this part.

(2) The OHA will dismiss with prejudice a "Petition for Special Redress or Other Relief" filed by a person who has exhausted his administrative remedies with respect to any proceeding provided by this part, and received a final order therefrom that addresses the same issue or transaction.

§ 1003.77 Decision and Order.

(a) Upon consideration of the petition and other relevant information received or obtained during the proceeding, the OHA will issue a Decision and Order granting or denying the petition.

(b) The Decision and Order denying or granting the petition shall include a written statement setting forth the relevant facts and legal basis for the Decision and Order. Such Decision and Order shall state that it is a final order of the DOE of which the petitioner may seek judicial review.

AUTHORITY: 5 U.S.C. 552.

SOURCE: 53 FR 15661, May 3, 1988, unless otherwise noted.

§ 1004.1 Purpose and scope.

This part contains the regulations of the Department of Energy (DOE) that implement Freedom of Information (FOIA) 5 U.S.C. 552, Pub. L. 89-487, as amended by Pub. L. 93-502, 88 Stat. 1561, by Pub. L. 94-409, 90 Stat. 1241, and by Pub. L. 99-570, 100 Stat. 3207-49, by Pub. L. 104-231, 110 Stat. 3048, by Pub. L. 110-175, 121 Stat. 2524, and by Pub. L. 111-83 564, 123 Stat. 2142, 2184. The regulations of this part provide information concerning the procedures by which records may be requested from all DOE offices, excluding the Federal Energy Regulatory Commission (FERC). Records of the DOE made available pursuant to the requirements of 5 U.S.C. 552 shall be furnished to members of the public as prescribed by this part. Persons seeking information or records of the DOE may find it helpful to consult with a DOE FOIA Officer before invoking the formal procedures set out below. To the extent permitted by other laws, the DOE will make records available which it is authorized to withhold under 5 U.S.C. 552 whenever it determines that such disclosure is in the public interest.

[53 FR 15661, May 3, 1988, as amended at 79 FR 22857, Apr. 25, 2014]

§ 1004.2 Definitions.

As used in this part:

Department of Energy

§ 1004.2

(a) *Appeal Authority* means the Office of Hearings and Appeals.

(b) *Authorizing or Denying Official* means that DOE officer as identified by the Directorate of Administration by separate directive, having custody of or responsibility for records requested under 5 U.S.C. 552. In DOE Headquarters, the term refers to The Freedom of Information Officer as defined below and officials who report directly to either the Office of the Secretary or a Secretarial Officer as also defined below. In the Field Offices, the term refers to the head of a field location identified in §1004.2(h) and the heads of field offices to which they provide administrative support and have delegated this authority.

(c) *'Commercial use' request* refers to a request from or on behalf of one who seeks information for a use or purpose that furthers the commercial, trade, or profit interests of the requester or the person on whose behalf the request is made. In determining whether a requester properly belongs in this category, agencies must determine how the requester will use the documents requested. Moreover, where DOE has reasonable cause to doubt the use to which a requester will put the records sought, or where that use is not evident from the request itself, the DOE will seek additional clarification before assigning the request to a specific category.

(d) *Department or Department of Energy (DOE)* means all organizational entities which are a part of the executive department created by Title II of the DOE Organization Act, Pub L. 95-91. This specifically excludes the FERC.

(e) *Direct costs* means those expenditures which the DOE actually incurs in searching for and duplicating (and in the case of commercial requesters, reviewing) documents to respond to a FOIA request. Direct costs include, for example, the salary of the employee performing the work (the basic rate of pay for the employee plus 16 percent of that rate to cover benefits) and the cost of operating duplicating machinery. Not included in direct costs are overhead expenses such as costs of space, and heating or lighting the facility in which the records are stored.

(f) *Duplication* refers to the process of making a copy of a document necessary to respond to a FOIA request. Such copies can take the form of, but are not limited to, paper copy, microform, audiovisual materials, or machine readable documentation (e.g., magnetic tape or disk). The copy provided must be in a form that can be reasonably used by requesters.

(g) *Educational institution* refers to a preschool, a public or private elementary or secondary school, an institution of graduate higher education, an institution of undergraduate higher education, an institution of professional education, and an institution of vocational education, which operates a program or programs of scholarly research.

(h) *Freedom of Information Act (FOIA) Officer* means the person designated to administer the Freedom of Information Act at the following DOE offices:

(1) Bonneville Power Administration, P.O. Box 3621, Portland, OR 97232.

(2) Carlsbad Field Office, P.O. Box 3090, Carlsbad, NM 88221.

(3) Chicago Office, 9800 S. Cass Avenue, Argonne, IL 60439.

(4) Environmental Management Consolidated Business Center, 250 East 5th Street, Suite 500, Cincinnati, OH 45202.

(5) Golden Field Office, 1617 Cole Boulevard, Golden, CO 80401.

(6) Headquarters, Department of Energy, Washington, DC 20585.

(7) Idaho Operations Office, 1955 Fremont Avenue, MS 1203, Idaho Falls, ID 83401.

(8) National Nuclear Security Administration Albuquerque Complex, P.O. Box 5400, Albuquerque, NM 87185-5400.

(9) National Energy Technology Laboratory, 3610 Collins Ferry Road, Morgantown, WV 26507-0800.

(10) Naval Reactors Laboratory Field Office, P.O. Box 109, West Mifflin, PA 15122-0109.

(11) Oak Ridge Office, P.O. Box 2001, Oak Ridge, TN 37831.

(12) Office of Naval Reactors, Headquarters, 1240 Isaac Hull Avenue SE., Washington Navy Yard, DC 20376-0822.

(13) Office of Scientific and Technical Information, P.O. Box 2001, Oak Ridge, TN 37831.

§ 1004.2

10 CFR Ch. X (1–1–16 Edition)

(14) Richland Operations Office, P.O. Box 550, Mail Stop A7–75, Richland, WA 99352.

(15) Savannah River Operations Office, P.O. Box A, Aiken, SC 29801.

(16) Southeastern Power Administration, 1166 Athens Tech Road, Elberton, GA 30635–6711.

(17) Southwestern Power Administration, One West Third, S1200, Tulsa, OK 74103.

(18) Strategic Petroleum Reserve Project Management Office, 900 Commerce Road East–MS FE–455, New Orleans, LA 70123.

(19) Western Area Power Administration, 12155 W. Alameda Parkway, P.O. Box 281213, Lakewood, CO 80228–8213.

(i) *General Counsel* means the General Counsel provided for in section 202(b) of the DOE Organization Act, or any DOE attorney designated by the General Counsel as having responsibility for counseling the Department on Freedom of Information Act matters.

(j) *Headquarters* means all DOE facilities functioning within the Washington metropolitan area except the Office of Naval Reactors.

(k) *Non-commercial scientific institution* refers to an institution that is not operated on a “commercial” basis as that term is referenced in §1004.2(c), and which is operated solely for the purpose of conducting scientific research, the results of which are not intended to promote any particular product or industry.

(l) *Office* means any administrative or operating unit of the DOE, including those in field offices.

(m) *Representative of the news media* refers to any person actively gathering news for an entity that is organized and operated to publish or broadcast news to the public. The term *news* means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations broadcasting to the public at large, and publishers of periodicals (but only in those instances when they can qualify as disseminators of “news”) who make their products available for purchase or subscription by the general public. These examples are not intended to be all-inclusive.

Moreover, as traditional methods of news delivery evolve (e.g., electronic dissemination of newspapers through telecommunications services), such alternative media would be included in this category. In the case of “freelance” journalists, they may be regarded as working for a news organization if they can demonstrate a solid basis for expecting publication through that organization, even though not actually employed by it. A publication contract would be the clearest proof, but agencies may also look to the past publication record of a requester in making this determination.

(n) *Review* refers to the process of examining documents located in response to a commercial use request (see §1004.2(c)) to determine whether any portion of any document located is permitted to be withheld. It also includes processing any documents for disclosure, e.g., doing all that is necessary to excise them and otherwise prepare them for release. Review does not include time spent resolving general legal or policy issues regarding the application of exemptions.

(o) *Search* includes all time spent looking for material that is responsive to a request, including page-by-page or line-by-line identification of material within documents. The DOE will search for material in the most efficient and least expensive manner in order to minimize cost for both DOE and the requester. For example, DOE will not engage in line-by-line search when merely duplicating an entire document would prove the less expensive and quicker method of complying with a request. “Search” will be distinguished, moreover, from “review” of material in order to determine whether the material is exempt from disclosure. Searches may be done manually or by computer using existing programming.

(p) *Secretarial Officer* means the Under Secretary; Under Secretary for Science; Administrator, Energy Information Administration; Administrator, National Nuclear Security Administration; Assistant Secretary for Congressional and Intergovernmental Affairs;

Department of Energy

§ 1004.3

Assistant Secretary for Energy Efficiency and Renewable Energy; Assistant Secretary for Environmental Management; Assistant Secretary for Fossil Energy; Assistant Secretary for Policy and International Affairs; Assistant Secretary for Nuclear Energy; Chief Financial Officer; Chief Health, Safety and Security Officer; Chief Human Capital Officer; Chief Information Officer; Director, Advanced Research Projects Agency—Energy, Director, Office of Indian Energy Policy and Programs, and Director, Loan Programs Office, Director, Office of Economic Impact and Diversity; Director, Office of Electricity Delivery and Energy Reliability; Director, Office of Hearings and Appeals; Director, Office of Legacy Management; Director, Office of Management; Director, Office of Public Affairs; Director, Office of Science; General Counsel; Inspector General; and Senior Intelligence Officer.

(q) *Statute specifically providing for setting the level of fees for particular types of records*, at 5 U.S.C. 552(a)(4)(A)(vi), means any statute that specifically requires a government agency, such as the Government Printing Office (GPO) or the National Technical Information Service (NTIS), to set the level of fees for particular types of records, in order to:

(1) Serve both the general public and private sector organizations by conveniently making available government information;

(2) Ensure that groups and individuals pay the cost of publications and other services which are for their special use so that these costs are not borne by the general taxpaying public;

(3) Operate an information dissemination activity on a self-sustaining basis to the maximum extent possible; or

(4) Return revenue to the Treasury for defraying, wholly or in part, appropriated funds used to pay the cost of disseminating government information.

[53 FR 15661, May 3, 1988, as amended at 71 FR 68734, Nov. 28, 2006; 79 FR 22857, Apr. 25, 2014]

§ 1004.3 Public reading facilities and policy on contractor records.

(a) The DOE Headquarters will maintain, in the public reading facilities, the materials which are required by 5 U.S.C. 552(a)(2) to be made available for public inspection and copying. The principal public reading facility will be located at the Office of Information Resources Office, 1000 Independence Avenue, SW, Washington, DC. The DOE Headquarters will maintain an electronic public reading room that can be accessed at <http://energy.gov/management/office-management/operational-management/freedom-information-act/reading-room>. A complete listing of other facilities is available from the Office of Information Resources Officer at DOE Headquarters.

(b) Each of the designated field offices will maintain in public reading facilities certain materials maintained in the Headquarters facility and other materials associated with the particular field offices.

(c) Each of these public reading facilities will maintain and make available for public inspection and copying current indices of the materials at that facility which are required to be indexed by 5 U.S.C. 552(a)(2) or other applicable statutes.

(d) [Reserved]

(e) Contractor Records. (1) When a contract with DOE provides that any records acquired or generated by the contractor in its performance of the contract shall be the property of the Government, DOE will make available to the public such records that are in the possession of the Government or the contractor, unless the records are exempt from public disclosure under 5 U.S.C. 552(b)(2).

(2) Notwithstanding paragraph (e)(1) of this section, records owned by the Government under contract that contain information or technical data having commercial value as defined in § 1004.3(e)(4) or information for which the contractor claims a privilege recognized under Federal or State law shall be made available only when they are in the possession of the Government and not otherwise exempt under 5 U.S.C. 552(b).

(3) The policies stated in this paragraph:

§ 1004.4

10 CFR Ch. X (1–1–16 Edition)

(i) Do not affect or alter contractors' obligations to provide to DOE upon request any records that DOE owns under contract, or DOE's rights under contract to obtain any contractor records and to determine their disposition, including public dissemination; and

(ii) Will be applied by DOE to maximize public disclosure of records that pertain to concerns about the environment, public health or safety, or employee grievances.

(4) For purposes of §1004.3(e)(2), "technical data and information having commercial value" means technical data and related commercial or financial information which is generated or acquired by a contractor and possessed by that contractor, and whose disclosure the contractor certifies to DOE would cause competitive harm to the commercial value or use of the information or data.

[53 FR 15661, May 3, 1988, as amended at 59 FR 63884, Dec. 12, 1994; 79 FR 22858, Apr. 25, 2014]

§ 1004.4 Elements of a request.

(a) *Addressed to the FOIA Officer.* A request for a record of the DOE which is not available in a public reading facility, as described in §1004.3, shall be: Addressed to the Headquarters or appropriate field FOIA Officer at the DOE at a location listed in §1004.2(h) of this part, and both the envelope and the letter shall be clearly marked "Freedom of Information Act Request;" or submitted electronically on the Headquarters or appropriate field FOIA Web sites. Except as provided in §1004.4(e), a request will be considered to be received by the DOE for purposes of 5 U.S.C. 552(a)(6) and the 20-day response period will start upon actual receipt by the appropriate FOIA Officer, or not later than 10 days after receipt by a designated FOIA Officer at any location in §1004.2(h). Requests delivered after regular business hours of the FOIA Officer are considered received on the next regular business day.

(b) *Request must be in writing and for reasonably described records.* A request for access to records must be submitted in writing and must reasonably describe the records requested to enable DOE personnel to locate them with a reasonable amount of effort. Where

possible, specific information regarding dates, titles, file designations, and other information which may help identify the records should be supplied by the requester, including the names and titles of any DOE officers or employees who have been contacted regarding the request prior to the submission of a written request. If the request relates to a matter in pending litigation, the court and its location should be identified to aid in locating the documents. If the records are known to be in a particular office of the DOE, the request should identify that office.

(c) *Categorical requests.* (1) Must meet reasonably described records requirement. A request for all records falling within a reasonably specific and well-defined category shall be regarded as conforming to the statutory requirement that records be reasonably described if DOE personnel can reasonably determine which particular records are sought in the request. The request must enable the DOE to identify and locate the records sought by a process that is not unreasonably burdensome or disruptive of DOE operations. The FOIA Officer may take into consideration problems of search which are associated with the files of an individual office within the Department and determine that a request is not one for reasonably described documents as it pertains to that office.

(2) *Assistance in reformulating a non-conforming request.* If a request does not reasonably describe the records sought, as specified in paragraph (c)(1) of this section, the DOE response will specify the reasons why the request failed to meet the requirements of paragraph (c)(1) of this section and will invite the requester to confer with knowledgeable DOE personnel in an attempt to restate the request or reduce the request to manageable proportions by reformulation or by agreeing on an orderly procedure for the production of the records. If DOE responds that additional information is needed from the requester to render records reasonably described, any reformulated request submitted by the requester will be treated as an initial request for purposes of calculating the time for DOE response.

Department of Energy

§ 1004.5

(d) *Nonexistent records.* (1) 5 U.S.C. 552 does not require the compilation or creation of a record for the purpose of satisfying a request for records.

(2) 5 U.S.C. 552 does not require the DOE to honor a request for a record not yet in existence, even where such a document may be expected to come into existence at a later time.

(3) If a requested record is known to have been destroyed or otherwise disposed of, or if no such record is known to exist, the requester will be so notified.

(e) *Assurance of willingness to pay fees.* A request shall include (1) an assurance to pay whatever fees will be assessed in accordance with §1004.9, (2) an assurance to pay those fees not exceeding some specified dollar amount, or (3) a request for a waiver or reduction of fees. No request will be deemed to have been received until the DOE has received some valid assurance of willingness to bear fees anticipated to be associated with the processing of the request or a specific request of a waiver or reduction of fees.

(f) *Requests for records or information of other agencies.* Some of the records in the files of the DOE have been obtained from other Federal agencies or contain information obtained from other Federal agencies.

(1) Where a document originated in another Federal agency, the Authorizing Official will refer the request to the originating agency and so inform the requester, unless the originator agrees to direct release by DOE.

(2) Requests for DOE records containing information received from another agency, or records prepared jointly by DOE and other agencies, will be treated as requests for DOE records except that the Authorizing Official will coordinate with the appropriate official of the other agency. The notice of determination to the requester, in the event part or all of the record is recommended for denial by the other agency, will cite the other agency Denying Official as well as the appropriate DOE Denying Official if a denial by DOE is also involved.

[53 FR 15661, May 3, 1988, as amended at 79 FR 22853, Apr. 25, 2014]

§ 1004.5 Processing requests for records.

(a) FOIA Officers will be responsible for processing requests for records submitted pursuant to this part. Upon receiving such a request, the FOIA Officer will, except as provided in paragraph (c) of this section, ascertain which Authorizing Official has responsibility for, custody of, or concern with the records requested. The FOIA Officer will review the request, consulting with the Authorizing Official where appropriate, to determine its compliance with §1004.4. Where a request complies with §1004.4, the FOIA Officer will acknowledge receipt of the request to the requester and forward the request to the Authorizing Official for action.

(b) The Authorizing Official will promptly identify and review the records encompassed by the request. The Authorizing Official or FOIA Officer will prepare a written response (1) granting the request, (2) denying the request, (3) granting/denying it in part, (4) replying with a response stating that the request has been referred to another agency under §1004.4(f) or §1004.6(e), (5) informing the requester that responsive records cannot be located or do not exist.

(c) Where a request involves records which are in the custody of or are the concern of more than one Authorizing Official, or FOIA Officer the FOIA Officer will identify all concerned all Authorizing Officials, send copies of the request to them and forward the request for action to the Authorizing Official or FOIA Officer that can reasonably be expected to have custody of most of the requested records. This Authorizing Official or FOIA Officer will prepare a DOE response to the requester consistent with paragraph (b) of this section, which will identify Authorizing Official or FOIA Officer, having responsibility for the denial of records.

(d) *Time for processing requests.* (1) Action pursuant to paragraph (b) of this section will be taken within 20 working days of receipt of a request for DOE records ("receipt" is defined in §1004.4(a)), except that,

(i) One request can be made to the requester for information and the DOE can toll the 20-day response period

§ 1004.6

while it waits for the requester's response;

(ii) If necessary to clarify with the requester issues regarding fee assessment and the DOE can toll the 20-day response period; or

(iii) If unusual circumstances require an extension of time before a decision on a request can be reached and the person requesting records is promptly informed in writing by the Authorizing Official or FOIA Officer of the reasons for such extension and the date on which a determination is expected to be dispatched, then the Authorizing Official or FOIA Officer may take an extension not to exceed 10 working days.

(2) For purposes of this section and §1004.8(d), the term "unusual circumstances" may include but is not limited to the following:

(i) The need to search for and collect the requested records from field facilities or other establishments that are separate from the offices processing the request;

(ii) The need to search for, collect and appropriately examine a voluminous amount of separate and distinct records which are responsive to a single request; or

(iii) The need for consultation, which shall be conducted with all practicable speed, with another agency having a substantial interest in the determination of the request, or among two or more components of the Department having substantial subject matter interest therein.

(3) The requester must be promptly notified in writing of the extension, the reasons for the extension, and the date on which a determination is expected to be made.

(4) If no determination has been made at the end of the 20-day period, or the last extension thereof, the requester may deem his administrative remedies to have been exhausted, giving rise to a right of review in a district court of the United States as specified in 5 U.S.C. 552(a)(4). When no determination can be made within the applicable time limit, the responsible Authorizing Official or FOIA Officer will nevertheless continue to process the request. If the DOE is unable to provide a response within the statutory period, the Authorizing Official or FOIA Officer will

10 CFR Ch. X (1-1-16 Edition)

inform the requester of the reason for the delay; the date on which a determination may be expected to be made; that the requester can seek remedy through the courts, but ask the requester to forego such action until a determination is made.

(5) Nothing in this part shall preclude the Authorizing Official or FOIA Officer and a requester from agreeing to an extension of time for the initial determination on a request. Any such agreement will be confirmed in writing and will clearly specify the total time agreed upon.

(6) Expedited processing. Generally, the DOE will respond to requests in the order of receipt. Requests will be processed out of order and processed as soon as practicable when it is determined, based upon information supplied by the requester or otherwise known to the DOE, that a compelling need exists to provide the records in an expeditious manner. The FOIA states that a compelling need exists when failure to obtain records expeditiously could reasonably be expected to pose a threat to the life or physical safety of an individual or, when a request is submitted by a person primarily engaged in disseminating information and there is an urgency to inform the public about actual or alleged Federal Government activity.

(7) A determination to grant or deny a request for expedited processing will be made by the appropriate FOIA Officer within 10 days after receipt of the request. The requester will be notified of the determination and informed that any denial may be appealed within 30 calendar days to the Office of Hearings and Appeals."

[53 FR 15661, May 3, 1988, as amended at 79 FR 22858, Apr. 25, 2014]

§ 1004.6 Requests for classified records.

(a) All requests for classified records will be subject to the provisions of this part with the special qualifications noted below.

(b) All requests for records made in accordance with this part, except those requests for access to classified records which are made specifically pursuant to the mandatory review provisions of Executive Order 13526 and §1045 or any

Department of Energy

§ 1004.8

successor thereto, may be automatically considered a FOIA Act request.

(c) Concurrence of the Director of Classification is required on all responses involving the denial of classified information. The Director of Classification will be informed of the request by either the FOIA Officer or the Authorizing Official to whom the action is assigned, and will advise the office originating the records, or having responsibility for the records, and consult with such office or offices prior to making a determination under this section.

(d) The written notice of a determination to deny records, or portions of records, which contain both classified material and other exempt material, will be concurred in by the Director of Classification who will be the Denying Official for the classified portion of such records in accordance with §§1004.5(c) and 1004.7(b)(2). If other DOE officials or appropriate officials of other agencies are responsible for denying any portion of the record, their names and titles or positions will be listed in the notice of denial in accordance with §§1004.5(c) and 1004.7(b)(2) and it will be clearly indicated what portion or portions they were responsible for denying.

(e) Requests for DOE records containing classified information received from another agency, and requests for classified documents originating in another agency, will be coordinated with or referred to the other agency consistent with the provisions of §1004.4(f). Coordination or referral of information or documents subject to this section will be effected by the Director of Classification (in consultation with the Authorizing Official) with the appropriate official of the other agency.

[53 FR 15661, May 3, 1988, as amended at 79 FR 22858, Apr. 25, 2014]

§ 1004.7 Responses by authorizing officials: Form and content.

(a) *Form of grant.* Records requested pursuant to §1004.4 will be made available promptly, when they are identified and determined to be nonexempt under this Regulation, the FOIA, and where the applicable fees are \$15 or less or where it has been determined that the payment of applicable fees should be

waived. Where the applicable fees exceed \$15, the records may be made available before all charges are paid.

(b) *Form of denial.* A reply denying a request for a record will be in writing. It will be signed by a FOIA Officer the Denying Official pursuant to §1004.5 (b) or (c) and will include:

(1) *Reason for denial.* A statement of the reason for denial, containing a reference to the specific exemption under the FOIA authorizing the withholding of the record and a brief explanation of how the exemption applies to the record withheld, and a statement of why a discretionary release is not appropriate. The amount of information deleted and the applicable exemption will be indicated on the released portion of the record, unless the indication would harm an interest protected by the exemption.

(2) *Persons responsible for denial.* A statement setting forth the name and the title or position of each Denying Official and identifying the portion of the denial for which each Denying Official is responsible.

(3) *Segregation of nonexempt material.* A statement or notation addressing the issue of whether there is any segregable nonexempt material in the documents or portions thereof identified as being denied.

(4) *Adequacy of search.* Although a determination that no such record is known to exist is not a denial, the requester will be informed that a challenge may be made to the adequacy of the search by appealing within 30 calendar days to the Office of Hearings and Appeals.

(5) *Administrative appeal.* A statement that the determination to deny documents made within the statutory time period, may be appealed within 30 calendar days to the Office of Hearings and Appeals.

[53 FR 15661, May 3, 1988, as amended at 79 FR 22858, Apr. 25, 2014]

§ 1004.8 Appeal of initial denials.

(a) *Appeal to Office of Hearings and Appeals.* When the Authorizing or Denying Official or FOIA Officer Official has denied a request for records in whole or in part or has responded that there are no documents responsive to the request consistent with §1004.4(d),

§ 1004.8

10 CFR Ch. X (1–1–16 Edition)

or when the Freedom of Information Officer has denied a request for expedited processing consistent with §1004.5(d) for waiver of fees consistent with §1004.9, the requester may, within 30 calendar days of its receipt, appeal the determination to the Office of Hearings and Appeals.

(b) *Elements of appeal.* The appeal must be in writing, addressed to the Director, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585-1615 and both the envelope and letter must be clearly marked “Freedom of Information Act Appeal.” The appeal may be delivered by U.S Mail or commercial delivery service, by electronic mail to *OHA.Filings@hq.doe.gov*, or by facsimile to (202) 287-1415. The appeal must contain a concise statement of grounds upon which it is brought and a description of the relief sought. It should also include a discussion of all relevant authorities, including, but not limited to, DOE (and predecessor agencies) rulings, regulations, interpretations and decisions on appeals and any judicial determinations being relied upon to support the appeal. A copy of the letter containing the determination which is being appealed, must be submitted with the appeal. The appeal also should provide a telephone number, electronic mail address, or other means for communicating with the requester during business hours.

(c) *Receipt of appeal.* An appeal will be considered to be received for purposes of 5 U.S.C. 552(a)(6) upon receipt by the Appeal Authority. Documents delivered after regular business hours of the Office of Hearings and Appeals are considered received on the next regular business day.

(d) *Action within 20 working days.* (1) The Appeal Authority will act upon the appeal within 20 working days of its receipt, except that if unusual circumstances (as defined in §1004.5(d)(2)) require an extension of time before a decision on a request can be reached, the Appeal Authority may extend the time for final action for an additional 10 working days less the number of days of any statutory extension which may have been taken by the Authorizing Official during the period of initial determination.

(2) The requester must be promptly notified in writing of the extension, setting forth the reasons for the extension, and the date on which a determination is expected to be issued.

(3) If no determination on the appeal has been issued at the end of the 20-day period or the last extension thereof, the requester may consider his administrative remedies to be exhausted and seek a review in a district court of the United States as specified in 5 U.S.C. 552(a)(4). When no determination can be issued within the applicable time limit, the appeal will nevertheless continue to be processed; on expiration of the time limit the requester will be informed of the reason for the delay, of the date on which a determination may be expected to be issued, and of his right to seek judicial review in the United States district court in the district in which he resides or has his principal place of business, the district in which the records are situated, or the District of Columbia. The requester may be asked to forego judicial review until determination of the appeal.

(4) Nothing in this part will preclude the Appeal Authority and a requester from agreeing to an extension of time for the decision on an appeal. Any such agreement will be confirmed in writing by the Appeal Authority and will clearly specify the total time agreed upon for the appeal decision.

(e) *Form of action on appeal.* The Appeal Authority’s action on an appeal will be in writing and will set forth the reason for the decision. It will also contain a statement that it constitutes final agency action on the request and that judicial review will be available either in the district in which the requester resides or has a principal place of business, the district in which the records are situated, or in the District of Columbia. Documents determined by the Appeal Authority to be documents subject to release will be made promptly available to the requester upon payment of any applicable fees.

(f) *Classified records and records covered by section 148 of the Atomic Energy Act.* The Secretary of Energy or his or her designee will make the final determination concerning appeals involving the denial of requests for classified information or the denial of requests for

information falling within the scope of section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

(g) *Appeal of the denial of expedited processing.* Any appeal of the determination to deny a request for expedited processing will be acted on expeditiously."

[53 FR 15661, May 3, 1988, as amended at 79 FR 22858, Apr. 25, 2014]

§ 1004.9 Fees for providing records.

(a) *Fees to be charged.* The DOE will charge fees that recoup the full allowable direct costs incurred. The DOE will use the most efficient and least costly methods to comply with requests for documents made under the FOIA. The DOE may contract with private sector services to locate, reproduce and disseminate records in response to FOIA requests when that is the most efficient and least costly method. When doing so, however, the DOE will ensure that the ultimate cost to the requester is no greater than it would be if the DOE itself had performed these tasks. In no case will the DOE contract out responsibilities which the FOIA provides that only the agency may discharge, such as determining the applicability of an exemption, or determining whether to waive or reduce fees, which are determinations by Authorizing Officials or FOIA Officers. Where the DOE can identify documents that are responsive to a request and are maintained for public distribution by other agencies such as the National Technical Information Service and the Government Printing Office, the FOIA Officer will inform requesters of the procedures to obtain records from those sources.

(1) *Manual searches for records.* Whenever feasible, the DOE will charge for manual searches for records at the salary rate(s) (i.e. basic pay plus 16 percent) of the employee(s) making the search.

(2) *Computer searches for records.* The DOE will charge at the actual direct cost of providing the service. This will include the cost of operating the central processing unit (CPU) for that portion of operating time that is directly attributable to searching for records responsive to a FOIA request and operator/programmer salary.

(3) *Review of records.* The DOE will charge requesters who are seeking documents for commercial use for time spent reviewing records to determine whether they are exempt from mandatory disclosure. Charges will be assessed only for the initial review (i.e., the review undertaken the first time the DOE analyzes the applicability of a specific exemption to a particular record or portion of a record. The DOE will not charge for review at the administrative appeal level of an exemption already applied. However, records or portions of records withheld in full under an exemption which is subsequently determined not to apply may be reviewed again to determine the applicability of other exemptions not previously considered. The costs for such a subsequent review would be properly assessable.

(4) *Duplication of records.* The DOE will make a per-page charge for paper copy reproduction of documents. At present, the charge for paper to paper copies will be ten cents per page and the charge for microform to paper copies will be ten cents per page. For computer generated copies, such as tapes or printouts, the DOE will charge the actual cost, including operator time, for production of the tape or printout. For other methods of reproduction or duplication, we will charge the actual direct costs of producing the document(s).

(5) *Other charges.* It shall be noted that complying with requests for special services such as those listed below is entirely at the discretion of this agency. Neither the FOIA nor its fee structure cover these kinds of services. The DOE will recover the full direct costs of providing services such as those enumerated below to the extent that we elect to provide them:

(i) Certifying that records are true copies;

(ii) Sending records by special methods such as express mail, etc.

(6) *Restrictions on assessing fees.* (i) With the exception of requesters seeking documents for a commercial use, section (a)(4)(A)(iv) of the Freedom of Information Act, as amended, DOE will provide the first 100 pages of duplication and the first two hours of search time without charge. Moreover, DOE

§ 1004.9

will not charge fees to any requester, including commercial use requesters, if the cost of collecting the fee would be equal to or greater than the fee itself. These provisions work together, so that except for commercial use requesters, DOE will not begin to assess fees until after the Department has provided the free search and reproduction. For example, if a request involves two hours and ten minutes of search time and results in 105 pages of documents, DOE will charge for only 10 minutes of search time and only five pages of reproduction. If this cost is equal to or less than \$15.00, the amount DOE incurs to process a fee collection, no charges would be assessed. For purposes of these restrictions on assessment of fees, the word "pages" refers to paper copies of a standard agency size which will be normally be "8-1/2 x 11" or "11 x 14." Thus, requesters would not be entitled to 100 microfiche or 100 computer disks, for example. A microfiche containing the equivalent of 100 pages or 100 pages of computer print-out, however, might meet the terms of the restriction. Similarly, the term "search time" is based on a *manual search*. To apply this term to searches made by computer, the DOE will determine the hourly cost of operating the central processing unit and the operator's hourly salary plus 16 percent. When the cost of the search (including the operator time and the cost of operating the computer to process a request) equals the equivalent dollar amount of two hours of the salary of the computer operator conducting the search, DOE will begin assessing charges for computer search.

(ii) When unusual or exceptional circumstances do not apply and time limits specified in the FOIA are not met, the DOE will not charge any search fees, or duplication fees for educational and non-commercial scientific institution requesters and requesters who are representatives of the news media.

(7) *Notification of charges.* If the DOE determines or estimates that the fees to be assessed under this section may amount to more than \$25.00, the requester will be informed of the estimated amount of fees, unless the requester has previously indicated a willingness to pay the amount estimated

10 CFR Ch. X (1-1-16 Edition)

by the agency. In cases where a requester has been notified that actual or estimated fees may amount to more than \$25.00, the request will be deemed not to have been received until the requester has agreed to pay the anticipated total fee. A notice to a requester pursuant to this paragraph will offer the opportunity to confer with DOE personnel in order to reformulate the request to meet his or her needs at a lower cost.

(8) *Waiving or reducing fees.* The DOE will furnish documents without charge or at reduced charges if disclosure of the information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and disclosure is not primarily in the commercial interest of the requester. This fee waiver standard thus sets forth two basic requirements, both of which must be satisfied before fees will be waived or reduced. First it must be established that disclosure of the requested information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government. Second, it must be established that disclosure of the information is not primarily in the commercial interest of the requester. When these requirements are satisfied, based upon information supplied by a requester or otherwise made known to the DOE, the waiver or reduction of a FOIA fee will be granted. In determining when fees should be waived or reduced the appropriate FOIA Officer should address the following two criteria:

(i) That disclosure of the Information "is in the Public Interest Because it is Likely to Contribute Significantly to Public Understanding of the Operations or Activities of the Government." Factors to be considered in applying this criteria include but are not limited to:

(A) The subject of the request: Whether the subject of the requested records concerns "the operations or activities of the government";

(B) The informative value of the information to be disclosed: Whether the disclosure is "likely to contribute" to an understanding of government operations or activities;

Department of Energy

§ 1004.9

(C) The contribution to an understanding by the general public of the subject likely to result from disclosure; and

(D) The significance of the contribution to public understanding: Whether the disclosure is likely to contribute "significantly" to public understanding of government operations or activities.

(ii) If Disclosure of the Information "is Not Primarily in the Commercial Interest of the Requester." Factors to be considered in applying this criteria include but are not limited to:

(A) The existence and magnitude of a commercial interest: Whether the requester has a commercial interest that would be furthered by the requested disclosure; and, if so

(B) The primary interest in disclosure: Whether the magnitude of the identified commercial interest of the requester is sufficiently large, in comparison with the public interest in disclosure, that disclosure is "primarily in the commercial interest of the requester."

(b) *Fees to be charged—categories of requesters.* There are four categories of FOIA requesters: Commercial use requesters; educational and non-commercial scientific institutions; representatives of the news media; and all other requesters. The FOIA Officers will make determinations regarding categories of requesters as defined at §1004.2. The Headquarters FOIA Officers will assist field FOIA Officers in categorizing requesters, and will resolve conflicting categorizations. The FOIA prescribes specific levels of fees for each of these categories:

(1) *Commercial use requesters.* When the DOE receives a request for documents which appears to be for commercial use, charges will be assessed to recover the full direct costs of searching for, reviewing for release, and duplicating the records sought. Commercial use requesters are not entitled to two hours of free search time nor 100 free pages of reproduction of documents. The DOE will recover the cost of searching for and reviewing records even if there is ultimately no disclosure of records.

(2) *Educational and non-commercial scientific institution requesters.* The DOE

will provide documents to requesters in this category for the cost of reproduction only, excluding charges for the first 100 pages. To be eligible for inclusion in this category, requesters must show that the request is being made as authorized by and under the auspices of a qualifying institution and that the records are not sought for a commercial use, but are sought in furtherance of scholarly (if the request is from an educational institution) or scientific (if the request is from a non-commercial scientific institution) research.

(3) *Requesters who are representatives of the news media.* The DOE will provide documents to requesters in this category for the cost of reproduction only, excluding charges for the first 100 pages. To be eligible for inclusion in this category, a requester must meet the criteria in §1004.2(m), and his or her request must not be made for a commercial use. With respect to this class of requesters, a request for records supporting the news dissemination function of the requester will not be considered to be a request for a commercial use.

(4) *All other requesters.* The DOE will charge requesters who do not fall into any of the above categories fees which recover the full reasonable direct cost of searching for and reproducing records that are responsive to the request, except that the first 100 pages of reproduction and the first two hours of search time will be furnished without charge. Moreover, requests from individuals for records about themselves filed in DOE systems of records will continue to be processed under the fee provisions of the Privacy Act of 1974.

(5) *Charging interest—notice and rate.* Interest will be charged those requesters who fail to pay fees. The DOE will begin to assess interest charges on the amount billed on the 31st day following the day on which the billing was sent to the requester. Interest will be at the rate prescribed in section 3717 of Title 31 U.S.C. and will accrue from the date of the billing.

(6) *Charges for unsuccessful search.* The DOE will assess charges for time spent searching even if the search fails to identify responsive records or if records located are determined to be

§ 1004.10

10 CFR Ch. X (1–1–16 Edition)

exempt from disclosure. If the DOE estimates that search charges are likely to exceed \$25, it will notify the requester of the estimated amount of fees, unless the requester has indicated in advance his willingness to pay fees as high as those anticipated. Such a notice will offer the requester the opportunity to confer with agency personnel in order to reformulate the request to reduce the cost of the request.

(7) *Aggregating requests.* A requester may not file multiple requests each seeking portions of a document or documents, solely to avoid payment of fees. When the DOE reasonably believes that a requester or, a group of requesters acting in concert, is attempting to break a request down into a series of requests for the purpose of evading the assessment of fees, the DOE will aggregate any such requests and charge the appropriate fees. The DOE may consider the time period in which the requests have been made in its determination to aggregate the related requests. In no case will DOE aggregate multiple requests on unrelated subjects from one requester.

(8) *Advance payments.* Requesters are not required to make an advance payment (i.e., payment before action is commenced or continued on a request) unless:

(i) The DOE estimates or determines that allowable charges that a requester may be required to pay are likely to exceed \$250.00. In such cases, the DOE will notify the requester of the likely cost and obtain a satisfactory assurance of full payment where the requester has a history of prompt payment of FOIA fees, or require an advance payment of an amount up to the full estimated charges in the case of requesters with no history of payment.

(ii) A requester has previously failed to pay a fee in a timely fashion (i.e., within 30 days of the date of the billing). The DOE will require the requester to pay the full amount delinquent plus any applicable interest as provided in paragraph (b)(5) of this section, or demonstrate that he or she has, in fact, paid the delinquent fee; and to make an advance payment of the full amount of the estimated current fee before we begin to process a

new request or a pending request from that requester.

When the DOE acts under paragraphs (b)(8) (i) or (ii) of this section, the administrative time limits prescribed in subsection (a)(6) of the FOIA (i.e., 20 working days from receipt of initial requests and 20 working days from receipt of appeals from initial denials, plus permissible extensions of these time limits) will begin only after the DOE has received fee payments described above.

(c) *Effect of the Debt Collection Act of 1982 (Pub. L. 97-365).* The DOE will use the authorities of the Debt Collection Act, including disclosure to consumer reporting agencies and the use of collection agencies, where appropriate, to encourage payment of fees.

[53 FR 15661, May 3, 1988, as amended at 79 FR 22858, 22859, Apr. 25, 2014]

§ 1004.10 Exemptions.

(a) 5 U.S.C. 552 exempts from all of its publication and disclosure requirements nine categories of records which are described in paragraph (b) of that section. These categories include such matters as national defense and foreign policy information; investigatory records; internal procedures and communications; materials exempted from disclosure by other statutes; confidential, commercial, and financial information; and matters involving personal privacy.

(b) Specifically, the exemptions in 5 U.S.C. 552(b) will be applied consistent with §1004.1 of these regulations to matters that are:

(1) Specifically authorized under criteria established by an Executive Order to be kept secret in the interest of the national defense or foreign policy and are in fact properly classified pursuant to such Executive Order;

(2) Related solely to the internal personnel rules and practices of an agency;

(3) Specifically exempted from disclosure by statute (other than 5 U.S.C. 552(b)), provided that such statute—

(i) Requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue;

(ii) Establishes particular criteria for withholding or refers to particular

Department of Energy

§ 1004.11

types of matters to be withheld; for example Restricted Data and Formerly Restricted Data under the Atomic Energy Act of 1954, as amended (42 U.S.C. 2011 *et seq.*) are covered by this exemption; or

(iii) If enacted after the date of enactment of the OPEN FOIA Act of 2009, specifically cites to Exemption 3 of the FOIA, 5 U.S.C. 552(b)(3).

(4) Trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(5) Inter-agency or intra-agency memoranda or letters which would not be available by law to a party other than an agency in litigation with the agency;

(6) Personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;

(7) Records or information compiled for law enforcement purposes, but only to the extent that the production of such law enforcement records or information (i) could reasonably be expected to interfere with enforcement proceedings, (ii) would deprive a person of a right to a fair trial or an impartial adjudication, (iii) could reasonably be expected to constitute an unwarranted invasion of personal privacy, (iv) could reasonably be expected to disclose the identity of a confidential source, including a State, local, or foreign agency or authority or any private institution which furnished information on a confidential basis, and, in the case of a record or information compiled by a criminal law enforcement authority in the course of a criminal investigation or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source, (v) would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law, or (vi) could reasonably be expected to endanger the life or physical safety of any individual;

(8) Contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use

of an agency responsible for the regulation or supervision of financial institutions; or

(9) Geological and geophysical information and data, including maps, concerning wells.

(c) Any reasonably segregated non-exempt portion of a record will be provided to a requester. The DOE will delete portions which are withholdable under the exemptions listed above.

[53 FR 15661, May 3, 1988, as amended at 79 FR 22859, Apr. 25, 2014]

§ 1004.11 Handling information of a private business, foreign government, or an international organization.

(a) Whenever a document submitted to the DOE contains information which may be exempt from public disclosure, it will be handled in accordance with the procedures in this section. While the DOE is responsible for making the final determination with regard to the disclosure or nondisclosure of information contained in requested documents, the DOE will consider the submitter's views (as that term is defined in this section) in making its determination. Nothing in this section will preclude the submission of a submitter's views at the time of the submission of the document to which the views relate, or at any other time.

(b) When the DOE may determine, in the course of responding to a FOIA request, not to release information submitted to the DOE (as described in paragraph (a) of this section, and contained in a requested document) without seeking any or further submitter's views, no notice will be given the submitter.

(c) When the DOE, in the course of responding to a FOIA request, cannot make the determination described in paragraph (b) of this section without having for consideration the submitter's views, the submitter shall be promptly notified and provided an opportunity to submit his views on whether information contained in the requested document (1) is exempt from the mandatory public disclosure requirements of the FOIA Act, (2) contains information referred to in 18 U.S.C. 1905, or (3) is otherwise exempt by law from public disclosure. The DOE

will make its own determinations as to whether any information is exempt from disclosure. Notice of a determination by the DOE that a claim of exemption made pursuant to this paragraph is being denied will be given to a person making such a claim no less than seven (7) calendar days prior to intended public disclosure of the information in question. For purposes of this section, notice is deemed to be given when mailed to the submitter at the submitter's last known address.

(d) When the DOE, in the course of responding to a FOIA request, cannot make the determination described in paragraph (b) of this section and, without recourse to paragraph (c) of this section, previously has received the submitter's views, the DOE will consider such submitter's views and will not be required to obtain additional submitter's views under the procedure described in paragraph (c) of this section. The DOE will make its own determination with regard to any claim that information be exempted from disclosure. Notice of the DOE's determination to deny a claim of exemption made pursuant to this paragraph will be given to a person making such a claim no less than seven (7) calendar days prior to its intended public disclosure.

(e) Notwithstanding any other provision of this section, DOE offices may require a person submitting documents containing information that may be exempt by law from mandatory disclosure to (1) submit copies of each document from which information claimed to be confidential has been deleted or (2) require that the submitter's views be otherwise made known at the time of the submission. Notice of a determination by the DOE that a claim of exemption is being denied will be given to a person making such a claim no less than seven (7) calendar days prior to intended public disclosure of the information in question. For purposes of this section, notice is deemed to be given when mailed to the submitter at the submitter's last known address.

(f) *Criteria for determining the applicability of 5 U.S.C. 552(b)(4).* Subject to subsequent decisions of the Appeal Authority, criteria to be applied in determining whether information is exempt

from mandatory disclosure pursuant to Exemption 4 of the Freedom of Information Act include:

(1) Whether the information has been held in confidence by the person to whom it pertains;

(2) Whether the information is of a type customarily held in confidence by the person to whom it pertains and whether there is a reasonable basis therefore;

(3) Whether the information was transmitted to and received by the Department in confidence;

(4) Whether the information is available in public sources;

(5) Whether disclosure of the information is likely to impair the Government's ability to obtain similar information in the future; and

(6) Whether disclosure of the information is likely to cause substantial harm to the competitive position of the person from whom the information was obtained.

(g) When the DOE, in the course of responding to a Freedom of Information request, determines that information exempt from the mandatory public disclosure requirements of the Freedom of Information Act is to be released in accordance with §1004.1, the DOE will notify the submitter of the intended discretionary release no less than seven (7) days prior to intended public disclosure of the information in question.

(h) As used in this section, the term *submitter's views* means, with regard to a document submitted to the DOE, an item-by-item indication, with accompanying explanation, addressing whether the submitter considers the information contained in the document to be exempt from the mandatory public disclosure requirements of the Freedom of Information Act, to be information referred to in 18 U.S.C. 1905, or to be otherwise exempt by law from mandatory public disclosure. The accompanying explanation shall specify the justification for nondisclosure of any information under consideration. If the submitter states that the information comes within the exemption in 5 U.S.C.

Department of Energy

§ 1005.2

552(b)(4) for trade secrets and commercial or financial information, the submitter shall include a statement specifying why such information is privileged or confidential and, where appropriate, shall address the criteria in paragraph (f) of this section excluding paragraph (f)(5). In all cases, the submitter shall address the question of whether or not discretionary disclosure would be in the public interest.

[53 FR 15661, May 3, 1988, as amended at 79 FR 22858, 22859, Apr. 25, 2014]

§ 1004.12 Computation of time.

Except as otherwise noted, in computing any period of time prescribed or allowed by this part, the day of the event from which the designated period of time begins to run is not to be included; the last day of the period so computed is to be included; and Saturdays, Sundays, and legal holidays are excepted.

PART 1005—INTERGOVERNMENTAL REVIEW OF DEPARTMENT OF ENERGY PROGRAMS AND ACTIVITIES

Sec.

- 1005.1 What is the purpose of these regulations?
- 1005.2 What definitions apply to these regulations?
- 1005.3 What programs and activities of the Department are subject to these regulations?
- 1005.4 What are the Secretary's general responsibilities under the Order?
- 1005.5 What is the Secretary's obligation with respect to Federal interagency coordination?
- 1005.6 What procedures apply to the selection of programs and activities under these regulations?
- 1005.7 How does the Secretary communicate with state and local officials concerning the Department's programs and activities?
- 1005.8 How does the Secretary provide states an opportunity to comment on proposed Federal financial assistance and direct Federal development?
- 1005.9 How does the Secretary receive and respond to comments?
- 1005.10 How does the Secretary make efforts to accommodate intergovernmental concerns?
- 1005.11 What are the Secretary's obligations in interstate situations?

1005.12 How may a state simplify, consolidate, or substitute federally required state plans?

1005.13 May the Secretary waive any provision of these regulations?

AUTHORITY: E. O. 12372, July 14, 1982, 47 FR 30959, as amended April 8, 1983, 48 FR 15887; sec. 401 of the Intergovernmental Cooperation Act of 1968, as amended (31 U.S.C. 6506).

SOURCE: 48 FR 29182, June 24, 1983, unless otherwise noted.

§ 1005.1 What is the purpose of these regulations?

(a) The regulations in this part implement Executive Order 12372, "Intergovernmental Review of Federal Programs," issued July 14, 1982 and amended on April 8, 1983. These regulations also implement applicable provisions of section 401 of the Intergovernmental Cooperation Act of 1968.

(b) These regulations are intended to foster an intergovernmental partnership and a strengthened Federalism by relying on state processes and on state, areawide, regional and local coordination for review of proposed federal financial assistance and direct federal development.

(c) These regulations are intended to aid the internal management of the Department, and are not intended to create any right or benefit enforceable at law by a party against the Department or its officers.

§ 1005.2 What definitions apply to these regulations?

Department means the U.S. Department of Energy.

Order means Executive Order 12372, issued July 14, 1982, and amended April 8, 1983 and titled "Intergovernmental Review of Federal Programs."

Secretary means the Secretary of the U.S. Department of Energy or an official or employee of the Department acting for the Secretary under a delegation of authority.

State means any of the 50 states, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, Guam, American Samoa, the U.S. Virgin Islands, or the Trust Territory of the Pacific Islands.

§ 1005.3

§ 1005.3 What programs and activities of the Department are subject to these regulations?

(a) The Secretary publishes in the FEDERAL REGISTER a list of the Department's program and activities that are subject to the order and these regulations.

(b) Unless otherwise stated in the FEDERAL REGISTER listing identified in paragraph (a) of this section, these regulations do not apply to the Department's financial assistance transactions with other than governmental entities.

(c) The Bonneville Power Administration shall satisfy the requirements of these regulations by compliance with the consultation requirements of the Pacific Northwest Electric Power Planning and Conservation Act, Public Law 96-501.

§ 1005.4 What are the Secretary's general responsibilities under the Order?

(a) The Secretary provides opportunities for consultation by elected officials of those state and local governments that would provide the non-federal funds, for, or that would be directly affected by, proposed federal financial assistance from, or direct federal development by, the Department.

(b) If a state adopts a process under the Order to review and coordinate proposed federal financial assistance and direct federal development, the Secretary, to the extent permitted by law:

(1) Uses the state process to determine official views of state and local elected officials;

(2) Communicates with state and local elected officials as early in a program planning cycle as is reasonably feasible to explain specific plans and actions;

(3) Make efforts to accommodate state and local elected official's concerns with proposed federal financial assistance and direct federal development that are communicated through the state process;

(4) Allows the states to simplify and consolidate existing federally required state plan submissions;

(5) Where state planning and budgeting systems are sufficient and where permitted by law, encourages the sub-

10 CFR Ch. X (1-1-16 Edition)

stitution of State plans for federally required state plans;

(6) Seeks the coordination of views of affected state and local elected officials in one state with those of another state when proposed federal financial assistance or direct federal development has an impact on interstate metropolitan urban centers or other interstate areas; and

(7) Supports state and local governments by discouraging the reauthorization or creation of any planning organization which is federally-funded, which has a limited purpose, and which is not adequately representative of, or accountable to, state or local elected officials.

§ 1005.5 What is the Secretary's obligation with respect to Federal inter-agency coordination?

The Secretary, to the extent practicable, consults with and seeks advice from all other substantially affected federal departments and agencies in an effort to assure full coordination between such agencies and the Department regarding programs and activities covered under these regulations.

§ 1005.6 What procedures apply to the selection of programs and activities under these regulations?

(a) A state may select any program or activity published in the FEDERAL REGISTER in accordance with § 1005.3 of this part for intergovernmental review under these regulations. Each state, before selecting programs and activities, shall consult with local elected officials.

(b) Each state that adopts a process shall notify the Secretary of the Department's programs and activities selected for that process.

(c) A state may notify the Administrator of changes in its selections at any time. For each change, the state shall submit to the Secretary an assurance that the state has consulted with local elected officials regarding the change. The Department may establish deadlines by which states are required to inform the Secretary of changes in their program selections.

(d) The Secretary uses a state's process as soon as feasible, depending on individual programs and activities, after

Department of Energy

§ 1005.10

the Secretary is notified of its selections.

§ 1005.7 How does the Secretary communicate with state and local officials concerning the Department's programs and activities?

(a) [Reserved]

(b) The Secretary provides notice to directly affected state, areawide, regional, and local entities in a state of proposed Federal financial assistance or direct Federal development if:

(1) The state has not adopted a process under the Order; or

(2) The assistance or development involves a program or activity not selected for the state process. This notice may be made by publication in the FEDERAL REGISTER or other appropriate means, which the Department in its discretion deems appropriate.

§ 1005.8 How does the Secretary provide states an opportunity to comment on proposed Federal financial assistance and direct Federal development?

(a) Except in unusual circumstances, the Secretary gives state processes or directly affected State, areawide, regional and local officials and entities—

(1) At least 30 days from the date established by the Secretary to comment on proposed Federal financial assistance in the form of noncompeting continuation awards; and

(2) At least 60 days from the date established by the Secretary to comment on proposed direct Federal development or Federal financial assistance other than noncompeting continuation awards.

(b) This section also applies to comments in cases in which the review, coordination, and communication with the Department have been delegated.

§ 1005.9 How does the Secretary receive and respond to comments?

(a) The Secretary follows the procedures in § 1005.10 if:

(1) A state office or official is designated to act as a single point of contact between a state process and all federal agencies, and

(2) That office or official transmits a state process recommendation for a program selected under § 1005.6.

(b)(1) The single point of contact is not obligated to transmit comments from state, areawide, regional or local officials and entities where there is no state process recommendation.

(2) If a state process recommendation is transmitted by a single point of contact, all comments from, state, areawide, regional, and local officials and entities that differ from it must also be transmitted.

(c) If a state has not established a process, or is unable to submit a state process recommendation, state, areawide, regional and local officials and entities may submit comments either to the applicant or to the Department.

(d) If a program or activity is not selected for a state process, state, areawide, regional and local officials and entities may submit comments either to the applicant or to the Department. In addition, if a state process recommendation for a nonselected program or activity is transmitted to the Department by the single point of contact, the Secretary follows the procedures of § 1005.10 of this part.

(e) The Secretary considers comments which do not constitute a state process recommendation submitted under these regulations and for which the Secretary is not required to apply the procedures of § 1005.10 of this part, when such comments are provided by a single point of contact, by the applicant, or directly to the Department by a commenting party.

§ 1005.10 How does the Secretary make efforts to accommodate intergovernmental concerns?

(a) If a state process provides a state process recommendation to the Department through its single point of contact, the Secretary either:

(1) Accepts the recommendation;

(2) Reaches a mutually agreeable solution with the state process; or

(3) Provides the single point of contact with such written explanation of the decision, as the Secretary in his or her discretion deems appropriate. The Secretary may also supplement the written explanation by providing the explanation to the single point of contact by telephone, other telecommunication, or other means.

§ 1005.11

(b) In any explanation under paragraph (a)(3) of this section, the Secretary informs the single point of contact that:

(1) The Department will not implement its decision for at least ten days after the single point of contact receives the explanation; or

(2) The Secretary has reviewed the decision and determined that, because of unusual circumstances, the waiting period of at least ten days is not feasible.

(c) For purposes of computing the waiting period under paragraph (b)(1) of this section, a single point of contact is presumed to have received written notification 5 days after the date of mailing of such notification.

§ 1005.11 What are the Secretary's obligations in interstate situations?

(a) The Secretary is responsible for:

(1) Identifying proposed federal financial assistance and direct federal development that have an impact on interstate areas;

(2) Notifying appropriate officials and entities in states which have adopted a process and which select the Department's program or activity;

(3) Making efforts to identify and notify the affected state, areawide, regional, and local officials and entities in those states that have not adopted a process under the Order or do not select the Department's program or activity;

(4) Responding pursuant to § 1005.10 of this part if the Secretary receives a recommendation from a designated areawide agency transmitted by a single point of contact, in cases in which the review, coordination, and communication with the Department have been delegated.

(b) The Secretary uses the procedures in § 1005.10 if a state process provides a state process recommendation to the Department through a single point of contact.

§ 1005.12 How may a state simplify, consolidate, or substitute federally required state plans?

(a) As used in this section:

(1) *Simplify* means that a state may develop its own format, choose its own

10 CFR Ch. X (1-1-16 Edition)

submission date, and select the planning period for a state plan.

(2) *Consolidate* means that a state may meet statutory and regulatory requirements by combining two or more plans into one document and that the state can select the format, submission date, and planning period for the consolidated plan.

(3) *Substitute* means that a state may use a plan or other document that it has developed for its own purposes to meet Federal requirements.

(b) If not inconsistent with law, a state may decide to try to simplify consolidate, or substitute federally required state plans without prior approval by the Secretary.

(c) The Secretary reviews each state plan that a state has simplified, consolidated, or substituted and accepts the plan only if its contents meet federal requirements.

§ 1005.13 May the Secretary waive any provision of these regulations?

In an emergency, the Secretary may waive any provision of these regulations.

PART 1008—RECORDS MAINTAINED ON INDIVIDUALS (PRIVACY ACT)

Subpart A—General Provisions

Sec.

1008.1 Purpose and scope.

1008.2 Definitions.

1008.3 Employee standards of conduct with regard to privacy.

1008.4 Procedures for identifying the individual making a request for access to or amendment of records.

1008.5 Effect of the Freedom of Information Act (FOIA).

Subpart B—Requests for Access or Amendment

1008.6 Procedures for Privacy Act requests.

1008.7 Processing of requests.

1008.8 Action in response to a request for access: disclosure of requested information to subject individuals.

1008.9 Action in response to a request for access: initial denial of access.

1008.10 Action in response to a request for correction or amendment of records.

1008.11 Appeals of denials of requests pursuant to § 1008.6.

1008.12 Exemptions.

1008.13 Fees.

1008.14 Requests under false pretenses.

Department of Energy

§ 1008.2

1008.15 Civil remedies.

Subpart C—Disclosure to Third Parties

1008.16 Prohibition against disclosure.

1008.17 Conditions of disclosure.

1008.18 Accounting for disclosures.

1008.19 Criminal penalties—improper disclosure.

Subpart D—Maintenance and Establishment of Systems of Records

1008.20 Content of systems of records.

1008.21 Collection of information by DOE about an individual for a system of records.

1008.22 Use and collection of social security numbers.

1008.23 Public notice of systems of records.

1008.24 Criminal penalties—failure to publish a system notice.

AUTHORITY: 42 U.S.C. 7101 *et seq.*; 50 U.S.C. 2401 *et seq.*; 5 U.S.C. 552a.

SOURCE: 45 FR 61577, Sept. 16, 1980, unless otherwise noted.

Subpart A—General Provisions

§ 1008.1 Purpose and scope.

(a) This part establishes the procedures to implement the Privacy Act of 1974 (Pub. L. 93-579, 5 U.S.C. 552a) within the Department of Energy.

(b) This part applies to all systems of records, as defined in § 1008.2(m), maintained by DOE.

(c) This part applies to all divisions within the DOE, and to the personnel records of the Federal Energy Regulatory Commission (FERC), which are maintained by DOE on behalf of FERC. These regulations do not apply to other systems of records maintained by FERC. These regulations also apply to DOE contractors and their employees to the extent required by 5 U.S.C. 552a(m).

§ 1008.2 Definitions.

(a) *Department* or *Department of Energy (DOE)* means all organizational entities which are a part of the executive department created by title II of the Department of Energy Organization Act, Public Law 95-91, except the Federal Energy Regulatory Commission (FERC).

(b) *Director, Office of Hearings and Appeals* means the Director or his delegate.

(c) *DOE locations* means each of the following DOE components:

(1) Bonneville Power Administration, P.O. Box 3621-KDP-7, Portland, OR 97232.

(2) Carlsbad Field Office, P.O. Box 3090, Carlsbad, NM 88221.

(3) Chicago Office, 9800 S. Cass Avenue, Argonne, IL 60439.

(4) Environmental Management Consolidated Business Center, 250 East 5th Street, Suite 500, Cincinnati, OH 45202.

(5) Golden Field Office, 1617 Cole Boulevard, Golden, CO 80401.

(6) Headquarters, Department of Energy, Washington, DC 20585.

(7) Idaho Operations Office, 1955 Fremont Avenue, MS 1203, Idaho Falls, ID 83401.

(8) National Nuclear Security Administration Service Center, P.O. Box 5400, Albuquerque, NM 87185-5400.

(9) National Nuclear Security Administration Nevada Site Office, P.O. Box 98518, Las Vegas, NV 89193-3521.

(10) National Energy Technology Laboratory, 3610 Collins Ferry Road, Morgantown, WV 26507-0800.

(11) Oak Ridge Office, P.O. Box 2001, Oak Ridge, TN 37831.

(12) Office of Scientific and Technical Information, 175 S. Oak Ridge Turnpike, P.O. Box 62, Oak Ridge, TN 37830.

(13) Pacific Northwest Site Office, P.O. Box 350, Mail Stop K8-50, Richland, WA 99352.

(14) Pittsburgh Naval Reactors, P.O. Box 109, West Mifflin, PA 15122-0109.

(15) Richland Operations Office, P.O. Box 550, Mail Stop A7-75, Richland, WA 99352.

(16) Savannah River Operations Office, P.O. Box A, Aiken, SC 29801.

(17) Schenectady Naval Reactors, P.O. Box 1069, Schenectady, NY 12301.

(18) Southeastern Power Administration, 1166 Athens Tech Road, Elberton, GA 30635-6711.

(19) Southwestern Power Administration, One West Third, S1200, Tulsa, OK 74103.

(20) Strategic Petroleum Reserve Project Management Office, 900 Commerce Road East-MS FE-455, New Orleans, LA 70123.

(21) Western Area Power Administration, 12155 W. Alameda Parkway, P.O. Box 281213, Lakewood, CO 80228-8213.

§ 1008.3

10 CFR Ch. X (1–1–16 Edition)

(d) *General Counsel* means the General Counsel provided for in section 202(b) of the Department of Energy Organization Act, or any DOE attorney designated by the General Counsel.

(e) *Headquarters* means all DOE facilities functioning within the Washington, DC metropolitan area.

(f) *Individual* means a citizen of the United States or an alien lawfully admitted for permanent residence, but does not include proprietorships, businesses, or corporations. Where appropriate, the term *individual* also includes a duly authorized representative of an individual.

(g) *Maintain* means maintain, collect, use, or disseminate.

(h) *Privacy Act Officer* means the person designated by the Director, Office of Administration, as responsible for administering the DOE's program for implementing the requirements of the Privacy Act of 1974 at the DOE locations listed at §1008.2(c).

(i) *Record* means any item, collection, or grouping of information about an individual that is maintained by or for the DOE including, but not limited, to education, financial transactions, medical history, and criminal or employment history, and that contains that individual's name, or other identifying number, symbol, or other identifying particulars assigned to the individual, such as a finger or voice print or photograph. See subsection (a)(4) of the Act.

(j) *Routine use* means, with respect to the disclosure of a record, the use of such record for a purpose which is compatible with the purpose for which it was collected. See subsection (a)(7) of the Act.

(k) *Statistical record* means a record in a system of records maintained for statistical research or reporting purposes only and not used in whole or in part in making any determination about an identifiable individual, except as provided by 13 U.S.C. 8. See subsection (a)(6) of the Act.

(l) *System Manager* means the DOE official who is responsible for a system of records as designated in the system notice of that system of records published by DOE.

(m) *System of records* means a group of any records under DOE control from which information is retrieved by the

name of the individual or by some identifying number, symbol, or other identifying particulars assigned to the individual. See subsection (a)(5) of the Act.

(n) *Act* means the Privacy Act of 1974, Public Law 93-579; references to subsections of the Act mean subsections of section 3 of the Act.

[45 FR 61577, Sept. 16, 1980, as amended at 71 FR 68735, Nov. 28, 2006]

§1008.3 Employee standards of conduct with regard to privacy.

(a) The Headquarters DOE Privacy Act Officer shall assure that DOE personnel are advised of the provisions of the Privacy Act, including the criminal penalties and civil liabilities provided therein, (subsections (g) and (i) of the Act), and that DOE personnel are made aware of their responsibilities: to protect the security of personal information to assure its accuracy, relevance, timeliness and completeness; to avoid unauthorized disclosure; and to insure that no system of records concerning individuals, no matter how insignificant or specialized, is maintained without public notice.

(b) DOE personnel shall:

(1) Collect or maintain no information of a personal nature about individuals unless relevant and necessary to achieve a purpose or carry out a responsibility of the DOE as required by statute or by Executive Order. See subsection (e)(1) of the Act and §1008.18(a).

(2) Collect information, wherever possible, directly from the individual to whom it pertains. See subsection (e)(2) of the Act and §1009.19(a).

(3) Inform individuals from whom information is collected of the authority for collection, the principal purposes for which the information will be used, the routine uses that will be made of the information, and the effects of not furnishing the information. See subsection (e)(3) of the Act and §1008.19(b).

(4) Collect, maintain, use or disseminate no information concerning an individual's rights guaranteed by the First Amendment, unless:

(i) The individual has volunteered such; or

(ii) The information is expressly authorized by statute to be collected, maintained, used or disseminated; or

Department of Energy

§ 1008.4

(iii) The activities involved are pertinent to and within the scope of an authorized law enforcement activity. See subsection (e)(7) of the Act and §1008.18(b).

(5) Advise their supervisors of the existence or proposal of any system of records which retrieves information about individuals by the individual's name or other identifying number, symbol, or identifying particulars assigned to the individual.

(6) Maintain an accounting, in the prescribed form, of all disclosures of information other than those to officers or employees who have a need for the record in the performance of their duties and those required under the Freedom of Information Act. See subsection (c) of the Act.

(7) Disclose no records other than to DOE personnel without the advance written consent of the individual, except as authorized by 5 U.S.C. 552a(b) including routine uses published in the FEDERAL REGISTER.

(8) Maintain and process information concerning individuals with care to insure that no inadvertent disclosure of the information is made. See subsection (e)(10) of the Act.

(9) Inform the proper DOE authorities of any information maintained in a DOE system of records which is not authorized by the Privacy Act of 1974.

(c) Heads of Headquarters Divisions and Offices and heads of the other DOE locations shall review annually the systems of records subject to their responsibility to insure compliance with the requirements of the Privacy Act of 1974.

§1008.4 Procedures for identifying the individual making a request for access to or amendment of records.

(a) When a request for information about or for access to or correction of a record pertaining to an individual and contained in a system of records has been made pursuant to §1008.6, valid identification of the individual making the request shall be required before information will be given, access granted or a correction considered, to insure that information is given, corrected, or records disclosed or corrected only at the request of the proper person.

(b) Subject to paragraphs (c) and (d) of this section, an individual making a request may establish his identity by:

(1) Including with his request, if submitted by mail, a photocopy of two identifying documents bearing his name and signature, one of which shall bear his current home or business address and date of birth; or

(2) Appearing at the appropriate DOE location during the regular business hours and presenting either of the following:

(i) One identifying document bearing the individual's photograph and signature, such as a driver's license or passport; or

(ii) Two identifying documents bearing the individual's name and signature, one of which shall bear the individual's current home or business address and date of birth; or

(3) Providing such other proof of identity as the Privacy Act Officer deems satisfactory in the circumstances of a particular request.

(c) If the Privacy Act Officer or the appropriate System Manager determines that the information in a record is so sensitive that unauthorized access could cause harm or embarrassment to the individual whose record is involved, or if the individual making the request is unable to produce satisfactory evidence of identity under paragraph (b) or (d) of this section, the individual making the request may be required to submit a notarized statement attesting to his identity and his understanding of the criminal penalties provided under section 1001 of title 18 of the United States Code for making false statements to a Government agency and under subsection (i)(3) of the Act for obtaining records under false pretenses. Copies of these statutory provisions and forms of such notarized statements may be obtained upon request from the Privacy Act Officer, Headquarters, Department of Energy, Washington, DC.

(d) When an individual acting as the parent of a minor or the legal guardian of the person to whom a record pertains makes a request pursuant to §1008.6 of this part:

§ 1008.5

(1) Such an individual shall establish his personal identity in the same manner required in either paragraph (b) or (c) of this section.

(2) In addition, such an individual shall establish his identity in the representative capacity of parent or legal guardian. In the case of the parent of a minor, the proof of identity shall be a certified or authenticated copy of the minor's birth certificate. In the case of the legal guardian of a person who has been declared incompetent due to physical or mental incapacity or age by a court of competent jurisdiction, the proof of identity shall be a certified or authenticated copy of the order from a court of competent jurisdiction.

(3) A parent or legal guardian may act only for a living individual, not for a decedent. Requests for the records of decedents will be handled under the Freedom of Information Act (5 U.S.C. 552).

§ 1008.5 Effect of the Freedom of Information Act (FOIA).

(a) DOE shall not rely on any exemption contained in the Freedom of Information Act (5 U.S.C. 552) to withhold from the individual to whom it pertains, any record which is otherwise accessible to such individual under this part.

(b) DOE shall rely on subsection (b) of the Privacy Act to withhold information from a person other than the person to whom the record pertains only when the information is also exempt from disclosure under the FOIA.

(c) Where a request for access to records is submitted pursuant to both the FOIA and the Privacy Act, the DOE shall, to the maximum extent possible, process the request under the provisions of this part, including the time limits of this part.

Subpart B—Requests for Access or Amendment

§ 1008.6 Procedures for Privacy Act requests.

(a) Any individual may—

(1) Ask the DOE whether a system of records maintained by the DOE contains records about him or her;

10 CFR Ch. X (1–1–16 Edition)

(2) Request access to information pertaining to him or her that is maintained in a DOE system of records;

(3) Request that information about him or her in a DOE system of records be amended or corrected. Requests for correction or amendment may include inquiries concerning:

(i) Whether such information is relevant or necessary to accomplish a purpose that DOE is required to accomplish by statute or Executive Order; or

(ii) If the information is to be used by the DOE in making a determination about the individual, whether the information is as accurate, relevant, timely, or complete as is reasonably necessary to assure fairness in the determination.

(b) Requests submitted pursuant to this section shall:

(1) Be in writing and signed by the individual making the request;

(2) State that the request is a "Privacy Act Access" or "Privacy Act Amendment" request;

(3) Include the identification information required by §1008.4;

(4) Specify, if possible, the title and identifying number of the system of records as listed in DOE's published notices of system of records;

(5) Provide if possible any additional information to aid DOE in responding to the request, for example, a description of the records sought;

(6) Indicate, as appropriate, the time, place, and form of access sought.

(c) Any request not addressed and marked as specified in paragraph (a) of this section shall be forwarded immediately to the appropriate Privacy Act Officer. An improperly addressed request will not be deemed to have been received for purposes of measuring time periods pursuant to §§1008.7 and 1008.10 until actual receipt by the appropriate Privacy Act Officer. The individual making the request shall be notified that the request was improperly addressed and the date when the request was received by the Privacy Act Officer.

(d) Assistance in preparing an access request pursuant to this section may be obtained from any DOE Privacy Act Officer at the locations listed at §1008.2(e).

Department of Energy

§ 1008.8

(e) An individual shall not be required to state a reason or otherwise justify his request for information or access to a record pertaining to him/her that is contained in a system of records.

§ 1008.7 Processing of requests.

(a) Receipt of a request made in accordance with §1008.6 shall be promptly acknowledged by the Privacy Act Officer.

(b) Each request shall be acted upon promptly. Every effort will be made to respond within ten working days of the date of receipt by the System Manager or designee. If a response cannot be made within ten working days, the appropriate Privacy Act Officer shall send an interim response providing information on the status of the request, including an estimate of the time within which action is expected to be taken on the request and asking for any further information as may be necessary to respond to the request. Action will be completed as soon as possible, but not later than 20 working days after receipt of the original specific inquiry. In unusual circumstances and for good cause, the appropriate Privacy Act Officer may decide that action cannot be completed within the initial 20 working days. In such case, the appropriate Privacy Act Officer will advise the individual of the reason for the delay and the date (not to exceed an additional 20 working days) by which action can be expected to be completed.

(c) The term *unusual circumstances* as used in this section includes situations where a search for requested records from inactive storage is necessary; cases where a voluminous amount of data is involved; instances where information on other individuals must be separated or expunged from the particular record; and cases where consultation with other agencies which have substantial interest in the response to the request is necessary.

(d) Upon receiving a request, the Privacy Act Officer shall ascertain which System Manager or Managers of the DOE have primary responsibility for, custody of, or concern with the system or systems of records subject to the request and shall forward the request to such System Manager or Managers.

The System Manager or Managers shall promptly identify and, in consultation with the General Counsel, review the records encompassed by the request.

(e) Where the request is for access to or information about records, after reviewing the material the System Manager or Managers concerned shall transmit to the Privacy Act Officer the requested material. The transmission to the Privacy Act Officer shall include any recommendation that the request be granted or wholly or partially denied and shall set forth any exemption categories supporting denials. Any denial recommendation must be concurred in by the appropriate General Counsel.

(f) Where the request is for correction or amendment of records, after reviewing the material the System Manager or Managers shall transmit a recommended decision to the Privacy Act Officer. Any recommendation that the request be granted or wholly or partially denied shall cite the exemption relied on and set forth the policy considerations supporting a denial. Any recommendation of denial must be concurred in by General Counsel.

§1008.8 Action in response to a request for access: disclosure of requested information to subject individuals.

(a) Consistent with the recommendation of the System Manager and the concurrence of the appropriate General Counsel, the Privacy Act Officer shall provide to the requesting individual the information about or access to a record or information pertaining to the individual contained in a system of records, unless the request is being denied in accordance with §1008.9 of this part. The Privacy Act Officer shall notify the individual of such determination and provide the following information:

(1) Whether there is information or a record pertaining to him that is contained in a system of records;

(2) The methods of access as set forth in paragraph (b) of this section;

(3) The place at which the record or information may be inspected;

(4) The earliest date on which the record or information may be inspected and the period of time that the record

§ 1008.9

10 CFR Ch. X (1-1-16 Edition)

or information will remain available for inspection. In no event shall the earliest date be later than thirty calendar days from the date of notification.

(5) An indication that copies of the records are enclosed, or the estimated date by which a copy of the record could be mailed and the estimate of fees that would be charged to provide other than the first copy of the record, pursuant to §1008.13.

(6) The fact that the individual, if he wishes, may be accompanied by another person during the in-person review of the record or information, provided that the individual shall first furnish to the Privacy Act Officer a written statement authorizing disclosure of that individual's record in the accompanying person's presence; and

(7) Any additional requirements that must be satisfied in order to provide information about or to grant access to the requested record or information.

(b) The following methods of access to records or information pertaining to an individual and contained in a system of records may be available to that individual depending on the circumstances of a particular request:

(1) A copy of the record may be enclosed with the initial response in accordance with paragraph (a) of this section;

(2) Inspection in person may be arranged during the regular business hours of the DOE in the office specified by the Privacy Act Officer;

(3) Transfer of records to a Federal facility more convenient to the individual may be arranged, but only if the Privacy Act Officer determines that a suitable facility is available, that the individual's access can be properly supervised at that facility, and that transmittal of the records or information to that facility will not unduly interfere with operations of the DOE or involve unreasonable costs, in terms of money or manpower; and

(4) The requested number of copies in addition to the initial copy may be mailed at the request of the individual, subject to payment of the fees prescribed in §1008.13.

(c) If the Privacy Act Officer believes, based upon a recommendation of the System Manager and the agen-

cy's medical officer, that disclosure of medical and/or psychological information directly to an individual could have an adverse effect upon that individual, the individual may be asked:

(1) To designate in writing a physician or mental health professional to whom he would like the records to be disclosed; or

(2) To submit a signed statement by his physician or a mental health professional indicating that, in his view, disclosure of the requested records or information directly to the individual will not have an adverse effect upon the individual. If the individual refuses to designate a physician or mental health professional, or to submit a signed statement from his physician or mental health professional as provided in paragraphs (c) (1) and (2) of this section, the request will be considered denied, and the appeal rights provided in §1008.11 will be available to the individual.

(d) The Privacy Act Officer shall supply such other information and assistance at the time of an individual's review of his record as is necessary to make the record intelligible to the individual.

(e) The DOE will, as required by subsection (d)(1), assure an individual's right "to review his or her record and have a copy made of all or any portion thereof in a form comprehensible to him." However, original records will be made available to individuals only under the supervision of the Privacy Act Officer or his designee. Individuals will be provided at their request with a copy, but not the original, of records pertaining to them.

§ 1008.9 Action in response to a request for access: initial denial of access.

(a) A request by an individual for information about or access to a record or information pertaining to that individual that is contained in a system of records may be denied only upon a determination by the appropriate System Manager, with the concurrence of the appropriate General Counsel, that:

(1) The record is subject to an exemption under §1008.12;

Department of Energy

§ 1008.10

(2) The record is information compiled in reasonable anticipation of a civil action or proceeding; or

(3) The individual has unreasonably failed to comply with the procedural requirements of this part.

(b) The Privacy Act Officer shall give written notice of the denial of a request of information about or access to records or information pertaining to the individual and contained in a system of records. Such written notice shall be sent by certified or registered mail, return receipt requested and shall include the following information:

(1) The System Manager's name and title;

(2) The reasons for the denial, including citation to the appropriate sections of the Privacy Act and this part; and

(3) Notification of the individual's right to appeal the denial pursuant to §1008.11 and to administrative and judicial review under 5 U.S.C. 552a(g)(1)(B), as limited by 552a(g)(5).

(c) Nothing in this section shall:

(1) Require the furnishing of information or records that are not retrieved by the name or by some other identifying number, symbol or identifying particular of the individual making the request;

(2) Prevent a System Manager from waiving any exemption authorizing the denial of records, in accordance with §1008.12.

§1008.10 Action in response to a request for correction or amendment of records.

(a) The Privacy Act Officer must respond in writing to the requester for amendment of a record within 10 working days of receipt. This response shall inform the requester of the decision whenever possible.

(b) If the decision cannot be reached within 10 working days, the requester shall be informed of the reason for delay and the date (within 20 working days) it is expected that the decision will be made.

(c) The Privacy Act Officer, consistent with the recommendation of the System Manager or Managers, as concurred in by the appropriate General Counsel, if appropriate, shall do one of the following:

(1) Instruct the System Manager to make the requested correction or amendment; and advise the individual in writing of such action, providing either a copy of the corrected or amended record, or a statement as to the means whereby the correction or amendment was accomplished in cases where a copy cannot be provided (for example, erasure of information from a record maintained only in an electronic data bank); or

(2) Inform the individual in writing that his request is denied in whole or in part. Such denial shall be sent by certified or registered mail, return receipt requested, and shall provide the following information:

(i) The System Manager's name and title;

(ii) The reasons for the denial; including citation to the appropriate sections of the Act and this part; and

(iii) Notification of the individual's right to appeal the denial pursuant to §1008.11 and to administrative and judicial review under 5 U.S.C. 552a(g)(1)(B), as limited by 5 U.S.C. 552a(g)(5).

(iv) Notification of the right of the individual to submit a statement of disagreement consistent with §1008.11(g).

(d) Whenever an individual's record is amended pursuant to a request by that individual, the Privacy Act Officer or the System Manager, as appropriate, shall notify all persons and agencies to which the amended portion of the record had been disclosed prior to its amendment, if an accounting of such disclosure was required by the Act. The notification shall request a recipient agency maintaining the record to acknowledge receipt of the notification, to correct or amend the record and to apprise an agency or person to which it had disclosed the record of the substance of the amendment.

(e) The following criteria will be taken into account by the DOE in reviewing a request for amendment:

(1) The sufficiency of the evidence submitted by the individual;

(2) The factual accuracy of the information;

(3) The relevance and necessity of the information in relation to the purpose for which it was collected;

§ 1008.11

10 CFR Ch. X (1-1-16 Edition)

(4) If such information is used in making any determination about the individual, whether the information is as accurate, relevant, timely, and complete as is reasonably necessary to assure fairness to the individual in such determination;

(5) The degree of possibility that denial of the request could unfairly result in a determination adverse to the individual;

(6) The nature of the record sought to be corrected or amended; and

(7) The propriety and feasibility of complying with the specific means of amendment requested by the individual.

(f) The DOE will not undertake to gather evidence for the individual, but does reserve the right to verify the evidence that the individual submits.

(g) Amendment of a record requested by an individual may be denied upon a determination that:

(1) The individual has failed to establish, by a preponderance of the evidence, the propriety of the amendment in relation to the criteria stated in paragraph (c) of this section;

(2) The record sought to be amended was compiled in a terminated judicial, quasi-judicial or quasi-legislative proceeding to which the individual was a party or participant;

(3) The record sought to be amended is the subject of a pending judicial, quasi-judicial or quasi-legislative proceeding to which the individual is a party or participant;

(4) The amendment would violate a duly enacted statute or promulgated regulation;

(5) The individual has unreasonably failed to comply with the procedural requirements of this part; or

(6) The record has been properly exempted from the provisions of subsection (d) of the Act.

(h) Nothing in this section shall restrict the DOE from granting in part or denying in part a request for amendment of records.

[45 FR 61577, Sept. 16, 1980; 46 FR 31637, June 17, 1981]

§ 1008.11 Appeals of denials of requests pursuant to § 1008.6.

(a) Any individual may appeal the denial of a request made by him for infor-

mation about or for access to or correction or amendment of records. An appeal shall be filed within 30 calendar days after receipt of the denial. When an appeal is filed by mail, the postmark is conclusive as to timeliness. The appeal shall be in writing and must be signed by the individual. The words "PRIVACY ACT APPEAL" should appear in capital letters on the envelope and the letter. Appeals of denials relating to records maintained in government-wide systems of records reported by the OPM, shall be filed, as appropriate, with the Assistant Director for Agency Compliance and Evaluation, Office of Personnel Management (OPM), 1900 E Street, NW., Washington, DC 20415. All other appeals relating to DOE records shall be directed to the Director, Office of Hearings and Appeals (OHA), Department of Energy, Headquarters, Washington, DC.

(b) An appeal not addressed and marked as specified in paragraph (a) of this section shall be forwarded immediately to the Assistant Director for Agency Compliance and Evaluation, OPM, or the Director, OHA, as appropriate. An appeal that is not properly addressed by an individual shall not be deemed to have been received for purposes of time periods in this section until actual receipt of the appeal by the Assistant Director, OPM, or the Director, OHA. In each instance when an appeal so forwarded is received, the individual filing the appeal shall be notified that the appeal was improperly addressed and the date when the appeal was received by the Assistant Director, OPM, or the Director, OHA.

(c) The appeal shall include the following:

(1) A copy of the original request for access or for amendment;

(2) A copy of the initial denial; and

(3) A statement of the reasons why the initial denial is believed to be in error.

(d) The records or record to which the individual was denied access, or which was requested to be corrected or amended, will be supplied to the appropriate appeal authority by the Privacy Act Officer who issued the initial denial. While such records normally will comprise the entire record on appeal,

Department of Energy

§ 1008.12

the appeal authority may seek such additional information as is necessary to assure that the final determination is fair and equitable.

(e) No personal appearance or hearing upon appeal will be allowed.

(f) The appropriate appeal authority for DOE records shall act upon the appeal and issue a final determination in writing no later than 20 working days from the date on which the appeal is received. However, the appeal authority may extend the ten-day period upon a determination that a fair and equitable review cannot be made within that period. In such cases the individual shall be advised in writing of the reason for the extension and of the estimated date by which a final determination will be issued. The final determination shall be issued not later than the 30th working day after receipt of the appeal unless unusual circumstances, as defined in §1008.7, are present, whereupon an additional 30 days may be extended.

(g) If an appeal of a denial of access is granted, a copy of the determination shall be transmitted promptly to the individual, the Privacy Act Officer and the appropriate System Manager. Upon receipt of the determination, the Privacy Act Officer promptly shall take action consistent with §1008.8.

(h) If an appeal of a denial of correction or amendment is granted, the final determination shall identify the specific corrections or amendments to be made. A copy of the determination shall be transmitted promptly to the individual, the Privacy Act Officer and the appropriate System Manager. Upon receipt of the determination, the Privacy Act Officer promptly shall take steps to insure that the actions set forth in §1008.10 (a) and (b) are taken.

(i) If the appeal of a denial of access is denied, the final determination shall state the reasons for the denial and shall be transmitted promptly to the individual, the Privacy Act Officer and the appropriate System Manager. The determination shall also include a statement identifying the right of the individual to administrative and judicial review pursuant to 5 U.S.C. 552a(g)(1)(B) as limited by 5 U.S.C. 552a(g)(5).

(j) If the appeal of a denial of correction or amendment is denied, the final determination shall state the reasons for the denial and shall be transmitted promptly to the individual, the Privacy Act Officer and the appropriate System Manager.

(1) The determination also shall include the following:

(i) Notice of the right of the individual to file with the Privacy Act Officer a concise, signed statement of reasons for disagreeing with the final determination, receipt of which statement will be acknowledged by the Privacy Act Officer.

(ii) An indication that any disagreement statement filed by the individual will be noted and appended to the disputed record and that a copy of the statement will be provided by the Privacy Act Officer or the System Manager, as appropriate, to persons and agencies to which the record is disclosed subsequent to the date of receipt of such statement;

(iii) An indication that the DOE shall append to any disagreement statement filed by the individual a copy of the final determination or a summary thereof, which determination or summary also will be provided to persons and agencies to which the disagreement statement is disclosed; and,

(iv) A statement of the right of the individual to administrative and judicial review under 5 U.S.C. 552a(g)(1)(B), as limited by 5 U.S.C. 552a(g)(5).

(2) Although a copy of the final determination or a summary thereof will be treated as part of the individual's record for purposes of disclosure in instances where the individual has filed a disagreement statement, it will not be subject to correction or amendment by the individual.

(3) Where an individual files a statement of disagreement consistent with paragraph (j)(1) of this section, the Privacy Act Officer shall take steps to insure that the actions provided in paragraphs (j)(1) (i), (ii) and (iii) of this section are taken.

§ 1008.12 Exemptions.

(a) *General exemptions*—(1) *Generally.* 5 U.S.C. 552a(j)(2) allows the exemption of any system of records within the

DOE from any part of section 552a except subsections (b), (c)(1) and (2), (e)(4)(A) through (F) (e)(6), (7), (9), (10), and (11), and (i) of the Act if the system of records is maintained by a DOE component which performs as its principal function any activity pertaining to the enforcement of criminal laws, including police efforts to prevent, control, or reduce crime or to apprehend criminals, and which consists of:

(i) Information compiled for the purpose of identifying individual criminal offenders and alleged offenders;

(ii) Information compiled for the purpose of a criminal investigation, including reports of informants and investigators, and associated with an identifiable individual; or

(iii) Reports identifiable to an individual compiled at any stage of the process of enforcement of the criminal laws from arrest or indictment through release from supervision.

(2) *Applicability of general exemptions to DOE systems of records*—(i) *Investigative Files of the Inspector General (DOE-54)*. This system of records is being exempted pursuant to subsection (j)(2) of the Act in order to aid the Office of the Inspector General in the performance of its law enforcement function. The system is exempted from subsections (c)(3) and (4); (d)(1)–(4); (e)(1)–(3); (4)(G), (H), and (I); (5) and (8); and (g) of the Act. The system is exempt from these provisions for the following reasons: notifying an individual at the individual's request of the existence of records in an investigative file pertaining to such individual, or granting access to an investigative file could (A) interfere with investigative and enforcement proceedings and with co-defendants' right to a fair trial; (B) disclose the identity of confidential sources and reveal confidential information supplied by these sources; and (C) disclose investigative techniques and procedures.

(ii) *Law Enforcement Investigative Records (DOE-84)*. This system of records is being exempted pursuant to subsection (j)(2) of the Act to enable the Office of Counterintelligence to carry out its duties and responsibilities as they pertain to its law enforcement function. The system is exempted from subsections (c)(3) and (4), (d), (e) (1), (2), and (3), (e)(4) (G) and (H), (e)(8), (f), and

(g) of the Act. The system is exempt from these provisions for the following reasons: Notifying an individual at the individual's request of the existence of records in an investigative file pertaining to such individual, or granting access to an investigative file could interfere with investigative and enforcement proceedings and with co-defendants' right to a fair trial; disclose the identity of confidential sources and reveal confidential information supplied by these sources; and disclose investigative techniques and procedures.

(b) *Specific exemptions*. Subsection (k) of the Privacy Act establishes seven categories of systems of records which may be exempted from subsections (c)(3), (d), (e)(1), (e)(4)(G), (H) and (I), and (7) of the Act. The Department has exempted systems of records under four of these provisions, as follows:

(1) *Classified material*. (i) Subsection (k)(1) permits exemption of systems of records that are specifically authorized under criteria established under statute or Executive Order to be kept secret in the interest of national defense or foreign policy, and are in fact properly classified pursuant to such statute or Executive Order. Restricted Data and Formerly Restricted Data under the Atomic Energy Act of 1954, as amended, are included in this exemption.

(ii) The DOE systems of records listed below have been exempted under subsection (k)(1) to the extent they contain classified information, in order to prevent serious damage to the national defense or foreign policy that could arise from providing individuals access to classified information. Systems exempted under subsection (k)(1) are:

(A) Alien Visits and Participation (DOE-52).

(B) Clearance Board Cases (DOE-46).

(C) Security Correspondence Files (DOE-49).

(D) Foreign Travel Records (DOE-27)

(E) Legal Files (Claims, Litigations, Criminal Violation, Patents, and other Legal Files) (DOE-41).

(F) Personnel Security Clearance Files (DOE-43).

(G) Personnel Security Clearance Index (Automated) (DOE-42).

Department of Energy

§ 1008.12

(H) Special Access Authorization for Categories of Classified Information (DOE-44).

(I) Administrative and Analytical Records and Reports (DOE-81).

(J) Law Enforcement Investigative Records (DOE-84).

(K) Employee Concerns Program Records (DOE-3)

(L) Whistleblower Investigation, Hearing and Appeal Records (DOE-7)

(M) Intelligence Related Access Authorization (DOE-15)

(2) *Investigatory material compiled for law enforcement purposes.* (i) Subsection (k)(2) permits the exemption of investigatory material compiled for law enforcement purposes: *Provided, however,* That if any individual is denied any right, privilege, or benefit to which he would otherwise be entitled by Federal law, or for which he would otherwise be eligible, as a result of the maintenance of such material, such material shall be provided to such individual, except to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence.

(ii) The DOE systems of records listed below have been exempted under subsection (k)(2) in order to prevent subjects of investigation from frustrating the investigatory process through access to records about themselves or as a result of learning the identities of confidential informants; to prevent disclosure of investigative techniques; to maintain the ability to obtain necessary information; and thereby to insure the proper functioning and integrity of law enforcement activities. Systems of records exempted under subsection (k)(2) are:

(A) Alien Visits and Participation (DOE-52).

(B) Clearance Board Cases (DOE-46).

(C) Security Correspondence Files (DOE-49).

(D) Foreign Travel Records (DOE-27).

(E) Legal Files (Claims, Litigation, Criminal Violations, Patents, and other Legal Files) (DOE-41).

(F) Personnel Security Clearance Files (DOE-43).

(G) Personnel Security Clearance Index (Automated) (DOE-42).

(H) Special Access Authorization for Categories of Classified Information (DOE-44).

(I) DOE Personnel and General Employment Records (DOE-1) (only personnel investigative records concerning current and former DOE employees and applicants for employment by DOE).

(J) Investigative Files of the Inspector General (DOE-54) (only investigative records concerning past and present DOE employees).

(K) Administrative and Analytical Records and Reports (DOE-81).

(L) Law Enforcement Investigative Records (DOE-84).

(M) Allegation-Based Inspections Files of the Office of Inspector General (DOE-83).

(N) Employee Concerns Program Records (DOE-3)

(O) Whistleblower Investigation, Hearing and Appeal Records (DOE-7)

(P) Intelligence Related Access Authorization (DOE-15)

(3) *Investigatory material compiled for determining suitability for Federal employment.* (i) Subsection (k)(5) permits exemption of systems of records that contain investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualification for Federal civilian employment, military service, Federal contracts, or access to classified information, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence.

(ii) The DOE systems of records listed below have been exempted under subsection (k)(5) to the extent they contain the kinds of records described in subsection (k)(5) in order to maintain DOE's ability to obtain candid information on candidates for employment, contracts, or access to classified

§ 1008.13

information and to fulfill commitments made to sources to protect the confidentiality of information, and thereby to facilitate proper selection or continuation of the best applicants or persons for a given position or contract. Systems exempted under subsection (k)(5) are:

- (A) DOE Personnel and General Employment Records (DOE-1);
- (B) Personnel Security Clearance Files (DOE-43);
- (C) Investigative Files of the Inspector General (DOE-54);
- (D) Alien Visits and Participation (DOE-52);
- (E) Clearance Board Cases (DOE-46);
- (F) Security Correspondence Files (DOE-49);
- (G) Foreign Travel Records (DOE-27);
- (H) Legal Files (Claims, Litigation, Criminal Violations, Patents, and other Legal Files) (DOE-41);
- (I) Personnel Security Clearance Index (Automated) (DOE-42);
- (J) Special Access Authorization for Categories of Classified Information (DOE-44);
- (K) DOE Personnel: Supervisor-Maintained Personnel Records (DOE-2);
- (L) Applications for DOE Employment (DOE-4);
- (M) Administrative and Analytical Records and Reports (DOE-81);
- (N) Law Enforcement Investigative Records (DOE-84).
- (O) Allegation-Based Inspections Files of the Office of Inspector General (DOE-83).
- (P) Employee Concerns Program Records (DOE-3)
- (Q) Whistleblower Investigation, Hearing and Appeal Records (DOE-7)
- (R) Intelligence Related Access Authorization (DOE-15)

(4) *Testing or examination material.* (i) Subsection (k)(6) permits exemption of systems of records that include testing or examination material used solely to determine individual qualifications for appointment or promotion in the Federal service, the disclosure of which would compromise the objectivity or fairness of the testing or examination process.

(ii) The DOE systems of records listed below have been exempted to the extent they contain testing or examination material in order to protect the

10 CFR Ch. X (1-1-16 Edition)

integrity of the personnel testing and evaluation process and to avoid providing individuals with unfair advantage, by premature or unfair disclosure of testing or rating information. Systems exempted under subsection (k)(6) are:

(A) (DOE-2) DOE Personnel: Supervisor-Maintained Personnel Records.

(B) (DOE-4) Applications for DOE Employment.

(C) (DOE-1) DOE Personnel and General Employment Records.

(c) *Application of exemptions to particular requests.* (1) The Privacy Act Officer, consistent with the recommendation of the System Manager and with concurrence of the appropriate General Counsel, may make available records which the DOE is authorized to withhold under this section.

(2) With respect to records containing material or information that would reveal the identity of a source who was given an assurance of confidentiality, a determination to make records available pursuant to paragraph (c)(1) of this section shall be made only if the source consents to the release of such information to the individual, or if it is determined that the material or information is not adverse or detrimental to the individual, or for good cause shown. The exercise of discretion with respect to waiver of the exemption shall be final.

(3) Prior to making a determination to deny access to a record in a system of records covered by exemption (k)(1) for classified material (see paragraph (b)(1) of this section), the System Manager shall consult with the Director, Division of Classification, to verify the current classification status of the information in the requested record.

[45 FR 61577, Sept. 16, 1980, as amended at 60 FR 35836, July 12, 1995; 62 FR 67519, Dec. 24, 1997; 67 FR 4171, Jan. 29, 2002]

§ 1008.13 Fees.

(a) The only fees to be charged to or collected from an individual under the provisions of this part are for copying records at the request of the individual. The fee charged shall be consistent with the fee schedule set forth in paragraph (b) of this section.

(1) No fees shall be charged or collected for the following: Search for and

Department of Energy

§ 1008.15

retrieval of records; review of records; copying by the DOE incident to granting access; copying at the initiative of the DOE without a request from the individual; copying when the aggregate of fees for copying is \$25 or less; time spent providing copies; transportation of records and personnel; and first class postage.

(2) It is the policy of the DOE to provide an individual with one copy of each record corrected or amended pursuant to request without charge.

(3) As required by the Office of Personnel Management in its published regulations implementing the Act, the DOE will charge no fee for a single copy of a personnel record covered by that Commission's Government-wide published notice of systems of records.

(b) The schedule of fees is as follows:

(1) \$.10 per copy of each page.

(2) For other forms of copying and other forms of materials (e.g., cassettes, computer materials), the direct cost of the materials, personnel, and equipment shall be charged, but only with prior specific approval of the person making the request, when such charges would be in excess of \$25.

(c) The Privacy Act Officer may, upon application by an individual, furnish any records without charge or at a reduced rate, if the Privacy Act Officer determines that such waiver or reduction of fees is in the public interest.

(d) Payment shall be made by check or money order payable to the United States Department of Energy.

(e) Advance payment of all or part of the fees may be required at the discretion of the Privacy Act Officer. Unless the individual requesting the copies specifically states that he is willing to pay whatever fees are assessed for meeting the request or, alternatively, specifies an amount in excess of \$25 that he is willing to pay and which in fact covers the anticipated fees for meeting the request, a request that is expected to involve assessed fees in excess of \$25 shall not be deemed to have been received, for purposes of the time periods specified in §§1008.7 and 1008.10 until the individual making the request is notified of the anticipated cost, agrees to bear it, and makes any advance deposit required. Such notification shall be made by the Privacy

Act Officer as promptly as possible after receipt of the request.

§ 1008.14 Requests under false pretenses.

Subsection (i)(3) of the Act provides that any person who knowingly and willingly requests or obtains any record concerning an individual from an agency under false pretenses shall be guilty of a misdemeanor and fined not more than \$5,000.

§ 1008.15 Civil remedies.

Subsection (g) of the Act provides that an individual may bring suit against the DOE for a violation of the Privacy Act, as follows:

(a) If the DOE refuses to grant a request for access to an individual's records, the court may order the DOE to provide the individual with access to his or her records and award reasonable litigation costs and attorney's fees.

(b) If the DOE refuses to amend a record or fails to review an amendment request as required by subsection (d)(3) of the Act, the court may order the DOE to make the amendment and award reasonable litigation costs and attorney's fees.

(c) If the DOE makes an adverse determination based on a record which is not maintained in an accurate, timely, relevant, and complete manner, the individual may be awarded actual damages of at least \$1,000. In order to prevail, the individual must show that:

(1) The DOE's action was willful and intentional; and

(2) The adverse determination was based on the faulty record.

(d) If the DOE fails to comply with any other provision of the Privacy Act or agency rule promulgated under the Act, in such a way as to have an adverse effect on the individual, the court may award actual damages of at least \$1,000. In order to prevail, the individual must show that:

(1) The DOE's action was willful and intentional; and

(2) The agency's action had an adverse effect on the individual; and

(3) The adverse effect was causally related to the DOE's action.

Subpart C—Disclosure to Third Parties

§ 1008.16 Prohibition against disclosure.

Except as provided in §1008.17, the DOE shall not disclose any record which is contained in a system of records, by any means of communication, to any agency or to any person other than the individual who is the subject of the record.

§ 1008.17 Conditions of disclosure.

(a) Notwithstanding the prohibition contained in §1008.16, the DOE may disclose records covered by this part (1) to the individual to whom the record pertains or to an agency or (2) to a person other than the individual where he has given his prior written consent to the disclosure or has made a written request for such disclosure.

(b) Notwithstanding the prohibition contained in §1008.16 the DOE may also disclose records covered by this part whenever the disclosure is:

(1) To officers and employees of the DOE who have a need for the record in the performance of their duties;

(2) Required under the Freedom of Information Act (5 U.S.C. 552);

(3) For a routine use (as defined in §1008.2) which is described in the FEDERAL REGISTER notice for the system of records which the disclosure is to be made;

(4) To the Bureau of the Census for purposes of planning or carrying out a census or survey or related activity pursuant to the provisions of title 13 of the United States Code;

(5) To a recipient who has provided the agency with advance adequate written assurance that the record will be used solely as a statistical research or reporting record, and the record is to be transferred in a form that is not individually identifiable;

(6) To the National Archives of the United States as a record which has sufficient historical or other value to warrant its continued preservation by the United States Government, or for evaluation by the Administrator of General Services or his designee to determine whether the record has such value;

(7) To another agency or to an instrumentality of any governmental jurisdiction within or under the control of the United States for a civil or criminal law enforcement activity if the activity is authorized by law and if the head of the agency or instrumentality has made a written request to the DOE specifying the particular portion desired and the law enforcement activity for which the record is sought;

(8) To a person pursuant to a showing of compelling circumstances affecting the health or safety of an individual if upon such disclosure notification is transmitted to the last known address of such individual;

(9) To either House of Congress, or to any committee or subcommittee thereof, any joint committee of Congress or subcommittee of any such joint committee, to the extent of matter within its jurisdiction;

(10) To the Comptroller General, or any of his authorized representatives, in the course of the performance of the duties of the General Accounting Office;

(11) Pursuant to the order of a court of competent jurisdiction.

(c) Notwithstanding the prohibition contained in §1008.16 of this part, the DOE may also disclose records covered by this part when disseminating a corrected or amended record or notation of a disagreement statement as required by subsection (c)(4) of the Act.

§ 1008.18 Accounting for disclosures.

(a) For each disclosure of information contained in a system of records under his control, except disclosures to authorized officers and employees of DOE and disclosures required by the Freedom of Information Act, the appropriate System Manager shall keep an accurate accounting of:

(1) The date, nature, and purposes of each disclosure of a record made to any person or to another agency; and

(2) The name and address of the person or agency to which the disclosure was made.

(b) The accounting shall be retained for at least five years or the life of the record, whichever is longer, after the disclosure for which the accounting is made.

Department of Energy

§ 1008.21

(c) The accounting described in paragraph (a) of this section shall be made available to the individual named in the record upon written request to the Privacy Act Officer at the appropriate DOE location listed at §1008.2(c) of this part. However, the accounting shall not be revealed with respect to disclosures made under §1008.17(b)(7) of this part, pertaining to law enforcement activity; or with respect to disclosures involving system of records for which DOE had claimed an exemption from certain requirements of the Act, as provided in §1008.12 of this part.

(d) Whenever an amendment or correction of a record or a notation of dispute concerning the accuracy of records is made by the DOE in accordance with §§1008.10(a)(2)(iv) and 1008.11(g) of this part, DOE shall inform any person or other agency to whom the record was previously disclosed if an accounting of the disclosure was made pursuant to the requirements of paragraph (a) of this section, unless the disclosure was made pursuant to §1008.17(b)(7) of this part; or the disclosure involved a system of records of which DOE has claimed an exemption from certain requirements of the Act, as provided in §1008.12 of this part.

(e) The System Manager shall make reasonable efforts to serve notice on an individual when any record containing information about such individual in a DOE system of records is disclosed to any person under compulsory legal process when such process becomes a matter of public record.

(f) Prior to disclosing any record about an individual to any person other than an agency, unless the disclosure is pursuant to the Freedom of Information Act, the System Manager shall make reasonable efforts to assure that each record is accurate, complete, timely, and relevant for DOE's purposes.

§ 1008.19 Criminal penalties—improper disclosure.

Subsection (i)(1) of the Act provides that a Federal employee who willfully discloses information subject to the Privacy Act in violation of the Act or rules promulgated under it shall be guilty of a misdemeanor and fined up to \$5,000.

Subpart D—Maintenance and Establishment of Systems of Records

§ 1008.20 Content of systems of records.

(a) The DOE will maintain in its records only such information about an individual as is relevant and necessary to accomplish a purpose DOE is required to accomplish by statute or by Executive Order of the President, unless an exemption of this requirement has been claimed by DOE, as provided in §1008.12 of this part.

(b) The DOE will maintain no record describing how any individual exercises rights guaranteed by the First Amendment unless expressly authorized by statute or by the individual about whom the record is maintained or unless it is pertinent to and within the scope of an authorized law enforcement activity.

(c) The DOE will maintain all records that are used by it to make any determination about any individual with such accuracy, relevance, timeliness and completeness as is reasonably necessary to assure fairness to the individual in such determination.

§ 1008.21 Collection of information by DOE about an individual for a system of records.

(a) The DOE will collect information, to the greatest extent practicable, directly from the subject individual when the use of the information may result in adverse determinations about an individual's rights, benefits and privileges under Federal programs, unless an exemption from the Act to this requirement has been claimed by DOE as provided in §1008.12

(b) Unless an exemption from the Act has been claimed by DOE under subsection (j)(2), as provided in §1008.12, DOE shall inform each individual whom it asks to supply information, on the form or other means by which it uses to collect the information, or on a separate form that can be retained by the individual, of the following:

(1) The authority (whether granted by statute or by Executive Order of the President) that authorizes the solicitation of the information and whether

§ 1008.22

the provision of such information is mandatory or voluntary;

(2) The principal purpose or purposes for which the information is intended to be used;

(3) The routine uses that may be made of the information, as published in the FEDERAL REGISTER pursuant to the requirements of the Act; and

(4) The effect on the individual, if any, of not providing all or any part of the requested information.

§ 1008.22 Use and collection of social security numbers.

(a) The System Manager of each system of records which utilizes social security numbers as a method of identification without statutory authorization or authorization by regulation adopted prior to January 1, 1975, shall revise the system to avoid future collection and use of the social security numbers.

(b) Heads of Headquarters Divisions and Offices and heads of the other DOE locations shall insure that employees authorized to collect information from individuals are advised that individuals may not be required to furnish social security numbers without statutory authorization, and that individuals who are requested to provide social security numbers voluntarily must be advised that furnishing the number is not required and that no penalty or denial of benefits will flow from the refusal to provide it.

§ 1008.23 Public notice of systems of records.

(a) The DOE shall publish in the FEDERAL REGISTER at least annually a notice of the existence and character of each of its systems of records, which notice shall include:

(1) The name and location of the system;

(2) The categories of individuals on whom records are maintained in the system;

(3) The categories of records maintained in the system;

(4) Each routine use of the records contained in the system, including the categories of users and the purpose of such use, subject to paragraph (d) of this section;

10 CFR Ch. X (1-1-16 Edition)

(5) The policies and practices of the DOE regarding storage, retrievability, access controls, retention, and disposal of the records;

(6) The title and business address of the DOE official who is responsible for the system of records;

(7) The DOE procedures whereby an individual can be notified at his request if the system of records contains a record pertaining to him;

(8) The DOE procedures whereby an individual can be notified at his request about how he can gain access to any record pertaining to him contained in the system or records, and how he can contest its content; and

(9) The categories of source of records in the systems.

(b) Notwithstanding the requirements of paragraph (a) of this section, the notice of systems of records shall not necessarily include the information in paragraphs (a) (7) through (9) of this section if DOE has claimed a general or specific exemption from the requirements of the Act, as provided in § 1008.12.

(c) Copies of the notices as printed in the FEDERAL REGISTER shall be available at the DOE locations listed at § 1008.2(c). Requests by mail for copies of such notices should be sent to Privacy Act Officer, Headquarters, U.S. Department of Energy, Washington, DC, 20585. The first copy will be furnished free of charge. For each additional copy, the costs of printing and handling may be charged.

(d) DOE shall publish in the FEDERAL REGISTER notice of any new routine use or intended routine use of a record in the system of records, at least 30 calendar days prior to the implementation of any new routine use of a record in a system of records, or at least 30 calendar days prior to publication of the annual notice of such routine uses, as provided in paragraph (a) of this section, an opportunity for interested persons to submit written comments consisting of data, views, or arguments regarding such use to DOE, shall be provided.

§ 1008.24 Criminal penalties—failure to publish a system notice.

Subsection (i)(2) of the Act provides that an agency officer or employee who

Department of Energy

§ 1009.2

willfully maintains a system of records without publishing a system notice as required by subsection (e)(4) of the Act shall be guilty of a misdemeanor and fined up to \$5,000.

PART 1009—GENERAL POLICY FOR PRICING AND CHARGING FOR MATERIALS AND SERVICES SOLD BY DOE

AUTHORITY: Sec. 644 of the Dept. of Energy Organization Act, Pub. L. 95-91, 91 Stat. 565 (42 U.S.C. 7254); Atomic Energy Act of 1954, as amended (42 U.S.C. 2011 *et seq.*) "User Fee Statute", 31 U.S.C. 483a, 42 U.S.C. 2111, 2112 and 2201.

SOURCE: 45 FR 70430, Oct. 24, 1980, unless otherwise noted.

§ 1009.1 Purpose and scope.

(a) This part establishes Department of Energy policy for establishing prices and charges for Department materials and services sold to organizations and persons outside the Federal Government.

(b) This part applies to all elements of the Department except the Federal Energy Regulatory Commission.

§ 1009.2 Definitions.

For the purposes of this regulation:

(a) *Allocable cost* means a cost allocable to a particular cost objective (i.e., a specific function, project, process, or organization) if the costs incurred are chargeable or assignable to such cost objectives in accordance with the relative benefits received or other equitable relationships. Subject to the foregoing, a cost is allocable if:

- (1) It is incurred solely for materials or services sold;
- (2) It benefits both the customer and the Department in proportions that can be approximated through use of reasonable methods, or
- (3) It is necessary to the overall operation of the Department and is deemed to be assignable in part to materials or services sold.

(b) *Byproduct material* means any radioactive material (except special nuclear material) yielded in or made radioactive by exposure to the radiation incident to the process of producing or utilizing special nuclear material.

(c) *Charges* means an accumulation of job related costs for materials and services sold by the Department.

(d) *Commercial price* means the price that a willing buyer is currently paying or would pay a willing seller for materials and services in the market.

(e) *Direct cost* is any cost which can be identified specifically with a particular final cost objective.

(f) *Full cost* includes all direct costs and all allocable costs of producing the material or providing the service consistent with generally accepted accounting principles. Direct costs and allocable costs may include, but are not limited to, the following cost elements:

- (1) Direct labor.
- (2) Personnel fringe benefits.
- (3) Direct materials.
- (4) Other direct costs.
- (5) Processing materials and chemicals.
- (6) Power and other utilities.
- (7) Maintenance.
- (8) Indirect cost, i.e., common costs which cannot be directly assigned to specific cost objectives and are therefore allocated to cost objectives in a systematic cost allocation process.
- (9) Depreciation which includes depreciation costs that are directly associated with facilities and equipment utilized, and allocated depreciation costs for support and general facilities and equipment.
- (10) Added factor includes general and administrative costs and other support costs that are incurred for the benefit of the Department, an organizational unit or a material or service as a whole.

(g) *Prices* means the monetary amounts generally established and published for recurring sales of the same materials and services.

(h) *Source material* means uranium or thorium.

(i) *Special nuclear material* means plutonium, uranium enriched in the isotope 233 or in the isotope 235, or any materials artificially enriched by any

§ 1009.3

of the foregoing. Special Nuclear Material does not include source material.

§ 1009.3 Policy.

(a) The Department's price or charge for materials and services sold to persons and organizations outside the Federal Government shall be the Government's full cost for those materials and services, unless otherwise provided in this part.

(b) Exceptions from the Department pricing and charging policy may be authorized in accordance with the following provisions:

(1) Prices and charges for byproduct material sold pursuant to 42 U.S.C. 2111 and 2112 *et seq.* shall be either the full cost recovery price or the commercial price, whichever is higher, except that lower prices and charges may be established by the Department if it is determined that such lower prices and charges (i) will provide reasonable compensation to the Government for such material, (ii) will not discourage the use of or the development of sources of supply independent of the DOE of such material, and (iii) will encourage research and development. In individual cases, if (ii) and (iii) cannot be equally accommodated, greater weight will be given to encouragement of research and development.

(2) Prices and charges for materials and services sold pursuant to 42 U.S.C. 2201 shall be either the full cost recovery price or the commercial price, whichever is higher, except that lower prices and charges may be established by the Department if it is determined that such lower prices and charges will provide reasonable compensation to the Government and will not discourage the development of sources of supply independent of the DOE of such material.

§ 1009.4 Exclusions.

This part shall not apply when the amount to be priced or charged is otherwise provided for by statute, Executive Order, or regulations. This part does not apply to:

(a) Fees, penalties and fines established by the Economic Regulatory Administration of DOE.

(b) Power marketing and related activities of the Alaska Power Adminis-

10 CFR Ch. X (1-1-16 Edition)

tration, the Bonneville Power Administration, the Southeastern Power Administration, the Southwestern Power Administration, and the Western Power Administration.

(c) Crude oil, natural gas and other petroleum products and services by or from the Naval Petroleum and Oil Shale Reserves.

(d) Uranium enriching services, source material, and special nuclear material.

(e) Requests for information under the Freedom of Information Act and the Privacy Act.

(f) Energy data and information provided by the Energy Information Administration.

(g) Crude oil and related materials and services from the Strategic Petroleum Reserve.

(h) The disposal of excess and surplus property.

(i) Access permits for uranium enrichment technology issued in accordance with 10 CFR part 725.

(j) Materials and services provided pursuant to a cooperative agreement, research assistance contract or grant, or made available to a DOE contractor in connection with a contract, the primary purpose of which is to procure materials or services for DOE.

§ 1009.5 Supersessions.

Prices which appear in FEDERAL REGISTER Notices previously published by the Department, or its predecessor agencies, for materials and services covered by this rule are hereby superseded.

§ 1009.6 Dissemination of prices and charges.

Current prices and charges for specific materials and services are available from the DOE laboratory or office providing the material or service, or from the responsible program office. If this office cannot be determined, inquiries regarding the appropriate contact office should be addressed to the Office, of Finance and Accounting, Product Accounting and Pricing Branch, Mail Station 4A-139, 1000 Independence Avenue, SW., Washington, DC 20585.

SOURCE: 61 FR 35088, July 5, 1996, unless otherwise noted.

Subpart A—Conduct of Employees

§ 1010.101 General.

This subpart applies to employees of the Department of Energy (DOE), excluding employees of the Federal Energy Regulatory Commission.

[61 FR 35088, July 5, 1996, as amended at 75 FR 75376, Dec. 3, 2010]

§ 1010.102 Cross-references to employee ethical conduct standards, financial disclosure regulations, and other conduct rules.

Employees of DOE are subject to the Standards of Ethical Conduct for Employees of the Executive Branch at 5 CFR part 2635, the DOE regulation at 5 CFR part 3301 which supplements the executive branch-wide standards, the executive branch-wide financial disclosure regulations at 5 CFR part 2634, the executive branch-wide financial interests regulations at 5 CFR part 2640, and

the executive branch-wide employee responsibilities and conduct regulation at 5 CFR part 735.

[61 FR 35088, July 5, 1996, as amended at 63 FR 30111, June 3, 1998]

§ 1010.103 Reporting wrongdoing.

(a) Employees shall, in fulfilling the obligation of 5 CFR 2635.101(b)(11), report fraud, waste, abuse, and corruption in DOE programs, including on the part of DOE employees, contractors, subcontractors, grantees, or other recipients of DOE financial assistance, to the Office of Inspector General or other appropriate Federal authority.

(b) All alleged violations of the ethical restrictions described in section 1010.102 that are reported in accordance with (a) of this section to an appropriate authority within the Department shall in turn be referred by that authority to the designated agency ethics official or his delegatee, or the Inspector General.

§ 1010.104 Cooperation with the Inspector General.

Employees shall respond to questions truthfully under oath when required, whether orally or in writing, and must provide documents and other materials concerning matters of official interest. An employee is not required to respond to such official inquiries if answers or testimony may subject the employee to criminal prosecution.

Subpart B—Procedures for Exemption of Scientific and Technological Information Communications From Post-Employment Restrictions

SOURCE: 75 FR 75376, Dec. 3, 2010, unless otherwise noted.

§ 1010.201 Purpose and scope.

(a) This subpart sets forth criteria for the types of communications on scientific or technological matters permitted under 18 U.S.C. 207(j)(5) by defining the term “scientific or technological information.” This subpart also establishes the procedures for receiving and approving requests from former employees of the executive branch to make such communications to DOE.

§ 1010.202

(b) This subpart applies to any former employee of the executive branch subject to the post-employment conflict of interest restrictions in 18 U.S.C. 207(a), (c), and (d), who wishes to communicate with DOE under the exemption in 18 U.S.C. 207(j)(5) for the purpose of furnishing scientific or technological information to DOE offices or officials.

(c) This subpart does not apply to a former DOE employee's testimony as an expert in an adversarial proceeding in which the United States is a party or has a direct and substantial interest.

§ 1010.202 Definitions.

For purposes of this subpart:

(a) *Agency designee* means an individual serving in a position in DOE requiring appointment by the President of the United States with the advice and consent of the Senate.

(b) *Authorized communication* means any transmission of scientific or technological information to any DOE office or official that is approved by DOE under § 1010.203 of this subpart.

(c) *DOE* means the U.S. Department of Energy.

(d) *Scientific or technological information* means: Information of a scientific or technological character, such as technical or engineering information relating to the natural sciences. The exception does not extend to information associated with a nontechnical discipline such as law, economics, or political science.

(e) *Incidental references or remarks*. Provided the former employee's communication primarily conveys information of a scientific or technological character, the entirety of the communication will be deemed made solely for the purpose of furnishing such information notwithstanding an incidental reference or remark:

(1) Unrelated to the matter to which the post-employment restriction applies;

(2) Concerning feasibility, risk, cost, speed of implementation, or other considerations when necessary to appreciate the practical significance of the basic scientific or technological information provided; or

10 CFR Ch. X (1–1–16 Edition)

(3) Intended to facilitate the furnishing of scientific or technological information, such as those references or remarks necessary to determine the kind and form of information required or the adequacy of information already supplied.

§ 1010.203 Procedures for review and approval of requests.

(a) Any former employee of the executive branch subject to the constraints of the post-employment restrictions of 18 U.S.C. 207(a), (c), and (d) who wishes to communicate scientific or technological information to DOE must contact the DOE office with which the former employee wishes to communicate and request authorization to make such communication. This request must be in writing and address, in detail, information regarding each of the factors set forth in paragraphs (c)(1) through (c)(6) and (c)(8) of this section.

(b) In consultation with the Designated Agency Ethics Official (DAEO), the agency designee in the office with cognizance over the matter must advise the former employee in writing whether the proposed communication is an authorized communication. This authority cannot be delegated, except to another individual serving in a position in DOE requiring appointment by the President of the United States with the advice and consent of the Senate.

(c) In deciding whether a proposed communication is an authorized communication, the agency designee receiving the request and the DAEO must consider the following factors:

(1) Whether the former employee has relevant scientific or technical qualifications;

(2) Whether the former employee has qualifications that are otherwise unavailable to both the former employee's current employer and DOE;

(3) The nature of the scientific or technological information to be conveyed;

(4) The former employee's position prior to termination;

(5) The extent of the former employee's involvement in the matter at issue during his or her employment, including:

Department of Energy

§ 1013.2

(i) The former employee's involvement in the same particular matter involving specific parties;

(ii) The time elapsed since the former employee's participation in such matter; and

(iii) The offices within the Federal department or agency involved in the matter both during the former employee's period of employment in the executive branch and at the time the request is being made;

(6) The existence of pending or anticipated matters before the Federal government from which the former employee or his or her current employer may financially benefit, including contract modifications, grant applications, and proposals; and

(7) Whether DOE's interests would be served by allowing the proposed communication; and

(8) Any other relevant information.

AUTHORITY: 31 U.S.C. 3801-3812; 28 U.S.C. 2461 note.

SOURCE: 53 FR 44385, Nov. 3, 1988, unless otherwise noted.

§ 1013.1 Basis and purpose.

(a) *Basis.* This part implements the Program Fraud Civil Remedies Act of 1986, Pub. L. 99-509, sections 6101-6104, 100 Stat. 1874 (October 21, 1986), codified at 31 U.S.C. 3801-3812. 31 U.S.C. 3809 of the statute requires each authority head to promulgate regulations necessary to implement the provisions of the statute.

(b) *Purpose.* This part (1) establishes administrative procedures for imposing civil penalties and assessments against persons who make, submit, or present, or cause to be made, submitted, or presented, false, fictitious, or fraudulent claims or written statements to authorities or to their agents, and (2) specifies the hearing and appeal rights of persons subject to allegations of liability for such penalties and assessments.

§ 1013.2 Definitions.

ALJ means an Administrative Law Judge in the authority appointed pursuant to 5 U.S.C. 3105 or detailed to the authority pursuant to 5 U.S.C. 3344.

Authority means the Department of Energy.

Authority head means the Secretary or the Under Secretary of the Department of Energy.

§ 1013.2

10 CFR Ch. X (1-1-16 Edition)

Benefit means, in the context of “statement,” anything of value, including but not limited to any advantage, preference, privilege, license, permit, favorable decision, ruling, status, or loan guarantee.

Claim means any request, demand, or submission—

(a) Made to the authority for property, services, or money (including money representing grants, loans, insurance, or benefits);

(b) Made to a recipient of property, services, or money from the authority or to a party to a contract with the authority—

(1) For property or services if the United States—

(i) Provided such property or services;

(ii) Provided any portion of the funds for the purchase of such property or services; or

(iii) Will reimburse such recipient or party for the purchase of such property or services; or

(2) For the payment of money (including money representing grants, loans, insurance, or benefits) if the United States—

(i) Provided any portion of the money requested or demanded; or

(ii) Will reimburse such recipient or party for any portion of the money paid on such request or demand; or

(c) Made to the authority which has the effect of decreasing an obligation to pay or account for property, services, or money.

Complaint means the administrative complaint served by the reviewing official on the defendant under §1013.7 of this part.

Defendant means any person alleged in a complaint under §1013.7 of this part to be liable for a civil penalty or assessment under §1013.3 of this part.

Department means the Department of Energy.

Government means the United States Government.

Individual means a natural person.

Initial decision means the written decision of the ALJ required by §1013.10 or §1013.37 of this part, and includes a revised initial decision issued following a remand or a motion for reconsideration.

Investigating official means the Inspector General of the Department of Energy or an officer or employee of the Inspector General designated by the Inspector General and serving in a position for which the rate of basic pay is not less than the minimum rate of basic pay for grade GS-16 under the General Schedule.

Knows or has reason to know, means that a person, with respect to a claim or statement—

(a) Has actual knowledge that the claim or statement is false, fictitious, or fraudulent;

(b) Acts in deliberate ignorance of the truth or falsity of the claim or statement; or

(c) Acts in reckless disregard of the truth or falsity of the claim or statement.

Makes, wherever it appears, shall include the terms presents, submits, and causes to be made, presented, or submitted. As the context requires, *making* or *made*, shall likewise include the corresponding forms of such terms.

Person means any individual, partnership, corporation, association, or private organization, and includes the plural of that term.

Representative means an attorney, who is a member in good standing of the bar of any State, Territory, or possession of the United States or of the District of Columbia or the Commonwealth of Puerto Rico, and designated by a party in writing.

Reviewing official means the General Counsel of the Department or his designee who is—

(a) Not subject to supervision by, or required to report to, the investigating official;

(b) Not employed in the organizational unit of the authority in which the investigating official is employed; and

(c) Serving in a position for which the rate of basic pay is not less than the minimum rate of basic pay for grade GS-16 under the General Schedule.

Statement means any representation, certification, affirmation, document, record, or accounting or bookkeeping entry made—

(a) With respect to a claim or to obtain the approval or payment of a

Department of Energy

§ 1013.3

claim (including relating to eligibility to make a claim); or

(b) With respect to (including relating to eligibility for)—

(1) A contract with, or a bid or proposal for a contract with; or

(2) A grant, loan, or benefit from, the authority, or any State, political subdivision of a State, or other party, if the United States Government provides any portion of the money or property under such contract or for such grant, loan, or benefit, or if the Government will reimburse such State, political subdivision, or party for any portion of the money or property under such contract or for such grant, loan, or benefit.

§ 1013.3 Basis for civil penalties and assessments.

(a) *Claims.* (1) Except as provided in paragraph (c) of this section, any person who makes a claim that the person knows or has reason to know—

(i) Is false, fictitious, or fraudulent;

(ii) Includes or is supported by any written statement which asserts a material fact which is false, fictitious, or fraudulent;

(iii) Includes or is supported by any written statement that—

(A) Omits a material fact;

(B) Is false, fictitious, or fraudulent as a result of such omission; and

(C) Is a statement in which the person making such statement has a duty to include such material fact; or

(iv) Is for payment for the provision of property or services which the person has not provided as claimed, shall be subject, in addition to any other remedy that may be prescribed by law, to a civil penalty of not more than \$9,000 for each such claim.

(2) Each voucher, invoice, claim form, or other individual request or demand for property, services, or money constitutes a separate claim.

(3) A claim shall be considered made to the authority, recipient, or party when such claim is actually made to an agent, fiscal intermediary, or other entity, including any State or political subdivision thereof, acting for or on behalf of such authority, recipient, or party.

(4) Each claim for property, services, or money is subject to a civil penalty

regardless of whether such property, services, or money is actually delivered or paid.

(5) If the Government has made any payment (including transferred property or provided services) on a claim, a person subject to a civil penalty under paragraph (a)(1) of this section shall also be subject to an assessment of not more than twice the amount of such claim or that portion thereof that is determined to be in violation of paragraph (a)(1) of this section. Such assessment shall be in lieu of damages sustained by the Government because of such claim.

(b) *Statements.* (1) Except as provided in paragraph (c) of this section, any person who makes a written statement that—

(i) The person knows or has reason to know—

(A) Asserts a material fact which is false, fictitious, or fraudulent; or

(B) Is false, fictitious, or fraudulent because it omits a material fact that the person making the statement has a duty to include in such statement, and

(ii) Contains or is accompanied by an express certification or affirmation of the truthfulness and accuracy of the contents of the statement, shall be subject, in addition to any other remedy that may be prescribed by law, to a civil penalty of not more than \$9,000 for each such statement.

(2) Each written representation, certification, or affirmation constitutes a separate statement.

(3) A statement shall be considered made to the authority when such statement is actually made to an agent, fiscal intermediary, or other entity, including any State or political subdivision thereof, acting for or on behalf of such authority.

(c) *Application for certain benefits.* (1) In the case of any claim or statement made by any individual relating to any of the benefits listed in paragraph (c)(2) of this section received by such individual, such individual may be held liable for penalties and assessments under this section only if such claim or statement is made by such individual in making application for such benefits with respect to such individual's eligibility to receive such benefits.

§ 1013.4

(2) For purposes of paragraph (c) of this section, the term “benefits” means benefits under part A of the Energy Conservation in Existing Buildings Act of 1976, which are intended for the personal use of the individual who receives the benefits or for a member of the individual’s family.

(d) No proof of specific intent to defraud is required to establish liability under this section.

(e) In any case in which it is determined that more than one person is liable for making a claim or statement under this section, each such person may be held liable for a civil penalty under this section.

(f) In any case in which it is determined that more than one person is liable for making a claim under this section on which the Government has made payment (including transferred property or provided services), an assessment may be imposed against any such person or jointly and severally against any combination of such persons.

[53 FR 44385, Nov. 3, 1988, as amended at 62 FR 46184, Sept. 2, 1997; 74 FR 66033, Dec. 14, 2009; 79 FR 20, Jan. 2, 2014]

§ 1013.4 Investigation.

(a) If an investigating official concludes that a subpoena pursuant to the authority conferred by 31 U.S.C. 3804(a) is warranted—

(1) The subpoena so issued shall notify the person to whom it is addressed of the authority under which the subpoena is issued and shall identify the records or documents sought;

(2) The investigating official may designate a person to act on his or her behalf to receive the documents sought; and

(3) The person receiving such subpoena shall be required to tender to the investigating official or the person designated to receive the documents a certification that the documents sought have been produced, or that such documents are not available and the reasons therefor, or that such documents, suitably identified, have been withheld based upon the assertion of an identified privilege.

(b) If the investigating official concludes that an action under the Program Fraud Civil Remedies Act may be

10 CFR Ch. X (1–1–16 Edition)

warranted, the investigating official shall submit a report containing the findings and conclusions of such investigation to the reviewing official.

(c) Nothing in this section shall preclude or limit an investigating official’s discretion to refer allegations directly to the Department of Justice for suit under the False Claims Act or other civil relief, or to preclude or limit such official’s discretion to defer or postpone a report or referral to the reviewing official to avoid interference with a criminal investigation or prosecution.

(d) Nothing in this section modifies any responsibility of an investigating official to report violations of criminal law to the Attorney General.

§ 1013.5 Review by the reviewing official.

(a) If, based on the report of the investigating official under §1013.4(b) of this part, the reviewing official determines that there is adequate evidence to believe that a person is liable under §1013.3 of this part, the reviewing official shall transmit to the Attorney General a written notice of the reviewing official’s intention to issue a complaint under §1013.7 of this part.

(b) Such notice shall include—

(1) A statement of the reviewing official’s reasons for issuing a complaint;

(2) A statement specifying the evidence that supports the allegations of liability;

(3) A description of the claims or statements upon which the allegations of liability are based;

(4) An estimate of the amount of money or the value of property, services, or other benefits requested or demanded in violation of §1013.3 of this part;

(5) A statement of any exculpatory or mitigating circumstances that may relate to the claims or statements known by the reviewing official or the investigating official; and

(6) A statement that there is a reasonable prospect of collecting an appropriate amount of penalties and assessments.

Department of Energy

§ 1013.9

§ 1013.6 Prerequisites for issuing a complaint.

(a) The reviewing official may issue a complaint under § 1013.7 of this part only if—

(1) The Department of Justice approves the issuance of a complaint in a written statement described in 31 U.S.C. 3803(b)(1), and

(2) In the case of allegations of liability under § 1013.3(a) of this part with respect to a claim, the reviewing official determines that, with respect to such claim or a group of related claims submitted at the same time such claim is submitted (as defined in paragraph (b) of this section), the amount of money or the value of property or services demanded or requested in violation of § 1013.3(a) of this part does not exceed \$150,000.

(b) For the purposes of this section, a related group of claims submitted at the same time shall include only those claims arising from the same transaction (*e.g.*, grant, loan, application, or contract) that are submitted simultaneously as part of a single request, demand, or submission.

(c) Nothing in this section shall be construed to limit the reviewing official's authority to join in a single complaint against a person claims that are unrelated or were not submitted simultaneously, regardless of the amount of money, or the value of property or services, demanded or requested.

§ 1013.7 Complaint.

(a) On or after the date the Department of Justice approves the issuance of a complaint in accordance with 31 U.S.C. 3803(b)(1), the reviewing official may serve a complaint on the defendant, as provided in § 1013.8 of this part.

(b) The complaint shall state—

(1) The allegations of liability against the defendant, including the statutory basis for liability, an identification of the claims or statements that are the basis for the alleged liability, and the reasons why liability allegedly arises from such claims or statements;

(2) The maximum amount of penalties and assessments for which the defendant may be held liable;

(3) Instructions for filing an answer to request a hearing, including a spe-

cific statement of the defendant's right to request a hearing by filing an answer and to be represented by a representative; and

(4) That failure to file an answer within 30 days of service of the complaint will result in the imposition of the maximum amount of penalties and assessments without right to appeal, as provided in § 1013.10 of this part.

(c) At the same time the reviewing official serves the complaint, he or she shall serve the defendant with a copy of these regulations.

§ 1013.8 Service of complaint.

(a) Service of a complaint must be made by certified or registered mail or by delivery in any manner authorized by Rule 4(d) of the Federal Rules of Civil Procedure. Service is complete upon receipt.

(b) Proof of service, stating the name and address of the person on whom the complaint was served, and the manner and date of service, may be made by—

(1) Affidavit of the individual serving the complaint by delivery;

(2) A United States Postal Service return receipt card acknowledging receipt; or

(3) Written acknowledgment of receipt by the defendant or his or her representative.

§ 1013.9 Answer.

(a) The defendant may request a hearing by filing an answer with the reviewing official within 30 days of service of the complaint. An answer shall be deemed to be a request for hearing.

(b) In the answer, the defendant—

(1) Shall admit or deny each of the allegations of liability made in the complaint;

(2) Shall state any defense on which the defendant intends to rely;

(3) May state any reasons why the defendant contends that the penalties and assessments should be less than the statutory maximum; and

(4) Shall state the name, address, and telephone number of the person authorized by the defendant to act as defendant's representative, if any.

(c) If the defendant is unable to file an answer meeting the requirements of paragraph (b) of this section within the

§ 1013.10

time provided, the defendant may, before the expiration of 30 days from service of the complaint, file with the reviewing official a general answer denying liability and requesting a hearing, and a request for an extension of time within which to file an answer meeting the requirements of paragraph (b) of this section. The reviewing official shall file promptly with the ALJ the complaint, the general answer denying liability, and the request for an extension of time as provided in §1013.11 of this part. For good cause shown, the ALJ may grant the defendant up to 30 additional days within which to file an answer meeting the requirements of paragraph (b) of this section.

§ 1013.10 Default upon failure to file an answer.

(a) If the defendant does not file an answer within the time prescribed in §1013.9(a) of this part, the reviewing official may refer the complaint to the ALJ.

(b) Upon the referral of the complaint, the ALJ shall promptly serve on defendant in the manner prescribed in §1013.8 of this part, a notice that an initial decision shall be issued under this section.

(c) The ALJ shall assume the facts alleged in the complaint to be true, and, if such facts establish liability under §1013.3 of this part, the ALJ shall issue an initial decision imposing the maximum amount of penalties and assessments allowed under the statute.

(d) Except as otherwise provided in this section, by failing to file a timely answer, the defendant waives any right to further review of the penalties and assessments imposed under paragraph (c) of this section, and the initial decision shall become final and binding upon the parties 30 days after it is issued.

(e) If, before such an initial decision becomes final, the defendant files a motion with the ALJ seeking to reopen on the grounds that extraordinary circumstances prevented the defendant from filing an answer, the initial decision shall be stayed pending the ALJ's decision on the motion.

(f) If, on such motion, the defendant can demonstrate extraordinary cir-

10 CFR Ch. X (1-1-16 Edition)

cumstances excusing the failure to file a timely answer, the ALJ shall withdraw the initial decision in paragraph (c) of this section, if such a decision has been issued, and shall grant the defendant an opportunity to answer the complaint.

(g) A decision of the ALJ denying a defendant's motion under paragraph (e) of this section is not subject to reconsideration under §1013.38 of this part.

(h) The defendant may appeal to the authority head the decision denying a motion to reopen by filing a notice of appeal with the authority head within 15 days after the ALJ denies the motion. The timely filing of a notice of appeal shall stay the initial decision until the authority head decides the issue.

(i) If the defendant files a timely notice of appeal with the authority head, the ALJ shall forward the record of the proceeding to the authority head.

(j) The authority head shall decide expeditiously whether extraordinary circumstances excuse the defendant's failure to file a timely answer based solely on the record before the ALJ.

(k) If the authority head decides that extraordinary circumstances excused the defendant's failure to file a timely answer, the authority head shall remand the case to the ALJ with instructions to grant the defendant an opportunity to answer.

(l) If the authority head decides that the defendant's failure to file a timely answer is not excused, the authority head shall reinstate the initial decision of the ALJ, which shall become final and binding upon the parties 30 days after the authority head issues such decision.

§ 1013.11 Referral of complaint and answer to the ALJ.

Upon receipt of an answer, the reviewing official shall file the complaint and answer with the ALJ.

§ 1013.12 Notice of hearing.

(a) When the ALJ receives the complaint and answer, the ALJ shall promptly serve a notice of hearing upon the defendant in the manner prescribed by §1013.8 of this part. At the same time, the ALJ shall send a copy

Department of Energy

§ 1013.17

of such notice to the representative for the Government.

(b) Such notice shall include—

(1) The tentative time, date, and place, and the nature of the hearing;

(2) The legal authority and jurisdiction under which the hearing is to be held;

(3) The matters of fact and law to be asserted;

(4) A description of the procedures for the conduct of the hearing;

(5) The name, address, and telephone number of the representative of the Government and of the defendant, if any; and

(6) Such other matters as the ALJ deems appropriate.

§ 1013.13 Parties to the hearing.

(a) The parties to the hearing shall be the defendant and the authority.

(b) Pursuant to 31 U.S.C. 3730(c)(5), a private plaintiff under the False Claims Act may participate in these proceedings to the extent authorized by the provisions of that Act.

§ 1013.14 Separation of functions.

(a) The investigating official, the reviewing official, and any employee or agent of the authority who takes part in investigating, preparing, or presenting a particular case may not, in such case or a factually related case—

(1) Participate in the hearing as the ALJ;

(2) Participate or advise in the initial decision or the review of the initial decision by the authority head, except as a witness or a representative in public proceedings; or

(3) Make the collection of penalties and assessments under 31 U.S.C. 3806.

(b) The ALJ shall not be responsible to, or subject to the supervision or direction of, the investigating official or the reviewing official.

(c) Except as provided in paragraph (a) of this section, the representative for the Government may be employed anywhere in the authority, including in the offices of either the investigating official or the reviewing official.

§ 1013.15 Ex parte contacts.

No party or person (except employees of the ALJ's office) shall communicate

in any way with the ALJ on any matter at issue in a case, unless on notice and opportunity for all parties to participate. This provision does not prohibit a person or party from inquiring about the status of a case or asking routine questions concerning administrative functions or procedures.

§ 1013.16 Disqualification of reviewing official or ALJ.

(a) A reviewing official or ALJ in a particular case may disqualify himself or herself at any time.

(b) A party may file with the ALJ a motion for disqualification of a reviewing official or an ALJ. Such motion shall be accompanied by an affidavit alleging personal bias or other reason for disqualification.

(c) Such motion and affidavit shall be filed promptly upon the party's discovery of reasons requiring disqualification, or such objections shall be deemed waived.

(d) Such affidavit shall state specific facts that support the party's belief that personal bias or other reason for disqualification exists and the time and circumstances of the party's discovery of such facts. It shall be accompanied by a certificate of the representative of record that it is made in good faith.

(e) Upon the filing of such a motion and affidavit, the ALJ shall proceed no further in the case until he or she resolves the matter of disqualification in accordance with paragraph (f) of this section.

(f)(1) If the ALJ determines that a reviewing official is disqualified, the ALJ shall dismiss the complaint without prejudice.

(2) If the ALJ disqualifies himself or herself, the case shall be reassigned promptly to another ALJ.

(3) If the ALJ denies a motion to disqualify, the authority head may determine the matter only as part of his or her review or the initial decision upon appeal, if any.

§ 1013.17 Rights of parties.

Except as otherwise limited by this part, all parties may—

(a) Be accompanied, represented, and advised by a representative;

§ 1013.18

- (b) Participate in any conference held by the ALJ;
- (c) Conduct discovery;
- (d) Agree to stipulations of fact or law, which shall be made part of the record;
- (e) Present evidence relevant to the issues at the hearing;
- (f) Present and cross-examine witnesses;
- (g) Present oral arguments at the hearing as permitted by the ALJ; and
- (h) Submit written briefs and proposed findings of fact and conclusions of law.

§ 1013.18 Authority of the ALJ.

- (a) The ALJ shall conduct a fair and impartial hearing, avoid delay, maintain order, and assure that a record of the proceeding is made.
- (b) The ALJ has the authority to—
 - (1) Set and change the date, time, and place of the hearing upon reasonable notice to the parties;
 - (2) Continue or recess the hearing in whole or in part for a reasonable period of time;
 - (3) Hold conferences to identify or simplify the issues, or to consider other matters that may aid in the expeditious disposition of the proceeding;
 - (4) Administer oaths and affirmations;
 - (5) Issue subpoenas requiring the attendance of witnesses and the production of documents at depositions or at hearings;
 - (6) Rule on motions and other procedural matters;
 - (7) Regulate the scope and timing of discovery;
 - (8) Regulate the course of the hearing and the conduct of representatives and parties;
 - (9) Examine witnesses;
 - (10) Receive, rule on, exclude, or limit evidence;
 - (11) Upon motion of a party, take official notice of facts; decide cases, in whole or in part, by summary judgment where there is no disputed issue of material fact;
 - (12) Conduct any conference, argument, or hearing on motions in person or by telephone; and
 - (13) Exercise such other authority as is necessary to carry out the responsibilities of the ALJ under this part.

10 CFR Ch. X (1–1–16 Edition)

- (c) The ALJ does not have the authority to find Federal statutes or regulations invalid.

§ 1013.19 Prehearing conferences.

- (a) The ALJ may schedule prehearing conferences as appropriate.
- (b) Upon the motion of any party, the ALJ shall schedule at least one prehearing conference at a reasonable time in advance of the hearing.
- (c) The ALJ may use prehearing conferences to discuss the following:
 - (1) Simplification of the issues;
 - (2) The necessity or desirability of amendments to the pleadings, including the need for a more definite statement;
 - (3) Stipulations and admissions of fact or as to the contents and authenticity of documents;
 - (4) Whether the parties can agree to submission of the case on a stipulated record;
 - (5) Whether a party chooses to waive appearance at an oral hearing and to submit only documentary evidence (subject to the objection of other parties) and written argument;
 - (6) Limitation of the number of witnesses;
 - (7) Scheduling dates for the exchange of witness lists and of proposed exhibits;
 - (8) Discovery;
 - (9) The time, date, and place for the hearing; and
 - (10) Such other matters as may tend to expedite the fair and just disposition of the proceedings.
- (d) The ALJ may issue an order containing all matters agreed upon by the parties or ordered by the ALJ at a prehearing conference.

§ 1013.20 Disclosure of documents.

- (a) Upon written request to the reviewing official, the defendant may review any relevant and material documents, transcripts, records, and other materials that relate to the allegations set out in the complaint and upon which the findings and conclusions of the investigating official under §1013.4(b) are based, unless such documents are subject to a privilege under Federal law. Upon payment of fees for duplication, the defendant may obtain copies of such documents.

Department of Energy

§ 1013.22

(b) Upon written request to the reviewing official, the defendant also may obtain a copy of all exculpatory information in the possession of the reviewing official or investigating official relating to the allegations in the complaint, even if it is contained in a document that would otherwise be privileged. If the document would otherwise be privileged, only that portion containing exculpatory information must be disclosed.

(c) The notice sent to the Attorney General from the reviewing official as described in §1013.5 of the part is not discoverable under any circumstances.

(d) The defendant may file a motion to compel disclosure of the documents subject to the provisions of this section. Such a motion may only be filed with the ALJ following the filing of an answer pursuant to §1013.9 of this part.

§ 1013.21 Discovery.

(a) The following types of discovery are authorized:

- (1) Requests for production of documents for inspection and copying;
- (2) Requests for admissions of the authenticity of any relevant document or of the truth of any relevant fact;
- (3) Written interrogatories; and
- (4) Depositions.

(b) For the purpose of this section and §§1013.22 and 1013.23 of this part, the term “documents” includes information, documents, reports, answers, records, accounts, papers, and other data and documentary evidence. Nothing contained herein shall be interpreted to require the creation of a document.

(c) Unless mutually agreed to by the parties, discovery is available only as ordered by the ALJ. The ALJ shall regulate the timing of discovery.

(d) *Motions for discovery.* (1) A party seeking discovery may file a motion with the ALJ. Such a motion shall be accompanied by a copy of the requested discovery, or in the case of depositions, a summary of the scope of the proposed deposition.

(2) Within ten days of service, a party may file an opposition to the motion and/or a motion for protective order as provided in §1013.24 of this part.

(3) The ALJ may grant a motion for discovery only if he or she finds that the discovery sought—

- (i) Is necessary for the expeditious, fair, and reasonable consideration of the issues;
- (ii) Is not unduly costly or burdensome;
- (iii) Will not unduly delay the proceeding; and
- (iv) Does not seek privileged information.

(4) The burden of showing that discovery should be allowed is on the party seeking discovery.

(5) The ALJ may grant discovery subject to a protective order under §1013.24 of this part.

(e) *Depositions.* (1) If a motion for deposition is granted, the ALJ shall issue a subpoena for the deponent, which may require the deponent to produce documents. The subpoena shall specify the time, date, and place at which the deposition will be held.

(2) The party seeking to depose shall serve the subpoena in the manner prescribed in §1013.8 of this part.

(3) The deponent may file with the ALJ a motion to quash the subpoena or a motion for a protective order within ten days of service.

(4) The party seeking to depose shall provide for the taking of a verbatim transcript of the deposition, which it shall make available to all other parties for inspection and copying.

(f) Each party shall bear its own costs of discovery.

§ 1013.22 Exchange of witness lists, statements and exhibits.

(a) At least 15 days before the hearing or at such other time as may be ordered by the ALJ, the parties shall exchange witness lists, copies of prior statements of proposed witnesses, and copies of proposed hearing exhibits, including copies of any written statements that the party intends to offer in lieu of live testimony in accordance with §1013.33(b) of this part. At the time the above documents are exchanged, any party that intends to rely on the transcript of deposition testimony in lieu of live testimony at the hearing, if permitted by the ALJ, shall provide each party with a copy of the

§ 1013.23

specific pages of the transcript it intends to introduce into evidence.

(b) If a party objects, the ALJ shall not admit into evidence the testimony of any witness whose name does not appear on the witness list or any exhibit not provided to the opposing party as provided above unless the ALJ finds good cause for the failure or that there is no prejudice to the objecting party.

(c) Unless another party objects within the time set by the ALJ, documents exchanged in accordance with paragraph (a) of this section shall be deemed to be authentic for the purpose of admissibility at the hearing.

§ 1013.23 Subpoenas for attendance at hearing.

(a) A party wishing to procure the appearance and testimony of any individual at the hearing may request that the ALJ issue a subpoena.

(b) A subpoena requiring the attendance and testimony of an individual may also require the individual to produce documents at the hearing.

(c) A party seeking a subpoena shall file a written request therefor not less than 15 days before the date fixed for the hearing unless otherwise allowed by the ALJ for good cause shown. Such request shall specify any documents to be produced and shall designate the witnesses and describe the address and location thereof with sufficient particularity to permit such witnesses to be found.

(d) The subpoena shall specify the time, date, and place at which the witness is to appear and any documents the witness is to produce.

(e) The party seeking the subpoena shall serve it in the manner prescribed in § 1013.8 of this part. A subpoena on a party or upon an individual under the control of a party may be served by first class mail.

(f) A party or the individual to whom the subpoena is directed may file with the ALJ a motion to quash the subpoena within ten days after service or on or before the time specified in the subpoena for compliance if it is less than ten days after service.

§ 1013.24 Protective order.

(a) A party or a prospective witness or deponent may file a motion for a

10 CFR Ch. X (1-1-16 Edition)

protective order with respect to discovery sought by an opposing party or with respect to the hearing, seeking to limit the availability or disclosure of evidence.

(b) In issuing a protective order, the ALJ may make any order which justice requires to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense, including one or more of the following:

(1) That the discovery not be had;

(2) That the discovery may be had only on specified terms and conditions, including a designation of the time or place;

(3) That the discovery may be had only through a method of discovery other than that requested;

(4) That certain matters not be inquired into, or that the scope of discovery be limited to certain matters;

(5) That discovery be conducted with no one present except persons designated by the ALJ;

(6) That the contents of discovery or evidence be sealed;

(7) That a deposition after being sealed be opened only by order of the ALJ;

(8) That a trade secret or other confidential research, development, commercial information, or facts pertaining to any criminal investigation, proceeding, or other administrative investigation not be disclosed or be disclosed only in a designated way; or

(9) That the parties simultaneously file specified documents or information enclosed in sealed envelopes to be opened as directed by the ALJ.

§ 1013.25 Witness fees.

The party requesting a subpoena shall pay the cost of the fees and mileage of any witness subpoenaed in the amounts that would be payable to a witness in a proceeding in United States District Court. A check for witness fees and mileage shall accompany the subpoena when served, except that when a subpoena is issued on behalf of the authority, a check for witness fees and mileage need not accompany the subpoena.

Department of Energy

§ 1013.29

§ 1013.26 Form, filing and service of papers.

(a) *Form.* (1) Documents filed with the ALJ shall include an original and two copies.

(2) Every pleading and paper filed in the proceeding shall contain a caption setting forth the title of the action, the case number assigned by the ALJ, and a designation of the paper (*e.g.*, motion to quash subpoena).

(3) Every pleading and paper shall be signed by, and shall contain the address and telephone number of the party or the person on whose behalf the paper was filed, or his or her representative.

(4) Papers are considered filed when they are mailed. Date of mailing may be established by a certificate from the party or its representative or by proof that the document was sent by certified or registered mail.

(b) *Service.* A party filing a document with the ALJ shall, at the time of filing, serve a copy of such document on every other party. Service upon any party of any document other than those required to be served as prescribed in §1013.8 of this part shall be made by delivering a copy or by placing a copy of the document in the United States mail, postage prepaid, and addressed to the party's last known address. When a party is represented by a representative, service shall be made upon such representative in lieu of the actual party.

(c) *Proof of service.* A certificate by the individual serving the document by personal delivery or by mail, setting forth the manner of service, shall be proof of service.

§ 1013.27 Computation of time.

(a) In computing any period of time under this part or in an order issued thereunder, the time begins with the day following the act, event, or default, and includes the last day of the period, unless it is a Saturday, Sunday, or legal holiday observed by the Federal government, in which event it includes the next business day.

(b) When the period of time allowed is less than seven days, intermediate Saturday, Sundays, and legal holidays observed by the Federal government

shall be excluded from the computation.

(c) Where a document has been served or issued by placing it in the mail, an additional five days will be added to the time permitted for any response.

§ 1013.28 Motions.

(a) Any application to the ALJ for an order or ruling shall be by motion. Motions shall state the relief sought, the authority relied upon, and the facts alleged, and shall be filed with the ALJ and served on all other parties.

(b) Except for motions made during a prehearing conference or at the hearing, all motions shall be in writing. The ALJ may require that oral motions be reduced to writing.

(c) Within 15 days after a written motion is served, or such other time as may be fixed by the ALJ, any party may file a response to such motion.

(d) The ALJ may not grant a written motion before the time for filing responses thereto has expired, except upon consent of the parties or following a hearing on the motion, but may overrule or deny such motion without awaiting a response.

(e) The ALJ shall make a reasonable effort to dispose of all outstanding motions prior to the beginning of the hearing.

§ 1013.29 Sanctions.

(a) The ALJ may sanction a person, including any party or representative, for—

(1) Failing to comply with an order, rule, or procedure governing the proceeding;

(2) Failing to prosecute or defend an action; or

(3) Engaging in other misconduct that interferes with the speedy, orderly, or fair conduct of the hearing.

(b) Any such sanction, including but not limited to those listed in paragraphs (c), (d), and (e) of this section, shall reasonably relate to the severity and nature of the failure or misconduct.

(c) When a party fails to comply with an order, including an order for taking a deposition, the production of evidence within the party's control, or a request for admission, the ALJ may—

§ 1013.30

(1) Draw an inference in favor of the requesting party with regard to the information sought;

(2) In the case of requests for admission, deem each matter of which an admission is requested to be admitted;

(3) Prohibit the party failing to comply with such order from introducing evidence concerning, or otherwise relying upon, testimony relating to the information sought; and

(4) Strike any part of the pleadings or other submissions of the party failing to comply with such request.

(d) If a party fails to prosecute or defend an action under this part commenced by service of a notice of hearing, the ALJ may dismiss the action or may issue an initial decision imposing penalties and assessments.

(e) The ALJ may refuse to consider any motion, request, response, brief or other document which is not filed in a timely fashion.

§ 1013.30 The hearing and burden of proof.

(a) The ALJ shall conduct a hearing on the record in order to determine whether the defendant is liable for a civil penalty or assessment under § 1013.3 of this part, and, if so, the appropriate amount of any such civil penalty or assessment considering any aggravating or mitigating factors.

(b) The authority shall prove defendant's liability and any aggravating factors by a preponderance of the evidence.

(c) The defendant shall prove any affirmative defenses and any mitigating factors by a preponderance of the evidence.

(d) The hearing shall be open to the public unless otherwise ordered by the ALJ for good cause shown.

§ 1013.31 Determining the amount of penalties and assessments.

(a) In determining an appropriate amount of civil penalties and assessments, the ALJ and the authority head, upon appeal, should evaluate any circumstances that mitigate or aggravate the violation and should articulate in their opinions the reasons that support the penalties and assessments they impose. Because of the intangible costs of fraud, the expense of inves-

10 CFR Ch. X (1-1-16 Edition)

tigating such conduct, and the need to deter others who might be similarly tempted, ordinarily double damages and a significant civil penalty should be imposed.

(b) Although not exhaustive, the following factors are among those that may influence the ALJ and the authority head in determining the amount of penalties and assessments to impose with respect to the misconduct (*i.e.*, the false, fictitious, or fraudulent claims or statement) charged in the complaint:

(1) The number of false, fictitious, or fraudulent claims or statements;

(2) The time period over which such claims or statements were made;

(3) The degree of the defendant's culpability with respect to the misconduct;

(4) The amount of money or the value of the property, services, or benefit falsely claimed;

(5) The value of the Government's actual loss as a result of the misconduct, including foreseeable consequential damages and the costs of investigation;

(6) The relationship of the amount imposed as civil penalties to the amount of the Government's loss;

(7) The potential or actual impact of the misconduct upon national defense, public health or safety, or public confidence in the management of Government programs and operations, including particularly the impact on the intended beneficiaries of such programs;

(8) Whether the defendant has engaged in a pattern of the same or similar misconduct;

(9) Whether the defendant attempted to conceal the misconduct;

(10) The degree to which the defendant has involved others in the misconduct or in concealing it;

(11) Where the misconduct of employees or agents is imputed to the defendant, the extent to which the defendant's practices fostered or attempted to preclude such misconduct;

(12) Whether the defendant cooperated in or obstructed an investigation of the misconduct;

(13) Whether the defendant assisted in identifying and prosecuting other wrongdoers;

(14) The complexity of the program or transaction, and the degree of the

defendant's sophistication with respect to it, including the extent of the defendant's prior participation in the program or in similar transactions;

(15) Whether the defendant has been found, in any criminal, civil, or administrative proceeding to have engaged in similar misconduct or to have dealt dishonestly with the Government of the United States or of a State, directly or indirectly; and

(16) The need to deter the defendant and others from engaging in the same or similar misconduct.

(c) Nothing in this section shall be construed to limit the ALJ or the authority head from considering any other factors that in any given case may mitigate or aggravate the offense for which penalties and assessments are imposed.

§ 1013.32 Location of hearing.

(a) The hearing may be held—

(1) In any judicial district of the United States in which the defendant resides or transacts business;

(2) In any judicial district of the United States in which the claim or statement in issue was made; or

(3) In such other place as may be agreed upon by the defendant and the ALJ.

(b) Each party shall have the opportunity to present argument with respect to the location of the hearing.

(c) The hearing shall be held at the place and at the time ordered by the ALJ.

§ 1013.33 Witnesses.

(a) Except as provided in paragraph (b) of this section, testimony at the hearing shall be given orally by witnesses under oath or affirmation.

(b) At the discretion of the ALJ, testimony may be admitted in the form of a written statement or deposition. Any such written statement must be provided to all other parties along with the last known address of such witness, in a manner which allows sufficient time for other parties to subpoena such witness for cross-examination at the hearing. Prior written statements of witnesses proposed to testify at the hearing and deposition transcripts shall be exchanged as provided in § 1013.22(a) of this part.

(c) The ALJ shall exercise reasonable control over the mode and order of interrogating witnesses and presenting evidence so as to (1) make the interrogation and presentation effective for the ascertainment of the truth, (2) avoid needless consumption of time, and (3) protect witnesses from harassment or undue embarrassment.

(d) The ALJ shall permit the parties to conduct such cross-examination as may be required for a full and true disclosure of the facts.

(e) At the discretion of the ALJ, a witness may be cross-examined on matters relevant to the proceeding without regard to the scope of his or her direct examination. To the extent permitted by the ALJ, cross-examination on matters outside the scope of direct examination shall be conducted in the manner of direct examination and may proceed by leading questions only if the witness is a hostile witness, an adverse party, or a witness identified with an adverse party.

(f) Upon motion of any party, the ALJ shall order witnesses excluded so that they cannot hear the testimony of other witnesses. This rule does not authorize exclusion of—

(1) A party who is an individual;

(2) In the case of a party that is not an individual, an officer or employee of the party appearing for the entity *pro se* or designated by the party's representative; or

(3) An individual whose presence is shown by a party to be essential to the presentation of its case, including an individual employed by the Government engaged in assisting the representative for the Government.

§ 1013.34 Evidence.

(a) The ALJ shall determine the admissibility of evidence.

(b) Except as provided in this part, the ALJ shall not be bound by the Federal Rules of Evidence. However, the ALJ may apply the Federal Rules of Evidence where appropriate, *e.g.*, to exclude unreliable evidence.

(c) The ALJ shall exclude irrelevant and immaterial evidence.

(d) Although relevant, evidence may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the

§ 1013.35

issues, or by considerations of undue delay or needless presentation of cumulative evidence.

(e) Although relevant, evidence may be excluded if it is privileged under Federal law.

(f) Evidence concerning offers of compromise or settlement shall be inadmissible to the extent provided in Rule 408 of the Federal Rules of Evidence.

(g) The ALJ shall permit the parties to introduce rebuttal witnesses and evidence.

(h) All documents and other evidence offered or taken for the record shall be open to examination by all parties, unless otherwise ordered by the ALJ pursuant to §1013.24 of this part.

§ 1013.35 The record.

(a) The hearing will be recorded and transcribed. Transcripts may be obtained following the hearing from the ALJ at a cost not to exceed the actual cost of duplication.

(b) The transcript of testimony, exhibits and other evidence admitted at the hearing, and all papers and requests filed in the proceeding constitute the record for the decision by the ALJ and the authority head.

(c) The record may be inspected and copied (upon payment of a reasonable fee) by anyone, unless otherwise ordered by the ALJ pursuant to §1013.24 of this part.

§ 1013.36 Post-hearing briefs.

The ALJ may require the parties to file post-hearing briefs. In any event, any party may file a post-hearing brief. The ALJ shall fix the time for filing such briefs, not to exceed 60 days from the date the parties receive the transcript of the hearing or, if applicable, the stipulated record. Such briefs may be accompanied by proposed findings of fact and conclusions of law. The ALJ may permit the parties to file reply briefs.

§ 1013.37 Initial decision.

(a) The ALJ shall issue an initial decision based only on the record, which shall contain findings of fact, conclusions of law, and the amount of any penalties and assessments imposed.

10 CFR Ch. X (1-1-16 Edition)

(b) The findings of fact shall include a finding on each of the following issues:

(1) Whether the claims or statements identified in the complaint, or any portions thereof, violate §1013.3 of this part;

(2) If the person is liable for penalties or assessments, the appropriate amount of any such penalties or assessments considering any mitigating or aggravating factors that he or she finds in the case, such as those described in §1013.31 of this part.

(c) The ALJ shall promptly serve the initial decision on all parties within 90 days after the time for submission of post-hearing briefs and reply briefs (if permitted) has expired. The ALJ shall at the same time serve all parties with a statement describing the right of any defendant determined to be liable for a civil penalty or assessment to file a motion for reconsideration with the ALJ or a notice of appeal with the authority head. If the ALJ fails to meet the deadline contained in this paragraph, he or she shall notify the parties of the reason for the delay and shall set a new deadline.

(d) Unless the initial decision of the ALJ is timely appealed to the authority head, or a motion for reconsideration of the initial decision is timely filed, the initial decision shall constitute the final decision of the authority head and shall be final and binding on the parties 30 days after it is issued by the ALJ.

§ 1013.38 Reconsideration of initial decision.

(a) Except as provided in paragraph (d) of this section, any party may file a motion for reconsideration of the initial decision within 20 days of receipt of the initial decision. If service was made by mail, receipt will be presumed to be five days from the date of mailing in the absence of contrary proof.

(b) Every such motion must set forth the matters claimed to have been erroneously decided and the nature of the alleged errors. Such motion shall be accompanied by a supporting brief.

(c) Responses to such motions shall be allowed only upon request of the ALJ.

Department of Energy

§ 1013.39

(d) No party may file a motion for reconsideration of an initial decision that has been revised in response to a previous motion for reconsideration.

(e) The ALJ may dispose of a motion for reconsideration by denying it or by issuing a revised initial decision.

(f) If the ALJ denies a motion for reconsideration, the initial decision shall constitute the final decision of the authority head and shall be final and binding on the parties 30 days after the ALJ denies the motion, unless the initial decision is timely appealed to the authority head in accordance with §1013.39.

(g) If the ALJ issues a revised initial decision, that decision shall constitute the final decision of the authority head and shall be final and binding on the parties 30 days after it is issued, unless it is timely appealed to the authority head in accordance with §1013.39 of this part.

§ 1013.39 Appeal to authority head.

(a) Any defendant who has filed a timely answer and who is determined in an initial decision to be liable for a civil penalty or assessment may appeal such decision to the authority head by filing a notice of appeal with the authority head in accordance with this section.

(b)(1) A notice of appeal may be filed at any time within 30 days after the ALJ issues an initial decision. However, if any party files a motion for reconsideration under §1013.38 of this part, consideration of the appeal shall be stayed automatically pending resolution of the motion for reconsideration.

(2) If a motion for reconsideration is timely filed, a notice of appeal may be filed within 30 days after the ALJ denies the motion or issues a revised initial decision, whichever applies.

(3) The authority head may extend the initial 30-day period for an additional 30 days if the defendant files with the authority head a request for an extension within the initial 30-day period and shows good cause.

(c) If the defendant files a timely notice of appeal with the authority head and the time for filing motions for reconsideration under §1013.38 of this part has expired, the ALJ shall forward

the record of the proceeding to the authority head.

(d) A notice of appeal shall be accompanied by a written brief specifying exceptions to the initial decision and reasons supporting the exceptions.

(e) The representative for the Government may file a brief in opposition to exceptions within 30 days of receiving the notice of appeal and accompanying brief.

(f) There is no right to appear personally before the authority head.

(g) There is no right to appeal any interlocutory ruling by the ALJ.

(h) In reviewing the initial decision, the authority head shall not consider any objection that was not raised before the ALJ unless a demonstration is made of extraordinary circumstances causing the failure to raise the objection.

(i) If any party demonstrates to the satisfaction of the authority head that additional evidence not presented at such hearing is material and that there were reasonable grounds for the failure to present such evidence at such hearing, the authority head shall remand the matter to the ALJ for consideration of such additional evidence.

(j) The authority head may affirm, reduce, reverse, compromise, remand, or settle any penalty or assessment determined by the ALJ in any initial decision.

(k) The authority head shall promptly serve each party to the appeal with a copy of the decision of the authority head and a statement describing the right of any person determined to be liable for a penalty or an assessment to seek judicial review.

(l) Unless a petition for review is filed as provided in 31 U.S.C. 3805 after a defendant has exhausted all administrative remedies under this part and within 60 days after the date on which the authority head serves the defendant with a copy of the authority head's decision, a determination that a defendant is liable under §1013.3 of this part is final and is not subject to judicial review.

§ 1013.40

§ 1013.40 Stays ordered by the Department of Justice.

If at any time the Attorney General or an Assistant Attorney General designated by the Attorney General transmits to the authority head a written finding that continuation of the administrative process described in this part with respect to a claim or statement may adversely affect any pending or potential criminal or civil action related to such claim or statement, the authority head shall stay the process immediately. The authority head may order the process resumed only upon receipt of the written authorization of the Attorney General.

§ 1013.41 Stay pending appeal.

(a) An initial decision is stayed automatically pending disposition of a motion for reconsideration or of an appeal to the authority head.

(b) No administrative stay is available following a final decision of the authority head.

§ 1013.42 Judicial review.

Section 3805 of title 31, United States Code, authorizes judicial review by an appropriate United States District Court of a final decision of the authority head imposing penalties or assessments under this part and specifies the procedures for such review.

§ 1013.43 Collection of civil penalties and assessments.

Sections 3806 and 3808(b) of title 31, United States Code, authorizes actions for collection of civil penalties and assessments imposed under this part and specify the procedures for such actions.

§ 1013.44 Right to administrative offset.

The amount of any penalty or assessment which has become final, or for which a judgment has been entered under § 1013.42 or § 1013.43 of this part, or any amount agreed upon in a compromise or settlement under § 1013.46 of this part, may be collected by administrative offset under 31 U.S.C. 3716, except that an administrative offset may not be made under this subsection against a refund of an overpayment of Federal taxes, then or later owing by the United States to the defendant.

10 CFR Ch. X (1-1-16 Edition)

§ 1013.45 Deposit in Treasury of United States.

All amounts collected pursuant to this part shall be deposited as miscellaneous receipts in the Treasury of the United States, except as provided in 31 U.S.C. 3806(g).

§ 1013.46 Compromise or settlement.

(a) Parties may make offers of compromise or settlement at any time.

(b) The reviewing official has the exclusive authority to compromise or settle a case under this part at any time after the date on which the reviewing official is permitted to issue a complaint and before the date on which the ALJ issues an initial decision.

(c) The authority head has exclusive authority to compromise or settle a case under this part at any time after the date on which the ALJ issues an initial decision, except during the pendency of any review under § 1013.42 of this part or during the pendency of any action to collect penalties and assessments under § 1013.43 of this part.

(d) The Attorney General has exclusive authority to compromise or settle a case under this part during the pendency of any review under § 1013.42 of this part or of any action to recover penalties and assessments under 31 U.S.C. 3806.

(e) The investigating official may recommend settlement terms to the reviewing official, the authority head, or the Attorney General, as appropriate. The reviewing official may recommend settlement terms to the authority head, or the Attorney General, as appropriate.

(f) Any compromise or settlement must be in writing.

§ 1013.47 Limitations.

(a) The notice of hearing with respect to a claim or statement must be served in the manner specified in § 1013.8 of this part within 6 years after the date on which such claim or statement is made.

(b) If the defendant fails to file a timely answer, service of notice under § 1013.10(b) of this part shall be deemed a notice of a hearing for purposes of this section.

(c) The statute of limitations may be extended by agreement of the parties.

- 1014.10 Action on approved claims.
- 1014.11 Penalties.

AUTHORITY: Sec. 1(a), 80 Stat. 306, (28 U.S.C. 2672); 28 CFR part 14; sec. 644, Pub. L. 95-91, 91 Stat. 599, (42 U.S.C. 7254).

SOURCE: 45 FR 7768, Feb. 4, 1980, unless otherwise noted.

§ 1014.1 Scope of regulations.

(a) These regulations shall apply only to claims asserted under the Federal Tort Claims Act, as amended, accruing on or after January 18, 1967, for money damages against the United States for injury to, or loss of, property or personal injury or death caused by the negligent or wrongful act or omission of any employee of the Department of Energy (DOE) while acting within the scope of office or employment.

(b) The terms *DOE*, *Department*, and *Department of Energy* as used in this part mean the agency established by the Department of Energy Organization Act (Pub. L. 95-91), 42 U.S.C. 7101, *et seq.*, including the Federal Energy Regulatory Commission, but do not include any contractor of the Department.

(c) The regulations in this part supplement the Attorney General's regulations in part 14 of chapter 1 of title 28 CFR as amended. Those regulations, including subsequent amendments thereto, and the regulations in this part apply to the consideration by DOE of administrative claims under the Federal Tort Claims Act.

§ 1014.2 Administrative claim; when presented; appropriate office.

(a) For purposes of these regulations, a claim shall be deemed to have been

presented when DOE receives, at a place designated in paragraph (b) of this section, an executed Standard Form 95 or other written notification of an incident, accompanied by a claim for money damages in a definite amount for injury to or loss of property, personal injury, or death, that is alleged to have occurred by reason of the incident. A claim that should have been presented to DOE but which was mistakenly addressed to or filed with another Federal agency, shall be deemed to be presented to DOE on the date the claim is received by DOE. A claim mistakenly addressed to or filed with DOE shall be transferred to the appropriate Federal agency, if ascertainable, or returned to the claimant.

(b) Claims should be mailed in envelopes marked "Attention Office of General Counsel." Claims shall be mailed or delivered to the DOE installation or office employing the person or persons whose acts or omissions are alleged to have caused the loss, damage, or injury, unless the claimant does not know that address. If the proper address is unknown, claims may be mailed or delivered to: The General Counsel, U.S. Department of Energy, Washington, DC 20585. Forms may be obtained from the same places.

(c) A claim may be amended by the claimant at any time before final DOE action or before the exercise of the claimant's option under 28 U.S.C. 2675(a). Amendments shall be submitted in writing and signed by the claimant or a duly authorized agent or legal representative. If an amendment to a pending claim is filed in time, the DOE shall have 6 months to decide the claim as amended. The claimant's option under 28 U.S.C. 2675(a) shall not accrue until 6 months after the filing of an amendment.

§ 1014.3 Administrative claim; who may file.

(a) A claim for injury to or loss of property may be presented by the owner of the property interest that is the subject of the claim or the owner's duly authorized agent or legal representative.

(b) A claim for personal injury may be presented by the injured person or

§ 1014.4

10 CFR Ch. X (1–1–16 Edition)

the claimant's duly authorized agent or legal representative.

(c) A claim based on death may be presented by the executor or administrator of the decedent's estate or by any other person legally entitled to assert such a claim under the applicable State law.

(d) A claim for a loss that was wholly compensated by an insurer with the rights of a subrogee may be presented by the insurer. A claim for loss that was partially compensated by an insurer with the rights of a subrogee may be presented by the insurer or the insured individually, as their respective interests appear, or jointly. Whenever an insurer presents a claim asserting the rights of a subrogee, it shall present with its claim appropriate evidence that it has the rights of a subrogee.

(e) A claim presented by an agent or legal representative shall be presented in the name of the claimant, be signed by the agent or legal representative, show the title or legal capacity of the person signing, and be accompanied by evidence of authority to present a claim on behalf of the claimant.

§ 1014.4 Administrative claims; evidence and information to be submitted.

(a) *Death.* In support of a claim based on death, the claimant may be required to submit the following evidence or information:

(1) An authenticated death certificate or other competent evidence showing the cause of death, the date of death, and the age of the decedent.

(2) Decedent's employment or occupation at time of death, including monthly or yearly salary or earnings (if any), and the duration of last employment or occupation.

(3) Full names, addresses, birth dates, kinship, and marital status of the decedent's survivors, including identification of those survivors who were dependent for support upon the decedent at the time of death.

(4) The degree of support afforded by the decedent to each survivor dependent upon decedent for support at the time of death.

(5) Decedent's general physical and mental condition before death.

(6) Itemized bills for medical and burial expenses incurred by reason of the incident causing death, or itemized receipts of payment for such expenses.

(7) If damages for pain and suffering prior to death are claimed, a physician's detailed statement specifying the injuries suffered, the duration of pain and suffering, any drugs administered for pain, and the decedent's physical condition between injury and death.

(8) Any other evidence or information that may have a bearing on either the responsibility of the United States for the death or the amount of damages claimed.

(b) *Personal injury.* In support of a claim for personal injury, including pain and suffering, the claimant may be required to submit the following evidence or information:

(1) A written report by the attending physician or dentist setting forth the nature and extent of the injury, the nature and extent of treatment, any degree of temporary or permanent disability, the prognosis, the period of hospitalization, and any diminished earning capacity. In addition, the claimant may be required to submit to a physical or mental examination by a physician employed by the DOE or another Federal agency. A copy of the physician's report shall be made available to the claimant upon the claimant's written request, provided that the claimant has, upon request, made or agrees to make available to the DOE any physician's reports previously or thereafter made of the physical or mental condition which is the subject matter of the claim.

(2) Itemized bills for medical, dental, and hospital expenses incurred, or itemized receipts of payment for such expenses.

(3) If the prognosis reveals that future treatment will be needed, a statement of the expected expenses of such treatment.

(4) If a claim is made for loss of time from employment, a written statement from the claimant's employer showing actual time lost from employment, whether the claimant is a full-time or part-time employee, and the wages or salary actually lost.

Department of Energy

§ 1014.8

(5) If a claim is made for loss of income and the claimant is self-employed, documentary evidence showing the amounts of earnings actually lost.

(6) Any other evidence or information that may bear on either the responsibility of the United States for the personal injury or the damages claimed.

(c) *Property damage.* In support of a claim for injury to or loss of property, real or personal, the claimant may be required to submit the following evidence or information:

(1) Proof of ownership of the property interest that is the subject of the claim.

(2) A detailed statement of the amount claimed with respect to each item of property.

(3) An itemized receipt of payment for necessary repairs or itemized written estimates of the cost of such repairs.

(4) A statement listing date of purchase, purchase price, and salvage value, where repair is not economical.

(5) Any other evidence or information that may bear on either the responsibility of the United States for the injury to or loss of property or the damages claimed.

§ 1014.5 Authority to adjust, determine, compromise, and settle.

The General Counsel, the Deputy General Counsel, the Deputy General Counsel for Legal Services, the Assistant General Counsel for Legal Counsel, and any employees of the Department designated by the General Counsel to receive and act on tort claims at Headquarters and field locations are authorized to act on claims.

§ 1014.6 Limitation on authority.

(a) An award, compromise, or settlement of a claim in excess of \$25,000 shall be made only with the prior written approval of the Attorney General or his or her designee. For the purposes of this paragraph, a principal claim and any derivative or subrogated claim shall be treated as a single claim.

(b) An administrative claim may be adjusted, determined, compromised, or settled only after the Department of Justice has been consulted if, in the opinion of the General Counsel or designee:

(1) A new precedent may be involved;
(2) A question of policy may be involved;

(3) The United States may be entitled to indemnity or contribution from a third party and the DOE is unable to adjust the third party claim; or

(4) The compromise of a particular claim, as a practical matter, may control the disposition of a related claim in which the amount to be paid may exceed \$25,000.

(c) An administrative claim may be adjusted, determined, compromised, or settled only after consultation with the Department of Justice when the DOE is aware that the United States or an employee, agent, or cost-type contractor of the United States is involved in litigation based on a claim arising out of the same incident or transaction.

(d) The authority of DOE subordinate claims officials to make awards, compromises, and settlements of over \$10,000 is subject to the approval of the General Counsel, the Deputy General Counsel, or the Deputy General Counsel for Legal Services.

§ 1014.7 Referral to Department of Justice.

(a) When Department of Justice approval or consultation is required under § 1014.6, the referral or request shall be transmitted to the Department of Justice by the General Counsel or designee.

(b) When a designee of the General Counsel is processing a claim requiring consultation with, or approval of, either the DOE General Counsel or the Department of Justice, the referral or request shall be sent to the General Counsel in writing and shall contain:

(1) A short and concise statement of the facts and of the reasons for the referral or request,

(2) Copies of relevant portions of the claim file, and

(3) A statement of recommendations or views.

§ 1014.8 Investigation and examination.

The DOE may investigate, or may request any other Federal agency to investigate, a claim and may conduct, or

§ 1014.9

request another Federal agency to conduct, a physical examination of a claimant and provide a report of the physical examination.

§ 1014.9 Final denial of claim.

(a) Final denial of an administrative claim shall be in writing and sent to the claimant, or the claimant's attorney or legal representative by certified or registered mail. The notification of final denial may include a statement of the reasons for the denial and shall include a statement that, if the claimant is dissatisfied with the Department's action, the claimant may file suit in an appropriate U.S. District Court not more than 6 months after the notification is mailed.

(b) Before the commencement of suit and before the 6-month period provided in 28 U.S.C. 2401(b) expires, a claimant, or the claimant's duly authorized agent, or legal representative, may file a written request with the DOE General Counsel for reconsideration of a final denial of a claim. Upon the timely filing of a request for reconsideration the DOE shall have 6 months from the date of filing to decide the claim, and the claimant's option under 28 U.S.C. 2675(a) shall not accrue until 6 months after the request for reconsideration is filed. Final DOE action on a request for reconsideration shall be made in accordance with the provisions of paragraph (a) of this section.

§ 1014.10 Action on approved claims.

(a) Payment of any approved claim shall not be made unless the claimant executes (1) a Standard Form 1145, (2) a claims settlement agreement, or (3) a Standard Form 95, as appropriate consistent with applicable rules of the Department of Justice, Department of the Treasury, and the General Accounting Office. When a claimant is represented by an attorney, the voucher for payment shall designate both the claimant and the attorney as payees, and the check shall be delivered to the attorney, whose address shall appear on the voucher.

(b) If the claimant or the claimant's agent or legal representative accepts any award, compromise, or settlement made pursuant to the provisions of section 2672 or 2677 of title 28, United

10 CFR Ch. X (1-1-16 Edition)

States Code, that acceptance shall be final and conclusive on the claimant, the claimant's agent or legal representative, and any other person on whose behalf or for whose benefit the claim has been presented. The acceptance shall constitute a complete release of any claim against the United States and against any employee of the Government whose act or omission gave rise to the claim, by reason of the same subject matter.

§ 1014.11 Penalties.

A person who files a false claim or makes a false or fraudulent statement in a claim against the United States may be liable to a fine of not more than \$10,000 or to imprisonment for not more than 5 years, or both (18 U.S.C. 1001), and, in addition, to a forfeiture of \$2,000 and a penalty of double the loss or damage sustained by the United States (31 U.S.C. 231).

Subpart A—General

§ 1015.100 Scope.

This subpart describes the scope of the standards set forth in this part. This subpart corresponds to 31 CFR part 900 in the Department of the

Treasury (Treasury) Federal Claims Collection Standards.

§ 1015.101 Prescription of standards.

(a) The Secretary of the Treasury and the Attorney General of the United States issued regulations in 31 CFR parts 900–904, under the authority contained in 31 U.S.C. 3711(d)(2). Those regulations prescribe standards for Federal agency use in the administrative collection, offset, compromise, and the suspension or termination of collection activity for civil claims for money, funds, or property, as defined by 31 U.S.C. 3701(b), unless specific Federal agency statutes or regulations apply to such activities or, as provided for by Title 11 of the United States Code, when the claims involve bankruptcy. The regulations in 31 CFR parts 900–904 also prescribe standards for referring debts to the Department of Justice (DOJ) for litigation. Additional guidance is contained in the Office of Management and Budget's (OMB) Circular A–129 (Revised), “Policies for Federal Credit Programs and Non-Tax Receivables,” the Treasury's “Managing Federal Receivables,” and other publications concerning debt collection and debt management. These publications are available from the Department of Energy (DOE) Office of Financial Policy, 1000 Independence Ave., SW., Washington, DC 20585.

(b) Additional rules governing centralized administrative offset and the transfer of delinquent debt to Treasury or Treasury-designated debt collection centers for collection (cross-servicing) under the Debt Collection Improvement Act of 1996 (DCIA), Public Law 104–134, 110 Stat. 1321, 1358 (April 26, 1996), are set forth in separate regulations issued by Treasury. Rules governing the use of certain debt collection tools created under the DCIA, such as administrative wage garnishment, also are set forth in separate regulations issued by Treasury. See generally, 31 CFR part 285.

(c) DOE is not limited to the remedies contained in this part and may use any other authorized remedies, including alternative dispute resolution and arbitration, to collect civil claims, to the extent that such remedies are not inconsistent with the Federal

§ 1015.102

Claims Collection Act, as amended, Public Law 89-508, 80 Stat. 308 (July 19, 1966), the Debt Collection Act of 1982, Public Law 97-365, 96 Stat. 1749 (October 25, 1982), the DCIA or other relevant law. The regulations in this part do not impair DOE's common law rights to collect debts.

(d) Standards and policies regarding the classification of debt for accounting purposes (for example, write-off of uncollectible debt) are contained in OMB's Circular A-129 (Revised), "Policies for Federal Credit Programs and Non-Tax Receivables."

§ 1015.102 Definitions and construction.

(a) For the purposes of the standards in this part, the terms "claim" and "debt" are synonymous and interchangeable. They refer to an amount of money, funds, or property that has been determined by an agency official to be due the United States from any person, organization, or entity, except another Federal agency. For the purposes of administrative offset under 31 U.S.C. 3716, the terms "claim" and "debt" include an amount of money, funds, or property owed by a person to a State (including past-due support being enforced by a State), the District of Columbia, American Samoa, Guam, the United States Virgin Islands, the Commonwealth of the Northern Mariana Islands, or the Commonwealth of Puerto Rico.

(b) A debt is "delinquent" if it has not been paid by the date specified in DOE's initial written demand for payment or applicable agreement or instrument (including a post-delinquency payment agreement), unless other satisfactory payment arrangements have been made.

(c) In this part, words in the plural form shall include the singular and vice versa, and words signifying the masculine gender shall include the feminine and vice versa. The terms "includes" and "including" do not exclude matters not listed but do include matters that are in the same general class.

(d) Recoupment is a special method for adjusting debts arising under the same transaction or occurrence. For example, obligations arising under the

10 CFR Ch. X (1-1-16 Edition)

same contract generally are subject to recoupment.

(e) The term "Department of Energy" or "DOE" includes the National Nuclear Security Administration.

§ 1015.103 Antitrust, fraud, tax, inter-agency, transportation account audit, acquisition contract, and financial assistance instrument claims excluded.

(a) The standards in this part relating to compromise, suspension, and termination of collection activity do not apply to any debt based in whole or in part on conduct in violation of the antitrust laws or to any debt involving fraud, the presentation of a false claim, or misrepresentation on the part of the debtor or any party having an interest in the claim. Only the DOJ has the authority to compromise, suspend, or terminate collection activity on such claims. The standards in this part relating to the administrative collection of claims do apply, but only to the extent authorized by the DOJ in a particular case. Upon identification of a claim based in whole or in part on conduct in violation of the antitrust laws or any claim involving fraud, the presentation of a false claim, or misrepresentation on the part of the debtor or any party having an interest in the claim, DOE will promptly refer the case to the DOJ for action. At its discretion, the DOJ may return the claim to DOE for further handling in accordance with the standards in this part.

(b) Part 1015 does not apply to tax debts.

(c) Part 1015 does not apply to claims between Federal agencies. Federal agencies should attempt to resolve interagency claims by negotiation in accordance with Executive Order 12146 (3 CFR, 1980 Comp., pp. 409-412).

(d) Part 1015 does not apply to claims arising from the audit of transportation accounts pursuant to 31 U.S.C. 3726 which shall be determined, collected, compromised, terminated, or settled in accordance with regulations published under the authority of 31 U.S.C. 3726 (see 41 CFR parts 101-141, administered by the Director, Office of Transportation Audits, General Services Administration) and are otherwise excepted from these regulations.

Department of Energy

§ 1015.201

(e)(1) Part 1015 does not apply to claims arising out of acquisition contracts, subcontracts, and purchase orders which are subject to the Federal Acquisition Regulations System, including the Federal Acquisition Regulation, 48 CFR subpart 32.6, and the Department of Energy Acquisition Regulation, 48 CFR subpart 932.6, and which shall be determined or settled in accordance with those regulations; and

(2) Part 1015 does not apply to claims arising out of financial assistance instruments (*e.g.*, grants, cooperative agreements, and contracts under cooperative agreements) and loans and loan guarantees, which shall be determined or settled in accordance with 10 CFR 600.26 and 10 CFR 600.112(f).

§ 1015.104 Compromise, waiver, or disposition under other statutes not precluded.

Nothing in this part precludes DOE from disposing of any claim under statutes and implementing regulations other than subchapter II of chapter 37 of Title 31 of the United States Code (Claims of the United States Government) and the standards in this part. In such cases, the specifically applicable laws and regulations will generally take precedence over this part.

§ 1015.105 Form of payment.

Claims may be paid in the form of money or, when a contractual basis exists, the Government may demand the return of specific property or the performance of specific services.

§ 1015.106 Subdivision of claims not authorized.

Debts may not be subdivided to avoid the monetary ceiling established by 31 U.S.C. 3711(a)(2). A debtor's liability arising from a particular transaction or contract shall be considered a single debt in determining whether the debt is one of less than \$100,000 (excluding interest, penalties, and administrative costs) or such higher amount as the Attorney General shall from time to time prescribe for purposes of compromise or suspension or termination of collection activity.

§ 1015.107 Required administrative proceedings.

DOE is not required to omit, foreclose, or duplicate administrative proceedings required by contract or other laws or regulations.

§ 1015.108 No private rights created.

The standards in this part do not create any right or benefit, substantive or procedural, enforceable at law or in equity by a party against the United States, its agencies, its officers, or any other person, nor shall the failure of DOE, Treasury, the DOJ or other agency to comply with any of the provisions of this part be available to any debtor as a defense.

Subpart B—Standards for the Administrative Collection of Claims

§ 1015.200 Scope.

The subpart sets forth the standards for administrative collection of claims under this part. This subpart corresponds to 31 CFR part 901 of the Treasury Federal Claims Collection Standards.

§ 1015.201 Aggressive agency collection activity.

(a) Heads of DOE Headquarters Elements and Field Elements or their designees must promptly notify the appropriate DOE finance office of claims arising from their operations. A claim will be recorded and controlled by the responsible finance office upon receipt of documentation from a competent authority establishing the amount due.

(b) In accordance with 31 CFR Chapter IX parts 900–904 and this part, DOE will aggressively collect all debts arising out of activities. Collection activities shall be undertaken promptly with follow-up action taken as necessary.

(c) Debts referred or transferred to Treasury, or Treasury-designated debt collection centers under the authority of 31 U.S.C. 3711(g), shall be serviced, collected, or compromised, or the collection action will be suspended or terminated, in accordance with the statutory requirements and authorities applicable to the collection of such debts.

§ 1015.202

10 CFR Ch. X (1–1–16 Edition)

(d) DOE will cooperate with other agencies in its debt collection activities.

(e) DOE will refer debts to Treasury as soon as due process requirements are complete, and should refer such debts no later than 180 days after the debt has become delinquent. On behalf of DOE, Treasury will take appropriate action to collect or compromise the referred debt, or to suspend or terminate collection action thereon, in accordance with the statutory and regulatory requirements and authorities applicable to the debt and action. Appropriate action to collect a debt may include referral to another debt collection center, a private collection contractor, or the DOJ for litigation. (See 31 CFR 285.12, Transfer of Debts to Treasury for Collection.) This requirement does not apply to any debt that:

- (1) Is in litigation or foreclosure;
- (2) Will be disposed of under an approved asset sale program;
- (3) Has been referred to a private collection contractor for a period of time acceptable to Treasury; or
- (4) Will be collected under internal offset procedures within three years after the debt first became delinquent.

(f) Treasury is authorized to charge a fee for services rendered regarding referred or transferred debts. DOE will add the fee to the debt as an administrative cost (see § 1015.212(c)).

§ 1015.202 Demand for payment.

(a) Written demand as described in paragraph (b) of this section will be made promptly upon a debtor of the United States in terms that inform the debtor of the consequences of failing to cooperate with DOE to resolve the debt. Generally, one demand letter issued 30 days after the initial notice, bill, or written demand should suffice. When necessary to protect the Government's interest (for example, to prevent the running of a statute of limitations), written demand may be preceded by other appropriate actions under this Part, including immediate referral for litigation.

(b) Demand letters will inform the debtor of:

- (1) The basis for the indebtedness and the rights, if any, the debtor may have to seek review within DOE;

(2) The applicable standards for imposing any interest, penalties, or administrative costs;

(3) The date by which payment should be made to avoid late charges (*i.e.*, interest, penalties, and administrative costs) and enforced collection, which generally should not be more than 30 days from the date that the demand letter is mailed or hand-delivered;

(4) The name, address, and phone number of a contact person or office within DOE;

(5) DOE's intent to refer unpaid debts to Treasury for collection;

(6) DOE's intent to authorize Treasury to add fees for services rendered as an administrative fee;

(7) DOE's intent to authorize Treasury to utilize collection tools such as credit bureau reporting, private collection agencies, administrative wage garnishment, Federal salary offset, tax refund offset, administrative offset, litigation, and other tools, as appropriate, to collect the debt;

(8) DOE's willingness to discuss alternative methods of payment;

(9) The debtor's entitlement to consideration of a waiver, depending on applicable statutory authority; and

(10) DOE's intent to suspend or revoke licenses, permits, or privileges for any inexcusable or willful failure of a debtor to pay such a debt in accordance with DOE regulations or governing procedures.

(c) DOE will seek to ensure that demand letters are mailed or hand-delivered on the same day that they are dated.

(d) DOE will seek to respond promptly to communications from debtors, within 30 days whenever feasible, and will advise debtors who dispute debts to furnish available evidence to support their contentions.

(e) Prior to the initiation of the demand process or at any time during or after completion of the demand process, if DOE determines to pursue, or is required to pursue, offset, the procedures applicable to offset should be followed (see § 1015.203 of this subpart). The availability of funds or money for debt satisfaction by offset and DOE's determination to pursue collection by

offset shall release DOE from the necessity of further compliance with paragraphs (a), (b), and (c) of this section.

(f) Prior to referring a debt for litigation, DOE should advise each person determined to be liable for the debt that, unless the debt can be collected administratively, litigation may be initiated. This notification should comply with Executive Order 12988 (3 CFR, 1996 Comp, pp. 157-163) and should be given as part of a demand letter under paragraph (b) of this section.

(g) When DOE learns that a bankruptcy petition has been filed with respect to a debtor, before proceeding with further collection action, DOE should immediately seek legal advice from appropriate legal counsel concerning the impact of the Bankruptcy Code on any pending or contemplated collection activities. Unless counsel determines that the automatic stay imposed at the time of filing pursuant to 11 U.S.C. 362 has been lifted or is no longer in effect, in most cases collection activity against the debtor should stop immediately.

(1) After seeking legal advice, a proof of claim should be filed in most cases with the bankruptcy court or the Trustee. DOE will refer to the provisions of 11 U.S.C. 106 relating to the consequences on sovereign immunity of filing a proof of claim.

(2) If DOE is a secured creditor, it may seek relief from the automatic stay regarding its security, subject to the provisions and requirements of 11 U.S.C. 362.

(3) Offset is stayed in most cases by the automatic stay. However, DOE will seek legal advice from counsel to determine whether its payments to the debtor and payments of other agencies available for offset may be frozen until relief from the automatic stay can be obtained from the bankruptcy court. DOE also will seek legal advice from counsel to determine whether recoupment is available.

§ 1015.203 Collection by administrative offset.

(a) *Scope.* (1) The term "administrative offset" has the meaning provided in 31 U.S.C. 3701(a)(1).

(2) This section does not apply to:

(i) Debts arising under the Social Security Act (42 U.S.C. 301, *et. seq.*) except as provided in 42 U.S.C. 404;

(ii) Payments made under the Social Security Act (42 U.S.C. 301, *et. seq.*) except as provided for in 31 U.S.C. 3716(c) (see 31 CFR 285.4, Federal Benefit Offset);

(iii) Debts arising under, or payments made under, the Internal Revenue Code (see 31 CFR 285.2, Tax Refund Offset) or the tariff laws of the United States;

(iv) Offsets against Federal salaries to the extent these standards are inconsistent with regulations published to implement such offsets under 5 U.S.C. 5514 and 31 U.S.C. 3716 (see 5 CFR part 550, subpart K, and 31 CFR 285.7, Federal Salary Offset);

(v) Offsets under 31 U.S.C. 3728 against a judgment obtained by a debtor against the United States;

(vi) Offsets or recoupments under common law, state law, or Federal statutes specifically prohibiting offsets or recoupments of particular types of debts; or

(vii) Offsets in the course of judicial proceedings, including bankruptcy.

(3) Unless otherwise provided for by contract or law, debts or payments that are not subject to administrative offset under 31 U.S.C. 3716 may be collected by administrative offset under the common law or other applicable statutory authority.

(4) Unless otherwise provided by law, administrative offset of payments under the authority of 31 U.S.C. 3716 to collect a debt may not be conducted more than 10 years after the Government's right to collect the debt first accrued, unless facts material to the Government's right to collect the debt were not known and could not reasonably have been known by the official or officials of the Government who were charged with the responsibility to discover and collect such debts. This limitation does not apply to debts reduced to a judgment.

(5) In bankruptcy cases, DOE will seek legal advice from appropriate legal counsel concerning the impact of the Bankruptcy Code, particularly 11 U.S.C. 106, 362, and 553, on pending or contemplated collections by offset.

(b) *Mandatory centralized administrative offset.* (1) As described in

§ 1015.203

10 CFR Ch. X (1–1–16 Edition)

§ 1015.201(e), under the DCIA, DOE is required to refer all debts over 180 days delinquent to Treasury for purposes of debt collection (*i.e.*, cross-servicing). Administrative offset is one type of collection tool used by Treasury to collect debts referred under 31 CFR 285.12. Thus, by transferring debts to Treasury, DOE will satisfy the requirement to notify Treasury of debts for the purposes of administrative offset and duplicate referrals are not required. A debt, which is not transferred to Treasury for purposes of debt collection, however, may be subject to the DCIA requirement of notification to Treasury for purposes of administrative offset.

(2) The names and taxpayer identifying numbers (TINs) of debtors who owe debts referred to Treasury as described in paragraph (b)(1) of this section shall be compared to the names and TINs on payments to be made by Federal disbursing officials. Federal disbursing officials include disbursing officials of Treasury, the Department of Defense, the United States Postal Service, other Government corporations, and disbursing officials of the United States designated by the Secretary of the Treasury. When the name and TIN of a debtor match the name and TIN of a payee and all other requirements for offset have been met, the payment will be offset to satisfy the debt.

(3) Treasury will notify the debtor/payee in writing that an offset has occurred to satisfy, in part or in full, a past due, legally enforceable delinquent debt. The notice shall include a description of the type and amount of the payment from which the offset was taken, the amount of offset that was taken, the identity of DOE as the creditor agency requesting the offset, and a contact point within DOE who will respond to questions regarding the offset.

(4) As required in 31 CFR 901.3(b)(4), DOE will refer a delinquent debt to Treasury for administrative offset, only after the debtor:

(i) Has been sent written notice of the type and amount of the debt, the intention of DOE to use administrative offset to collect the debt, and an explanation of the debtor's rights under 31 U.S.C. 3716; and

(ii) Has been given:

(A) The opportunity to inspect and copy DOE records related to the debt;

(B) The opportunity for a review within DOE of the determination of indebtedness; and

(C) The opportunity to make a written agreement to repay the debt.

(iii) DOE may omit the procedures set forth in paragraph (a)(4) of this section when:

(A) The offset is in the nature of a recoupment;

(B) The debt arises under a contract as set forth in *Cecile Industries, Inc. v. Cheney*, 995 F.2d 1052 (Fed. Cir. 1993) (notice and other procedural protections set forth in 31 U.S.C. 3716(a) do not supplant or restrict established procedures for contractual offsets accommodated by the Contracts Disputes Act); or

(C) In the case of non-centralized administrative offsets conducted under paragraph (c) of this section, DOE first learns of the existence of the amount owed by the debtor when there is insufficient time before payment would be made to the debtor/payee to allow for prior notice and an opportunity for review. When prior notice and an opportunity for review are omitted, DOE shall give the debtor such notice and an opportunity for review as soon as practicable and shall promptly refund any money ultimately found not to have been owed to the Government.

(iv) When DOE previously has given a debtor any of the required notice and review opportunities with respect to a particular debt (see § 1015.202), DOE need not duplicate such notice and review opportunities before administrative offset may be initiated.

(5) When DOE refers delinquent debts to Treasury, DOE must certify, in a form acceptable to Treasury, that:

(i) The debt(s) is (are) past due and legally enforceable; and

(ii) DOE has complied with all due process requirements under 31 U.S.C. 3716(a) and DOE regulations.

(6) Payments that are prohibited by law from being offset are exempt from centralized administrative offset. Treasury may exempt classes of DOE payments from centralized offset upon the written request of the Secretary of DOE.

(7) In accordance with 31 U.S.C. 3716(f), Treasury may waive the provisions of the Computer Matching and Privacy Protection Act of 1988 concerning matching agreements and post-match notification and verification (5 U.S.C. 552a(o) and (p)) for centralized administrative offset upon receipt of a certification from DOE that the due process requirements enumerated in 31 U.S.C. 3716(a) have been met. The certification of a debt in accordance with paragraph (b)(5) of this section will satisfy this requirement. If such a waiver is granted, only the Data Integrity Board of Treasury is required to oversee any matching activities, in accordance with 31 U.S.C. 3716(g). This waiver authority does not apply to offsets conducted under paragraphs (c) and (d) of this section.

(c) *Non-centralized administrative offset.* (1) Generally, non-centralized administrative offsets are ad hoc case-by-case offsets that DOE conducts, at DOE's discretion, internally or in cooperation with the agency certifying or authorizing payments to the debtor. Unless otherwise prohibited by law, when centralized administrative offset is not available or appropriate, past due, legally enforceable non-tax delinquent debts may be collected through non-centralized administrative offset. In these cases, DOE may make a request directly to a payment-authorizing agency to offset a payment due a debtor to collect a delinquent debt. For example, it may be appropriate for DOE to request that the Office of Personnel Management (OPM) offset a Federal employee's lump sum payment upon leaving Government service to satisfy an unpaid advance.

(2) DOE shall comply with offset requests by creditor agencies to collect debts owed to the United States, unless the offset would not be in the best interest of the United States with respect to the program of DOE, or would otherwise be contrary to law. Appropriate use will be made of the cooperative efforts of other agencies in effecting collection by administrative offset.

(3) When collecting multiple debts by non-centralized administrative offset, DOE generally will apply the recovered amounts to those debts in accordance with the best interests of the United

States, as determined by the facts and circumstances of the particular case, particularly the applicable statute of limitations.

(d) *Requests to OPM to offset a debtor's anticipated or future benefit payments under the Civil Service Retirement and Disability Fund.* Upon providing OPM written certification that a debtor has been afforded the procedures provided in paragraph (b)(4) of this section, DOE may request OPM to offset a debtor's anticipated or future benefit payments under the Civil Service Retirement and Disability Fund (Fund) in accordance with regulations codified at 5 CFR 831.1801–831.1808. Upon receipt of such a request, OPM will identify and “flag” a debtor's account in anticipation of the time when the debtor requests, or becomes eligible to receive, payments from the Fund. This will satisfy any requirement that offset be initiated prior to the expiration of the time limitations referenced in paragraph (a)(4) of this section.

(e) *Review requirements.* (1) For purposes of this section, whenever DOE is required to afford a debtor a review within the agency, DOE shall provide the debtor with a reasonable opportunity for an oral hearing when the debtor requests reconsideration of the debt and DOE determines that the question of the indebtedness cannot be resolved by review of the documentary evidence, for example, when the validity of the debt turns on an issue of credibility or veracity.

(2) Unless otherwise required by law, an oral hearing under this section is not required to be a formal evidentiary hearing, although DOE will carefully document all significant matters discussed at the hearing.

(3) This section does not require an oral hearing with respect to debt collection systems in which a determination of indebtedness rarely involves issues of credibility or veracity and DOE has determined that review of the written record is ordinarily an adequate means to correct prior mistakes.

(4) In those cases when an oral hearing is not required by this section, DOE will accord the debtor a “paper hearing,” that is, a determination of the request for reconsideration based upon a review of the written record.

§ 1015.204

10 CFR Ch. X (1–1–16 Edition)

§ 1015.204 Reporting debts.

(a) DOE may disclose delinquent debts to consumer reporting agencies in accordance with 31 U.S.C. 3711(e), the DCIA, the revised Federal Claims Collection Standards (31 CFR parts 900–904) published November 22, 2000, and other applicable authorities. DOE will ensure that all of the rights and protections afforded to the debtor under 31 U.S.C. 3711(e) have been fulfilled. Additional guidance is contained in Treasury’s “Guide to the Federal Credit Bureau Program,” revised October 2001.

(b) As described in §1015.201(e), under the DCIA (31 U.S.C. 3711(g)), DOE is required to transfer all debts over 180 days delinquent to Treasury for purposes of debt collection (*i.e.*, cross-servicing). As part of its regular debt collection procedures, Treasury will report debts it is collecting to the appropriate designated credit reporting agencies on behalf of DOE. A debt not transferred to Treasury for purposes of debt collection, however, may be subject to the DCIA requirement to report all non-tax delinquent consumer debts to credit reporting agencies.

§ 1015.205 Credit reports.

(a) In order to aid DOE in making appropriate determinations as to the collection and compromise of claims; the collection of interest, penalties, and administrative costs; and the likelihood of collecting the claim, DOE may institute a credit investigation of the debtor at any time following receipt of knowledge of the claim.

(b) As described in §1015.201(e), under the DCIA (31 U.S.C. 3711(g)), DOE is required to transfer all debts over 180 days delinquent to Treasury for purposes of debt collection (*i.e.*, cross-servicing). As part of its regular debt collection procedures, Treasury may also institute a credit investigation of the debtor on behalf of DOE.

§ 1015.206 Contracting with private collection contractors and with entities that locate and recover unclaimed assets.

(a) DOE may contract with private collection contractors in accordance with 31 U.S.C. 3718(d), the DCIA, the revised Federal Claims Collection Standards (31 CFR parts 900–904) published

November 22, 2000, and other applicable authorities.

(b) As described in §1015.201(e), under the DCIA, DOE is required to transfer all debts over 180 days delinquent to Treasury for purposes of debt collection (*i.e.*, cross-servicing) under 31 U.S.C. 3711(g). As part of its regular debt collection procedures, Treasury may refer delinquent debts to private collection contractors on behalf of DOE.

(c) DOE may enter into contracts for locating and recovering assets of the United States, such as unclaimed assets. DOE must establish procedures acceptable to Treasury before entering into contracts to recover assets of the United States held by a state government or a financial institution.

(d) DOE may enter into contracts for debtor asset and income search reports. In accordance with 31 U.S.C. 3718(d), such contracts may provide that the fee a contractor charges DOE for such services may be payable from the amounts recovered, unless otherwise prohibited by statute.

§ 1015.207 Suspension or revocation of eligibility for loans and loan guarantees, licenses, permits, or privileges.

(a) Unless waived by the Secretary of DOE or his designee, DOE may not extend financial assistance in the form of a loan, loan guarantee, or loan insurance to any person who DOE knows to be delinquent on a non-tax debt owed to a Federal agency. This prohibition does not apply to disaster loans. The authority to waive the application of this section may be delegated to the Chief Financial Officer and redelegated only to the Deputy Chief Financial Officer of DOE. DOE may extend credit after the delinquency has been resolved. See 31 CFR 285.13 (Barring Delinquent Debtors From Obtaining Federal Loans or Loan Insurance or Guarantees).

(b) In non-bankruptcy cases, DOE offices seeking the collection of statutory penalties, forfeitures, or other types of claims should consider the suspension or revocation of licenses, permits, or other privileges for any inexcusable or willful failure of a debtor to pay such a debt in accordance with

Department of Energy

§ 1015.210

DOE's regulations or governing procedures. The debtor should be advised in DOE's written demand for payment of DOE's ability to suspend or revoke licenses, permits, or privileges. Any DOE office making, guaranteeing, insuring, acquiring, or participating in loans should consider suspending or disqualifying any lender, contractor, or broker from doing further business with DOE or engaging in programs sponsored by DOE if such lender, contractor, or broker fails to pay its debts to the Government within a reasonable time or if such lender, contractor, or broker has been suspended, debarred, or disqualified from participation in a program or activity by another Federal agency. The failure of any surety to honor its obligations in accordance with 31 U.S.C. 9305 should be reported to Treasury. Treasury will forward to all interested agencies notification that a surety's certificate of authority to do business with the Government has been revoked by Treasury.

(c) The suspension or revocation of licenses, permits, or privileges also should extend to Federal programs or activities that are administered by the states on behalf of the Federal Government, to the extent that they affect the Federal Government's ability to collect money or funds owed by debtors. Therefore, states that manage Federal activities, pursuant to approval from DOE, should ensure that appropriate steps are taken to safeguard against issuing licenses, permits, or privileges to debtors who fail to pay their debts to the Federal Government.

(d) In bankruptcy cases, before advising the debtor of DOE's intention to suspend or revoke licenses, permits, or privileges, DOE will seek legal advice from counsel concerning the impact of the Bankruptcy Code, particularly 11 U.S.C. 362 and 525, which may restrict such action.

§ 1015.208 Administrative wage garnishment.

(a) DOE may use administrative wage garnishment to collect money from a debtor's disposable pay to satisfy delinquent debt in accordance with section 31001(o) of the DCIA, codified at 31 U.S.C. 3720D. Treasury has issued regulations implementing the administra-

tive wage garnishment provisions contained in the DCIA, at 31 CFR 285.11. DOE has adopted these regulations in their entirety.

(b) As described in § 1015.201(e) of this part, under the DCIA (31 U.S.C. 3711(g)), DOE is required to transfer all debts over 180 days delinquent to Treasury for purposes of debt collection (*i.e.*, cross-servicing). As part of its regular debt collection procedures, Treasury may use administrative wage garnishment on behalf of DOE.

§ 1015.209 Tax refund offset.

(a) DOE may authorize the Internal Revenue Service (IRS) to offset a tax refund to satisfy delinquent debt in accordance with 31 U.S.C. 3720A, Reduction of Tax Refund by Amount of Debt. Treasury has issued regulations implementing the tax refund offset as part of Treasury's mandatory centralized offset at 31 CFR 285.2, Offset of Tax Refund to Collect Past-Due, Legally Enforceable Non-tax Debt. DOE has adopted 31 U.S.C. 3720A and 31 CFR 285.2 in their entirety. The due process requirements of 31 U.S.C. 3720A are contained in §§ 1015.203(b)(4), and 1015.203(e) of this part.

(b) As described in § 1015.201(e) of this part, under the DCIA (31 U.S.C. 3711(g)), DOE is required to transfer all debts over 180 days delinquent to Treasury for purposes of debt collection (*i.e.*, cross-servicing). As part of its regular debt collection procedures, Treasury may use tax refund offset on behalf of DOE.

§ 1015.210 Liquidation of collateral.

(a) DOE may liquidate security or collateral through the exercise of a power of sale in the security instrument or a nonjudicial foreclosure, and apply the proceeds to the applicable debt(s), if the debtor fails to pay the debt(s) within a reasonable time after demand and if such action is in the best interest of the United States. Collection from other sources, including liquidation of security or collateral, is not a prerequisite to requiring payment by a surety, insurer, or guarantor unless such action is expressly required by statute or contract.

§ 1015.211

10 CFR Ch. X (1–1–16 Edition)

(b) When DOE learns that a bankruptcy petition has been filed with respect to a debtor, DOE will seek legal advice from counsel concerning the impact of the Bankruptcy Code, including, but not limited to, 11 U.S.C. 362, to determine the applicability of the automatic stay and the procedures for obtaining relief from such stay prior to proceeding under paragraph (a) of this section.

§ 1015.211 Collection in installments.

(a) Whenever feasible, DOE shall collect the total amount of a debt in one lump sum. If a debtor is financially unable to pay a debt in one lump sum, DOE may accept payment in regular installments. DOE will obtain a current financial statement showing the debtor's assets, liabilities, income, and expenses from debtors who represent that they are unable to pay in one lump sum, and independently verify such representations whenever possible. DOE may also obtain credit reports or other financial information to assess installment requests. DOE may use its own financial information form or a DOJ form, such as the Financial Statement of Debtor (OBD-500) (see § 1015.302(g) of this part). When DOE agrees to accept payments in regular installments, it will obtain a legally enforceable, written agreement from the debtor that specifies all of the terms of the arrangement and that contains a provision accelerating the debt in the event of default.

(b) The size and frequency of installment payments should bear a reasonable relation to the size of the debt and the debtor's ability to pay. If possible, the installment payments should be sufficient in size and frequency to liquidate the debt in three years or less.

(c) Security for deferred payments should be obtained in appropriate cases. DOE may accept installment payments notwithstanding the refusal of the debtor to execute a written agreement or to give security, at DOE's option.

§ 1015.212 Interest, penalties and administrative costs.

(a) Except as provided in paragraphs (g), (h), and (i) of this section, DOE shall charge interest, penalties and ad-

ministrative costs on debts owed to the United States pursuant to 31 U.S.C. 3717. DOE shall mail or hand-deliver a written notice to the debtor, at the debtor's most recent address available to DOE, explaining DOE's requirements concerning these charges except where these requirements are included in a contractual or repayment agreement. These charges shall continue to accrue until the debt is paid in full or otherwise resolved through compromise, termination, or waiver of the charges.

(b) DOE shall charge interest on debts owed the United States as follows:

(1) Interest shall accrue from the date of delinquency, or as otherwise provided by law.

(2) Unless otherwise established in a contract, repayment agreement, or by statute, the rate of interest charged shall be the rate established annually by Treasury in accordance with 31 U.S.C. 3717. Pursuant to 31 U.S.C. 3717, DOE may charge a higher rate of interest if it reasonably determines that a higher rate is necessary to protect the rights of the United States. DOE will document the reason(s) for its determination that the higher rate is necessary.

(3) The rate of interest, as initially charged, shall remain fixed for the duration of the indebtedness. When a debtor defaults on a repayment agreement and seeks to enter into a new agreement, DOE may require payment of interest at a new rate that reflects the current value of funds to the Treasury at the time the new agreement is executed. Interest shall not be compounded, that is, interest shall not be charged on interest, penalties, or administrative costs required by this section. If, however, a debtor defaults on a previous repayment agreement, charges that accrued but were not collected under the defaulted agreement shall be added to the principal under the new repayment agreement.

(c) DOE shall assess administrative costs incurred for processing and handling delinquent debts. The calculation of administrative costs should be based on actual costs incurred or upon estimated costs as determined by the assessing office.

Department of Energy

§ 1015.215

(d) Unless otherwise established in a contract, repayment agreement, or by statute, DOE shall charge a penalty, pursuant to 31 U.S.C. 3717(e)(2), not to exceed six percent a year on the amount due on a debt that is delinquent for more than 90 days. This charge shall accrue from the date of delinquency.

(e) DOE may increase an “administrative debt” by the cost of living adjustment in lieu of charging interest and penalties under this section. “Administrative debt” includes, but is not limited to, a debt based on fines, penalties, and overpayments, but does not include a debt based on the extension of Government credit, such as those arising from loans and loan guaranties. The cost of living adjustment is the percentage by which the Consumer Price Index for the month of June of the calendar year preceding the adjustment exceeds the Consumer Price Index for the month of June of the calendar year in which the debt was determined or last adjusted. Increases to administrative debts shall be computed annually. DOE will use this alternative only when there is a legitimate reason to do so, such as when calculating interest and penalties on a debt would be extremely difficult because of the age of the debt.

(f) When a debt is paid in partial or installment payments, amounts received by DOE shall be applied first to outstanding penalties, second to administrative costs, third to interest, and last to principal.

(g) DOE shall waive the collection of interest and administrative costs imposed pursuant to this section on the portion of the debt that is paid within 30 days after the date on which interest began to accrue. DOE may extend this 30-day period on a case-by-case basis. In addition, DOE may waive interest, penalties, and administrative costs charged under this section, in whole or in part, without regard to the amount of the debt, either under the criteria set forth in these standards for the compromise of debts, or if DOE determines that collection of these charges is against equity and good conscience or is not in the best interest of the United States.

(h) When a debtor requests a waiver or review of the debt, DOE will continue to accrue interest, penalties, and administrative costs during the period collection activity is suspended. Upon completion of DOE’s review, interest, penalties, and administrative costs related to the portion of the debt found to be without merit will be waived.

(i) DOE is authorized to impose interest and related charges on debts not subject to 31 U.S.C. 3717, in accordance with the common law.

§ 1015.213 Analysis of costs.

DOE will prepare periodic comparisons of costs incurred and amounts collected. Data on costs and corresponding recovery rates for debts of different types and in various dollar ranges will be used to compare the cost effectiveness of alternative collection techniques, establish guidelines with respect to points at which costs of further collection efforts are likely to exceed recoveries, assist in evaluating offers in compromise, and establish minimum debt amounts below which collection efforts need not be taken.

§ 1015.214 Use and disclosure of mailing addresses.

(a) When attempting to locate a debtor in order to collect or compromise a debt under §§ 1015.100–105 of this part or other authority, DOE may send a request to Treasury to obtain a debtor’s mailing address from the records of the IRS.

(b) DOE may use mailing addresses obtained under paragraph (a) of this section to enforce collection of a delinquent debt and may disclose such mailing addresses to other agencies and to collection agencies for collection purposes.

§ 1015.215 Federal salary offset.

(a) DOE may authorize Treasury to offset a Federal salary to satisfy delinquent debt in accordance with 5 U.S.C. 5514, Installment Deduction for Indebtedness to the United States; 5 CFR 550.1101 through 550.1108, Collection by Offset from Indebted Government Employees; 31 CFR parts 900–904, the revised Federal Claims Collection Standards; and 31 CFR 285.7, Salary Offset. DOE shall ensure that all of the rights

and protections afforded to the debtor under 5 U.S.C. 5514 and 31 CFR 901.3 have been fulfilled. Claims due from Federal employees will be collected in accordance with DOE Order 2200.2B, Collection from Current and Former Employees for Indebtedness to the United States.

(b) As described in § 1015.201(e), under the DCIA (31 U.S.C. 3711(g)), DOE is required to refer all debts over 180 days delinquent to Treasury for purposes of debt collection (*i.e.*, cross-servicing). As part of its regular debt collection procedures, Treasury may use Federal salary offset on behalf of DOE.

§ 1015.216 Exemptions.

(a) The preceding sections of this part, to the extent they reflect remedies or procedures prescribed by the Debt Collection Act of 1982 and the DCIA, such as administrative offset, use of credit bureaus, contracting for collection agencies, and interest and related charges, do not apply to debts arising under, or payments made under, the Internal Revenue Code of 1986, as amended (26 U.S.C. 1, *et seq.*); the Social Security Act (42 U.S.C. 301, *et seq.*) except to the extent provided under 42 U.S.C. 404 and 31 U.S.C. 3716(c); or the tariff laws of the United States. These remedies and procedures, however, may be authorized with respect to debts that are exempt from the Debt Collection Act of 1982 and the DCIA, to the extent that they are authorized under some other statute or the common law.

(b) This section should not be construed as prohibiting the use of these authorities or requirements when collecting debts owed by persons employed by agencies administering the laws cited in paragraph (a) of this section unless the debt arose under those laws.

Subpart C—Standards for the Compromise of Claims

§ 1015.300 Scope.

This subpart sets forth the standards for the compromise of claims under this part. This subpart corresponds to 31 CFR part 902 of the Treasury Federal Claims Collection Standards.

§ 1015.301 Scope and application.

(a) The standards set forth in this subpart apply to the compromise of debts pursuant to 31 U.S.C. 3711. DOE's Chief Financial Officer or designee or Heads of Field Elements or designees in field locations may exercise such compromise authority for debts arising out of activities of, or referred or transferred for collection services to, DOE when the amount of the debt then due, exclusive of interest, penalties, and administrative costs, does not exceed \$100,000 or any higher amount authorized by the Attorney General.

(b) Unless otherwise provided by law, when the principal balance of a debt, exclusive of interest, penalties, and administrative costs, exceeds \$100,000 or any higher amount authorized by the Attorney General, the authority to accept the compromise rests with the DOJ. DOE will evaluate the compromise offer, using the factors set forth in this part. If an offer to compromise any debt in excess of \$100,000 is acceptable to DOE, DOE shall refer the debt to the Civil Division or other appropriate litigating division in the DOJ using a Claims Collection Litigation Report (CCLR). DOE may obtain the CCLR from the DOJ's National Central Intake Facility. The referral shall include appropriate financial information and a recommendation for the acceptance of the compromise offer. DOJ approval is not required if DOE rejects a compromise offer.

§ 1015.302 Bases for compromise.

(a) DOE may compromise a debt if the Government cannot collect the full amount because:

- (1) The debtor is unable to pay the full amount in a reasonable time, as verified through credit reports or other financial information;
- (2) The Government is unable to collect the debt in full within a reasonable time by enforced collection proceedings;
- (3) The cost of collecting the debt does not justify the enforced collection of the full amount; or
- (4) There is significant doubt concerning the Government's ability to prove its case in court.

(b) In determining the debtor's inability to pay, DOE should consider relevant factors such as the following:

- (1) Age and health of the debtor;
- (2) Present and potential income;
- (3) Inheritance prospects;
- (4) The possibility that assets have been concealed or improperly transferred by the debtor; and
- (5) The availability of assets or income that may be realized by enforced collection proceedings.

(c) DOE will verify the debtor's claim of inability to pay by using a credit report and other financial information as provided in paragraph (g) of this section. DOE will consider the applicable exemptions available to the debtor under state and Federal law in determining the Government's ability to enforce collection. DOE may also consider uncertainty as to the price that collateral or other property will bring at a forced sale in determining the Government's ability to enforce collection. A compromise effected under this section should be for an amount that bears a reasonable relation to the amount that can be recovered by enforced collection procedures, with regard to the exemptions available to the debtor and the time that collection will take.

(d) If there is significant doubt concerning the Government's ability to prove its case in court for the full amount claimed, either because of the legal issues involved or because of a bona fide dispute as to the facts, then the amount accepted in compromise of such cases should fairly reflect the probabilities of successful prosecution to judgment, with due regard given to the availability of witnesses and other evidentiary support for the Government's claim. In determining the litigative risks involved, DOE will consider the probable amount of court costs and attorney fees pursuant to the Equal Access to Justice Act, 28 U.S.C. 2412, that may be imposed against the Government if it is unsuccessful in litigation.

(e) DOE may compromise a debt if the cost of collecting the debt does not justify the enforced collection of the full amount. The amount accepted in compromise in such cases may reflect an appropriate discount for the admin-

istrative and litigative costs of collection, with consideration given to the time it will take to effect collection. Collection costs may be a substantial factor in the settlement of small debts. In determining whether the cost of collecting justifies enforced collection of the full amount, DOE should consider whether continued collection of the debt, regardless of cost, is necessary to further an enforcement principle, such as the Government's willingness to pursue aggressively defaulting and uncooperative debtors.

(f) DOE generally will not accept compromises payable in installments. This is not an advantageous form of compromise in terms of time and administrative expense. If, however, payment of a compromise in installments is necessary, DOE will obtain a legally enforceable, written agreement providing that, in the event of default, the full original principal balance of the debt prior to compromise, less sums paid thereon, is reinstated. Whenever possible, DOE also will obtain security for repayment in the manner set forth in subpart B of this part.

(g) To assess the merits of a compromise offer based in whole or in part on the debtor's inability to pay the full amount of a debt within a reasonable time, DOE will, if feasible, obtain a current financial statement from the debtor, executed under penalty of perjury, showing the debtor's assets, liabilities, income, and expenses. DOE also may obtain credit reports or other financial information to assess compromise offers. DOE may use its own financial information form or may request suitable forms from the DOJ or the local United States Attorney's Office.

§ 1015.303 Enforcement policy.

Pursuant to this part, DOE may compromise statutory penalties, forfeitures, or claims established as an aid to enforcement and to compel compliance, if DOE's enforcement policy in terms of deterrence and securing compliance, present and future, will be adequately served by DOE's acceptance of the sum to be agreed upon.

§ 1015.304

§ 1015.304 Joint and several liability.

(a) When two or more debtors are jointly and severally liable, DOE will pursue collection activity against all debtors, as appropriate. DOE will not attempt to allocate the burden of payment between the debtors, but will proceed to liquidate the indebtedness as quickly as possible.

(b) DOE will seek to ensure that a compromise agreement with one debtor does not release DOE's claim against the remaining debtors. The amount of a compromise with one debtor shall not be considered a precedent or binding in determining the amount that will be required from other debtors jointly and severally liable on the claim.

§ 1015.305 Further review of compromise offers.

If DOE is uncertain whether to accept a firm, written, substantive compromise offer on a debt that is within DOE's delegated compromise authority, it may refer the offer to the Civil Division or other appropriate litigating division in the DOJ, using a CCLR accompanied by supporting data and particulars concerning the debt. The DOJ may act upon such an offer or return it to DOE with instructions or advice.

§ 1015.306 Consideration of tax consequences to the Government.

In negotiating a compromise, DOE will consider the tax consequences to the Government. In particular, DOE will consider requiring a waiver of tax-loss-carry-forward and tax-loss-carry-back rights of the debtor. For information on discharge of indebtedness reporting requirements see § 1015.405 of this part.

§ 1015.307 Mutual releases of the debtor and the Government.

In all appropriate instances, a compromise that is accepted by DOE will be implemented by means of a mutual release, in which the debtor is released from further non-tax liability on the compromised debt in consideration of payment in full of the compromise amount and the Government and its officials, past and present, are released and discharged from any and all claims and causes of action arising from the same transaction that the debtor may

10 CFR Ch. X (1-1-16 Edition)

have. In the event a mutual release is not executed when a debt is compromised, unless prohibited by law, the debtor is still deemed to have waived any and all claims and causes of action against the Government and its officials related to the transaction giving rise to the compromised debt.

Subpart D—Standards for Suspending or Terminating Collection Activity

§ 1015.400 Scope.

The subpart sets forth the standards for terminating collection activity. This subpart corresponds to 31 CFR part 903 of the Treasury Federal Claims Collection Standards.

§ 1015.401 Scope and application.

(a) The standards set forth in this subpart apply to the suspension or termination of collection activity pursuant to 31 U.S.C. 3711 on debts that do not exceed \$100,000, or such other amount as the Attorney General may direct, exclusive of interest, penalties, and administrative costs, after deducting the amount of partial payments or collections, if any. Prior to referring a debt to the DOJ for litigation, DOE may suspend or terminate collection under this part with respect to debts arising out of activities of, or referred to, DOE.

(b) If, after deducting the amount of any partial payments or collections, the principal amount of a debt exceeds \$100,000, or such other amount as the Attorney General may direct, exclusive of interest, penalties, and administrative costs, the authority to suspend or terminate rests solely with the DOJ. If DOE believes that suspension or termination of any debt in excess of \$100,000 may be appropriate, DOE shall refer the debt to the Civil Division or other appropriate litigating division in the DOJ, using the CCLR. The referral should specify the reasons for DOE's recommendation. If, prior to referral to the DOJ, DOE determines that a debt is plainly erroneous or clearly without legal merit, DOE may terminate collection activity regardless of the amount involved without obtaining DOJ concurrence.

Department of Energy

§ 1015.403

§ 1015.402 Suspension of collection activity.

(a) DOE may suspend collection activity on a debt when:

- (1) DOE cannot locate the debtor;
- (2) The debtor's financial condition is expected to improve; or
- (3) The debtor has requested a waiver or review of the debt.

(b) Based on the current financial condition of the debtor, DOE may suspend collection activity on a debt when the debtor's future prospects justify retention of the debt for periodic review and collection activity and:

- (1) The applicable statute of limitations has not expired; or
- (2) Future collection can be effected by administrative offset, notwithstanding the expiration of the applicable statute of limitations for litigation of claims, with due regard to the 10-year limitation for administrative offset prescribed by 31 U.S.C. 3716(e)(1); or
- (3) The debtor agrees to pay interest on the amount of the debt on which collection will be suspended, and such suspension is likely to enhance the debtor's ability to pay the full amount of the principal of the debt with interest at a later date.

(c)(1) DOE shall suspend collection activity during the time required for consideration of the debtor's request for waiver or administrative review of the debt if the statute under which the request is sought prohibits DOE from collecting the debt during that time. As indicated in § 1015.212(h), DOE will continue to accrue interest, penalties, and administrative costs during the period collection activity is suspended.

(2) If the statute under which the request is sought does not prohibit collection activity pending consideration of the request, DOE may use discretion, on a case-by-case basis, to suspend collection. Further, DOE ordinarily will suspend collection action upon a request for waiver or review if DOE is prohibited by statute or regulation from issuing a refund of amounts collected prior to DOE's consideration of the debtor's request. However, DOE will not suspend collection when DOE determines that the request for waiver or review is frivolous or was made primarily to delay collection.

(d) When DOE learns that a bankruptcy petition has been filed with respect to a debtor, in most cases the collection activity on a debt must be suspended, pursuant to the provisions of 11 U.S.C. 362, 1201, and 1301, unless DOE can clearly establish that the automatic stay has been lifted or is no longer in effect. DOE will seek legal advice immediately from counsel and, if legally permitted, take the necessary legal steps to ensure that no funds or money is paid by DOE to the debtor until relief from the automatic stay is obtained.

§ 1015.403 Termination of collection activity.

(a) DOE may terminate collection activity when:

- (1) DOE is unable to collect any substantial amount through its own efforts or through the efforts of others;
- (2) DOE is unable to locate the debtor;
- (3) Costs of collection are anticipated to exceed the amount recoverable;
- (4) The debt is legally without merit, or enforcement of the debt is barred by any applicable statute of limitations;
- (5) The debt cannot be substantiated; or
- (6) The debt against the debtor has been discharged in bankruptcy.

(b) Before terminating collection activity, DOE will have pursued all appropriate means of collection and determined, based upon the results of the collection activity, that the debt is uncollectible. Termination of collection activity ceases active collection of the debt. The termination of collection activity does not preclude DOE from retaining a record of the account for purposes of:

- (1) Selling the debt, if Treasury determines that such sale is in the best interests of the United States;
- (2) Pursuing collection at a subsequent date in the event there is a change in the debtor's status or a new collection tool becomes available;
- (3) Offsetting against future income or assets not available at the time of termination of collection activity; or
- (4) Screening future applicants for prior indebtedness.

(c) Generally, DOE shall terminate collection activity on a debt that has

§ 1015.404

been discharged in bankruptcy, regardless of the amount. DOE may continue collection activity, however, subject to the provisions of the Bankruptcy Code, for any payments provided under a plan of reorganization. Offset and recoupment rights may survive the discharge of the debtor in bankruptcy and, under some circumstances, claims also may survive the discharge. For example, if DOE is a known creditor of a debtor, its claims may survive a discharge if DOE did not receive formal notice of the proceedings. DOE will seek legal advice from counsel if it believes it has claims or offsets that may survive the discharge of a debtor.

§ 1015.404 Exception to termination.

When a significant enforcement policy is involved, or recovery of a judgment is a prerequisite to the imposition of administrative sanctions, DOE may refer debts for litigation even though termination of collection activity may otherwise be appropriate.

§ 1015.405 Discharge of indebtedness; reporting requirements.

(a) Before discharging a delinquent debt (also referred to as a close out of the debt), DOE shall take all appropriate steps to collect the debt in accordance with 31 U.S.C. 3711(g), including, as applicable, administrative offset, tax refund offset, Federal salary offset, referral to Treasury, Treasury-designated debt collection centers or private collection contractors, credit bureau reporting, wage garnishment, litigation, and foreclosure. Discharge of indebtedness is distinct from termination or suspension of collection activity under § 1015.400 of this part and is governed by the Internal Revenue Code. When collection action on a debt is suspended or terminated, the debt remains delinquent and further collection action may be pursued at a later date in accordance with the standards set forth in this subpart. When DOE discharges a debt in full or in part, further collection action is prohibited. Therefore, DOE will make the determination that collection action is no longer warranted before discharging a debt. Before discharging a debt, DOE must terminate debt collection action.

10 CFR Ch. X (1–1–16 Edition)

(b) 31 U.S.C. 3711(i) requires DOE to sell a delinquent non-tax debt upon termination of collection action if Treasury determines such a sale is in the best interests of the United States. Since the discharge of a debt precludes any further collection action (including the sale of a delinquent debt), DOE may not discharge a debt until the requirements of 31 U.S.C. 3711(i) have been met.

(c) Upon discharge of an indebtedness, DOE must report the discharge to the IRS in accordance with the requirements of 26 U.S.C. 6050P and 26 CFR 1.6050P-1. DOE may request Treasury or Treasury-designated debt collection centers to file such a discharge report to the IRS on DOE's behalf.

(d) When discharging a debt, DOE must request that litigation counsel release any liens of record securing the debt.

Subpart E—Referrals to the Department of Justice

§ 1015.500 Scope.

This subpart sets forth the standards for referrals to the Department of Justice. This subpart corresponds to 31 CFR part 904 of the Treasury Federal Claims Collection Standards.

§ 1015.501 Referrals to the Department of Justice and the Department of the Treasury's Cross-Servicing Program.

(a) DOE may authorize Treasury to refer a delinquent debt to the DOJ for litigation in accordance with 31 U.S.C. 3711(g), the DCIA, the revised Federal Claims Collection Standards (31 CFR parts 900–904), and other applicable authorities. DOE shall ensure that all of the rights and protections afforded to the debtor under 31 U.S.C. 3711(e) have been fulfilled.

(b) As described in § 1015.201(e), under the DCIA (31 U.S.C. 3711(g)), DOE is required to transfer all debts over 180 days delinquent to Treasury for purposes of debt collection (*i.e.*, cross-servicing). As part of its regular debt collection procedures, Treasury will refer debts to the DOJ for litigation on behalf of DOE.

Department of Energy

§ 1015.505

§ 1015.502 Prompt referral.

(a) If a debt is not referred to the DOJ through Treasury's cross-servicing program, DOE shall promptly refer to the DOJ for litigation debts on which aggressive collection activity has been taken in accordance with § 1015.200 of this part and that cannot be compromised, or on which collection activity cannot be suspended or terminated, in accordance with §§ 1015.300 and 1015.400 of this part. DOE may refer those debts arising out of activities of DOE. Debts for which the principal amount is over \$1,000,000, or such other amount as the Attorney General may direct, exclusive of interest and penalties, shall be referred to the Civil Division or other division responsible for litigating such debts at the DOJ, Washington, DC. Debts for which the principal amount is \$1,000,000, or less, or such other amount as the Attorney General may direct, exclusive of interest or penalties, shall be referred to the DOJ's Nationwide Central Intake Facility as required by the CCLR instructions. Claims will be referred as early as possible, consistent with aggressive agency collection activity and the observance of the standards contained in the Federal Claims Collection Standards (31 CFR parts 900-904), and, in any event, well within the period for initiating timely lawsuits against the debtors. DOE shall make every effort to refer delinquent debts to the DOJ for litigation within one year of the date such debts last became delinquent. In the case of guaranteed or insured loans, DOE will make every effort to refer these delinquent debts to the DOJ for litigation within one year from the date the loan was presented to DOE for payment or re-insurance.

(b) The DOJ has exclusive jurisdiction over the debts referred to it pursuant to this section. DOE shall refrain from having any contact with the debtor and shall direct all debtor inquiries concerning the claim to the DOJ. DOE shall notify the DOJ immediately of any payments credited by DOE to the debtor's account after referral of a debt or claim under this section. The DOJ shall notify DOE, in a timely manner, of any payments it receives from the debtor.

§ 1015.503 Claims Collection Litigation Report.

(a) Unless excepted by the DOJ, DOE shall complete the CCLR (see § 1015.301 of this part), accompanied by a signed Certificate of Indebtedness, to refer all administratively uncollectible claims to the DOJ for litigation. DOE shall complete all of the sections of the CCLR appropriate to each claim as required by the CCLR instructions and furnish such other information as may be required in specific cases.

(b) DOE shall indicate clearly on the CCLR the actions it wishes the DOJ to take with respect to the referred claim. The CCLR permits DOE to indicate specifically any of a number of litigative activities which the DOJ may pursue, including enforced collection, judgment lien only, renew judgment lien only, renew judgment lien and enforce collection, program enforcement, foreclosure only, and foreclosure and deficiency judgment.

(c) DOE also shall use the CCLR to refer claims to the DOJ to obtain the DOJ's approval of any proposals to compromise the claims or to suspend or terminate DOE collection activity.

§ 1015.504 Preservation of evidence.

DOE will take care to preserve all files and records that may be needed by the DOJ to prove its claims in court. DOE ordinarily will include certified copies of the documents that form the basis for the claim in the packages referring its claims to the DOJ for litigation. DOE shall provide originals of such documents immediately upon request by the DOJ.

§ 1015.505 Minimum amount of referrals to the Department of Justice.

(a) DOE shall not refer for litigation claims of less than \$2,500, exclusive of interest, penalties, and administrative costs, or such other amount as the Attorney General shall from time to time prescribe. The DOJ promptly shall notify DOE if the Attorney General changes this minimum amount.

(b) DOE shall not refer claims of less than the minimum amount unless:

(1) Litigation to collect such smaller claims is important to ensure compliance with DOE's policies or programs;

Pt. 1016

10 CFR Ch. X (1–1–16 Edition)

(2) The claim is being referred solely for the purpose of securing a judgment against the debtor, which will be filed as a lien against the debtor's property pursuant to 28 U.S.C. 3201 and returned to DOE for enforcement; or

(3) The debtor has the clear ability to pay the claim and the Government effectively can enforce payment, with due regard for the exemptions available to the debtor under state and Federal law and the judicial remedies available to the Government.

(4) DOE will consult with the Financial Litigation Staff of the Executive Office for United States Attorneys in the DOJ prior to referring claims valued at less than the minimum amount.

- 1016.37 Destruction of documents or material containing Restricted Data.
- 1016.38 Suspension or revocation of access authorization.
- 1016.39 Termination, suspension, or revocation of security facility approval.
- 1016.40 Termination of employment or change of duties.
- 1016.41 Continued applicability of the regulations in this part.
- 1016.42 Reports.
- 1016.43 Inspections.
- 1016.44 Violations.

AUTHORITY: Sec. 161i of the Atomic Energy Act of 1954, 68 Stat. 948 (42 U.S.C. 2201).

PART 1016—SAFEGUARDING OF RESTRICTED DATA

GENERAL PROVISIONS

- Sec.
- 1016.1 Purpose.
- 1016.2 Scope.
- 1016.3 Definitions.
- 1016.4 Communications.
- 1016.5 Submission of procedures by access permit holder.
- 1016.6 Specific waivers.
- 1016.7 Interpretations.

PHYSICAL SECURITY

- 1016.8 Approval for processing access permittees for security facility approval.
- 1016.9 Processing security facility approval.
- 1016.10 Grant, denial, or suspension of security facility approval.
- 1016.11 Cancellation of requests for security facility approval.
- 1016.12 Termination of security facility approval.
- 1016.21 Protection of Restricted Data in storage.
- 1016.22 Protection while in use.
- 1016.23 Establishment of security areas.
- 1016.24 Special handling of classified material.
- 1016.25 Protective personnel.

CONTROL OF INFORMATION

- 1016.31 Access to Restricted Data.
- 1016.32 Classification and preparation of documents.
- 1016.33 External transmission of documents and material.
- 1016.34 Accountability for Secret Restricted Data.
- 1016.35 Authority to reproduce Restricted Data.
- 1016.36 Changes in classification.

GENERAL PROVISIONS

§ 1016.1 Purpose.

The regulations in this part establish requirements for the safeguarding of Secret and Confidential Restricted Data received or developed under an access permit. This part does not apply to Top Secret information since no such information may be forwarded to an access permittee within the scope of this regulation.

§ 1016.2 Scope.

The regulations in this part apply to all persons who may require access to Restricted Data used, processed, stored, reproduced, transmitted, or handled in connection with an access permit.

§ 1016.3 Definitions.

(a) *Access authorization or security clearance.* An administrative determination by the DOE that an individual who is either a DOE employee, applicant for employment, consultant, assignee, other Federal department or agency employee (and other persons who may be designated by the Secretary of Energy), or a DOE contractor or subcontractor employee and an access permittee is eligible for access to Restricted Data. Access authorizations or security clearances granted by DOE are designated as "Q," "Q(X)," "L," "L(X)," "Top Secret," or "Secret." For the purpose of this chapter only "Q," "Q(X)," "L," and "L(X)" access authorizations or clearances will be defined.

Department of Energy

§ 1016.3

(1) "Q" access authorizations or clearances are based upon full field investigations conducted by the Federal Bureau of Investigation, Office of Personnel Management, or another Government agency which conducts personnel security investigations. They permit an individual to have access, on a "need to know" basis, to Top Secret, Secret, and Confidential Restricted Data, Formerly Restricted Data, National Security Information, or special nuclear material in Category I or II quantities as required in the performance of duties.

(2) "Q(X)" access authorizations or clearances are based upon the same full field investigations as described in § 1016.3(a)(1), above. When "Q" access authorizations or clearances are granted to access permittees they are identified as "Q(X)" access authorizations or clearances and authorize access only to the type of Secret Restricted Data as specified in the permit and consistent with appendix A, 10 CFR part 725, "Categories of Restricted Data Available."

(3) "L" access authorizations or clearances are based upon National Agency Checks and Inquiries (NACI) for Federal employees, or National Agency Checks (NAC) for non-Federal employees, conducted by the Office of Personnel Management. They permit an individual to have access, on a "need to know" basis, to Confidential Restricted Data, Secret and Confidential Formerly Restricted Data, or Secret and Confidential National Security Information, required in the performance of duties, provided such information is not designated "CRYPTO" (classified cryptographic information), other classified communications security ("COMSEC") information, or intelligence information.

(4) "L(X)" access authorizations or clearances are based upon the same National Agency Checks as described in paragraph (a)(3), of this section. When "L" access authorizations or clearances are granted to access permittees, they are identified as "L(X)" access authorizations or clearances and authorize access only to the type of Confidential Restricted Data as specified in the permit and consistent with appendix A,

10 CFR part 725, "Categories of Restricted Data Available."

(b) *Act.* The Atomic Energy Act of 1954 (68 Stat. 919) as amended.

(c) *Authorized classifier.* An individual authorized in writing by appropriate DOE authority to classify, declassify, or downgrade the classification of information, work, projects, documents, and materials.

(d) *Classified mail address.* A mail address established for each access permittee approved by the DOE to which all Restricted Data for the permittee is to be sent.

(e) *Classified matter.* Documents and material containing classified information.

(f) *Combination lock.* A built-in combination lock on a security container which is of tempered steel alloy hard plate, at least ¼" in thickness and Rockwell hardness of C-63 to C-65, of sufficient size and so located as to sufficiently impede access to the locking mechanism by drilling of the lock or container.

(g) *DOE.* The United States Department of Energy or its duly authorized representatives.

(h) *Document.* Any piece of recorded information regardless of its physical form or characteristics.

(i) *Formerly Restricted Data.* Classified information jointly determined by the DOE and the Department of Defense to be related primarily to the military utilization of atomic weapons and removed by the DOE from the Restricted Data category pursuant to section 142(d) of the Atomic Energy Act of 1954, as amended.

(j) *Infraction.* An act or omission involving failure to comply with DOE safeguards and security orders or directives, and may include a violation of law.

(k) *Intrusion alarm.* A tamper-indicating electrical, electro-mechanical, electro-optical, electronic or similar device which will detect unauthorized intrusion by an individual into a building or security area, and alert protective personnel by means of actuated visible and audible signals.

(l) *Material.* A chemical substance without regard to form; fabricated or processed item; or assembly, machinery, or equipment.

§ 1016.4

(m) *Matter*. Documents or material.

(n) *National Security*. The national defense and foreign relations of the United States.

(o) *National Security Information*. Information that has been determined pursuant to Executive Order 12958, as amended "Classified National Security Information" and Executive Order 13292 "Further Amendment to Executive Order 12958, as Amended, Classified National Security Information" or any predecessor order to require protection against unauthorized disclosure and that is so designated.

(p) "*Need to know*." A determination by persons having responsibility for classified information or matter, that a proposed recipient's access to such classified information or matter is necessary in the performance of official, contractual, or access permit duties of employment under cognizance of the DOE.

(q) *Permittee*. The holder of an Access Permit issued pursuant to the regulations set forth in 10 CFR part 725, "Permits For Access to Restricted Data."

(r) *Person*. Any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, Government agency other than DOE, any State or any political subdivision of, or any political entity within a State, or other entity; and any legal successor, representative, agency, or agency of the foregoing.

(s) *Protective personnel*. Guards or watchmen or other persons designated responsibility for the protection of classified matter.

(t) *Restricted Data*. All data concerning design, manufacture, or utilization of atomic weapons; the production of special nuclear material; or the use of special nuclear material in the production of energy, but shall not include data declassified or removed from the Restricted Data category pursuant to section 142 of the Act.

(u) *Security area*. A physically defined space containing classified matter and subject to physical protection and personnel access controls.

(v) *Security clearance*. See access authorization.

(w) *Security facility*. Any facility, including an access permittee, which has

10 CFR Ch. X (1-1-16 Edition)

been approved by the DOE for using, processing, storing, reproducing, transmitting, or handling classified matter.

(x) *Security facility approval*. A determination by the DOE that a facility, including an access permittee, is eligible to use, process, store, reproduce, transmit, or handle classified matter.

(y) *Security Plan*. A written plan by the access permittee, and submitted to the DOE for approval, which outlines the permittee's proposed security procedures and controls for the protection of Restricted Data and which includes a floor plan of the area in which the matter is to be used, processed, stored, reproduced, transmitted, or handled.

(z) *Security survey*. An onsite examination by a DOE representative of all devices, equipment, and procedures employed at a security facility to safeguard classified matter.

[48 FR 36432, Aug. 10, 1983, as amended at 71 FR 68735, Nov. 28, 2006]

§ 1016.4 Communications.

Communications concerning rule-making, i.e., petition to change part 1016, should be addressed to the Chief Health, Safety and Security Officer, HS-1/Forrestal Building, Office of Health, Safety and Security, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585. All other communications concerning the regulations in this part should be addressed to the cognizant DOE or National Nuclear Security Administration (NNSA) office.

[71 FR 68735, Nov. 28, 2006]

§ 1016.5 Submission of procedures by access permit holder.

No access permit holder shall have access to Restricted Data until he shall have submitted to the DOE a written statement of his procedures for the safeguarding of Restricted Data and for the security education of his employees, and DOE shall have determined and informed the permittee that his procedures for the safeguarding of Restricted Data are in compliance with the regulations in this part and that his procedures for the security education of his employees, who will have access to Restricted Data, are informed

Department of Energy

§ 1016.21

about and understand the regulations in this part.

§ 1016.6 Specific waivers.

DOE may, upon application of any interested party, grant such waivers from the requirements of this part as it determines are authorized by law and will not constitute an undue risk to the common defense and security.

§ 1016.7 Interpretations.

Except as specifically authorized by the Secretary of Energy in writing, no interpretation of the meaning of the regulations in this part by any officer or employee of DOE other than a written interpretation by the General Counsel will be recognized to be binding upon DOE.

PHYSICAL SECURITY

§ 1016.8 Approval for processing access permittees for security facility approval.

(a) An access permittee who has a need to use, process, store, reproduce, transmit, or handle Restricted Data at any location in connection with its permit shall promptly request a DOE security facility approval.

(b) The request shall include the following information: The name and address of the permittee; the extent and scope of the classified activity and the highest classification of Restricted Data to be received; a written statement in the form of a security plan which outlines the permittee's proposed security procedures and controls for the protection of Restricted Data, including a floor plan of the areas(s) in which the classified matter is to be used, processed, stored, reproduced, transmitted, and handled.

(c) The DOE will promptly inform the permittee of the acceptability of the request for further processing and will notify the permittee of its decision in writing.

§ 1016.9 Processing security facility approval.

The following receipt of an acceptable request for security facility approval, the DOE will perform an initial security survey of the permittee's facility to determine that granting a se-

curity facility approval would be consistent with the national security. If DOE makes such a determination, security facility approval will be granted. If not, security facility approval will be withheld pending compliance with the security survey recommendations or until a waiver is granted pursuant to § 1016.6 of this part.

§ 1016.10 Grant, denial, or suspension of security facility approval.

Notification of the DOE's grant, denial, or suspension of security facility approval will be furnished the permittee in writing, or orally with written confirmation. This information may also be furnished to representatives of the DOE, DOE contractors, or other Federal agencies having a need to transmit Restricted Data to the permittee.

§ 1016.11 Cancellation of requests for security facility approval.

When a request for security facility approval is to be withdrawn or cancelled, the DOE Operations Office will be notified by the requester immediately by telephone and confirmed in writing so that processing of this approval may be terminated.

§ 1016.12 Termination of security facility approval.

Security facility approval will be terminated when:

(a) There is no longer a need to use, process, store, reproduce, transmit, or handle Restricted Data at the facility; or

(b) The DOE makes a determination that continued security facility approval is not in the interest of national security.

In such cases the permittee will be notified in writing of the determination, and the procedures outlined in § 1016.39 of this part will apply.

§ 1016.21 Protection of Restricted Data in storage.

(a) Persons who possess Restricted Data pursuant to an Access Permit shall store Secret and Confidential documents and material when not in use in accordance with one of the following methods:

§ 1016.22

(1) In a locked vault, safe, or safe-type steel file cabinet having a 3-position dial-type combination lock; or

(2) In a dual key, bank safety deposit box; or

(3) In a steel file cabinet secured by a steel lock bar and a 3-position dial-type changeable combination padlock; or

(4) In a locked steel file cabinet when located in a security area established under §1016.23 or when the cabinet or the place in which the cabinet is located is under DOE-approved intrusion alarm protection.

(b) Changes of combination: Each permittee shall change the combination on locks of his safekeeping equipment whenever such equipment is placed in use, whenever an individual knowing the combination no longer requires access to the repository as a result of change in duties or position in the permittee's organization, or termination of employment with the permittee or whenever the combination has been subjected to compromise, and in any event at least once a year. Permittees shall classify records of combinations no lower than the highest classification of the documents and material authorized for storage in the safekeeping equipment concerned.

(c) The lock on safekeeping equipment of the type specified in paragraph (a)(4) of this section shall be replaced immediately whenever a key is lost.

§ 1016.22 Protection while in use.

While in use, documents and material containing Restricted Data shall be under the direct control of an appropriately cleared individual, and the Restricted Data shall be capable of being removed from sight immediately.

§ 1016.23 Establishment of security areas.

(a) When, because of their nature or size, it is impracticable to safeguard documents and material containing Restricted Data in accordance with the provisions of §§1016.21 and 1016.22, a security area to protect such documents and material shall be established.

(b) The following controls shall apply to security areas:

(1) Security areas shall be separated from adjacent areas by a physical bar-

10 CFR Ch. X (1-1-16 Edition)

rier designed to prevent entrance into such areas, and access to the Restricted Data within the areas, by unauthorized individuals.

(2) During working hours, admittance shall be controlled by an appropriately cleared individual posted at each unlocked entrance.

(3) During nonworking hours, admittance shall be controlled by protective personnel on patrol, with protective personnel posted at unlocked entrances, or by such intrusion alarm system as DOE may approve.

(4) Each individual authorized to enter a security area shall be issued a distinctive badge or pass when the number of employees assigned to the area exceeds thirty.

§ 1016.24 Special handling of classified material.

When the Restricted Data contained in material is not ascertainable by observation or examination at the place where the material is located and when the material is not readily removable because of size, weight, radioactivity, or similar factors, DOE may authorize the permittee to provide such lesser protection than is otherwise required by §§1016.21 to 1016.23 inclusive, as DOE determines to be commensurate with the difficulty of removing the material.

§ 1016.25 Protective personnel.

Whenever protective personnel are required by §1016.23, such protective personnel shall:

(a) Possess a "Q" or "L" security clearance or access authorization or "Q(X)" or "L(X)" access authorization if the Restricted Data being protected is classified Confidential, or a "Q" security clearance or access authorization or "Q(X)" access authorization if the Restricted Data being protected is classified Secret.

(b) Be armed with sidearms of not less than .38 caliber.

CONTROL OF INFORMATION

§ 1016.31 Access to Restricted Data.

(a) Except as DOE may authorize, no person subject to the regulations in this part shall permit any individual to have access to Secret or Confidential

Department of Energy

§ 1016.32

Restricted Data in his possession unless the individual has an appropriate security clearance or access authorization granted by DOE, or has been certified by DOD or NASA through DOE, and;

(1) The individual is authorized by an Access Permit to receive Restricted Data in the categories involved and, in the case of Secret Restricted Data, the permittee determines that such access is required in the course of his duties, or

(2) The individual needs such access in connection with such duties as a DOE employee or DOE contractor employee, or as certified by DOD or NASA.

(b) Inquiries concerning the clearance status of individuals, the scope of Access Permits, or the nature of contracts should be addressed to the cognizant DOE or NNSA office.

[48 FR 36432, Aug. 10, 1983, as amended at 71 FR 68735, Nov. 28, 2006]

§ 1016.32 Classification and preparation of documents.

(a) *Classification.* Restricted Data generated or possessed by an Access Permit holder must be appropriately marked. CG-UF-3, "Guide to the Unclassified Fields of Research," will be furnished each permittee. In the event a permittee originates classified information which falls within the definition of Restricted Data or information which he is not positive is not within that definition and CG-UF-3 does not provide positive classification guidance for such information, he shall designate the information as Confidential, Restricted Data and request classification guidance from the DOE through the Classification Officer at the cognizant DOE or NNSA office, who will refer the request to the Director, Office of Classification, HS-90/Germantown Building, Office of Health, Safety and Security, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585-1290 if he does not have authority to provide the guidance.

(b) *Classification consistent with content.* Each document containing Restricted Data shall be classified Secret or Confidential according to its own content.

(c) *Document which custodian believes improperly classified or lacking appropriate classification markings.* If a person receives a document which, in his opinion, is not properly classified, or omits the appropriate classification markings, he shall communicate with the sender and suggest the classification which he believes appropriate. Pending final determination of proper classification, such documents shall be safeguarded with the highest classification in question.

(d) *Classification markings.* Unless otherwise authorized below, the assigned classification of a document shall be conspicuously marked or stamped at the top and bottom of each page and on the front cover, if any, and the document shall bear the following additional markings on the first page and on the front cover:

RESTRICTED DATA

This document contains Restricted Data as defined in the Atomic Energy Act of 1954. Its transmittal or the disclosure of its contents in any manner to an unauthorized person is prohibited.

(e) *Documentation.* (1) All Secret documents shall bear on the first page a properly completed documentation stamp such as the following: This document consists of ___ pages. Copy No. ___ of ___ Series ___.

(2) The series designation shall be a capital letter beginning with the letter "A" designating the original set of copies prepared. Each subsequent set of copies of the same documents shall be identified by the succeeding letter of the alphabet.

(f) *Letter of transmittal.* A letter of transmitting Restricted Data shall be marked with a classification at least as high as its highest classified enclosure. When the contents of the letter of transmittal warrant lower classification or requires no classification, a stamp or marking such as the following shall be used in the letter:

When separated from enclosures handle this document as ___.

(g) *Permanently fastened documents.* Classified books or pamphlets, the pages of which are permanently and securely fastened together, shall be conspicuously marked or stamped with the assigned classification in letters at

§ 1016.33

10 CFR Ch. X (1–1–16 Edition)

least one-fourth (¼) inch in height at the top and bottom on the outside front cover, on the title page, on the front page, and on the inside and outside of the back cover. The additional markings referred to in paragraph (d) of this section shall be placed on the first page and on the front cover.

(h) *Physically connected documents.* The classification of a file or group of physically connected documents shall be at least as high as that of the most highly classified document therein. It shall bear only one overall classification, although pages, paragraphs, sections, or components thereof may bear different classifications. Each document separated from the file or group shall be handled in accordance with its individual classification.

(i) *Attachment of security markings.* Documents which do not lend themselves to marking or stamping shall have securely affixed or attached a tag, sticker, or similar device bearing the appropriate security markings.

[48 FR 36432, Aug. 10, 1983, as amended at 71 FR 68735, Nov. 28, 2006]

§ 1016.33 External transmission of documents and material.

(a) *Restrictions.* (1) Documents and material containing Restricted Data shall be transmitted only to persons who possess appropriate clearance or access authorization and are otherwise eligible for access under the requirements of § 1016.31.

(2) In addition, such documents and material shall be transmitted only to persons who possess facilities for their physical security consistent with this part. Any person subject to the regulations in this part who transmits such documents or material shall be deemed to have fulfilled his obligations under this subparagraph by securing a written certification from the prospective recipient that such recipient possesses facilities for its physical security consistent with this part.

(3) Documents and material containing Restricted Data shall not be exported from the United States without prior authorization of DOE.

(b) *Preparation of documents.* Documents containing Restricted Data shall be prepared for transmission outside an

individual installation in accordance with the following:

(1) They shall be enclosed in two sealed, opaque envelopes or wrappers.

(2) The inner envelope or wrapper shall be addressed in the ordinary manner and sealed with tape, the appropriate classification shall be placed on both sides of the envelope, and the additional marking referred to in § 1016.32(d) shall be placed on the side bearing the address.

(3) The outer envelope or wrapper shall be addressed in the ordinary manner. No classification, additional marking, or other notation shall be affixed which indicates that the document enclosed therein contains classified information or Restricted Data.

(4) A receipt which identifies the document, the date of transfer, the recipient, and the person transferring the document shall accompany the document and shall be signed by the recipient and returned to the sender whenever the custody of a Secret document is transferred.

(c) *Preparation of material.* Material, other than documents, containing Restricted Data shall be prepared for shipment outside an individual installation in accordance with the following:

(1) The material shall be so packaged that the classified characteristics will not be revealed.

(2) A receipt which identifies the material, the date of shipment, the recipient, and the person transferring the material shall accompany the material, and the recipient shall sign such receipt whenever the custody of Secret material is transferred.

(d) *Methods of transportation.* (1) Secret matter shall be transported only by one of the following methods:

(i) By messenger-courier system specifically created for that purpose.

(ii) Registered mail.

(iii) By protective services provided by United States air or surface commercial carriers under such conditions as may be prescribed by the DOE.

(iv) Individuals possessing appropriate DOE security clearance or access authorization who have been given written authority by their employers.

(2) Confidential matter may be transported by one of the methods set forth

Department of Energy

§ 1016.39

in paragraph (d)(1) of this section or by U.S. first class, express, or certified mail.

(e) *Telecommunication of classified information.* There shall be no telecommunication of Restricted Data unless the secure telecommunication system has been approved by the DOE.

(f) *Telephone conversations.* Classified information shall not be discussed over the telephone.

§ 1016.34 Accountability for Secret Restricted Data.

Each permittee possessing documents containing Secret Restricted Data shall establish a document accountability procedure and shall maintain records to show the disposition of all such documents which have been in his custody at any time.

§ 1016.35 Authority to reproduce Restricted Data.

Secret Restricted Data will not be reproduced without the written permission of the originator, his successor, or high authority. Confidential Restricted Data may be reproduced to the minimum extent necessary consistent with efficient operation without the necessity for permission.

§ 1016.36 Changes in classification.

Documents containing Restricted Data shall not be downgraded or declassified except as authorized by DOE. Requests for downgrading or declassification shall be submitted to the cognizant DOE or NNSA office or Office of Classification, HS-90/Germantown Building, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585-1290. If the appropriate authority approves a change of classification or declassification, the previous classification marking shall be canceled and the following statement, properly completed, shall be placed on the first page of the document:

Classification canceled (or changed to)

(Insert appropriate classification)
by _____
(Person authorizing change in classification)
by _____
(Signature of person making change and date thereof)

Any persons making a change in classification or receiving notice of such a change shall forward notice of the change in classification to holders of all copies as shown in their records.

[48 FR 36432, Aug. 10, 1983, as amended at 71 FR 68735, Nov. 28, 2006]

§ 1016.37 Destruction of documents or material containing Restricted Data.

Documents containing Restricted Data may be destroyed by burning, pulping, or another method that assures complete destruction of the information which they contain. If the document contains Secret Restricted Data, a permanent record of the subject, title, report number of the document, its date of preparation, its series designation and copy number, and the date of destruction shall be signed by the person destroying the document and shall be maintained in the office of the last custodian. Restricted Data contained in material, other than documents, may be destroyed only by a method that assures complete obliteration, removal, or destruction of the Restricted Data.

§ 1016.38 Suspension or revocation of access authorization.

In any case where the access authorization of an individual subject to the regulations in this part is suspended or revoked in accordance with the procedures set forth in 10 CFR part 710, such individual shall, upon due notice from DOE of such suspension or revocation and demand by DOE, deliver to DOE any and all Restricted Data in his possession for safekeeping and such further disposition as DOE determines to be just and proper.

§ 1016.39 Termination, suspension, or revocation of security facility approval.

(a) If the need to use, process, store, reproduce, transmit, or handle classified matter no longer exists, the security facility approval will be terminated. The permittee may deliver all Restricted Data to the DOE or to a person authorized to receive them; or the

§ 1016.40

permittee may destroy all such Restricted Data. In either case, the facility must submit a certification of non-possession of Restricted Data to the DOE.

(b) In any instance where security facility approval has been suspended or revoked based on a determination of the DOE that further possession of classified matter by the permittee would endanger the common defense and national security, the permittee shall, upon notice from the DOE, immediately deliver all Restricted Data to the DOE along with a certificate of nonpossession of Restricted Data.

§ 1016.40 Termination of employment or change of duties.

Each permittee shall furnish promptly to DOE written notification of the termination of employment of each individual who possesses an access authorization under his Permit or whose duties are changed so that access to Restricted Data is no longer needed. Upon such notification, DOE may:

(a) Terminate the individual's access authorization, or

(b) Transfer the individual's access authorization to the new employer of the individual to allow continued access to Restricted Data where authorized, pursuant to DOE regulations.

§ 1016.41 Continued applicability of the regulations in this part.

The expiration, suspension, revocation, or other termination of a security clearance or access authorization or security facility approval shall not relieve any person from compliance with the regulations in this part.

§ 1016.42 Reports.

Each permittee shall immediately report to the DOE office administering the permit any alleged or suspected violation of the Atomic Energy Act of 1954, as amended, Espionage Act, or other Federal statutes related to Restricted Data. Additionally, the permittee shall report any infractions, losses, compromises, or possible compromise of Restricted Data.

§ 1016.43 Inspections.

The DOE shall make such inspections and surveys of the premises, activities,

10 CFR Ch. X (1–1–16 Edition)

records, and procedures of any person subject to the regulations in this part as DOE deems necessary to effectuate the purposes of the Act, Executive Order 12958, as amended, and DOE orders and procedures.

[48 FR 36432, Aug. 10, 1983, as amended at 71 FR 68735, Nov. 28, 2006]

§ 1016.44 Violations.

An injunction or other court order may be obtained prohibiting any violation of any provision of the Act or any regulation or order issued thereunder. Any person who willfully violates, attempts to violate, or conspires to violate any provision of the Act or any regulation or order issued thereunder, including the provisions of this part, may be guilty of a crime and upon conviction may be punished by fine or imprisonment, or both, as provided by law.

Subpart A—General Overview

§ 1017.1 Purpose and scope.

(a) This part implements section 148 of the Atomic Energy Act (42 U.S.C. 2168) which prohibits the unauthorized dissemination of certain unclassified Government information. This information identified by the term “Unclassified Controlled Nuclear Information” (UCNI) consists of certain design and security information concerning nuclear facilities, nuclear materials, and nuclear weapons.

(b) This part:

(1) Provides for the review of information prior to its designation as UCNI;

(2) Describes how information is determined to be UCNI;

(3) Establishes minimum physical protection standards for documents and material containing UCNI;

(4) Specifies who may have access to UCNI; and,

(5) Establishes a procedure for the imposition of penalties on persons who violate section 148 of the Atomic Energy Act or any regulation or order of the Secretary issued under section 148 of the Atomic Energy Act, including this part.

(c) This part does not apply to information controlled under 10 U.S.C. 128 by the Department of Defense.

§ 1017.2 Applicability.

This part applies to any person who is or was authorized access to UCNI, requires authorized access to UCNI, or attempts to gain or gains unauthorized access to UCNI.

§ 1017.3 Policy.

The Department of Energy (DOE) strives to make information publicly available to the fullest extent possible. Therefore, this part must be interpreted and implemented to apply the minimum restrictions needed to protect the health and safety of the public or the common defense and security consistent with the requirement in section 148 of the Atomic Energy Act to prohibit the unauthorized dissemination of UCNI.

§ 1017.4 Definitions.

As used in this part:

Atomic Energy Act means the Atomic Energy Act of 1954, as amended (42 U.S.C. 2011 *et seq.*).

Atomic energy defense programs means Government activities, equipment, and facilities that are capable of:

(1) Developing, producing, testing, sampling, maintaining, repairing, modifying, assembling or disassembling, using, transporting, or retiring nuclear weapons or components of nuclear weapons; or

(2) Producing, using, or transporting nuclear material that could be used in nuclear weapons or military-related utilization facilities.

Authorized Individual means a person who has routine access to UCNI under § 1017.20.

Component means any operational, experimental, or research-related part, subsection, design, or material used in the manufacture or utilization of a nuclear weapon, nuclear explosive device, or nuclear weapon test assembly.

§ 1017.4

10 CFR Ch. X (1–1–16 Edition)

Denying Official means a DOE official designated under 10 CFR 1004.2(b) who is authorized to deny a request for unclassified information that is exempt from release when requested under the Freedom of Information Act (FOIA).

Director means the DOE Official, or his or her designee, to whom the Secretary has assigned responsibility for enforcement of this part.

Document means the physical medium on or in which information is recorded, regardless of its physical form or characteristics.

DOE means the United States Department of Energy, including the National Nuclear Security Administration (NNSA).

Essential technology-related information means technical information whose unauthorized dissemination could significantly increase the likelihood of the illegal production of a nuclear weapon.

Exploitable security-related information means information whose unauthorized dissemination could significantly increase the likelihood of the theft, diversion, or sabotage of nuclear material, equipment, or facilities.

Government means the Executive Branch of the United States Government.

Government information means any fact or concept, regardless of its physical form or characteristics, that is owned by, produced by or for, or otherwise controlled by the United States Government, including such facts or concepts that are provided by the Government to any person, including persons who are not employees of the Government.

Guidance means detailed written instructions that describe decisions made by the Secretary or his/her designee issued under Subpart B of these regulations concerning what specific information is UCNI.

Illegal production means the production or manufacture of a nuclear weapon in violation of either domestic (e.g., the Atomic Energy Act) or international (e.g., the Treaty on the Non-Proliferation of Nuclear Weapons) law.

In transit means the physical movement of a nuclear weapon, a component of a nuclear weapon containing nuclear material, or nuclear material from one

part to another part of a facility or from one facility to another facility. An item is considered “in transit” until it has been relinquished to the custody of the authorized recipient and is in storage at its ultimate destination. An item in temporary storage pending shipment to its ultimate destination is “in transit.”

Limited access means access to specific UCNI granted by the cognizant DOE Program Secretarial Officer or a Deputy or Associate Administrator of the NNSA to an individual not eligible for routine access (see §1017.21).

Material means a product (e.g., a part or a machine) or substance (e.g., a compound or an alloy), regardless of its physical form or characteristics.

Need to know means a determination made by an Authorized Individual that a person requires access to specific UCNI to perform official duties or other Government-authorized activities.

Nuclear material means special nuclear material, byproduct material, or source material as defined by sections 11.aa., 11.e., and 11.z., respectively, of the Atomic Energy Act (42 U.S.C. 2014 aa., e., and z), or any other material used in the production, testing, utilization, or assembly of nuclear weapons or components of nuclear weapons that the Secretary determines to be nuclear material under §1017.9(a).

Nuclear weapon means atomic weapon as defined in section 11.d. of the Atomic Energy Act (42 U.S.C. 2014 d).

Person means any person as defined in section 11.s. of the Atomic Energy Act (42 U.S.C. 2014 s) or any affiliate or parent corporation thereof.

Production facility means:

(1) Any equipment or device capable of producing special nuclear material in such quantity as to be of significance to the common defense and security or in such manner as to affect the health and safety of the public; or

(2) Any important component part especially designed for such equipment or device.

(3) For the purposes of this part, equipment and devices described in paragraphs (1) and (2) of this definition include only:

(i) Government uranium isotope enrichment equipment or devices and any

Department of Energy

§ 1017.5

other uranium isotope enrichment equipment or devices that use related technology provided by the Government; or

(ii) Government plutonium production reactors, isotope enrichment equipment or devices, and separation and purification equipment or devices and other such equipment or devices that use related technology provided by the Government.

Reviewing Official means an individual authorized under §1017.14(a) to make a determination, based on guidance, that a document or material contains UCNI.

Routine access means access to UCNI granted by an Authorized Individual to an individual eligible to receive UCNI under §1017.20 in order to perform official duties or other Government-authorized activities.

Secretary means the Secretary of Energy.

Special nuclear material means:

(1) Plutonium, uranium enriched in the isotope 233 or in the isotope 235, and any other material which DOE or the Nuclear Regulatory Commission, pursuant to the provisions of section 51 of the Atomic Energy Act (42 U.S.C. 2071), determines to be special nuclear material, but does not include source material; or

(2) Any material artificially enriched by any of the foregoing, but does not include source material.

Unauthorized dissemination means the intentional or negligent transfer of UCNI to any person other than an Authorized Individual or a person granted limited access to UCNI under §1017.21.

Unclassified Controlled Nuclear Information or UCNI means certain unclassified Government information concerning nuclear facilities, materials, weapons, and components whose dissemination is controlled under section 148 of the Atomic Energy Act and this part.

Utilization facility means:

(1) Any equipment or device, or any important component part especially designed for such equipment or device, except for a nuclear weapon, that is capable of making use of special nuclear material in such quantity as to be of significance to the common defense and security or in such manner as to

affect the health and safety of the public. For the purposes of this part, such equipment or devices include only Government equipment or devices that use special nuclear material in the research, development, production, or testing of nuclear weapons, nuclear weapon components, or nuclear material capable of being used in nuclear weapons; or

(2) Any equipment or device, or any important component part especially designed for such equipment or device, except for a nuclear weapon, that is peculiarly adapted for making use of nuclear energy in such quantity as to be of significance to the common defense and security or in such manner as to affect the health and safety of the public. For the purposes of this part, such equipment or devices include only:

(i) Naval propulsion reactors;

(ii) Military reactors and power sources that use special nuclear material;

(iii) Tritium production reactors; and,

(iv) Government research reactors.

§ 1017.5 Requesting a deviation.

(a) Any person may request a deviation, or condition that diverges from the norm and that is categorized as:

(1) A variance (i.e., an approved condition that technically varies from a requirement in these regulations);

(2) A waiver (i.e., an approved non-standard condition that deviates from a requirement in these regulations and which, if uncompensated, would create a potential or real vulnerability); or

(3) An exception (i.e., an approved deviation from a requirement in these regulations for which DOE accepts the risk of a safeguards and security vulnerability) according to the degree of risk involved.

(b) In writing, the person must:

(1) Identify the specific requirement for which the deviation is being requested;

(2) Explain why the deviation is needed; and,

(3) If appropriate, describe the alternate or equivalent means for meeting the requirement.

(c) DOE employees must submit such requests according to internal directives. DOE contractors must submit

§ 1017.6

such requests according to directives incorporated into their contracts. Other individuals must submit such requests to the Office of Classification, Office of Health, Safety and Security, U.S. Department of Energy, 1000 Independence Ave., SW., Washington, DC 20585-1290. The Office of Classification's decision must be made within 30 days.

Subpart B—Initially Determining What Information Is Unclassified Controlled Nuclear Information

§ 1017.6 Authority.

The Secretary, or his or her designee, determines whether information is UCNI. These determinations are incorporated into guidance that each Reviewing Official and Denying Official consults in his or her review of a document or material to decide whether the document or material contains UCNI.

§ 1017.7 Criteria.

To be identified as UCNI, the information must meet each of the following criteria:

- (a) The information must be Government information as defined in § 1017.4;
- (b) The information must concern atomic energy defense programs as defined in § 1017.4;
- (c) The information must fall within the scope of at least one of the three subject areas eligible to be UCNI in § 1017.8;
- (d) The information must meet the adverse effect test described in § 1017.10; and
- (e) The information must not be exempt from being UCNI under § 1017.11.

§ 1017.8 Subject areas eligible to be Unclassified Controlled Nuclear Information.

To be eligible for identification as UCNI, information must concern at least one of the following categories:

- (a) The design of production or utilization facilities as defined in this part;
- (b) Security measures (including security plans, procedures, and equipment) for the physical protection of production or utilization facilities or nuclear material, regardless of its physical state or form, contained in these facilities or in transit; or

10 CFR Ch. X (1-1-16 Edition)

(c) The design, manufacture, or utilization of nuclear weapons or components that were once classified as Restricted Data, as defined in section 11y. of the Atomic Energy Act.

§ 1017.9 Nuclear material determinations.

(a) The Secretary may determine that a material other than special nuclear material, byproduct material, or source material as defined by the Atomic Energy Act is included within the scope of the term "nuclear material" if it meets the following criteria:

- (1) The material is used in the production, testing, utilization, or assembly of nuclear weapons or components of nuclear weapons; and
- (2) Unauthorized acquisition of the material could reasonably be expected to result in a significant adverse effect on the health and safety of the public or the common defense and security because the specific material:

- (i) Could be used as a hazardous radioactive environmental contaminant; or
- (ii) Could be of significant assistance in the illegal production of a nuclear weapon.

(b) Designation of a material as a nuclear material under paragraph (a) of this section does not make all information about the material UCNI. Specific information about the material must still meet each of the criteria in § 1017.7 prior to its being identified and controlled as UCNI.

§ 1017.10 Adverse effect test.

In order for information to be identified as UCNI, it must be determined that the unauthorized dissemination of the information under review could reasonably be expected to result in a significant adverse effect on the health and safety of the public or the common defense and security by significantly increasing the likelihood of:

- (a) Illegal production of a nuclear weapon; or
- (b) Theft, diversion, or sabotage of nuclear material, equipment, or facilities.

Department of Energy

§ 1017.14

§ 1017.11 Information exempt from being Unclassified Controlled Nuclear Information.

Information exempt from this part includes:

(a) Information protected from disclosure under section 147 of the Atomic Energy Act (42 U.S.C. 2167) that is identified as Safeguards Information and controlled by the United States Nuclear Regulatory Commission;

(b) Basic scientific information (i.e., information resulting from research directed toward increasing fundamental scientific knowledge or understanding rather than any practical application of that knowledge);

(c) Radiation exposure data and all other personal health information; and,

(d) Information concerning the transportation of low level radioactive waste.

§ 1017.12 Prohibitions on identifying Unclassified Controlled Nuclear Information.

Information, documents, and material must not be identified as being or containing UCNI in order to:

(a) Conceal violations of law, inefficiency, or administrative error;

(b) Prevent embarrassment to a person or organization;

(c) Restrain competition; or,

(d) Prevent or delay the release of any information that does not properly qualify as UCNI.

§ 1017.13 Report concerning determinations.

The Office of Classification or successor office shall issue a report by the end of each quarter that identifies any new information that has been determined for the first time to be UCNI during the previous quarter, explains how each such determination meets the criteria in § 1017.7, and explains why each such determination protects from disclosure only the minimum amount of information necessary to protect the health and safety of the public or the common defense and security. A copy of the report may be obtained by writing to the Office of Classification, Office of Health, Safety and Security, U.S. Department of Energy, 1000 Independence Ave., SW., Washington, DC 20585-1290.

Subpart C—Review of a Document or Material for Unclassified Controlled Nuclear Information

§ 1017.14 Designated officials.

(a) *Reviewing Official*—(1) *Authority*. A Reviewing Official with cognizance over the information contained in a document or material is authorized to determine whether the document or material contains UCNI based on applicable guidance. A Reviewing Official marks or authorizes the marking of the document or material as specified in § 1017.16.

(2) *Request for designation*. Procedures for requesting that a DOE Federal or contractor employee be designated as a Reviewing Official are contained in Departmental directives issued by the Secretary. DOE may also designate other Government agency employees, contractors, or other individuals granted routine access under § 1017.20 as Reviewing Officials.

(3) *Designation*. Prior to being designated as a Reviewing Official, each employee must receive training approved by DOE that covers the requirements in these regulations and be tested on his or her proficiency in using applicable UCNI guidance. Upon successful completion of the training and test, he or she is designated as a Reviewing Official only while serving in his or her current position for a maximum of 3 years. The employee does not automatically retain the authority when he or she leaves his or her current position. The employee cannot delegate this authority to anyone else, and the authority may not be assumed by another employee acting in the employee's position. At the end of 3 years, if the position still requires the authority, the employee must be retested and redesignated by DOE as a Reviewing Official.

(b) *Individuals approved to use DOE or joint DOE classification guidance*—(1) *Authority*. Other Government agency employees who are approved by DOE or another Government agency to use classification guidance developed by DOE or jointly by DOE and another Government agency may also be approved to review documents for UCNI and to make UCNI determinations.

§ 1017.15

10 CFR Ch. X (1–1–16 Edition)

This authority is limited to the UCNI subject areas contained in the specific classification guidance that the individual has been approved to use.

(2) *Designation.* Individuals must be designated this authority in writing by the appropriate DOE or other Government agency official with cognizance over the specific DOE or joint DOE classification guidance.

(c) *Denying Official—(1) Authority.* A DOE Denying Official for unclassified information with cognizance over the information contained in a document is authorized to deny a request made under statute (e.g., the FOIA, the Privacy Act) or the mandatory review provisions of Executive Order 12958, as amended, “Classified National Security Information,” and its successor orders, for all or any portion of the document that contains UCNI. The Denying Official bases his or her denial on applicable guidance, ensuring that the Reviewing Official who determined that the document contains UCNI correctly interpreted and applied the guidance.

(2) *Designation.* Information on the designation of DOE Denying Officials is contained in 10 CFR Part 1004, *Freedom of Information* (see definition of the term “Authorizing or Denying Official” in § 1004.2).

§ 1017.15 Review process.

(a) *Reviewing documents for UCNI.* Anyone who originates or possesses a document that he or she thinks may contain UCNI must send the document to a Reviewing Official for a determination before it is finalized, sent outside of his or her organization, or filed. If the originator or possessor must send the document outside of his or her organization for the review, he or she must mark the front of the document with “Protect as UCNI Pending Review” and must transmit the document in accordance with the requirements in § 1017.27. The Reviewing Official must first determine whether the document is widely disseminated in the public domain, which means that the document under review is publicly available from a Government technical information service or depository library, for example, or that it can be found in a public library or an open literature source, or it can be accessed on

the Internet using readily available search methods.

(1) If the document is determined to be widely disseminated in the public domain, it cannot be controlled as UCNI. The Reviewing Official returns the document to the person who sent it to the Reviewing Official and informs him or her why the document cannot be controlled as UCNI. This does not preclude control of the same information as UCNI if it is contained in another document that is not widely disseminated.

(2) If the document is not determined to be widely disseminated in the public domain, the Reviewing Official evaluates the information in the document using guidance to determine whether the document contains UCNI. If the Reviewing Official determines that the document does contain UCNI, the Reviewing Official marks or authorizes the marking of the document as specified in § 1017.16. If the Reviewing Official determines that the document does not contain UCNI, the Reviewing Official returns the document to the person who sent it and informs him or her that the document does not contain UCNI. For documentation purposes, the Reviewing Official may mark or authorize the marking of the document as specified in § 1017.17(b).

(3) If no applicable guidance exists, but the Reviewing Official thinks the information should be identified as UCNI, then the Reviewing Official must send the document to the appropriate official identified in applicable DOE directives issued by the Secretary or his or her designee. The Reviewing Official should also include a written recommendation as to why the information should be identified as UCNI.

(b) *Review exemption for documents in files.* Any document that was permanently filed prior to May 22, 1985, is not required to be reviewed for UCNI while in the files or when retrieved from the files for reference, inventory, or similar purposes as long as the document will be returned to the files and is not accessible by individuals who are not Authorized Individuals for the UCNI contained in the document. However, when a document that is likely to contain UCNI is removed from the files for dissemination within or outside of the

Department of Energy

§ 1017.17

immediate organization, it must be reviewed by a Reviewing Official with cognizance over the information.

(c) *Reviewing material for UCNI.* Anyone who produces or possesses material that he or she thinks may contain or reveal UCNI must consult with a Reviewing Official for a determination. If the Reviewing Official determines that the material does contain or reveal UCNI, the Reviewing Official marks or authorizes the marking of the material as specified in §1017.16(b).

§1017.16 **Unclassified Controlled Nuclear Information markings on documents or material.**

(a) *Marking documents.* If a Reviewing Official determines that a document contains UCNI, the Reviewing Official must mark or authorize the marking of the document as described in this section.

(1) *Front marking.* The following marking must appear on the front of the document:

Unclassified Controlled Nuclear Information Not for Public Dissemination

Unauthorized dissemination subject to civil and criminal sanctions under section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Reviewing Official:

(Name/Organization)
Date:
Guidance Used:

(2) *Page marking.* The marking "Unclassified Controlled Nuclear Information" must be placed on the bottom of the front of the document and on the bottom of each interior page of the document that contains text or if more convenient, on the bottom of only those interior pages that contain UCNI. The page marking must also be placed on the back of the last page. If space limitations do not allow for use of the full page marking, the acronym "UCNI" may be used as the page marking.

(3) *Classified documents.* UCNI front and page markings are not applied to a classified document that also contains UCNI. If a classified document is portion marked, the acronym "UCNI" is used to indicate those unclassified portions that contain UCNI.

(4) Obsolete "May Contain UCNI" marking. The "May Contain UCNI" marking is no longer used. Any document marked with the "May Contain UCNI" marking is considered to contain UCNI and must be protected accordingly until a Reviewing Official or Denying Official determines otherwise. The obsolete "May Contain UCNI" marking reads as follows:

Not for Public Dissemination May contain Unclassified Controlled Nuclear Information subject to section 148 of the Atomic Energy Act of 1954 (42 U.S.C. 2168). Approval by the Department of Energy prior to release is required.

(b) *Marking material.* If possible, material containing or revealing UCNI must be marked as described in §1017.16(a)(1). If space limitations do not allow for use of the full marking in §1017.16(a)(1), the acronym "UCNI" may be used.

§ 1017.17 **Determining that a document or material no longer contains or does not contain Unclassified Controlled Nuclear Information.**

(a) *Document or material no longer contains UCNI.* A Reviewing Official with cognizance over the information in a document or material marked as containing UCNI may determine that the document or material no longer contains UCNI. A Denying Official may also determine that such a document or material no longer contains UCNI. The official making this determination must base it on applicable guidance and must ensure that any UCNI markings are crossed out (for documents) or removed (for material). The official marks or authorizes the marking of the document (or the material, if space allows) as follows:

Does Not Contain Unclassified Controlled Nuclear Information

Reviewing/Denying Official:

(Name and organization)
Date:

(b) *Document or material does not contain UCNI.* A Reviewing Official with cognizance over the information in a document or material may confirm that an unmarked document or material does not contain UCNI based on applicable guidance. No UCNI markings

§ 1017.18

are required in this case; however, for documentation purposes, the Reviewing Official may mark or may authorize the marking of the document or material with the same marking used in §1017.17(a).

§ 1017.18 Joint documents or material.

If a document or material marked as containing UCNI is under consideration for decontrol and falls under the cognizance of another DOE organization or other Government agency, the Reviewing Official or Denying Official must coordinate the decontrol review with that DOE organization or other Government agency. Any disagreement concerning the control or decontrol of any document or material that contains UCNI that was originated by or for DOE or another Government agency is resolved by the Secretary or his or her designee.

Subpart D—Access to Unclassified Controlled Nuclear Information

§ 1017.19 Access limitations.

A person may only have access to UCNI if he or she has been granted routine access by an Authorized Individual (see §1017.20) or limited access by the DOE Program Secretarial Officer or NNSA Deputy or Associate Administrator with cognizance over the UCNI (see §1017.21). The Secretary, or his or her designee, may impose additional administrative controls concerning the granting of routine or limited access to UCNI to a person who is not a U.S. citizen.

§ 1017.20 Routine access.

(a) *Authorized Individual.* The Reviewing Official who determines that a document or material contains UCNI is the initial Authorized Individual for that document or material. An Authorized Individual, for UCNI in his or her possession or control, may determine that another person is an Authorized Individual who may be granted access to the UCNI, subject to limitations in paragraph (b) of this section, and who may further disseminate the UCNI under the provisions of this section.

(b) *Requirements for routine access.* To be eligible for routine access to UCNI, the person must have a need to know

10 CFR Ch. X (1–1–16 Edition)

the UCNI in order to perform official duties or other Government-authorized activities and must be:

- (1) A U.S. citizen who is:
 - (i) An employee of any branch of the Federal Government, including the U.S. Armed Forces;
 - (ii) An employee or representative of a State, local, or Indian tribal government;
 - (iii) A member of an emergency response organization;
 - (iv) An employee of a Government contractor or a consultant, including those contractors or consultants who need access to bid on a Government contract;
 - (v) A member of Congress or a staff member of a congressional committee or of an individual member of Congress;
 - (vi) A Governor of a State, his or her designated representative, or a State government official;
 - (vii) A member of a DOE advisory committee; or,
 - (viii) A member of an entity that has entered into a formal agreement with the Government, such as a Cooperative Research and Development Agreement or similar arrangement; or,
- (2) A person who is not a U.S. citizen but who is:
 - (i) A Federal Government employee or a member of the U.S. Armed Forces;
 - (ii) An employee of a Federal Government contractor or subcontractor;
 - (iii) A Federal Government consultant;
 - (iv) A member of a DOE advisory committee;
 - (v) A member of an entity that has entered into a formal agreement with the Government, such as a Cooperative Research and Development Agreement or similar arrangement;
 - (vi) An employee or representative of a State, local, or Indian tribal government; or,
 - (vii) A member of an emergency response organization when responding to an emergency; or,
- (3) A person who is not a U.S. citizen but who needs to know the UCNI in conjunction with an activity approved by the DOE Program Secretarial Officer or NNSA Deputy or Associate Administrator with cognizance over the UCNI.

Department of Energy

§ 1017.26

§ 1017.21 Limited access.

(a) A person who is not eligible for routine access to specific UCNI under § 1017.20 may request limited access to such UCNI by sending a written request to the DOE Program Secretarial Officer or NNSA Deputy or Associate Administrator with cognizance over the information. The written request must include the following:

(1) The name, current residence or business address, birthplace, birth date, and country of citizenship of the person submitting the request;

(2) A description of the specific UCNI for which limited access is being requested;

(3) A description of the purpose for which the UCNI is needed; and,

(4) Certification by the requester that he or she:

(i) Understands and will follow these regulations; and

(ii) Understands that he or she is subject to the civil and criminal penalties under Subpart F of this part.

(b) The decision whether to grant the request for limited access is based on the following criteria:

(1) The sensitivity of the UCNI for which limited access is being requested;

(2) The approving official's evaluation of the likelihood that the requester will disseminate the UCNI to unauthorized individuals; and,

(3) The approving official's evaluation of the likelihood that the requester will use the UCNI for illegal purposes.

(c) Within 30 days of receipt of the request for limited access, the appropriate DOE Program Secretarial Officer or NNSA Deputy or Associate Administrator must notify the requester if limited access is granted or denied, or if the determination cannot be made within 30 days, of the date when the determination will be made.

(d) A person granted limited access to specific UCNI is not an Authorized Individual and may not further disseminate the UCNI to anyone.

Subpart E—Physical Protection Requirements

§ 1017.22 Notification of protection requirements.

(a) An Authorized Individual who grants routine access to specific UCNI under § 1017.20 to a person who is not an employee or contractor of the DOE must notify the person receiving the UCNI of protection requirements described in this subpart and any limitations on further dissemination.

(b) A DOE Program Secretarial Officer or NNSA Deputy or Associate Administrator who grants limited access to specific UCNI under § 1017.21 must notify the person receiving the UCNI of protection requirements described in this subpart and any limitations on further dissemination.

§ 1017.23 Protection in use.

An Authorized Individual or a person granted limited access to UCNI under § 1017.21 must maintain physical control over any document or material marked as containing UCNI that is in use to prevent unauthorized access to it.

§ 1017.24 Storage.

A document or material marked as containing UCNI must be stored to preclude unauthorized disclosure. When not in use, documents or material containing UCNI must be stored in locked receptacles (e.g., file cabinet, desk drawer), or if in secured areas or facilities, in a manner that would prevent inadvertent access by an unauthorized individual.

§ 1017.25 Reproduction.

A document marked as containing UCNI may be reproduced without the permission of the originator to the minimum extent necessary consistent with the need to carry out official duties, provided the reproduced document is marked and protected in the same manner as the original document.

§ 1017.26 Destruction.

A document marked as containing UCNI must be destroyed, at a minimum, by using a cross-cut shredder that produces particles no larger than

§ 1017.27

1/4-inch wide and 2 inches long. Other comparable destruction methods may be used. Material containing or revealing UCNI must be destroyed according to agency directives.

§ 1017.27 Transmission.

(a) *Physically transmitting UCNI documents or material.* (1) A document or material marked as containing UCNI may be transmitted by:

(i) U.S. First Class, Express, Certified, or Registered mail;

(ii) Any means approved for transmission of classified documents or material;

(iii) An Authorized Individual or person granted limited access under § 1017.21 as long as physical control of the package is maintained; or,

(iv) Internal mail services.

(2) The document or material must be packaged to conceal the presence of the UCNI from someone who is not authorized access. A single, opaque envelope or wrapping is sufficient for this purpose. The address of the recipient and the sender must be indicated on the outside of the envelope or wrapping along with the words "TO BE OPENED BY ADDRESSEE ONLY."

(b) *Transmitting UCNI documents over telecommunications circuits.* Encryption algorithms that comply with all applicable Federal laws, regulations, and standards for the protection of unclassified controlled information must be used when transmitting UCNI over a telecommunications circuit (including the telephone, facsimile, radio, e-mail, Internet).

§ 1017.28 Processing on Automated Information Systems (AIS).

UCNI may be processed or produced on any AIS that complies with the guidance in OMB Circular No. A-130, Revised, Transmittal No. 4, Appendix III, "Security of Federal Automated Information Resources," or is certified for classified information.

Subpart F—Violations

§ 1017.29 Civil penalty.

(a) *Regulations.* Any person who violates a UCNI security requirement of any of the following is subject to a civil penalty under this part:

10 CFR Ch. X (1-1-16 Edition)

(1) 10 CFR Part 1017—Identification and Protection of Unclassified Controlled Nuclear Information; or

(2) Any other DOE regulation related to the safeguarding or security of UCNI if the regulation provides that violation of its provisions may result in a civil penalty pursuant to section 148 of the Act.

(b) *Compliance order.* If, without violating a requirement of any regulation issued under section 148, a person by an act or omission causes, or creates a risk of, the loss, compromise or unauthorized disclosure of UCNI, the Secretary may issue a compliance order to that person requiring the person to take corrective action and notifying the person that violation of the compliance order is subject to a notice of violation and assessment of a civil penalty. If a person wishes to contest the compliance order, the person must file a notice of appeal with the Secretary within 15 days of receipt of the compliance order.

(c) *Amount of penalty.* The Director may propose imposition of a civil penalty for violation of a requirement of a regulation under paragraph (a) of this section or a compliance order issued under paragraph (b) of this section, not to exceed \$160,000 for each violation.

(d) *Settlements.* The Director may enter into a settlement, with or without conditions, of an enforcement proceeding at any time if the settlement is consistent with the objectives of DOE's UCNI protection requirements.

(e) *Enforcement conference.* The Director may convene an informal conference to discuss any situation that might be a violation of the Act, its significance and cause, any correction taken or not taken by the person, any mitigating or aggravating circumstances, and any other useful information. The Director may compel a person to attend the conference. This conference will not normally be open to the public and there shall be no transcript.

(f) *Investigations.* The Director may conduct investigations and inspections relating to the scope, nature and extent of compliance by a person with DOE security requirements specified in these regulations and take such action as the Director deems necessary and

Department of Energy

§ 1017.29

appropriate to the conduct of the investigation or inspection, including signing, issuing and serving subpoenas.

(g) *Preliminary notice of violation.* (1) In order to begin a proceeding to impose a civil penalty under this part, the Director shall notify the person by a written preliminary notice of violation sent by certified mail, return receipt requested, of:

(i) The date, facts, and nature of each act or omission constituting the alleged violation;

(ii) The particular provision of the regulation or compliance order involved in each alleged violation;

(iii) The proposed remedy for each alleged violation, including the amount of any civil penalty proposed;

(iv) The right of the person to submit a written reply to the Director within 30 calendar days of receipt of such preliminary notice of violation; and,

(v) The fact that upon failure of the person to pay any civil penalty imposed, the penalty may be collected by civil action.

(2) A reply to a preliminary notice of violation must contain a statement of all relevant facts pertaining to an alleged violation. The reply must:

(i) State any facts, explanations, and arguments that support a denial of the alleged violation;

(ii) Demonstrate any extenuating circumstances or other reason why a proposed remedy should not be imposed or should be mitigated;

(iii) Discuss the relevant authorities that support the position asserted, including rulings, regulations, interpretations, and previous decisions issued by DOE;

(iv) Furnish full and complete answers to any questions set forth in the preliminary notice; and

(v) Include copies of all relevant documents.

(3) If a person fails to submit a written reply within 30 calendar days of receipt of a preliminary notice of violation:

(i) The person relinquishes any right to appeal any matter in the preliminary notice; and

(ii) The preliminary notice, including any remedies therein, constitutes a final order.

(4) The Director, at the request of a person notified of an alleged violation, may extend for a reasonable period the time for submitting a reply or a hearing request letter.

(h) *Final notice of violation.* (1) If a person submits a written reply within 30 calendar days of receipt of a preliminary notice of violation, the Director must make a final determination whether the person violated or is continuing to violate an UCNI security requirement.

(2) Based on a determination by the Director that a person has violated or is continuing to violate an UCNI security requirement, the Director may issue to the person a final notice of violation that concisely states the determined violation, the amount of any civil penalty imposed, and further actions necessary by or available to the person. The final notice of violation also must state that the person has the right to submit to the Director, within 30 calendar days of the receipt of the notice, a written request for a hearing under paragraph (i) of this section.

(3) The Director must send a final notice of violation by certified mail, return receipt requested, within 30 calendar days of the receipt of a reply.

(4) Subject to paragraphs (h)(7) and (h)(8) of this section, the effect of final notice shall be:

(i) If a final notice of violation does not contain a civil penalty, it shall be deemed a final order 15 days after the final notice is issued.

(ii) If a final notice of violation contains a civil penalty, the person must submit to the Director within 30 days after the issuance of the final notice:

(A) A waiver of further proceedings; or

(B) A request for an on-the-record hearing under paragraph (i) of this section.

(5) If a person waives further proceedings, the final notice of violation shall be deemed a final order enforceable against the person. The person must pay the civil penalty set forth in the notice of violation within 60 days of the filing of waiver unless the Director grants additional time.

(6) If a person files a request for an on-the-record hearing, then the hearing process commences.

(7) The Director may amend the final notice of violation at any time before the time periods specified in paragraphs (h)(4)(i) or (h)(4)(ii) of this section expire. An amendment shall add 15 days to the time period under paragraph (h)(4) of this section.

(8) The Director may withdraw the final notice of violation, or any part thereof, at any time before the time periods specified in paragraphs (h)(4)(i) or (h)(4)(ii) of this section expire.

(i) *Hearing.* (1) Any person who receives a final notice of violation under paragraph (h) of this section may request a hearing concerning the allegations contained in the notice. The person must mail or deliver any written request for a hearing to the Director within 30 calendar days of receipt of the final notice of violation.

(2) Upon receipt from a person of a written request for a hearing, the Director shall:

(i) Appoint a Hearing Counsel; and
 (ii) Select an administrative law judge appointed under 5 U.S.C. 3105, to serve as Hearing Officer.

(j) *Hearing Counsel.* The Hearing Counsel:

(1) Represents DOE;
 (2) Consults with the person or the person's counsel prior to the hearing;
 (3) Examines and cross-examines witnesses during the hearing; and
 (4) Enters into a settlement of the enforcement proceeding at any time if settlement is consistent with the objectives of the Act and DOE security requirements.

(k) *Hearing Officer.* The Hearing Officer:

(1) Is responsible for the administrative preparations for the hearing;
 (2) Convenes the hearing as soon as is reasonable;
 (3) Administers oaths and affirmations;
 (4) Issues subpoenas, at the request of either party or on the Hearing Officer's motion;
 (5) Rules on offers of proof and receives relevant evidence;
 (6) Takes depositions or has depositions taken when the ends of justice would be served;
 (7) Conducts the hearing in a manner which is fair and impartial;

(8) Holds conferences for the settlement or simplification of the issues by consent of the parties;

(9) Disposes of procedural requests or similar matters;

(10) Requires production of documents; and,

(11) Makes an initial decision under paragraph (n) of this section.

(l) *Rights of the person at the hearing.* The person may:

(1) Testify or present evidence through witnesses or by documents;

(2) Cross-examine witnesses and rebut records or other physical evidence, except as provided in paragraph (m)(4) of this section;

(3) Be present during the entire hearing, except as provided in paragraph (m)(4) of this section; and

(4) Be accompanied, represented, and advised by counsel of the person's choosing.

(m) *Conduct of the hearing.* (1) DOE shall make a transcript of the hearing.

(2) Except as provided in paragraph (m)(4) of this section, the Hearing Officer may receive any oral or documentary evidence, but shall exclude irrelevant, immaterial, or unduly repetitious evidence.

(3) Witnesses shall testify under oath and are subject to cross-examination, except as provided in paragraph (m)(4) of this section.

(4) The Hearing Officer must use procedures appropriate to safeguard and prevent unauthorized disclosure of classified information, UCNI, or any other information protected from public disclosure by law or regulation, with minimum impairment of rights and obligations under this part. The UCNI status shall not, however, preclude information from being introduced into evidence. The Hearing Officer may issue such orders as may be necessary to consider such evidence *in camera* including the preparation of a supplemental initial decision to address issues of law or fact that arise out of that portion of the evidence that is protected.

(5) DOE has the burden of going forward with and of proving by a preponderance of the evidence that the violation occurred as set forth in the final notice of violation and that the proposed civil penalty is appropriate. The

person to whom the final notice of violation has been addressed shall have the burden of presenting and of going forward with any defense to the allegations set forth in the final notice of violation. Each matter of controversy shall be determined by the Hearing Officer upon a preponderance of the evidence.

(n) *Initial decision.* (1) The Hearing Officer shall issue an initial decision as soon as practicable after the hearing. The initial decision shall contain findings of fact and conclusions regarding all material issues of law, as well as reasons therefor. If the Hearing Officer determines that a violation has occurred and that a civil penalty is appropriate, the initial decision shall set forth the amount of the civil penalty based on:

- (i) The nature, circumstances, extent, and gravity of the violation or violations;
- (ii) The violator's ability to pay;
- (iii) The effect of the civil penalty on the person's ability to do business;
- (iv) Any history of prior violations;
- (v) The degree of culpability; and,
- (vi) Such other matters as justice may require.

(2) The Hearing Officer shall serve all parties with the initial decision by certified mail, return receipt requested. The initial decision shall include notice that it constitutes a final order of DOE 30 days after the filing of the initial decision unless the Secretary files a Notice of Review. If the Secretary files a Notice of Review, he shall file a final order as soon as practicable after completing his review. The Secretary, at his discretion, may order additional proceedings, remand the matter, or modify the amount of the civil penalty assessed in the initial decision. DOE shall notify the person of the Secretary's action under this paragraph in writing by certified mail, return receipt requested. The person against whom the civil penalty is assessed by the final order shall pay the full amount of the civil penalty assessed in the final order within 30 days unless otherwise agreed by the Director.

(o) *Collection of penalty.* (1) The Secretary may request the Attorney General to institute a civil action to col-

lect a penalty imposed under this section.

(2) The Attorney General has the exclusive power to uphold, compromise or mitigate, or remit any civil penalty imposed by the Secretary under this section and referred to the Attorney General for collection.

(p) *Direction to NNSA.* (1) Notwithstanding any other provision of this part, the NNSA Administrator, rather than the Director, signs, issues, serves, or takes the following actions that direct NNSA employees, contractors, subcontractors, or employees of such NNSA contractors or subcontractors:

- (i) Subpoenas;
- (ii) Orders to compel attendance;
- (iii) Disclosures of information or documents obtained during an investigation or inspection;
- (iv) Preliminary notices of violation; and,
- (v) Final notice of violations.

(2) The Administrator shall act after consideration of the Director's recommendation. If the Administrator disagrees with the Director's recommendation, and the disagreement cannot be resolved by the two officials, the Director may refer the matter to the Deputy Secretary for resolution.

[73 FR 32641, June 10, 2008, as amended at 74 FR 66033, Dec. 14, 2009; 79 FR 20, Jan. 2, 2014]

§ 1017.30 Criminal penalty.

Any person who violates section 148 of the Atomic Energy Act or any regulation or order of the Secretary issued under section 148 of the Atomic Energy Act, including these regulations, may be subject to a criminal penalty under section 223 of the Atomic Energy Act (42 U.S.C. 2273). In such case, the Secretary shall refer the matter to the Attorney General for investigation and possible prosecution.

PART 1021—NATIONAL ENVIRONMENTAL POLICY ACT IMPLEMENTING PROCEDURES

Subpart A—General

Sec.	
1021.100	Purpose.
1021.101	Policy.
1021.102	Applicability.
1021.103	Adoption of CEQ NEPA regulations.

§ 1021.100

- 1021.104 Definitions.
- 1021.105 Oversight of Agency NEPA activities.

Subpart B—DOE Decisionmaking

- 1021.200 DOE planning.
- 1021.210 DOE decisionmaking.
- 1021.211 Interim actions: Limitations on actions during the NEPA process.
- 1021.212 Research, development, demonstration, and testing.
- 1021.213 Rulemaking.
- 1021.214 Adjudicatory proceedings.
- 1021.215 Applicant process.
- 1021.216 Procurement, financial assistance, and joint ventures.

Subpart C—Implementing Procedures

- 1021.300 General requirements.
- 1021.301 Agency review and public participation.
- 1021.310 Environmental impact statements.
- 1021.311 Notice of intent and scoping.
- 1021.312 [Reserved]
- 1021.313 Public review of environmental impact statements.
- 1021.314 Supplemental environmental impact statements.
- 1021.315 Records of decision.
- 1021.320 Environmental assessments.
- 1021.321 Requirements for environmental assessments.
- 1021.322 Findings of no significant impact.
- 1021.330 Programmatic (including site-wide) NEPA documents.
- 1021.331 Mitigation action plans.
- 1021.340 Classified, confidential, and otherwise exempt information.
- 1021.341 Coordination with other environmental review requirements.
- 1021.342 Interagency cooperation.
- 1021.343 Variances.

Subpart D—Typical Classes of Actions

- 1021.400 Level of NEPA review.
- 1021.410 Application of categorical exclusions (classes of actions that normally do not require EAs or EISs).
- APPENDIX A TO SUBPART D OF PART 1021—CATEGORICAL EXCLUSIONS APPLICABLE TO GENERAL AGENCY ACTIONS
- APPENDIX B TO SUBPART D OF PART 1021—CATEGORICAL EXCLUSIONS APPLICABLE TO SPECIFIC AGENCY ACTIONS
- APPENDIX C TO SUBPART D OF PART 1021—CLASSES OF ACTIONS THAT NORMALLY REQUIRE EAS BUT NOT NECESSARILY EISS
- APPENDIX D TO SUBPART D OF PART 1021—CLASSES OF ACTIONS THAT NORMALLY REQUIRE EISS

10 CFR Ch. X (1–1–16 Edition)

Subpart A—General

§ 1021.100 Purpose.

The purpose of this part is to establish procedures that the Department of Energy (DOE) shall use to comply with section 102(2) of the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4332(2)) and the Council on Environmental Quality (CEQ) regulations for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508). This part supplements, and is to be used in conjunction with, the CEQ Regulations.

§ 1021.101 Policy.

It is DOE's policy to follow the letter and spirit of NEPA; comply fully with the CEQ Regulations; and apply the NEPA review process early in the planning stages for DOE proposals.

§ 1021.102 Applicability.

(a) This part applies to all organizational elements of DOE except the Federal Energy Regulatory Commission.

(b) This part applies to any DOE action affecting the quality of the environment of the United States, its territories or possessions. DOE actions having environmental effects outside the United States, its territories or possessions are subject to the provisions of Executive Order 12114, "Environmental Effects Abroad of Major Federal Actions" (3 CFR, 1979 Comp., p. 356; 44 FR 1957, January 4, 1979), DOE guidelines implementing that Executive Order (46 FR 1007, January 5, 1981), and the Department of State's "Unified Procedures Applicable to Major Federal Actions Relating to Nuclear Activities Subject to Executive Order 12114" (44 FR 65560, November 13, 1979).

§ 1021.103 Adoption of CEQ NEPA regulations.

DOE adopts the regulations for implementing NEPA published by CEQ at 40 CFR parts 1500 through 1508.

§ 1021.104 Definitions.

(a) The definitions set forth in 40 CFR part 1508 are referenced and used in this part.

(b) In addition to the terms defined in 40 CFR part 1508, the following definitions apply to this part:

Action means a project, program, plan, or policy, as discussed at 40 CFR 1508.18, that is subject to DOE's control and responsibility. Not included within this definition are purely ministerial actions with regard to which DOE has no discretion. For example, ministerial actions to implement congressionally mandated funding for actions not proposed by DOE and as to which DOE has no discretion (i.e., statutorily mandated, congressionally initiated "passthroughs").

Advance NOI means a formal public notice of DOE's intent to prepare an EIS, which is published in advance of an NOI in order to facilitate public involvement in the NEPA process.

American Indian tribe means any Indian tribe, band, nation, pueblo, or other organized group or community, including any Alaska native entity, which is recognized as eligible for the special programs or services provided by the United States because of their status as Indians.

Categorical exclusion means a category of actions, as defined at 40 CFR 1508.4 and listed in appendix A or B to subpart D of this part, for which neither an EA nor an EIS is normally required.

CEQ means the Council on Environmental Quality as defined at 40 CFR 1508.6.

CEQ Regulations means the regulations issued by CEQ (40 CFR parts 1500-1508) to implement the procedural provisions of NEPA.

CERCLA-excluded petroleum and natural gas products means petroleum, including crude oil or any fraction thereof, that is not otherwise specifically listed or designated as a hazardous substance under section 101(14) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C. 9601.101(14)) and natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel or of pipeline quality (or mixtures of natural gas and such synthetic gas).

Contaminant means a substance identified within the definition of contaminant in section 101(33) of CERCLA (42 U.S.C. 9601.101(33)).

Day means a calendar day.

DOE means the U.S. Department of Energy.

DOE proposal (or *proposal*) means a proposal, as discussed at 40 CFR 1508.23 (whether initiated by DOE, another Federal agency, or an applicant), for an action, if the proposal requires a DOE decision.

EA means an environmental assessment as defined at 40 CFR 1508.9.

EIS means an environmental impact statement as defined at 40 CFR 1508.11, or, unless this part specifically provides otherwise, a Supplemental EIS.

EPA means the U.S. Environmental Protection Agency.

FONSI means a Finding of No Significant Impact as defined at 40 CFR 1508.13.

Hazardous substance means a substance identified within the definition of hazardous substances in section 101(14) of CERCLA (42 U.S.C. 9601.101(14)). Radionuclides are hazardous substances through their listing under section 112 of the Clean Air Act (42 U.S.C. 7412) (40 CFR part 61, subpart H).

Host state means a state within whose boundaries DOE proposes an action at an existing facility or construction or operation of a new facility.

Host tribe means an American Indian tribe within whose tribal lands DOE proposes an action at an existing facility or construction or operation of a new facility. For purposes of this definition, *tribal lands* means the area of "Indian country," as defined in 18 U.S.C. 1151, that is under the tribe's jurisdiction. That section defines Indian country as:

(i) All land within the limits of any Indian reservation under the jurisdiction of the United States government, notwithstanding the issuance of any patent, and including rights-of-way running through the reservation;

(ii) All dependent Indian communities within the borders of the United States whether within the original or subsequently acquired territory thereof, and whether within or without the limits of a state; and

(iii) All Indian allotments, the Indian titles to which have not been extinguished, including rights-of-way running through the same.

Interim action means an action concerning a proposal that is the subject of an ongoing EIS and that DOE proposes to take before the ROD is issued, and that is permissible under 40 CFR 1506.1: Limitations on actions during the NEPA process.

Mitigation Action Plan means a document that describes the plan for implementing commitments made in a DOE EIS and its associated ROD, or, when appropriate, an EA or FONSI, to mitigate adverse environmental impacts associated with an action.

NEPA means the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*).

NEPA document means a DOE NOI, EIS, ROD, EA, FONSI, or any other document prepared pursuant to a requirement of NEPA or the CEQ Regulations.

NEPA review means the process used to comply with section 102(2) of NEPA.

NOI means a Notice of Intent to prepare an EIS as defined at 40 CFR 1508.22.

Notice of Availability means a formal notice, published in the FEDERAL REGISTER, that announces the issuance and public availability of a draft or final EIS. The EPA Notice of Availability is the official public notification of an EIS; a DOE Notice of Availability is an optional notice used to provide information to the public.

Pollutant means a substance identified within the definition of pollutant in section 101(33) of CERCLA (42 U.S.C. 9601.101(33)).

Program means a sequence of connected or related DOE actions or projects as discussed at 40 CFR 1508.18(b)(3) and 1508.25(a).

Programmatic NEPA document means a broad-scope EIS or EA that identifies and assesses the environmental impacts of a DOE program; it may also refer to an associated NEPA document, such as an NOI, ROD, or FONSI.

Project means a specific DOE undertaking including actions approved by permit or other regulatory decision as well as Federal and federally assisted activities, which may include design, construction, and operation of an individual facility; research, development, demonstration, and testing for a process or product; funding for a facility,

process, or product; or similar activities, as discussed at 40 CFR 1508.18(b)(4).

ROD means a Record of Decision as described at 40 CFR 1505.2.

Scoping means the process described at 40 CFR 1501.7; “public scoping process” refers to that portion of the scoping process where the public is invited to participate, as described at 40 CFR 1501.7 (a)(1) and (b)(4).

Site-wide NEPA document means a broad-scope EIS or EA that is programmatic in nature and identifies and assesses the individual and cumulative impacts of ongoing and reasonably foreseeable future actions at a DOE site; it may also refer to an associated NEPA document, such as an NOI, ROD, or FONSI.

Supplement Analysis means a DOE document used to determine whether a supplemental EIS should be prepared pursuant to 40 CFR 1502.9(c), or to support a decision to prepare a new EIS.

Supplemental EIS means an EIS prepared to supplement a prior EIS as provided at 40 CFR 1502.9(c).

The Secretary means the Secretary of Energy.

[57 FR 15144, Apr. 24, 1992, as amended at 61 FR 36239, July 9, 1996]

§ 1021.105 Oversight of Agency NEPA activities.

The General Counsel, or his/her designee, is responsible for overall review of DOE NEPA compliance. Further information on DOE’s NEPA process and the status of individual NEPA reviews may be obtained upon request from the Office of NEPA Policy and Compliance, GC–20, Office of the General Counsel, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585–0103.

[71 FR 68736, Nov. 28, 2006]

Subpart B—DOE Decisionmaking

§ 1021.200 DOE planning.

(a) DOE shall provide for adequate and timely NEPA review of DOE proposals, including those for programs, policies, projects, regulations, orders, or legislation, in accordance with 40

Department of Energy

§ 1021.213

CFR 1501.2 and this section. In its planning for each proposal, DOE shall include adequate time and funding for proper NEPA review and for preparation of anticipated NEPA documents.

(b) DOE shall begin its NEPA review as soon as possible after the time that DOE proposes an action or is presented with a proposal.

(c) DOE shall determine the level of NEPA review required for a proposal in accordance with §1021.300 and subpart D of this part.

(d) During the development and consideration of a DOE proposal, DOE shall review any relevant planning and decisionmaking documents, whether prepared by DOE or another agency, to determine if the proposal or any of its alternatives are considered in a prior NEPA document. If so, DOE shall consider adopting the existing document, or any pertinent part thereof, in accordance with 40 CFR 1506.3.

§ 1021.210 DOE decisionmaking.

(a) For each DOE proposal, DOE shall coordinate its NEPA review with its decisionmaking. Sections 1021.211 through 1021.214 of this part specify how DOE will coordinate its NEPA review with decision points for certain types of proposals (40 CFR 1505.1(b)).

(b) DOE shall complete its NEPA review for each DOE proposal before making a decision on the proposal (e.g., normally in advance of, and for use in reaching, a decision to proceed with detailed design), except as provided in 40 CFR 1506.1 and §§1021.211 and 1021.216 of this part.

(c) During the decisionmaking process for each DOE proposal, DOE shall consider the relevant NEPA documents, public and agency comments (if any) on those documents, and DOE responses to those comments, as part of its consideration of the proposal (40 CFR 1505.1(d)) and shall include such documents, comments, and responses as part of the administrative record (40 CFR 1505.1(c)).

(d) If an EIS or EA is prepared for a DOE proposal, DOE shall consider the alternatives analyzed in that EIS or EA before rendering a decision on that proposal; the decision on the proposal shall be within the range of alter-

natives analyzed in the EA or EIS (40 CFR 1505.1(e)).

(e) When DOE uses a broad decision (such as one on a policy or program) as a basis for a subsequent narrower decision (such as one on a project or other site-specific proposal), DOE may use tiering (40 CFR 1502.20) and incorporation of material by reference (40 CFR 1502.21) in the NEPA review for the subsequent narrower proposal.

§ 1021.211 Interim actions: Limitations on actions during the NEPA process.

While DOE is preparing an EIS that is required under §1021.300(a) of this part, DOE shall take no action concerning the proposal that is the subject of the EIS before issuing an ROD, except as provided at 40 CFR 1506.1. Actions that are covered by, or are a part of, a DOE proposal for which an EIS is being prepared shall not be categorically excluded under subpart D of these regulations unless they qualify as interim actions under 40 CFR 1506.1.

§ 1021.212 Research, development, demonstration, and testing.

(a) This section applies to the adoption and application of programs that involve research, development, demonstration, and testing for new technologies (40 CFR 1502.4(c)(3)). Adoption of such programs might also lead to commercialization or other broad-scale implementation by DOE or another entity.

(b) For any proposed program described in paragraph (a) of this section, DOE shall begin its NEPA review (if otherwise required by this part) as soon as environmental effects can be meaningfully evaluated, and before DOE has reached the level of investment or commitment likely to determine subsequent development or restrict later alternatives, as discussed at 40 CFR 1502.4(c)(3).

(c) For subsequent phases of development and application, DOE shall prepare one or more additional NEPA documents (if otherwise required by this part).

§ 1021.213 Rulemaking.

(a) This section applies to regulations promulgated by DOE.

§ 1021.214

(b) DOE shall begin its NEPA review of a proposed rule (if otherwise required by this part) while drafting the proposed regulation, and as soon as environmental effects can be meaningfully evaluated.

(c) DOE shall include any relevant NEPA documents, public and agency comments (if any) on those documents, and DOE responses to those comments, as part of the administrative record (40 CFR 1505.1(c)).

(d) If an EIS is required, DOE will normally publish the draft EIS at the time it publishes the proposed rule (40 CFR 1502.5(d)). DOE will normally combine any public hearings required for a proposed rule with the public hearings required on the draft EIS under §1021.313 of this part. The draft EIS need not accompany notices of inquiry or advance notices of proposed rulemaking that DOE may use to gather information during early stages of regulation development. When engaged in rulemaking for the purpose of protecting the public health and safety, DOE may issue the final rule simultaneously with publication of the EPA Notice of Availability of the final EIS in accordance with 40 CFR 1506.10(b).

(e) If an EA is required, DOE will normally complete the EA and issue any related FONSI prior to or simultaneously with issuance of the proposed rule; however, if the EA leads to preparation of an EIS, the provisions of paragraph (d) of this section shall apply.

§ 1021.214 Adjudicatory proceedings.

(a) This section applies to DOE proposed actions that involve DOE adjudicatory proceedings, excluding judicial or administrative civil or criminal enforcement actions.

(b) DOE shall complete its NEPA review (if otherwise required by this part) before rendering any final adjudicatory decision. If an EIS is required, the final EIS will normally be completed at the time of or before final staff recommendation, in accordance with 40 CFR 1502.5(c).

(c) DOE shall include any relevant NEPA documents, public and agency comments (if any) on those documents, and DOE responses to those comments,

10 CFR Ch. X (1–1–16 Edition)

as part of the administrative record (40 CFR 1505.1(c)).

§ 1021.215 Applicant process.

(a) This section applies to actions that involve application to DOE for a permit, license, exemption or allocation, or other similar actions, unless the action is categorically excluded from preparation of an EA or EIS under subpart D of this part.

(b) The applicant shall:

(1) Consult with DOE as early as possible in the planning process to obtain guidance with respect to the appropriate level and scope of any studies or environmental information that DOE may require to be submitted as part of, or in support of, the application;

(2) Conduct studies that DOE deems necessary and appropriate to determine the environmental impacts of the proposed action;

(3) Consult with appropriate Federal, state, regional and local agencies, American Indian tribes and other potentially interested parties during the preliminary planning stages of the proposed action to identify environmental factors and permitting requirements;

(4) Notify DOE as early as possible of other Federal, state, regional, local or American Indian tribal actions required for project completion to allow DOE to coordinate the Federal environmental review, and fulfill the requirements of 40 CFR 1506.2 regarding elimination of duplication with state and local procedures, as appropriate;

(5) Notify DOE of private entities and organizations interested in the proposed undertaking, in order that DOE can consult, as appropriate, with these parties in accordance with 40 CFR 1501.2(d)(2); and

(6) Notify DOE if, before DOE completes the environmental review, the applicant plans to take an action that is within DOE's jurisdiction that may have an adverse environmental impact or limit the choice of alternatives. If DOE determines that the action would have an adverse environmental impact or would limit the choice of reasonable alternatives under 40 CFR 1506.1(a), DOE will promptly notify the applicant that DOE will take appropriate action

to ensure that the objectives and procedures of NEPA are achieved in accordance with 40 CFR 1506.1(b).

(c) For major categories of DOE actions involving a large number of applicants, DOE may prepare and make available generic guidance describing the recommended level and scope of environmental information that applicants should provide.

(d) DOE shall begin its NEPA review (if otherwise required by this part) as soon as possible after receiving an application described in paragraph (a) of this section, and shall independently evaluate and verify the accuracy of information received from an applicant in accordance with 40 CFR 1506.5(a). At DOE's option, an applicant may prepare an EA in accordance with 40 CFR 1506.5(b). If an EIS is prepared, the EIS shall be prepared by DOE or by a contractor that is selected by DOE and that may be funded by the applicant, in accordance with 40 CFR 1506.5(c). The contractor shall provide a disclosure statement in accordance with 40 CFR 1506.5(c). DOE shall complete any NEPA documents (or evaluation of any EA prepared by the applicant) before rendering a final decision on the application and shall consider the NEPA document in reaching its decision, as provided in §1021.210 of this part.

[57 FR 15144, Apr. 24, 1992, as amended at 76 FR 63787, Oct. 13, 2011]

§ 1021.216 Procurement, financial assistance, and joint ventures.

(a) This section applies to DOE competitive and limited-source procurements, to awards of financial assistance by a competitive process, and to joint ventures entered into as a result of competitive solicitations, unless the action is categorically excluded from preparation of an EA or EIS under subpart D of this part. Paragraphs (b), (c), and (i) of this section apply as well to DOE sole-source procurements of sites, systems, or processes, to noncompetitive awards of financial assistance, and to sole-source joint ventures, unless the action is categorically excluded from preparation of an EA or EIS under subpart D of this part.

(b) When relevant in DOE's judgment, DOE shall require that offeror's submit environmental data and anal-

yses as a discrete part of the offeror's proposal. DOE shall specify in its solicitation document the type of information and level of detail for environmental data and analyses so required. The data will be limited to those reasonably available to offerors.

(c) DOE shall independently evaluate and verify the accuracy of environmental data and analyses submitted by offerors.

(d) For offers in the competitive range, DOE shall prepare and consider an environmental critique before the selection.

(e) The environmental critique will be subject to the confidentiality requirements of the procurement process.

(f) The environmental critique will evaluate the environmental data and analyses submitted by offerors; it may also evaluate supplemental information developed by DOE as necessary for a reasoned decision.

(g) The environmental critique will focus on environmental issues that are pertinent to a decision on proposals and will include:

(1) A brief discussion of the purpose of the procurement and each offer, including any site, system, or process variations among the offers having environmental implications;

(2) A discussion of the salient characteristics of each offeror's proposed site, system, or process as well as alternative sites, systems, or processes;

(3) A brief comparative evaluation of the potential environmental impacts of the offers, which will address direct and indirect effects, short-term and long-term effects, proposed mitigation measures, adverse effects that cannot be avoided, areas where important environmental information is incomplete and unavailable, unresolved environmental issues and practicable mitigating measures not included in the offeror's proposal; and

(4) To the extent known for each offer, a list of Federal, Tribal, state, and local government permits, licenses, and approvals that must be obtained.

(h) DOE shall prepare a publicly available environmental synopsis, based on the environmental critique, to document the consideration given to environmental factors and to record

that the relevant environmental consequences of reasonable alternatives have been evaluated in the selection process. The synopsis will not contain business, confidential, trade secret or other information that DOE otherwise would not disclose pursuant to 18 U.S.C. 1905, the confidentiality requirements of the competitive procurement process, 5 U.S.C. 552(b) and 41 U.S.C. 423. To assure compliance with this requirement, the synopsis will not contain data or other information that may in any way reveal the identity of offerors. After a selection has been made, the environmental synopsis shall be filed with EPA, shall be made publicly available, and shall be incorporated in any NEPA document prepared under paragraph (i) of this section.

(i) If an EA or EIS is required, DOE shall prepare, consider and publish the EA or EIS in conformance with the CEQ Regulations and other provisions of this part before taking any action pursuant to the contract or award of financial assistance (except as provided at 40 CFR 1506.1 and §1021.211 of this part). If the NEPA process is not completed before the award of the contract, financial assistance, or joint venture, then the contract, financial assistance, or joint venture shall be contingent on completion of the NEPA process (except as provided at 40 CFR 1506.1 and §1021.211 of this part). DOE shall phase subsequent contract work to allow the NEPA review process to be completed in advance of a go/no-go decision.

Subpart C—Implementing Procedures

§ 1021.300 General requirements.

(a) DOE shall determine, under the procedures in the CEQ Regulations and this part, whether any DOE proposal:

- (1) Requires preparation of an EIS;
- (2) Requires preparation of an EA; or
- (3) Is categorically excluded from preparation of either an EIS or an EA.

DOE shall prepare any pertinent documents as required by NEPA, the CEQ Regulations, or this part.

(b) Notwithstanding any other provision of these regulations, DOE may prepare a NEPA document for any DOE

action at any time in order to further the purposes of NEPA. This may be done to analyze the consequences of ongoing activities, support DOE planning, assess the need for mitigation, fully disclose the potential environmental consequences of DOE actions, or for any other reason. Documents prepared under this paragraph shall be prepared in the same manner as DOE documents prepared under paragraph (a) of this section.

§ 1021.301 Agency review and public participation.

(a) DOE shall make its NEPA documents available to other Federal agencies, states, local governments, American Indian tribes, interested groups, and the general public, in accordance with 40 CFR 1506.6, except as provided in §1021.340 of this part.

(b) Wherever feasible, DOE NEPA documents shall explain technical, scientific, or military terms or measurements using terms familiar to the general public, in accordance with 40 CFR 1502.8.

(c) DOE shall notify the host state and host tribe of a DOE determination to prepare an EA or EIS for a DOE proposal, and may notify any other state or American Indian tribe that, in DOE’s judgment, may be affected by the proposal.

(d) DOE shall provide the host state and host tribe with an opportunity to review and comment on any DOE EA prior to DOE’s approval of the EA. DOE may also provide any other state or American Indian tribe with the same opportunity if, in DOE’s judgment, the state or tribe may be affected by the proposed action. At DOE’s discretion, this review period shall be from 14 to 30 days. DOE shall consider all comments received from a state or tribe during the review period before approving or modifying the EA, as appropriate. If all states and tribes afforded this opportunity for preapproval review waive such opportunity, or provide a response before the end of the comment period, DOE may proceed to approve or take other appropriate action on the EA before the end of the review period.

(e) Paragraphs (c) and (d) of this section shall not apply to power marketing actions, such as rate-setting, in

Department of Energy

§ 1021.313

which a state or American Indian tribe is a customer, or to any other circumstances where DOE determines that such advance information could create a conflict of interest.

§ 1021.310 Environmental impact statements.

DOE shall prepare and circulate EISs and related RODs in accordance with the requirements of the CEQ Regulations, as supplemented by this subpart. DOE shall include in draft and final EISs a disclosure statement executed by any contractor (or subcontractor) under contract with DOE to prepare the EIS document, in accordance with 40 CFR 1506.5(c).

[61 FR 36239, July 9, 1996]

§ 1021.311 Notice of intent and scoping.

(a) DOE shall publish an NOI in the FEDERAL REGISTER in accordance with 40 CFR 1501.7 and containing the elements specified in 40 CFR 1508.22 as soon as practicable after a decision is made to prepare an EIS. However, if there will be a lengthy period of time between its decision to prepare an EIS and the time of actual preparation, DOE may defer publication of the NOI until a reasonable time before preparing the EIS, provided that DOE allows a reasonable opportunity for interested parties to participate in the EIS process. Through the NOI, DOE shall invite comments and suggestions on the scope of the EIS. DOE shall disseminate the NOI in accordance with 40 CFR 1506.6.

(b) If there will be a lengthy delay between the time DOE has decided to prepare an EIS and the beginning of the public scoping process, DOE may publish an Advance NOI in the FEDERAL REGISTER to provide an early opportunity to inform interested parties of the pending EIS or to solicit early public comments. This Advance NOI does not serve as a substitute for the NOI provided for in paragraph (a) of this section.

(c) Publication of the NOI in the FEDERAL REGISTER shall begin the public scoping process. The public scoping process for a DOE EIS shall allow a minimum of 30 days for the receipt of public comments.

(d) DOE shall hold at least one public scoping meeting as part of the public scoping process for a DOE EIS. DOE shall announce the location, date, and time of public scoping meetings in the NOI or by other appropriate means, such as additional notices in the FEDERAL REGISTER, news releases to the local media, or letters to affected parties. Public scoping meetings shall not be held until at least 15 days after public notification. Should DOE change the location, date, or time of a public scoping meeting, or schedule additional public scoping meetings, DOE shall publicize these changes in the FEDERAL REGISTER or in other ways as appropriate.

(e) In determining the scope of the EIS, DOE shall consider all comments received during the announced comment period held as part of the public scoping process. DOE may also consider comments received after the close of the announced comment period.

(f) A public scoping process is optional for DOE supplemental EISs (40 CFR 1502.9(c)(4)). If DOE initiates a public scoping process for a supplemental EIS, the provisions of paragraphs (a) through (e) of this section shall apply.

[57 FR 15144, Apr. 24, 1992, as amended at 61 FR 36239, July 9, 1996; 76 FR 63787, Oct. 13, 2011]

§ 1021.312 [Reserved]

§ 1021.313 Public review of environmental impact statements.

(a) The public review and comment period on a DOE draft EIS shall be no less than 45 days (40 CFR 1506.10(c)). The public comment period begins when EPA publishes a Notice of Availability of the document in the FEDERAL REGISTER.

(b) DOE shall hold at least one public hearing on DOE draft EISs. Such public hearings shall be announced at least 15 days in advance. The announcement shall identify the subject of the draft EIS and include the location, date, and time of the public hearings.

(c) DOE shall prepare a final EIS following the public comment period and hearings on the draft EIS. The final EIS shall respond to oral and written

§ 1021.314

comments received during public review of the draft EIS, as provided at 40 CFR 1503.4. In addition to the requirements at 40 CFR 1502.9(b), a DOE final EIS may include any Statement of Findings required by 10 CFR part 1022, "Compliance with Floodplain and Wetland Environmental Review Requirements," or a Statement of Findings may be issued separately.

(d) DOE shall use appropriate means to publicize the availability of draft and final EISs and the time and place for public hearings on a draft EIS. The methods chosen should focus on reaching persons who may be interested in or affected by the proposal and may include the methods listed in 40 CFR 1506.6(b)(3).

[57 FR 15144, Apr. 24, 1992, as amended at 68 FR 51432, Aug. 27, 2003]

§ 1021.314 Supplemental environmental impact statements.

(a) DOE shall prepare a supplemental EIS if there are substantial changes to the proposal or significant new circumstances or information relevant to environmental concerns, as discussed in 40 CFR 1502.9(c)(1).

(b) DOE may supplement a draft EIS or final EIS at any time, to further the purposes of NEPA, in accordance with 40 CFR 1502.9(c)(2).

(c) When it is unclear whether or not an EIS supplement is required, DOE shall prepare a Supplement Analysis.

(1) The Supplement Analysis shall discuss the circumstances that are pertinent to deciding whether to prepare a supplemental EIS, pursuant to 40 CFR 1502.9(c).

(2) The Supplement Analysis shall contain sufficient information for DOE to determine whether:

(i) An existing EIS should be supplemented;

(ii) A new EIS should be prepared; or

(iii) No further NEPA documentation is required.

(3) DOE shall make the determination and the related Supplement Analysis available to the public for information. Copies of the determination and Supplement Analysis shall be provided upon written request. DOE shall make copies available for inspection in the appropriate DOE public reading

10 CFR Ch. X (1–1–16 Edition)

room(s) or other appropriate location(s) for a reasonable time.

(d) DOE shall prepare, circulate, and file a supplement to a draft or final EIS in the same manner as any other draft and final EISs, except that scoping is optional for a supplement. If DOE decides to take action on a proposal covered by a supplemental EIS, DOE shall prepare a ROD in accordance with the provisions of § 1021.315 of this part.

(e) When applicable, DOE will incorporate an EIS supplement, or the determination and supporting Supplement Analysis made under paragraph (c) of this section, into any related formal administrative record on the action that is the subject of the EIS supplement or determination (40 CFR 1502.9(c)(3)).

§ 1021.315 Records of decision.

(a) No decision may be made on a proposal covered by an EIS during a 30-day "waiting period" following completion of the final EIS, except as provided at 40 CFR 1506.1 and 1506.10(b) and § 1021.211 of this part. The 30-day period starts when the EPA Notice of Availability for the final EIS is published in the FEDERAL REGISTER.

(b) If DOE decides to take action on a proposal covered by an EIS, a ROD shall be prepared as provided at 40 CFR 1505.2 (except as provided at 40 CFR 1506.1 and § 1021.211 of this part).

(c) DOE RODs shall be published in the FEDERAL REGISTER and made available to the public as specified in 40 CFR 1506.6, except as provided in 40 CFR 1507.3(c) and § 1021.340 of this part.

(d) No action shall be taken until the decision has been made public. DOE may implement the decision before the ROD is published in the FEDERAL REGISTER if the ROD has been signed and the decision and the availability of the ROD have been made public by other means (e.g., press release, announcement in local media).

(e) DOE may revise a ROD at any time, so long as the revised decision is adequately supported by an existing EIS. A revised ROD is subject to the provisions of paragraphs (b), (c), and (d) of this section.

[57 FR 15144, Apr. 24, 1992, as amended at 61 FR 36239, July 9, 1996]

§ 1021.320 Environmental assessments.

DOE shall prepare and circulate EAs and related FONSI in accordance with the requirements of the CEQ Regulations, as supplemented by this subpart.

§ 1021.321 Requirements for environmental assessments.

(a) *When to prepare an EA.* As required by 40 CFR 1501.4(b), DOE shall prepare an EA for a proposed DOE action that is described in the classes of actions listed in appendix C to subpart D of this part, and for a proposed DOE action that is not described in any of the classes of actions listed in appendices A, B, or D to subpart D, except that an EA is not required if DOE has decided to prepare an EIS. DOE may prepare an EA on any action at any time in order to assist agency planning and decisionmaking.

(b) *Purposes.* A DOE EA shall serve the purposes identified in 40 CFR 1508.9(a), which include providing sufficient evidence and analysis for determining whether to prepare an EIS or to issue a FONSI. If appropriate, a DOE EA shall also include any floodplain/wetlands assessment prepared under 10 CFR part 1022 and may include analyses needed for other environmental determinations.

(c) *Content.* A DOE EA shall comply with the requirements found at 40 CFR 1508.9. In addition to any other alternatives, DOE shall assess the no action alternative in an EA, even when the proposed action is specifically required by legislation or a court order.

§ 1021.322 Findings of no significant impact.

(a) DOE shall prepare a FONSI only if the related EA supports the finding that the proposed action will not have a significant effect on the human environment. If a required DOE EA does not support a FONSI, DOE shall prepare an EIS and issue a ROD before taking action on the proposal addressed by the EA, except as permitted under 40 CFR 1506.1 and § 1021.211 of this part.

(b) In addition to the requirements found at 40 CFR 1508.13, a DOE FONSI shall include the following:

(1) Any commitments to mitigations that are essential to render the im-

pacts of the proposed action not significant, beyond those mitigations that are integral elements of the proposed action, and a reference to the Mitigation Action Plan prepared under § 1021.331 of this part;

(2) Any "Statement of Findings" required by 10 CFR part 1022, "Compliance with Floodplain/Wetlands Environmental Review Requirements";

(3) The date of issuance; and

(4) The signature of the DOE approving official.

(c) DOE shall make FONSI available to the public as provided at 40 CFR 1501.4(e)(1) and 1506.6; DOE shall make copies available for inspection in the appropriate DOE public reading room(s) or other appropriate location(s) for a reasonable time.

(d) DOE shall issue a proposed FONSI for public review and comment before making a final determination on the FONSI if required by 40 CFR 1501.4(e)(2); DOE may issue a proposed FONSI for public review and comment in other situations as well.

(e) Upon issuance of the FONSI, DOE may proceed with the proposed action subject to any mitigation commitments expressed in the FONSI that are essential to render the impacts of the proposed action not significant.

(f) DOE may revise a FONSI at any time, so long as the revision is supported by an existing EA. A revised FONSI is subject to all provisions of this section.

[57 FR 15144, Apr. 24, 1992, as amended at 61 FR 36239, July 9, 1996; 76 FR 63787, Oct. 13, 2011]

§ 1021.330 Programmatic (including site-wide) NEPA documents.

(a) When required to support a DOE programmatic decision (40 CFR 1508.18(b)(3)), DOE shall prepare a programmatic EIS or EA (40 CFR 1502.4). DOE may also prepare a programmatic EIS or EA at any time to further the purposes of NEPA.

(b) A DOE programmatic NEPA document shall be prepared, issued, and circulated in accordance with the requirements for any other NEPA document, as established by the CEQ Regulations and this part.

(c) As a matter of policy when not otherwise required, DOE shall prepare

§ 1021.331

site-wide EISs for certain large, multiple-facility DOE sites; DOE may prepare EISs or EAs for other sites to assess the impacts of all or selected functions at those sites.

(d) DOE shall evaluate site wide NEPA documents prepared under §1021.330(c) at least every five years. DOE shall evaluate site-wide EISs by means of a Supplement Analysis, as provided in §1021.314. Based on the Supplement Analysis, DOE shall determine whether the existing EIS remains adequate or whether to prepare a new site-wide EIS or supplement the existing EIS, as appropriate. The determination and supporting analysis shall be made available in the appropriate DOE public reading room(s) or in other appropriate location(s) for a reasonable time.

(e) DOE shall evaluate site-wide EAs by means of an analysis similar to the Supplement Analysis to determine whether the existing site-wide EA remains adequate, whether to prepare a new site-wide EA, revise the FONSI, or prepare a site wide EIS, as appropriate. The determination and supporting analysis shall be made available in the appropriate DOE public reading room(s) or in other appropriate location(s) for a reasonable time.

§ 1021.331 Mitigation action plans.

(a) Following completion of each EIS and its associated ROD, DOE shall prepare a Mitigation Action Plan that addresses mitigation commitments expressed in the ROD. The Mitigation Action Plan shall explain how the corresponding mitigation measures, designed to mitigate adverse environmental impacts associated with the course of action directed by the ROD, will be planned and implemented. The Mitigation Action Plan shall be prepared before DOE takes any action directed by the ROD that is the subject of a mitigation commitment.

(b) In certain circumstances, as specified in §1021.322(b)(1), DOE shall also prepare a Mitigation Action Plan for commitments to mitigations that are essential to render the impacts of the proposed action not significant. The Mitigation Action Plan shall address all commitments to such necessary mitigations and explain how mitiga-

10 CFR Ch. X (1–1–16 Edition)

tion will be planned and implemented. The Mitigation Action Plan shall be prepared before the FONSI is issued and shall be referenced therein.

(c) Each Mitigation Action Plan shall be as complete as possible, commensurate with the information available regarding the course of action either directed by the ROD or the action to be covered by the FONSI, as appropriate. DOE may revise the Plan as more specific and detailed information becomes available.

(d) DOE shall make copies of the Mitigation Action Plans available for inspection in the appropriate DOE public reading room(s) or other appropriate location(s) for a reasonable time. Copies of the Mitigation Action Plans shall also be available upon written request.

[57 FR 15144, Apr. 24, 1992, as amended at 76 FR 63787, Oct. 13, 2011]

§ 1021.340 Classified, confidential, and otherwise exempt information.

(a) Notwithstanding other sections of this part, DOE shall not disclose classified, confidential, or other information that DOE otherwise would not disclose pursuant to the Freedom of Information Act (FOIA) (5 U.S.C. 552) and 10 CFR 1004.10(b) of DOE's regulations implementing the FOIA, except as provided by 40 CFR 1506.6(f).

(b) To the fullest extent possible, DOE shall segregate any information that is exempt from disclosure requirements into an appendix to allow public review of the remainder of a NEPA document.

(c) If exempt information cannot be segregated, or if segregation would leave essentially meaningless material, DOE shall withhold the entire NEPA document from the public; however, DOE shall prepare the NEPA document, in accordance with the CEQ Regulations and this part, and use it in DOE decisionmaking.

§ 1021.341 Coordination with other environmental review requirements.

(a) In accordance with 40 CFR 1500.4(k) and (o), 1502.25, and 1506.4, DOE shall integrate the NEPA process and coordinate NEPA compliance with other environmental review requirements to the fullest extent possible.

Department of Energy

§ 1021.400

(b) To the extent possible, DOE shall determine the applicability of other environmental requirements early in the planning process, in consultation with other agencies when necessary or appropriate, to ensure compliance and to avoid delays, and shall incorporate any relevant requirements as early in the NEPA review process as possible.

§ 1021.342 Interagency cooperation.

For DOE programs that involve another Federal agency or agencies in related decisions subject to NEPA, DOE will comply with the requirements of 40 CFR 1501.5 and 1501.6. As part of this process, DOE shall cooperate with the other agencies in developing environmental information and in determining whether a proposal requires preparation of an EIS or EA, or can be categorically excluded from preparation of either. Further, where appropriate and acceptable to the other agencies, DOE shall develop or cooperate in the development of interagency agreements to facilitate coordination and to reduce delay and duplication.

§ 1021.343 Variances.

(a) *Emergency actions.* DOE may take an action without observing all provisions of this part or the CEQ Regulations, in accordance with 40 CFR 1506.11, in emergency situations that demand immediate action. DOE shall consult with CEQ as soon as possible regarding alternative arrangements for emergency actions having significant environmental impacts. DOE shall document, including publishing a notice in the FEDERAL REGISTER, emergency actions covered by this paragraph within 30 days after such action occurs; this documentation shall identify any adverse impacts from the actions taken, further mitigation necessary, and any NEPA documents that may be required.

(b) *Reduction of time periods.* On a case-by-case basis, DOE may reduce time periods established in this part that are not required by the CEQ Regulations. If DOE determines that such reduction is necessary, DOE shall publish a notice in the FEDERAL REGISTER specifying the revised time periods and the rationale for the reduction.

(c) *Other.* Any variance from the requirements of this part, other than as provided by paragraphs (a) and (b) of this section, must be soundly based on the interests of national security or the public health, safety, or welfare and must have the advance written approval of the Secretary; however, the Secretary is not authorized to waive or grant a variance from any requirement of the CEQ Regulations (except as provided for in those regulations). If the Secretary determines that a variance from the requirements of this part is within his/her authority to grant and is necessary, DOE shall publish a notice in the FEDERAL REGISTER specifying the variance granted and the reasons.

Subpart D—Typical Classes of Actions

SOURCE: 76 FR 63787, Oct. 13, 2011, unless otherwise noted.

§ 1021.400 Level of NEPA review.

(a) This subpart identifies DOE actions that normally:

(1) Do not require preparation of either an EIS or an EA (are categorically excluded from preparation of either document) (appendices A and B to this subpart D);

(2) Require preparation of an EA, but not necessarily an EIS (appendix C to this subpart D); or

(3) Require preparation of an EIS (appendix D to this subpart D).

(b) Any completed, valid NEPA review does not have to be repeated, and no completed NEPA documents need to be redone by reasons of these regulations, except as provided in § 1021.314.

(c) If a DOE proposal is encompassed within a class of actions listed in the appendices to this subpart D, DOE shall proceed with the level of NEPA review indicated for that class of actions, unless there are extraordinary circumstances related to the specific proposal that may affect the significance of the environmental effects of the proposal.

(d) If a DOE proposal is not encompassed within the classes of actions listed in the appendices to this subpart D, or if there are extraordinary circumstances related to the proposal that may affect the significance of the

§ 1021.410

environmental effects of the proposal, DOE shall either:

- (1) Prepare an EA and, on the basis of that EA, determine whether to prepare an EIS or a FONSI; or
- (2) Prepare an EIS and ROD.

§ 1021.410 Application of categorical exclusions (classes of actions that normally do not require EAs or EISs).

(a) The actions listed in appendices A and B to this subpart D are classes of actions that DOE has determined do not individually or cumulatively have a significant effect on the human environment (categorical exclusions).

(b) To find that a proposal is categorically excluded, DOE shall determine the following:

(1) The proposal fits within a class of actions that is listed in appendix A or B to this subpart D;

(2) There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal. Extraordinary circumstances are unique situations presented by specific proposals, including, but not limited to, scientific controversy about the environmental effects of the proposal; uncertain effects or effects involving unique or unknown risks; and unresolved conflicts concerning alternative uses of available resources; and

(3) The proposal has not been segmented to meet the definition of a categorical exclusion. Segmentation can occur when a proposal is broken down into small parts in order to avoid the appearance of significance of the total action. The scope of a proposal must include the consideration of connected and cumulative actions, that is, the proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or § 1021.211 of this part concerning limitations on actions during EIS preparation.

(c) All categorical exclusions may be applied by any organizational element of DOE. The sectional divisions in appendix B to this subpart D are solely

10 CFR Ch. X (1–1–16 Edition)

for purposes of organization of that appendix and are not intended to be limiting.

(d) A class of actions includes activities foreseeably necessary to proposals encompassed within the class of actions (such as award of implementing grants and contracts, site preparation, purchase and installation of equipment, and associated transportation activities).

(e) Categorical exclusion determinations for actions listed in appendix B shall be documented and made available to the public by posting online, generally within two weeks of the determination, unless additional time is needed in order to review and protect classified information, “confidential business information,” or other information that DOE would not disclose pursuant to the Freedom of Information Act (FOIA) (5 U.S.C. 552). Posted categorical exclusion determinations shall not disclose classified information, “confidential business information,” or other information that DOE would not disclose pursuant to FOIA. (See also 10 CFR 1021.340.)

(f) Proposed recurring activities to be undertaken during a specified time period, such as routine maintenance activities for a year, may be addressed in a single categorical exclusion determination after considering the potential aggregated impacts.

(g) The following clarifications are provided to assist in the appropriate application of categorical exclusions that employ the terms or phrases:

(1) “Previously disturbed or developed” refers to land that has been changed such that its functioning ecological processes have been and remain altered by human activity. The phrase encompasses areas that have been transformed from natural cover to non-native species or a managed state, including, but not limited to, utility and electric power transmission corridors and rights-of-way, and other areas where active utilities and currently used roads are readily available.

(2) DOE considers terms such as “small” and “small-scale” in the context of the particular proposal, including its proposed location. In assessing whether a proposed action is small, in addition to the actual magnitude of the

Department of Energy

Pt. 1021, Subpt. D, App. A

proposal, DOE considers factors such as industry norms, the relationship of the proposed action to similar types of development in the vicinity of the proposed action, and expected outputs of emissions or waste. When considering the physical size of a proposed facility, for example, DOE would review the surrounding land uses, the scale of the proposed facility relative to existing development, and the capacity of existing roads and other infrastructure to support the proposed action.

APPENDIX A TO SUBPART D OF PART 1021—CATEGORICAL EXCLUSIONS APPLICABLE TO GENERAL AGENCY ACTIONS

TABLE OF CONTENTS

- A1 Routine DOE business actions
- A2 Clarifying or administrative contract actions
- A3 Certain actions by Office of Hearings and Appeals
- A4 Interpretations and rulings for existing regulations
- A5 Interpretive rulemakings with no change in environmental effect
- A6 Procedural rulemakings
- A7 [Reserved]
- A8 Awards of certain contracts
- A9 Information gathering, analysis, and dissemination
- A10 Reports and recommendations on non-DOE legislation
- A11 Technical advice and assistance to organizations
- A12 Emergency preparedness planning
- A13 Procedural documents
- A14 Approval of technical exchange arrangements
- A15 International agreements for energy research and development

A1 ROUTINE DOE BUSINESS ACTIONS

Routine actions necessary to support the normal conduct of DOE business limited to administrative, financial, and personnel actions.

A2 CLARIFYING OR ADMINISTRATIVE CONTRACT ACTIONS

Contract interpretations, amendments, and modifications that are clarifying or administrative in nature.

A3 CERTAIN ACTIONS BY OFFICE OF HEARINGS AND APPEALS

Adjustments, exceptions, exemptions, appeals and stays, modifications, or rescissions of orders issued by the Office of Hearings and Appeals.

A4 INTERPRETATIONS AND RULINGS FOR EXISTING REGULATIONS

Interpretations and rulings with respect to existing regulations, or modifications or rescissions of such interpretations and rulings.

A5 INTERPRETIVE RULEMAKINGS WITH NO CHANGE IN ENVIRONMENTAL EFFECT

Rulemakings interpreting or amending an existing rule or regulation that does not change the environmental effect of the rule or regulation being amended.

A6 PROCEDURAL RULEMAKINGS

Rulemakings that are strictly procedural, including, but not limited to, rulemaking (under 48 CFR chapter 9) establishing procedures for technical and pricing proposals and establishing contract clauses and contracting practices for the purchase of goods and services, and rulemaking (under 10 CFR part 600) establishing application and review procedures for, and administration, audit, and closeout of, grants and cooperative agreements.

A7 [RESERVED]

A8 AWARDS OF CERTAIN CONTRACTS

Awards of contracts for technical support services, management and operation of a government-owned facility, and personal services.

A9 INFORMATION GATHERING, ANALYSIS, AND DISSEMINATION

Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental monitoring. (See also B3.1 of appendix B to this subpart.)

A10 REPORTS AND RECOMMENDATIONS ON NON-DOE LEGISLATION

Reports and recommendations on legislation or rulemaking that are not proposed by DOE.

A11 TECHNICAL ADVICE AND ASSISTANCE TO ORGANIZATIONS

Technical advice and planning assistance to international, national, state, and local organizations.

A12 EMERGENCY PREPAREDNESS PLANNING

Emergency preparedness planning activities, including, but not limited to, the designation of onsite evacuation routes.

A13 PROCEDURAL DOCUMENTS

Administrative, organizational, or procedural Policies, Orders, Notices, Manuals, and Guides.

A14 APPROVAL OF TECHNICAL EXCHANGE ARRANGEMENTS

Approval of technical exchange arrangements for information, data, or personnel with other countries or international organizations (including, but not limited to, assistance in identifying and analyzing another country's energy resources, needs and options).

A15 INTERNATIONAL AGREEMENTS FOR ENERGY RESEARCH AND DEVELOPMENT

Approval of DOE participation in international "umbrella" agreements for cooperation in energy research and development activities that would not commit the U.S. to any specific projects or activities.

APPENDIX B TO SUBPART D OF PART 1021—CATEGORICAL EXCLUSIONS APPLICABLE TO SPECIFIC AGENCY ACTIONS

TABLE OF CONTENTS

B. Conditions that Are Integral Elements of the Classes of Actions in Appendix B

B1. CATEGORICAL EXCLUSIONS APPLICABLE TO FACILITY OPERATION

- B1.1 Changing rates and prices
- B1.2 Training exercises and simulations
- B1.3 Routine maintenance
- B1.4 Air conditioning systems for existing equipment
- B1.5 Existing steam plants and cooling water systems
- B1.6 Tanks and equipment to control runoff and spills
- B1.7 Electronic equipment
- B1.8 Screened water intake and outflow structures
- B1.9 Airway safety markings and painting
- B1.10 Onsite storage of activated material
- B1.11 Fencing
- B1.12 Detonation or burning of explosives or propellants after testing
- B1.13 Pathways, short access roads, and rail lines
- B1.14 Refueling of nuclear reactors
- B1.15 Support buildings
- B1.16 Asbestos removal
- B1.17 Polychlorinated biphenyl removal
- B1.18 Water supply wells
- B1.19 Microwave, meteorological, and radio towers

- B1.20 Protection of cultural resources, fish and wildlife habitat
- B1.21 Noise abatement
- B1.22 Relocation of buildings
- B1.23 Demolition and disposal of buildings
- B1.24 Property transfers
- B1.25 Real property transfers for cultural resources protection, habitat preservation, and wildlife management
- B1.26 Small water treatment facilities
- B1.27 Disconnection of utilities
- B1.28 Placing a facility in an environmentally safe condition
- B1.29 Disposal facilities for construction and demolition waste
- B1.30 Transfer actions
- B1.31 Installation or relocation of machinery and equipment
- B1.32 Traffic flow adjustments
- B1.33 Stormwater runoff control
- B1.34 Lead-based paint containment, removal, and disposal
- B1.35 Drop-off, collection, and transfer facilities for recyclable materials
- B1.36 Determinations of excess real property

B2. CATEGORICAL EXCLUSIONS APPLICABLE TO SAFETY AND HEALTH

- B2.1 Workplace enhancements
- B2.2 Building and equipment instrumentation
- B2.3 Personnel safety and health equipment
- B2.4 Equipment qualification
- B2.5 Facility safety and environmental improvements
- B2.6 Recovery of radioactive sealed sources

B3. CATEGORICAL EXCLUSIONS APPLICABLE TO SITE CHARACTERIZATION, MONITORING, AND GENERAL RESEARCH

- B3.1 Site characterization and environmental monitoring
- B3.2 Aviation activities
- B3.3 Research related to conservation of fish, wildlife, and cultural resources
- B3.4 Transport packaging tests for radioactive or hazardous material
- B3.5 Tank car tests
- B3.6 Small-scale research and development, laboratory operations, and pilot projects
- B3.7 New terrestrial infill exploratory and experimental wells
- B3.8 Outdoor terrestrial ecological and environmental research
- B3.9 Projects to reduce emissions and waste generation
- B3.10 Particle accelerators
- B3.11 Outdoor tests and experiments on materials and equipment components
- B3.12 Microbiological and biomedical facilities
- B3.13 Magnetic fusion experiments
- B3.14 Small-scale educational facilities
- B3.15 Small-scale indoor research and development projects using nanoscale materials

Department of Energy

Pt. 1021, Subpt. D, App. B

B3.16 Research activities in aquatic environments

B4. CATEGORICAL EXCLUSIONS APPLICABLE TO ELECTRIC POWER AND TRANSMISSION

- B4.1 Contracts, policies, and marketing and allocation plans for electric power
- B4.2 Export of electric energy
- B4.3 Electric power marketing rate changes
- B4.4 Power marketing services and activities
- B4.5 Temporary adjustments to river operations
- B4.6 Additions and modifications to transmission facilities
- B4.7 Fiber optic cable
- B4.8 Electricity transmission agreements
- B4.9 Multiple use of powerline rights-of-way
- B4.10 Removal of electric transmission facilities
- B4.11 Electric power substations and inter-connection facilities
- B4.12 Construction of powerlines
- B4.13 Upgrading and rebuilding existing powerlines

B5. CATEGORICAL EXCLUSIONS APPLICABLE TO CONSERVATION, FOSSIL, AND RENEWABLE ENERGY ACTIVITIES

- B5.1 Actions to conserve energy or water
- B5.2 Modifications to pumps and piping
- B5.3 Modification or abandonment of wells
- B5.4 Repair or replacement of pipelines
- B5.5 Short pipeline segments
- B5.6 Oil spill cleanup
- B5.7 Import or export natural gas, with operational changes
- B5.8 Import or export natural gas, with new cogeneration powerplant
- B5.9 Temporary exemptions for electric powerplants
- B5.10 Certain permanent exemptions for existing electric powerplants
- B5.11 Permanent exemptions allowing mixed natural gas and petroleum
- B5.12 Workover of existing wells
- B5.13 Experimental wells for injection of small quantities of carbon dioxide
- B5.14 Combined heat and power or cogeneration systems
- B5.15 Small-scale renewable energy research and development and pilot projects
- B5.16 Solar photovoltaic systems
- B5.17 Solar thermal systems
- B5.18 Wind turbines
- B5.19 Ground source heat pumps
- B5.20 Biomass power plants
- B5.21 Methane gas recovery and utilization systems
- B5.22 Alternative fuel vehicle fueling stations
- B5.23 Electric vehicle charging stations
- B5.24 Drop-in hydroelectric systems
- B5.25 Small-scale renewable energy research and development and pilot projects in aquatic environments

B6. CATEGORICAL EXCLUSIONS APPLICABLE TO ENVIRONMENTAL RESTORATION AND WASTE MANAGEMENT ACTIVITIES

- B6.1 Cleanup actions
- B6.2 Waste collection, treatment, stabilization, and containment facilities
- B6.3 Improvements to environmental control systems
- B6.4 Facilities for storing packaged hazardous waste for 90 days or less
- B6.5 Facilities for characterizing and sorting packaged waste and overpacking waste
- B6.6 Modification of facilities for storing, packaging, and repacking waste
- B6.7 [Reserved]
- B6.8 Modifications for waste minimization and reuse of materials
- B6.9 Measures to reduce migration of contaminated groundwater
- B6.10 Upgraded or replacement waste storage facilities

B7. CATEGORICAL EXCLUSIONS APPLICABLE TO INTERNATIONAL ACTIVITIES

- B7.1 Emergency measures under the International Energy Program
- B7.2 Import and export of special nuclear or isotopic materials

B. CONDITIONS THAT ARE INTEGRAL ELEMENTS OF THE CLASSES OF ACTIONS IN APPENDIX B

The classes of actions listed below include the following conditions as integral elements of the classes of actions. To fit within the classes of actions listed below, a proposal must be one that would not:

(1) Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders;

(2) Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities;

(3) Disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases;

(4) Have the potential to cause significant impacts on environmentally sensitive resources. An environmentally sensitive resource is typically a resource that has been identified as needing protection through Executive Order, statute, or regulation by Federal, state, or local government, or a Federally recognized Indian tribe. An action may be categorically excluded if, although sensitive resources are present, the action would not have the potential to cause significant impacts on those resources (such as

construction of a building with its foundation well above a sole-source aquifer or upland surface soil removal on a site that has wetlands). Environmentally sensitive resources include, but are not limited to:

(i) Property (such as sites, buildings, structures, and objects) of historic, archeological, or architectural significance designated by a Federal, state, or local government, Federally recognized Indian tribe, or Native Hawaiian organization, or property determined to be eligible for listing on the National Register of Historic Places;

(ii) Federally-listed threatened or endangered species or their habitat (including critical habitat) or Federally-proposed or candidate species or their habitat (Endangered Species Act); state-listed or state-proposed endangered or threatened species or their habitat; Federally-protected marine mammals and Essential Fish Habitat (Marine Mammal Protection Act; Magnuson-Stevens Fishery Conservation and Management Act); and otherwise Federally-protected species (such as the Bald and Golden Eagle Protection Act or the Migratory Bird Treaty Act);

(iii) Floodplains and wetlands (as defined in 10 CFR 1022.4, “Compliance with Floodplain and Wetland Environmental Review Requirements: Definitions,” or its successor);

(iv) Areas having a special designation such as Federally- and state-designated wilderness areas, national parks, national monuments, national natural landmarks, wild and scenic rivers, state and Federal wildlife refuges, scenic areas (such as National Scenic and Historic Trails or National Scenic Areas), and marine sanctuaries;

(v) Prime or unique farmland, or other farmland of statewide or local importance, as defined at 7 CFR 658.2(a), “Farmland Protection Policy Act: Definitions,” or its successor;

(vi) Special sources of water (such as sole-source aquifers, wellhead protection areas, and other water sources that are vital in a region); and

(vii) Tundra, coral reefs, or rain forests; or

(5) Involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those of the Department of Agriculture, the Environmental Protection Agency, and the National Institutes of Health.

B1. CATEGORICAL EXCLUSIONS APPLICABLE TO FACILITY OPERATION

B1.1 Changing rates and prices

Changing rates for services or prices for products marketed by parts of DOE other

than Power Marketing Administrations, and approval of rate or price changes for non-DOE entities, that are consistent with the change in the implicit price deflator for the Gross Domestic Product published by the Department of Commerce, during the period since the last rate or price change.

B1.2 Training exercises and simulations

Training exercises and simulations (including, but not limited to, firing-range training, small-scale and short-duration force-on-force exercises, emergency response training, fire fighter and rescue training, and decontamination and spill cleanup training) conducted under appropriately controlled conditions and in accordance with applicable requirements.

B1.3 Routine maintenance

Routine maintenance activities and custodial services for buildings, structures, rights-of-way, infrastructures (including, but not limited to, pathways, roads, and railroads), vehicles and equipment, and localized vegetation and pest control, during which operations may be suspended and resumed, provided that the activities would be conducted in a manner in accordance with applicable requirements. Custodial services are activities to preserve facility appearance, working conditions, and sanitation (such as cleaning, window washing, lawn mowing, trash collection, painting, and snow removal). Routine maintenance activities, corrective (that is, repair), preventive, and predictive, are required to maintain and preserve buildings, structures, infrastructures, and equipment in a condition suitable for a facility to be used for its designated purpose. Such maintenance may occur as a result of severe weather (such as hurricanes, floods, and tornados), wildfires, and other such events. Routine maintenance may result in replacement to the extent that replacement is in-kind and is not a substantial upgrade or improvement. In-kind replacement includes installation of new components to replace outmoded components, provided that the replacement does not result in a significant change in the expected useful life, design capacity, or function of the facility. Routine maintenance does not include replacement of a major component that significantly extends the originally intended useful life of a facility (for example, it does not include the replacement of a reactor vessel near the end of its useful life). Routine maintenance activities include, but are not limited to:

(a) Repair or replacement of facility equipment, such as lathes, mills, pumps, and presses;

(b) Door and window repair or replacement;

(c) Wall, ceiling, or floor repair or replacement;

(d) Reroofing;

Department of Energy

(e) Plumbing, electrical utility, lighting, and telephone service repair or replacement;

(f) Routine replacement of high-efficiency particulate air filters;

(g) Inspection and/or treatment of currently installed utility poles;

(h) Repair of road embankments;

(i) Repair or replacement of fire protection sprinkler systems;

(j) Road and parking area resurfacing, including construction of temporary access to facilitate resurfacing, and scraping and grading of unpaved surfaces;

(k) Erosion control and soil stabilization measures (such as reseeded, gabions, grading, and revegetation);

(l) Surveillance and maintenance of surplus facilities in accordance with DOE Order 435.1, "Radioactive Waste Management," or its successor;

(m) Repair and maintenance of transmission facilities, such as replacement of conductors of the same nominal voltage, poles, circuit breakers, transformers, capacitors, crossarms, insulators, and downed powerlines, in accordance, where appropriate, with 40 CFR part 761 (Polychlorinated Biphenyls Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions) or its successor;

(n) Routine testing and calibration of facility components, subsystems, or portable equipment (such as control valves, in-core monitoring devices, transformers, capacitors, monitoring wells, lysimeters, weather stations, and flumes);

(o) Routine decontamination of the surfaces of equipment, rooms, hot cells, or other interior surfaces of buildings (by such activities as wiping with rags, using strippable latex, and minor vacuuming), and removal of contaminated intact equipment and other material (not including spent nuclear fuel or special nuclear material in nuclear reactors); and

(p) Removal of debris.

B1.4 Air conditioning systems for existing equipment

Installation or modification of air conditioning systems required for temperature control for operation of existing equipment.

B1.5 Existing steam plants and cooling water systems

Minor improvements to existing steam plants and cooling water systems (including, but not limited to, modifications of existing cooling towers and ponds), provided that the improvements would not: (1) Create new sources of water or involve new receiving waters; (2) have the potential to significantly alter water withdrawal rates; (3) exceed the permitted temperature of discharged water; or (4) increase introductions of, or involve new introductions of, haz-

Pt. 1021, Subpt. D, App. B

ardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products.

B1.6 Tanks and equipment to control runoff and spills

Installation or modification of retention tanks or small (normally under one acre) basins and associated piping and pumps for existing operations to control runoff or spills (such as under 40 CFR part 112). Modifications include, but are not limited to, installing liners or covers. (See also B1.33 of this appendix.)

B1.7 Electronic equipment

Acquisition, installation, operation, modification, and removal of electricity transmission control and monitoring devices for grid demand and response, communication systems, data processing equipment, and similar electronic equipment.

B1.8 Screened water intake and outflow structures

Modifications to screened water intake and outflow structures such that intake velocities and volumes and water effluent quality and volumes are consistent with existing permit limits.

B1.9 Airway safety markings and painting

Placement of airway safety markings on, painting of, and repair and in-kind replacement of lighting on powerlines and antenna structures, wind turbines, and similar structures in accordance with applicable requirements (such as Federal Aviation Administration standards).

B1.10 Onsite storage of activated material

Routine, onsite storage at an existing facility of activated equipment and material (including, but not limited to, lead) used at that facility, to allow reuse after decay of radioisotopes with short half-lives.

B1.11 Fencing

Installation of fencing, including, but not limited to border marking, that would not have the potential to significantly impede wildlife population movement (including migration) or surface water flow.

B1.12 Detonation or burning of explosives or propellants after testing

Outdoor detonation or burning of explosives or propellants that failed (duds), were damaged (such as by fracturing), or were otherwise not consumed in testing. Outdoor detonation or burning would be in areas designated and routinely used for those purposes under existing applicable permits

Pt. 1021, Subpt. D, App. B

10 CFR Ch. X (1–1–16 Edition)

issued by Federal, state, and local authorities (such as a permit for a RCRA miscellaneous unit (40 CFR part 264, subpart X)).

B1.13 Pathways, short access roads, and rail lines

Construction, acquisition, and relocation, consistent with applicable right-of-way conditions and approved land use or transportation improvement plans, of pedestrian walkways and trails, bicycle paths, small outdoor fitness areas, and short access roads and rail lines (such as branch and spur lines).

B1.14 Refueling of nuclear reactors

Refueling of operating nuclear reactors, during which operations may be suspended and then resumed.

B1.15 Support buildings

Siting, construction or modification, and operation of support buildings and support structures (including, but not limited to, trailers and prefabricated and modular buildings) within or contiguous to an already developed area (where active utilities and currently used roads are readily accessible). Covered support buildings and structures include, but are not limited to, those for office purposes; parking; cafeteria services; education and training; visitor reception; computer and data processing services; health services or recreation activities; routine maintenance activities; storage of supplies and equipment for administrative services and routine maintenance activities; security (such as security posts); fire protection; small-scale fabrication (such as machine shop activities), assembly, and testing of non-nuclear equipment or components; and similar support purposes, but exclude facilities for nuclear weapons activities and waste storage activities, such as activities covered in B1.10, B1.29, B1.35, B2.6, B6.2, B6.4, B6.5, B6.6, and B6.10 of this appendix.

B1.16 Asbestos removal

Removal of asbestos-containing materials from buildings in accordance with applicable requirements (such as 40 CFR part 61, “National Emission Standards for Hazardous Air Pollutants”; 40 CFR part 763, “Asbestos”; 29 CFR part 1910, subpart I, “Personal Protective Equipment”; and 29 CFR part 1926, “Safety and Health Regulations for Construction”; and appropriate state and local requirements, including certification of removal contractors and technicians).

B1.17 Polychlorinated biphenyl removal

Removal of polychlorinated biphenyl (PCB)-containing items (including, but not limited to, transformers and capacitors), PCB-containing oils flushed from transformers, PCB-flushing solutions, and PCB-containing spill materials from buildings or

other aboveground locations in accordance with applicable requirements (such as 40 CFR part 761).

B1.18 Water supply wells

Siting, construction, and operation of additional water supply wells (or replacement wells) within an existing well field, or modification of an existing water supply well to restore production, provided that there would be no drawdown other than in the immediate vicinity of the pumping well, and the covered actions would not have the potential to cause significant long-term decline of the water table, and would not have the potential to cause significant degradation of the aquifer from the new or replacement well.

B1.19 Microwave, meteorological, and radio towers

Siting, construction, modification, operation, and removal of microwave, radio communication, and meteorological towers and associated facilities, provided that the towers and associated facilities would not be in a governmentally designated scenic area (see B(4)(iv) of this appendix) unless otherwise authorized by the appropriate governmental entity.

B1.20 Protection of cultural resources, fish and wildlife habitat

Small-scale activities undertaken to protect cultural resources (such as fencing, labeling, and flagging) or to protect, restore, or improve fish and wildlife habitat, fish passage facilities (such as fish ladders and minor diversion channels), or fisheries. Such activities would be conducted in accordance with an existing natural or cultural resource plan, if any.

B1.21 Noise abatement

Noise abatement measures (including, but not limited to, construction of noise barriers and installation of noise control materials).

B1.22 Relocation of buildings

Relocation of buildings (including, but not limited to, trailers and prefabricated buildings) to an already developed area (where active utilities and currently used roads are readily accessible).

B1.23 Demolition and disposal of buildings

Demolition and subsequent disposal of buildings, equipment, and support structures (including, but not limited to, smoke stacks and parking lot surfaces), provided that there would be no potential for release of substances at a level, or in a form, that could pose a threat to public health or the environment.

Department of Energy

Pt. 1021, Subpt. D, App. B

B1.24 Property transfers

Transfer, lease, disposition, or acquisition of interests in personal property (including, but not limited to, equipment and materials) or real property (including, but not limited to, permanent structures and land), provided that under reasonably foreseeable uses (1) there would be no potential for release of substances at a level, or in a form, that could pose a threat to public health or the environment and (2) the covered actions would not have the potential to cause a significant change in impacts from before the transfer, lease, disposition, or acquisition of interests.

B1.25 Real property transfers for cultural resources protection, habitat preservation, and wildlife management

Transfer, lease, disposition, or acquisition of interests in land and associated buildings for cultural resources protection, habitat preservation, or fish and wildlife management, provided that there would be no potential for release of substances at a level, or in a form, that could pose a threat to public health or the environment.

B1.26 Small water treatment facilities

Siting, construction, expansion, modification, replacement, operation, and decommissioning of small (total capacity less than approximately 250,000 gallons per day) wastewater and surface water treatment facilities whose liquid discharges are externally regulated, and small potable water and sewage treatment facilities.

B1.27 Disconnection of utilities

Activities that are required for the disconnection of utility services (including, but not limited to, water, steam, telecommunications, and electrical power) after it has been determined that the continued operation of these systems is not needed for safety.

B1.28 Placing a facility in an environmentally safe condition

Minor activities that are required to place a facility in an environmentally safe condition where there is no proposed use for the facility. These activities would include, but are not limited to, reducing surface contamination, and removing materials, equipment or waste (such as final defueling of a reactor, where there are adequate existing facilities for the treatment, storage, or disposal of the materials, equipment or waste). These activities would not include conditioning, treatment, or processing of spent nuclear fuel, high-level waste, or special nuclear materials.

B1.29 Disposal facilities for construction and demolition waste

Siting, construction, expansion, modification, operation, and decommissioning of small (less than approximately 10 acres) solid waste disposal facilities for construction and demolition waste, in accordance with applicable requirements (such as 40 CFR part 257, "Criteria for Classification of Solid Waste Disposal Facilities and Practices," and 40 CFR part 61, "National Emission Standards for Hazardous Air Pollutants") that would not release substances at a level, or in a form, that could pose a threat to public health or the environment.

B1.30 Transfer actions

Transfer actions, in which the predominant activity is transportation, provided that (1) the receipt and storage capacity and management capability for the amount and type of materials, equipment, or waste to be moved already exists at the receiving site and (2) all necessary facilities and operations at the receiving site are already permitted, licensed, or approved, as appropriate. Such transfers are not regularly scheduled as part of ongoing routine operations.

B1.31 Installation or relocation of machinery and equipment

Installation or relocation and operation of machinery and equipment (including, but not limited to, laboratory equipment, electronic hardware, manufacturing machinery, maintenance equipment, and health and safety equipment), provided that uses of the installed or relocated items are consistent with the general missions of the receiving structure. Covered actions include modifications to an existing building, within or contiguous to a previously disturbed or developed area, that are necessary for equipment installation and relocation. Such modifications would not appreciably increase the footprint or height of the existing building or have the potential to cause significant changes to the type and magnitude of environmental impacts.

B1.32 Traffic flow adjustments

Traffic flow adjustments to existing roads (including, but not limited to, stop sign or traffic light installation, adjusting direction of traffic flow, and adding turning lanes), and road adjustments (including, but not limited to, widening and realignment) that are within an existing right-of-way and consistent with approved land use or transportation improvement plans.

B1.33 Stormwater runoff control

Design, construction, and operation of control practices to reduce stormwater runoff and maintain natural hydrology. Activities

include, but are not limited to, those that reduce impervious surfaces (such as vegetative practices and use of porous pavements), best management practices (such as silt fences, straw wattles, and fiber rolls), and use of green infrastructure or other low impact development practices (such as cisterns and green roofs).

B1.34 Lead-based paint containment, removal, and disposal

Containment, removal, and disposal of lead-based paint in accordance with applicable requirements (such as provisions relating to the certification of removal contractors and technicians at 40 CFR part 745, “Lead-Based Paint Poisoning Prevention In Certain Residential Structures”).

B1.35 Drop-off, collection, and transfer facilities for recyclable materials

Siting, construction, modification, and operation of recycling or compostable material drop-off, collection, and transfer stations on or contiguous to a previously disturbed or developed area and in an area where such a facility would be consistent with existing zoning requirements. The stations would have appropriate facilities and procedures established in accordance with applicable requirements for the handling of recyclable or compostable materials and household hazardous waste (such as paint and pesticides). Except as specified above, the collection of hazardous waste for disposal and the processing of recyclable or compostable materials are not included in this class of actions.

B1.36 Determinations of excess real property

Determinations that real property is excess to the needs of DOE and, in the case of acquired real property, the subsequent reporting of such determinations to the General Services Administration or, in the case of lands withdrawn or otherwise reserved from the public domain, the subsequent filing of a notice of intent to relinquish with the Bureau of Land Management, Department of the Interior. Covered actions would not include disposal of real property.

B2. CATEGORICAL EXCLUSIONS APPLICABLE TO SAFETY AND HEALTH

B2.1 Workplace enhancements

Modifications within or contiguous to an existing structure, in a previously disturbed or developed area, to enhance workplace habitability (including, but not limited to, installation or improvements to lighting, radiation shielding, or heating/ventilating/air conditioning and its instrumentation, and noise reduction).

B2.2 Building and equipment instrumentation

Installation of, or improvements to, building and equipment instrumentation (including, but not limited to, remote control panels, remote monitoring capability, alarm and surveillance systems, control systems to provide automatic shutdown, fire detection and protection systems, water consumption monitors and flow control systems, announcement and emergency warning systems, criticality and radiation monitors and alarms, and safeguards and security equipment).

B2.3 Personnel safety and health equipment

Installation of, or improvements to, equipment for personnel safety and health (including, but not limited to, eye washes, safety showers, radiation monitoring devices, fumehoods, and associated collection and exhaust systems), provided that the covered actions would not have the potential to cause a significant increase in emissions.

B2.4 Equipment qualification

Activities undertaken to (1) qualify equipment for use or improve systems reliability or (2) augment information on safety-related system components. These activities include, but are not limited to, transportation container qualification testing, crane and lift-gear certification or recertification testing, high efficiency particulate air filter testing and certification, stress tests (such as “burn-in” testing of electrical components and leak testing), and calibration of sensors or diagnostic equipment.

B2.5 Facility safety and environmental improvements

Safety and environmental improvements of a facility (including, but not limited to, replacement and upgrade of facility components) that do not result in a significant change in the expected useful life, design capacity, or function of the facility and during which operations may be suspended and then resumed. Improvements include, but are not limited to, replacement/upgrade of control valves, in-core monitoring devices, facility air filtration systems, or substation transformers or capacitors; addition of structural bracing to meet earthquake standards and/or sustain high wind loading; and replacement of aboveground or belowground tanks and related piping, provided that there is no evidence of leakage, based on testing in accordance with applicable requirements (such as 40 CFR part 265, “Interim Status Standards for Owners and Operators of Hazardous Waste Treatment, Storage, and Disposal Facilities” and 40 CFR part 280, “Technical Standards and Corrective Action Requirements for Owners and Operators of Underground Storage Tanks”). These actions do

Department of Energy

Pt. 1021, Subpt. D, App. B

not include rebuilding or modifying substantial portions of a facility (such as replacing a reactor vessel).

B2.6 Recovery of radioactive sealed sources

Recovery of radioactive sealed sources and sealed source-containing devices from domestic or foreign locations provided that (1) the recovered items are transported and stored in compliant containers, and (2) the receiving site has sufficient existing storage capacity and all required licenses, permits, and approvals.

B3. CATEGORICAL EXCLUSIONS APPLICABLE TO SITE CHARACTERIZATION, MONITORING, AND GENERAL RESEARCH

B3.1 Site characterization and environmental monitoring

Site characterization and environmental monitoring (including, but not limited to, siting, construction, modification, operation, and dismantlement and removal or otherwise proper closure (such as of a well) of characterization and monitoring devices, and siting, construction, and associated operation of a small-scale laboratory building or renovation of a room in an existing building for sample analysis). Such activities would be designed in conformance with applicable requirements and use best management practices to limit the potential effects of any resultant ground disturbance. Covered activities include, but are not limited to, site characterization and environmental monitoring under CERCLA and RCRA. (This class of actions excludes activities in aquatic environments. See B3.16 of this appendix for such activities.) Specific activities include, but are not limited to:

(a) Geological, geophysical (such as gravity, magnetic, electrical, seismic, radar, and temperature gradient), geochemical, and engineering surveys and mapping, and the establishment of survey marks. Seismic techniques would not include large-scale reflection or refraction testing;

(b) Installation and operation of field instruments (such as stream-gauging stations or flow-measuring devices, telemetry systems, geochemical monitoring tools, and geophysical exploration tools);

(c) Drilling of wells for sampling or monitoring of groundwater or the vadose (unsaturated) zone, well logging, and installation of water-level recording devices in wells;

(d) Aquifer and underground reservoir response testing;

(e) Installation and operation of ambient air monitoring equipment;

(f) Sampling and characterization of water, soil, rock, or contaminants (such as drilling using truck- or mobile-scale equipment, and modification, use, and plugging of boreholes);

(g) Sampling and characterization of water effluents, air emissions, or solid waste streams;

(h) Installation and operation of meteorological towers and associated activities (such as assessment of potential wind energy resources);

(i) Sampling of flora or fauna; and

(j) Archeological, historic, and cultural resource identification in compliance with 36 CFR part 800 and 43 CFR part 7.

B3.2 Aviation activities

Aviation activities for survey, monitoring, or security purposes that comply with Federal Aviation Administration regulations.

B3.3 Research related to conservation of fish, wildlife, and cultural resources

Field and laboratory research, inventory, and information collection activities that are directly related to the conservation of fish and wildlife resources or to the protection of cultural resources, provided that such activities would not have the potential to cause significant impacts on fish and wildlife habitat or populations or to cultural resources.

B3.4 Transport packaging tests for radioactive or hazardous material

Drop, puncture, water-immersion, thermal, and fire tests of transport packaging for radioactive or hazardous materials to certify that designs meet the applicable requirements (such as 49 CFR 173.411 and 173.412 and 10 CFR 71.73).

B3.5 Tank car tests

Tank car tests under 49 CFR part 179 (including, but not limited to, tests of safety relief devices, pressure regulators, and thermal protection systems).

B3.6 Small-scale research and development, laboratory operations, and pilot projects

Siting, construction, modification, operation, and decommissioning of facilities for small-scale research and development projects; conventional laboratory operations (such as preparation of chemical standards and sample analysis); and small-scale pilot projects (generally less than 2 years) frequently conducted to verify a concept before demonstration actions, provided that construction or modification would be within or contiguous to a previously disturbed or developed area (where active utilities and currently used roads are readily accessible). Not included in this category are demonstration actions, meaning actions that are undertaken at a scale to show whether a technology would be viable on a larger scale and suitable for commercial deployment.

B3.7 New terrestrial infill exploratory and experimental wells

Siting, construction, and operation of new terrestrial infill exploratory and experimental (test) wells, for either extraction or injection use, in a locally characterized geological formation in a field that contains existing operating wells, properly abandoned wells, or unminable coal seams containing natural gas, provided that the site characterization has verified a low potential for seismicity, subsidence, and contamination of freshwater aquifers, and the actions are otherwise consistent with applicable best practices and DOE protocols, including those that protect against uncontrolled releases of harmful materials. Such wells may include those for brine, carbon dioxide, coalbed methane, gas hydrate, geothermal, natural gas, and oil. Uses for carbon sequestration wells include, but are not limited to, the study of saline formations, enhanced oil recovery, and enhanced coalbed methane extraction.

B3.8 Outdoor terrestrial ecological and environmental research

Outdoor terrestrial ecological and environmental research in a small area (generally less than 5 acres), including, but not limited to, siting, construction, and operation of a small-scale laboratory building or renovation of a room in an existing building for associated analysis. Such activities would be designed in conformance with applicable requirements and use best management practices to limit the potential effects of any resultant ground disturbance.

B3.9 Projects to reduce emissions and waste generation

Projects to reduce emissions and waste generation at existing fossil or alternative fuel combustion or utilization facilities, provided that these projects would not have the potential to cause a significant increase in the quantity or rate of air emissions. For this category of actions, “fuel” includes, but is not limited to, coal, oil, natural gas, hydrogen, syngas, and biomass; but “fuel” does not include nuclear fuel. Covered actions include, but are not limited to:

(a) Test treatment of the throughput product (solid, liquid, or gas) generated at an existing and fully operational fuel combustion or utilization facility;

(b) Addition or replacement of equipment for reduction or control of sulfur dioxide, oxides of nitrogen, or other regulated substances that requires only minor modification to the existing structures at an existing fuel combustion or utilization facility, for which the existing use remains essentially unchanged;

(c) Addition or replacement of equipment for reduction or control of sulfur dioxide, ox-

ides of nitrogen, or other regulated substances that involves no permanent change in the quantity or quality of fuel burned or used and involves no permanent change in the capacity factor of the fuel combustion or utilization facility; and

(d) Addition or modification of equipment for capture and control of carbon dioxide or other regulated substances, provided that adequate infrastructure is in place to manage such substances.

B3.10 Particle accelerators

Siting, construction, modification, operation, and decommissioning of particle accelerators, including electron beam accelerators, with primary beam energy less than approximately 100 million electron volts (MeV) and average beam power less than approximately 250 kilowatts (kW), and associated beamlines, storage rings, colliders, and detectors, for research and medical purposes (such as proton therapy), and isotope production, within or contiguous to a previously disturbed or developed area (where active utilities and currently used roads are readily accessible), or internal modification of any accelerator facility regardless of energy, that does not increase primary beam energy or current. In cases where the beam energy exceeds 100 MeV, the average beam power must be less than 250 kW, so as not to exceed an average current of 2.5 milliamperes (mA).

B3.11 Outdoor tests and experiments on materials and equipment components

Outdoor tests and experiments for the development, quality assurance, or reliability of materials and equipment (including, but not limited to, weapon system components) under controlled conditions. Covered actions include, but are not limited to, burn tests (such as tests of electric cable fire resistance or the combustion characteristics of fuels), impact tests (such as pneumatic ejector tests using earthen embankments or concrete slabs designated and routinely used for that purpose), or drop, puncture, water-immersion, or thermal tests. Covered actions would not involve source, special nuclear, or byproduct materials, except encapsulated sources manufactured to applicable standards that contain source, special nuclear, or byproduct materials may be used for non-destructive actions such as detector/sensor development and testing and first responder field training.

B3.12 Microbiological and biomedical facilities

Siting, construction, modification, operation, and decommissioning of microbiological and biomedical diagnostic, treatment and research facilities (excluding Biosafety Level-3 and Biosafety Level-4), in accordance with applicable requirements and

Department of Energy

Pt. 1021, Subpt. D, App. B

best practices (such as Biosafety in Microbiological and Biomedical Laboratories, 5th Edition, Dec. 2009, U.S. Department of Health and Human Services) including, but not limited to, laboratories, treatment areas, offices, and storage areas, within or contiguous to a previously disturbed or developed area (where active utilities and currently used roads are readily accessible). Operation may include the purchase, installation, and operation of biomedical equipment (such as commercially available cyclotrons that are used to generate radioisotopes and radiopharmaceuticals, and commercially available biomedical imaging and spectroscopy instrumentation).

B3.13 Magnetic fusion experiments

Performing magnetic fusion experiments that do not use tritium as fuel, within existing facilities (including, but not limited to, necessary modifications).

B3.14 Small-scale educational facilities

Siting, construction, modification, operation, and decommissioning of small-scale educational facilities (including, but not limited to, conventional teaching laboratories, libraries, classroom facilities, auditoriums, museums, visitor centers, exhibits, and associated offices) within or contiguous to a previously disturbed or developed area (where active utilities and currently used roads are readily accessible). Operation may include, but is not limited to, purchase, installation, and operation of equipment (such as audio/visual and laboratory equipment) commensurate with the educational purpose of the facility.

B3.15 Small-scale indoor research and development projects using nanoscale materials

Siting, construction, modification, operation, and decommissioning of facilities for indoor small-scale research and development projects and small-scale pilot projects using nanoscale materials in accordance with applicable requirements (such as engineering, worker safety, procedural, and administrative regulations) necessary to ensure the containment of any hazardous materials. Construction and modification activities would be within or contiguous to a previously disturbed or developed area (where active utilities and currently used roads are readily accessible).

B3.16 Research activities in aquatic environments

Small-scale, temporary surveying, site characterization, and research activities in aquatic environments, limited to:

- (a) Acquisition of rights-of-way, easements, and temporary use permits;
- (b) Installation, operation, and removal of passive scientific measurement devices, in-

cluding, but not limited to, antennae, tide gauges, flow testing equipment for existing wells, weighted hydrophones, salinity measurement devices, and water quality measurement devices;

(c) Natural resource inventories, data and sample collection, environmental monitoring, and basic and applied research, excluding (1) large-scale vibratory coring techniques and (2) seismic activities other than passive techniques; and

(d) Surveying and mapping.

These activities would be conducted in accordance with, where applicable, an approved spill prevention, control, and response plan and would incorporate appropriate control technologies and best management practices. None of the activities listed above would occur within the boundary of an established marine sanctuary or wildlife refuge, a governmentally proposed marine sanctuary or wildlife refuge, or a governmentally recognized area of high biological sensitivity, unless authorized by the agency responsible for such refuge, sanctuary, or area (or after consultation with the responsible agency, if no authorization is required). If the proposed activities would occur outside such refuge, sanctuary, or area and if the activities would have the potential to cause impacts within such refuge, sanctuary, or area, then the responsible agency shall be consulted in order to determine whether authorization is required and whether such activities would have the potential to cause significant impacts on such refuge, sanctuary, or area. Areas of high biological sensitivity include, but are not limited to, areas of known ecological importance, whale and marine mammal mating and calving/pupping areas, and fish and invertebrate spawning and nursery areas recognized as being limited or unique and vulnerable to perturbation; these areas can occur in bays, estuaries, near shore, and far offshore, and may vary seasonally. No permanent facilities or devices would be constructed or installed. Covered actions do not include drilling of resource exploration or extraction wells.

B4. CATEGORICAL EXCLUSIONS APPLICABLE TO ELECTRICAL POWER AND TRANSMISSION

B4.1 Contracts, policies, and marketing and allocation plans for electric power

Establishment and implementation of contracts, policies, and marketing and allocation plans related to electric power acquisition that involve only the use of the existing transmission system and existing generation resources operating within their normal operating limits.

B4.2 Export of electric energy

Export of electric energy as provided by Section 202(e) of the Federal Power Act over existing transmission systems or using

transmission system changes that are themselves categorically excluded.

B4.3 Electric power marketing rate changes

Rate changes for electric power, power transmission, and other products or services provided by a Power Marketing Administration that are based on a change in revenue requirements if the operations of generation projects would remain within normal operating limits.

B4.4 Power marketing services and activities

Power marketing services and power management activities (including, but not limited to, storage, load shaping and balancing, seasonal exchanges, and other similar activities), provided that the operations of generating projects would remain within normal operating limits.

B4.5 Temporary adjustments to river operations

Temporary adjustments to river operations to accommodate day-to-day river fluctuations, power demand changes, fish and wildlife conservation program requirements, and other external events, provided that the adjustments would occur within the existing operating constraints of the particular hydrosystem operation.

B4.6 Additions and modifications to transmission facilities

Additions or modifications to electric power transmission facilities within a previously disturbed or developed facility area. Covered activities include, but are not limited to, switchyard rock grounding upgrades, secondary containment projects, paving projects, seismic upgrading, tower modifications, load shaping projects (such as the installation and use of flywheels and battery arrays), changing insulators, and replacement of poles, circuit breakers, conductors, transformers, and crossarms.

B4.7 Fiber optic cable

Adding fiber optic cables to transmission facilities or burying fiber optic cable in existing powerline or pipeline rights-of-way. Covered actions may include associated vaults and pulling and tensioning sites outside of rights-of-way in nearby previously disturbed or developed areas.

B4.8 Electricity transmission agreements

New electricity transmission agreements, and modifications to existing transmission arrangements, to use a transmission facility of one system to transfer power of and for another system, provided that no new generation projects would be involved and no physical changes in the transmission system would be made beyond the previously disturbed or developed facility area.

B4.9 Multiple use of powerline rights-of-way

Granting or denying requests for multiple uses of a transmission facility's rights-of-way (including, but not limited to, grazing permits and crossing agreements for electric lines, water lines, natural gas pipelines, communications cables, roads, and drainage culverts).

B4.10 Removal of electric transmission facilities

Deactivation, dismantling, and removal of electric transmission facilities (including, but not limited to, electric powerlines, substations, and switching stations) and abandonment and restoration of rights-of-way (including, but not limited to, associated access roads).

B4.11 Electric power substations and interconnection facilities

Construction or modification of electric power substations or interconnection facilities (including, but not limited to, switching stations and support facilities).

B4.12 Construction of powerlines

Construction of electric powerlines approximately 10 miles in length or less, or approximately 20 miles in length or less within previously disturbed or developed powerline or pipeline rights-of-way.

B4.13 Upgrading and rebuilding existing powerlines

Upgrading or rebuilding approximately 20 miles in length or less of existing electric powerlines, which may involve minor relocations of small segments of the powerlines.

B5. CATEGORICAL EXCLUSIONS APPLICABLE TO CONSERVATION, FOSSIL, AND RENEWABLE ENERGY ACTIVITIES

B5.1 Actions to conserve energy or water

(a) Actions to conserve energy or water, demonstrate potential energy or water conservation, and promote energy efficiency that would not have the potential to cause significant changes in the indoor or outdoor concentrations of potentially harmful substances. These actions may involve financial and technical assistance to individuals (such as builders, owners, consultants, manufacturers, and designers), organizations (such as utilities), and governments (such as state, local, and tribal). Covered actions include, but are not limited to weatherization (such as insulation and replacing windows and doors); programmed lowering of thermostat settings; placement of timers on hot water heaters; installation or replacement of energy efficient lighting, low-flow plumbing fixtures (such as faucets, toilets, and showerheads), heating, ventilation, and air

Department of Energy

Pt. 1021, Subpt. D, App. B

conditioning systems, and appliances; installation of drip-irrigation systems; improvements in generator efficiency and appliance efficiency ratings; efficiency improvements for vehicles and transportation (such as fleet changeout); power storage (such as flywheels and batteries, generally less than 10 megawatt equivalent); transportation management systems (such as traffic signal control systems, car navigation, speed cameras, and automatic plate number recognition); development of energy-efficient manufacturing, industrial, or building practices; and small-scale energy efficiency and conservation research and development and small-scale pilot projects. Covered actions include building renovations or new structures, provided that they occur in a previously disturbed or developed area. Covered actions could involve commercial, residential, agricultural, academic, institutional, or industrial sectors. Covered actions do not include rulemakings, standard-settings, or proposed DOE legislation, except for those actions listed in B5.1(b) of this appendix.

(b) Covered actions include rulemakings that establish energy conservation standards for consumer products and industrial equipment, provided that the actions would not: (1) Have the potential to cause a significant change in manufacturing infrastructure (such as construction of new manufacturing plants with considerable associated ground disturbance); (2) involve significant unresolved conflicts concerning alternative uses of available resources (such as rare or limited raw materials); (3) have the potential to result in a significant increase in the disposal of materials posing significant risks to human health and the environment (such as RCRA hazardous wastes); or (4) have the potential to cause a significant increase in energy consumption in a state or region.

B5.2 Modifications to pumps and piping

Modifications to existing pump and piping configurations (including, but not limited to, manifolds, metering systems, and other instrumentation on such configurations conveying materials such as air, brine, carbon dioxide, geothermal system fluids, hydrogen gas, natural gas, nitrogen gas, oil, produced water, steam, and water). Covered modifications would not have the potential to cause significant changes to design process flow rates or permitted air emissions.

B5.3 Modification or abandonment of wells

Modification (but not expansion) or plugging and abandonment of wells, provided that site characterization has verified a low potential for seismicity, subsidence, and contamination of freshwater aquifers, and the actions are otherwise consistent with best practices and DOE protocols, including those that protect against uncontrolled releases of

harmful materials. Such wells may include, but are not limited to, storage and injection wells for brine, carbon dioxide, coalbed methane, gas hydrate, geothermal, natural gas, and oil. Covered modifications would not be part of site closure.

B5.4 Repair or replacement of pipelines

Repair, replacement, upgrading, rebuilding, or minor relocation of pipelines within existing rights-of-way, provided that the actions are in accordance with applicable requirements (such as Army Corps of Engineers permits under section 404 of the Clean Water Act). Pipelines may convey materials including, but not limited to, air, brine, carbon dioxide, geothermal system fluids, hydrogen gas, natural gas, nitrogen gas, oil, produced water, steam, and water.

B5.5 Short pipeline segments

Construction and subsequent operation of short (generally less than 20 miles in length) pipeline segments conveying materials (such as air, brine, carbon dioxide, geothermal system fluids, hydrogen gas, natural gas, nitrogen gas, oil, produced water, steam, and water) between existing source facilities and existing receiving facilities (such as facilities for use, reuse, transportation, storage, and refining), provided that the pipeline segments are within previously disturbed or developed rights-of-way.

B5.6 Oil spill cleanup

Removal of oil and contaminated materials recovered in oil spill cleanup operations and disposal of these materials in accordance with applicable requirements (such as the National Oil and Hazardous Substances Pollution Contingency Plan).

B5.7 Import or export natural gas, with operational changes

Approvals or disapprovals of new authorizations or amendments of existing authorizations to import or export natural gas under section 3 of the Natural Gas Act that involve minor operational changes (such as changes in natural gas throughput, transportation, and storage operations) but not new construction.

B5.8 Import or export natural gas, with new cogeneration powerplant

Approvals or disapprovals of new authorizations or amendments of existing authorizations to import or export natural gas under section 3 of the Natural Gas Act that involve new cogeneration powerplants (as defined in the Powerplant and Industrial Fuel Use Act of 1978, as amended) within or contiguous to an existing industrial complex and requiring generally less than 10 miles of new natural gas pipeline or 20 miles within

previously disturbed or developed rights-of-way.

B5.9 Temporary exemptions for electric powerplants

Grants or denials of temporary exemptions under the Powerplant and Industrial Fuel Use Act of 1978, as amended, for electric powerplants.

B5.10 Certain permanent exemptions for existing electric powerplants

For existing electric powerplants, grants or denials of permanent exemptions under the Powerplant and Industrial Fuel Use Act of 1978, as amended, other than exemptions under section 312(c) relating to cogeneration and section 312(b) relating to certain state or local requirements.

B5.11 Permanent exemptions allowing mixed natural gas and petroleum

For new electric powerplants, grants or denials of permanent exemptions from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978, as amended, to permit the use of certain fuel mixtures containing natural gas or petroleum.

B5.12 Workover of existing wells

Workover (operations to restore production, such as deepening, plugging back, pulling and resetting lines, and squeeze cementing) of existing wells (including, but not limited to, activities associated with brine, carbon dioxide, coalbed methane, gas hydrate, geothermal, natural gas, and oil) to restore functionality, provided that workover operations are restricted to the existing wellpad and do not involve any new site preparation or earthwork that would have the potential to cause significant impacts on nearby habitat; that site characterization has verified a low potential for seismicity, subsidence, and contamination of freshwater aquifers; and the actions are otherwise consistent with best practices and DOE protocols, including those that protect against uncontrolled releases of harmful materials.

B5.13 Experimental wells for injection of small quantities of carbon dioxide

Siting, construction, operation, plugging, and abandonment of experimental wells for the injection of small quantities of carbon dioxide (and other incidentally co-captured gases) in locally characterized, geologically secure storage formations at or near existing carbon dioxide sources to determine the suitability of the formations for large-scale sequestration, provided that (1) The characterization has verified a low potential for seismicity, subsidence, and contamination of freshwater aquifers; (2) the wells are otherwise in accordance with applicable requirements, best practices, and DOE protocols, in-

cluding those that protect against uncontrolled releases of harmful materials; and (3) the wells and associated drilling activities are sufficiently remote so that they would not have the potential to cause significant impacts related to noise and other vibrations. Wells may be used for enhanced oil or natural gas recovery or for secure storage of carbon dioxide in saline formations or other secure formations. Over the duration of a project, the wells would be used to inject, in aggregate, less than 500,000 tons of carbon dioxide into the geologic formation. Covered actions exclude activities in aquatic environments. (See B3.16 of this appendix for activities in aquatic environments.)

B5.14 Combined heat and power or cogeneration systems

Conversion to, replacement of, or modification of combined heat and power or cogeneration systems (the sequential or simultaneous production of multiple forms of energy, such as thermal and electrical energy, in a single integrated system) at existing facilities, provided that the conversion, replacement, or modification would not have the potential to cause a significant increase in the quantity or rate of air emissions and would not have the potential to cause significant impacts to water resources.

B5.15 Small-scale renewable energy research and development and pilot projects

Small-scale renewable energy research and development projects and small-scale pilot projects, provided that the projects are located within a previously disturbed or developed area. Covered actions would be in accordance with applicable requirements (such as local land use and zoning requirements) in the proposed project area and would incorporate appropriate control technologies and best management practices.

B5.16 Solar photovoltaic systems

The installation, modification, operation, and removal of commercially available solar photovoltaic systems located on a building or other structure (such as rooftop, parking lot or facility, and mounted to signage, lighting, gates, or fences), or if located on land, generally comprising less than 10 acres within a previously disturbed or developed area. Covered actions would be in accordance with applicable requirements (such as local land use and zoning requirements) in the proposed project area and would incorporate appropriate control technologies and best management practices.

B5.17 Solar thermal systems

The installation, modification, operation, and removal of commercially available

Department of Energy

Pt. 1021, Subpt. D, App. B

small-scale solar thermal systems (including, but not limited to, solar hot water systems) located on or contiguous to a building, and if located on land, generally comprising less than 10 acres within a previously disturbed or developed area. Covered actions would be in accordance with applicable requirements (such as local land use and zoning requirements) in the proposed project area and would incorporate appropriate control technologies and best management practices.

B5.18 Wind turbines

The installation, modification, operation, and removal of a small number (generally not more than 2) of commercially available wind turbines, with a total height generally less than 200 feet (measured from the ground to the maximum height of blade rotation) that (1) Are located within a previously disturbed or developed area; (2) are located more than 10 nautical miles (about 11.5 miles) from an airport or aviation navigation aid; (3) are located more than 1.5 nautical miles (about 1.7 miles) from National Weather Service or Federal Aviation Administration Doppler weather radar; (4) would not have the potential to cause significant impacts on bird or bat populations; and (5) are sited or designed such that the project would not have the potential to cause significant impacts to persons (such as from shadow flicker and other visual effects, and noise). Covered actions would be in accordance with applicable requirements (such as local land use and zoning requirements) in the proposed project area and would incorporate appropriate control technologies and best management practices. Covered actions include only those related to wind turbines to be installed on land.

B5.19 Ground source heat pumps

The installation, modification, operation, and removal of commercially available small-scale ground source heat pumps to support operations in single facilities (such as a school or community center) or contiguous facilities (such as an office complex) (1) Only where (a) major associated activities (such as drilling and discharge) are regulated, and (b) appropriate leakage and contaminant control measures would be in place (including for cross-contamination between aquifers); (2) that would not have the potential to cause significant changes in subsurface temperature; and (3) would be located within a previously disturbed or developed area. Covered actions would be in accordance with applicable requirements (such as local land use and zoning requirements) in the proposed project area and would incorporate appropriate control technologies and best management practices.

B5.20 Biomass power plants

The installation, modification, operation, and removal of small-scale biomass power plants (generally less than 10 megawatts), using commercially available technology (1) Intended primarily to support operations in single facilities (such as a school and community center) or contiguous facilities (such as an office complex); (2) that would not affect the air quality attainment status of the area and would not have the potential to cause a significant increase in the quantity or rate of air emissions and would not have the potential to cause significant impacts to water resources; and (3) would be located within a previously disturbed or developed area. Covered actions would be in accordance with applicable requirements (such as local land use and zoning requirements) in the proposed project area and would incorporate appropriate control technologies and best management practices.

B5.21 Methane gas recovery and utilization systems

The installation, modification, operation, and removal of commercially available methane gas recovery and utilization systems installed within a previously disturbed or developed area on or contiguous to an existing landfill or wastewater treatment plant that would not have the potential to cause a significant increase in the quantity or rate of air emissions. Covered actions would be in accordance with applicable requirements (such as local land use and zoning requirements) in the proposed project area and would incorporate appropriate control technologies and best management practices.

B5.22 Alternative fuel vehicle fueling stations

The installation, modification, operation, and removal of alternative fuel vehicle fueling stations (such as for compressed natural gas, hydrogen, ethanol and other commercially available biofuels) on the site of a current or former fueling station, or within a previously disturbed or developed area within the boundaries of a facility managed by the owners of a vehicle fleet. Covered actions would be in accordance with applicable requirements (such as local land use and zoning requirements) in the proposed project area and would incorporate appropriate control technologies and best management practices.

B5.23 Electric vehicle charging stations

The installation, modification, operation, and removal of electric vehicle charging stations, using commercially available technology, within a previously disturbed or developed area. Covered actions are limited to areas where access and parking are in accordance with applicable requirements (such

as local land use and zoning requirements) in the proposed project area and would incorporate appropriate control technologies and best management practices.

B5.24 Drop-in hydroelectric systems

The installation, modification, operation, and removal of commercially available small-scale, drop-in, run-of-the-river hydroelectric systems that would (1) Involve no water storage or water diversion from the stream or river channel where the system is installed and (2) not have the potential to cause significant impacts on water quality, temperature, flow, or volume. Covered systems would be located up-gradient of an existing anadromous fish barrier that is not planned for removal and where fish passage retrofit is not planned and where there would not be the potential for significant impacts to threatened or endangered species or other species of concern (as identified in B(4)(ii) of this appendix). Covered actions would involve no major construction or modification of stream or river channels, and the hydroelectric systems would be placed and secured in the channel without the use of heavy equipment. Covered actions would be in accordance with applicable requirements (such as local land use and zoning requirements) in the proposed project area and would incorporate appropriate control technologies and best management practices.

B5.25 Small-scale renewable energy research and development and pilot projects in aquatic environments

Small-scale renewable energy research and development projects and small-scale pilot projects located in aquatic environments. Activities would be in accordance with, where applicable, an approved spill prevention, control, and response plan, and would incorporate appropriate control technologies and best management practices. Covered actions would not occur (1) Within areas of hazardous natural bottom conditions or (2) within the boundary of an established marine sanctuary or wildlife refuge, a governmentally proposed marine sanctuary or wildlife refuge, or a governmentally recognized area of high biological sensitivity, unless authorized by the agency responsible for such refuge, sanctuary, or area (or after consultation with the responsible agency, if no authorization is required). If the proposed activities would occur outside such refuge, sanctuary, or area and if the activities would have the potential to cause impacts within such refuge, sanctuary, or area, then the responsible agency shall be consulted in order to determine whether authorization is required and whether such activities would have the potential to cause significant impacts on such refuge, sanctuary, or area. Areas of high biological sensitivity include,

but are not limited to, areas of known ecological importance, whale and marine mammal mating and calving/pupping areas, and fish and invertebrate spawning and nursery areas recognized as being limited or unique and vulnerable to perturbation; these areas can occur in bays, estuaries, near shore, and far offshore, and may vary seasonally. No permanent facilities or devices would be constructed or installed. Covered actions do not include drilling of resource exploration or extraction wells, use of large-scale vibratory coring techniques, or seismic activities other than passive techniques.

B6. CATEGORICAL EXCLUSIONS APPLICABLE TO ENVIRONMENTAL RESTORATION AND WASTE MANAGEMENT ACTIVITIES

B6.1 Cleanup actions

Small-scale, short-term cleanup actions, under RCRA, Atomic Energy Act, or other authorities, less than approximately 10 million dollars in cost (in 2011 dollars), to reduce risk to human health or the environment from the release or threat of release of a hazardous substance other than high-level radioactive waste and spent nuclear fuel, including treatment (such as incineration, encapsulation, physical or chemical separation, and compaction), recovery, storage, or disposal of wastes at existing facilities currently handling the type of waste involved in the action. These actions include, but are not limited to:

(a) Excavation or consolidation of contaminated soils or materials from drainage channels, retention basins, ponds, and spill areas that are not receiving contaminated surface water or wastewater, if surface water or groundwater would not collect and if such actions would reduce the spread of, or direct contact with, the contamination;

(b) Removal of bulk containers (such as drums and barrels) that contain or may contain hazardous substances, pollutants, contaminants, CERCLA-excluded petroleum or natural gas products, or hazardous wastes (designated in 40 CFR part 261 or applicable state requirements), if such actions would reduce the likelihood of spillage, leakage, fire, explosion, or exposure to humans, animals, or the food chain;

(c) Removal of an underground storage tank including its associated piping and underlying containment systems in accordance with applicable requirements (such as RCRA, subtitle I; 40 CFR part 265, subpart J; and 40 CFR part 280, subparts F and G) if such action would reduce the likelihood of spillage, leakage, or the spread of, or direct contact with, contamination;

(d) Repair or replacement of leaking containers;

(e) Capping or other containment of contaminated soils or sludges if the capping or containment would not unduly limit future

Department of Energy

Pt. 1021, Subpt. D, App. B

groundwater remediation and if needed to reduce migration of hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products into soil, groundwater, surface water, or air;

(f) Drainage or closing of man-made surface impoundments if needed to maintain the integrity of the structures;

(g) Confinement or perimeter protection using dikes, trenches, ditches, or diversions, or installing underground barriers, if needed to reduce the spread of, or direct contact with, the contamination;

(h) Stabilization, but not expansion, of berms, dikes, impoundments, or caps if needed to maintain integrity of the structures;

(i) Drainage controls (such as run-off or run-on diversion) if needed to reduce offsite migration of hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum or natural gas products or to prevent precipitation or run-off from other sources from entering the release area from other areas;

(j) Segregation of wastes that may react with one another or form a mixture that could result in adverse environmental impacts;

(k) Use of chemicals and other materials to neutralize the pH of wastes;

(l) Use of chemicals and other materials to retard the spread of the release or to mitigate its effects if the use of such chemicals would reduce the spread of, or direct contact with, the contamination;

(m) Installation and operation of gas ventilation systems in soil to remove methane or petroleum vapors without any toxic or radioactive co-contaminants if appropriate filtration or gas treatment is in place;

(n) Installation of fences, warning signs, or other security or site control precautions if humans or animals have access to the release; and

(o) Provision of an alternative water supply that would not create new water sources if necessary immediately to reduce exposure to contaminated household or industrial use water and continuing until such time as local authorities can satisfy the need for a permanent remedy.

B6.2 Waste collection, treatment, stabilization, and containment facilities

The siting, construction, and operation of temporary (generally less than 2 years) pilot-scale waste collection and treatment facilities, and pilot-scale (generally less than 1 acre) waste stabilization and containment facilities (including siting, construction, and operation of a small-scale laboratory building or renovation of a room in an existing building for sample analysis), provided that the action (1) Supports remedial investigations/feasibility studies under CERCLA, or similar studies under RCRA (such as RCRA facility investigations/corrective measure

studies) or other authorities and (2) would not unduly limit the choice of reasonable remedial alternatives (such as by permanently altering substantial site area or by committing large amounts of funds relative to the scope of the remedial alternatives).

B6.3 Improvements to environmental control systems

Improvements to environmental monitoring and control systems of an existing building or structure (such as changes to scrubbers in air quality control systems or ion-exchange devices and other filtration processes in water treatment systems), provided that during subsequent operations (1) Any substance collected by the environmental control systems would be recycled, released, or disposed of within existing permitted facilities and (2) there are applicable statutory or regulatory requirements or permit conditions for disposal, release, or recycling of any hazardous substance or CERCLA-excluded petroleum or natural gas products that are collected or released in increased quantity or that were not previously collected or released.

B6.4 Facilities for storing packaged hazardous waste for 90 days or less

Siting, construction, modification, expansion, operation, and decommissioning of an onsite facility for storing packaged hazardous waste (as designated in 40 CFR part 261) for 90 days or less or for longer periods as provided in 40 CFR 262.34(d), (e), or (f) (such as accumulation or satellite areas).

B6.5 Facilities for characterizing and sorting packaged waste and overpacking waste

Siting, construction, modification, expansion, operation, and decommissioning of an onsite facility for characterizing and sorting previously packaged waste or for overpacking waste, other than high-level radioactive waste, provided that operations do not involve unpacking waste. These actions do not include waste storage (covered under B6.4, B6.6, B6.10 of this appendix, and C16 of appendix C) or the handling of spent nuclear fuel.

B6.6 Modification of facilities for storing, packaging, and repacking waste

Modification (excluding increases in capacity) of an existing structure used for storing, packaging, or repacking waste other than high-level radioactive waste or spent nuclear fuel, to handle the same class of waste as currently handled at that structure.

Pt. 1021, Subpt. D, App. C

B6.7 [Reserved]

B6.8 Modifications for waste minimization and reuse of materials

Minor operational changes at an existing facility to minimize waste generation and for reuse of materials. These changes include, but are not limited to, adding filtration and recycle piping to allow reuse of machining oil, setting up a sorting area to improve process efficiency, and segregating two waste streams previously mingled and assigning new identification codes to the two resulting wastes.

B6.9 Measures to reduce migration of contaminated groundwater

Small-scale temporary measures to reduce migration of contaminated groundwater, including the siting, construction, operation, and decommissioning of necessary facilities. These measures include, but are not limited to, pumping, treating, storing, and re-injecting water, by mobile units or facilities that are built and then removed at the end of the action.

B6.10 Upgraded or replacement waste storage facilities

Siting, construction, modification, expansion, operation, and decommissioning of a small upgraded or replacement facility (less than approximately 50,000 square feet in area) within or contiguous to a previously disturbed or developed area (where active utilities and currently used roads are readily accessible) for storage of waste that is already at the site at the time the storage capacity is to be provided. These actions do not include the storage of high-level radioactive waste, spent nuclear fuel or any waste that requires special precautions to prevent nuclear criticality. (See also B6.4, B6.5, B6.6 of this appendix, and C16 of appendix C.)

B7. CATEGORICAL EXCLUSIONS APPLICABLE TO INTERNATIONAL ACTIVITIES

B7.1 Emergency measures under the International Energy Program

Planning and implementation of emergency measures pursuant to the International Energy Program.

B7.2 Import and export of special nuclear or isotopic materials

Approval of import or export of small quantities of special nuclear materials or isotopic materials in accordance with applicable requirements (such as the Nuclear Non-Proliferation Act of 1978 and the "Procedures Established Pursuant to the Nuclear Non-Proliferation Act of 1978" (43 FR 25326, June 9, 1978)).

10 CFR Ch. X (1-1-16 Edition)

APPENDIX C TO SUBPART D OF PART 1021—CLASSES OF ACTIONS THAT NORMALLY REQUIRE EAS BUT NOT NECESSARILY EISS

TABLE OF CONTENTS

C1 [Reserved]
C2 [Reserved]
C3 Electric Power Marketing Rate Changes, Not Within Normal Operating Limits
C4 Upgrading, Rebuilding, or Construction of Powerlines
C5 Vegetation Management Program
C6 Erosion Control Program
C7 Contracts, Policies, and Marketing and Allocation Plans for Electric Power
C8 Protection of Cultural Resources and Fish and Wildlife Habitat
C9 Wetlands Demonstration Projects
C10 [Reserved]
C11 Particle Acceleration Facilities
C12 Energy System Demonstration Actions
C13 Import or Export Natural Gas Involving Minor New Construction
C14 Water Treatment Facilities
C15 Research and Development Incinerators and Nonhazardous Waste Incinerators
C16 Large Waste Packaging and Storage Facilities

C1 [RESERVED]

C2 [RESERVED]

C3 ELECTRIC POWER MARKETING RATE CHANGES, NOT WITHIN NORMAL OPERATING LIMITS

Rate changes for electric power, power transmission, and other products or services provided by Power Marketing Administrations that are based on changes in revenue requirements if the operations of generation projects would not remain within normal operating limits.

C4 UPGRADING, REBUILDING, OR CONSTRUCTION OF POWERLINES

Upgrading or rebuilding more than approximately 20 miles in length of existing powerlines; or construction of powerlines (1) More than approximately 10 miles in length outside previously disturbed or developed powerline or pipeline rights-of-way or (2) more than approximately 20 miles in length within previously disturbed or developed powerline or pipeline rights-of-way.

C5 VEGETATION MANAGEMENT PROGRAM

Implementation of a Power Marketing Administration system-wide vegetation management program.

C6 EROSION CONTROL PROGRAM

Implementation of a Power Marketing Administration system-wide erosion control program.

Department of Energy

Pt. 1021, Subpt. D, App. D

C7 CONTRACTS, POLICIES, AND MARKETING AND ALLOCATION PLANS FOR ELECTRIC POWER

Establishment and implementation of contracts, policies, and marketing and allocation plans related to electric power acquisition that involve (1) The interconnection of, or acquisition of power from, new generation resources that are equal to or less than 50 average megawatts; (2) changes in the normal operating limits of generation resources equal to or less than 50 average megawatts; or (3) service to discrete new loads of less than 10 average megawatts over a 12-month period.

C8 PROTECTION OF CULTURAL RESOURCES AND FISH AND WILDLIFE HABITAT

Large-scale activities undertaken to protect cultural resources (such as fencing, labeling, and flagging) or to protect, restore, or improve fish and wildlife habitat, fish passage facilities (such as fish ladders and minor diversion channels), or fisheries.

C9 WETLANDS DEMONSTRATION PROJECTS

Field demonstration projects for wetlands mitigation, creation, and restoration.

C10 [RESERVED]

C11 PARTICLE ACCELERATION FACILITIES

Siting, construction or modification, operation, and decommissioning of low- or medium-energy (when the primary beam energy exceeds approximately 100 million electron volts and the average beam power exceeds approximately 250 kilowatts or where the average current exceeds 2.5 milliamperes) particle acceleration facilities, including electron beam acceleration facilities, and associated beamlines, storage rings, colliders, and detectors for research and medical purposes, within or contiguous to a previously disturbed or developed area (where active utilities and currently used roads are readily accessible).

C12 ENERGY SYSTEM DEMONSTRATION ACTIONS

Siting, construction, operation, and decommissioning of energy system demonstration actions (including, but not limited to, wind resource, hydropower, geothermal, fossil fuel, biomass, and solar energy, but excluding nuclear). For purposes of this category, "demonstration actions" means actions that are undertaken at a scale to show whether a technology would be viable on a larger scale and suitable for commercial deployment.

C13 IMPORT OR EXPORT NATURAL GAS INVOLVING MINOR NEW CONSTRUCTION

Approvals or disapprovals of authorizations to import or export natural gas under section 3 of the Natural Gas Act involving

minor new construction (such as adding new connections, looping, or compression to an existing natural gas or liquefied natural gas pipeline, or converting an existing oil pipeline to a natural gas pipeline using the same right-of-way).

C14 WATER TREATMENT FACILITIES

Siting, construction (or expansion), operation, and decommissioning of wastewater, surface water, potable water, and sewage treatment facilities with a total capacity greater than approximately 250,000 gallons per day, and of lower capacity wastewater and surface water treatment facilities whose liquid discharges are not subject to external regulation.

C15 RESEARCH AND DEVELOPMENT INCINERATORS AND NONHAZARDOUS WASTE INCINERATORS

Siting, construction (or expansion), operation, and decommissioning of research and development incinerators for any type of waste and of any other incinerators that would treat nonhazardous solid waste (as designated in 40 CFR 261.4(b)).

C16 LARGE WASTE PACKAGING AND STORAGE FACILITIES

Siting, construction, modification to increase capacity, operation, and decommissioning of packaging and unpacking facilities (such as characterization operations) and large storage facilities (greater than approximately 50,000 square feet in area) for waste, except high-level radioactive waste, generated onsite or resulting from activities connected to site operations. These actions do not include storage, packaging, or unpacking of spent nuclear fuel. (See also B6.4, B6.5, B6.6, and B6.10 of appendix B.)

D8 Import or export of natural gas involving major new facilities
D9 Import or export of natural gas involving major operational change
D10 Treatment, storage, and disposal facilities for high-level waste and spent nuclear fuel
D11 Waste disposal facilities for transuranic waste
D12 Incinerators

Pt. 1022

10 CFR Ch. X (1–1–16 Edition)

D1 [RESERVED]

D2 NUCLEAR FUEL REPROCESSING FACILITIES

Siting, construction, operation, and decommissioning of nuclear fuel reprocessing facilities.

D3 URANIUM ENRICHMENT FACILITIES

Siting, construction, operation, and decommissioning of uranium enrichment facilities.

D4 REACTORS

Siting, construction, operation, and decommissioning of power reactors, nuclear material production reactors, and test and research reactors.

D5 [RESERVED]

D6 [RESERVED]

D7 CONTRACTS, POLICIES, AND MARKETING AND ALLOCATION PLANS FOR ELECTRIC POWER

Establishment and implementation of contracts, policies, and marketing and allocation plans related to electric power acquisition that involve (1) The interconnection of, or acquisition of power from, new generation resources greater than 50 average megawatts; (2) changes in the normal operating limits of generation resources greater than 50 average megawatts; or (3) service to discrete new loads of 10 average megawatts or more over a 12-month period.

D8 IMPORT OR EXPORT OF NATURAL GAS INVOLVING MAJOR NEW FACILITIES

Approvals or disapprovals of authorizations to import or export natural gas under section 3 of the Natural Gas Act involving construction of major new natural gas pipelines or related facilities (such as liquefied natural gas terminals and regasification or storage facilities) or significant expansions and modifications of existing pipelines or related facilities.

D9 IMPORT OR EXPORT OF NATURAL GAS INVOLVING MAJOR OPERATIONAL CHANGE

Approvals or disapprovals of authorizations to import or export natural gas under section 3 of the Natural Gas Act involving major operational changes (such as a major increase in the quantity of liquefied natural gas imported or exported).

D10 TREATMENT, STORAGE, AND DISPOSAL FACILITIES FOR HIGH-LEVEL WASTE AND SPENT NUCLEAR FUEL

Siting, construction, operation, and decommissioning of major treatment, storage, and disposal facilities for high-level waste and spent nuclear fuel, including geologic repositories, but not including onsite replacement or upgrades of storage facilities for

spent nuclear fuel at DOE sites where such replacement or upgrade would not result in increased storage capacity.

D11 WASTE DISPOSAL FACILITIES FOR TRANSURANIC WASTE

Siting, construction or expansion, and operation of disposal facilities for transuranic (TRU) waste and TRU mixed waste (TRU waste also containing hazardous waste as designated in 40 CFR part 261).

D12 INCINERATORS

Siting, construction, and operation of incinerators, other than research and development incinerators or incinerators for non-hazardous solid waste (as designated in 40 CFR 261.4(b)).

SOURCE: 68 FR 51432, Aug. 27, 2003, unless otherwise noted.

Subpart A—General**§ 1022.1 Background.**

(a) Executive Order (E.O.) 11988—Floodplain Management (May 24, 1977) directs each Federal agency to issue or amend existing regulations and procedures to ensure that the potential effects of any action it may take in a floodplain are evaluated and that its planning programs and budget requests reflect consideration of flood hazards and floodplain management. Guidance for implementation of the E.O. is provided in the floodplain management guidelines of the U.S. Water Resources Council (40 FR 6030; February 10, 1978) and in “A Unified National Program for Floodplain Management” prepared by the Federal Interagency Floodplain Management Taskforce (Federal Emergency Management Agency, FEMA 248, June 1994). E.O. 11990—Protection of Wetlands (May 24, 1977) directs all Federal agencies to issue or amend existing procedures to ensure consideration of wetlands protection in decision-making and to ensure the evaluation of the potential impacts of any new construction proposed in a wetland.

(b) It is the intent of the E.O.s that Federal agencies implement both the floodplain and the wetland provisions through existing procedures such as those established to implement the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4321 *et seq.*). In those instances where the impacts of the proposed action are not significant enough to require the preparation of an EIS under section 102(2)(C) of NEPA, alternative floodplain or wetland evaluation procedures are to be established. As stated in the E.O.s, Federal agencies are to avoid direct or indirect support of development in a floodplain or new construction in a wetland wherever there is a practicable alternative.

§ 1022.2 Purpose and scope.

(a) This part establishes policy and procedures for discharging the Department of Energy’s (DOE’s) responsibilities under E.O. 11988 and E.O. 11990, including:

(1) DOE policy regarding the consideration of floodplain and wetland factors in DOE planning and decision-making; and

(2) DOE procedures for identifying proposed actions located in a floodplain or wetland, providing opportunity for early public review of such proposed actions, preparing floodplain or wetland assessments, and issuing statements of findings for actions in a floodplain.

(b) To the extent possible, DOE shall accommodate the requirements of E.O. 11988 and E.O. 11990 through applicable DOE NEPA procedures or, when appropriate, the environmental review process under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C. 9601 *et seq.*).

§ 1022.3 Policy.

DOE shall exercise leadership and take action to:

(a) Incorporate floodplain management goals and wetland protection considerations into its planning, regulatory, and decisionmaking processes, and shall to the extent practicable:

- (1) Reduce the risk of flood loss;
- (2) Minimize the impact of floods on human safety, health, and welfare;
- (3) Restore and preserve natural and beneficial values served by floodplains;
- (4) Require the construction of DOE structures and facilities to be, at a minimum, in accordance with FEMA National Flood Insurance Program building standards;
- (5) Promote public awareness of flood hazards by providing conspicuous delineations of past and probable flood heights on DOE property that has suffered flood damage or is in an identified floodplain and that is used by the general public;

(6) Inform parties during transactions guaranteed, approved, regulated, or insured by DOE of the hazards associated with locating facilities and structures in a floodplain;

(7) Minimize the destruction, loss, or degradation of wetlands; and

(8) Preserve and enhance the natural and beneficial values of wetlands.

(b) Undertake a careful evaluation of the potential effects of any proposed floodplain or wetland action.

(c) Avoid to the extent possible the long- and short-term adverse impacts

§ 1022.4

10 CFR Ch. X (1–1–16 Edition)

associated with the destruction of wetlands and the occupancy and modification of floodplains and wetlands, and avoid direct and indirect support of development in a floodplain or new construction in a wetland wherever there is a practicable alternative.

(d) Identify, evaluate, and as appropriate, implement alternative actions that may avoid or mitigate adverse floodplain or wetland impacts.

(e) Provide opportunity for early public review of any plans or proposals for floodplain or wetland actions.

§ 1022.4 Definitions.

The following definitions apply to this part:

Action means any DOE activity necessary to carry out its responsibilities for:

- (1) Acquiring, managing, and disposing of Federal lands and facilities;
- (2) Providing DOE-undertaken, -financed, or -assisted construction and improvements; and
- (3) Conducting activities and programs affecting land use, including but not limited to water- and related land-resources planning, regulating, and licensing activities.

Base floodplain means the 100-year floodplain, that is, a floodplain with a 1.0 percent chance of flooding in any given year.

Critical action means any DOE action for which even a slight chance of flooding would be too great. Such actions may include, but are not limited to, the storage of highly volatile, toxic, or water reactive materials.

Critical action floodplain means, at a minimum, the 500-year floodplain, that is, a floodplain with a 0.2 percent chance of flooding in any given year. When another requirement directing evaluation of a less frequent flood event also is applicable to the proposed action, a flood less frequent than the 500-year flood may be appropriate for determining the floodplain for purposes of this part.

Effects of national concern means those effects that because of the high quality or function of the affected resource or because of the wide geographic range of effects could create concern beyond the locale or region of the proposed action.

Environmental assessment (EA) means a document prepared in accordance with the requirements of 40 CFR 1501.4(b), 40 CFR 1508.9, 10 CFR 1021.320, and 10 CFR 1021.321.

Environmental impact statement (EIS) means a document prepared in accordance with the requirements of section 102(2)(C) of NEPA and its implementing regulations at 40 CFR Parts 1500–1508 and 10 CFR Part 1021.

Facility means any human-made or -placed item other than a structure.

FEMA means the Federal Emergency Management Agency, Department of Homeland Security.

Finding of no significant impact means a document prepared in accordance with the requirements of 40 CFR 1508.13 and 10 CFR 1021.322.

Flood or flooding means a temporary condition of partial or complete inundation of normally dry land areas from the overflow of inland or tidal waters, or the unusual and rapid accumulation or runoff of surface waters from any source.

Floodplain means the lowlands adjoining inland and coastal waters and relatively flat areas and floodprone areas of offshore islands.

Floodplain action means any DOE action that takes place in a floodplain, including any DOE action in a wetland that is also within the floodplain, subject to the exclusions specified at § 1022.5(c) and (d) of this part.

Floodplain and wetland values means the qualities of or functions served by floodplains and wetlands that can include, but are not limited to, living values (*e.g.*, conservation of existing flora and fauna including their long-term productivity, preservation of diversity and stability of species and habitats), cultural resource values (*e.g.*, archeological and historic sites), cultivated resource values (*e.g.*, agriculture, aquaculture, forestry), aesthetic values (*e.g.*, natural beauty), and other values related to uses in the public interest (*e.g.*, open space, scientific study, outdoor education, recreation).

Floodplain or wetland assessment means an evaluation consisting of a description of a proposed action, a discussion of its potential effects on the floodplain or wetland, and consideration of alternatives.

Floodplain statement of findings means a brief document issued pursuant to §1022.14 of this part that describes the results of a floodplain assessment.

High-hazard areas means those portions of riverine and coastal floodplains nearest the source of flooding that are frequently flooded and where the likelihood of flood losses and adverse impacts on the natural and beneficial values served by floodplains is greatest.

Minimize means to reduce to the smallest degree practicable.

New construction, for the purpose of compliance with E.O. 11990 and this part, means the building of any structures or facilities, draining, dredging, channelizing, filling, diking, impounding, and related activities.

Notice of proposed floodplain action and notice of proposed wetland action mean a brief notice that describes a proposed floodplain or wetland action, respectively, and its location and that affords the opportunity for public review.

Practicable means capable of being accomplished within existing constraints, depending on the situation and including consideration of many factors, such as the existing environment, cost, technology, and implementation time.

Preserve means to prevent modification to the natural floodplain or wetland environment or to maintain it as closely as possible to its natural state.

Restore means to reestablish a setting or environment in which the natural functions of the floodplain or wetland can again operate.

Structure means a walled or roofed building, including mobile homes and gas or liquid storage tanks.

Wetland means an area that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions, including swamps, marshes, bogs, and similar areas.

Wetland action means any DOE action related to new construction that takes place in a wetland not located in a floodplain, subject to the exclusions specified at §1022.5(c) and (d) of this part.

§ 1022.5 Applicability.

(a) This part applies to all organizational units of DOE, including the National Nuclear Security Administration, except that it shall not apply to the Federal Energy Regulatory Commission.

(b) This part applies to all proposed floodplain or wetland actions, including those sponsored jointly with other agencies.

(c) This part does not apply to the issuance by DOE of permits, licenses, or allocations to private parties for activities involving a wetland that are located on non-Federal property.

(d) Subject to paragraph (e) of this section, subpart B of this part does not apply to:

(1) Routine maintenance of existing facilities and structures on DOE property in a floodplain or wetland. Maintenance is routine when it is needed to maintain and preserve the facility or structure for its designated purpose (*e.g.*, activities such as reroofing, plumbing repair, door and window replacement);

(2) Site characterization, environmental monitoring, or environmental research activities (*e.g.*, sampling and surveying water and air quality, flora and fauna abundance, and soil properties) in a floodplain or wetland, unless these activities would involve building any structure; involve draining, dredging, channelizing, filling, diking, impounding, or related activities; or result in long-term change to the ecosystem; and

(3) Minor modification (*e.g.*, upgrading lighting, heating, ventilation, and air conditioning systems; installing or improving alarm and surveillance systems; and adding environmental monitoring or control systems) of an existing facility or structure in a floodplain or wetland to improve safety or environmental conditions unless the modification would result in a significant change in the expected useful life of the facility or structure, or involve building any structure or involve draining, dredging, channelizing, filling, diking, impounding, or related activities.

(e) Although the actions listed in paragraphs (d)(1), (d)(2), and (d)(3) of this section normally have very small

§ 1022.6

or no adverse impact on a floodplain or wetland, where unusual circumstances indicate the possibility of adverse impact on a floodplain or wetland, DOE shall determine the need for a floodplain or wetland assessment.

§ 1022.6 Public inquiries.

Inquiries regarding DOE's floodplain and wetland environmental review requirements may be directed to the Office of NEPA Policy and Compliance, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585-0119, 202-586-4600, or a message may be left at 1-800-472-2756, toll free.

Subpart B—Procedures for Floodplain and Wetland Reviews

§ 1022.11 Floodplain or wetland determination.

(a) Concurrent with its review of a proposed action to determine appropriate NEPA or CERCLA process requirements, DOE shall determine the applicability of the floodplain management and wetland protection requirements of this part.

(b) DOE shall determine whether a proposed action would be located within a base or critical action floodplain consistent with the most authoritative information available relative to site conditions from the following sources, as appropriate:

(1) Flood Insurance Rate Maps or Flood Hazard Boundary Maps prepared by FEMA;

(2) Information from a land-administering agency (*e.g.*, Bureau of Land Management) or from other government agencies with floodplain-determination expertise (*e.g.*, U.S. Army Corps of Engineers, Natural Resources Conservation Service);

(3) Information contained in safety basis documents as defined at 10 CFR part 830; and

(4) DOE environmental documents, *e.g.*, NEPA and CERCLA documents.

(c) DOE shall determine whether a proposed action would be located within a wetland consistent with the most authoritative information available relative to site conditions from the following sources, as appropriate:

(1) U.S. Army Corps of Engineers "Wetlands Delineation Manual," Wet-

10 CFR Ch. X (1-1-16 Edition)

lands Research Program Technical Report Y-87-1, January 1987, or successor document;

(2) U.S. Fish and Wildlife Service National Wetlands Inventory or other government-sponsored wetland or land-use inventories;

(3) U.S. Department of Agriculture Natural Resources Conservation Service Local Identification Maps;

(4) U.S. Geological Survey Topographic Maps; and

(5) DOE environmental documents, *e.g.*, NEPA and CERCLA documents.

(d) Pursuant to §1022.5 of this part and paragraphs (b) and (c) of this section, DOE shall prepare:

(1) A floodplain assessment for any proposed floodplain action in the base floodplain or for any proposed floodplain action that is a critical action located in the critical action floodplain; or

(2) A wetland assessment for any proposed wetland action.

§ 1022.12 Notice of proposed action.

(a) For a proposed floodplain or wetland action for which an EIS is required, DOE shall use applicable NEPA procedures to provide the opportunity for early public review of the proposed action. A notice of intent to prepare the EIS may be used to satisfy the requirement for DOE to publish a notice of proposed floodplain or wetland action.

(b) For a proposed floodplain or wetland action for which no EIS is required, DOE shall take appropriate steps to send a notice of proposed floodplain or wetland action to appropriate government agencies (*e.g.*, FEMA regional offices, host and affected States, and tribal and local governments) and to persons or groups known to be interested in or potentially affected by the proposed floodplain or wetland action. DOE also shall distribute the notice in the area where the proposed action is to be located (*e.g.*, by publication in local newspapers, through public service announcements, by posting on- and off-site). In addition, for a proposed floodplain or wetland action that may result in effects of national concern to the floodplain or wetland or both, DOE

shall publish the notice in the FEDERAL REGISTER.

§ 1022.13 Floodplain or wetland assessment.

(a) A floodplain or wetland assessment shall contain the following information:

(1) *Project Description.* This section shall describe the proposed action and shall include a map showing its location with respect to the floodplain and/or wetland. For actions located in a floodplain, the nature and extent of the flood hazard shall be described, including the nature and extent of hazards associated with any high-hazard areas.

(2) *Floodplain or Wetland Impacts.* This section shall discuss the positive and negative, direct and indirect, and long- and short-term effects of the proposed action on the floodplain and/or wetland. This section shall include impacts on the natural and beneficial floodplain and wetland values (§ 1022.4) appropriate to the location under evaluation. In addition, the effects of a proposed floodplain action on lives and property shall be evaluated. For an action proposed in a wetland, the effects on the survival, quality, and function of the wetland shall be evaluated.

(3) *Alternatives.* DOE shall consider alternatives to the proposed action that avoid adverse impacts and incompatible development in the floodplain and/or wetland, including alternate sites, alternate actions, and no action. DOE shall evaluate measures that mitigate the adverse effects of actions in a floodplain and/or wetland including, but not limited to, minimum grading requirements, runoff controls, design and construction constraints, and protection of ecologically-sensitive areas.

(b) For proposed floodplain or wetland actions for which an EA or EIS is required, DOE shall prepare the floodplain or wetland assessment concurrent with and included in the appropriate NEPA document.

(c) For floodplain or wetland actions for which neither an EA nor an EIS is prepared, DOE shall prepare the floodplain or wetland assessment separately or incorporate it when appropriate into another environmental review process (*e.g.*, CERCLA).

§ 1022.14 Findings.

(a) If DOE finds that no practicable alternative to locating or conducting the action in the floodplain or wetland is available, then before taking action DOE shall design or modify its action in order to minimize potential harm to or within the floodplain or wetland, consistent with the policies set forth in E.O. 11988 and E.O. 11990.

(b) For actions that will be located in a floodplain, DOE shall issue a floodplain statement of findings, normally not to exceed three pages, that contains:

(1) A brief description of the proposed action, including a location map;

(2) An explanation indicating why the action is proposed to be located in the floodplain;

(3) A list of alternatives considered;

(4) A statement indicating whether the action conforms to applicable floodplain protection standards; and

(5) A brief description of steps to be taken to minimize potential harm to or within the floodplain.

(c) For floodplain actions that require preparation of an EA or EIS, DOE may incorporate the floodplain statement of findings into the finding of no significant impact or final EIS, as appropriate, or issue such statement separately.

(d) DOE shall send copies of the floodplain statement of findings to appropriate government agencies (*e.g.*, FEMA regional offices, host and affected states, and tribal and local governments) and to others who submitted comments on the proposed floodplain action.

(e) For proposed floodplain actions that may result in effects of national concern, DOE shall publish the floodplain statement of findings in the FEDERAL REGISTER, describing the location of the action and stating where a map is available.

(f) For floodplain actions subject to E.O. 12372—Intergovernmental Review of Federal Programs (July 14, 1982), DOE also shall send the floodplain statement of findings to the State in accordance with 10 CFR part 1005—Intergovernmental Review of Department of Energy Programs and Activities.

§ 1022.15

§ 1022.15 Timing.

(a) For a proposed floodplain action, DOE shall allow 15 days for public comment following issuance of a notice of proposed floodplain action. After the close of the public comment period and before issuing a floodplain statement of findings, DOE shall reevaluate the practicability of alternatives to the proposed floodplain action and the mitigating measures, taking into account all substantive comments received. After issuing a floodplain statement of findings, DOE shall endeavor to allow at least 15 days of public review before implementing a proposed floodplain action. If a FEDERAL REGISTER notice is required, the 15-day period begins on the date of publication in the FEDERAL REGISTER.

(b) For a proposed wetland action, DOE shall allow 15 days for public comment following issuance of a notice of proposed wetland action. After the close of the public comment period, DOE shall reevaluate the practicability of alternatives to the proposed wetland action and the mitigating measures, taking into account all substantive comments received, before implementing a proposed wetland action. If a FEDERAL REGISTER notice is required, the 15-day period begins on the date of publication in the FEDERAL REGISTER.

§ 1022.16 Variances.

(a) *Emergency actions.* DOE may take actions without observing all provisions of this part in emergency situations that demand immediate action. To the extent practicable prior to taking an emergency action (or as soon as possible after taking such an action) DOE shall document the emergency actions in accordance with NEPA procedures at 10 CFR 1021.343(a) or CERCLA procedures in order to identify any adverse impacts from the actions taken and any further necessary mitigation.

(b) *Timing.* If statutory deadlines or overriding considerations of program or project expense or effectiveness exist, DOE may waive the minimum time periods in §1022.15 of this subpart.

(c) *Consultation.* To the extent practicable prior to taking an action pursuant to paragraphs (a) or (b) of this section (or as soon as possible after taking such an action) the cognizant DOE pro-

10 CFR Ch. X (1–1–16 Edition)

gram or project manager shall consult with the Office of NEPA Policy and Compliance.

§ 1022.17 Follow-up.

For those DOE actions taken in a floodplain or wetland, DOE shall verify that the implementation of the selected alternative, particularly with regard to any adopted mitigation measures, is proceeding as described in the floodplain or wetland assessment and the floodplain statement of findings.

Subpart C—Other Requirements

§ 1022.21 Property management.

(a) If property in a floodplain or wetland is proposed for license, easement, lease, transfer, or disposal to non-Federal public or private parties, DOE shall:

(1) Identify those uses that are restricted under applicable floodplain or wetland regulations and attach other appropriate restrictions to the uses of the property; or

(2) Withhold the property from conveyance.

(b) Before completing any transaction that DOE guarantees, approves, regulates, or insures that is related to an area located in a floodplain, DOE shall inform any private party participating in the transaction of the hazards associated with locating facilities or structures in the floodplain.

§ 1022.22 Requests for authorizations or appropriations.

It is DOE policy to indicate in any requests for new authorizations or appropriations transmitted to the Office of Management and Budget, if a proposed action is located in a floodplain or wetland and whether the proposed action is in accord with the requirements of E.O. 11988 and E.O. 11990 and this part.

§ 1022.23 Applicant responsibilities.

DOE may require applicants for any use of real property (*e.g.*, license, easement, lease, transfer, or disposal), permits, certificates, loans, grants, contract awards, allocations, or other

Department of Energy

Pt. 1040

forms of assistance or other entitlement related to activities in a floodplain or wetland to provide information necessary for DOE to comply with this part.

§ 1022.24 Interagency cooperation.

If DOE and one or more agencies are directly involved in a proposed floodplain or wetland action, in accordance with DOE's NEPA or CERCLA procedures, DOE shall consult with such other agencies to determine if a floodplain or wetland assessment is required by subpart B of this part, identify the appropriate lead or joint agency responsibilities, identify the applicable regulations, and establish procedures for interagency coordination during the environmental review process.

PART 1039—UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION FOR FEDERAL AND FEDERALLY ASSISTED PROGRAMS

AUTHORITY: Section 213, Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Pub. L. 91-646, 84 Stat. 1894 (42 U.S.C. 4601) as amended by the Surface Transportation and Uniform Relocation Assistance Act of 1987, Title IV of Pub. L. 100-17, 101 Stat. 246-256 (42 U.S.C. 4601 note).

§ 1039.1 Uniform relocation assistance and real property acquisition.

Regulations and procedures for complying with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Pub. L. 91-646, 84 Stat. 1894, 42 U.S.C. 4601), as amended by the Surface Transportation and Uniform Relocation Assistance Act of 1987 (Title IV of Pub. L. 100-17, 101 Stat. 246-255, 42 U.S.C. 4601 note) are set forth in 49 CFR part 24.

[52 FR 48017, Dec. 17, 1987; 54 FR 8912, 8913, Mar. 2, 1989]

PART 1040—NONDISCRIMINATION IN FEDERALLY ASSISTED PROGRAMS OR ACTIVITIES

Subpart A—General Provisions

Sec.
1040.1 Purpose.

- 1040.2 Application.
- 1040.3 Definitions—General.
- 1040.4 Assurances required and preaward review.
- 1040.5 Designation of responsible employee.
- 1040.6 Notice.
- 1040.7 Remedial and affirmative action and self-evaluation.
- 1040.8 Effect of employment opportunity.

Subpart B—Title VI of the Civil Rights Act of 1964; Section 16 of the Federal Energy Administration Act of 1974, as Amended; and Section 401 of the Energy Reorganization Act of 1974

- 1040.11 Purpose and application.
- 1040.12 Definitions.
- 1040.13 Discrimination prohibited.
- 1040.14 Covered employment.

Subpart C [Reserved]

Subpart D—Nondiscrimination on the Basis of Handicap—Section 504 of the Rehabilitation Act of 1973, as Amended

GENERAL PROVISIONS

- 1040.61 Purpose and application.
- 1040.62 Definitions.
- 1040.63 Discrimination prohibited.
- 1040.64 Effect of State or local law or other requirements and effect of employment opportunities.
- 1040.65 Procedures.

EMPLOYMENT PRACTICES

- 1040.66 Discrimination prohibited.
- 1040.67 Reasonable accommodation.
- 1040.68 Employment criteria.
- 1040.69 Preemployment inquiries.

ACCESSIBILITY

- 1040.71 Discrimination prohibited.
- 1040.72 Existing facilities.
- 1040.73 New construction.
- 1040.74 Accessibility in historic properties.

APPENDIX A TO PART 1040—FEDERAL FINANCIAL ASSISTANCE OF THE DEPARTMENT OF ENERGY TO WHICH THIS PART APPLIES

AUTHORITY: 20 U.S.C. 1681–1686; 29 U.S.C. 794; 42 U.S.C. 2000d to 2000d-7, 3601–3631, 5891, 6101–6107, 7101 *et seq.*

SOURCE: 45 FR 40515, June 13, 1980, unless otherwise noted.

Subpart A—General Provisions

§ 1040.1 Purpose.

(a) The purpose of this part is to implement Title VI of the Civil Rights Act of 1964, Pub. L. 88-352; section 16 of the Federal Energy Administration Act of 1974, as amended, Pub. L. 93-275; section 401 of the Energy Reorganization Act of 1974, Pub. L. 93-438; Title IX of the Education Amendments of 1972, as amended, Pub. L. 92-318, Pub. L. 93-568 and Pub. L. 94-482; section 504 of the Rehabilitation Act of 1973, as amended, Pub. L. 93-112; the Age Discrimination Act of 1975, Pub. L. 94-135; Title VIII of the Civil Rights Act of 1968, Pub. L. 90-284; and civil rights provisions of statutes administered pursuant to authority under the DOE Organization Act, Pub. L. 95-91, so no person shall, on the ground of race, color, national origin, sex (when covered by section 16 and section 401), handicap, or age, be excluded from participation in, be denied the benefits of, be subjected to discrimination under, or be denied employment, where a primary purpose of the Federal financial assistance is to provide employment or when the delivery of services is affected by the recipient's employment practices (under section 504, all grantee and subgrantee employment practices are covered regardless of the purpose of the program), in connection with any program or activity receiving Federal financial assistance from the Department of Energy (after this referred to as DOE or the Department). Employment coverage may be broader in scope when section 16, section 401, or Title IX are applicable.

(b) DOE regulations on enforcement of nondiscrimination on the basis of handicap in programs or activities conducted by DOE are in part 1041 of this chapter.

(c) DOE regulations on enforcement of nondiscrimination on the basis of

Department of Energy

§ 1040.3

sex, under Title IX of the Education Act Amendments of 1972, as amended, are in part 1042 of this chapter.

[45 FR 40515, June 13, 1980, as amended at 66 FR 4630, Jan. 18, 2001; 68 FR 51346, Aug. 26, 2003]

§ 1040.2 Application.

(a) The application of this part is to any program or activity for which Federal financial assistance is authorized under laws administered by DOE. Types of Federal financial assistance to which this part applies are listed in Appendix A of this part. appendix A is to be revised from time to time by notice published in the FEDERAL REGISTER. This part applies to money paid, property transferred, or other Federal financial assistance including cooperative agreements extended, by way of grant, loan, or contract by DOE, or grants awarded in the performance of a contract with DOE by an authorized contractor or subcontractor, the terms of which require compliance with this part. If any statutes implemented by this part are otherwise applicable, the failure to list a type of Federal financial assistance in appendix A does not mean that a program or activity is not covered by this part.

(b) This part does not apply to:

- (1) Contracts of insurance or guaranty;
- (2) Employment practices under any program or activity except as provided in §§ 1040.12, 1040.14, 1040.41, 1040.47 and 1040.66; or
- (3) Procurement contracts under title 41 CFR part 1 or part 9.

[45 FR 40515, June 13, 1980, as amended at 68 FR 51346, Aug. 26, 2003]

§ 1040.3 Definitions—General.

(a) *Academic institution* includes any school, academy, college, university, institute, or other association, organization, or agency conducting or administering any aid, benefit, service, project, or facility designed to educate or train individuals.

(b) *Administrative law judge* means a person appointed by the reviewing authority to preside over a hearing held under this part.

(c) *Agency or Federal agency* refers to any Federal department or agency

which extends Federal financial assistance.

(d) *Applicant for assistance* means one who submits an application, request, or plan required to be approved by a Department official or by a primary recipient as a condition to becoming eligible for Federal financial assistance.

(e) *Assistant Attorney General* refers to the Assistant Attorney General, Civil Rights Division, United States Department of Justice.

(f) *Director, FAPD* refers to the Director, Federally Assisted Programs Division, Office of Equal Opportunity, DOE.

(g) *Compliance Review* means an analysis of a recipient's selected employment practices or delivery of services for adherence to provisions of any of the subparts of this part.

(h) *Department* means the Department of Energy (DOE).

(i) *FERC* means the Federal Energy Regulatory Commission, DOE.

(j) Where designation of persons by race, color, or national origin is required, the following designations are to be used:

(1) *Black*, not of Hispanic origin. A person having origins in any of the black racial groups of Africa.

(2) *Hispanic*. A person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish Culture or origin, regardless of race.

(3) *Asian or Pacific Islander*. A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands. This includes, for example, China, India, Japan, Korea, the Philippine Islands, Hawaiian Islands, and Samoa.

(4) *American Indian or Alaskan Native*. A person having origins in any of the original peoples of North America and who maintains cultural identification through tribal affiliation or community recognition.

(5) *White, not of Hispanic origin*. A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

Additional subcategories based on national origin or primary language spoken may be used where appropriate on either a national or a regional basis. Paragraphs (j) (1) through (5), inclusive, set forth in this section are in

§ 1040.3

10 CFR Ch. X (1–1–16 Edition)

conformity with Directive No. 15 of the Office of Federal Statistical Policy and Standards. To the extent that these designations are modified, paragraphs (j) (1) through (5), inclusive, set forth in this section are to be interpreted to conform with those modifications.

(k) *Director* means the Director, Office of Equal Opportunity, DOE.

(l) *Disposition* means any treatment, handling, decision, sentencing, confinement, or other proscription of conduct.

(m) *Employment practices*, see individual section headings.

(n) *Facility* means all or any portion of buildings, structures, equipment, roads, walks, parking lots, or other real or personal property or interest in such property, and the provision of facilities includes the construction, expansion, renovation, remodeling, alteration, or acquisition of facilities.

(o) *Federal financial assistance* includes:

- (1) Grants and loans of Federal funds,
- (2) The grant or donation of Federal property and interest in property,
- (3) The detail of or provision of services by Federal personnel,
- (4) The sale and lease of, and the permission to use (on other than a casual or transient basis), Federal property or any interest in such property, the furnishing of services without consideration or at a nominal consideration, or at a consideration which is reduced for the purpose of assisting the recipient, or in recognition of the public interest to be served by the sale, lease, or furnishing of services to the recipient, and
- (5) Any Federal agreement, arrangement, or other contract which has as one of its purposes the provision of assistance.

(p) *General Counsel* mean the Office of the General Counsel Department of Energy.

(q) *Government organization* means the political subdivision for a prescribed geographical area.

(r) *Investigations* include fact-finding efforts and attempts to secure voluntary resolution of complaints.

(s) *Noncompliance* means the failure of a recipient or subrecipient to comply with any subpart of this part.

(t) *Primary recipient* means any person, group, organization, state, or local unit of government which is authorized

or required to extend Federal financial assistance to another recipient.

(u) *Program or activity* and *program* mean all of the operations of any entity described in paragraphs (u)(1) through (4) of this section, any part of which is extended Federal financial assistance:

(1)(i) A department, agency, special purpose district, or other instrumentality of a State or of a local government; or

(ii) The entity of such State or local government that distributes such assistance and each such department or agency (and each other State or local government entity) to which the assistance is extended, in the case of assistance to a State or local government;

(2)(i) A college, university, or other postsecondary institution, or a public system of higher education; or

(ii) A local educational agency (as defined in 20 U.S.C. 7801), system of vocational education, or other school system;

(3)(i) An entire corporation, partnership, or other private organization, or an entire sole proprietorship—

(A) If assistance is extended to such corporation, partnership, private organization, or sole proprietorship as a whole; or

(B) Which is principally engaged in the business of providing education, health care, housing, social services, or parks and recreation; or

(ii) The entire plant or other comparable, geographically separate facility to which Federal financial assistance is extended, in the case of any other corporation, partnership, private organization, or sole proprietorship; or

(4) Any other entity which is established by two or more of the entities described in paragraph (u)(1), (2), or (3) of this section.

(v) *Responsible Departmental or DOE Official* means the official of the Department of Energy that has been assigned the principal responsibility for administration of the law extending Federal financial assistance.

(w) *Reviewing authority* means the component of the Department delegated authority by the Secretary to appoint, and to review the decisions of,

Department of Energy

§ 1040.4

administrative law judges in cases arising under this part.

(x) *Secretary* means the Secretary of the Department of Energy.

(y) The term *United States* includes the states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, Wake Island, the Canal Zone, and all other territories and possessions of the United States, and the term *State* includes any one of the foregoing.

(z) *Headquarters* means DOE offices located in Washington, D.C.

[45 FR 40515, June 13, 1980, as amended at 68 FR 51346, Aug. 26, 2003]

§ 1040.4 Assurances required and preaward review.

(a) *Assurances*. An applicant for Federal financial assistance to which this part applies shall submit an assurance on a form specified by the Director that the program or activity will be operated in compliance with applicable subparts. Such assurances are to include provisions which give the United States a right to seek judicial enforcement.

(b) *Duration of obligation*. (1) In the case of Federal financial assistance extended in the form of real property or to provide real property or structure on the property, the assurance obligates the recipient or, in the case of a subsequent transfer, the transferee, for the period during which the real property or structures are used for the purpose for which Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits.

(2) In the case of Federal financial assistance extended to provide personal property, the assurance obligates the recipient for the period during which it retains ownership or possession of the property.

(3) In all other cases, the assurance obligates the recipient to all terms and conditions contained in the certificate of assurance for the period during which Federal financial assistance is extended.

(c) *Covenants*. Where Federal financial assistance is provided in the form of real property, structures, improvements on or interests in the property,

or in the case where Federal financial assistance is provided in the form of a transfer of real property or interest in the property from the Department:

(1) The instrument effecting or recording this transfer is to contain a covenant running with the land to assure nondiscrimination for the period during which the real property is used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits; or

(2) Where no transfer of property is involved or imposed with Federal financial assistance, the recipient shall agree to include the covenant described in paragraph (c)(1) of this section in the instrument effecting or recording any subsequent transfer of the property.

(3) Where Federal financial assistance is provided in the form of real property or interest in the property from the Department, the covenant is to also include a condition coupled with a right to be reserved by the Department to revert title to the property in the event of a material breach of the covenant. If a transferee of real property manages to mortgage or otherwise encumber the real property as security for financing construction of new or improvement of existing facilities on the property for the purpose for which the property was transferred, the Director may, upon request of the transferee and, if necessary to accomplish such financing and upon such conditions, as he or she deems appropriate, agree to forbear the exercise of the right to revert title for so long as the lien of the mortgage or other encumbrance remains effective.

(d) *Assurances from government agencies*. In the case of any application from any department, agency or office of any State or local government for Federal financial assistance for any specified purpose, the assurance required by this section is to extend to any other department, agency, or office of the same governmental unit.

(e) *Assurance from academic and other institutions*. (1) In the case of any application for Federal financial assistance for any purpose to an academic institution, the assurance required by this

§ 1040.5

section is to extend to admission practices and to all other practices relating to the treatment of students.

(2) The assurance required with respect to an academic institution, detention or correctional facility, or any other institution or facility, insofar as the assurance relates to the institution's practices with respect to admission or other treatment of individuals as students, patients, wards, inmates, persons subject to control, or clients of the institution or facility or to the opportunity to participate in the provision of services, disposition, treatment, or benefits to such individuals, shall be applicable to the entire institution or facility.

(f) *Continuing Federal financial assistance.* Any State or State agency applying for continuing Federal financial assistance subject to this part shall, as a condition for the extension of such assistance:

(1) Provide a statement that the program or activity is (or, in the case of a new program or activity, will be) conducted in compliance with applicable subparts; and

(2) Provide for such methods of administration as are found by the Director or a designee to give reasonable assurance that the primary recipient and all other recipients of Federal financial assistance under such program will comply with this part.

(g) *Assistance for construction.* Where the assistance is sought for the construction of a facility, or a part of a facility, the assurance is to extend to the entire facility. If a facility to be constructed is part of a larger system, the assurance is to extend to the larger system.

(h) *Pre-award review.* Prior to and as a condition of approval, all applications for Federal financial assistance are to be reviewed by the appropriate Civil Rights Department official who is to make a written determination of the applicant's compliance with this part. The basis for such a determination is to be the submission of the assurance of compliance as specified in paragraph (a) and a review of data to be submitted by the applicant as specified by the Director. For purposes of this subsection, the appropriate departmental official at headquarters level is the Di-

10 CFR Ch. X (1-1-16 Edition)

rector, FAPD, Office of Equal Opportunity, and at the regional level it is to be the Civil Rights Officer delegated by the Director as having review authority for determining compliance with requirements of this part. Where a determination of compliance cannot be made from this data, DOE may require the applicant to submit necessary additional information and may take other steps necessary to make the determination of compliance. Such other steps may include, for example, communicating with local government officials or protected class organizations and field reviews. Any agreement to achieve voluntary compliance as a result of a preaward review shall be in writing. In the case of Title VI, the Director will notify the Assistant Attorney General of instances of probable noncompliance determined as the result of application reviews. The opportunity for a hearing as provided under § 1040.113 is applicable to this section.

[45 FR 40515, June 13, 1980, as amended at 68 FR 51346, Aug. 26, 2003]

§ 1040.5 Designation of responsible employee.

(a) *Designation of responsible employee.* Each recipient shall designate at least one employee to coordinate its efforts to carry out its responsibilities under this part. The recipient shall publish the name, office address and telephone number of the employee or employees appointed under this paragraph.

(b) A recipient shall display prominently, in reasonable numbers and places, posters which state that the recipient operates a program or activity subject to the nondiscrimination provisions of applicable subparts, summarize those requirements, note availability of information regarding this part from the recipient and DOE, and explain briefly the procedures for filing a complaint. Information on requirements of this part, complaint procedures and the rights of beneficiaries are to be included in handbooks, manuals, pamphlets, and other materials which are ordinarily distributed to the public to describe the federally assisted programs or activities and the requirements for participation by recipients and beneficiaries. To the extent that

Department of Energy

§ 1040.7

recipients are required by law or regulation to publish or broadcast information in the news media, the recipient shall insure that such publications and broadcasts state that the program or activity in question is an equal opportunity program or activity or otherwise indicate that discrimination in the program is prohibited by Federal law.

(c) Where a significant number or proportion of the population eligible to be served or likely to be directly affected by a federally assisted program or activity requires service or information in a language other than English in order to be informed of or to participate in the program, the recipient shall take reasonable steps, considering the scope of the program and size and concentration of such population, to provide information in appropriate languages (including braille) to such persons. This requirement applies to written material of the type which is ordinarily distributed to the public. The Department may require a recipient to take additional steps to carry out the intent of this subsection.

[45 FR 40515, June 13, 1980, as amended at 68 FR 51346, Aug. 26, 2003]

§ 1040.6 Notice.

(a) A recipient shall take appropriate, initial and continuing steps to notify participants, beneficiaries, applicants and employees, including those with impaired vision or hearing, and unions or professional organizations holding collective bargaining or professional agreements with the recipient that it does not discriminate on the basis of race, color, national origin, sex (where sec. 16 or sec. 401 apply), handicap, or age. The notification is to state, where appropriate, that the recipient does not discriminate in admission or access to, and treatment of, or employment in its programs or activities and inform employees of their rights under this part. The notification is to include an identification of the responsible employee designated under § 1040.5. A recipient shall make the initial notification required by this paragraph within 90 days of the effective date of this part. Methods of initial and continuing notification may include the posting of notices, publication in

newspapers and magazines, placement of notices in recipients' publications, and distribution of memoranda or other written communications.

(b) If a recipient publishes or uses recruitment materials or publications containing general information that it makes available to participants, beneficiaries, applicants, or employees, it shall include in those materials or publications a statement of the policy described in paragraph (a) of this section. A recipient may meet the requirement of this paragraph either by including appropriate inserts in existing materials and publications or by revising and reprinting the materials and publications.

(c) The provisions of § 1040.5(c) to provide information in appropriate languages (including braille), apply to this section.

[45 FR 40515, June 13, 1980, as amended at 68 FR 51346, Aug. 26, 2003]

§ 1040.7 Remedial and affirmative action and self-evaluation.

(a) *Remedial action.* If the Director finds that a recipient has discriminated against persons on the basis of race, color, national origin, sex, handicap, or age in any program or activity receiving Federal financial assistance, the recipient shall take remedial action as the Director considers necessary to overcome the effects of the discrimination.

(b) *Affirmative action.* In the absence of a finding of discrimination on the basis of race, color, national origin, sex, handicap, or age in any program or activity, a recipient may continue to encourage participation by all persons regardless of race, color, national origin, sex, handicap, or age.

(c) *Self-evaluation.* Each recipient shall, within one year of the effective date of this part:

(1) Whenever possible, evaluate, with the assistance of interested persons, including handicapped persons or organizations representing handicapped persons, its current policies and practices and the effects thereof that do not or may not meet the requirements of this part;

(2) Modify any policies and practices which do not or may not meet the requirements of this part; and

§ 1040.8

(3) Take appropriate remedial steps to eliminate the effects of discrimination which resulted or may have resulted from adherence to these questionable policies and practices.

(d) Availability of self-evaluation and related materials. Recipient shall maintain on file, for at least three years following its completion, the evaluation required under paragraph (c) of this section, and shall provide to the Director, upon request, a description of any modifications made under paragraph (c)(2) of this section and of any remedial steps taken under paragraph (c)(3) of this section.

[45 FR 40515, June 13, 1980, as amended at 68 FR 51346, Aug. 26, 2003]

§ 1040.8 Effect of employment opportunity.

Due to limited opportunities in the past, certain protected groups may be underrepresented in some occupations or professions. A recipient's obligation to comply with this part is not alleviated by use of statistical information which reflects limited opportunities in those occupations or professions.

Subpart B—Title VI of the Civil Rights Act of 1964; Section 16 of the Federal Energy Administration Act of 1974, as Amended; and Section 401 of the Energy Reorganization Act of 1974

§ 1040.11 Purpose and application.

(a) The purpose of this subpart is to implement title VI of the Civil Rights Act of 1964 (title VI) and the pertinent regulations of DOE so that no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any program or activity receiving Federal financial assistance of the type subject to title VI. This subpart also implements section 16 of the Federal Energy Administration Act of 1974, as amended (section 16) and section 401 of the Energy Reorganization Act of 1974 (section 401) so that no person shall be excluded on the ground of sex from participation in, be denied the benefits of, or be sub-

10 CFR Ch. X (1–1–16 Edition)

jected to discrimination under any program or activity receiving Federal financial assistance subject to section 16 or 401. The coverage of employment practices is explained in § 1040.14.

(b) The application of this subpart is to delivery of services by and the covered employment practices of recipients and subrecipients administering or participating in any program or activity receiving Federal financial assistance under laws administered by DOE covered by title VI. In addition to services and employment practices, this subpart applies to any activities of recipients or subrecipients receiving Federal financial assistance subject to section 16 and section 401.

[45 FR 40515, June 13, 1980, as amended at 68 FR 51347, Aug. 26, 2003]

§ 1040.12 Definitions.

(a) *Covered employment* means employment practices covered by title VI, section 16 and section 401.

(1) Under title VI, such practices are those which:

(i) Exist in a program where a primary objective of the Federal financial assistance is to provide employment; or

(ii) Cause discrimination on the basis of race, color, or national origin with respect to beneficiaries or potential beneficiaries of the assisted program.

(2) Under section 16 and section 401, such practices include, but are not limited to, employment practices covered by title VI when alleging discrimination on the basis of sex. All employment practices of a recipient or subrecipient of Federal financial assistance subject to section 16 and section 401 are covered employment practices.

(b) *Title VI* refers to title VI of the Civil Rights Act of 1964, 42 U.S.C. 2000d *et seq.* which prohibits discrimination on the ground of race, color or national origin in programs or activities receiving Federal financial assistance. The definitions set forth in § 1040.3 of subpart A to the extent not inconsistent with this subpart, are applicable to and incorporated into this subpart.

[45 FR 40515, June 13, 1980, as amended at 68 FR 51347, Aug. 26, 2003]

§ 1040.13 Discrimination prohibited.

(a) *General.* No person in the United States shall be excluded on the ground of race, color, national origin, or sex (when covered by section 16 or section 401), from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program to which this subpart applies.

(b) *Specific discriminatory action prohibited.* A recipient to which this subpart applies may not, directly or through contractual or other arrangements, on the ground of race, color, national origin or sex (when covered by section 16 or section 401):

(1) Deny any individual any disposition, service, financial aid, or benefit provided under the program;

(2) Provide any disposition, service, financial aid, or benefit to an individual which is different, or is provided in a different manner, from that provided to others under the program;

(3) Subject an individual to segregation or separate treatment in any matter related to his/her receipt of any disposition, service, financial aid, or benefit under the program;

(4) Restrict an individual in any way in the enjoyment of any advantage or privilege enjoyed by others receiving any disposition, service, financial aid, or benefit under the program;

(5) Treat an individual differently from others in determining whether such individual satisfies any admission, enrollment, quota, eligibility, membership, or other requirement or condition which individuals must meet in order to be provided any disposition, service, financial aid, function or benefit provided under the program;

(6) Deny an individual an opportunity to participate in the program through the provision of services or otherwise afford such individual an opportunity to do so which is different from that afforded others under the program (including the opportunity to participate in the program as an employee but only to the extent set forth in §1040.14 of this subpart); or

(7) Deny a person the opportunity to participate as a member of a planning or advisory body which is an integral part of the program.

(c) A recipient, in determining the type of Federal financial assistance

(i.e., disposition, services, financial aid, benefits, or facilities) which will be provided under any program, or the class of individuals to whom, or the situations in which the assistance will be provided, may not, directly or through contractual or other arrangements, utilize criteria or methods of administration which have the effect of subjecting individuals to discrimination because of their race, color, national origin, or sex (when covered by section 16 and section 401) or have the effect of defeating or substantially impairing accomplishment of the objectives of the program with respect to individuals of a particular race, color, national origin, or sex (when covered by section 16 or section 401).

(d) In determining the site or location of facilities, a recipient or applicant may not make selections with the purpose or effect of excluding individuals from, denying them the benefits of, or subjecting them to discrimination because of race, color, national origin, or sex (when covered by section 16 or 401) or with the purpose or effect of defeating or substantially impairing the accomplishment of the objectives of title VI or this subpart.

(e) For the purpose of this section, the disposition, services, financial aid, or benefits provided under a program receiving Federal financial assistance include all portions of the recipient's program or activity, including facilities, equipment, or property provided with the aid of Federal financial assistance.

(f) The enumeration of specific forms of prohibited discrimination in this paragraph and in §1040.14 of this subpart does not limit the generality of the prohibition in paragraph (a) of this section.

(g) *Exemptions.* Exclusion from benefits for protected groups. An individual is not to be considered subjected to discrimination by reason of his/her exclusion from benefits limited to individuals of a particular race, color, national origin or sex different from his/hers when the exclusion is provided for

§ 1040.14

or required by Federal law, for example, Federal financial assistance provided exclusively to serve on-reservation Indians.

[45 FR 40515, June 13, 1980, as amended at 68 FR 51347, Aug. 26, 2003]

§ 1040.14 Covered employment.

(a) *Employment practices.* (1) Whenever a primary objective of the Federal financial assistance to a program to which this subpart applies is to provide employment, a recipient of the assistance may not (directly or through contractual or other arrangements) subject any individual to discrimination on the grounds of race, color, national origin, or sex (when covered by section 16 and section 401) in its employment practices under the program (including recruitment or recruitment advertising, employment, layoff, or termination, upgrading, demotion or transfer, training, participation in upward mobility projects, rates of pay or other forms of compensation, and use of facilities). This prohibition also applies to programs where the primary objective of the Federal financial assistance is:

(i) To assist individuals through employment to meet expenses incident to the commencement or continuation of their education or training;

(ii) To provide work experience which contributes to the education or training of the individuals involved;

(iii) To reduce the unemployment of individuals or to help them through employment to meet subsistence needs; or

(iv) To provide employment to individuals who, because of handicaps, cannot be readily absorbed in the competitive labor market. The requirements applicable to construction under any such program are to be those specified in or under part III of Executive Order 11246, as amended, or any Executive Order which supersedes it.

(2) In regard to Federal financial assistance which does not have provision of employment as a primary objective, the provisions of paragraph (a)(1) of this section apply to the employment practices of the recipient if discrimination on the ground of race, color, national origin, or sex (when covered by section 16 or section 401) in such em-

10 CFR Ch. X (1–1–16 Edition)

ployment practices tends to exclude persons from participation in, deny them the benefits of, or subject them to discrimination under the program receiving Federal financial assistance. In any such case, the provisions of paragraph (a)(1) of this section apply to the extent necessary to assure equality of opportunity to and nondiscriminatory treatment of beneficiaries.

(3) Paragraph (a)(1) also applies to covered employment as defined in § 1040.12(a)(2).

(b) Enforcement of title VI compliance with respect to covered employment practices is not to be superseded by State or local merit systems relating to the employment practices of the same recipient.

[45 FR 40515, June 13, 1980, as amended at 68 FR 51347, Aug. 26, 2003]

Subpart C [Reserved]

Subpart D—Nondiscrimination on the Basis of Handicap—Section 504 of the Rehabilitation Act of 1973, as Amended

GENERAL PROVISIONS

§ 1040.61 Purpose and application.

(a) The purpose of this subpart is to implement sec. 504 of the Rehabilitation Act of 1973, which is designed to eliminate discrimination on the basis of handicap in any program or activity receiving Federal financial assistance.

(b) This subpart applies to each recipient or subrecipient of Federal financial assistance from DOE and to each program or activity that receives assistance.

[45 FR 40515, June 13, 1980, as amended at 68 FR 51347, Aug. 26, 2003]

§ 1040.62 Definitions.

(a) *Executive Order* means Executive Order 11914, titled “Nondiscrimination With Respect to the Handicapped in Federally Assisted Programs” issued on April 28, 1976.

(b) *Section 504* means sec. 504 of the Rehabilitation Act of 1973, Pub. L. 93–112, as amended by the Rehabilitation Act Amendments of 1974, Pub. L. 93–516, 29 U.S.C. 794.

Department of Energy

§ 1040.62

(c) *Handicapped person* means any person who has a physical or mental impairment which substantially limits one or more major life activities, has a record of such impairment, or is regarded as having such an impairment.

(d) As used in paragraph (c) of this section, the phrase:

(1) *Physical or mental impairment* means—

(i) Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive, digestive, genito-urinary; hemic and lymphatic; skin; and endocrine; or

(ii) Any mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities. The term *physical or mental impairment* includes, but is not limited to, such diseases and conditions as orthopedic, visual, speech and hearing impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, mental retardation, emotional illness and drug addiction and alcoholism, when current use of drugs and/or alcohol is not detrimental to or interferes with the employee's performance, nor constitutes a direct threat to property or safety of others.

(2) *Major life activities* means functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning and working.

(3) *Has a record of such an impairment* means has a history of, or has been misclassified as having, a mental or physical impairment that substantially limits one or more major life activities.

(4) *Is regarded as having an impairment* means:

(i) Has a physical or mental impairment that does not substantially limit major life activities but that is treated by a recipient as constituting such a limitation;

(ii) Has a physical or mental impairment that substantially limits major life activities only as a result of the at-

titudes of others toward such impairment; or

(iii) Has none of the impairments defined in paragraphs (d)(1) (i) and (ii) of this section, but is treated by a recipient as having such an impairment.

(e) *Qualified handicapped person* means:

(1) With respect to employment, a handicapped person who, with reasonable accommodation, can perform the essential functions of the job in question;

(2) With respect to public preschool, elementary, secondary, or adult education services, a handicapped person:

(i) Of an age during which non-handicapped persons are provided such services;

(ii) Of any age during which it is mandatory under state law to provide such services to handicapped persons; or

(iii) To whom a state is required to provide a free appropriate public education under sec. 612 of the Education for All Handicapped Children Act of 1975, Pub. L. 94-142.

(3) With respect to postsecondary and vocational education services, a handicapped person who meets the academic and technical standards requisite to admission or participation in the recipient's education program or activity; and

(4) With respect to other services, a handicapped person who meets the essential eligibility requirements for the receipt of such services.

(f) *Handicap* means condition or characteristic that renders a person a handicapped person as defined in paragraph (c) of this section.

(g) *Historic properties* means those architecturally, historically or culturally significant properties listed in or eligible for listing in the National Register of Historic Places or such properties designated under a statute of the appropriate State or local governmental body.

(h) *Building alterations* means those changes to the existing conditions and equipment of a building which do not involve any structural changes, but which typically improve and upgrade a building, such as alterations to stairways, doors, toilets, elevators, and site improvements.

§ 1040.63

10 CFR Ch. X (1–1–16 Edition)

(i) *Structural changes* means those changes which alter the structure of a historic building including, but not limited to, its bearing walls and all types of post and beam systems in wood, steel, iron or concrete.

The definitions set forth in §1040.3 of this part, to the extent not inconsistent with this subpart, are made applicable to and incorporated into this subpart.

§ 1040.63 Discrimination prohibited.

(a) *General.* No qualified handicapped person shall, on the basis of handicap, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any program or activity that receives Federal financial assistance from DOE.

(b) *Discriminatory actions prohibited.*

(1) A recipient, in providing any aid, benefit, or service, may not directly or through contractual, licensing, or other arrangements, on the basis of handicap—

(i) Deny a qualified person the opportunity to participate in or benefit from the aid, benefit or service;

(ii) Afford a qualified handicapped person an opportunity to participate in or benefit from the aid, benefit, or service that is not equal to that afforded others;

(iii) Provide a qualified handicapped person with an aid, benefit, or service that is not as effective in affording equal opportunity to obtain the same result, to gain the same benefit, or to reach the same level of achievement as that provided to others;

(iv) Provide different or separate aid, benefits, or services to handicapped persons or to any class of handicapped persons than is provided to others unless the action is necessary to provide qualified handicapped persons with aid, benefits, or services that are as effective as those provided to others;

(v) Aid or perpetuate discrimination against a qualified handicapped person by providing significant assistance to an agency, organization, or person that discriminates on the basis of handicap in providing any aid, benefit, or services to beneficiaries of the recipient's program or activity;

(vi) Deny a qualified handicapped person the opportunity to participate

as a member of planning or advisory boards; or

(vii) Otherwise limit a qualified handicapped person in the enjoyment of any right, privilege, advantage, or opportunity enjoyed by others receiving the aid, benefit or service.

(2) For purposes of this part, aids, benefits, and services, to be equally effective, are not required to produce the identical result or level of achievement for handicapped and nonhandicapped persons, but must afford handicapped persons equal opportunity to obtain the same result, to gain the same benefit, or to reach the same level of achievement in the most integrated setting appropriate to the person's needs.

(3) Despite the existence of permissible separate or different aid, benefits, or services, a recipient may not deny a qualified handicapped person the opportunity to participate in aid, benefits, or services that are not separate or different.

(4) A recipient may not, directly or through contractual or other arrangements, utilize criteria or methods of administration that:

(i) Have the effect of subjecting qualified handicapped persons to discrimination on the basis of handicap;

(ii) Have the purpose or effect of defeating or substantially impairing accomplishment of the objectives of the recipient's program or activity with respect to handicapped persons; or

(iii) Perpetuate the discrimination of another recipient if both recipients are subject to common administrative control or are agencies of the same state.

(5) In determining the site of a facility, an applicant for assistance or a recipient may not make selections that—

(i) Have the effect of excluding handicapped persons from, denying them the benefits of, or otherwise subjecting them to discrimination under any program or activity that receives Federal financial assistance from DOE; or

(ii) Have the purpose or effect of defeating or substantially impairing the accomplishment of the objectives of the program or activity with respect to handicapped persons.

(6) As used in this section, the aid, benefit, or service provided under a program or activity receiving from

Department of Energy

§ 1040.66

Federal financial assistance includes any aid, benefit, or service provided in or through a facility that has been constructed, expanded, altered, leased or rented, or otherwise acquired, in whole or in part, with Federal financial assistance.

(c) *Aid, benefits, or services limited by Federal law.* The exclusion of non-handicapped persons from aid, benefits, or services limited by Federal statute or Executive order to handicapped persons or the exclusion of a specific class of handicapped persons from aid, benefits, or services limited by Federal statute or Executive order to a different class of handicapped persons is not prohibited by this part.

(d) Recipients shall take appropriate steps to ensure that communications with their applicants, employees and handicapped persons participating in federally assisted programs or activities or receiving aids, benefits or services, are available to persons with impaired vision and hearing.

(e) The enumeration of specific forms of prohibited discrimination in this paragraph does not limit the generality of the prohibition in paragraph (a) of this section.

[45 FR 40515, June 13, 1980, as amended at 68 FR 51347, Aug. 26, 2003]

§ 1040.64 Effect of State or local law or other requirements and effect of employment opportunities.

(a) The obligation to comply with this subpart is not obviated or alleviated by the existence of any State or local law or other requirement that, on the basis of handicap, imposes prohibitions or limits upon the eligibility of qualified handicapped persons to receive services or to practice any occupation or profession.

(b) The obligation to comply with this part is not obviated or alleviated because employment opportunities in any occupation or profession are or may be more limited for handicapped persons than for non-handicapped persons.

(c) *Effect of other regulations.* All regulations, orders, or similar directions issued by any officer of DOE which impose requirements designed to prohibit discrimination against individuals on the grounds of race, color, national ori-

gin, sex, age or handicap under any program or activity to which this part applies, and which authorize the suspension, termination or refusal to grant or to continue Federal financial assistance for failure to comply with these requirements, are superseded to the extent that discrimination is prohibited by this part. Nothing in this part is to relieve any person of the obligation assumed or imposed under any superseded regulation, order, instruction, or similar direction prior to the effective date of this part. Nothing in this part is to supersede the effective date of this part. Nothing in this part is to supersede Executive Orders 10925, 11114, 11063, 11246, and regulations issued under these authorities, or supersede any other regulations or instructions which prohibit discrimination on the ground of race, color, national origin, sex, age, or handicap in any program or activity to which this part does not apply.

[45 FR 40515, June 13, 1980, as amended at 68 FR 51347, Aug. 26, 2003]

§ 1040.65 Procedures.

The procedural provisions applicable to Title VI of the Civil Rights Act of 1964 are adopted and incorporated in this section by reference. These procedures may be found in subparts G and H of this part.

EMPLOYMENT PRACTICES

§ 1040.66 Discrimination prohibited.

(a) *General.* (1) No qualified handicapped person shall, on the basis of handicap, be subjected to discrimination employment under any program or activity to which this subpart applies.

(2) A recipient shall make all decisions concerning employment under any program or activity to which this part applies in a manner which ensures that discrimination on the basis of handicap does not occur and may not limit, segregate, or classify applicants or employees in any way that adversely affects their opportunities or status because of handicap.

(3) A recipient may not participate in a contractual or other relationship that has the effect of subjecting qualified handicapped applicants or employees to discrimination prohibited by

§ 1040.67

this subpart. The relationships referred to in this paragraph include relationships with employment and referral agencies, labor unions, organizations providing or administering fringe benefits to employees of the recipient, and organizations providing training and apprenticeships.

(b) *Specific activities.* The provisions of this subpart apply to:

(1) Recruitment, advertising, and processing of applications for employment;

(2) Hiring, upgrading, promotion, award of tenure, demotion, transfer, layoff, termination, right of return from layoff, and rehiring;

(3) Rates of pay or any other form of compensation and changes in compensation;

(4) Job assignments, job classifications, organizational structures, position descriptions, lines of progression, and seniority lists;

(5) Leaves of absence, sick or otherwise;

(6) Fringe benefits available by virtue of employment, whether administered by the recipient or not;

(7) Selection and provision of financial support for training, including apprenticeship, professional meetings, conferences, and other related activities, and selection for leaves of absence to pursue training;

(8) Employer sponsored activities, including those that are social or recreational; and

(9) Any other term, condition, or privilege of employment.

(c) A recipient's obligation to comply with this subpart is not affected by any inconsistent term of any collective bargaining agreement to which it is a party.

[45 FR 40515, June 13, 1980, as amended at 68 FR 51347, Aug. 26, 2003]

§ 1040.67 Reasonable accommodation.

(a) A recipient shall make reasonable accommodation to the known physical or mental limitations of an otherwise qualified handicapped applicant or employee unless the recipient can demonstrate that the accommodation would impose an undue hardship on the operation of its program or activity.

(b) Reasonable accommodation may include:

10 CFR Ch. X (1–1–16 Edition)

(1) Making facilities used by employees readily accessible to and usable by handicapped persons; and

(2) Job restructuring, part-time or modified work schedules, acquisition or modification of equipment or devices, the provision of readers or interpreters, and other similar actions.

(c) In determining, under paragraph (a) of this section, whether an accommodation would impose an undue hardship on the operation of a recipient's program or activity, factors to be considered include:

(1) The overall size of the recipient's program or activity with respect to number of employees, number and type of facilities, and size of budget;

(2) The type of the recipient's operation, including the composition and structure of the recipient's workforce; and

(3) The nature and cost of the accommodation needed.

(d) A recipient may not deny any employment opportunity to a qualified handicapped employee or applicant if the basis for the denial is the need to make reasonable accommodation to the physical or mental limitations of the employee or applicant.

[45 FR 40515, June 13, 1980, as amended at 68 FR 51347, Aug. 26, 2003]

§ 1040.68 Employment criteria.

(a) A recipient may not use any employment test or other selection criterion that screens out or tends to screen out handicapped persons unless the test score or other selection criterion, as used by the recipient, is shown to be job-related for the position in question.

(b) A recipient shall select and administer tests concerning employment to best ensure that, when administered to an applicant or employee who has a handicap that impairs sensory, manual, or speaking skills, the test results accurately reflect the applicant's or employee's job skills, aptitude or other factors the test purports to measure except where those skills are the factors that the test purports to measure.

§ 1040.69 Preemployment inquiries.

(a) Except as provided in paragraphs (b) and (c) of this section, a recipient may not conduct a pre-employment

Department of Energy

§ 1040.72

medical examination or may not make pre-employment inquiry of an applicant as to whether the applicant is a handicapped person or as to the nature or severity of a handicap. A recipient may, however, make pre-employment inquiry into an applicant's ability to perform job-related functions.

(b) When a recipient is taking remedial action to correct the effects of past discrimination, under §1040.7 of this part, or is taking voluntary action to overcome the effects of conditions that resulted in limited participation in its federally assisted program or activity under §1040.7 of subpart A of this part, or when a recipient is taking affirmative action under Sec. 503 of the Rehabilitation Act of 1973, as amended, the recipient may invite applicants for employment to indicate whether, and to what extent, they are handicapped
Provided that:

(1) The recipient states clearly on any written questionnaire used for this purpose or makes clear orally, if no written questionnaire is used, that the information requested is intended for use solely in connection with its remedial action obligations or its voluntary or affirmative action efforts; and

(2) The recipient states clearly that the information is requested on a voluntary basis, that it will be kept confidential as provided in paragraph (d) of this section, that refusal to provide it will not subject the applicant or employee to any adverse treatment, and that it will be used only in accordance with this subpart.

(c) Nothing in this section is to prohibit a recipient from conditioning an offer of employment on the results of a medical examination conducted prior to the employee's entrance on duty provided that all entering employees are subjected to the examination regardless of handicap or absence of handicap and results of the examination are used only in accordance with the requirements of this subpart.

(d) Information obtained in accordance with this section concerning the medical condition or history of the applicant is to be collected and maintained on separate forms that are to be accorded confidentiality as medical records, except that:

(1) Supervisors and managers may be informed regarding restrictions on the work or duties of handicapped persons and regarding necessary accommodations;

(2) First aid and safety personnel may be informed, where appropriate, if the condition might require emergency treatment; and

(3) Government officials investigating compliance with Sec. 504 of the Rehabilitation Act of 1973, as amended, shall be provided relevant information upon request.

ACCESSIBILITY

§ 1040.71 Discrimination prohibited.

No handicapped person shall, because a recipient's facilities are inaccessible to or unuseable by handicapped persons, be denied the benefits of, be excluded from participation in, or be subjected to discrimination under any program or activity that receives or benefits from Federal financial assistance from DOE.

§ 1040.72 Existing facilities.

(a) *Accessibility.* A recipient shall operate any program or activity to which this subpart applies so that when each part is viewed in its entirety it is readily accessible and usable by handicapped persons. This paragraph does not require a recipient to make each of its existing facilities or every part of a facility accessible to and useable by handicapped persons.

(b) *Methods.* A recipient may comply with the requirements of paragraph (a) of this section through such means as redesign of equipment, reassignment of classes or other services to accessible buildings, assignment of aids to beneficiaries, home visits, delivery of health, welfare, or other social services at alternate accessible sites, alteration of existing facilities and construction of new facilities in conformance with the requirements of §1040.73 or any other methods that result in making its program or activity accessible to handicapped persons. A recipient is not required to make structural changes in existing facilities where other methods are effective in achieving compliance with paragraph (a) of this section. In choosing among available methods for

§ 1040.73

meeting the requirement of paragraph (a) of this section, a recipient shall give priority to those methods that serve handicapped persons in the most integrated setting appropriate.

(c) *Time period.* A recipient shall comply with the requirement of paragraph (a) of this section within 60 days of the effective date of this subpart except that where structural changes in facilities are necessary, the changes are to be made as expeditiously as possible, but in no event later than three years after the effective date of this subpart.

(d) *Transition plan.* In the event that structural changes to facilities are necessary to meet the requirement of paragraph (a) of this section, a recipient shall develop, within 6 months of the effective date of this subpart, a transition plan setting forth the steps necessary to complete the changes. The plan is to be developed with the assistance of interested persons, including handicapped persons or organizations representing handicapped persons, and the plan is to meet with the approval of the Director, Federally Assisted Programs Division, Office of Equal Opportunity, DOE. A copy of the transition plan is to be made available for public inspection. At a minimum, the plan is to:

(1) Identify physical obstacles in the recipient's facilities that limit the accessibility to and usability by handicapped persons of its program or activity.

(2) Describe in detail the methods that will be used to make the facilities accessible;

(3) Specify the schedule for taking the steps necessary to achieve full accessibility under §1040.72(a) and, if the time period or the transition plan is longer than one year, identify steps that will be taken during each year of the transition period; and

(4) Indicate the person responsible for implementation of the plan.

(e) *Notice.* The recipient shall adopt and implement procedures to ensure that interested persons, including persons with impaired vision or hearing, can obtain information concerning the existence and location of services, activities, and facilities that are acces-

10 CFR Ch. X (1-1-16 Edition)

sible to, and useable by, handicapped persons.

[45 FR 40515, June 13, 1980, as amended at 68 FR 51347, Aug. 26, 2003]

§ 1040.73 New construction.

(a) *Design and construction.* Each facility or part of a facility constructed by, on behalf of, or for the use of a recipient is to be designed and constructed in a manner that the facility or part of the facility is readily accessible to, and useable by, handicapped persons, if the construction was commenced after the effective date of this subpart.

(b) *Alteration.* Each facility or part of a facility which is altered by, on behalf of, or for the use of a recipient after the effective date of this subpart in a manner that affects or could affect the usability of the facility or part of the facility is, to the maximum extent feasible, to be altered in a manner that the altered portion of the facility is readily accessible to and useable by handicapped persons.

(c) *Conformance with Uniform Federal Accessibility Standards.* (1) Effective as of January 18, 1991, design, construction, or alteration of buildings in conformance with sections 3-8 of the Uniform Federal Accessibility Standards (USAF) (appendix A to 41 CFR subpart 101-19.6) shall be deemed to comply with the requirements of this section with respect to those buildings. Departures from particular technical and scoping requirements of UFAS by the use of other methods are permitted where substantially equivalent or greater access to and usability of the building is provided.

(2) For purposes of this section, section 4.1.6(1)(g) of UFAS shall be interpreted to exempt from the requirements of UFAS only mechanical rooms and other spaces that, because of their intended use, will not require accessibility to the public or beneficiaries or result in the employment or residence therein of persons with physical handicaps.

(3) This section does not require recipients to make building alterations

Department of Energy

§ 1040.81

that have little likelihood of being accomplished without removing or altering a load-bearing structural member.

[45 FR 40515, June 13, 1980, as amended at 55 FR 52138, 52140, Dec. 19, 1990]

§ 1040.74 Accessibility in historic properties.

(a) *Methods to accomplish accessibility.* Recipients shall operate each program or activity involving historic properties so that when each part is viewed in its entirety it is readily accessible to and usable by handicapped persons. The recipient shall exhaust subsection (b)(1) (methods to accomplish accessibility without building alterations or structural changes) before proceeding to subsection (b)(2) (methods to accomplish program accessibility resulting in building alterations). The recipient shall exhaust subsection (b)(2) (methods to accomplish accessibility resulting in building alterations) before proceeding to subsection (b)(3) (methods to accomplish accessibility resulting in structural changes).

(1) *Methods to accomplish accessibility without building alterations or structural changes.* The recipient shall investigate compliance methods which do not alter the historic character or architectural integrity of the property and shall utilize such methods unless such methods are ineffective in achieving accessibility. Such methods may include, but are not limited to:

(i) Reassigning aid, benefits, or services to accessible locations within the facility.

(ii) Assigning persons to aid handicapped persons into or through an otherwise inaccessible facility.

(iii) Delivering aid, benefits, or services at alternative accessible sites operated by or available for such use by the recipient.

(iv) Adopting other innovative methods which make aid, benefits, or services accessible to the handicapped.

(2) *Methods to accomplish accessibility resulting in building alterations.* The recipient shall determine that accessibility cannot feasibly be accomplished by Methods to Accomplish Accessibility without Building Alterations or Structural Changes, subsection (b)(1) prior to utilizing building alteration as a method of accomplishing program ac-

cessibility. Alterations must comply with the accessibility standards adopted in these regulations. Building alterations shall be undertaken so as not to alter or destroy historically, architecturally, or culturally significant elements or features.

(3) *Methods to accomplish accessibility resulting in structural changes.* The recipient shall determine that accessibility cannot feasibly be accomplished by Methods to Accomplish Accessibility without Building Alterations or Structural Changes, subsection (b)(2) before considering structural changes as a method of accomplishing program accessibility. Structural changes must comply with the accessibility standards adopted in these regulations. Structural changes shall be undertaken so as not to alter or destroy historically, architecturally or culturally significant elements or features.

(b) *Modification or waiver of accessibility standards.* The applicability of the accessibility standards set forth in these regulations may be modified or waived on a case-by-case basis, upon application to the Director, FAPD, where the recipient can demonstrate that, because of the nature of the activity, the provision of access would be infeasible or would substantially impair the historic, architectural or cultural integrity of the historic property.

(National Historic Preservation Act of 1966, Pub. L. 89-665, 80 Stat 915, 16 U.S.C. 470; 11593, 3 CFR 1971 Comp., p. 154; 36 CFR part 800)

Subpart E—Nondiscrimination on the Basis of Age—Age Discrimination Act of 1975, as Amended

AUTHORITY: Age Discrimination Act of 1975, as amended (42 U.S.C. 6101 *et seq.*); 45 CFR part 90.

SOURCE: 50 FR 8089, Feb. 27, 1985, unless otherwise noted.

GENERAL PROVISIONS

§ 1040.81 Purpose.

The purpose of these regulations is to implement the Age Discrimination Act of 1975, as Amended, which prohibits

§ 1040.82

discrimination on the basis of age in programs or activities receiving Federal financial assistance. In accordance with the Age Discrimination Act, federally assisted programs or activities and recipients of Federal funds may continue to use age distinctions and factors other than age which meet the requirements of the Act and these regulations.

[50 FR 8089, Feb. 27, 1985, as amended at 68 FR 51348, Aug. 26, 2003]

§ 1040.82 Application.

(a) These regulations apply to each program or activity which receives Federal financial assistance provided by DOE.

(b) These regulations do not apply to—

(1) An age distinction contained in that part of a Federal, State, or local statute or ordinance adopted by an elected, general purpose legislative body which:

- (i) Provides any benefits or assistance to persons based on age; or
- (ii) Establishes criteria for participation in age-related terms; or
- (iii) Describes intended beneficiaries or target groups in age-related terms.

(2) Any employment practice of any employer, employment agency, labor organization, or any labor-management joint apprenticeship training program.

[50 FR 8089, Feb. 27, 1985, as amended at 68 FR 51348, Aug. 26, 2003]

§ 1040.83 Definitions.

(a) *Act* means the Age Discrimination Act of 1975 as amended title III of Pub. L. 94-135, 42 U.S.C. 6101 *et seq.*

(b) *Action* means any act, activity, policy, rule, standard or method of administration; or the use of any policy, rule, standard, or method of administration.

(c) *Age* means how old a person is or the number of years from the date of a person's birth.

(d) *Age distinction* means any action using age or an age-related term (for example, "18 or over").

(e) *Age-related term* means a word or words which necessarily imply a particular age or range of ages (for exam-

10 CFR Ch. X (1-1-16 Edition)

ple, "children", "adult", "older persons", but not "student").

(f) *Days* mean calendar days.

(g) *Discrimination* means unlawful treatment based on age.

(h) *FERC* means the Federal Energy Regulatory Commission.

(i) *Field Civil Rights Officer* means the official in each DOE field office with responsibility for administering DOE's Civil Rights Program related to non-discrimination in Federally assisted programs or activities.

(j) *Recipient* means any State or its political subdivision, instrumentality of a State or its political subdivision, any public or private agency, institution, organization, or other entity, or any person to which Federal financial assistance is extended, directly or through another recipient. Recipient includes any successor, assignee, or transferee, but excludes an individual who is the ultimate beneficiary of the assistance.

(k) *Secretary* means the Secretary, Department of Energy.

[50 FR 8089, Feb. 27, 1985, as amended at 68 FR 51348, Aug. 26, 2003]

STANDARDS FOR DETERMINING AGE DISCRIMINATION

§ 1040.84 Rules against age discrimination.

The rules stated in this section are limited by the exceptions contained in § 1040.86 and of these regulations.

(a) *General rule.* No person in the United States shall, on the basis of age, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under, any program or activity receiving Federal financial assistance.

(b) *Specific rules.* A recipient may not, in any program or activity receiving Federal financial assistance, directly or through contractual, licensing, or other arrangements use age distinctions or take any other actions which have the effect, on the basis of age, of:

(1) Excluding individuals from, denying them the benefits of, or subjecting them to discrimination under, a program or activity receiving Federal financial assistance; or

(2) Denying or limiting individuals in their opportunity to participate in any

Department of Energy

§ 1040.89-1

program or activity receiving Federal financial assistance.

(3) The specific forms of age discrimination listed in paragraph (b) of this section do not necessarily constitute a complete list.

§ 1040.85 Definitions of “Normal Operation” and “Statutory Objective”.

For purpose of §§1040.86 and 1040.87, the terms *normal operation* and *statutory objective* shall have the following meanings:

(a) *Normal operation* means the operation of a program or activity without significant changes that would impair its ability to meet its objectives.

(b) *Statutory objective* means any purpose of a program or activity expressly stated in any Federal, State, or local statute or ordinance adopted by an elected, general purpose legislative body.

§ 1040.86 Exceptions to the rules against age discrimination. Normal operation or statutory objective of any program or activity.

A recipient is permitted to take an action, otherwise prohibited by §1040.84, if the action reasonably takes into account age as a factor necessary to the normal operation or the achievement of any statutory objective of a program or activity. An action reasonably takes into account age as a factor necessary to the normal operation of a program or activity if:

(a) Age is used as a measure or approximation of one or more other characteristics;

(b) The other characteristic(s) must be measured or approximated in order for the normal operation of the program or activity to continue or to achieve any statutory objective of the program or activity;

(c) The other characteristic(s) can be reasonably measured or approximated by the use of age; and

(d) The other characteristic(s) are impractical to measure directly on an individual basis.

§ 1040.87 Exceptions to the rules against age discrimination. Reasonable factors other than age.

A recipient is permitted to take an action otherwise prohibited by §1040.84 which is based on a factor other than

age, even though that action may have a disproportionate effect on persons of different ages. An action may be based on a factor other than age only if the factor bears a direct and substantial relationship to the normal operation of the program or activity or to the achievement of a statutory objective.

§ 1040.88 Remedial and affirmative action by recipients.

(a) Where a recipient is found to have discriminated on the basis of age, the recipient shall take such remedial action as the Director, Office of Civil Rights and Diversity, considers necessary to overcome the effects of the discrimination.

(b) Even in the absence of a finding of discrimination, a recipient may take affirmative action to overcome the effects of conditions that resulted in limited participation in the recipient's program or activity on the basis of age.

(c) If a recipient operating a program or activity which serves the elderly or children, in addition to persons of other ages, provides special benefits to the elderly or to children, the provision of those benefits shall be presumed to be voluntary affirmative action provided that it does not have the effect of excluding otherwise eligible persons from participation in the program or activity.

[50 FR 8089, Feb. 27, 1985, as amended at 68 FR 51348, Aug. 26, 2003]

§ 1040.89 Burden of proof.

The burden of proving that an age distinction or other action falls within the exceptions outlined in §§1040.86 and 1040.87 is on the recipient of Federal financial assistance.

RESPONSIBILITIES OF DOE RECIPIENTS

§ 1040.89-1 General responsibilities.

Each DOE recipient has primary responsibility to ensure that its programs or activities are in compliance with the Act and these regulations. A recipient also has responsibility to maintain records, provide information, and afford access to its records to DOE, to the extent required to determine

§ 1040.89-2

whether it is in compliance with the Act and these regulations.

[50 FR 8089, Feb. 27, 1985, as amended at 68 FR 51348, Aug. 26, 2003]

§ 1040.89-2 Notice to subrecipients.

Where a recipient awards Federal financial assistance from DOE to its subrecipients, the recipient shall provide the subrecipients written notice of their obligations under these regulations.

§ 1040.89-3 Information requirements.

Each recipient shall: (a) Upon request make available to DOE information necessary to determine whether the recipient is complying with the Act and these regulations.

(b) Permit reasonable access by DOE, upon request, to the books, records, accounts, and other recipient facilities and sources of information to the extent necessary to determine whether the recipient is in compliance with the Act and these regulations.

INVESTIGATION, CONCILIATION AND ENFORCEMENT PROCEDURES

§ 1040.89-4 Compliance reviews.

(a) DOE may conduct preaward and postaward compliance reviews of recipients as prescribed in this part or use other similar procedures that will permit it to investigate and correct violations of the Act and these regulations. DOE may conduct these reviews even in the absence of a complaint against a recipient. The review may be as comprehensive as necessary to determine whether a violation of these regulations has occurred.

(b) If a compliance review indicates a violation of the Act or these regulations, DOE will attempt to achieve voluntary compliance with the Act. If voluntary compliance cannot be achieved, DOE will arrange for enforcement as described in § 1040.89-10.

§ 1040.89-5 Complaints.

(a) Any person, individually or as a member of a class or on behalf of others, may file a written complaint with DOE alleging discrimination prohibited by the Act or these regulations. A complainant must file a complaint within 180 days from the date he/she first had

10 CFR Ch. X (1-1-16 Edition)

knowledge of the alleged act of discrimination. For good cause shown, however, the Director, Office of Civil Rights and Diversity, may extend the time limit for filing a complaint. Complaints may be submitted to Field Civil Rights Officers located in DOE's field offices or to the Director, Office of Civil Rights and Diversity, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585.

(b) The Director, Office of Civil Rights and Diversity, will attempt to facilitate the filing of complaints wherever possible, including taking the following measures:

(1) Accepting as a sufficient complaint any written statement which identifies the parties involved and the date the complainant first had knowledge of the alleged violation, describes generally the action or practice complained of, and is signed by the complainant.

(2) Freely permitting a complainant to add information to the complaint to meet the requirements of a sufficient complaint.

(3) Widely disseminating information regarding the obligations of recipients under the Act and these regulations.

(4) Notifying the complainant and the recipient of their rights and obligations under the complaint procedure, including the right to have a representative at all stages of the complaint procedure.

(5) Notifying the complainant and the recipient (or their representatives) of their right to contact DOE for information and assistance regarding the complaint resolution process.

(c) The Director, Office of Civil Rights and Diversity, will refer any complaint outside the jurisdiction of DOE to the proper Federal department or agency and will also notify the complainant and the recipient of the referral. The notification will contain an explanation for the referral and the name, telephone number, and address of the Federal department or agency office having jurisdiction over the matter complained.

[50 FR 8089, Feb. 27, 1985, as amended at 68 FR 51348, Aug. 26, 2003]

Department of Energy

§ 1040.89-9

§ 1040.89-6 Mediation.

(a) *Referral of complaints for mediation.* DOE will refer to the Federal Mediation and Conciliation Service, in accordance with 45 CFR 90.43(c)(3), all complaints that:

(1) Fall within the jurisdiction of the Act and these regulations; and

(2) Contain all information necessary for further processing.

(b) Both the complainant and the recipient shall participate in the mediation process to the extent necessary to reach an agreement or make an informed judgment that an agreement is not possible. There must be at least one meeting with the mediator before the Director, Office of Civil Rights and Diversity, will accept a judgment that an agreement is not possible. However, the recipient and the complainant need not meet with the mediator at the same time.

(c) If the complainant and the recipient reach an agreement, the mediator shall prepare a written statement of the agreement and have the complainant and the recipient sign it. The mediator shall send a copy of the agreement to the Director, Office of Civil Rights and Diversity, DOE. DOE will take no further action on the complaint unless the complainant or the recipient fails to comply with the agreement.

(d) DOE will use the mediation process for a maximum of 60 days after referring a complaint to mediation. Mediation ends if:

(1) 60 days elapse from the time the mediation agency receives the complaint; or

(2) Prior to the end of the 60 day mediation period, an agreement is reached; or

(3) Prior to the end of that 60 day mediation period, the mediator determines that an agreement cannot be reached.

(e) The mediator shall return unresolved complaints to the Director, Office of Civil Rights and Diversity, DOE.

[50 FR 8089, Feb. 27, 1985, as amended at 68 FR 51348, Aug. 26, 2003]

§ 1040.89-7 Investigation.

(a) *Informal Investigation.* (1) The Director, Office of Civil Rights and Diversity, will review complaints that are

unresolved after mediation or are reopened because of a violation of a mediation agreement.

(2) As part of this review, Field Civil Rights Officers will use informal fact finding methods, including joint or separate discussions with the complainant and recipient, to establish the facts and, if possible, settle the complaint on terms that are mutually agreeable to the parties.

(3) If the complaint is resolved during the informal investigation, DOE will put the agreement in writing and have it signed by the parties and the Director, Office of Civil Rights and Diversity.

(4) The settlement shall not affect the operation of any other enforcement effort of DOE, including compliance reviews and investigation of other complaints which may involve the recipient.

(5) The settlement is not a finding of discrimination against a recipient.

(b) *Formal Investigation.* If Field Civil Rights Officers cannot resolve the complaint through informal inquiry, the Director, Office of Civil Rights and Diversity, will assign an Investigator to conduct a formal investigation of the complaint. If the investigation indicates a violation of the Act or these regulations, DOE will attempt to obtain voluntary compliance. If DOE cannot obtain voluntary compliance, it will begin enforcement as described in § 1040.89-10 and 10 CFR part 1040, subpart H, § 1040.111.

[50 FR 8089, Feb. 27, 1985, as amended at 68 FR 51348, Aug. 26, 2003]

§ 1040.89-8 Prohibition against intimidation or retaliation.

A recipient may not engage in acts of intimidation or retaliation against any person who:

(a) Attempts to assert a right protected by the Act or these regulations; or

(b) Cooperates in any mediation, investigation, hearing, or other part of DOE's investigation, conciliation, and enforcement process.

§ 1040.89-9 Compliance procedure.

(a) DOE may enforce the Act and these regulations through procedures

§ 1040.89-10

prescribed in subpart H of DOE regulation 10 CFR part 1040—Nondiscrimination in Federally Assisted Programs or Activities, which calls for—

(1) Termination of a recipient's Federal financial assistance from DOE for a program activity in which the recipient has violated the Act or these regulations. The determination of the recipient's violation may be made only after a recipient has had an opportunity for a hearing on the record before the Federal Energy Regulatory Commission (FERC). Therefore, cases which are settled in mediation, or prior to a hearing, will not involve termination of a recipient's Federal financial assistance from DOE under this section.

(2) Any other means authorized by law including, but not limited to:

(i) Referral to the Department of Justice for proceedings to enforce any rights of the United States or obligations of the recipient created by the Act or these regulations, or under the terms of the Federal financial assistance.

(ii) Use of any requirement of, or referral to, any Federal, State, or local government agency that will have the effect of correcting a violation of the Act of these regulations.

(b) DOE will limit any termination under §1040.89-9(a)(1) to the particular recipient and particular program or activity DOE finds in violation of these regulations. DOE will not base any part of a termination on a finding with respect to any program or activity of the recipient which does not receive Federal financial assistance from DOE.

(c) DOE will take no action under paragraph (a) until:

(1) The Director, Office of Civil Rights and Diversity, has advised the recipient of its failure to comply with the Act, these regulations, or the terms of the Federal financial assistance and has determined that voluntary compliance cannot be obtained.

(2) Thirty (30) days have elapsed after the Secretary or the Secretary's designee has sent a written report of the circumstances and grounds of the action to the committees of the Congress having legislative jurisdiction over the program or activity involved. The Secretary will file a report whenever any

10 CFR Ch. X (1-1-16 Edition)

action is taken under paragraph (a) of this section.

(d) DOE also may defer granting new Federal financial assistance to a recipient when a hearing under §1040.89-10 is initiated.

(1) New Federal financial assistance from DOE includes all assistance for which DOE requires an application or approval, including renewal or continuation of existing activities, or authorization of new activities during the deferral period. New Federal financial assistance from DOE does not include increases in funding as a result of changes, computation of formula awards, or assistance awarded prior to the beginning of a hearing under §1040.89-10.

(2) DOE will not defer new assistance until the recipient has received a notice of an opportunity for a hearing under §1040.89-10. DOE will not continue a deferral for more than 60 days unless a hearing has begun within that time or the time for beginning the hearing has been extended by mutual consent of the recipient and FERC. DOE will not continue a deferral for more than 30 days after the close of the hearing, unless the hearing resulted in a finding against the recipient.

[50 FR 8089, Feb. 27, 1985, as amended at 68 FR 51348, Aug. 26, 2003]

§ 1040.89-10 Hearings, decisions, post-termination proceedings.

DOE procedural provisions applicable to title VI of the Civil Rights Act of 1964 apply to DOE enforcement of these regulations. They are 10 CFR subpart H §§ 1040.121 through 1040.124.

§ 1040.89-11 Remedial action by recipients.

Where the Director, Office of Civil Rights and Diversity, finds a recipient has discriminated on the basis of age, the recipient shall take such remedial action as the Director, OEO, may require to end the discriminatory practice or policy and/or to overcome the effects of the discrimination.

[50 FR 8089, Feb. 27, 1985, as amended at 68 FR 51348, Aug. 26, 2003]

Department of Energy

§ 1040.89-13

§ 1040.89-12 Alternate funds disbursal procedure.

(a) When DOE withholds funds from a recipient under these regulations, the Secretary or designee may disburse the withheld funds directly to an alternate recipient(s), any public or private organization or agency, or State or political subdivision of the State.

(b) The Secretary or designee will require any alternate recipient to demonstrate:

(1) The ability to comply with these regulations; and

(2) The ability to achieve the goals of the Federal statute authorizing the Federal financial assistance.

[50 FR 8089, Feb. 27, 1985, as amended at 68 FR 51348, Aug. 26, 2003]

§ 1040.89-13 Exhaustion of administrative remedies.

(a) A complainant may file a civil action following the exhaustion of administrative remedies under the Act. Administrative remedies are exhausted if:

(1) One hundred eighty (180) days have elapsed since the complainant filed the complaint and DOE has made no findings with regard to the complainant; or

(2) DOE issues any findings in favor of the recipient.

(b) If DOE fails to make a finding within 180 days or issues a finding in favor of the recipient, the Director, Office of Civil Rights and Diversity, will:

(1) Promptly advise the complainant of this fact; and

(2) Advise the complainant of his or her right to bring a civil action for injunctive relief; and

(3) Inform the complainant:

(i) That the complainant may bring a civil action only in a United States District Court for the district in which the recipient is located or transacts business;

(ii) That a complainant prevailing in a civil action has the right to be awarded the costs of the action, including reasonable attorney fees, but that the complainant must demand these costs in the complaint;

(iii) That, before commencing the action, the complainant shall give 30 days notice, by registered mail, to the Secretary of DOE, the Secretary of the Department of Health and Human Services, the Attorney General of the United States, and the recipient;

(iv) That the notice must state: the alleged violation of the Act and these regulations; the relief requested; the court in which the complainant is bringing the action; and whether or not attorney fees are demanded in the event the complainant prevails; and

(v) That the complainant may not bring an action if the same alleged violation of the Act by the same recipient is the subject of a pending action in any court of the United States.

[50 FR 8089, Feb. 27, 1985, as amended at 68 FR 51348, Aug. 26, 2003]

Subpart F—Nondiscrimination Under Title VIII of the Civil Rights Act of 1968, as Amended [Reserved]

Subpart G—Program Monitoring

§ 1040.101 Compliance reviews.

(a) The Director shall periodically conduct compliance reviews of selected recipients of DOE Federal financial assistance.

(b) The Director shall seek to review those recipients which have the most serious equal opportunity problems which cause the greatest disparity in delivery of services on a nondiscriminatory basis. Selection for review is to be made on the basis of the following criteria, among others:

(1) The relative disparity between the percentage of minorities, women, or handicapped persons, in the relevant labor market, and the percentage of minorities, women, or handicapped persons, employed by the recipient if employment practices are covered by this part;

(2) The percentage of individuals covered by the Age Discrimination Act of 1975, minorities, women and handicapped persons in the population receiving program benefits.

(3) The number and nature of discrimination complaints filed against a

recipient with DOE or other Federal agencies;

(4) The scope of the problems revealed by an investigation commenced on the basis of a complaint filed with DOE against a recipient; and

(5) The amount of assistance provided to the recipient.

(c) After selection of a recipient for review, the Director Federally Assisted Programs Division or the Director's designee, shall inform the recipient of the selection. The notice shall be in writing and posted thirty days prior to the scheduled review. The letter will ordinarily request data pertinent to the review and advise the recipient of:

(1) The practices to be reviewed;

(2) The programs or activities affected by the review;

(3) The opportunity to make, at any time prior to receipt of DOE's finding, a written submission responding to DOE which explains, validates, or otherwise addresses the practices under review; and

(4) The schedule under which the review will be conducted and a determination of compliance or noncompliance made.

(d) Within 90 days of arriving on-site to conduct the review, the Director, FAPD, shall advise the recipient, in writing, of:

(1) Preliminary findings;

(2) Where appropriate, recommendations for achieving voluntary compliance; and

(3) The opportunity to request DOE to engage in voluntary compliance negotiations prior to the Director's final determination of compliance or non-compliance. The Director or the Director's designee shall notify the Assistant Attorney General at the same time the recipient is notified of any matter where recommendations for achieving voluntary compliance are made.

(e) If, within 45 days of the recipient's notification under paragraph (d) of this section, the Director's (FAPD) recommendations for compliance are not met, or voluntary compliance is not secured, or the preliminary findings are not shown to be false, the matter will be forwarded to the Director for a determination of compliance or noncompliance. The determination is to be made no later than 60 days after the recipient has been notified of the preliminary findings. If the Director makes a determination of noncompliance, the Department shall institute actions specified in subparts G and H.

(f) Where the Director makes a formal determination of noncompliance, the recipient and the Assistant Attorney General shall be immediately advised, in writing, of the determination and of the fact that the recipient has an additional 10 days in which to come into voluntary compliance. If voluntary compliance has not been achieved within the 10 days, the Director shall institute proceedings under subpart H.

(g) All agreements to come into voluntary compliance shall be in writing and signed by the Director and an official who has authority to legally bind the recipient.

§ 1040.102 Compliance information.

(a) *Cooperation and assistance.* Each responsible Departmental official shall, to the fullest extent practicable, seek the cooperation of recipients in obtaining compliance with this part and shall provide assistance and guidance to recipients to help them comply voluntarily with this part.

(b) *Compliance reports.* Each recipient shall keep reports and submit to the responsible Department official or his/

her designee, timely, complete, and accurate compliance reports at the times, in such form, and containing information as the responsible Department official or the designee may determine to be necessary to enable him/her to ascertain whether the recipient has complied or is complying with this part. In general, recipients should have available for DOE data on program participants, identified by race, color, national origin, sex, age and handicap status. In the case of any program under which a primary recipient extends Federal financial assistance to any other recipient or subcontracts with any other person or group, such other recipient shall also submit compliance reports to the primary recipient which will enable the primary recipient to carry out its obligations under this part.

(c) *Access to sources of information.* Each recipient shall permit access by the responsible Department official or his/her designee during normal business hours to books, records, personnel records, accounts, other sources of information, and its facilities, which are pertinent to ascertain compliance with this part. The requirement for access to sources of information shall be contained in the certificate of assurance and agreed to by the recipient as a condition to award. Whenever any information required of a recipient is in the exclusive possession of any other agency, institution, or person and that agency, institution, or person fails or refuses to furnish that information, the recipient shall certify this in its report and set forth the efforts which it has made to obtain the information. The sub-recipient in such case shall be subject to proceedings described under subpart H of this part.

(d) *Information to beneficiaries and participants.* Each recipient shall make available to participants, beneficiaries, and other interested persons information regarding the provisions of this section and its applicability to the program under which the recipient receives Federal financial assistance. Information is to be made available to beneficiaries, participants, and other interested persons in a manner which the responsible Department officials find necessary to inform such persons

of the protections against discrimination assured them by this part and the statutes to which this part applies.

§ 1040.103 [Reserved]

§ 1040.104 Complaint investigation.

(a) The Director, FAPD, shall investigate complaints of discrimination that allege a violation of—

(1) Title VI of the Civil Rights Act of 1964, Sec. 16 of the Federal Energy Administration Act of 1974, as amended, or Sec. 401 of the Energy Reorganization Act of 1974;

(2) Title IX of the Education Amendments of 1972, as amended;

(3) Section 504 of the Rehabilitation Act of 1973, as amended;

(4) Age Discrimination Act of 1975, as amended, (reserved in this part);

(5) Title VIII of the Civil Rights Act of 1968, as amended, (reserved in this part);

(6) This part; and

(7) Civil rights provisions of statutes administered pursuant to the DOE Organization Act, Pub. L. 95-91.

(b) No complaint will be investigated if it is received by an appropriate Departmental official more than 180 days after the date of the alleged discrimination, unless the time for filing is extended by the Director, FAPD, for good cause shown. Where a complaint is accepted for investigation, the Director, FAPD, will initiate a DOE investigation. The Director, FAPD, who is responsible for the investigation, shall notify the complainant, in writing, if the complaint has been accepted or rejected.

(c) The Director, FAPD, or his/her designee shall conduct investigations of complaints as follows:

(1) Within 35 days of receipt of a complaint, the Director, FAPD, shall:

(i) determine whether DOE has jurisdiction under paragraphs (a) and (b) of this section;

(ii) If jurisdiction is not found, wherever possible, refer the complaint to the Federal agency with such jurisdiction and advise the complainant;

(iii) If jurisdiction is found, notify the recipient alleged to be discriminating of receipt of the complaint; and

(iv) Initiate the investigation.

(2) The investigation will ordinarily be initiated by a letter requesting data pertinent to the complaint and advising the recipient of:

(i) The nature of the complaint and, with the written consent of the complainant, the identity of the complainant. The identity of the complainant may be revealed by the Director, FAPD, OEO, without the complainant's written consent if the Director, FAPD, OEO, determines that such action is necessary for resolution of the complaint;

(ii) The program or activities affected by the complaint;

(iii) The opportunity to make, at any time prior to receipt of DOE's findings, a documentary submission responding to, rebutting, or denying the allegations made in the complaint; and

(iv) The schedule under which the complaint will be investigated and a determination of compliance made.

(3) Within 90 days of initiating the investigation, the Director, FAPD, shall advise the recipient, in writing of:

(i) Preliminary findings;

(ii) Where appropriate, recommendations for achieving voluntary compliance; and

(iii) The opportunity to request DOE to engage in voluntary compliance negotiations prior to the Director's final determination of compliance or non-compliance. The Director or the Director's designee shall notify the Assistant Attorney General and the recipient of any matter where recommendations for achieving voluntary compliance are made.

(4) If, within 45 days of the recipient's notification under paragraph (c)(3) of this section, the Director's (FAPD) recommendations for compliance are not met, or voluntary compliance is not secured, or the preliminary findings are not shown to be false, the matter will be forwarded to the Director, OEO, for a determination of compliance or non-compliance. The determination is to be made no later than 60 days after the recipient has been notified of the preliminary findings. If the Director makes a determination of noncompliance, the Department shall institute actions specified in subpart H.

(5) Where the Director makes a formal determination of noncompliance,

§ 1040.111

the recipient and the Assistant Attorney General shall be immediately advised, in writing, of the determination and of the fact that the recipient has an additional 10 days in which to come into voluntary compliance. If voluntary compliance has not been achieved within the 10 days, the Director shall institute proceedings under subpart H. All agreements to come into voluntary compliance shall be in writing and signed by the Director, OEO, and an official who has authority to legally bind the recipient. The complainant shall also be notified of any action taken including the closing of the complaint or achievement of voluntary compliance.

(6) If the complainant or party other than the Attorney General has filed suit in Federal or State court alleging the same discrimination alleged in a complaint to DOE, and if during DOE's investigation, the trial of that suit would be in progress, DOE will consult with the Assistant Attorney General and court records to determine the need to continue or suspend the investigation and will monitor the litigation through the court docket and contacts with the complainant. Upon receipt of notice that the court has made a finding of discrimination against a recipient that would constitute a violation of this part, the DOE may institute administrative proceedings as specified in subpart H after DOE has advised the recipient, in writing, of an opportunity to request voluntary compliance under this section. All agreements to come into voluntary compliance shall be in writing and signed by the Director and an official who has authority to legally bind the recipient.

(7) The time limits listed in paragraphs (c)(1) through (c)(6) of this section shall be appropriately adjusted where DOE requests another Federal agency to act on the complaint. DOE is to monitor the progress of the matter through liaison with the other agency. Where the request to act does not result in timely resolution of the matter, DOE is to institute appropriate proceedings as required by this part.

(d) *Intimidatory or retaliatory acts prohibited.* No recipient or other person shall intimidate, threaten, coerce, or discriminate against any individual for

10 CFR Ch. X (1–1–16 Edition)

the purpose of interfering with any right or privilege secured by the laws implemented in this part or because the complainant has made a complaint, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this subpart. The identity of complainants is to be kept confidential except as determined by the Director, FAPD, to be necessary to carry out the purpose of this subpart, including investigations, hearings, or judicial proceedings arising thereunder.

Subpart H—Enforcement

MEANS OF EFFECTING COMPLIANCE

§ 1040.111 Means available.

If there appears to be a failure or threatened failure to comply with any of the provisions of this part, and if the noncompliance or threatened noncompliance cannot be corrected by voluntary means, compliance with this part may be effected by the suspension, termination of, or refusal to grant or to continue Federal financial assistance, or by any other means authorized by law. Such other means may include, but are not limited to:

(a) Referral to the Department of Justice with a recommendation that appropriate proceedings be brought to enforce any rights of the United States under any law including the Civil Rights Act of 1964, other statutes to which this part applies, or any assurance or other contractual undertaking; and

(b) Any applicable proceeding under State or local law.

§ 1040.112 Noncompliance with assurances.

If an applicant fails or refuses to furnish an assurance required under § 1040.4 of subpart A of this part, or otherwise fails or refuses to comply with a requirement imposed by this part, such as § 1040.102(c), subpart G of this part, action to refuse Federal financial assistance shall be taken in accordance with procedures of § 1040.114 of this subpart.

Department of Energy

§ 1040.121

§ 1040.113 Deferral.

DOE may defer action on pending applications for assistance in such a case during pendency of administrative proceedings under § 1040.114 of this subpart.

§ 1040.114 Termination of or refusal to grant or to continue Federal financial assistance.

No order suspending, terminating, or refusing to grant or continue Federal financial assistance is to become effective until:

(a) Informational notice of the proposed order is given to the Executive Assistant to the Secretary, if the action is contemplated against a State or local government;

(b) The Director has advised the applicant or recipient of his/her failure to comply and has determined that compliance cannot be secured by voluntary means. (It will be determined by the Director that compliance cannot be secured by voluntary means if it has not been secured within the time periods specifically set forth by this part.)

(c) There has been an express finding on the record, after opportunity for hearing, of a failure by the applicant or recipient to comply with the requirement imposed by or under this part:

(d) The FERC has notified the Secretary of its finding of noncompliance; and

(e) The expiration of 30 days after the Secretary or a designee has filed with the committee of the House of Representatives and the committee of the Senate having legislative jurisdiction over the program involved, a full written report of the circumstances and the grounds for such action. Any action to suspend, terminate, or to refuse to grant or to continue Federal financial assistance is to be limited to the particular political entity or part of that entity or other applicant or recipient to whom the finding has been made and shall be limited in its effect to the particular program or part of the program in which the noncompliance has been found.

§ 1040.115 Other means authorized by law.

No action to effect compliance by any other means authorized by law is to be taken until—

(a) The Director has determined that compliance cannot be secured by voluntary means;

(b) The recipient or other person has been notified by the Director, in writing, that it has been found in formal noncompliance and that it has 10 days before formal enforcement proceedings begin in which to enter into a written voluntary compliance agreement.

(c) The expiration of at least ten (10) days from the mailing of the notice to the recipient or other person.

OPPORTUNITY FOR HEARING

§ 1040.121 Notice of opportunity for hearing.

(a) Whenever an opportunity for hearing is required by § 1040.113, the Director, OEO, or his/her designee shall serve on the applicant or recipient, by registered, certified mail, or return receipt requested, a notice of opportunity for hearing which will:

(1) Inform the applicant or recipient of the action proposed to be taken and of his/her right within twenty (20) days of the date of the notice of opportunity for hearing, or another period which may be specified in the notice, to request a hearing;

(2) Set forth the alleged item or items of noncompliance with this part;

(3) Specify the issues;

(4) State that compliance with this part may be effected by an order providing for the termination of or refusal to grant or to continue assistance, as appropriate, under the program involved; and

(5) Provide that the applicant or recipient may file a written answer with the Director, OEO, to the notice of opportunity for hearing under oath or affirmation within twenty (20) days of its date, or another period which may be specified in the notice.

(b) An applicant or recipient may file an answer, and waive or fail to request a hearing, without waiving the requirement for findings of fact and conclusions of law or the right to seek review by the FERC in accordance with the

§ 1040.122

provisions established by the FERC. At the time an answer is filed, the applicant or recipient may also submit written information or argument for the record if he/she does not request a hearing.

(c) An answer or stipulation may consent to the entry of an order in substantially the form set forth in the notice of opportunity for hearing. The order may be entered by the General Counsel or his/her designee. The consent of the applicant or recipient to the entry of an order shall constitute a waiver by him/her of a right to:

(1) A hearing under Sec. 902 of title IX of the Education Amendments of 1972, Section 602 of title VI of the Civil Rights Act of 1964, Section 16, Section 401 and §1040.113;

(2) Findings of fact and conclusions of law; and

(3) Seek review by the FERC.

(d) The failure of an applicant or recipient to file an answer within the period prescribed or, if the applicant or recipient requests a hearing, his failure to appear at the hearing shall constitute a waiver by him/her of a right to:

(1) A hearing under Section 902 of title IX of the Education Amendments of 1972, Section 602 of title VI of the Civil Rights Act of 1964, Section 16, Section 401, and §1040.113;

(2) Conclusions of law; and

(3) Seek review by the FERC.

In the event of such a waiver, the Secretary or a designee may find the facts on the basis of the record available and enter an order in substantially the form set forth in the notice of opportunity for hearing.

(e) An order entered in accordance with paragraph (c) or (d) of this section shall constitute the final decision of DOE unless the FERC, within forty-five (45) days after entry of the order, issues a subsequent decision which shall then constitute the final decision of DOE.

(f) A copy of an order entered by the FERC official shall be mailed to the applicant or recipient and to the complainant, if any.

10 CFR Ch. X (1-1-16 Edition)

§ 1040.122 Request for hearing or review.

Whenever an applicant or recipient requests a hearing or review in accordance with §1040.121(a)(1) or (b), the DOE General Counsel or his/her designee shall submit such request along with other appropriate documents to the FERC.

§ 1040.123 Consolidated or joint hearings.

In cases in which the same or related facts are asserted to constitute non-compliance with this part with respect to two or more programs to which this part applies or noncompliance with this part and the regulations of one or more other Federal departments or agencies issued to implement the requirements of the laws cited in this part, the Secretary or a designee, in coordination with FERC may, by agreement with other departments or agencies, where applicable, provide for the conduct of consolidated or joint hearings and for the application to such hearings of rules of procedure not inconsistent with this part. Final decision in such cases, insofar as programs subject to this part are concerned, shall be made in accordance with procedures established by the FERC.

§ 1040.124 Responsibility of the Federal Energy Regulatory Commission.

The FERC has authority under section 402(b) of the DOE Organization Act, Pub. L. 95-91, to promulgate regulations regarding the conduct of hearings to deny or terminate Federal financial assistance. Rules for conduct of hearings will be published by the FERC and will be placed in title 18 CFR.

JUDICIAL REVIEW

§ 1040.131 Judicial review.

Final DOE actions taken under this part to withhold or terminate Federal financial assistance are subject to judicial review under the following laws:

(a) Title VI—Section 603 of the Civil Rights Act of 1964;

(b) Title IX—Section 903 of the Education Amendments of 1972;

(c) Section 16, Section 401, Section 504—Pub. L. 89-554, 5 U.S.C. 702;

(d) Section 419 and Section 420 of the Energy Conservation and Production Act of 1976, as amended.

APPENDIX A TO PART 1040—FEDERAL FINANCIAL ASSISTANCE OF THE DEPARTMENT OF ENERGY TO WHICH THIS PART APPLIES

1. *Access permits.* Atomic Energy Act of 1954, as amended, Sections 1, 2, 3 and 161(i), Public Law 83-703; 68 Stat. 919; 42 U.S.C. 2011-13, 2201; and Title I Section 104(c) of the Energy Reorganization Act of 1974, Public Law 93-438; 88 Stat. 1237; 42 U.S.C. 5814; Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95-91.

2. *Motion pictures film libraries.* Atomic Energy Act of 1954, as amended, Public Law 83-703, Sections 3 and 141(b), (68 Stat. 919), 42 U.S.C. 2013 and 2161; the Energy Reorganization Act of 1974, Public Law 93-438, Title I, Sections 103 and 107, (88 Stat. 1240), 42 U.S.C. 5817; Department of Energy Organization Act, Public Law 95-91, Title I, Section 102, and Title III, Section 301, (19 Stat. 565), 42 U.S.C. 7101; the National Energy Extension Service Act, Title V, Public Law 95-39, (91 Stat. 191), 42 U.S.C. 7001.

3. *Granting of patent licenses.* Atomic Energy Act of 1954, as amended, Sections 156 and 161(g); Public Law 83-703; 68 Stat. 919, 42 U.S.C. 2186 and 2201; Federal Nonnuclear Energy Research and Development Act of 1974; Section 9(f)(g)(h); Public Law 93-577; 88 Stat. 1887; 42 U.S.C. 5908(f)(g)(h); Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95-91.

4. *University Laboratory Cooperative Program.* Atomic Energy Act of 1954, as amended, Section 31 (a) and (b); Public Law 83-703; 68 Stat. 919; 42 U.S.C. 2051; and Title I, Section 107, of the Energy Reorganization Act of 1974; Public Law 93-438; 88 Stat. 1240; 42 U.S.C. 5817; Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95-91.

5. *Facility training institutes, short courses, and workshops on energy and environmental subjects.* Atomic Energy Act of 1954, as amended, Section 31 (a) and (b); Public Law 83-703; 68 Stat. 919; 42 U.S.C. 2051; and Title I, Section 107, of the Energy Reorganization Act of 1974; 42 U.S.C. 7101; Public Law 93-438; 88 Stat. 1240; 42 U.S.C. 5817; Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95-91.

6. *Reactor sharing and fuel assistance.* Atomic Energy Act of 1954, as amended, Section 31 (a) and (b), Public Law 83-703; 68 Stat. 919; 42 U.S.C. 2051; and Title I, Section 107, of the Energy Reorganization Act of 1974; Public Law 93-438, 88 Stat. 1240; 42 U.S.C. 5817; Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95-91.

7. *Traineeships for graduate students in energy related fields.* Atomic Energy Act of 1954,

as amended, Sections 31 (a) (b); Public Law 83-703; 68 Stat. 919; 42 U.S.C. 2051; and Title I, Section 107, of the Energy Reorganization Act of 1974; Public Law 93-458; 88 Stat. 1240; 42 U.S.C. 5817; Public Law 93-409, Section 12(a); Public Law 94-163, Section 337; Public Law 93-577, Section 4(d); Public Law 93-275, Section 5; Public Law 95-39, Title V, Section 502(7); Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95-91.

8. *Energy related laboratory equipment grants.* Atomic Energy Act of 1954, as amended, Section 31 (a) and (b); Public Law 83-703; 68 Stat. 919; 42 U.S.C. 2051; and Title I, Section 107, of the Energy Reorganization Act of 1974; Public Law 93-438; 88 Stat. 1240; 42 U.S.C. 5817; Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95-91.

9. *Information services exhibits, public speakers publications, reference and analysis.* Atomic Energy Act of 1954, as amended, Section 3 and 141b; Public Law 83-703; 68 Stat. 919; 42 U.S.C. 2013 and 2161; and Title I, Section 107, of the Energy Reorganization Act of 1974; Public Law 93-438; 88 Stat. 1240; 42 U.S.C. 5817; Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95-91.

10. *Payments in lieu of property taxes.* Atomic Energy Act of 1954, as amended, Section 168; Public Law 83-703; 68 Stat. 919; 42 U.S.C. 2208; and Title I, Section 107, of the Energy Reorganization Act of 1974; Public Law 93-438; 88 Stat. 1240; 42 U.S.C. 5817; Department of Energy Organization Act; 42 U.S.C. 7101; Public Law 95-91.

11. *Radiological emergency assistance.* Atomic Energy Act of 1954, as amended, Public Law 83-703; 68 Stat. 919; 42 U.S.C. 2011 *et seq.*; and Title I, Section 107, of the Energy Reorganization Act of 1974; Public Law 93-438; 88 Stat. 1240; 42 U.S.C. 5817; Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95-91.

12. *Nuclear industry seminars.* Atomic Energy Act of 1954, as amended, Section 141(b); Public Law 83-703; 68 Stat. 919; 42 U.S.C. 2161, and Title I, Section 107, of the Energy Reorganization Act of 1974; Public Law 93-438, 88 Stat. 1240; 42 U.S.C. 5817; Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95-91.

13. *Work experience.* Atomic Energy Act of 1954, as amended, Section 3, Public Law 83-703; 68 Stat. 919; 42 U.S.C. 2013; and Title I, Section 107, of the Energy Reorganization Act of 1974; Public Law 93-438; 88 Stat. 1240; 42 U.S.C. 5817; Department of Energy Organization Act; 42 U.S.C. 7101; Public Law 95-91.

14. *Citizens: Workshops.* Atomic Energy Act of 1954, as amended, Public Law 83-703, Section 3 and 141(b), 68 Stat. 919; 42 U.S.C. 2013 and 2161; the Energy Reorganization Act of 1974; Public Law 93-438, Title I, Section 103 and 107, 88 Stat. 1240; 42 U.S.C. 5817, Department of Energy Organization Act, Public Law 95-91, Title I, Section 102, and Title III, Section 301, 91 Stat. 565; 42 U.S.C. 7101; the

National Energy Extension Service Act, Title V, Public Law 95–39, 91 Stat. 191; 42 U.S.C. 7001.

15. *Research and development in energy conservation.* Atomic Energy Act of 1954, as amended, Section 31; Public Law 83–703; 68 Stat. 919; 42 U.S.C. 2051; and Title I, Section 107, of the Energy Reorganization Act of 1974; Public Law 93–438; 88 Stat. 1240; Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95–91.

16. *Energy related inventions.* Section 14 of the Federal Non-Nuclear Energy Research and Development Act of 1974; Public Law 93–577; 68 Stat. 1894; 42 U.S.C. 5913; Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95–91.

17. *Research and development fission, fossil, solar, geothermal, electric and storage systems, magnetic fusion.* Amendments to the Energy Reorganization Act of 1974 and the Atomic Energy Act of 1954; Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95–91.

18. *Energy Information Administration Clearinghouse (EIAC).* Department of Energy Organization Act, Section 205; Public Law 95–91.

19. *National Energy Information Center (NEIC).* Federal Energy Administration Act of 1974, as amended, Section 20(a)(4); Public Law 93–175; 15 U.S.C. 779; Department of Energy Organization Act, Section 301; Public Law 95–91.

20. *Grants for Offices of Consumer Services.* Title II, Section 205 of the Energy Conservation and Production Act, Public Law 94–385; Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95–91.

21. *State Energy Conservation Program.* Title III, Sections 361–366, Part C of the Energy Policy and Conservation Act, Public Law 94–163; 42 U.S.C. 6321–6326; Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95–91.

22. *Weatherization Assistance Program for low income persons.* Title IV, Part A of the Energy Conservation and Production Act, Public Law 94–385; 42 U.S.C. 6861–6870; Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95–91.

23. *Supplemental State Energy Conservation Program.* Title IV, Section 432(a), Part B of the Energy Conservation and Production Act of 1976, Public Law 94–385; 42 U.S.C. 6801 *et seq.*; Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95–91.

24. *Public education in energy.* Atomic Energy Act of 1954, as amended, Sections 31(a) and 31(b); Public Law 83–703; 68 Stat. 919; 42 U.S.C. 2051; and Title I, Section 107 of the Energy Reorganization Act of 1974; Public Law 93–458; 88 Stat. 1240; 42 U.S.C. 5817; Public Law 93–409, Section 12(a); Public Law 94–163, Section 337; Public Law 93–577, Section 4(d); Public Law 93–275, Section 5; Public Law 95–

39, Title V, Section 502(7); Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95–91.

25. *Special studies and projects in energy education and training.* Atomic Energy Act of 1954, as amended, Sections 31(a) and 31(b); Public Law 83–703; 68 Stat. 919; 42 U.S.C. 2051; and Title I, Section 107 of the Energy Reorganization Act of 1974; Public Law 93–458; 88 Stat. 1240; 42 U.S.C. 5817; Public Law 93–409, Section 12(a); Public Law 93–163, Section 337; Public Law 93–577, Section 4(d); Public Law 93–275, Section 5; Public Law 95–39, Title V, Section 502(7).

26. *Research and development in biomedical and environmental sciences.* Atomic Energy Act of 1954, as amended, Section 31; Public Law 83–703; 68 Stat. 919; 42 U.S.C. 2051; Title I, Section 107, of the Energy Reorganization Act of 1974; Public Law 93–438; 88 Stat. 1240; 42 U.S.C. 5817; Department of Energy Organization Act, 42 U.S.C. 7101; Public Law 95–91.

AUTHORITY: 29 U.S.C. 794.

SOURCE: 51 FR 4574, Feb. 5, 1986, unless otherwise noted. Redesignated at 52 FR 1902, Jan. 16, 1987.

§ 1041.101 Purpose.

This part effectuates section 119 of the Rehabilitation, Comprehensive Services, and Developmental Disabilities Amendments of 1978, which amended section 504 of the Rehabilitation Act of 1973 to prohibit discrimination on the basis of handicap in programs or activities conducted by Executive agencies or the United States Postal Service.

§ 1041.102 Application.

This part applies to all programs or activities conducted by the agency.

§ 1041.103 Definitions.

For purposes of this part, the term—
Assistant Attorney General means the Assistant Attorney General, Civil Rights Division, United States Department of Justice.

Auxiliary aids means services or devices that enable persons with im-

paired sensory, manual, or speaking skills to have an equal opportunity to participate in, and enjoy the benefits of, programs or activities conducted by the agency. For example, auxiliary aids useful for persons with impaired vision include readers, Brailled materials, audio recordings, telecommunications devices and other similar services and devices. Auxiliary aids useful for persons with impaired hearing include telephone handset amplifiers, telephones compatible with hearing aids, telecommunication devices for deaf persons (TDD's), interpreters, notetakers, written materials, and other similar services and devices.

Complete complaint means a written statement that contains the complainant's name and address and describes the agency's alleged discriminatory action in sufficient detail to inform the agency of the nature and date of the alleged violation of section 504. It shall be signed by the complainant or by someone authorized to do so on his or her behalf. Complaints filed on behalf of classes or third parties shall describe or identify (by name, if possible) the alleged victims of discrimination.

Facility means all or any portion of buildings, structures, equipment, roads, walks, parking lots, rolling stock or other conveyances, or other real or personal property.

Handicapped person means any person who has a physical or mental impairment that substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment.

As used in this definition, the phrase:

(1) *Physical or mental impairment* includes—

(i) Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: Neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive; digestive; genitourinary; hemic and lymphatic; skin; and endocrine; or

(ii) Any mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities. The term *physical or mental impairment* includes, but is not limited

§§ 1041.104–1041.109

10 CFR Ch. X (1–1–16 Edition)

to, such diseases and conditions as orthopedic, visual, speech, and hearing impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, mental retardation, emotional illness, and drug addition and alcoholism.

(2) *Major life activities* includes functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.

(3) *Has a record of such an impairment* means has a history of, or has been misclassified as having, a mental or physical impairment that substantially limits one or more major life activities.

(4) *Is regarded as having an impairment* means—

(i) Has a physical or mental impairment that does not substantially limit major life activities but is treated by the agency as constituting such a limitation;

(ii) Has a physical or mental impairment that substantially limits major life activities only as a result of the attitudes of others toward such impairment; or

(iii) Has none of the impairments defined in subparagraph (1) of this definition but is treated by the agency as having such an impairment.

Qualified handicapped person means—

(1) With respect to any agency program or activity under which a person is required to perform services or to achieve a level of accomplishment, a handicapped person who meets the essential eligibility requirements and who can achieve the purpose of the program or activity without modifications in the program or activity that the agency can demonstrate would result in a fundamental alteration in its nature; or

(2) With respect to any other program or activity, a handicapped person who meets the essential eligibility requirements for participation in, or receipt of benefits from, that program or activity.

(3) *Qualified handicapped person* is defined for purposes of employment in 29 CFR 1613.702(f), which is made applicable to this part by §1041.140.

Section 504 means section 504 of the Rehabilitation Act of 1973 (Pub. L. 93–

112, 87 Stat. 394 (29 U.S.C. 794)), as amended by the Rehabilitation Act Amendments of 1974 (Pub. L. 93–516, 88 Stat. 1617), and the Rehabilitation, Comprehensive Services, and Developmental Disabilities Amendments of 1978 (Pub. L. 95–602, 92 Stat. 2955). As used in this part, section 504 applies only to programs or activities conducted by Executive agencies and not to federally assisted programs.

[51 FR 4574, Feb. 5, 1986; 51 FR 7543, Mar. 5, 1986. Redesignated at 52 FR 1902, Jan. 16, 1987]

§§ 1041.104–1041.109 [Reserved]

§ 1041.110 Self-evaluation.

(a) The agency shall, by April 9, 1987, evaluate its current policies and practices, and the effects thereof, that do not or may not meet the requirements of this part, and, to the extent modification of any such policies and practices is required, the agency shall proceed to make the necessary modifications.

(b) The agency shall provide an opportunity to interested persons, including handicapped persons or organizations representing handicapped persons, to participate in the self-evaluation process by submitting comments (both oral and written).

(c) The agency shall, until three years following the completion of the self-evaluation, maintain on file and make available for public inspections:

(1) A description of areas examined and any problems identified, and

(2) A description of any modifications made.

§ 1041.111 Notice.

The agency shall make available to employees, applicants, participants, beneficiaries, and other interested persons such information regarding the provisions of this part and its applicability to the programs or activities conducted by the agency, and make such information available to them in such manner as the head of the agency finds necessary to apprise such persons of the protections against discrimination assured them by section 504 and this regulation.

Department of Energy

§ 1041.140

§§ 1041.112–1041.129 [Reserved]

§ 1041.130 General prohibitions against discrimination.

(a) No qualified handicapped person shall, on the basis of handicap, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any program or activity conducted by the agency.

(b)(1) The agency, in providing any aid, benefit, or service, may not, directly or through contractual, licensing, or other arrangements, on the basis of handicap—

(i) Deny a qualified handicapped person the opportunity to participate in or benefit from the aid, benefit, or service;

(ii) Afford a qualified handicapped person an opportunity to participate in or benefit from the aid, benefit, or service that is not equal to that afforded others;

(iii) Provide a qualified handicapped person with an aid, benefit, or service that is not as effective in affording equal opportunity to obtain the same result, to gain the same benefit, or to reach the same level of achievement as that provided to others;

(iv) Provide different or separate aid, benefits, or services to handicapped persons or to any class of handicapped persons than is provided to others unless such action is necessary to provide qualified handicapped persons with aid, benefits, or services that are as effective as those provided to others;

(v) Deny a qualified handicapped person the opportunity to participate as a member of planning or advisory boards; or

(vi) Otherwise limit a qualified handicapped person in the enjoyment of any right, privilege, advantage, or opportunity enjoyed by others receiving the aid, benefit, or service.

(2) The agency may not deny a qualified handicapped person the opportunity to participate in programs or activities that are not separate or different, despite the existence of permissibly separate or different programs or activities.

(3) The agency may not, directly or through contractual or other arrangements, utilize criteria or methods of

administration the purpose or effect of which would—

(i) Subject qualified handicapped persons to discrimination on the basis of handicap; or

(ii) Defeat or substantially impair accomplishment of the objectives of a program or activity with respect to handicapped persons.

(4) The agency may not, in determining the site or location of a facility, make selections the purpose or effect of which would—

(i) Exclude handicapped persons from, deny them the benefits of, or otherwise subject them to discrimination under any program or activity conducted by the agency; or

(ii) Defeat or substantially impair the accomplishment of the objectives of a program or activity with respect to handicapped persons.

(5) The agency, in the selection of procurement contractors, may not use criteria that subject qualified handicapped persons to discrimination on the basis of handicap.

(c) The exclusion of nonhandicapped persons from the benefits of a program limited by Federal statute or Executive order to handicapped persons or the exclusion of a specific class of handicapped persons from a program limited by Federal statute or Executive order to a different class of handicapped persons is not prohibited by this part.

(d) The agency shall administer programs and activities in the most integrated setting appropriate to the needs of qualified handicapped persons.

§§ 1041.131–1041.139 [Reserved]

§ 1041.140 Employment.

No qualified handicapped person shall, on the basis of handicap, be subjected to discrimination in employment under any program or activity conducted by the agency. The definitions, requirements, and procedures of section 501 of the Rehabilitation Act of 1973 (29 U.S.C. 791), as established by the Equal Employment Opportunity Commission in 29 CFR part 1613, shall apply to employment in federally conducted programs or activities.

§§ 1041.141–1041.148 [Reserved]

§ 1041.149 Program accessibility: Discrimination prohibited.

Except as otherwise provided in § 1041.150, no qualified handicapped person shall, because the agency's facilities are inaccessible to or unusable by handicapped persons, be denied the benefits of, be excluded from participation in, or otherwise be subjected to discrimination under any program or activity conducted by the agency.

§ 1041.150 Program accessibility: Existing facilities.

(a) *General.* The agency shall operate each program or activity so that the program or activity, when viewed in its entirety, is readily accessible to and usable by handicapped persons. This paragraph does not—

(1) Necessarily require the agency to make each of its existing facilities accessible to and usable by handicapped persons; or

(2) Require the agency to take any action that it can demonstrate would result in a fundamental alteration in the nature of a program or activity or in undue financial and administrative burdens. In those circumstances where agency personnel believe that the proposed action would fundamentally alter the program or activity or would result in undue financial and administrative burdens, the agency has the burden of proving that compliance with § 1041.150(a) would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the agency head or his or her designee after considering all agency resources available for use in the funding and operation of the conducted program or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, the agency shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that handicapped persons receive the benefits and services of the program or activity.

(b) *Methods.* The agency may comply with the requirements of this section

through such means as redesign of equipment, reassignment of services to accessible buildings, assignment of aides to beneficiaries, home visits, delivery of services at alternate accessible sites, alteration of existing facilities and construction of new facilities, use of accessible rolling stock, or any other methods that result in making its programs or activities readily accessible to and usable by handicapped persons. The agency is not required to make structural changes in existing facilities where other methods are effective in achieving compliance with this section. The agency, in making alterations to existing buildings, shall meet accessibility requirements to the extent compelled by the Architectural Barriers Act of 1968, as amended (42 U.S.C. 4151–4157), and any regulations implementing it. In choosing among available methods for meeting the requirements of this section, the agency shall give priority to those methods that offer programs and activities to qualified handicapped persons in the most integrated setting appropriate.

(c) *Time period for compliance.* The agency shall comply with the obligations established under this section by June 6, 1986, except that where structural changes in facilities are undertaken, such changes shall be made by April 7, 1989, but in any event as expeditiously as possible.

(d) *Transition plan.* In the event that structural changes to facilities will be undertaken to achieve program accessibility, the agency shall develop, by October 7, 1986, a transition plan setting forth the steps necessary to complete such changes. The agency shall provide an opportunity to interested persons, including handicapped persons or organizations representing handicapped persons, to participate in the development of the transition plan by submitting comments (both oral and written). A copy of the transition plan shall be made available for public inspection. The plan shall, at a minimum—

(1) Identify physical obstacles in the agency's facilities that limit the accessibility of its programs or activities to handicapped persons;

Department of Energy

§ 1041.170

(2) Describe in detail the methods that will be used to make the facilities accessible;

(3) Specify the schedule for taking the steps necessary to achieve compliance with this section and, if the time period of the transition plan is longer than one year, identify steps that will be taken during each year of the transition period; and

(4) Indicate the official responsible for implementation of the plan.

[51 FR 4574, Feb. 5, 1986; 51 FR 7543, Mar. 5, 1986. Redesignated at 52 FR 1902, Jan. 16, 1987]

§ 1041.151 Program accessibility: New construction and alterations.

Each building or part of a building that is constructed or altered by, on behalf of, or for the use of the agency shall be designed, constructed, or altered so as to be readily accessible to and usable by handicapped persons. The definitions, requirements, and standards of the Architectural Barriers Act (42 U.S.C. 4151-4157), as established in 41 CFR 101-19.600 to 101-19.607, apply to buildings covered by this section.

§§ 1041.152-1041.159 [Reserved]

§ 1041.160 Communications.

(a) The agency shall take appropriate steps to ensure effective communication with applicants, participants, personnel of other Federal entities, and members of the public.

(1) The agency shall furnish appropriate auxiliary aids where necessary to afford a handicapped person an equal opportunity to participate in, and enjoy the benefits of, a program or activity conducted by the agency.

(i) In determining what type of auxiliary aid is necessary, the agency shall give primary consideration to the requests of the handicapped person.

(ii) The agency need not provide individually prescribed devices, readers for personal use or study, or other devices of a personal nature.

(2) Where the agency communicates with applicants and beneficiaries by telephone, telecommunication devices for deaf persons (TDD's) or equally effective telecommunication systems shall be used.

(b) The agency shall ensure that interested persons, including persons with impaired vision or hearing, can obtain information as to the existence and location of accessible services, activities, and facilities.

(c) The agency shall provide signage at a primary entrance to each of its inaccessible facilities, directing users to a location at which they can obtain information about accessible facilities. The international symbol for accessibility shall be used at each primary entrance of an accessible facility.

(d) This section does not require the agency to take any action that it can demonstrate would result in a fundamental alteration in the nature of a program or activity or in undue financial and administrative burdens. In those circumstances where agency personnel believe that the proposed action would fundamentally alter the program or activity or would result in undue financial and administrative burdens, the agency has the burden of proving that compliance with § 1041.160 would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the agency head or his or her designee after considering all agency resources available for use in the funding and operation of the conducted program or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action required to comply with this section would result in such an alteration or such burdens, the agency shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that, to the maximum extent possible, handicapped persons receive the benefits and services of the program or activity.

§§ 1041.161-1041.169 [Reserved]

§ 1041.170 Compliance procedures.

(a) Except as provided in paragraph (b) of this section, this section applies to all allegations of discrimination on the basis of handicap in programs or activities conducted by the agency.

(b) The agency shall process complaints alleging violations of section

§§ 1041.171–1041.999

10 CFR Ch. X (1–1–16 Edition)

504 with respect to employment according to the procedures established by the Equal Employment Opportunity Commission in 29 CFR part 1613 pursuant to section 501 of the Rehabilitation Act of 1973 (29 U.S.C. 791).

(c) The Manager of Federally Assisted Programs shall be responsible for coordinating implementing of this section. Complaints may be sent to Director of Equal Opportunity, U.S. Department of Energy, Room 4B-112, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-2218.

(d) The agency shall accept and investigate all complete complaints for which it has jurisdiction. All complete complaints must be filed within 180 days of the alleged act of discrimination. The agency may extend this time period for good cause.

(e) If the agency receives a complaint over which it does not have jurisdiction, it shall promptly notify the complainant and shall make reasonable efforts to refer the complaint to the appropriate government entity.

(f) The agency shall notify the Architectural and Transportation Barriers Compliance Board upon receipt of any complaint alleging that a building or facility that is subject to the Architectural Barriers Act of 1968, as amended (42 U.S.C. 4151–4157), or section 502 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 792), is not readily accessible to and usable by handi-capped persons.

(g) Within 180 days of the receipt of a complete complaint for which it has jurisdiction, the agency shall notify the complainant of the results of the investigation in a letter containing—

(1) Findings of fact and conclusions of law;

(2) A description of a remedy for each violation found;

(3) A notice of the right to appeal.

(h) Appeals of the findings of fact and conclusions of law or remedies must be filed by the complainant within 90 days of receipt from the agency of the letter required by §1041.170(g). The agency may extend this time for good cause.

(i) Timely appeals shall be accepted and processed by the head of the agency.

(j) The head of the agency shall notify the complainant of the results of

the appeal within 60 days of the receipt of the request. If the head of the agency determines that additional information is needed from the complainant, he or she shall have 60 days from the date of receipt of the additional information to make his or her determination on the appeal.

(k) The time limits cited in paragraphs (g) and (j) of this section may be extended with the permission of the Assistant Attorney General.

(l) The agency may delegate its authority for conducting complaint investigations to other Federal agencies, except that the authority for making the final determination may not be delegated to another agency.

Subpart A—Introduction

§ 1042.100 Purpose and effective date.

The purpose of these Title IX regulations is to effectuate Title IX of the Education Amendments of 1972, as

amended (except sections 904 and 906 of those Amendments) (20 U.S.C. 1681, 1682, 1683, 1685, 1686, 1687, 1688), which is designed to eliminate (with certain exceptions) discrimination on the basis of sex in any education program or activity receiving Federal financial assistance, whether or not such program or activity is offered or sponsored by an educational institution as defined in these Title IX regulations. The effective date of these Title IX regulations is February 20, 2001.

§ 1042.105 Definitions.

As used in these Title IX regulations, the term:

Administratively separate unit means a school, department, or college of an educational institution (other than a local educational agency) admission to which is independent of admission to any other component of such institution.

Admission means selection for part-time, full-time, special, associate, transfer, exchange, or any other enrollment, membership, or matriculation in or at an education program or activity operated by a recipient.

Applicant means one who submits an application, request, or plan required to be approved by an official of the Department of Energy, or by a recipient, as a condition to becoming a recipient of Federal financial assistance.

Designated agency official means the Director, Office of Civil Rights and Diversity or any official to whom the Director's functions under this part are relegated.

Educational institution means a local educational agency (LEA) as defined by 20 U.S.C. 8801(18), a preschool, a private elementary or secondary school, or an applicant or recipient that is an institution of graduate higher education, an institution of undergraduate higher education, an institution of professional education, or an institution of vocational education, as defined in this section.

Federal financial assistance means any of the following, when authorized or extended under a law administered by the Federal agency that awards such assistance:

§ 1042.105

10 CFR Ch. X (1-1-16 Edition)

(1) A grant or loan of Federal financial assistance, including funds made available for:

(i) The acquisition, construction, renovation, restoration, or repair of a building or facility or any portion thereof; and

(ii) Scholarships, loans, grants, wages, or other funds extended to any entity for payment to or on behalf of students admitted to that entity, or extended directly to such students for payment to that entity.

(2) A grant of Federal real or personal property or any interest therein, including surplus property, and the proceeds of the sale or transfer of such property, if the Federal share of the fair market value of the property is not, upon such sale or transfer, properly accounted for to the Federal Government.

(3) Provision of the services of Federal personnel.

(4) Sale or lease of Federal property or any interest therein at nominal consideration, or at consideration reduced for the purpose of assisting the recipient or in recognition of public interest to be served thereby, or permission to use Federal property or any interest therein without consideration.

(5) Any other contract, agreement, or arrangement that has as one of its purposes the provision of assistance to any education program or activity, except a contract of insurance or guaranty.

Institution of graduate higher education means an institution that:

(1) Offers academic study beyond the bachelor of arts or bachelor of science degree, whether or not leading to a certificate of any higher degree in the liberal arts and sciences;

(2) Awards any degree in a professional field beyond the first professional degree (regardless of whether the first professional degree in such field is awarded by an institution of undergraduate higher education or professional education); or

(3) Awards no degree and offers no further academic study, but operates ordinarily for the purpose of facilitating research by persons who have received the highest graduate degree in any field of study.

Institution of professional education means an institution (except any insti-

tution of undergraduate higher education) that offers a program of academic study that leads to a first professional degree in a field for which there is a national specialized accrediting agency recognized by the Secretary of Education.

Institution of undergraduate higher education means:

(1) An institution offering at least two but less than four years of college-level study beyond the high school level, leading to a diploma or an associate degree, or wholly or principally creditable toward a baccalaureate degree; or

(2) An institution offering academic study leading to a baccalaureate degree; or

(3) An agency or body that certifies credentials or offers degrees, but that may or may not offer academic study.

Institution of vocational education means a school or institution (except an institution of professional or graduate or undergraduate higher education) that has as its primary purpose preparation of students to pursue a technical, skilled, or semiskilled occupation or trade, or to pursue study in a technical field, whether or not the school or institution offers certificates, diplomas, or degrees and whether or not it offers full-time study.

Recipient means any State or political subdivision thereof, or any instrumentality of a State or political subdivision thereof, any public or private agency, institution, or organization, or other entity, or any person, to whom Federal financial assistance is extended directly or through another recipient and that operates an education program or activity that receives such assistance, including any subunit, successor, assignee, or transferee thereof.

Student means a person who has gained admission.

Title IX means Title IX of the Education Amendments of 1972, Public Law 92-318, 86 Stat. 235, 373 (codified as amended at 20 U.S.C. 1681-1688) (except sections 904 and 906 thereof), as amended by section 3 of Public Law 93-568, 88 Stat. 1855, by section 412 of the Education Amendments of 1976, Public Law 94-482, 90 Stat. 2234, and by Section 3 of Public Law 100-259, 102 Stat. 28, 28-29

Department of Energy

§ 1042.115

(20 U.S.C. 1681, 1682, 1683, 1685, 1686, 1687, 1688).

Title IX regulations means the provisions set forth in this 10 CFR Part 1042.

Transition plan means a plan subject to the approval of the Secretary of Education pursuant to section 901(a)(2) of the Education Amendments of 1972, 20 U.S.C. 1681(a)(2), under which an educational institution operates in making the transition from being an educational institution that admits only students of one sex to being one that admits students of both sexes without discrimination.

§ 1042.110 Remedial and affirmative action and self-evaluation.

(a) *Remedial action.* If the designated agency official finds that a recipient has discriminated against persons on the basis of sex in an education program or activity, such recipient shall take such remedial action as the designated agency official deems necessary to overcome the effects of such discrimination.

(b) *Affirmative action.* In the absence of a finding of discrimination on the basis of sex in an education program or activity, a recipient may take affirmative action consistent with law to overcome the effects of conditions that resulted in limited participation therein by persons of a particular sex. Nothing in these Title IX regulations shall be interpreted to alter any affirmative action obligations that a recipient may have under Executive Order 11246, 3 CFR, 1964–1965 Comp., p. 339; as amended by Executive Order 11375, 3 CFR, 1966–1970 Comp., p. 684; as amended by Executive Order 11478, 3 CFR, 1966–1970 Comp., p. 803; as amended by Executive Order 12086, 3 CFR, 1978 Comp., p. 230; as amended by Executive Order 12107, 3 CFR, 1978 Comp., p. 264.

(c) *Self-evaluation.* Each recipient education institution shall, within one year of February 20, 2001:

(1) Evaluate, in terms of the requirements of these Title IX regulations, its current policies and practices and the effects thereof concerning admission of students, treatment of students, and employment of both academic and non-academic personnel working in connection with the recipient's education program or activity;

(2) Modify any of these policies and practices that do not or may not meet the requirements of these Title IX regulations; and

(3) Take appropriate remedial steps to eliminate the effects of any discrimination that resulted or may have resulted from adherence to these policies and practices.

(d) *Availability of self-evaluation and related materials.* Recipients shall maintain on file for at least three years following completion of the evaluation required under paragraph (c) of this section, and shall provide to the designated agency official upon request, a description of any modifications made pursuant to paragraph (c)(2) of this section and of any remedial steps taken pursuant to paragraph (c)(3) of this section.

§ 1042.115 Assurance required.

(a) *General.* Either at the application stage or the award stage, the Department of Energy must ensure that applications for Federal financial assistance or awards of Federal financial assistance contain, be accompanied by, or be covered by a specifically identified assurance from the applicant or recipient, satisfactory to the designated agency official, that each education program or activity operated by the applicant or recipient and to which these Title IX regulations apply will be operated in compliance with these Title IX regulations. An assurance of compliance with these Title IX regulations shall not be satisfactory to the designated agency official if the applicant or recipient to whom such assurance applies fails to commit itself to take whatever remedial action is necessary in accordance with § 1042.110(a) to eliminate existing discrimination on the basis of sex or to eliminate the effects of past discrimination whether occurring prior to or subsequent to the submission to the designated agency official of such assurance.

(b) *Duration of obligation.* (1) In the case of Federal financial assistance extended to provide real property or structures thereon, such assurance shall obligate the recipient or, in the case of a subsequent transfer, the transferee, for the period during which the real property or structures are used

§ 1042.120

to provide an education program or activity.

(2) In the case of Federal financial assistance extended to provide personal property, such assurance shall obligate the recipient for the period during which it retains ownership or possession of the property.

(3) In all other cases such assurance shall obligate the recipient for the period during which Federal financial assistance is extended.

(c) *Form.* (1) The assurances required by paragraph (a) of this section, which may be included as part of a document that addresses other assurances or obligations, shall include that the applicant or recipient will comply with all applicable Federal statutes relating to nondiscrimination. These include but are not limited to: Title IX of the Education Amendments of 1972, as amended (20 U.S.C. 1681–1683, 1685–1688).

(2) The designated agency official will specify the extent to which such assurances will be required of the applicant's or recipient's subgrantees, contractors, subcontractors, transferees, or successors in interest.

§ 1042.120 Transfers of property.

If a recipient sells or otherwise transfers property financed in whole or in part with Federal financial assistance to a transferee that operates any education program or activity, and the Federal share of the fair market value of the property is not upon such sale or transfer properly accounted for to the Federal Government, both the transferor and the transferee shall be deemed to be recipients, subject to the provisions of §§ 1042.205 through 1042.235(a).

§ 1042.125 Effect of other requirements.

(a) *Effect of other Federal provisions.* The obligations imposed by these Title IX regulations are independent of, and do not alter, obligations not to discriminate on the basis of sex imposed by Executive Order 11246, 3 CFR, 1964–1965 Comp., p. 339; as amended by Executive Order 11375, 3 CFR, 1966–1970 Comp., p. 684; as amended by Executive Order 11478, 3 CFR, 1966–1970 Comp., p. 803; as amended by Executive Order 12087, 3 CFR, 1978 Comp., p. 230; as

10 CFR Ch. X (1–1–16 Edition)

amended by Executive Order 12107, 3 CFR, 1978 Comp., p. 264; sections 704 and 855 of the Public Health Service Act (42 U.S.C. 295m, 298b–2); Title VII of the Civil Rights Act of 1964 (42 U.S.C. 2000e *et seq.*); the Equal Pay Act of 1963 (29 U.S.C. 206); and any other Act of Congress or Federal regulation.

(b) *Effect of State or local law or other requirements.* The obligation to comply with these Title IX regulations is not obviated or alleviated by any State or local law or other requirement that would render any applicant or student ineligible, or limit the eligibility of any applicant or student, on the basis of sex, to practice any occupation or profession.

(c) *Effect of rules or regulations of private organizations.* The obligation to comply with these Title IX regulations is not obviated or alleviated by any rule or regulation of any organization, club, athletic or other league, or association that would render any applicant or student ineligible to participate or limit the eligibility or participation of any applicant or student, on the basis of sex, in any education program or activity operated by a recipient and that receives Federal financial assistance.

§ 1042.130 Effect of employment opportunities.

The obligation to comply with these Title IX regulations is not obviated or alleviated because employment opportunities in any occupation or profession are or may be more limited for members of one sex than for members of the other sex.

§ 1042.135 Designation of responsible employee and adoption of grievance procedures.

(a) *Designation of responsible employee.* Each recipient shall designate at least one employee to coordinate its efforts to comply with and carry out its responsibilities under these Title IX regulations, including any investigation of any complaint communicated to such recipient alleging its noncompliance with these Title IX regulations or alleging any actions that would be prohibited by these Title IX regulations.

Department of Energy

§ 1042.205

The recipient shall notify all its students and employees of the name, office address, and telephone number of the employee or employees appointed pursuant to this paragraph.

(b) *Complaint procedure of recipient.* A recipient shall adopt and publish grievance procedures providing for prompt and equitable resolution of student and employee complaints alleging any action that would be prohibited by these Title IX regulations.

§ 1042.140 Dissemination of policy.

(a) *Notification of policy.* (1) Each recipient shall implement specific and continuing steps to notify applicants for admission and employment, students and parents of elementary and secondary school students, employees, sources of referral of applicants for admission and employment, and all unions or professional organizations holding collective bargaining or professional agreements with the recipient, that it does not discriminate on the basis of sex in the educational programs or activities that it operates, and that it is required by Title IX and these Title IX regulations not to discriminate in such a manner. Such notification shall contain such information, and be made in such manner, as the designated agency official finds necessary to apprise such persons of the protections against discrimination assured them by Title IX and these Title IX regulations, but shall state at least that the requirement not to discriminate in education programs or activities extends to employment therein, and to admission thereto unless §§ 1042.300 through 1042.310 do not apply to the recipient, and that inquiries concerning the application of Title IX and these Title IX regulations to such recipient may be referred to the employee designated pursuant to § 1042.135, or to the designated agency official.

(2) Each recipient shall make the initial notification required by paragraph (a)(1) of this section within 90 days of February 20, 2001 or of the date these Title IX regulations first apply to such recipient, whichever comes later, which notification shall include publication in:

(i) Newspapers and magazines operated by such recipient or by student, alumnae, or alumni groups for or in connection with such recipient; and

(ii) Memoranda or other written communications distributed to every student and employee of such recipient.

(b) *Publications.* (1) Each recipient shall prominently include a statement of the policy described in paragraph (a) of this section in each announcement, bulletin, catalog, or application form that it makes available to any person of a type, described in paragraph (a) of this section, or which is otherwise used in connection with the recruitment of students or employees.

(2) A recipient shall not use or distribute a publication of the type described in paragraph (b)(1) of this section that suggests, by text or illustration, that such recipient treats applicants, students, or employees differently on the basis of sex except as such treatment is permitted by these Title IX regulations.

(c) *Distribution.* Each recipient shall distribute without discrimination on the basis of sex each publication described in paragraph (b)(1) of this section, and shall apprise each of its admission and employment recruitment representatives of the policy of non-discrimination described in paragraph (a) of this section, and shall require such representatives to adhere to such policy.

Subpart B—Coverage

§ 1042.200 Application.

Except as provided in §§ 1042.205 through 1042.235(a), these Title IX regulations apply to every recipient and to each education program or activity operated by such recipient that receives Federal financial assistance.

§ 1042.205 Educational institutions and other entities controlled by religious organizations.

(a) *Exemption.* These Title IX regulations do not apply to any operation of an educational institution or other entity that is controlled by a religious organization to the extent that application of these Title IX regulations would not be consistent with the religious tenets of such organization.

§ 1042.210

(b) *Exemption claims.* An educational institution or other entity that wishes to claim the exemption set forth in paragraph (a) of this section shall do so by submitting in writing to the designated agency official a statement by the highest-ranking official of the institution, identifying the provisions of these Title IX regulations that conflict with a specific tenet of the religious organization.

§ 1042.210 Military and merchant marine educational institutions.

These Title IX regulations do not apply to an educational institution whose primary purpose is the training of individuals for a military service of the United States or for the merchant marine.

§ 1042.215 Membership practices of certain organizations.

(a) *Social fraternities and sororities.* These Title IX regulations do not apply to the membership practices of social fraternities and sororities that are exempt from taxation under section 501(a) of the Internal Revenue Code of 1954, 26 U.S.C. 501(a), the active membership of which consists primarily of students in attendance at institutions of higher education.

(b) *YMCA, YWCA, Girl Scouts, Boy Scouts, and Camp Fire Girls.* These Title IX regulations do not apply to the membership practices of the Young Men's Christian Association (YMCA), the Young Women's Christian Association (YWCA), the Girl Scouts, the Boy Scouts, and Camp Fire Girls.

(c) *Voluntary youth service organizations.* These Title IX regulations do not apply to the membership practices of a voluntary youth service organization that is exempt from taxation under section 501(a) of the Internal Revenue Code of 1954, 26 U.S.C. 501(a), and the membership of which has been traditionally limited to members of one sex and principally to persons of less than nineteen years of age.

§ 1042.220 Admissions.

(a) Admissions to educational institutions prior to June 24, 1973, are not covered by these Title IX regulations.

(b) *Administratively separate units.* For the purposes only of this section,

10 CFR Ch. X (1-1-16 Edition)

§§ 1042.225 and 1042.230, and §§ 1042.300 through 1042.310, each administratively separate unit shall be deemed to be an educational institution.

(c) *Application of §§ 1042.300 through 1042.310.* Except as provided in paragraphs (d) and (e) of this section, §§ 1042.300 through 1042.310 apply to each recipient. A recipient to which §§ 1042.300 through 1042.310 apply shall not discriminate on the basis of sex in admission or recruitment in violation of §§ 1042.300 through 1042.310.

(d) *Educational institutions.* Except as provided in paragraph (e) of this section as to recipients that are educational institutions, §§ 1042.300 through 1042.310 apply only to institutions of vocational education, professional education, graduate higher education, and public institutions of undergraduate higher education.

(e) *Public institutions of undergraduate higher education.* §§ 1042.300 through 1042.310 do not apply to any public institution of undergraduate higher education that traditionally and continually from its establishment has had a policy of admitting students of only one sex.

§ 1042.225 Educational institutions eligible to submit transition plans.

(a) *Application.* This section applies to each educational institution to which §§ 1042.300 through 1042.310 apply that:

(1) Admitted students of only one sex as regular students as of June 23, 1972; or

(2) Admitted students of only one sex as regular students as of June 23, 1965, but thereafter admitted, as regular students, students of the sex not admitted prior to June 23, 1965.

(b) *Provision for transition plans.* An educational institution to which this section applies shall not discriminate on the basis of sex in admission or recruitment in violation of §§ 1042.300 through 1042.310.

§ 1042.230 Transition plans.

(a) *Submission of plans.* An institution to which § 1042.225 applies and that is composed of more than one administratively separate unit may submit either a single transition plan applicable to

Department of Energy

§ 1042.235

all such units, or a separate transition plan applicable to each such unit.

(b) *Content of plans.* In order to be approved by the Secretary of Education, a transition plan shall:

(1) State the name, address, and Federal Interagency Committee on Education Code of the educational institution submitting such plan, the administratively separate units to which the plan is applicable, and the name, address, and telephone number of the person to whom questions concerning the plan may be addressed. The person who submits the plan shall be the chief administrator or president of the institution, or another individual legally authorized to bind the institution to all actions set forth in the plan.

(2) State whether the educational institution or administratively separate unit admits students of both sexes as regular students and, if so, when it began to do so.

(3) Identify and describe with respect to the educational institution or administratively separate unit any obstacles to admitting students without discrimination on the basis of sex.

(4) Describe in detail the steps necessary to eliminate as soon as practicable each obstacle so identified and indicate the schedule for taking these steps and the individual directly responsible for their implementation.

(5) Include estimates of the number of students, by sex, expected to apply for, be admitted to, and enter each class during the period covered by the plan.

(c) *Nondiscrimination.* No policy or practice of a recipient to which §1042.225 applies shall result in treatment of applicants to or students of such recipient in violation of §§1042.300 through 1042.310 unless such treatment is necessitated by an obstacle identified in paragraph (b)(3) of this section and a schedule for eliminating that obstacle has been provided as required by paragraph (b)(4) of this section.

(d) *Effects of past exclusion.* To overcome the effects of past exclusion of students on the basis of sex, each educational institution to which §1042.225 applies shall include in its transition plan, and shall implement, specific steps designed to encourage individuals of the previously excluded sex to apply

for admission to such institution. Such steps shall include instituting recruitment programs that emphasize the institution's commitment to enrolling students of the sex previously excluded.

§ 1042.235 Statutory amendments.

(a) This section, which applies to all provisions of these Title IX regulations, addresses statutory amendments to Title IX.

(b) These Title IX regulations shall not apply to or preclude:

(1) Any program or activity of the American Legion undertaken in connection with the organization or operation of any Boys State conference, Boys Nation conference, Girls State conference, or Girls Nation conference;

(2) Any program or activity of a secondary school or educational institution specifically for:

(i) The promotion of any Boys State conference, Boys Nation conference, Girls State conference, or Girls Nation conference; or

(ii) The selection of students to attend any such conference;

(3) Father-son or mother-daughter activities at an educational institution or in an education program or activity, but if such activities are provided for students of one sex, opportunities for reasonably comparable activities shall be provided to students of the other sex;

(4) Any scholarship or other financial assistance awarded by an institution of higher education to an individual because such individual has received such award in a single-sex pageant based upon a combination of factors related to the individual's personal appearance, poise, and talent. The pageant, however, must comply with other nondiscrimination provisions of Federal law.

(c) *Program or activity or program* means:

(1) All of the operations of any entity described in paragraphs (c)(1)(i) through (iv) of this section, any part of which is extended Federal financial assistance:

(i)(A) A department, agency, special purpose district, or other instrumentality of a State or of a local government; or

§ 1042.300

(B) The entity of such State or local government that distributes such assistance and each such department or agency (and each other State or local government entity) to which the assistance is extended, in the case of assistance to a State or local government;

(ii)(A) A college, university, or other post-secondary institution, or a public system of higher education; or

(B) A local educational agency (as defined in section 8801 of title 20), system of vocational education, or other school system;

(iii)(A) An entire corporation, partnership, or other private organization, or an entire sole proprietorship—

(1) If assistance is extended to such corporation, partnership, private organization, or sole proprietorship as a whole; or

(2) Which is principally engaged in the business of providing education, health care, housing, social services, or parks and recreation; or

(B) The entire plant or other comparable, geographically separate facility to which Federal financial assistance is extended, in the case of any other corporation, partnership, private organization, or sole proprietorship; or

(iv) Any other entity that is established by two or more of the entities described in paragraphs (c)(1)(i), (ii), or (iii) of this section.

(2)(i) *Program or activity* does not include any operation of an entity that is controlled by a religious organization if the application of 20 U.S.C. 1681 to such operation would not be consistent with the religious tenets of such organization.

(ii) For example, all of the operations of a college, university, or other post-secondary institution, including but not limited to traditional educational operations, faculty and student housing, campus shuttle bus service, campus restaurants, the bookstore, and other commercial activities are part of a “program or activity” subject to these Title IX regulations if the college, university, or other institution receives Federal financial assistance.

(d)(1) Nothing in these Title IX regulations shall be construed to require or prohibit any person, or public or private entity, to provide or pay for any

10 CFR Ch. X (1–1–16 Edition)

benefit or service, including the use of facilities, related to an abortion. Medical procedures, benefits, services, and the use of facilities, necessary to save the life of a pregnant woman or to address complications related to an abortion are not subject to this section.

(2) Nothing in this section shall be construed to permit a penalty to be imposed on any person or individual because such person or individual is seeking or has received any benefit or service related to a legal abortion. Accordingly, subject to paragraph (d)(1) of this section, no person shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any academic, extracurricular, research, occupational training, employment, or other educational program or activity operated by a recipient that receives Federal financial assistance because such individual has sought or received, or is seeking, a legal abortion, or any benefit or service related to a legal abortion.

Subpart C—Discrimination on the Basis of Sex in Admission and Recruitment Prohibited

§ 1042.300 Admission.

(a) *General.* No person shall, on the basis of sex, be denied admission, or be subjected to discrimination in admission, by any recipient to which §§ 1042.300 through 1042.310 apply, except as provided in §§ 1042.225 and 1042.230.

(b) *Specific prohibitions.* (1) In determining whether a person satisfies any policy or criterion for admission, or in making any offer of admission, a recipient to which §§ 1042.300 through 1042.310 apply shall not:

(i) Give preference to one person over another on the basis of sex, by ranking applicants separately on such basis, or otherwise;

(ii) Apply numerical limitations upon the number or proportion of persons of either sex who may be admitted; or

(iii) Otherwise treat one individual differently from another on the basis of sex.

(2) A recipient shall not administer or operate any test or other criterion for admission that has a disproportionately adverse effect on persons on the

Department of Energy

§ 1042.400

basis of sex unless the use of such test or criterion is shown to predict validly success in the education program or activity in question and alternative tests or criteria that do not have such a disproportionately adverse effect are shown to be unavailable.

(c) *Prohibitions relating to marital or parental status.* In determining whether a person satisfies any policy or criterion for admission, or in making any offer of admission, a recipient to which §§ 1042.300 through 1042.310 apply:

(1) Shall not apply any rule concerning the actual or potential parental, family, or marital status of a student or applicant that treats persons differently on the basis of sex;

(2) Shall not discriminate against or exclude any person on the basis of pregnancy, childbirth, termination of pregnancy, or recovery therefrom, or establish or follow any rule or practice that so discriminates or excludes;

(3) Subject to § 1042.235(d), shall treat disabilities related to pregnancy, childbirth, termination of pregnancy, or recovery therefrom in the same manner and under the same policies as any other temporary disability or physical condition; and

(4) Shall not make pre-admission inquiry as to the marital status of an applicant for admission, including whether such applicant is “Miss” or “Mrs.” A recipient may make pre-admission inquiry as to the sex of an applicant for admission, but only if such inquiry is made equally of such applicants of both sexes and if the results of such inquiry are not used in connection with discrimination prohibited by these Title IX regulations.

§ 1042.305 Preference in admission.

A recipient to which §§ 1042.300 through 1042.310 apply shall not give preference to applicants for admission, on the basis of attendance at any educational institution or other school or entity that admits as students only or predominantly members of one sex, if the giving of such preference has the effect of discriminating on the basis of sex in violation of §§ 1042.300 through 1042.310.

§ 1042.310 Recruitment.

(a) *Nondiscriminatory recruitment.* A recipient to which §§ 1042.300 through 1042.310 apply shall not discriminate on the basis of sex in the recruitment and admission of students. A recipient may be required to undertake additional recruitment efforts for one sex as remedial action pursuant to § 1042.110(a), and may choose to undertake such efforts as affirmative action pursuant to § 1042.110(b).

(b) *Recruitment at certain institutions.* A recipient to which §§ 1042.300 through 1042.310 apply shall not recruit primarily or exclusively at educational institutions, schools, or entities that admit as students only or predominantly members of one sex, if such actions have the effect of discriminating on the basis of sex in violation of §§ 1042.300 through 1042.310.

Subpart D—Discrimination on the Basis of Sex in Education Programs or Activities Prohibited

§ 1042.400 Education programs or activities.

(a) *General.* Except as provided elsewhere in these Title IX regulations, no person shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any academic, extracurricular, research, occupational training, or other education program or activity operated by a recipient that receives Federal financial assistance. Sections 1042.400 through 1042.455 do not apply to actions of a recipient in connection with admission of its students to an education program or activity of a recipient to which §§ 1042.300 through 1042.310 do not apply, or an entity, not a recipient, to which §§ 1042.300 through 1042.310 would not apply if the entity were a recipient.

(b) *Specific prohibitions.* Except as provided in §§ 1042.400 through 1042.455, in providing any aid, benefit, or service to a student, a recipient shall not, on the basis of sex:

(1) Treat one person differently from another in determining whether such person satisfies any requirement or condition for the provision of such aid, benefit, or service;

§ 1042.405

(2) Provide different aid, benefits, or services or provide aid, benefits, or services in a different manner;

(3) Deny any person any such aid, benefit, or service;

(4) Subject any person to separate or different rules of behavior, sanctions, or other treatment;

(5) Apply any rule concerning the domicile or residence of a student or applicant, including eligibility for in-state fees and tuition;

(6) Aid or perpetuate discrimination against any person by providing significant assistance to any agency, organization, or person that discriminates on the basis of sex in providing any aid, benefit, or service to students or employees;

(7) Otherwise limit any person in the enjoyment of any right, privilege, advantage, or opportunity.

(c) *Assistance administered by a recipient educational institution to study at a foreign institution.* A recipient educational institution may administer or assist in the administration of scholarships, fellowships, or other awards established by foreign or domestic wills, trusts, or similar legal instruments, or by acts of foreign governments and restricted to members of one sex, that are designed to provide opportunities to study abroad, and that are awarded to students who are already matriculating at or who are graduates of the recipient institution; *Provided*, that a recipient educational institution that administers or assists in the administration of such scholarships, fellowships, or other awards that are restricted to members of one sex provides, or otherwise makes available, reasonable opportunities for similar studies for members of the other sex. Such opportunities may be derived from either domestic or foreign sources.

(d) *Aids, benefits or services not provided by recipient.* (1) This paragraph (d) applies to any recipient that requires participation by any applicant, student, or employee in any education program or activity not operated wholly by such recipient, or that facilitates, permits, or considers such participation as part of or equivalent to an education program or activity operated by such recipient, including participation

10 CFR Ch. X (1–1–16 Edition)

in educational consortia and cooperative employment and student-teaching assignments.

(2) Such recipient:

(i) Shall develop and implement a procedure designed to assure itself that the operator or sponsor of such other education program or activity takes no action affecting any applicant, student, or employee of such recipient that these Title IX regulations would prohibit such recipient from taking; and

(ii) Shall not facilitate, require, permit, or consider such participation if such action occurs.

§ 1042.405 Housing.

(a) *Generally.* A recipient shall not, on the basis of sex, apply different rules or regulations, impose different fees or requirements, or offer different services or benefits related to housing, except as provided in this section (including housing provided only to married students).

(b) *Housing provided by recipient.* (1) A recipient may provide separate housing on the basis of sex.

(2) Housing provided by a recipient to students of one sex, when compared to that provided to students of the other sex, shall be as a whole:

(i) Proportionate in quantity to the number of students of that sex applying for such housing; and

(ii) Comparable in quality and cost to the student.

(c) *Other housing.* (1) A recipient shall not, on the basis of sex, administer different policies or practices concerning occupancy by its students of housing other than that provided by such recipient.

(2)(i) A recipient which, through solicitation, listing, approval of housing, or otherwise, assists any agency, organization, or person in making housing available to any of its students, shall take such reasonable action as may be necessary to assure itself that such housing as is provided to students of one sex, when compared to that provided to students of the other sex, is as a whole:

(A) Proportionate in quantity; and

(B) Comparable in quality and cost to the student.

(ii) A recipient may render such assistance to any agency, organization,

Department of Energy

§ 1042.425

or person that provides all or part of such housing to students of only one sex.

§ 1042.410 Comparable facilities.

A recipient may provide separate toilet, locker room, and shower facilities on the basis of sex, but such facilities provided for students of one sex shall be comparable to such facilities provided for students of the other sex.

§ 1042.415 Access to course offerings.

(a) A recipient shall not provide any course or otherwise carry out any of its education program or activity separately on the basis of sex, or require or refuse participation therein by any of its students on such basis, including health, physical education, industrial, business, vocational, technical, home economics, music, and adult education courses.

(b)(1) With respect to classes and activities in physical education at the elementary school level, the recipient shall comply fully with this section as expeditiously as possible but in no event later than one year from February 20, 2001. With respect to physical education classes and activities at the secondary and post-secondary levels, the recipient shall comply fully with this section as expeditiously as possible but in no event later than three years from February 20, 2001.

(2) This section does not prohibit grouping of students in physical education classes and activities by ability as assessed by objective standards of individual performance developed and applied without regard to sex.

(3) This section does not prohibit separation of students by sex within physical education classes or activities during participation in wrestling, boxing, rugby, ice hockey, football, basketball, and other sports the purpose or major activity of which involves bodily contact.

(4) Where use of a single standard of measuring skill or progress in a physical education class has an adverse effect on members of one sex, the recipient shall use appropriate standards that do not have such effect.

(5) Portions of classes in elementary and secondary schools, or portions of education programs or activities, that

deal exclusively with human sexuality may be conducted in separate sessions for boys and girls.

(6) Recipients may make requirements based on vocal range or quality that may result in a chorus or choruses of one or predominantly one sex.

§ 1042.420 Access to schools operated by LEAs.

A recipient that is a local educational agency shall not, on the basis of sex, exclude any person from admission to:

(a) Any institution of vocational education operated by such recipient; or

(b) Any other school or educational unit operated by such recipient, unless such recipient otherwise makes available to such person, pursuant to the same policies and criteria of admission, courses, services, and facilities comparable to each course, service, and facility offered in or through such schools.

§ 1042.425 Counseling and use of appraisal and counseling materials.

(a) *Counseling.* A recipient shall not discriminate against any person on the basis of sex in the counseling or guidance of students or applicants for admission.

(b) *Use of appraisal and counseling materials.* A recipient that uses testing or other materials for appraising or counseling students shall not use different materials for students on the basis of their sex or use materials that permit or require different treatment of students on such basis unless such different materials cover the same occupations and interest areas and the use of such different materials is shown to be essential to eliminate sex bias. Recipients shall develop and use internal procedures for ensuring that such materials do not discriminate on the basis of sex. Where the use of a counseling test or other instrument results in a substantially disproportionate number of members of one sex in any particular course of study or classification, the recipient shall take such action as is necessary to assure itself that such disproportion is not the result of discrimination in the instrument or its application.

§ 1042.430

(c) *Disproportion in classes.* Where a recipient finds that a particular class contains a substantially disproportionate number of individuals of one sex, the recipient shall take such action as is necessary to assure itself that such disproportion is not the result of discrimination on the basis of sex in counseling or appraisal materials or by counselors.

§ 1042.430 Financial assistance.

(a) *General.* Except as provided in paragraphs (b) and (c) of this section, in providing financial assistance to any of its students, a recipient shall not:

(1) On the basis of sex, provide different amounts or types of such assistance, limit eligibility for such assistance that is of any particular type or source, apply different criteria, or otherwise discriminate;

(2) Through solicitation, listing, approval, provision of facilities, or other services, assist any foundation, trust, agency, organization, or person that provides assistance to any of such recipient's students in a manner that discriminates on the basis of sex; or

(3) Apply any rule or assist in application of any rule concerning eligibility for such assistance that treats persons of one sex differently from persons of the other sex with regard to marital or parental status.

(b) *Financial aid established by certain legal instruments.* (1) A recipient may administer or assist in the administration of scholarships, fellowships, or other forms of financial assistance established pursuant to domestic or foreign wills, trusts, bequests, or similar legal instruments or by acts of a foreign government that require that awards be made to members of a particular sex specified therein; *Provided*, that the overall effect of the award of such sex-restricted scholarships, fellowships, and other forms of financial assistance does not discriminate on the basis of sex.

(2) To ensure nondiscriminatory awards of assistance as required in paragraph (b)(1) of this section, recipients shall develop and use procedures under which:

(i) Students are selected for award of financial assistance on the basis of nondiscriminatory criteria and not on

10 CFR Ch. X (1-1-16 Edition)

the basis of availability of funds restricted to members of a particular sex;

(ii) An appropriate sex-restricted scholarship, fellowship, or other form of financial assistance is allocated to each student selected under paragraph (b)(2)(i) of this section; and

(iii) No student is denied the award for which he or she was selected under paragraph (b)(2)(i) of this section because of the absence of a scholarship, fellowship, or other form of financial assistance designated for a member of that student's sex.

(c) *Athletic scholarships.* (1) To the extent that a recipient awards athletic scholarships or grants-in-aid, it must provide reasonable opportunities for such awards for members of each sex in proportion to the number of students of each sex participating in intercollegiate or intercollegiate athletics.

(2) A recipient may provide separate athletic scholarships or grants-in-aid for members of each sex as part of separate athletic teams for members of each sex to the extent consistent with this paragraph (c) and § 1042.450.

§ 1042.435 Employment assistance to students.

(a) *Assistance by recipient in making available outside employment.* A recipient that assists any agency, organization, or person in making employment available to any of its students:

(1) Shall assure itself that such employment is made available without discrimination on the basis of sex; and

(2) Shall not render such services to any agency, organization, or person that discriminates on the basis of sex in its employment practices.

(b) *Employment of students by recipients.* A recipient that employs any of its students shall not do so in a manner that violates §§ 1042.500 through 1042.550.

§ 1042.440 Health and insurance benefits and services.

Subject to § 1042.235(d), in providing a medical, hospital, accident, or life insurance benefit, service, policy, or plan to any of its students, a recipient shall not discriminate on the basis of sex, or provide such benefit, service, policy, or plan in a manner that would violate §§ 1042.500 through 1042.550 if it were

Department of Energy

§ 1042.450

provided to employees of the recipient. This section shall not prohibit a recipient from providing any benefit or service that may be used by a different proportion of students of one sex than of the other, including family planning services. However, any recipient that provides full coverage health service shall provide gynecological care.

§ 1042.445 Marital or parental status.

(a) *Status generally.* A recipient shall not apply any rule concerning a student's actual or potential parental, family, or marital status that treats students differently on the basis of sex.

(b) *Pregnancy and related conditions.*

(1) A recipient shall not discriminate against any student, or exclude any student from its education program or activity, including any class or extracurricular activity, on the basis of such student's pregnancy, childbirth, false pregnancy, termination of pregnancy, or recovery therefrom, unless the student requests voluntarily to participate in a separate portion of the program or activity of the recipient.

(2) A recipient may require such a student to obtain the certification of a physician that the student is physically and emotionally able to continue participation as long as such a certification is required of all students for other physical or emotional conditions requiring the attention of a physician.

(3) A recipient that operates a portion of its education program or activity separately for pregnant students, admittance to which is completely voluntary on the part of the student as provided in paragraph (b)(1) of this section, shall ensure that the separate portion is comparable to that offered to non-pregnant students.

(4) Subject to § 1042.235(d), a recipient shall treat pregnancy, childbirth, false pregnancy, termination of pregnancy and recovery therefrom in the same manner and under the same policies as any other temporary disability with respect to any medical or hospital benefit, service, plan, or policy that such recipient administers, operates, offers, or participates in with respect to students admitted to the recipient's educational program or activity.

(5) In the case of a recipient that does not maintain a leave policy for its stu-

dents, or in the case of a student who does not otherwise qualify for leave under such a policy, a recipient shall treat pregnancy, childbirth, false pregnancy, termination of pregnancy, and recovery therefrom as a justification for a leave of absence for as long a period of time as is deemed medically necessary by the student's physician, at the conclusion of which the student shall be reinstated to the status that she held when the leave began.

§ 1042.450 Athletics.

(a) *General.* No person shall, on the basis of sex, be excluded from participation in, be denied the benefits of, be treated differently from another person, or otherwise be discriminated against in any interscholastic, intercollegiate, club, or intramural athletics offered by a recipient, and no recipient shall provide any such athletics separately on such basis.

(b) *Separate teams.* Notwithstanding the requirements of paragraph (a) of this section, a recipient may operate or sponsor separate teams for members of each sex where selection for such teams is based upon competitive skill or the activity involved is a contact sport. However, where a recipient operates or sponsors a team in a particular sport for members of one sex but operates or sponsors no such team for members of the other sex, and athletic opportunities for members of that sex have previously been limited, members of the excluded sex must be allowed to try out for the team offered unless the sport involved is a contact sport. For the purposes of these Title IX regulations, contact sports include boxing, wrestling, rugby, ice hockey, football, basketball, and other sports the purpose or major activity of which involves bodily contact.

(c) *Equal opportunity.* (1) A recipient that operates or sponsors interscholastic, intercollegiate, club, or intramural athletics shall provide equal athletic opportunity for members of both sexes. In determining whether equal opportunities are available, the designated agency official will consider, among other factors:

(i) Whether the selection of sports and levels of competition effectively

§ 1042.455

accommodate the interests and abilities of members of both sexes;

(ii) The provision of equipment and supplies;

(iii) Scheduling of games and practice time;

(iv) Travel and per diem allowance;

(v) Opportunity to receive coaching and academic tutoring;

(vi) Assignment and compensation of coaches and tutors;

(vii) Provision of locker rooms, practice, and competitive facilities;

(viii) Provision of medical and training facilities and services;

(ix) Provision of housing and dining facilities and services;

(x) Publicity.

(2) For purposes of paragraph (c)(1) of this section, unequal aggregate expenditures for members of each sex or unequal expenditures for male and female teams if a recipient operates or sponsors separate teams will not constitute noncompliance with this section, but the designated agency official may consider the failure to provide necessary funds for teams for one sex in assessing equality of opportunity for members of each sex.

(d) *Adjustment period.* A recipient that operates or sponsors interscholastic, intercollegiate, club, or intramural athletics at the elementary school level shall comply fully with this section as expeditiously as possible but in no event later than one year from February 20, 2001. A recipient that operates or sponsors interscholastic, intercollegiate, club, or intramural athletics at the secondary or post-secondary school level shall comply fully with this section as expeditiously as possible but in no event later than three years from February 20, 2001.

§ 1042.455 Textbooks and curricular material.

Nothing in these Title IX regulations shall be interpreted as requiring or prohibiting or abridging in any way the use of particular textbooks or curricular materials.

10 CFR Ch. X (1–1–16 Edition)

Subpart E—Discrimination on the Basis of Sex in Employment in Education Programs or Activities Prohibited

§ 1042.500 Employment.

(a) *General.* (1) No person shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination in employment, or recruitment, consideration, or selection therefor, whether full-time or part-time, under any education program or activity operated by a recipient that receives Federal financial assistance.

(2) A recipient shall make all employment decisions in any education program or activity operated by such recipient in a nondiscriminatory manner and shall not limit, segregate, or classify applicants or employees in any way that could adversely affect any applicant's or employee's employment opportunities or status because of sex.

(3) A recipient shall not enter into any contractual or other relationship which directly or indirectly has the effect of subjecting employees or students to discrimination prohibited by §§ 1042.500 through 1042.550, including relationships with employment and referral agencies, with labor unions, and with organizations providing or administering fringe benefits to employees of the recipient.

(4) A recipient shall not grant preferences to applicants for employment on the basis of attendance at any educational institution or entity that admits as students only or predominantly members of one sex, if the giving of such preferences has the effect of discriminating on the basis of sex in violation of these Title IX regulations.

(b) *Application.* The provisions of §§ 1042.500 through 1042.550 apply to:

(1) Recruitment, advertising, and the process of application for employment;

(2) Hiring, upgrading, promotion, consideration for and award of tenure, demotion, transfer, layoff, termination, application of nepotism policies, right of return from layoff, and rehiring;

(3) Rates of pay or any other form of compensation, and changes in compensation;

Department of Energy

§ 1042.525

(4) Job assignments, classifications, and structure, including position descriptions, lines of progression, and seniority lists;

(5) The terms of any collective bargaining agreement;

(6) Granting and return from leaves of absence, leave for pregnancy, childbirth, false pregnancy, termination of pregnancy, leave for persons of either sex to care for children or dependents, or any other leave;

(7) Fringe benefits available by virtue of employment, whether or not administered by the recipient;

(8) Selection and financial support for training, including apprenticeship, professional meetings, conferences, and other related activities, selection for tuition assistance, selection for sabbaticals and leaves of absence to pursue training;

(9) Employer-sponsored activities, including social or recreational programs; and

(10) Any other term, condition, or privilege of employment.

§ 1042.505 Employment criteria.

A recipient shall not administer or operate any test or other criterion for any employment opportunity that has a disproportionately adverse effect on persons on the basis of sex unless:

(a) Use of such test or other criterion is shown to predict validly successful performance in the position in question; and

(b) Alternative tests or criteria for such purpose, which do not have such disproportionately adverse effect, are shown to be unavailable.

§ 1042.510 Recruitment.

(a) *Nondiscriminatory recruitment and hiring.* A recipient shall not discriminate on the basis of sex in the recruitment and hiring of employees. Where a recipient has been found to be presently discriminating on the basis of sex in the recruitment or hiring of employees, or has been found to have so discriminated in the past, the recipient shall recruit members of the sex so discriminated against so as to overcome the effects of such past or present discrimination.

(b) *Recruitment patterns.* A recipient shall not recruit primarily or exclu-

sively at entities that furnish as applicants only or predominantly members of one sex if such actions have the effect of discriminating on the basis of sex in violation of §§1042.500 through 1042.550.

§ 1042.515 Compensation.

A recipient shall not make or enforce any policy or practice that, on the basis of sex:

(a) Makes distinctions in rates of pay or other compensation;

(b) Results in the payment of wages to employees of one sex at a rate less than that paid to employees of the opposite sex for equal work on jobs the performance of which requires equal skill, effort, and responsibility, and that are performed under similar working conditions.

§ 1042.520 Job classification and structure.

A recipient shall not:

(a) Classify a job as being for males or for females;

(b) Maintain or establish separate lines of progression, seniority lists, career ladders, or tenure systems based on sex; or

(c) Maintain or establish separate lines of progression, seniority systems, career ladders, or tenure systems for similar jobs, position descriptions, or job requirements that classify persons on the basis of sex, unless sex is a bona fide occupational qualification for the positions in question as set forth in §1042.550.

§ 1042.525 Fringe benefits.

(a) *“Fringe benefits” defined.* For purposes of these Title IX regulations, *fringe benefits* means: Any medical, hospital, accident, life insurance, or retirement benefit, service, policy or plan, any profit-sharing or bonus plan, leave, and any other benefit or service of employment not subject to the provision of §1042.515.

(b) *Prohibitions.* A recipient shall not:

(1) Discriminate on the basis of sex with regard to making fringe benefits available to employees or make fringe benefits available to spouses, families, or dependents of employees differently upon the basis of the employee's sex;

§ 1042.530

(2) Administer, operate, offer, or participate in a fringe benefit plan that does not provide for equal periodic benefits for members of each sex and for equal contributions to the plan by such recipient for members of each sex; or

(3) Administer, operate, offer, or participate in a pension or retirement plan that establishes different optional or compulsory retirement ages based on sex or that otherwise discriminates in benefits on the basis of sex.

§ 1042.530 Marital or parental status.

(a) *General.* A recipient shall not apply any policy or take any employment action:

(1) Concerning the potential marital, parental, or family status of an employee or applicant for employment that treats persons differently on the basis of sex; or

(2) Which is based upon whether an employee or applicant for employment is the head of household or principal wage earner in such employee's or applicant's family unit.

(b) *Pregnancy.* A recipient shall not discriminate against or exclude from employment any employee or applicant for employment on the basis of pregnancy, childbirth, false pregnancy, termination of pregnancy, or recovery therefrom.

(c) *Pregnancy as a temporary disability.* Subject to §1042.235(d), a recipient shall treat pregnancy, childbirth, false pregnancy, termination of pregnancy, recovery therefrom, and any temporary disability resulting therefrom as any other temporary disability for all job-related purposes, including commencement, duration, and extensions of leave, payment of disability income, accrual of seniority and any other benefit or service, and reinstatement, and under any fringe benefit offered to employees by virtue of employment.

(d) *Pregnancy leave.* In the case of a recipient that does not maintain a leave policy for its employees, or in the case of an employee with insufficient leave or accrued employment time to qualify for leave under such a policy, a recipient shall treat pregnancy, childbirth, false pregnancy, termination of pregnancy, and recovery therefrom as a justification for a leave of absence without pay for a reasonable period of

10 CFR Ch. X (1-1-16 Edition)

time, at the conclusion of which the employee shall be reinstated to the status that she held when the leave began or to a comparable position, without decrease in rate of compensation or loss of promotional opportunities, or any other right or privilege of employment.

§ 1042.535 Effect of state or local law or other requirements.

(a) *Prohibitory requirements.* The obligation to comply with §§1042.500 through 1042.550 is not obviated or alleviated by the existence of any State or local law or other requirement that imposes prohibitions or limits upon employment of members of one sex that are not imposed upon members of the other sex.

(b) *Benefits.* A recipient that provides any compensation, service, or benefit to members of one sex pursuant to a State or local law or other requirement shall provide the same compensation, service, or benefit to members of the other sex.

§ 1042.540 Advertising.

A recipient shall not in any advertising related to employment indicate preference, limitation, specification, or discrimination based on sex unless sex is a bona fide occupational qualification for the particular job in question.

§ 1042.545 Pre-employment inquiries.

(a) *Marital status.* A recipient shall not make pre-employment inquiry as to the marital status of an applicant for employment, including whether such applicant is "Miss" or "Mrs."

(b) *Sex.* A recipient may make pre-employment inquiry as to the sex of an applicant for employment, but only if such inquiry is made equally of such applicants of both sexes and if the results of such inquiry are not used in connection with discrimination prohibited by these Title IX regulations.

§ 1042.550 Sex as a bona fide occupational qualification.

A recipient may take action otherwise prohibited by §§1042.500 through 1042.550 provided it is shown that sex is a bona fide occupational qualification for that action, such that consideration of sex with regard to such action

Department of Energy

§ 1044.03

is essential to successful operation of the employment function concerned. A recipient shall not take action pursuant to this section that is based upon alleged comparative employment characteristics or stereotyped characterizations of one or the other sex, or upon preference based on sex of the recipient, employees, students, or other persons, but nothing contained in this section shall prevent a recipient from considering an employee's sex in relation to employment in a locker room or toilet facility used only by members of one sex.

Subpart F—Other Provisions

§ 1042.600 Covered programs.

The financial assistance programs to which this part applies are listed in Appendix A to 10 CFR part 1040.

§ 1042.605 Enforcement procedures.

The investigative, compliance, and enforcement procedural provisions of Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d) are hereby adopted and applied to these Title IX regulations. These procedures may be found at 10 CFR part 1040, subparts G and H.

PART 1044—SECURITY REQUIREMENTS FOR PROTECTED DISCLOSURES UNDER SECTION 3164 OF THE NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2000

Sec.

- 1044.01 What are the purpose and scope of this part?
- 1044.02 Who must follow the requirements contained in this part?
- 1044.03 What definitions apply to this part?
- 1044.04 What is a protected disclosure?
- 1044.05 What is the effect of a disclosure qualifying as a "protected disclosure"?
- 1044.06 Who may receive a protected disclosure?
- 1044.07 How can you find out if a particular person is authorized to receive a protected disclosure?
- 1044.08 Do you have to submit the documents for classification review before you give them to someone?
- 1044.09 What do you do if you plan to disclose classified or unclassified controlled nuclear information orally rather than by providing copies of documents?

1044.10 Will your identity be protected?

1044.11 How do you protect the documents and information that you want to disclose?

1044.12 What procedures can you invoke if you believe you have been discharged, demoted, or otherwise discriminated against as a reprisal for making a protected disclosure?

AUTHORITY: 42 U.S.C. 7101 *et seq.*, 7239, and 50 U.S.C. 2401 *et seq.*

SOURCE: 66 FR 4642, Jan. 18, 2001, unless otherwise noted.

§ 1044.01 What are the purpose and scope of this part?

(a) *Purpose.* This part prescribes the security requirements for making protected disclosures of classified or unclassified controlled nuclear information under the whistleblower protection provisions of section 3164 of the National Defense Authorization Act for Fiscal Year 2000.

(b) *Scope.* The security requirements for making protected disclosures in this part are independent of, and not subject to any limitations that may be provided in, the Whistleblower Protection Act of 1989 (Public Law 101-12) or any other law that may provide protection for disclosures of information by employees of DOE or of a DOE contractor.

[66 FR 54645, Oct. 30, 2001]

§ 1044.02 Who must follow the requirements contained in this part?

The requirements apply to you if you are:

- (a) An employee of DOE, including the National Nuclear Security Administration, or one of its contractors;
- (b) Engaged in DOE defense activities; and
- (c) Wish to make a protected disclosure as described in §1044.04 of this part.

§ 1044.03 What definitions apply to this part?

The following definitions apply to this subpart:

Atomic Energy Act means the Atomic Energy Act of 1954, as amended (42 U.S.C. 2011 *et seq.*

Classified information means:

§ 1044.04

(1) Information classified as Restricted Data or Formerly Restricted Data under the Atomic Energy Act; or

(2) Information that has been determined pursuant to Executive Order 12958 or prior Executive Orders to require protection against unauthorized disclosure and is marked to indicate its classification status when in document form (also referred to as “National Security Information” in 10 CFR Part 1045 or “defense information” in the Atomic Energy Act).

Contractor means any industrial, educational, commercial or other entity, grantee or licensee at any tier, including an individual, that has executed an agreement with the Federal Government for the purpose of performing under a contract, license or other agreement.

Defense activities means activities of DOE engaged in support of:

(1) The production, testing, sampling, maintenance, repair, modification, assembly, disassembly, utilization, transportation, or retirement of nuclear weapons or components of nuclear weapons;

(2) The production, utilization, or transportation of nuclear material for military applications; or

(3) The safeguarding of activities, equipment, or facilities which support the production of nuclear weapons or nuclear material for nuclear weapons.

DOE means the Department of Energy, including the National Nuclear Security Administration.

Unclassified controlled nuclear information means unclassified government information prohibited from unauthorized dissemination under section 148 of the Atomic Energy Act and DOE implementing regulations in 10 CFR part 1017.

§ 1044.04 What is a protected disclosure?

A protected disclosure is:

(a) A disclosure of classified or unclassified controlled nuclear information that you reasonably believe provides direct and specific evidence of—

(1) A violation of law or Federal regulation;

(2) Gross mismanagement, a gross waste of funds, or an abuse of authority; or

(3) A false statement to Congress on pursuant to an issue of material fact; and

(b) Protected pursuant to the procedures in this part, including the security procedures referenced in §1044.11; and

(c) Revealed only to a person or organization described in §1044.06.

§ 1044.05 What is the effect of a disclosure qualifying as a “protected disclosure”?

If a DOE or DOE contractor employee follows the procedures of this part when making a disclosure of classified or unclassified controlled nuclear information, then the employer (DOE or DOE contractor as applicable) may not discharge, demote, or otherwise discriminate against the employee as a reprisal for making the disclosure.

§ 1044.06 Who may receive a protected disclosure?

The following persons or organizations may receive a protected disclosure:

(a) A member of a committee of Congress having primary responsibility for oversight of the department, agency, or element of the Government to which the disclosed information relates;

(b) An employee of Congress who is a staff member of such a committee and has an appropriate security access authorization for the information being disclosed;

(c) The Inspector General of the Department of Energy;

(d) The Federal Bureau of Investigation; or

(e) Any other element of the Government designated by the Secretary of Energy as authorized to receive the information being disclosed.

§ 1044.07 How can you find out if a particular person is authorized to receive a protected disclosure?

You must contact the Department of Energy Inspector General for help in determining whether a particular person is authorized to receive the classified or unclassified controlled nuclear information you wish to disclose. The Inspector General will contact the Office of Personnel Security as necessary

10 CFR Ch. X (1–1–16 Edition)

Department of Energy

§ 1044.12

to determine the security access authorization of the person to receive the protected disclosure.

[66 FR 4642, Jan. 18, 2001, as amended at 71 FR 68736, Nov. 28, 2006]

§ 1044.08 Do you have to submit the documents for classification review before you give them to someone?

Yes, you must submit each document with a classification or control marking and any unmarked document generated in a classified or controlled subject area to the Inspector General. The Inspector General forwards each document to the Office of Classification for a determination as to whether the information in the document is properly classified, controlled, or may be released to the public.

[66 FR 4642, Jan. 18, 2001, as amended at 71 FR 68736, Nov. 28, 2006]

§ 1044.09 What do you do if you plan to disclose classified or unclassified controlled nuclear information orally rather than by providing copies of documents?

You must describe in detail to the Inspector General what information you wish to disclose. The Inspector General may require that the information to be disclosed be put in writing in order to ensure the Inspector General obtains and provides accurate advice. The Inspector General will consult with the Office of Classification who will provide you with advice, through the Inspector General, as to whether the information is classified or controlled and any steps needed to protect the information.

[66 FR 4642, Jan. 18, 2001, as amended at 71 FR 68736, Nov. 28, 2006]

§ 1044.10 Will your identity be protected?

Yes, both the Inspector General and the Office of Classification must protect, consistent with legal requirements, your identity and any information about your disclosure.

[66 FR 4642, Jan. 18, 2001, as amended at 71 FR 68736, Nov. 28, 2006]

§ 1044.11 How do you protect the information that you want to disclose?

To protect classified information and unclassified controlled nuclear information you plan to disclose, you must:

(a) Only disclose the information to personnel who possess the appropriate clearance and need-to-know for the information disclosed as required in 10 CFR part 710, after verifying any special authorizations or accesses, such as Sensitive Compartmented Information, Special Access Program, and Weapon Data information;

(b) Use only equipment (such as computers or typewriters) that is approved for classified processing for the generation of classified documents;

(c) Mark documents as required by 10 CFR part 1045 (classified information), 10 CFR Part 1017 (unclassified controlled nuclear information), or as required by the Office of Classification.

(d) Use only approved copiers to reproduce documents;

(e) Store classified documents in facilities approved by the U.S. Government for the storage of classified material;

(f) Use only approved destruction devices to destroy classified documents;

(g) Use only appropriate secure means, such as secure facsimile or secure telephone, to provide classified information orally or electronically when transmitting or communicating that information (e.g. the applicable classified mailing address); and

(h) Follow any additional specific instructions from the Office of Health, Safety and Security on how to protect the information.

[66 FR 4642, Jan. 18, 2001, as amended at 71 FR 68736, Nov. 28, 2006]

§ 1044.12 What procedures can you invoke if you believe you have been discharged, demoted, or otherwise discriminated against as a reprisal for making a protected disclosure?

If you believe you have been discriminated against as a reprisal for making a protected disclosure, you may submit a complaint to the Director of the Office of Hearings and Appeals, HG-1/L'Enfant Plaza Building, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC

Pt. 1045

20585–1615, or you may send your complaint to the Director, Office of Hearings and Appeals, by facsimile to FAX number (202) 287–1415. In your complaint, you should give your reasons for believing that you have been discriminated against as a reprisal for making a protected disclosure, and include any information you think is relevant to your complaint. The Office of Hearings and Appeals will conduct an investigation of your complaint unless the Director determines your complaint is frivolous. The Director will notify you in writing if your complaint is found to be frivolous. If an investigation is conducted, the Director will submit a report of the investigation to you, to the employer named in your complaint, and to the Secretary of Energy, or the Secretary’s designee. The Secretary, or the Secretary’s designee, will take appropriate action, pursuant to 42 U.S.C. 7239(k), to abate any discriminatory actions taken as reprisal for making a protected disclosure.

[66 FR 4642, Jan. 18, 2001, as amended at 71 FR 68736, Nov. 28, 2006]

PART 1045—NUCLEAR CLASSIFICATION AND DECLASSIFICATION

Subpart A—Program Management of the Restricted Data and Formerly Restricted Data Classification System

- Sec.
- 1045.1 Purpose and scope.
- 1045.2 Applicability.
- 1045.3 Definitions.
- 1045.4 Responsibilities.
- 1045.5 Sanctions.
- 1045.6 Openness Advisory Panel.
- 1045.7 Suggestions or complaints.
- 1045.8 Procedural exemptions.
- 1045.9 RD classification performance evaluation.

Subpart B—Identification of Restricted Data and Formerly Restricted Data Information

- 1045.10 Purpose and scope.
- 1045.11 Applicability.
- 1045.12 Authorities.
- 1045.13 Classification prohibitions.
- 1045.14 Process for classification and declassification of restricted data and formerly restricted data information.
- 1045.15 Classification and declassification presumptions.

10 CFR Ch. X (1–1–16 Edition)

- 1045.16 Criteria for evaluation of restricted data and formerly restricted data information.
- 1045.17 Classification levels.
- 1045.18 Newly generated information in a previously declassified subject area.
- 1045.19 Accountability for classification and declassification determinations.
- 1045.20 Ongoing call for declassification proposals.
- 1045.21 Privately generated restricted data.
- 1045.22 No comment policy.

Subpart C—Generation and Review of Documents Containing Restricted Data and Formerly Restricted Data

- 1045.30 Purpose and scope.
- 1045.31 Applicability.
- 1045.32 Authorities.
- 1045.33 Appointment of restricted data management official.
- 1045.34 Designation of restricted data classifiers.
- 1045.35 Training requirements.
- 1045.36 Reviews of agencies with access to restricted data and formerly restricted data.
- 1045.37 Classification guides.
- 1045.38 Automatic declassification prohibition.
- 1045.39 Challenging classification and declassification determinations.
- 1045.40 Marking requirements.
- 1045.41 Use of classified addendums.
- 1045.42 Mandatory and Freedom of Information Act reviews for declassification of restricted data and formerly restricted data documents.
- 1045.43 Systematic review for declassification.
- 1045.44 Classification review prior to public release.
- 1045.45 Review of unmarked documents with potential restricted data or formerly restricted data.
- 1045.46 Classification by association or compilation.

Subpart D—Executive Order 12958: “Classified National Security Information” Requirements Affecting the Public

- 1045.50 Purpose and scope.
- 1045.51 Applicability.
- 1045.52 Mandatory declassification review requests.
- 1045.53 Appeal of denial of mandatory declassification review requests.

AUTHORITY: 42 U.S.C. 2011; E.O. 12958, 60 FR 19825, 3 CFR, 1995 Comp., p. 333; E.O. 13292, 68 FR 15315, 3 CFR 2004 Comp., p. 196.

SOURCE: 62 FR 68509, Dec. 31, 1997, unless otherwise noted.

Subpart A—Program Management of the Restricted Data and Formerly Restricted Data Classification System

§ 1045.1 Purpose and scope.

This subpart establishes responsibilities associated with this part, describes the Openness Advisory Panel, defines key terms, describes sanctions related to violation of the policies and procedures in this part, and describes how to submit suggestions or complaints concerning the Restricted Data classification and declassification program, and how to request procedural exceptions.

§ 1045.2 Applicability.

This subpart applies to—

- (a) Any person with authorized access to RD or FRD;
- (b) Any agency with access to RD or FRD; and
- (c) Any person who might generate information determined to be RD or FRD.

§ 1045.3 Definitions.

As used in this part:

Agency means any “Executive Agency” as defined in 5 U.S.C. 105; any “Military Department” as defined in 5 U.S.C. 102; and any other entity within the executive branch that comes into possession of RD or FRD information or documents.

Atomic Energy Act means the Atomic Energy Act of 1954, as amended (42 U.S.C. 2011 *et seq.*).

Authorized Holder means a person with the appropriate security clearance required to have access to classified information and the need to know the information in the performance of Government-approved activities.

Automatic Declassification means the declassification of information or documents based solely upon:

- (1) The occurrence of a specific date or event as determined by the classifier; or
- (2) The expiration of a maximum time frame for duration of classification established under Executive Order 12958.

Chief Health, Safety and Security officer means the Department of Energy

Chief Health, Safety and Security Officer, or any person to whom the Chief’s duties are delegated.

Classification means the act or process by which information is determined to be classified information.

Classification Guide means a written record of detailed instructions as to whether specific information is classified, usually concerning a system, plan, project, or program. It identifies information to be classified and specifies the level (and duration for NSI only) of classification assigned to such information. Classification guides are the primary basis for reviewing documents to determine whether they contain classified information.

Classification Level means one of three designators:

(1) *Top Secret* is applied to information (RD, FRD, or NSI), the unauthorized disclosure of which reasonably could be expected to cause exceptionally grave damage to the national security that the appropriate official is able to identify or describe.

(2) *Secret* is applied to information (RD, FRD, or NSI), the unauthorized disclosure of which reasonably could be expected to cause serious damage to the national security that the appropriate official is able to identify or describe.

(3) *Confidential*. (i) For NSI, Confidential is applied to information, the unauthorized disclosure of which reasonably could be expected to cause damage to the national security that the appropriate official is able to identify or describe.

(ii) For RD and FRD, Confidential is applied to information, the unauthorized disclosure of which could reasonably be expected to cause undue risk to the common defense and security that the appropriate official is able to identify or describe.

Classified Information means:

(1) Information classified as RD or FRD under the Atomic Energy Act; or

(2) Information determined to require protection against unauthorized disclosure under Executive Order (E.O.) 12958 or prior Executive Orders (also identified as National Security Information or NSI).

Contractor means any industrial, educational, commercial or other entity,

§ 1045.3

10 CFR Ch. X (1–1–16 Edition)

grantee or licensee at all tiers, including an individual, that has executed an agreement with the Federal Government for the purpose of performing under a contract, license or other agreement.

Declassification means a determination by appropriate authority that information or documents no longer require protection, as classified information, against unauthorized disclosure in the interests of national security.

Department or DOE means Department of Energy.

Director of Classification means the Department of Energy Director, Office of Classification, or any person to whom the Director's duties are delegated. The Director of Classification is subordinate to the Chief Health, Safety and Security Officer.

Document means the physical medium on or in which information is recorded, or a product or substance which contains or reveals information, regardless of its physical form or characteristics.

Formerly Restricted Data (FRD) means classified information jointly determined by DOE and the DoD to be related primarily to the military utilization of nuclear weapons and removed (by transclassification) from the RD category pursuant to section 142(d) of the Atomic Energy Act.

Government means the executive branch of the Federal Government of the United States.

Government Information means information that is owned by, produced by or for, or is under the control of the U.S. Government.

Information means facts, data, or knowledge itself, as opposed to the medium in which it is contained.

Interagency Security Classification Appeals Panel (ISCAP) means a panel created pursuant to Executive Order 12958 to perform functions specified in that order with respect to National Security Information.

National Security means the national defense or foreign relations of the United States.

National Security Information (NSI) means information that has been determined pursuant to Executive Order 12958 or prior Executive Orders to require protection against unauthorized

disclosure and is marked to indicate its classification status when in document form. NSI is referred to as "defense information" in the Atomic Energy Act.

Nuclear weapon means atomic weapon.

Person means:

(1) Any individual, contractor, corporation, partnership, firm, association, trust, estate, public or private institution, group, Government agency, any State, or any political subdivision thereof, or any political entity within a State; and

(2) Any legal successor, representative, agent, or agency of the foregoing.

Portion Marking means the application of certain classification markings to individual words, phrases, sentences, paragraphs, or sections of a document to indicate their specific classification level and category.

Restricted Data (RD) means a kind of classified information that consists of all data concerning the following, but not including data declassified or removed from the RD category pursuant to section 142 of the Atomic Energy Act:

(1) Design, manufacture, or utilization of atomic weapons;

(2) Production of special nuclear material; or

(3) Use of special nuclear material in the production of energy.

Restricted Data Classifier means an individual who derivatively classifies RD or FRD documents. Within the DoD, RD classifiers may also declassify FRD documents.

Restricted Data Management Official means an individual appointed by any agency with access to RD and FRD who is responsible for managing the implementation of this part within that agency or any person to whom these duties are delegated. This person may be the senior agency official required by E.O. 12958.

Secretary means the Secretary of Energy.

Source Document means a classified document, other than a classification guide, from which information is extracted for inclusion in another document. The classification of the information extracted is determined by the classification markings shown in the source document.

Department of Energy

§ 1045.4

Special Nuclear Material means plutonium, uranium enriched in the isotope 233 or in the isotope 235, and any other material which the Secretary determines to be special nuclear material pursuant to the Atomic Energy Act.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68736, Nov. 28, 2006]

§ 1045.4 Responsibilities.

(a) The Director of Classification shall:

(1) Manage the Government-wide system for the classification and declassification of RD and FRD in accordance with the Atomic Energy Act;

(2) In coordination with the DoD, develop regulations to implement the RD and FRD classification system;

(3) Determine whether nuclear-related information is RD;

(4) Oversee agency implementation of the RD and FRD classification system to ensure compliance with this part;

(5) Review agency implementing policies and conduct on-site reviews of each agency's program established under this part;

(6) Prepare and distribute classification guides concerning RD and FRD and review such guides developed by any agency;

(7) Consider and take action on complaints and suggestions from any person with respect to administration of this program; and

(8) Periodically meet with interested members of the public to solicit input for the classification and declassification program.

(b) The Chief Health, Safety and Security Officer shall:

(1) Declassify RD which may be published without undue risk to the common defense and security;

(2) Jointly with the DoD, determine which information in the RD category relating primarily to the military utilization of nuclear weapons may be declassified or placed into the FRD category; and

(3) Jointly with the DoD, declassify FRD which may be published without undue risk to the common defense and security.

(c) The DoD jointly with the DOE shall:

(1) Determine which information in the RD category relating primarily to

the military utilization of nuclear weapons may be declassified or placed into the FRD category;

(2) Ensure that classification guides for FRD and RD relating primarily to the military utilization of nuclear weapons are prepared; and

(3) Declassify FRD and RD relating primarily to the military utilization of nuclear weapons which may be published without undue risk to the common defense and security.

(d) The Nuclear Regulatory Commission (NRC) shall:

(1) Jointly with the DOE, develop classification guides for programs over which both agencies have cognizance; and

(2) Ensure the review and proper classification of RD by RD classifiers under this part, which is generated by the NRC or by its licensed or regulated facilities and activities.

(e) Heads of Agencies with access to RD and FRD shall:

(1) Ensure that RD and FRD are classified in such a manner as to assure the common defense and security in accordance with the policies established in this part;

(2) Designate an RD management official to direct and administer the RD classification program within the agency; and

(3) Promulgate implementing directives.

(f) Agency RD management officials shall:

(1) Jointly with the DOE, develop classification guides for programs over which both agencies have cognizance;

(2) Ensure that agency and contractor personnel who generate RD and FRD documents have access to any classification guides needed;

(3) Ensure that persons with access to RD and FRD are trained on the authorities required to classify and declassify RD and FRD information and documents and on handling procedures and that RD classifiers are trained on the procedures for classifying, declassifying, marking and handling RD and FRD information and documents; and

(4) Cooperate and provide information as necessary to the Director of

§ 1045.5

Classification to fulfill responsibilities under this part.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68736, Nov. 28, 2006]

§ 1045.5 Sanctions.

(a) Knowing, willful, or negligent action contrary to the requirements of this part which results in the misclassification of information may result in appropriate sanctions. Such sanctions may range from administrative sanctions to civil or criminal penalties, depending on the nature and severity of the action as determined by appropriate authority, in accordance with applicable laws.

(b) Other violations of the policies and procedures contained in this part may be grounds for administrative sanctions as determined by appropriate authority.

§ 1045.6 Openness Advisory Panel.

The DOE shall maintain an Openness Advisory Panel, in accordance with the Federal Advisory Committee Act, to provide the Secretary with independent advice and recommendations on Departmental openness initiatives, including classification and declassification issues that affect the public.

§ 1045.7 Suggestions or complaints.

(a) Any person who has suggestions or complaints regarding the Department's classification and declassification policies and procedures may direct them in writing to the Director, Office of Classification, HS-90/Germantown Building, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585-1290.

(b) Such letters should include a description of the issue or problem, the suggestion or complaint, all applicable background information, and an address for the response.

(c) DOE will make every effort to respond within 60 days.

(d) Under no circumstances shall persons be subject to retribution for making a suggestion or complaint regarding the Department's classification and declassification policies or programs.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68736, Nov. 28, 2006]

10 CFR Ch. X (1-1-16 Edition)

§ 1045.8 Procedural exemptions.

(a) Exemptions to the procedural provisions of this part may be granted by the Director of Classification.

(b) A request for an exemption shall be made in writing to the Director of Classification and shall provide all relevant facts, justification, and a proposed alternate procedure.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.9 RD classification performance evaluation.

(a) Heads of agencies shall ensure that RD management officials and those RD classifiers whose duties involve the classification or declassification of significant numbers of RD or FRD documents shall have their personnel performance evaluated with respect to classification activities.

(b) Procedures for the evaluation under paragraph (a) of this section may be the same as those in place for NSI related classification activities as required by Executive Order 12958.

Subpart B—Identification of Restricted Data and Formerly Restricted Data Information

§ 1045.10 Purpose and scope.

(a) This subpart implements sections 141 and 142 (42 U.S.C. 2161 and 2162) of the Atomic Energy Act, which provide for Government-wide policies and procedures concerning the classification and declassification of RD and FRD information.

(b) This subpart establishes procedures for classification prohibitions for RD and FRD, describes authorities and procedures for identifying RD and FRD information, and specifies the policies and criteria DOE shall use in determining if nuclear-related information is RD or FRD.

§ 1045.11 Applicability.

This subpart applies to—

(a) Any person with authorized access to RD or FRD;

(b) Any agency with access to RD or FRD; and

(c) Any person who might generate information determined to be RD or FRD.

Department of Energy

§ 1045.15

§ 1045.12 Authorities.

(a) The Director of Classification may determine whether nuclear-related information is RD.

(b) Except as provided in paragraph (c) of this section, the Chief Health, Safety and Security Officer may declassify RD information.

(c) The Chief Health, Safety and Security Officer, jointly with the DoD, may determine which information in the RD category relating primarily to the military utilization of nuclear weapons may be declassified or placed into the FRD category.

(d) The Chief Health, Safety and Security Officer jointly with the DoD may declassify FRD information.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.13 Classification prohibitions.

In no case shall information be classified RD or FRD in order to:

(a) Conceal violations of law, inefficiency, or administrative error;

(b) Prevent embarrassment to a person, organization, or Agency;

(c) Restrain competition;

(d) Prevent or delay the release of information that does not require protection for national security or non-proliferation reasons;

(e) Unduly restrict dissemination by assigning an improper classification level; or

(f) Prevent or delay the release of information bearing solely on the physical environment or public or worker health and safety.

§ 1045.14 Process for classification and declassification of restricted data and formerly restricted data information.

(a) *Classification of Restricted Data—*

(1) *Submission of Potential RD for Evaluation.* Any authorized holder who believes he or she has information which may be RD shall submit it to an RD classifier for evaluation. The RD classifier shall follow the process described in this paragraph whenever he or she is unable to locate guidance in a classification guide that can be applied to the information. The RD classifier shall forward the information to the Director of Classification via their local classification or security office.

The Director of Classification shall determine whether the information is RD within 90 days of receipt by doing the following:

(i) Determine whether the information is already classified RD under current classification guidance; or

(ii) If it is not already classified, determine if the information concerns the design, manufacture, or utilization of nuclear weapons; the production of special nuclear material; or the use of special nuclear material in the production of energy; and

(A) Apply the criteria in §1045.16 and §1045.17 as the basis for determining the appropriate classification; and

(B) Provide notification of the decision by revising applicable classification guides, if appropriate.

(2) *Protection of Potential RD during Evaluation.* Pending a determination by the Director of Classification, potential RD submitted for evaluation by authorized holders shall be protected at a minimum as Confidential Restricted Data.

(b) *Declassification of Restricted Data.* The Chief Health, Safety and Security Officer shall apply the criteria in §1045.16 when determining whether RD may be declassified.

(c) *Classification of Formerly Restricted Data.* The Chief Health, Safety and Security Officer, jointly with the DoD, shall remove information which relates primarily to the military utilization of nuclear weapons from the RD classification category and classify it as FRD.

(d) *Declassification of Formerly Restricted Data.* The Chief Health, Safety and Security Officer, jointly with the DoD, shall apply the criteria in §1045.16 when determining whether FRD may be declassified.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.15 Classification and declassification presumptions.

(a) The Director of Classification and the Chief Health, Safety and Security Officer shall consider the presumptions listed in paragraphs (d) and (e) of this section before applying the criteria in §1045.16.

§ 1045.16

10 CFR Ch. X (1-1-16 Edition)

(b) Not all areas of nuclear-related information are covered by the presumptions.

(c) In general, existing information listed in paragraphs (d) and (e) of this section has the classification status indicated. Inclusion of specific existing information in one of the presumption categories does not mean that new information in a category is or is not classified, but only that arguments to differ from the presumed classification status of the information should use the appropriate presumption as a starting point.

(d) The Director of Classification and the Chief Health, Safety and Security Officer shall presume that information in the following areas is unclassified unless application of the criteria in § 1045.16 indicates otherwise:

(1) Basic science: mathematics, chemistry, theoretical and experimental physics, engineering, materials science, biology and medicine;

(2) Magnetic confinement fusion technology;

(3) Civilian power reactors, including nuclear fuel cycle information but excluding technologies for uranium enrichment;

(4) Source materials (defined as uranium and thorium and ores containing them);

(5) Fact of use of safety features (e.g., insensitive high explosives, fire resistant pits) to lower the risks and reduce the consequences of nuclear weapon accidents;

(6) Generic weapons effects;

(7) Physical and chemical properties of uranium and plutonium, most of their alloys and compounds, under standard temperature and pressure conditions;

(8) Nuclear fuel reprocessing technology and reactor products not revealing classified production rates or inventories;

(9) The fact, time, location, and yield range (e.g., less than 20 kilotons or 20-150 kilotons) of U.S. nuclear tests;

(10) General descriptions of nuclear material production processes and theory of operation;

(11) DOE special nuclear material aggregate inventories and production rates not revealing size or details concerning the nuclear weapons stockpile;

(12) Types of waste products resulting from all DOE weapon and material production operations;

(13) Any information solely relating to the public and worker health and safety or to environmental quality; and

(14) The simple association or simple presence of any material (i.e., element, compound, isotope, alloy, etc.) at a specified DOE site.

(e) The Director of Classification and the Chief Health, Safety and Security Officer shall presume that information in the following areas is classified unless the application of the criteria in § 1045.16 indicates otherwise:

(1) Detailed designs, specifications, and functional descriptions of nuclear explosives, whether in the active stockpile or retired;

(2) Material properties under conditions achieved in nuclear explosions that are principally useful only for design and analysis of nuclear weapons;

(3) Vulnerabilities of U.S. nuclear weapons to sabotage, countermeasures, or unauthorized use;

(4) Nuclear weapons logistics and operational performance information (e.g., specific weapon deployments, yields, capabilities), related to military utilization of those weapons required by the DoD;

(5) Details of the critical steps or components in nuclear material production processes; and

(6) Features of military nuclear reactors, especially naval nuclear propulsion reactors, that are not common to or required for civilian power reactors.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.16 Criteria for evaluation of restricted data and formerly restricted data information.

(a) The Director of Classification shall classify information as RD and the Chief Health, Safety and Security Officer shall maintain the classification of RD (and FRD in coordination with the DoD) only if undue risk of damage to the common defense and security from its unauthorized disclosure can be identified and described.

(b) The Director of Classification shall not classify information and the Chief Health, Safety and Security Officer shall declassify information if

Department of Energy

§ 1045.18

there is significant doubt about the need to classify the information.

(c) The Director of Classification and the Chief Health, Safety and Security Officer shall consider the presumptions in §1045.15 (d) and (e) before applying the criteria in paragraph (d) of this section.

(d) In determining whether information should be classified or declassified, the Director of Classification and the Chief Health, Safety and Security Officer shall consider the following:

(1) Whether the information is so widely known or readily apparent to knowledgeable observers that its classification would cast doubt on the credibility of the classification system;

(2) Whether publication of the information would assist in the development of countermeasures or otherwise jeopardize any U.S. weapon or weapon system;

(3) Whether the information would hinder U.S. nonproliferation efforts by significantly assisting potential adversaries to develop or improve a nuclear weapon capability, produce nuclear weapons materials, or make other military use of nuclear energy;

(4) Whether publication of the information would have a detrimental effect on U.S. foreign relations;

(5) Whether publication of the information would benefit the public welfare, taking into account the importance of the information to public discussion and education and potential contribution to economic growth; and, 6) Whether publication of the information would benefit the operation of any Government program by reducing operating costs or improving public acceptance.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.17 Classification levels.

(a) *Restricted Data*. The Director of Classification shall assign one of the following classification levels to RD information to reflect the sensitivity of the information to the national security. The greater the damage expected from unauthorized disclosure, the higher the classification level assigned to the information.

(1) *Top Secret*. The Director of Classification shall classify RD information

Top Secret if it is vital to the national security and if its unauthorized disclosure could reasonably be expected to cause exceptionally grave damage to the national security. Examples of RD information that warrant Top Secret classification include detailed technical descriptions of critical features of a nuclear explosive design that would enable a proliferant or nuclear power to build or substantially improve a nuclear weapon, information that would make possible the unauthorized use of a U.S. nuclear weapon, or information revealing catastrophic failure or operational vulnerability in a U.S. nuclear weapon.

(2) *Secret*. The Director of Classification shall classify RD information as Secret if its unauthorized disclosure could reasonably be expected to cause serious damage to the national security, but the RD information is not sufficiently comprehensive to warrant designation as Top Secret. Examples of RD information that warrant Secret classification include designs for specific weapon components (not revealing critical features), key features of uranium enrichment technologies, or specifications of weapon materials.

(3) *Confidential*. The Director of Classification shall classify RD information as Confidential if it is deemed to be of significant use to a potential adversary or nuclear proliferant and its unauthorized disclosure could reasonably be expected to cause undue risk to the common defense and security. Examples of RD information that warrant Confidential classification are the amount of high explosives used in nuclear weapons, gaseous diffusion design information, and design information for Naval reactors.

(b) *Formerly Restricted Data*. The Director of Classification, jointly with the DoD, shall assign one of the classification levels in paragraph (a) of this section to FRD information to reflect its sensitivity to the national security.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.18 Newly generated information in a previously declassified subject area.

(a) The Director of Classification may evaluate newly generated specific

§ 1045.19

information in a previously declassified subject area using the criteria in section 1045.16 and classify it as RD, if warranted.

(b) The Director of Classification shall not classify the information in such cases if it is widely disseminated in the public domain.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.19 Accountability for classification and declassification determinations.

(a) Whenever a classification or declassification determination concerning RD or FRD information is made, the Director of Classification and the Chief Health, Safety and Security Officer shall be able to justify the determination. For FRD and RD primarily related to military utilization, the Director of Classification and the Chief Health, Safety and Security Officer shall coordinate the determination and justification with the DoD. If the determination involves a departure from the presumptions in §1045.15, the justification shall include a rationale for the departure. Often the justification itself will contain RD or FRD information. In such a case, the Director of Classification and the Chief Health, Safety and Security Officer shall ensure that a separate justification can be prepared which is publicly releasable. The publicly releasable justification shall be made available to any interested person upon request to the Director of Classification.

(b) The Director of Classification shall prepare a report on an annual basis on the implementation of this part. This report shall be available to any interested person upon request to the Director of Classification. Requests may be submitted to the Director Office of Classification, HS-90/Germantown Building, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585-1290.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.20 Ongoing call for declassification proposals.

The Chief Health, Safety and Security Officer shall consider proposals from the public or agencies or contrac-

10 CFR Ch. X (1-1-16 Edition)

tors for declassification of RD and FRD information on an ongoing basis. Declassification proposals for RD and FRD information shall be forwarded to the Chief Health, Safety and Security Officer, HS-1/Forrestal Building, U.S. Department of Energy, 1000 Independence Avenue SW, Washington, DC 20585. Any proposed action shall include a description of the information concerned and may include a reason for the request. DOE and DoD shall coordinate with one another concerning declassification proposals for FRD information.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.21 Privately generated restricted data.

(a) DOE may classify RD which is privately generated by persons not pursuant to Government contracts, in accordance with the Atomic Energy Act.

(b) In order for information privately generated by persons to be classified as RD, the Secretary or Deputy Secretary shall make the determination personally and in writing. This authority shall not be delegated.

(c) DOE shall publish a FEDERAL REGISTER notice when privately generated information is classified as RD, and shall ensure that the content of the notice is consistent with protecting the national security and the interests of the private party.

§ 1045.22 No comment policy.

(a) Authorized holders of RD and FRD shall not confirm or expand upon the classification status or technical accuracy of classified information in the public domain.

(b) Unauthorized disclosure of classified information does not automatically result in the declassification of that information.

(c) If the disclosure of classified information is sufficiently authoritative or credible, the Chief Health, Safety and Security Officer shall examine the possibility of declassification.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

Subpart C—Generation and Review of Documents Containing Restricted Data and Formerly Restricted Data

§ 1045.30 Purpose and scope.

This subpart specifies Government-wide classification program implementation requirements for agencies with access to RD and FRD, describes authorities and procedures for RD and FRD document classification and declassification, provides for periodic or systematic review of RD and FRD documents, and describes procedures for the mandatory review of RD and FRD documents. This subpart applies to all RD and FRD documents, regardless of whether they also contain National Security Information (NSI), or other controlled information such as “For Official Use Only” information or “Unclassified Controlled Nuclear Information.”

§ 1045.31 Applicability.

This subpart applies to—

- (a) Any person with authorized access to RD or FRD;
- (b) Any agency with access to RD or FRD; and
- (c) Any person generating a document containing RD or FRD.

§ 1045.32 Authorities.

(a) *Classification of RD and FRD documents.* (1) To the maximum extent practical, all RD and FRD documents shall be classified based on joint DOE-Agency classification guides or Agency guides coordinated with the DOE. When it is not practical to use classification guides, source documents may be used as an alternative.

(2) Only individuals designated as RD classifiers may classify RD and FRD documents, except within the DoD. Within the DoD, any individual with access to RD and FRD who has been trained may classify RD and FRD documents.

(3) RD classifiers shall classify only documents in subject areas in which they have programmatic expertise.

(4) RD classifiers may upgrade or downgrade the classification level of RD or FRD documents in accordance with joint DOE-Agency classification

guides or Agency guides coordinated with the DOE. When it is not practical to use classification guides, source documents may be used as an alternative.

(b) *Declassification of RD and FRD documents.* (1) Only designated individuals in the DOE may declassify documents containing RD.

(2) Except as provided in paragraph (b)(3) of this section, only designated individuals in the DOE or appropriate individuals in DoD may declassify documents marked as FRD in accordance with joint DoD-DOE classification guides or DoD guides coordinated with the DOE.

(3) The DOE and DoD may delegate these authorities to other agencies and to contractors. Contractors without the delegated authority shall send any document marked as RD or FRD that needs to be considered for declassification to the appropriate agency office.

§ 1045.33 Appointment of restricted data management official.

(a) Each agency with access to RD or FRD shall appoint an official to be responsible for the implementation of this part and shall advise the Director of Classification of such appointment.

(b) This official shall ensure the proper implementation of this part within his or her agency and shall serve as the primary point of contact for coordination with the Director of Classification on RD and FRD classification and declassification issues.

(c) Within the DoD, an RD management official shall be appointed in each DoD agency.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.34 Designation of restricted data classifiers.

(a) Except within the DoD, RD management officials shall ensure that persons who derivatively classify RD or FRD documents are designated by position or by name as RD classifiers.

(b) All contractor organizations with access to RD and FRD, including DoD contractors, shall designate RD classifiers.

§ 1045.35 Training requirements.

(a) RD management officials shall ensure that persons with access to RD

§ 1045.36

and FRD information are trained on the authorities required to classify and declassify RD and FRD information and documents and on handling procedures. RD management officials shall ensure that RD classifiers are trained on the procedures for classifying, declassifying, marking and handling RD and FRD information and documents.

(b) The Director of Classification shall develop training materials related to implementation of this part and shall provide these materials to RD management officials and any other appropriate persons.

(c) The Director of Classification shall review any RD-related training material submitted by agency and contractor representatives to ensure consistency with current policy.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.36 Reviews of agencies with access to restricted data and formerly restricted data.

(a) The DOE and each agency with access to RD and FRD shall consult periodically to assure appropriate implementation of this part. Such consultations may result in DOE conducting an on-site review within the agency if DOE and the RD management official determine that such a review would be mutually beneficial or that it is necessary to remedy a problem.

(b) To address issues concerning implementation of this part, the Director of Classification shall establish a standing group of all RD management officials to meet periodically.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.37 Classification guides.

(a) The classification and declassification determinations made by the Director of Classification and the Chief Health, Safety and Security Officer under the classification criteria in §1045.16 shall be promulgated in classification guides.

(b) DOE shall jointly develop classification guides with the DoD, NRC, NASA, and other agencies as required for programs for which DOE and these agencies share responsibility.

(c) Agencies shall coordinate with the Director of Classification whenever

10 CFR Ch. X (1–1–16 Edition)

they develop or revise classification guides with RD or FRD information topics.

(d) Originators of classification guides with RD or FRD topics shall review such guides at least every five years and make revisions as necessary.

(e) RD classifiers shall use classification guides as the primary basis for classifying and declassifying documents containing RD and FRD.

(f) Each RD management official shall ensure that all RD classifiers have access to all pertinent nuclear classification guides.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.38 Automatic declassification prohibition.

(a) Documents containing RD and FRD remain classified until a positive action by an authorized person is taken to declassify them.

(b) In accordance with the Atomic Energy Act, no date or event for automatic declassification ever applies to RD and FRD documents, even if such documents also contain NSI.

(c) E.O. 12958 acknowledges that RD and FRD are exempt from all provisions of the E.O., including automatic declassification.

§ 1045.39 Challenging classification and declassification determinations.

(a) Any authorized holder of an RD or FRD document who, in good faith, believes that the RD or FRD document has an improper classification status is encouraged and expected to challenge the classification with the RD Classifier who classified the document.

(b) Agencies shall establish procedures under which authorized holders of RD and FRD documents are encouraged and expected to challenge any classification status they believe is improper. These procedures shall assure that:

(1) Under no circumstances are persons subject to retribution for bringing forth a classification challenge.

(2) The individual who initially receives the challenge provides a response within 90 days to the person bringing forth the challenge.

Department of Energy

§ 1045.41

(3) A decision concerning a challenge involving RD or FRD may be appealed to the Director of Classification. In the case of FRD and RD related primarily to the military utilization of nuclear weapons, the Director of Classification shall coordinate with the DoD. If the justification for classification does not satisfy the person making the challenge, a further appeal may be made to the Chief Health, Safety and Security Officer.

(c) Classification challenges concerning documents containing RD and FRD information are not subject to review by the Interagency Security Classification Appeals Panel, unless those documents also contain NSI which is the basis for the challenge. In such cases, the RD and FRD portions of the document shall be deleted and then the NSI and unclassified portions shall be provided to the Interagency Security Classification Appeals Panel for review.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.40 Marking requirements.

(a) RD classifiers shall ensure that each RD and FRD document is clearly marked to convey that it contains RD or FRD information, the level of classification assigned, and the additional markings in paragraphs (b)(3) and (4) of this section.

(b) *Front Marking.* In addition to the overall classification level of the document, the following notices shall appear on the front of the document, as appropriate:

(1) If the document contains RD:

RESTRICTED DATA

This document contains RESTRICTED DATA as defined in the Atomic Energy Act of 1954. Unauthorized disclosure subject to administrative and criminal sanctions.

(2) If the document contains FRD but does not contain RD:

FORMERLY RESTRICTED DATA

Unauthorized disclosure subject to administrative and criminal sanctions. Handle as RESTRICTED DATA in foreign dissemination. Section 144b, Atomic Energy Act of 1954.

(3) An RD or FRD document shall be marked to identify the classification

guide or source document, by title and date, used to classify the document:

Derived from:

(Classification Guide or source document—title and date)

(4) An RD or FRD document shall be marked with the identity of the RD classifier, unless the classifier is the same as the document originator or signer.

RD Classifier:

(Name and position or title)

(c) *Interior Page.* RD classifiers shall ensure that RD and FRD documents are clearly marked at the top and bottom of each interior page with the overall classification level and category of the document or the classification level and category of the page, whichever is preferred. The abbreviations “RD” and “FRD” may be used in conjunction with the document classification (e.g., SECRET RD or SECRET FRD).

(d) *Declassification Marking.* Declassified RD and FRD documents shall be marked with the identity of the individual authorizing the declassification, the declassification date and the classification guide which served as the basis for the declassification. Individuals authorizing the declassification shall ensure that the following marking is affixed on RD and FRD documents which they declassify:

Declassified on:

(Date)

Authorizing Individual:

(Name and position or title)

Authority:

(Classification Guide—title and date)

§ 1045.41 Use of classified addendums.

(a) In order to maximize the amount of information available to the public and to simplify document handling procedures, document originators should segregate RD or FRD into an addendum whenever practical. When RD or FRD is segregated into an addendum, the originator shall acknowledge the existence of the classified addendum

§ 1045.42

unless such an acknowledgment would reveal classified information.

(b) When segregation of RD or FRD into an addendum is not practical, document originators are encouraged to prepare separate unclassified versions of documents with significant public interest.

(c) When documents contain environmental, safety or health information and a separate unclassified version cannot be prepared, document originators are encouraged to provide a publicly releasable rationale for the classification of the documents.

§ 1045.42 Mandatory and Freedom of Information Act reviews for declassification of restricted data and formerly restricted data documents.

(a) *General.* (1) Agencies with documents containing RD and FRD shall respond to mandatory review and Freedom of Information Act (FOIA) requests for these documents from the public.

(2) In response to a mandatory review or Freedom of Information Act request, DOE or DoD may refuse to confirm or deny the existence or nonexistence of the requested information whenever the fact of its existence or nonexistence is itself classified as RD or FRD.

(b) *Processing Requests.* (1) Agencies shall forward documents containing RD to DOE for review.

(2) Agencies shall forward documents containing FRD to the DOE or to the DoD for review, depending on which is the originating agency.

(3) The DOE and DoD shall coordinate the review of RD and FRD documents as appropriate.

(4) The review and appeal process is that described in subpart D of this part except for the appeal authority. DOE and DoD shall not forward RD and FRD documents to the Interagency Security Classification Appeals Panel (ISCAP) for appeal review unless those documents also contain NSI. In such cases, the DOE or DoD shall delete the RD and FRD portions prior to forwarding the NSI and unclassified portions to the ISCAP for review.

(5) *Information Declassification Actions resulting from appeal reviews.* (i) Appeal reviews of RD or FRD documents shall be based on existing classification

10 CFR Ch. X (1-1-16 Edition)

guidance. However, the Director of Classification shall review the RD and FRD information in the appealed document to determine if it may be a candidate for possible declassification.

(ii) If declassification of the information appears appropriate, the Director of Classification shall initiate a formal declassification action and so advise the requester.

(c) *Denying Official.* (1) The denying official for documents containing RD is the Director of Classification.

(2) The denying official for documents containing FRD is either the Director of Classification or an appropriate DoD official.

(d) *Appeal Authority.* (1) The appeal authority for RD documents is the Chief Health, Safety and Security Officer.

(2) The appeal authority for FRD documents is either the Chief Health, Safety and Security Officer, or an appropriate DoD official.

(e) The denying official and appeal authority for Naval Nuclear Propulsion Information is the Director, Office of Naval Reactors.

(f) RD and FRD information contained in documents shall be withheld from public disclosure under exemption 3 of the FOIA (5 U.S.C. 522 (b)(3)) because such information is exempt under the statutory jurisdiction of the Atomic Energy Act.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.43 Systematic review for declassification.

(a) The Secretary shall ensure that RD documents, and the DoD shall ensure that FRD documents, are periodically and systematically reviewed for declassification. The focus of the review shall be based on the degree of public and researcher interest and likelihood of declassification upon review.

(b) Agencies with RD or FRD document holdings shall cooperate with the Director of Classification (and with the DoD for FRD) to ensure the systematic review of RD and FRD documents.

(c) Review of documents in particular areas of public interest shall be considered if sufficient interest is demonstrated. Proposals for systematic document reviews of given collections

Department of Energy

§ 1045.53

or subject areas should be addressed to the Director, Office of Classification, HS-90/Germantown Building, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585-1290.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.44 Classification review prior to public release.

Any person with authorized access to RD or FRD who generates a document intended for public release in an RD or FRD subject area shall ensure that it is reviewed for classification by the appropriate DOE organization (for RD) or the appropriate DOE or DoD organization (for FRD) prior to its release.

§ 1045.45 Review of unmarked documents with potential restricted data or formerly restricted data.

(a) Individuals reviewing NSI records of permanent historical value under the automatic or systematic review provisions of E.O. 12958 may come upon documents that they suspect may contain RD or FRD, but which are not so marked. Such documents are not subject to automatic declassification.

(b) Such documents shall be reviewed by an RD Classifier as soon as possible to determine their classification status. Assistance may be requested from the Director of Classification.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.46 Classification by association or compilation.

(a) If two pieces of unclassified information reveal classified information when associated, then RD classifiers may classify the document.

(b) RD classifiers may classify a document because a number of pieces of unclassified information considered together contain some added value such as completeness or comprehensiveness of the information which warrants classification.

Subpart D—Executive Order 12958: “Classified National Security Information” Requirements Affecting the Public

§ 1045.50 Purpose and scope.

This subpart describes the procedures to be used by the public in questioning or appealing DOE decisions regarding the classification of NSI under E.O. 12958 and 32 CFR part 2001.

§ 1045.51 Applicability.

This subpart applies to any person with authorized access to DOE NSI or who desires access to DOE documents containing NSI.

§ 1045.52 Mandatory declassification review requests.

All DOE information classified as NSI is subject to review for declassification by the DOE if:

(a) The request for a review describes the document containing the information with sufficient specificity to enable the agency to locate it with a reasonable amount of effort;

(b) The information is not exempted from search and review under the Central Intelligence Agency Information Act;

(c) The information has not been reviewed for declassification within the past 2 years; and

(d) The request is sent to the Director, Office of Classification, HS-90/Germantown Building, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585-1290.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

§ 1045.53 Appeal of denial of mandatory declassification review requests.

(a) If the Department has reviewed the information within the past 2 years, the request may not be processed. If the information is the subject of pending litigation, the processing of the request may be delayed pending completion of the litigation. The Department shall inform the requester of this fact and of the requester's appeal rights.

(b) When the Director of Classification has denied a request for review of

NSI, the requester may, within 30 calendar days of its receipt, appeal the determination to the Director of Security Affairs.

(c) *Elements of appeal.* The appeal shall be in writing and addressed to the Chief Health, Safety and Security Officer, HS-1/Forrestal Building, Department of Energy, 1000 Independence Avenue SW, Washington, DC 20585. The appeal shall contain a concise statement of grounds upon which it is brought and a description of the relief sought. It should also include a discussion of all relevant authorities which include, but are not limited to DOE (and predecessor agencies) rulings, regulations, interpretations, and decisions on appeals, and any judicial determinations being relied upon to support the appeal. A copy of the letter containing the determination being appealed shall be submitted with the appeal.

(d) *Receipt of appeal.* An appeal shall be considered to be received upon receipt by the Chief Health, Safety and Security Officer.

(e) *Action within 60 working days.* The appeal authority shall act upon the appeal within 60 working days of its receipt. If no determination on the appeal has been issued at the end of the 60-day period, the requester may consider his or her administrative remedies to be exhausted and may seek a review by the Interagency Security Classification Appeals Panel (ISCAP). When no determination can be issued within the applicable time limit, the appeal shall nevertheless continue to be processed. On expiration of the time limit, DOE shall inform the requester of the reason for the delay, of the date on which a determination may be expected to be issued, and of his or her right to seek further review by the ISCAP. Nothing in this subpart shall preclude the appeal authority and the requester from agreeing to an extension of time for the decision on an appeal. The Chief Health, Safety and Security Officer shall confirm any such agreement in writing and shall clearly specify the total time agreed upon for the appeal decision.

(f) *Form of action on appeal.* The Chief Health, Safety and Security Officer's action on an appeal shall be in writing and shall set forth the reason for the

decision. The Department may refuse to confirm or deny the existence or nonexistence of requested information whenever the fact of its existence or nonexistence is itself classified under E.O. 12958.

(g) *Right of final appeal.* The requester has the right to appeal a final Department decision or a failure to provide a determination on an appeal within the allotted time to the ISCAP for those appeals dealing with NSI. In cases where NSI documents also contain RD and FRD, the RD and FRD portions of the document shall be deleted prior to forwarding the NSI and unclassified portions to the ISCAP for review.

[62 FR 68509, Dec. 31, 1997, as amended at 71 FR 68737, Nov. 28, 2006]

PART 1046—MEDICAL, PHYSICAL READINESS, TRAINING, AND ACCESS AUTHORIZATION STANDARDS FOR PROTECTIVE FORCE PERSONNEL

Subpart A—General

Sec.

AUTHORITY: 42 U.S.C. 2011, *et seq.*; 42 U.S.C. 7101, *et seq.*; 50 U.S.C. 2401, *et seq.*

SOURCE: 78 FR 55184, Sept. 10, 2013, unless otherwise noted.

Subpart A—General**§ 1046.1 Purpose.**

This part establishes the medical, physical readiness, training and performance standards for contractor protective force (PF) personnel who provide security services at Department of Energy (DOE or Department) facilities including the National Nuclear Security Administration (NNSA). DOE and NNSA may choose to incorporate elements of these standards into Federal protective force programs.

§ 1046.2 Scope.

(a) This part applies to DOE, including NNSA, contractor employees and applicants for contractor protective force positions at government-owned or government leased facilities, regardless of whether the facility is privately operated. This part provides for the establishment of physical security programs based on uniform standards for medical, physical performance, training, and access authorizations for PF personnel providing physical security services to the Department.

(b) Use of a single, suitably qualified individual is encouraged when it is operationally, fiscally, or otherwise appropriate to perform multiple roles as required in this part (e.g., Designated Physician and Physical Protection Medical Director (PPMD)). Similarly, when appropriate medical, psychological, or other examinations, evaluations, testing, or reports required by other DOE regulations can be used to satisfy the requirements of multiple parts of this title, nothing in this part is intended to require duplicative examinations, evaluations, testing, or reports as long as the requirements of this part are met.

(c) The Department is authorized to grant such exemptions from the requirements of this part as it determines are authorized by law. Exemptions may not be granted from the requirement to meet any essential function of a position notwithstanding that reasonable accommodation must be granted as required by this part and the Americans with Disabilities Act of 1990 (ADA), as amended by the Americans with Disabilities Act Amendment Act of 2009 (ADAAA), and its imple-

menting regulations. Exemptions from requirements other than the medical certification standards are allowed only on a case-by-case basis for a specific requirement covered under this part. The Department must document that the exemption will not endanger life or property or the common defense and security, and is otherwise in the public interest. Consistent with the exemption process specified by DOE, exemptions must be made from this part in consultation with the Associate Under Secretary for the Office of Environment, Health, Safety and Security (AU-1) and approved by the Secretary, Deputy Secretary, or for the National Nuclear Security Administration, the Administrator. Granting of equivalencies is not authorized. Nothing in this part shall prohibit NNSA from enhancing the requirements set forth in § 1046.16, SPO Physical Readiness Qualification Standards and Procedures, as necessary to further the interests of national security.

(d) Requests for technical clarification of the requirements of this part by organizations or individuals affected by its requirements must be made in writing through the appropriate program or staff offices of the Department. Such requests must be coordinated with AU or its successor organization. AU-1 is responsible for providing a written response to such requests. Requests for interpretations of the requirements of this part may be made to the General Counsel. The General Counsel is responsible for providing responses to such requests.

(e) This part is effective March 10, 2014. Requirements of this rule that cannot be implemented by March 10, 2014 due to contractual conflicts or within existing resources must be documented by the officially designated federal security authority (ODFSA) and submitted to the relevant program officers: the Under Secretary; the Under Secretary for Science or the Under Secretary for Nuclear Security, NNSA; and the Associate Under Secretary for Environment, Health, Safety and Security. The documentation must include timelines and resources needed to fully implement this part.

[78 FR 55184, Sept. 10, 2013., as amended at 80 FR 57082, Sept. 22, 2015]

§ 1046.3

10 CFR Ch. X (1–1–16 Edition)

§ 1046.3 Definitions.

The following definitions apply to this part:

Active shooter means an individual actively engaged in the unauthorized killing or attempting to kill a person or persons in a confined and populated area.

Advanced Readiness Standard (ARS) means a qualification standard that includes the requirements of the Fixed Post Readiness Standard (FPRS), but also requires the completion of a one mile run with a maximum qualifying time of 8 minutes 30 seconds, a 40-yard dash from the prone position in 8.0 seconds or less, and any other measure of physical readiness necessary to perform site-specific essential functions as prescribed by site management and approved by the respective program office. This standard applies to SPOs who staff security posts that normally require extensive tactical movement on foot or are assigned Special Response Team duties.

Applicant means a person who has applied for and been conditionally offered a position as a Security Officer (SO) or a Security Police Officer (SPO), but who has not yet begun the active SO or SPO duties for which the person has applied.

Basic Readiness Standard (BRS) means a qualification standard that includes the requirements of the FPRS, but also requires the completion of a one-half mile run with a maximum qualifying time of 4 minutes, 40 seconds, a 40-yard dash from the prone position in 8.5 seconds or less, and any other measure of physical readiness necessary to perform site-specific essential functions as prescribed by site management and approved by the respective program office. This standard applies to SPOs with mobile defensive duties in support of facility protection strategies.

Chief Medical Officer means a Federal employee who is a doctor of medicine (MD) or doctor of osteopathic medicine (DO) who is licensed without restriction and qualified in the full range of occupational medicine services employed by the Department's health, safety, and security programs. This individual provides technical support for these programs and must be identified in writing.

Contractor means a contractor for the Department and includes subcontractors at all tiers.

Corrective device means a device, such as eyeglasses or hearing aid, necessary to enable an examinee to meet medical qualification standards and have been determined to be a reasonable accommodation compatible with the performance of the essential functions of the position. The contractor responsible for the performance of the examinee must determine that the use of the device is compatible with all actions associated with emergency and protective equipment without creating a hardship for the contractor. The Designated Physician and PPMD must determine that the reasonable accommodation is consistent with the medical certification standards without creating a direct threat to the individual or to others.

Designated Physician means an MD or DO, licensed without restriction in the state of practice, who has been approved by the PPMD. AU-1 must be consulted regarding an individual's suitability prior to appointment as a Designated Physician.

Direct threat means a significant risk of substantial harm to the health or safety of the individual or others. The risk must be based on an assessment of the individual's present ability to perform safely the essential functions of the job, and it must be determined that the risk cannot be eliminated or reduced by reasonable accommodation.

DOE facility means any facility required by DOE to employ PF personnel and used by DOE, including NNSA, and its contractors for the performance of work under DOE jurisdiction.

Emergency conditions are those conditions that could arise at a DOE facility as a result of a breach of security (e.g., sabotage or terrorism), accident (e.g., fire or explosion), or naturally occurring event (e.g., storm or earthquake) and threaten the security or integrity of DOE facilities, assets, personnel, the environment or the general public. For the purposes of this rule, emergency conditions include PF drills and exercises relating to search, rescue, crowd control, fire suppression and special operations, including response to the

Department of Energy

§ 1046.3

scene of the incident, and all applicable PF functions performed at the scene.

Essential functions of the job are the fundamental job duties of PF members as set out in §1046.11.

Field element means the management and staff elements of DOE, including NNSA, with delegated responsibility for oversight and program management of major facilities, programs, and site operations.

Final review means the process for an individual disqualified from medical certification to have a second and ultimate review of the individual's case conducted by the DOE Office of Hearings and Appeals.

Fixed Post Readiness Standard (FPRS) means a standard that requires an SPO to demonstrate the ability to assume and maintain the variety of cover positions associated with effective use of firearms at entry portals and similar static environments to include prone, standing, kneeling, and barricade positions; to use site-specific intermediate force weapons and weaponless self-defense techniques; to effect arrest of suspects and place them under restraint, e.g., with handcuffs or other temporary restraint devices; and any other measure of physical readiness necessary to perform site-specific essential functions as prescribed by site management and approved by the respective program office.

Independent Physician means a physician who possesses an MD or DO degree, is licensed without restriction and board certified, and has experience in a relevant field of medicine. The Independent Physician must not have served as the requestor's personal physician in any capacity or have been previously involved in the requestor's case on behalf of the Department or a Department contractor.

Independent review means the process through which a medically disqualified individual may appeal to have an independent review of the individual's case conducted by an Independent Physician.

Job analysis (JA) is a systematic method used to obtain a detailed listing of the tasks of a specific job. JAs must be derived from criteria determined and published by the DOE National Training Center or identified

and documented through a site-specific Mission Essential Task List (METL)-based process based on a set of Departmental Nuclear Security Enterprise-wide standards. A METL-based process that identifies and formally documents duties, tasks, and sub-tasks to be trained is commensurate with the process to develop JAs.

Medical approval means a determination by a Designated Physician that an individual is medically cleared to attempt the physical readiness standard qualification test and perform SO or SPO duties.

Medical certification means a determination by a Designated Physician approved by the PPMD that an individual is medically qualified for a particular category of PF positions, including the performance of the essential functions of an SO or SPO, and the required ongoing physical readiness training.

Medical certification disqualification means a determination by a Designated Physician and approved by the PPMD that an individual, with or without reasonable accommodation, is unable to perform the essential functions of an SO or SPO job position, including the required physical readiness training, without creating a direct threat to that individual or others.

Medical evaluation means the analysis of information generated by medical examinations and psychological evaluations and assessments of an individual to determine medical certification.

Medical examination means an examination performed or directed by the Designated Physician that incorporates the components described in §1046.13.

Mission Essential Task List (METL) means a list of common tasks required for PF assignments based on site-specific protection plans to defend against adversary capabilities as defined by DOE.

Officially Designated Federal Security Authority (ODFSA) means the Departmental Federal authority at the Field or Headquarters (HQ) Element with the primary and delegated responsibility for oversight of a site PF. Also may be referred to as the Department or Federal cognizant security authority.

Pertinent negative means the absence of a sign or symptom that helps substantiate or identify a patient's condition.

Physical Protection Medical Director (PPMD) means the physician programmatically responsible for the overall direction and operation of the site medical program supporting the requirements of this part.

Primary weapon as used in this part means any weapon individually assigned or available at the majority of posts/patrols to which the SPO may be assigned.

Protective Force (PF) personnel means Special Response Team members, SPOs, and SOs employed to protect Department security interests.

Qualification means the documented determination that an individual meets the applicable medical, physical, and as appropriate, firearms training standards, and possesses the knowledge, skills, abilities and access authorizations required for a particular SO or SPO position.

Randomly selected means any process approved by the ODFSA, which ensures each member of the SPO population has an equal chance to be chosen every time the selection process is used.

Reasonable accommodation means an accommodation consistent with the Americans with Disabilities Act Amendment Act (ADAAA) that is documented in writing.

Re-qualification date means the date of expiration of current qualification at which demonstration of knowledge, skills and/or abilities is required to maintain specific job status.

Security interests include any Department asset, resource or property which requires protection from malevolent acts and/or unpermitted access. These interests may include (but are not limited to) Department and contractor personnel; sensitive technology; classified matter; nuclear weapons, components, and assemblies; special nuclear material (SNM) as defined by the Atomic Energy Act of 1954 (as amended) and the Department; other nuclear materials; secure communications centers; sensitive compartmented information facilities; automated data processing centers or facilities storing and transmitting classified information;

vital equipment; or other Department property.

Security Officer (SO) means an unarmed uniformed PF member who has no Departmental arrest or detention authority, used to support SPOs and/or to perform duties (e.g., administrative, access control, facility patrol, escort, assessment and reporting of alarms) where an armed presence is not required.

Security Police Officer (SPO) means a uniformed PF member who is authorized under section 161(k) of the Atomic Energy Act of 1954, as amended, section 661 of the DOE Organization Act, or other statutory authority, to carry firearms and to make arrests without warrant for specifically enumerated offenses and who is employed for, and charged with, the protection of Department security interests.

Semi-structured interview means, for the purpose of this part, an interview by a Psychologist who meets standards established by DOE and who has the latitude to vary the focus and content of the questions depending upon the interviewee's responses.

Special Response Team, commonly referred to as SRT, means a PF special operations unit comprised of SPOs whose primary mission is to resolve incidents that require activities and force options that exceed the capability of existing physical security systems (e.g., performance of recapture/recovery operations and augmentation of denial missions).

Special Response Team (SRT) Member means SPOs who meet the ARS, with additional training and qualification requirements as necessary, and who are assigned to an SRT that trains and responds as a team to perform recapture and recovery and to augment denial missions, e.g., those missions that require adversaries be denied proximity to the protected property.

Weapons proficiency demonstration means a process based on a predetermined, objective set of criteria approved by the respective program office in consultation with AU-1 that results in a grade (e.g., pass/fail). The process must ensure that an individual (or team, for crew-served weapons) demonstrates the ability to perform all

Department of Energy

§ 1046.4

weapons-handling and operational manipulations necessary to load, operate, and discharge a weapon system accurately and safely (to include clearing/returning to safe mode the weapons system at the conclusion of firing), without the necessity for scoring targets during the course of fire. Proficiency courses of fire must include tactically-relevant time constraints. Demonstrations of proficiency are allowed with the actual weapon and assigned duty load, with alternate loads (e.g., frangible or dye-marking rounds), or with authorized weapons system simulators, as defined in this section. Proficiency courses of fire must be tactically relevant.

Weapons qualification is a formal test of weapons proficiency that includes, in addition to all specified elements of proficiency demonstration, the achievement of a prescribed qualification score according to a Departmentally-approved course of fire. Weapons qualification courses of fire must be constrained by time.

Weapons system simulator means a device that closely simulates all major aspects of employing the corresponding actual firearm/weapon system, without firing live ammunition. The simulator should permit all weapons-handling and operational actions required by the actual weapon, and should allow the use of sight settings similar to the corresponding actual weapon with assigned duty loads. Additionally, when weapons or weapons system simulators are used for qualification testing of protective force officers, the operation of the simulated weapon must closely approximate all weapons handling and operational manipulation actions required by the actual weapon. The simulation system must precisely register on-target hits and misses with accuracy comparable to the actual weapon at the same shooting distances. The weight, balance, and sighting systems should closely replicate those of the corresponding actual weapon with assigned duty loads, and noise signatures and felt recoil should be simulated to the extent technically feasible.

Work hardening is discussed by the Department of Labor in their Division of Federal Employees' Compensation Procedure Manual, 2-813-12 (available

at <http://www.dol.gov/owcp/dfec/procedure-manual.htm>), as a physical therapy program which will facilitate return-to-work. Work hardening is also known as an Occupational Rehabilitation Program.

[78 FR 55184, Sept. 10, 2013., as amended at 80 FR 57082, Sept. 22, 2015]

§ 1046.4 Physical Protection Medical Director (PPMD).

(a) *General.* The PPMD is the contractor physician programmatically responsible for the overall direction and operation of site medical programs supporting the PF requirements of this part. The PPMD is responsible for the programmatic oversight of all site Designated Physicians, including those who may operate physically separate clinics. Appropriate contractual arrangements must ensure that the PPMD's authority applies to all site contractors.

(1) *Nomination.* The name of each PPMD candidate must be submitted by the contractor to the ODFSA who in turn must consult with AU-1 prior to approving the PPMD. For NNSA, PPMD nominations must be made to the NNSA organization responsible for occupational health and safety. At the time of initial nomination for the PPMD designation the nominee shall submit, through the nominee's employer and the ODFSA, the following documents or copies thereof, translated into English if written in another language:

- (i) Applicable diplomas;
- (ii) Certificate of any postgraduate professional training (e.g., internship, residency, fellowship);
- (iii) Current medical license in the state in which duties will be performed;
- (iv) Certification of good standing by all medical licensing bodies from which the applicant has held medical licenses, as well as documentation of any restrictions or limitations to practice medicine, past or present (such documentation may be obtained in written form or electronically). The nominee may be requested to instruct the licensing body to send such certifications to AU-1 and as applicable to the NNSA organization responsible for occupational health and safety. Under

§ 1046.4

10 CFR Ch. X (1–1–16 Edition)

no circumstances will such certifications of good standing be accepted directly from the applicant. Additionally, notice of certification by any additional American specialty board, if applicable, and/or current curriculum vitae may be requested; and

(v) A curriculum vitae, if requested, must include a discussion of any gaps in employment.

(2) *Updates.* If determined necessary at any time and requested by AU–1, the NNSA organization responsible for occupational health and safety, the ODFSA, or the PPMD’s employer, updated information as identified in paragraphs (a)(1)(i) through (v) of this section must be provided.

(3) *Other roles and responsibilities.* Nothing in this part is intended to preclude the PPMD from fulfilling similar or related roles under other parts or this title, including providing occupational medical services under 10 CFR part 851, “Worker Safety and Health Program.” Additionally, the PPMD may fulfill the role of Designated Physician. The PPMD’s employer must notify AU–1, and if appropriate the NNSA organization responsible for occupational health and safety, through the ODFSA if the PPMD will also be fulfilling the role of the Designated Physician.

(4) *Qualifications.* The PPMD shall possess an MD or DO degree; be board certified or board eligible in occupational medicine; be a professionally qualified physician in good standing in the professional community, to include all medical licensing bodies from which the applicant has held medical licenses; demonstrate past professional performance and personal conduct suitable for a position of responsibility and trust; read, write, speak, and understand the English language proficiently; and possess an unrestricted license to practice medicine in the state in which the designation is sought, or meet the medical licensing requirements of the applicable military or Federal service to which the applicant belongs.

(b) *Nominations.* Except as provided in §1046.5(c), prior to approval of a Designated Physician by the PPMD’s employer, the PPMD must nominate in writing, through the local ODFSA, to

AU–1, one or more nominees for Designated Physician positions. For NNSA, Designated Physician nominations must be made through the NNSA organization responsible for occupational health and safety.

(1) Each nomination must describe the relevant training and experience of the nominee.

(2) Each nominee must be professionally qualified in good standing in the professional community, to include all medical licensing bodies from which the applicant has held medical licenses; demonstrate past professional performance and personal conduct suitable for a position of responsibility and trust; read, write, speak, and understand the English language proficiently; and possess the applicable unrestricted license to practice in the state in which the designation is sought or meet the medical licensing requirements of the applicable military or Federal service to which the applicant belongs.

(3) To be nominated, a Designated Physician shall possess an MD or DO degree and be board certified or board eligible in occupational medicine.

(c) *Documentation.* At the time of initial nomination, the nominee shall submit to the PPMD the following documents or copies thereof, translated into English if written in another language:

(1) Applicable diplomas;

(2) Certificate of any postgraduate professional training (e.g., internship, residency, fellowship);

(3) Current medical license in the state in which duties will be performed; and

(4) Certification of good standing by all medical licensing bodies from which the applicant has held medical licenses, as well as documentation of any restrictions or limitations to practice medicine, past or present (such documentation may be obtained in written form or electronically). The PPMD may request the nominee to instruct the licensing body to send such certifications to the PPMD. Under no circumstances will such certifications of good standing be accepted directly from the applicant. Additionally, the

Department of Energy

§ 1046.5

PPMD may request notice of certification by any additional American specialty board, if applicable; and

(5) A current curriculum vitae may be requested. The curriculum vitae, if requested, must include a discussion of any gaps in employment.

(6) If determined necessary by the PPMD, updated information, as identified in paragraphs (c)(1) through (5) of this section, may be requested at any time.

(d) *Self reporting.* (1) Each incumbent individual covered under paragraphs (a) or (b) of this section must agree to self-report the following information as a condition of the designation. PPMDs must report to their employer, who must forward the information to AU-1 or as appropriate to the NNSA organization responsible for occupational health and safety through the ODFSA. Additionally, Designated Physicians must report to the PPMD the following:

(i) Any change in status or initiation or taking of an adverse action, past or present, by any state medical licensing board or any other professional licensing board against the licenses of the individual (these may be provided in written or electronic form). The incumbent or nominee may be required to request the licensing body to provide such information to the ODFSA or PPMD, as appropriate. Under no circumstances will such information be accepted directly from the incumbent or nominee;

(ii) Initiation of an adverse action by any Federal or state regulatory board;

(iii) Being named a defendant in any criminal proceedings (felony or misdemeanor);

(iv) Being named in a civil suit alleging professional malpractice;

(v) Being evaluated or treated for alcohol use disorder or drug dependency or abuse; and

(vi) Occurrence of a physical disorder, a mental disorder, or any other health condition that might affect the physician's ability to perform professional duties.

(2) All information in paragraphs (d)(1)(i) through (vi) of this section must be submitted to DOE for consideration and possible action and may result in rejection or termination of the

applicable designation. Failure to provide such information may also result in the rejection or termination of the applicable designation. For NNSA contractors, in consultation with AU-1, the NNSA organization responsible for occupational health and safety will make the final decision on the appropriate action in light of the information received.

(e) *Annual activity report.* The PPMD must review the current credentials of each Designated Physician annually and make a recommendation to the employer to either retain or replace each incumbent. AU-1 and as appropriate, the NNSA organization responsible for occupational health and safety must be notified by the employer through the appropriate field element of any changes.

(f) *Retention or replacement.* For DOE, the PPMD's supervisor of record must send an annual letter to AU-1 reporting on the current credentials of the PPMD recommending retention or replacement. Immediate notification must be made to the AU-1 if a PPMD is relieved of duties or replaced. For NNSA, the PPMD's supervisor of record must send an annual letter to the NNSA organization responsible for occupational health and safety with a courtesy copy to AU-1 reporting on the current credentials of the PPMD recommending retention or replacement. For NNSA, immediate notification must be made to the NNSA organization responsible for occupational health and safety with a courtesy copy to the AU-1 if a PPMD is relieved of duties or replaced.

(g) *Medical activity summary.* The PPMD must submit an annual letter summarizing the medical activity during the previous year conducted under this part to AU-1 or designee through the manager of the Field Element. For NNSA the summary must be sent to the NNSA organization responsible for occupational health and safety with a courtesy copy to AU-1. The PPMD must comply with applicable DOE requirements specifying report content.

[78 FR 55184, Sept. 10, 2013., as amended at 80 FR 57082, Sept. 22, 2015]

§ 1046.5 Designated Physician.

(a) *Responsibilities.* Designated Physicians are responsible for the conduct of

§ 1046.11

medical examinations, evaluations, and medical certification of SOs and SPOs. Additionally, Designated Physicians are responsible for the supervision of physician extenders (e.g., physician's assistants, certified occupational health nurses, or nurse practitioners), as required by applicable state or local law. The Designated Physician must:

(1) Annually determine whether to approve an individual's participation in programmed physical readiness training programs required under this rule and determine the individual's ability to perform the physical readiness and PF qualification tests without undue risk. Medical approval must be obtained within thirty days prior to the individual's beginning such training or attempting the qualifying tests;

(2) With the assistance of a psychologist or psychiatrist meeting standards established by DOE, determine:

(i) An individual's medical capability, with or without reasonable accommodation, to perform the essential functions of PF job duties without creating a direct threat to the individual or others; and

(ii) Whether to certify that the individual meets the applicable medical and physical readiness standards as set forth herein for their position.

(3) Determine whether any portion of any medical examination may be performed by other qualified personnel, such as another physician or physician extenders;

(4) Be responsible for case management, including supervising, interpreting, and documenting PF personnel medical conditions; and

(5) Be familiar with the required essential functions of the job duties for PF personnel, as set forth in §1046.11, and the physical readiness requirements as identified in §1046.16.

(b) *Nominations.* The requirements of §1046.4(b) and (c) must be followed by the individuals nominated for Designated Physician positions.

(c) *Approval in lieu of nomination.* Designated Physicians approved under the provisions of 10 CFR part 712, "Human Reliability Program," will also satisfy the requirement for nomination to, and approval by, DOE/NNSA under this part. The employer must notify AU-1

10 CFR Ch. X (1-1-16 Edition)

through the ODFSA if the physician will be fulfilling the role of Designated Physician for this part in addition to fulfilling a role for another part (e.g., 10 CFR part 712). For NNSA the notification must be sent to the NNSA organization responsible for occupational health and safety with a courtesy copy to AU-1.

(d) *Self reporting.* The self-reporting requirements of §1046.4(d) must be followed by incumbent Designated Physicians.

[78 FR 55184, Sept. 10, 2013., as amended at 80 FR 57083, Sept. 22, 2015]

Subpart B—Protective Force (PF) Personnel

§ 1046.11 Essential functions of PF positions.

Nothing in this part is intended to preclude emergency use of any available protective force personnel by an on-scene commander to successfully resolve a national security emergency.

(a) *Essential functions.* The essential functions described in paragraphs (b) through (g) of this section and other site-specific essential functions must be communicated in writing by the manager of the Field Element to the PPM and the Designated Physician. The Designated Physician is required to ensure applicant and incumbent PF members are aware that these essential physical and mental functions in paragraphs (b) through (g) of this section and other site-specific essential functions, as appropriate, and the medical certification standards provided in section 1046.13 if this part are the elements against which the initial and annual evaluations for PF personnel will be conducted.

(b) *SO essential functions.* (1) The control of voluntary motor functions, strength, range of motion, neuromuscular coordination, stamina, and dexterity needed to meet physical demands associated with routine and emergency situations of the job;

(2) The ability to maintain the mental alertness necessary to perform all essential functions without posing a direct threat to self or others; and

Department of Energy

§ 1046.11

(3) The ability to understand and share essential, accurate communication by written, spoken, audible, visible, or other signals while using required protective equipment.

(c) *Additional SO essential functions.* SOs may be required to support SPOs and assist in the routine physical protection of DOE facilities, personnel, classified information, and property, as warranted by DOE facility operations, staff security posts used in controlling access to DOE facilities, conduct routine foot and vehicular patrols, escort visitors, check rooms and facilities, assess and report alarms, and perform basic first aid. Therefore, all SOs must also be able to:

(1) Understand and implement departmental and site policies and procedures governing post and patrol operations and access control systems;

(2) Understand and implement departmental and site policies and procedures governing the SO's role in site protection;

(3) Understand and implement inspection techniques for persons, packages and vehicles, as well as detect and identify prohibited articles and site-specific security interests;

(4) Work in locations where assistance may not be available;

(5) Spend extensive time outside exposed to the elements and working in wet, icy, hot, or muddy areas;

(6) Make frequent transitions from hot to cold, cold to hot, dry to humid, and from humid to dry atmospheres;

(7) Walk, climb stairs and ladders, and stand for prolonged periods of time;

(8) Safely operate motor vehicles when their use is required by local missions and duty assignments;

(9) Use clear and audible speech and radio communications in other than quiet environments;

(10) Read and understand policies, procedures, posted notices, and badges;

(11) Rely on the senses of smell, sight, hearing and touch to: detect the odor of products of combustion and of tracer and marker gases to detect prohibited articles; inspect persons, packages and vehicles; and in general determine the nature of emergencies; maintain personal safety; and report the nature of emergencies;

(12) Employ weaponless self-defense; and

(13) Be fitted with and use respirators other than self-contained breathing apparatus when the use of such equipment is required by local assignment.

(d) *FPRS SPO essential functions.* FPRS SPO personnel may be assigned only to fixed posts where there is no planned requirement for response away from that post. In addition to the SO essential functions listed in paragraphs (b) and (c) of this section, FPRS SPOs must be able to:

(1) Apply basic tactics (to include use of intermediate force weapons) necessary to engage and neutralize armed adversaries and determine probable capabilities and motivations of potential adversaries;

(2) Use site-specific hand tools and weapons required for the performance of duties;

(3) While armed and authorized to use deadly force, perform complex tasks, make life or death and other critical decisions, and take appropriate actions under confusing, stressful conditions including potentially life-threatening environments throughout the duration of emergency situations, e.g., active shooter scenarios;

(4) Perform physically demanding work under adverse weather and temperature conditions (extreme heat and extreme cold) on slippery or hazardous surfaces with the prolonged use of protective equipment and garments such as respirators, air supply hoods, or bullet-resistant garments, as required by site protection strategies;

(5) Be fitted for and properly utilize personal duty equipment;

(6) Work for long periods of time in conditions requiring sustained physical activity and intense concentration in environments of high noise, poor visibility, limited mobility, at heights, and in enclosed or confined spaces;

(7) Accommodate to changing work and meal schedules or to a delay in meals without potential or actual incapacity; and

(8) Have no known significant abnormal intolerance to chemical, mechanical (e.g., heat, light or water), and other physical agent exposures to the skin that may be encountered during

§ 1046.12

routine and emergency duties, as specified at the site.

(e) *BRS SPO essential functions.* In addition to the FPRS SPO essential functions listed above, BRS SPOs must be able to:

(1) Read placards and street signs while driving or to see and respond to imminently hazardous situations in both daylight and reduced light conditions;

(2) Be capable of operating armored vehicles with an expectation of employing the capabilities of the vehicle;

(3) Staff security posts which normally require movement on foot, by vehicle, watercraft, or aircraft in response to alarms and any breach of security; and to support site protection strategies;

(4) Provide interdiction, interruption, neutralization, and support the recapture, pursuit and/or recovery of a DOE asset/site/facility/location;

(5) Make rapid transitions from rest to near maximal exertion without warm-up; and

(6) Otherwise act as needed to protect Department sites, personnel, classified information, and nuclear weapons, nuclear weapons components, and SNM, to apprehend suspects, and to participate in the armed defense of a Department site against a violent assault by adversaries.

(f) *ARS SPO essential functions.* The essential functions of an ARS SPO include those of a BRS SPO. Security posts which normally, or are expected to, require extensive tactical movement on foot must be staffed by ARS SPOs. In addition, an ARS SPO must be able to support the pursuit/recovery of a Department security interest.

(g) *SRT member essential functions.* The essential functions of an SRT member include those of an ARS SPO. The primary role of SRTs is the recapture, pursuit, and/or recovery of Department security interests. In addition, an SRT member must be trained to resolve incidents that require activities and force options that exceed the capabilities of other site PF members, as determined by site-specific analysis. An SRT SPO also must:

(1) Successfully complete a Departmental advanced tactical qualification course designed to provide the min-

10 CFR Ch. X (1-1-16 Edition)

imum level of skills and knowledge needed to completely perform all tasks associated with SRT job responsibilities;

(2) Have knowledge and skills to provide additional protection capability as demanded by the particular targets, threats, and vulnerabilities existing at their assigned Departmental facility;

(3) Be able to operate special weapons, tactical vehicles, and other equipment necessary to protect a particular facility or to effectively engage an adversary with advanced capabilities; and

(4) Possess the ability to act successfully as a member of an aggressive and readily mobile response team as dictated by site-specific vulnerability assessments, using force options and tactical response team techniques necessary for recapture and recovery operations directed against an adversary and to support site-specific protection strategies.

§ 1046.12 Medical, physical readiness, and training requirements for PF personnel.

Department PF personnel must be individuals who:

(a) Are medically certified by the PPMO pursuant to the procedures set out in § 1046.13 to perform all of the applicable essential functions of the job, as set forth in § 1046.11;

(b) Meet the physical readiness qualification standards set forth in § 1046.16; and

(c) Are determined to be qualified as having the knowledge, skills, abilities and completed the requirements of a formal training program as set out in § 1046.16.

§ 1046.13 Medical certification standards and procedures.

(a) *PF medical certification standards.* All applicant and incumbent PF personnel must satisfy the applicable Medical Certification Standards set forth in this section.

(b) *Requirements of the medical evaluation to determine medical certification.* (1) The medical evaluation must be made by the Designated Physician without delegation (e.g., to a physician's assistant or nurse practitioner).

(2) Evaluations of incumbent security police officers must include a medical

history, the results of the examination, and a formal written determination.

(3) A site standard form approved by AU-1 must be used, and pertinent negatives must be documented on the form.

(4) The Medical Certification Standards are the minimum medical standards to be used in determining whether applicants and incumbent PF personnel can effectively perform, with or without reasonable accommodation, all essential functions of normal and emergency duties without imposing an undue hardship on the employer or posing a direct threat to the PF member or others, the facility, or the general public. All reasonable accommodations as defined in this part must be approved in writing by the PF contractor with a determination that the use of the device is compatible with all actions associated with emergency and protective equipment without creating a hardship for the contractor. The Designated Physician and PPMD must determine that the reasonable accommodation is consistent with the medical standard without creating a direct threat to the individual or to others.

(c) *General medical standards for PF personnel.* The examinee must possess the mental, sensorial, and motor skills to perform, safely and efficiently, all applicable essential job functions described in §1046.11 and those designated in the current job analysis submitted by PF management to the Designated Physician/PPMD. Specific qualifications for SOs and SPOs are set forth in paragraphs (d) and (e), respectively, of this section. Reasonable accommodations shall be provided pursuant to the requirements of the ADA.

(d) *Specific medical standards for SOs—*
(1) *Head, face, neck, and scalp.* Configuration suitable for fitting and effective use of personal protective equipment when the use of such equipment is required by assigned normal or emergency job duties.

(2) *Sense of smell.* Ability to detect the odor of combustion products and of tracer or marker gases.

(3) *Speech.* Capacity for clear and audible speech as required for effective communications of the job.

(4) *Hearing.* Hearing loss with or without aids not to exceed 30 decibels (db) average at 500, 1000, and 2000 Hertz

(Hz), with no loss greater than 40 db at any one of these frequencies and the ability to localize sounds with a difference of not more than 15 db average loss between the two ears. If hearing aids are necessary, suitable testing procedures shall be used to ensure auditory acuity equivalent to the above requirement.

(5) *Vision.* Near and distant visual acuity, with or without correction, of at least 20/25 in one eye and no worse than 20/40 in the other eye.

(6) *Color vision.* Ability to distinguish red, green, and yellow. Acceptable measures of color discrimination include the Ishihara; Hardy, Rand, & Rittler; and Dvorine pseudoisochromatic plates (PIP) when administered and scored according to the manufacturer's instructions. Tinted lenses such as the X-Chrom contact lenses or tinted spectacle lenses effectively alter the standard illumination required for all color vision tests, thereby invalidating the results and are not permitted during color vision testing.

(7) *Cardiorespiratory.* Capacity to use a respirator other than self-contained breathing apparatus (SCBA) when required by local assignment.

(8) *Nutritional/metabolic.* Ability to accommodate to changing work and meal schedules without potential or actual incapacity. Status adequate to meet the stresses and demands of assigned normal and emergency job duties.

(e) *Specific medical standards for SPOs.* In addition to the criteria identified in §1046.16(f), the following standards must be applied.

(1) *Head, face, neck and scalp.* Configuration suitable for fitting and effective use of personal protective equipment when the use of such equipment is required by assigned normal or emergency job duties.

(2) *Sense of Smell.* The ability to detect the odor of combustion products and of tracer or marker gases.

(3) *Speech.* Capacity for clear and audible speech as required for effective communications on the job.

(4) *Hearing.* Hearing loss without aids not to exceed 30 db average at 500, 1000, 2000 Hz, with no loss greater than 40 db at any of these frequencies and the

§ 1046.13

10 CFR Ch. X (1-1-16 Edition)

ability to localize sounds with a difference of not more than 15 db average loss between the two ears. Hearing loss beyond indicated level would interfere with ability to function and respond to commands in emergency situations. Use of a hearing aid is allowed for one ear only with the remaining ear qualifying for no more than an average of 30 db loss at frequencies of 500, 1000 and 2000 Hz. If a hearing aid is necessary, suitable testing procedures must be used to assure auditory acuity equivalent to the above requirement for the difference between two ears.

(5) *Vision.* (i) Near and distant vision. Near and distant visual acuity sufficient to effectively perform emergency-related essential functions:

(A) With or without correction, vision of 20/25 or better in the better eye and 20/40 or better in the other eye.

(B) If uncorrected, distant vision in the better eye is at least 20/25, and if the SPO wears corrective lenses, the SPO must carry an extra pair of corrective lenses.

(ii) *Color vision.* Ability to distinguish red, green, and yellow. Acceptable measures of color discrimination include the Ishihara; Hardy, Rand, & Rittler; and Dvorine pseudoisochromatic plates (PIP) when administered and scored according to the manufacturer's instructions. Tinted lenses such as the X-Chrom contact lenses or tinted spectacle lenses effectively alter the standard illumination required for all color vision tests, thereby invalidating the results and are not permitted during color vision testing.

(iii) *Field of vision.* Field of vision in the horizontal meridian at least a total of 140 degrees, contributed to by at least 70 degrees from each eye.

(iv) *Depth perception.* Ability to judge the distance of objects and the spatial relationship of objects at different distances.

(6) *Cardiorespiratory.* (i) *Respiratory.* Capacity and reserve to perform physical exertion in emergencies at least equal to the demands of the job assignment. This must be measured by annual pulmonary function test, with no less than a 90 percent predicted forced vital capacity and forced expiratory volume. There must be no diagnosis of

respiratory impairment requiring ongoing use of medications such as bronchodilators or beta agonists. A full review and approval by the PPMD is required whenever there is a past history of sleep apnea (with an established index of suspicion), with or without treatment.

(ii) *Cardiovascular.* (A) Capacity for tolerating physical exertion during emergencies. The results of the two semiannual assessments as identified in §1046.16(b)(4) must be considered. Normal configuration and function, normal resting pulse, regular pulse without arrhythmia, full symmetrical pulses in extremities, and normotensive, with tolerance for rapid postural changes on rapid change from lying to standing position. The use of hypertensive medications is acceptable if there are no side effects present that would preclude adequate functions as herein specified.

(B) If an examination reveals significant evidence of cardiovascular abnormality or significantly increased risk for coronary artery disease (CAD) as determined by the examining physician (e.g., by using the Framingham Point System), an evaluation by a specialist in internal medicine or cardiology may be required and evaluated by the Designated Physician. An electrocardiogram is required at entry, at age 40, and annually thereafter, which must be free from significant abnormality. If such abnormalities are detected, then a stress electrocardiogram with non-ischemic results must be provided, or the individual must be referred to a cardiologist for a fitness for duty examination. A stress electrocardiogram must be performed every other year beginning at age 50 with the results reviewed by the Designated Physician.

(7) *Neurological, mental, and emotional.* Absence of central and peripheral nervous system conditions that could adversely affect ability to perform normal and emergency duties or to handle firearms safely. A test for peripheral neuropathy at fingers and toes is required annually. Absence of neurotic or psychotic conditions which would adversely affect the ability to handle firearms safely or to act safely and efficiently under normal and emergency

conditions. Psychologists and psychiatrists identified to conduct evaluations, assessments, testing, and/or diagnoses associated with medical qualifications of this part must meet standards established by DOE.

(8) *Musculoskeletal*. Absence of conditions that could reasonably be expected to interfere with the safe and effective performance of essential physical activities such as running, walking, crawling, climbing stairs, and standing for prolonged periods of time. All major joint range of motion limits must have no significant impairments in the performance of essential functions. This includes full range of motion to include overhead reaching and squatting. No history of spine surgery, a documented diagnosis of herniated disc, or mechanical back pain that has not been certified to have normal functional recovery with no activity limitations precluding the ability to perform SPO essential functions.

(9) *Skin*. Have no known significant abnormal intolerance to chemical, mechanical, and other physical agent exposures to the skin that may be encountered during routine and emergency duties, as specified at the site. Capability to tolerate use of personal protective covering and decontamination procedures when required by assigned job duties. Facial hair cannot be allowed to interfere with respirator fitting, and any such growth or a skin condition which could preclude respirator fit is not acceptable and must be documented.

(10) *Endocrine/nutritional/metabolic*. Ability to accommodate to changing work and meal schedules without potential or actual incapacity. Status adequate to meet the stresses and demands of assigned normal and emergency job duties. A full evaluation and approval of reasonable accommodation by the PPMD is required for hiring and retention when metabolic syndrome is identified and/or when diabetes is controlled by other than diet.

(f) *Additional medical or physical tests*. For those facilities where it is necessary to determine the medical qualification of SPOs or SPO applicants to perform special assignment duties which might require exposure to unusually high levels of stress or physical

exertion, Field Elements may develop more stringent medical qualification requirements or additional medical or physical tests, in collaboration with the PPMD, as necessary for such determinations. All such additional qualification requirements must be coordinated with the Office of Health, Safety and Security prior to application.

(g) *Medical examination procedures and requirements*. (1) The medical examinations required for certification must be performed at the following intervals:

(i) Applicants for PF member positions must undergo a comprehensive medical examination, as specified herein. The Chief Health, Safety and Security Officer or designee, the Chief, Defense Nuclear Security in the case of NNSA, and/or the PPMD may require additional evaluations.

(ii) After initial certification, each SO must be medically examined and recertified at least every two years or more often if the PPMD so requires. This initial certification date becomes the SO's anniversary date. Medical certification remains valid through 30 days beyond the anniversary date or for the period indicated by the PPMD if less than twenty-four months.

(iii) After initial certification, each SPO must be medically examined and recertified every twelve months or more often (pursuant to §1046.14 or otherwise if the PPMD so requires). This initial certification date becomes the SPO's anniversary date. Medical certification remains valid through 30 days from the anniversary date or for the time indicated by the PPMD if less than twelve months.

(2) The medical examination must include a review of the essential functions of the job to which the individual is assigned. Medical examinations of SPO and SO applicants and incumbents must include the following evaluations to determine whether the individual meets the Medical Certification Standards for the applicable position:

(i) An up to date medical and occupational history, complete physical examination, vision testing, audiometry, and spirometry. In addition, laboratory testing must be performed, including a complete blood count (CBC), basic

blood chemistry, a fasting blood glucose, and a fasting lipid panel (the examination and testing is to identify baseline abnormalities, as well as trends); and

(ii)(A) A psychologist or, as appropriate, a psychiatrist who meets standards established by DOE must be used to fulfill the requirements of this part. A personal, semi-structured interview at the time of the pre-placement medical evaluation and during the biennial (for SOs) or annual (for SPOs) examination must be conducted by a psychologist or, as appropriate, a psychiatrist. At the pre-placement medical examination and every third year for SPOs and every fourth year for SOs thereafter, a Minnesota Multi-Phasic Personality Inventory (MMPI) (available only to appropriate medical professionals at, e.g., <http://psychcorp.pearsonassessments.com>) or its revised form must be administered in order to:

- (1) Establish a baseline psychological profile;
- (2) Monitor for the development of abnormalities; and
- (3) Qualify and quantify abnormalities.

(B) The information gathered from paragraph (g)(2)(i) of this section, together with the results of the semi-structured interview of this paragraph, psychiatric evaluations (if required), and reviews of job performance may indicate disqualifying medical or psychological conditions. Additional generally-accepted psychological testing may be performed as required to substantiate findings of the MMPI. If medically indicated and approved by the PPMD, an additional evaluation by a psychiatrist who meets standards established by DOE may be conducted. Additional or more frequent psychological evaluations as determined by the psychologist, psychiatrist, Designated Physician, or the PPMD may be required. Unless otherwise indicated, a psychological evaluation performed in accordance with the other DOE requirements (e.g., pursuant to 10 CFR part 712) may satisfy the requirements of this part.

(C) The Designated Physician may request any additional medical examination, test, consultation or evalua-

tion deemed necessary to evaluate a candidate or an incumbent SO's or SPO's ability to perform essential job duties or for incumbents, the need for temporary work restrictions.

(3) When an examinee needs the use of corrective devices, such as eyeglasses or hearing aids, to enable the examinee to successfully meet medical qualification requirements, the contractor responsible for the examinee's performance must make a determination that the use of any such device is compatible with all required emergency and protective equipment that the examinee may be required to wear or use while performing assigned job duties. The Designated Physician and the PPMD must determine that the reasonable accommodation is consistent with the medical standard and will not result in a direct threat to the individual or to others. This determination must be made before such corrective devices may be used by the examinee to meet the medical, physical readiness, or training requirements for a particular position.

(4) Contractor management must provide reasonable accommodations to a qualified individual by taking reasonable steps to modify required emergency and protective equipment to be compatible with corrective devices or by providing equally effective, alternate equipment, if available.

(5) The Designated Physician must discuss the results of the medical and physical readiness examinations with the individual. The results of the medical examinations also must be communicated in writing to PF management and to the individual and must include:

(i) A statement of the certification status of the individual, including any essential functions for which the individual is not qualified, with or without reasonable accommodations, and an assessment of whether the individual would present a direct threat to self or others in the position at issue;

(ii) If another medical appointment is required, the date of the next medical appointment; and

(iii) Recommended remedial programs or other measures that may restore the individual's ability to perform the essential functions or may negate the direct threat concern, if the individual is not approved for physical training, testing, or the relevant position.

(6) The PF contractor must offer a health status exit review for all employees leaving PF service. If the employee desires the review, it must be conducted by the PPMD or Designated Physician. The review, which may be conducted in conjunction with the requirements of other parts, must include all of the medical standards for the PF position being vacated. The reason(s) for any health status exit review not being performed must be documented (e.g., employee declined to have the review conducted).

[78 FR 55184, Sept. 10, 2013., as amended at 80 FR 57083, Sept. 22, 2015]

§ 1046.14 Medical certification disqualification.

(a) *Removal.* An incumbent SO or SPO is disqualified from medical certification by the PPMD if one or more of the medical certification standards contained in §1046.13 are not met. An incumbent SO or SPO temporarily or permanently disqualified from medical certification by the PPMD must be removed from those protective force duties by the employer when the employer is notified by the PPMD of such a determination.

(b) *Medical removal protection.* The employer of a disqualified SPO must offer the SPO medical removal protection if the PPMD determines in a written medical opinion that the disqualifying condition occurred as a result of site-approved training for or attempting to meet a physical readiness standard qualification, or site-approved training for security and emergency response (e.g., participating in force-on-force exercises for training, inspection, or validation purposes). The PPMD's determination must be based on an examining physician's recommendation or any other signs or symptoms that the Designated Physician deems medically sufficient to medically disqualify an SPO. The employee pay benefits specified in this section for combined

temporary and permanent medical removal shall not be provided for more than one year from the date of the initial PPMD written determination regarding the same basis for disqualification.

(1) *Temporary removal pending final medical determination.* (i) The employer of a disqualified SPO must offer the SPO temporary medical removal from PF duties on each occasion that the PPMD determines in a written medical opinion that the worker should be temporarily removed from such duties pending a final medical determination of whether the SPO should be removed permanently, if appropriate. "Final medical determination" means the outcome of the Independent Review provided for in §1046.15(c) or, if one is held, the Final Review provided for in §1046.15(d).

(ii) If an SPO is temporarily removed from PF duties pursuant to this section, the SPO's employer must not remove the employee from the payroll unless available alternative duties for which the worker is qualified or can be trained in a short period of time are refused or performed unsatisfactorily.

(iii) While the SPO remains on the payroll pursuant to paragraph (b)(1)(i) of this section, the SPO's employer must maintain the SPO's total base pay (overtime not included), seniority, and other site-specific worker rights and benefits (e.g., corporate benefit package and collective bargaining agreement benefits) as if the worker had not been removed. Funds reimbursable by the DOE which are provided to a SPO under medical removal protection must be reduced dollar for dollar for any other PF related pay or monetary benefit for associated lost earnings, including those negotiated through collective bargaining and from workers compensation. Medical removal protection in conjunction with these other benefits must not exceed the SPO's total base pay.

(iv) If there are no suitable alternative duties available as described in paragraph (b)(1)(ii) of this section, the SPO's employer must provide to the SPO the medical removal protection benefits specified in paragraph (c)(1) of this section until alternative duties become available, the SPO has recovered,

or one year has elapsed from the date of the PPMD's determination that the SPO should be temporarily removed from duties, whichever comes first. During this period the SPO may be placed on administrative leave when alternative duties are not available.

(2) *Permanent medical removal resulting from injuries.* (i) If the PPMD determines in a written medical opinion that the worker should be permanently removed from PF duties as a result of injuries sustained while engaging in required physical readiness activities (i.e., site approved training for or attempting to meet a physical readiness standard qualification or site approved training for security or emergency response), employer Human Resources policies, disability insurance, and/or collective bargaining agreements will dictate employment status and compensation beyond the requirements of paragraphs (b) and (c) of this section.

(ii) If an SPO has been permanently removed from duty pursuant to paragraph (b)(2)(i) of this section, the SPO's employer must provide the SPO the opportunity to transfer to another available position, or one which later becomes available, for which the SPO is qualified (or for which the SPO can be trained in a short period), subject to collective bargaining agreements, as applicable.

(3) *Worker consultation before temporary or permanent medical removal.* If the PPMD determines that an SPO should be temporarily or permanently removed from PF duties, the PPMD must:

(i) Advise the SPO of the determination that medical removal is necessary to protect the SPO's health and well-being or prevent the SPO from being a hazard to self or others;

(ii) Provide the SPO the opportunity to have any medical questions concerning medical removal answered; and

(iii) Obtain the SPO's signature or document that the SPO has been advised on the provisions of medical removal as provided in this section and the risks of continued participation in physically demanding positions.

(4) *Return to work after medical removal.* (i) Except as provided in paragraph (b)(4)(ii) of this section, the SPO's employer must not return an

SPO, who has been granted medical removal protection under this section, to the SPO's former job status.

(ii) If, in the PPMD's opinion, continued participation in PF duties will not pose an increased risk to the SPO's health and well-being or an increased risk (beyond those normally associated with SPO duties) of the SPO being a direct threat to self or others, the PPMD must fully discuss these matters with the SPO and then, in a written determination, may authorize the SPO's employer to return the SPO to former job status. Within one year from the PPMD's original decision to remove the individual from SPO status and subject to the SPO's ability to meet all other position related requirements (e.g., weapons qualifications, physical readiness standard, human reliability program, and refresher training), the employer must return the SPO to duty status given PPMD authorization to return to work. For durations beyond one year from the original decision given PPMD authorization to return to work, return to SPO status will be at the employer's discretion.

(c) *Medical removal protection benefits.*

(1) If required by this section to provide medical removal protection benefits, the SPO's employer must maintain for not more than one year, as specified in paragraphs (b)(1) and (b)(2) of this section, the removed worker's total base pay, and seniority, as though the SPO had not been removed. The total base pay provision in this section must be reduced by any compensation for lost earnings provided by any other benefit or those negotiated through collective bargaining for both temporary and permanent removal protection as provided by this section.

(2) If a removed SPO files a claim for workers' compensation payments for a physical disability, then the SPO's employer must continue to provide medical removal protection benefits until disposition of the claim, recovery of the claimant, or one year from the date the removal protection began, whichever comes first. If workers' compensation benefits are provided retroactively then the SPO must reimburse the employer to the extent the SPO is compensated for lost earnings for the same

period that the medical removal protection benefits are received for both temporary and permanent removal protection as provided by this section. Expenses for medical/rehabilitation treatments related to the basis for medical removal protection are not covered under this part.

(3) The SPO's employer's obligation to provide medical removal protection benefits to an SPO is reduced to the extent that the worker receives compensation for earnings lost during the period of removal either from a publicly or site employer-funded compensation program.

(d) *Collective bargaining agreements.* For the purposes of this section, the requirement that the SPO's employer provide medical removal protection benefits is not intended to expand upon, restrict, or change any rights to a specific job classification or position under the terms of an applicable existing collective bargaining agreement.

§ 1046.15 Review of medical certification disqualification.

(a) *Temporary medical and physical conditions.* Should the PPMD determine that an individual is disqualified from medical certification because of a temporary medical or physical condition which results in the individual not being able to perform any of the essential functions of the job classification, the employer may assign the individual to alternate, limited duty, if available, until the individual is again medically certified by the PPMD. However, this limited duty may only include assignment to duties in a job classification where all essential functions for that job classification can be safely and efficiently performed. Medical certification is required to remain in armed status. A temporary medical certification disqualification may not exceed a period of twelve months regardless of whether medical removal protection is authorized. Before the end of the twelve-month period, the PPMD must determine whether the individual is permanently disqualified from medical certification because of a continuing medical or physical condition which results in the individual not being able to perform all essential functions of the job classification. The individual may

request an Independent Review of the disqualification at any time the twelve-month period.

(b) *Permanent medical and physical conditions.* If the PPMD determines that an individual is disqualified from medical certification because of a permanent medical or physical condition which results in the individual not being able to perform all essential functions of the job classification, and the individual requests an Independent Review, the employer may assign the individual to alternate, limited duty, if available. This limited duty may include assignment to duties in any job classification where all essential functions can be safely and efficiently performed. Subject to the one year limit as identified in §1046.14, assignment to alternate, limited duty, may remain in effect until an Independent Review determination, and if applicable, the Final Review determination by the DOE Office of Hearings and Appeals.

(c) *Independent review.* An individual PF member disqualified from medical certification, temporarily or permanently, by the PPMD may request an Independent Review of the case. The individual initiating such a review must submit the request for an Independent Review in writing to AU-1 within ten working days of the date of notification (date of written correspondence) of disqualification. A copy of the request must be sent to the individual's employer and to the local ODFSA: for DOE HQ sites, to the Director, Office of Security Operations; for NNSA sites, to the cognizant NNSA Security Director; and for any other DOE sites, to the cognizant DOE Security Director.

(1) AU-1, in coordination with the respective PPMD, must provide for the Independent Review. The Independent Review must be conducted within sixty calendar days of the receipt of the request for an Independent Review. The Independent Review must include a complete review of the record of the case.

(2) The disqualified individual may select a representative during the Independent Review process. The individual or representative may provide additional evidence relating solely to the

medical or physical readiness of the individual. The individual must execute a consent document authorizing the release of relevant medical information to AU-1.

(3) The disqualified individual must provide a copy of the request for Independent Review and the signed consent document for the release of medical information to the respective PPMD and the individual's employer within ten working days of the submission of the request to AU-1.

(4) Within ten working days of receipt of a copy of the request for an Independent Review, the disqualified individual's employer must provide AU-1 with the following:

(i) A copy of the job analysis (JA)/mission essential task list (METL) available to the respective Designated Physician at the time of the individual's medical evaluation;

(ii) A listing of the essential functions for the individual's PF job classification; and

(iii) Any additional information relating to the medical or physical readiness of the requestor that AU-1 may request.

(5) AU-1 must provide the information in paragraph (c)(4) of this section to the Independent Physician for use in the independent review.

(6) A medical examination of the disqualified individual must be conducted by an Independent Physician approved by AU-1. The Independent Physician must not have served as the requestor's personal physician in any capacity or have been previously involved in the requestor's case on behalf of the Department or a Department contractor. The Independent Review must confirm or disagree with the medical certification disqualification and must consider:

(i) The validity of the stated physical requirements and essential function(s) for the applicable job classification;

(ii) The PPMD's medical determination of the individual's inability to perform essential functions or to undertake training or the physical readiness qualification test without undue medical risk to the health and safety of the individual;

(iii) The completeness of the medical information available to the PPMD; and

(iv) If applicable, the determination by the PPMD that the performance of the individual poses a direct threat to self or others.

(7) The results of the Independent Physician's medical examination of the individual must be provided to AU-1 for review. AU-1 must then recommend a final determination confirming or reversing the medical certification disqualification. The recommendation of AU-1 must be forwarded to the applicable local ODFSA (for DOE HQ sites, the Director, Office of Security Operations; for NNSA sites, the cognizant local NNSA Security Director; and for any other DOE sites, the cognizant local DOE Security Director) and the respective PPMD. This individual will either adopt or reject the recommendation of AU-1.

(8) AU-1 must provide the results of the Independent Review and the final determination regarding the individual's medical disqualification to the requestor, the respective PPMD, the respective local ODFSA, and the requestor's employer.

(9) If the Independent Review determination confirms the individual is disqualified from medical certification, the individual must be removed from the PF job classification by the individual's employer. If the Independent Review disagrees with the medical certification disqualification, the individual must be reinstated to the PF job classification by the individual's employer, subject to successful completion of any required qualifications or training requirements that were due during the temporary disqualification, and subject to subsequent annual medical examinations and the ability to meet applicable physical readiness requirements.

(d) *Final review.* An individual receiving an unfavorable Independent Review Determination may request a Final Review of the Independent Review Determination by the Office of Hearings and Appeals. The individual must submit a request for a Final Review to the Office of Hearings and Appeals, in writing, within 30 days of receiving an unfavorable determination, and notify AU-1 of

the request for appeal. In the request for a Final Review, the individual must state with specificity the basis for disagreement with the Independent Review confirming the medical certification disqualification. AU-1 must transmit the complete record in the case to the Office of Hearings and Appeals within five business days of receiving notice from the individual that the SPO has filed an appeal of the Independent Review Determination. The Office of Hearings and Appeals may request additional information, if necessary, to clarify any issue on appeal. Within 45 days of the closing of the record, the Office of Hearings and Appeals must issue a Decision and Order setting forth its findings on appeal and its conclusions based on the record before it. Upon receipt of an unfavorable Final Review decision by the Office of Hearings and Appeals, the individual must be permanently removed from that PF job classification, SO or SPO (FPRS, BRS, ARS, or SRT member) by the employer. However, nothing in the Final Review decision shall prevent the employee from being allowed to qualify for a less strenuous physical readiness job classification given the availability of said position, subject to successful completion of any other required qualifications or training requirements. Upon receipt of a favorable Final Review decision from the Office of Hearings and Appeals, the individual must be reinstated to the PF job classification by the employer, subject to successful completion of any required qualifications or training requirements due during the temporary disqualification, and future ability to be medically certified for the PF job classification and to meet applicable physical readiness standards.

[78 FR 55184, Sept. 10, 2013., as amended at 80 FR 57083, Sept. 22, 2015]

§ 1046.16 SPO physical readiness qualification standards and procedures.

(a) *General.* Employers must ensure SPOs have access to their applicable physical readiness standard and the provisions of this part. Employers must also inform SPOs of their rights associated with the physical readiness requirements.

(1) All SPO applicants must satisfy the applicable physical readiness standard for their assigned position and must physically demonstrate the physical training and knowledge, skills, and abilities set out in paragraph (g) of this section, as required for their assigned position before beginning active duty in that position.

(2) All incumbent SPOs must re-qualify every year according to their applicable readiness standard, pursuant to paragraphs (d)(1), (f), or (g) of this section. Re-qualification must occur no earlier than 30 days prior to and no later than 30 days following the SPOs anniversary date. The actual date of re-qualification does not affect the anniversary date under this section.

(3) All qualification and re-qualification activities must be conducted under the supervision of personnel knowledgeable of DOE physical readiness program requirements as approved by the local ODFSA.

(b) *Physical readiness training program.* SPOs must maintain physical readiness standards on a continuing basis. Each SPO must engage in a year-round physical readiness training program consistent with paragraph (c)(2) and (3) of this section to:

(1) Achieve and maintain the cardio-respiratory and musculoskeletal fitness necessary to safely perform, without posing a direct threat to self or others, all essential functions of normal and emergency PF duties at any time; and

(2) Enable the individual SPO to pass (on an annual basis) the applicable SPO physical readiness standard without any undue risk of physical injury.

(c) *Training program requirements.* (1) The training program must include the following elements:

(i) Activities with appropriate durations specific to the physical readiness standard, which appropriately address aerobic, agility, flexibility, and strength conditioning.

(ii) Instruction on techniques and exercises designed to ensure SPOs can safely rise quickly from the prone position, and if required by qualification standard, transition into a run.

(iii) Appropriate warm-up and cool down activities designed by exercise physiologists to support injury free

workouts and physical readiness testing.

(2) An SPO physical readiness training and maintenance program must be developed by the employing organization in consultation with the PPMD and the local ODFSA.

(3) After initial training and qualification, each SPO must participate in the physical readiness training and maintenance program on a continuing basis. The physical readiness maintenance program must be based on assessment of the individual SPO's physical readiness levels and be tailored to the individual SPO's physical readiness maintenance requirements and improvement needs. Whether training is conducted on or off site, the SPO's participation must be documented.

(4) Assessments of an SPO's level of physical readiness must be conducted at least semiannually by personnel knowledgeable of DOE requirements. The results of the assessments must be provided to the Designated Physician. The assessments must include recognized assessment standard values for aerobic capacity (e.g., American College of Sports Medicine [<http://www.acsm.org/>], Cooper Fitness Institute [<http://www.cooperinstitute.org/>], or Rockport Walk Protocol [available online from a variety of Web sites]). Though not a qualification, the assessment report must include an evaluation of the SPO's level of physical readiness and provide recommendations for maintenance requirements and improvement needs, if any. Ability to summon appropriate medical emergency response with the capability of responding within a reasonable time must be available at the assessment site. An individual trained in cardiopulmonary resuscitation and automatic external defibrillator equipment must be present.

(5) No additional training or time extension to meet the standards is permitted except for unusual circumstances based on a temporary medical or physical condition as certified by the PPMD that causes the SPO to be unable to satisfy the physical readiness standards within the required time period without suffering undue physical harm. An SPO who fails to requalify must be removed from armed

SPO status and must participate in a remedial physical readiness training program, as specified in paragraphs (g)(8) and (9) of this section.

(6) An SPO may be required to demonstrate the ability to meet the applicable physical readiness qualification standard during a Headquarters or field audit/inspection/survey or other similar activity, as directed by the local ODFSA. Failure to meet the physical readiness standard must be treated as if the SPO failed the first attempt during routine qualification, and the procedures of paragraphs (g)(5) and (8) of this section apply. An SPO who fails to demonstrate the standard must be removed from armed status.

(7) Employees must notify the employer when the requirements of the training program cannot be successfully completed on a recurring basis (e.g., exercises cannot be completed and/or completed within time limits several times in a row due to injury and/or conditioning issues).

(8) When a physical readiness deficiency is first identified, the employer must provide the SPO access to remedial training or, based upon PPMD evaluation validating the medical need, to a work hardening or rehabilitation program.

(d) *Physical readiness standards for SPOs.* Any failure, at any time, by an SPO to physically demonstrate ability to meet the required physical readiness standard, must result in temporary removal from being authorized to perform the functions of that standard. The physical readiness standards for SPOs are as follows:

(1) *Fixed Post Readiness Standard (FPRS).* This qualification standard applies to all SPOs. Regardless of an SPO's physical readiness category, the FPRS must be physically demonstrated every year by all SPOs.

(i) The standard requires sufficient agility and range of motion to: Assume, maintain, and recover from the variety of cover positions associated with effective use of firearms at entry portals and similar static environments to include prone, standing, kneeling, and barricade positions; use site-specific deadly and intermediate force weapons and employ weaponless self-defense techniques; effect arrests

Department of Energy

§ 1046.16

of suspects and place them under restraint, e.g., with handcuffs or other physical restraint devices; and meet any other measure of physical readiness necessary to perform site-specific essential functions as prescribed by site management and approved by the respective program office.

(ii) A stand-alone qualification test which requires the demonstration of all of the required elements (both general and site-specific, if applicable) must be developed and maintained by each site and approved by the ODFSA. This qualification test can be used for annual qualification, or sites may choose to document an SPO's ability to meet specific elements of the standard during annual refresher training sessions and/or during weapons qualification activities. All elements of this standard must be demonstrated annually in the aggregate.

(iii) The results must be provided to the Designated Physician prior to the annual medical examination. Inability to physically demonstrate the FPRS requirements must result in temporary loss of SPO status. Remedial training must be provided pursuant to the requirements of paragraph (g)(8) of this section.

(2) *Basic Readiness Standard (BRS)*. In addition to demonstrating the FPRS requirements as stated in paragraph (d)(1) of this section, the BRS qualification consists of a one-half mile run with a maximum qualifying time of 4 minutes 40 seconds and a 40-yard dash from the prone position in 8.5 seconds or less, and any other site-specific measure of physical readiness necessary to perform essential functions as prescribed by site management and approved by the respective program office. The running elements and other site-specific measures of the BRS must be demonstrated on the same day.

(3) *Advanced Readiness Standard (ARS)*. In addition to demonstrating the FPRS requirements as stated in paragraph (d)(1) of this section, the ARS qualification consists of a one mile run with a maximum qualifying time of 8 minutes 30 seconds, and a 40-yard dash from the prone position in 8.0 seconds or less, and any other site-specific measure of physical readiness necessary to perform site-specific es-

sential functions as prescribed by site management and approved by the respective program office. The running elements and other site-specific measures of the ARS must be demonstrated on the same day.

(e) *Revisions to Physical Readiness Standards*. The Department may revise the physical readiness standards or establish new standards consistent with the Administrative Procedure Act and other applicable law.

(f) *Evaluation and documentation for BRS and ARS SPOs*. Two distinct determinations must be made by the Designated Physician for BRS and ARS SPOs. First, a medical examination that meets the requirements of §1046.13(g) must be conducted. A written determination must be made whether the SPO is medically certified for SPO duties without being a danger to self or others. This includes being able to attempt to physically demonstrate the applicable physical readiness standard. Given a favorable medical clearance determination, the second determination assesses the SPO's physical readiness capability by comparing the SPO's current examination results, medical history, normative data, past qualifying times, and the results of physical assessments. The Designated Physician's evaluation and documentation that an incumbent BRS or ARS SPO has reasonable expectation of meeting the appropriate physical readiness standard is deemed to have met the annual physical readiness qualification requirement without having to take the appropriate BRS or ARS test unless the SPO is randomly selected pursuant to paragraph (f)(7) of this section. Physician extenders (e.g., physician's assistants, certified occupational health nurses, or nurse practitioners) and exercise physiologists may perform appropriate elements of the physical examination and the physical assessments required in paragraph (b)(4) of this section. However, both the medical clearance determination and the formal physical readiness capability evaluation must be made by the Designated Physician without delegation. A site standard form must be used, and pertinent negatives must be documented on the form. The following

procedures apply regarding the Designated Physician's evaluation and documentation that an incumbent BRS or ARS SPO has a reasonable expectation of meeting the appropriate physical readiness standard.

(1) Evaluation of BRS and ARS SPOs must include consideration of past medical history and normative data when available for individuals deemed to be physically capable. The following criteria must be evaluated: Cardiac function to include resting pulse rate and pulse recovery after exertion; neuromuscular function to include assessments of strength, range/freedom of motion, and movement without pain. While they are not required to be used or intended to be the sole determining criterion, for Designated Physicians using metabolic equivalents (METs) data the following values may be included in the overall process to determine if an individual SPO has a reasonable expectation of being able to physically demonstrate the appropriate physical readiness standard.

(i) For BRS SPOs a METs value of seven or greater would be a positive indicator of sufficient aerobic capacity to successfully demonstrate the half mile run associated with the BRS.

(ii) For ARS SPOs a METs value of 12 or greater would be a positive indicator of sufficient aerobic capacity to successfully demonstrate the mile run associated with the ARS.

(2) The designated physician may medically certify the BRS or ARS SPO for SPO duties and document that the SPO has a reasonable expectation of meeting the appropriate physical readiness standard. In this case, the SPO is deemed to have met the annual physical readiness qualification requirement without having to take the appropriate BRS or ARS test, unless the SPO is randomly selected pursuant to paragraph (f)(7) of this section.

(3) The designated physician may indicate the BRS or ARS SPO meets medical standards for SPO duties, but also indicate that the SPO does not appear to have the physical capability to pass the appropriate physical readiness test. In this case, the file must be immediately forwarded to the PPMD for review.

(4) If the PPMD concurs with the Designated Physician that the SPO does not have a reasonable expectation of being able to meet the readiness standard, the SPO may request to attempt to demonstrate the appropriate physical readiness test, which must be accomplished successfully within 30 days of the date of the medical certification for the SPO to remain in status. If the SPO chooses not to attempt to demonstrate the readiness standard, then the SPO must be removed immediately from duties associated with that physical readiness standard. Should the SPO fail to meet the standard, the retesting process described below in paragraph (g) of this section must be followed. Ultimate return to duties associated with that standard would require following the new hire process of medical clearance for SPO duties and then physically demonstrating the readiness standard which had not been met.

(5) Should the PPMD determine that the SPO does appear to have a reasonable expectation of meeting the appropriate physical readiness standard, the SPO is deemed to have met the annual qualification requirement for the appropriate physical readiness standard.

(6) The Designated Physician may find that the SPO cannot be medically certified for SPO duties. In this case, the SPO must be removed from armed status with appropriate PPMD review and medical intervention recommendations.

(7) Each year, 10 percent of the BRS and ARS SPO populations (supervisors included) at each site must be randomly selected by the employer and physically tested pursuant to paragraph (g) of this section. At the beginning of the testing year as established by each site, the site must ensure that a sufficient number of individuals and alternates are selected in one drawing to ensure that the 10 percent testing requirement can be achieved even though some SPOs selected may not receive a reasonable expectation determination for the Designated Physician as identified in paragraph (f)(2) of this section. Once 10 percent of the SPOs successfully demonstrating the standard has been achieved, the remaining

alternates are not required to be physically tested unless they do not receive a reasonable expectation determination. The identity of an individual as a selectee for testing shall be kept confidential by the employer in a manner that ensures this information does not become known to the selected individual, the PPMD, and the Designated Physician until after the individual SPO has been deemed to have a reasonable expectation of meeting the appropriate physical readiness standard pursuant to paragraphs (f)(2) or (5) of this section. The selected individuals must successfully complete the applicable physical readiness standard to retain SPO status. During a given year's testing, at least 90 percent of those tested in each physical readiness category must meet the requirements.

(8)(i) Should the passing percentage of those randomly selected and attempting to physically demonstrate the standard in a particular physical readiness category at a particular site drop below 90 percent (on the first attempt) then all SPOs in that category at that site must be tested on their ability to physically demonstrate the standard. The following parameters apply.

(A) All percentages are based upon first attempts.

(B) The total population of SPOs (supervisors included) in that physical readiness category at the beginning of that testing year at that site must be used to determine the percentage thresholds.

(C) The 100 percent testing of SPOs in that category must commence immediately upon the failure that renders achievement of a 90 percent success rate mathematically impossible for that readiness category during that testing year. The date of this failure will establish the anniversary date of the new testing year.

(D) An insufficient number of randomly selected individuals and alternates available to constitute the 10 percent selection criterion represents a failure to achieve the 90 percent threshold. Identification of additional randomly selected individuals for that testing year is not authorized.

(ii) The 100 percent testing described in paragraph (f)(8)(i) of this section

must continue for a minimum of 365 days. With a 95 percent successful demonstration rate of the standard over the year, 10 percent testing may return at the beginning of the new testing year.

(iii) Should 95 percent successful demonstration not be achieved in the 365 days of 100 percent testing, the 100 percent testing described in paragraph (f)(8)(i) of this section must continue for the next 365 days under the conditions specified in paragraphs (f)(8)(i)(A) through (D) of this section. This process must be repeated until 95 percent successful demonstration is achieved.

(g) *Physical testing for BRS and ARS SPOs.* The following procedures apply to an individual physically demonstrating the physical readiness standards for applicants and incumbent SPOs.

(1) Incumbent BRS and ARS SPOs randomly selected for physical testing pursuant to paragraph (f) of this section in any given year shall physically meet the applicable physical readiness standard within 30 days of their anniversary date.

(2) Incumbent SPOs shall physically meet the applicable physical readiness standard prior to their assignment to duties which require a more stringent standard.

(3) All newly hired SPOs must physically meet the most stringent standard required at the site.

(4) SPOs returning after an absence from protective force duties which encompasses their anniversary date must physically meet at least the standard they were required to meet when they left SPO duties, should such a position requiring that standard be available.

(5) Each applicant and incumbent SPO must be medically approved by the Designated Physician within thirty days prior to initial participation in any physical readiness training program and prior to attempting the applicable standard to determine whether the individual can undertake the standard without undue medical risk to the health and safety of the individual. Incumbents also must have successfully completed a physical readiness assessment within thirty days prior to their annual physical examination by the Designated Physician.

(6) Incumbent SPOs must qualify on the applicable standard annually by physically passing the required test if they have not received a reasonable expectation determination as described in paragraph (f) of this section. The testing protocol shall include mandated participation by the SPO being tested in pre-test warm-up and post-test cool-down activities as described in paragraph (c) of this section. The responsible person in charge of the qualification activity must inform the SPO that the attempt will be for qualification. Once this has been communicated by the person in charge, the attempt will constitute a qualification attempt. Ability to summon appropriate medical emergency response with the capability of responding within a reasonable time must be available at the testing site. An individual trained in cardio pulmonary resuscitation and automatic external defibrillator equipment must be present.

(7) Physical readiness re-qualification for randomly selected incumbent SPOs must occur not more than 30 days from the anniversary date. Failure to qualify within 30 days past the anniversary date must result in removal from SPO status for that physical readiness category. Not more than five attempts may be allowed during the 30-day period. All attempts must be made within 30 days of the medical approval required in paragraph (g)(5) of this section.

(8) Remedial training program: If an SPO fails all attempts pursuant to paragraph (g)(7) of this section for reasons other than injury or illness, the PF contractor must offer the SPO the opportunity to participate in a supervised physical readiness remedial training program developed by an exercise physiologist.

(i) Supervision of the physical readiness remedial training program may be accomplished by direct observation of the SPO during the training program by personnel knowledgeable of Department physical readiness program requirements, or by these personnel monitoring the SPO's progress on a weekly basis.

(ii) The remedial training program must be based upon an assessment of the SPO's individual physical readiness

deficiencies and improvement needs which precluded the SPO from successfully completing the applicable physical readiness standard.

(iii) The remedial training program must not exceed a period of 30 days.

(9) Re-testing of incumbent SPOs after completion of remedial training program.

(i) Once an SPO has begun a remedial training program, it must be completed before the SPO may attempt the applicable standard.

(ii) Upon completion of the remedial training the ARS/BRS SPO must be offered an assessment using the same process that is used for the required semiannual assessment as required in paragraph (c)(4) of this section. Any deficiencies and improvement needs must be identified to the SPO.

(iii) The SPO has seven days from the completion date of the remedial training program to meet the applicable physical readiness qualification standard. Only one attempt during this seven-day period may be made unless circumstances beyond the testing organization or participant's control (e.g., severe weather, equipment failure, or injury as determined by the employer) interrupt the attempt. When the attempt is interrupted, the employer may reschedule it within seven days.

(iv) If the SPO meets the standard on the attempt specified in paragraph (f)(9)(iii) of this section, the original anniversary qualification date remains the same.

(v) Failure to meet the standard must result in the SPO being permanently removed from duties requiring ability to meet that physical readiness standard.

(vi) If an SPO requires remedial training during three consecutive annual qualification periods, then a fourth remediation shall not be offered for subsequent failures to achieve the physical readiness standard. The SPO must be permanently removed from duties requiring ability to meet that physical readiness standard.

(10) The physical readiness standards set forth in this part may not be waived or exempted. Additional time, not to exceed six months, may be granted on a case-by-case basis for those individuals who, because of a

Department of Energy

§ 1046.17

temporary medical condition or physical injury certified by the Designated Physician, are unable to satisfy the physical readiness standards within the required period without suffering injury. Additional time totaling more than one year may not be granted. When additional time is granted:

(i) The granting of such time does not eliminate the requirement for the incumbent SPO to be removed from that SPO physical readiness standard status during the time extension.

(ii) When additional time is granted because of an inability to qualify without a certified medical condition or injury, the PF member is not entitled to temporary removal protection benefits. Granting additional time due to deconditioning is not authorized.

(iii) Upon completion of the additional time period and requisite physical readiness training, as applicable, the incumbent SPO must be assessed using the same process that is used for the semiannual assessment as required in paragraph (c)(4) of this section if the results indicate the SPO is ready to take the test. The test must be taken within 30 days of medical clearance as described in § 1046.13(g).

(iv) For a duration exceeding three months, the SPO's original anniversary qualification date may be revised at the discretion of the employer to reflect the most recent date that the SPO qualified under the applicable standard, which will become the new anniversary qualification date.

§ 1046.17 Training standards and procedures.

(a) Department contractors responsible for the management of PF personnel must establish training programs and procedures for PF members to develop and maintain the knowledge, skills and abilities required to perform assigned tasks. The site-specific qualification and training programs must be based upon criteria approved by the ODFSA.

(b) Department contractors responsible for training PF personnel must prepare and annually review mission essential tasks from which a JA or mission essential task list (METL) is developed. The JAs or METLs must be prepared detailing the required actions

or functions for each specific PF job assignment. When a generic Department JA or METL does not exist for a site-specific PF assignment (e.g., dog handler, investigator, flight crew, pilot, etc.) the site must develop a site-specific JA or METL. The JA or METL must be used as the basis for local site-specific training programs.

(c) The Designated Physician must approve in advance the participation by individuals in training and examinations of training prior to an individual's beginning employment as a PF member and annually thereafter.

(d) The formal PF training program must:

(1) Be based on identified essential functions and job tasks, with identified levels of knowledge, skills and abilities needed to perform the tasks required by a specific position;

(2) Be aimed at achieving at least a well-defined, minimum level of competency required to perform each essential function and task acceptably, with or without reasonable accommodations;

(3) Employ standardized instructional guidelines, based on approved curricula, with clear performance objectives as the basis for instruction;

(4) Include valid performance-based testing to determine and certify job readiness;

(5) Be documented so that individual and overall training status is easily accessible. Individual training records and certifications must be retained for at least one year after termination of the employee from employment as a member of the PF;

(6) Incorporate the initial and maintenance training and training exercise requirements expressly set forth in this part and as otherwise required by DOE;

(7) Be reviewed and revised, as applicable, by PF management on an annual basis; and

(8) Be reviewed and approved by the local ODFSA on an annual basis.

(e) *SOs*—(1) *SO initial training requirements.* (i) Prior to initial assignment to duty, unless they previously have been employed as an SPO at the same DOE facility, each SO must successfully complete a basic SO training course, approved by the local ODFSA, designed to provide the knowledge, skills, and

ability needed to competently perform all essential functions and tasks associated with SO job responsibilities.

(ii) The essential functions and minimum competency levels must be determined by a site-specific JA or METL. The essential functions and minimum competency levels must include, but are not limited to, the knowledge, skills, and abilities required to perform the essential functions set forth in this part; task areas as specified by DOE; and any other site-specific task areas that will ensure the SO's ability to perform all aspects of the assigned position under normal and emergency conditions without posing a direct threat to the SO or to others.

(2) *SO maintenance training.* Each SO must successfully complete an annual course of maintenance training to maintain the minimum level of competency required for the successful performance of tasks and essential functions associated with SO job responsibilities. The type and intensity of training must be based on a site-specific JA or METL. Failure to achieve a minimum level of competency must result in the SO's placement in a remedial training program. The remedial training program must be tailored to provide the SO with the necessary training to afford a reasonable opportunity to meet the level of competency required by the job analysis. Failure to demonstrate competency at the completion of the remedial program must result in loss of SO status.

(3) *SO knowledge, skills, and abilities.* Each SO must possess the knowledge, skills, and abilities necessary to protect Department security interests from the theft, sabotage, and other acts that may harm national security, the facility, its employees, or the health and safety of the public. The requirements for each SO to demonstrate proficiency in, and familiarity with, the knowledge, skills, and abilities and the responsibilities necessary to perform the essential functions of the job must be based on the JA or METL.

(f) *SPOs—(1) SPO initial training requirements.* Prior to initial assignment to duty, in addition to meeting SO training requirements described above in paragraph (e)(1) of this section, each

SPO must successfully complete the approved Department basic SPO training course. SPOs who are rehired at the same DOE facility or who have worked as an SPO at another DOE facility are not required to retake the basic training course as determined by a site-specific assessment of the individual. In addition to the basic SPO training course, SPO initial training must include successful completion of site-specific training objectives derived from a site-specific JA or METL, task areas as specified by DOE, and any other site-specific task areas that will ensure the SPO's ability to perform all aspects of the assigned position under normal and emergency conditions without posing a direct threat to the SPO or to others.

(2) *SPO maintenance training.* In addition to meeting the SO maintenance training requirements described in paragraph (e)(2) of this section, each SPO must successfully complete an annual course of maintenance training to maintain the minimum level of competency required for the successful performance of essential functions and tasks associated with SPO job responsibilities. The type and intensity of training must be determined by a site-specific JA or METL. Failure to achieve a minimum level of competency must result in the SPO being placed in a remedial training program. The remedial training program must be tailored to provide the SPO with necessary training to afford a reasonable opportunity to meet the level of competency required by the JA or METL within clearly established time frames. Failure to demonstrate competency at the completion of the remedial program must result in loss of SPO status.

(3) *SPO knowledge, skills and abilities.* In addition to meeting the SO knowledge, skills and ability requirements described in paragraph (e)(3) of this section, the requirements for each SPO to demonstrate proficiency in, and familiarity with, the responsibilities identified in the applicable JA or METL and proficiency in the individual and collective knowledge, skills, and abilities necessary to perform the essential functions and the job tasks must be based on their applicable JA or METL.

(g) *SRT Members.* In addition to satisfying the initial and maintenance training requirements for SPOs and meeting the SPO knowledge, skill, and ability requirements, SRT members must meet the following requirements.

(1) *SRT initial training requirements.* Prior to initial assignment to duty, each SRT-qualified SPO must successfully complete the current Department-approved SRT basic qualification course designed to provide at least the minimum level of knowledge, skills, and ability needed to competently perform all the identified essential functions of the job and tasks associated with SRT job responsibilities. SPOs who have previously successfully completed the SRT basic qualification course to work at another DOE facility do not have to retake the SRT basic qualification as determined by a site-specific assessment of the individual. After completion of the SRT basic qualification course, the SRT-qualified SPO must participate in a site-specific training program designed to provide the minimum level of knowledge and skills needed to competently perform all the identified essential functions of the job and tasks associated with site-specific SRT job responsibilities. The site-specific essential functions and minimum levels of competency must be based on a site-specific JA or METL, task areas as specified by DOE, and any other site-specific task areas that will ensure the SRT-qualified SPO's ability to perform all aspects of the assigned position under normal and emergency conditions without posing a direct threat to the SPO or to others.

(2) *SRT maintenance training.* After assignment to duties as a member of an SRT, an SRT-qualified SPO must receive maintenance training annually on each area required by a site-specific JA or METL. The annual maintenance training program must be completed over two or more sessions appropriately spaced throughout the year. Failure to achieve a minimum level of competency must result in the SRT-qualified SPO being placed in a remedial training program or removal from SRT qualification status, as determined by contractor management. The remedial training program must be tailored to provide the SRT-qualified SPO

with necessary training to afford a reasonable opportunity to meet the level of competency required by the JA or METL. Failure to demonstrate competency at the completion of the remedial program must result in loss of SRT-qualification status.

(3) *SRT knowledge, skills, and abilities.* The requirements for each SRT-qualified SPO to demonstrate proficiency in, and familiarity with, the responsibilities identified in the applicable JA or METL and proficiency in the individual and collective knowledge, skills, and abilities necessary to perform the job tasks must include, but are not limited to, those identified for SPOs and based on their applicable JA or METL.

(h) *Specialized requirements.* PF personnel who are assigned specialized PF responsibilities outside the scope of normal duties must successfully complete the appropriate basic and maintenance training, as required by DOE and other applicable governing regulating authorities (e.g., Federal Aviation Administration). This training must enable the individual to achieve and maintain at least the minimum level of knowledge, skills, ability needed to competently perform the tasks associated with the specialized job responsibilities, as well as maintain mandated certification, when applicable. Such personnel may include, but are not limited to, flight crews, instructors, armorers, central alarm system operators, crisis negotiators, investigators, canine handlers, and law enforcement specialists. The assignment of such specialists and scope of such duties must be based on site-specific needs and approved by the local ODFSA.

(i) *Supervisors—(1) Supervisor training requirements.* Prior to initial assignment to supervisory duty, each PF supervisor must successfully complete a supervisor training program designed to provide at least the minimum level of knowledge, skills, ability needed to competently perform all essential functions of the job and tasks associated with supervisory job responsibilities. Appropriate annual refresher training

must be provided. The essential functions and minimum levels of competency must be based on a site-specific JA or METL and must include the essential functions and task areas identified for the level of PF personnel to be supervised. Armed supervisors of SPOs must be trained and qualified as SPOs. SPO supervisors must meet applicable medical and physical readiness qualification and certification standards for assigned response duties.

(2) *Supervisor knowledge, skills, and abilities.* Each PF supervisor must possess the skills necessary to effectively direct the actions of assigned personnel. Each supervisor must demonstrate proficiency in, and familiarity with, the responsibilities identified in the applicable JA or METL and proficiency in the skills and abilities necessary to perform those jobs.

(j) *PF training exercises.* Exercises of various types must be included in the training and performance testing process for the purposes of achieving and maintaining skills and assessing individual, leader and collective competency levels. The types and frequency of training exercises must be determined by the training needs analysis conducted as part of the training program, and approved by the local ODFSA. These exercises must be planned and conducted to provide site-specific training to the PF in the prevention of the successful completion of potential adversarial acts as specified by DOE.

(k) *Firearms qualification standards.* (1) No person may be authorized to carry a firearm as an SPO until the responsible local ODFSA is assured that the individual who is to be armed with individually issued/primary weapons is qualified in accordance with firearms standards or that, in the case of post-specific crew-served and special weapons, a determination of proficiency and ability to operate the weapon safely has been made.

(2) As a minimum, each SPO must meet the applicable firearms qualification or proficiency standards every six months under daylight and reduced lighting conditions. Requalification or proficiency demonstration must occur no earlier than 30 days prior to, and no later than 30 days after, six months

from the previous qualification. In the case of individually assigned/primary weapons, if the SPO does not re-qualify during the re-qualification period, the individual's authority to be armed and to make arrests must be suspended following the unsuccessful qualification attempts as provided in paragraph (k)(11) of this section. For post-specific and crew-served weapons, if the SPO does not demonstrate proficiency during the re-qualification period, the individual's eligibility for assignment to posts having those post-specific or crew-served weapons must be suspended until such time as proficiency can be demonstrated. To facilitate training programs, employers may adjust qualification and proficiency demonstration schedules as long as the maximum durations as noted in this section are not exceeded.

(3) PF personnel must maintain firearms proficiency on a continuing basis. Therefore, an SPO may be required to demonstrate an ability to meet the applicable firearms qualification or proficiency standard(s) during a Headquarters or field audit, survey, inspection, or other situation directed by the local ODFSA. Failure to meet the standard must be treated as if the individual failed the first attempt during routine semiannual qualification or proficiency demonstration. See paragraph (k)(10) of this section. In the event the SPO fails both attempts, the requirements of paragraphs (k)(11) through (14) of this section apply.

(4) Each SPO must qualify with primary/individually-issued weapons required by duty assignment (to include: specialty weapons, long gun and/or handgun, if so armed). Qualification is the semiannual act of achieving a set score while demonstrating the ability to load, operate, and discharge a firearm or weapon system accurately and safely (to include clearing the weapon at the conclusion of firing) according to a Departmentally-approved course of fire. At least one of the two semiannual qualifications must be accomplished with the same type of firearm or weapon system and ammunition equivalent in trajectory and recoil as that authorized for duty use. All qualification courses must: be constrained by time, identify the maximum

amount of available ammunition, and include minimum scoring percentages required to qualify.

(5) For the purposes of this part, weapons system simulator means a device that closely simulates all major aspects of employing the corresponding actual firearm/weapons system, without firing live ammunition. The simulator should permit all weapons-handling and operational actions required by the actual weapon, and should allow the use of sight settings similar to the corresponding actual weapon with assigned duty loads. Additionally, when weapons or weapons system simulators are used for qualification testing of protective force officers, the operation of the simulated weapon must closely approximate all weapons handling and operational manipulation actions required by the actual weapon. The simulation system must precisely register on-target hits and misses with accuracy comparable to the actual weapon at the same shooting distances. The weight, balance, and sighting systems should closely replicate those of the corresponding actual weapon with assigned duty loads, and noise signatures and felt recoil should be simulated to the extent technically feasible.

(6) SPOs assigned to posts which require the operation of post-specific specialized or crew-served weapons must be trained and must demonstrate proficiency in the safe use of such weapons in a tactical environment. These proficiency courses must provide for the demonstration of skills required to support the site security plan. Ammunition equivalent in both trajectory and recoil to that used for duty must be used during an initial demonstration of proficiency. A weapons proficiency demonstration means a process based on a predetermined, objective set of criteria approved by the respective program office in consultation with AU-1 that results in a grade (e.g., pass/fail). The process must ensure that an individual (or team, for crew-served weapons) demonstrates the ability to perform all weapons-handling and operational manipulations necessary to load, operate, and discharge a weapon system accurately and safely (to include clearing/returning to safe mode the weapon system at the conclusion of

firing), without the necessity for scoring targets during the course of fire. Proficiency courses of fire must include tactically-relevant time constraints. Demonstrations of proficiency are allowed with the actual weapon and assigned duty load, with alternate loads (e.g., frangible or dye-marking rounds), or with authorized weapons system simulators, as defined in this section. Proficiency courses of fire must be tactically relevant.

(7) Weapon system simulators may be used for training, familiarization, and semiannual proficiency verifications (e.g., engaging moving vehicles and/or aircraft). Demonstrations of proficiency must include all weapons-handling and operational manipulations necessary to load, operate, and discharge a weapon system accurately and safely (to include clearing the weapon at the conclusion of firing) according to a Departmentally-approved course of proficiency demonstration. Weapon demonstrations of proficiency are allowed with the same type of firearm or weapon system and ammunition equivalent in trajectory and recoil as that authorized for duty use, or with firearms simulators that have the features and capabilities as described in paragraph (k)(5) of this section.

(8) Each SPO must be given a presentation on the basic principles of weapons safety prior to any range activity. This does not require that a weapons safety presentation be given for each course of fire, but does require that, prior to the start of range training or qualification for a given period (e.g., initial qualification, semiannual qualification, training, familiarization, proficiency testing, or range practice), each SPO must be given a range and weapon safety presentation.

(9) Standardized Departmentally-approved firearm/weapon qualification courses must be used for qualification. Site-specific conditions and deployment of specialized firearms/weapons may justify requirements for developing and implementing supplementary special training and proficiency courses. Proficiency courses or demonstrations must be constrained by time limits. Where standardized Department firearms/weapons courses do not exist for a weapons system that is

§ 1046.18

10 CFR Ch. X (1–1–16 Edition)

required to address site-specific concerns, both daylight and reduced lighting site-specific qualification or proficiency courses (as applicable) must be developed. After approval by the local ODFSA, the developed courses must be submitted to the respective program office for review and approval.

(10) When qualification or demonstration of proficiency is prescribed, SPOs must be allowed two attempts to qualify with assigned firearms/weapons semiannually. A designated firearms instructor or other person in charge of the range must ensure the shooter understands that the attempt will be for qualification. Once this has been communicated by the firearms instructor or person in charge, the attempt must constitute an attempt to qualify or demonstrate proficiency. The SPO must qualify or demonstrate proficiency during one of these attempts.

(11) Upon suspension of an SPO's authority to carry firearms, in order to return to status, the SPO must enter a standardized, remedial firearms/weapons training program developed by the respective site PF contractor firearms training staff. The remedial training program must be a combination of basic weapon manipulation skills, firearms safety, and an additional segment of time individually designed to provide the SPO with the necessary individual training to afford a reasonable opportunity to meet the firearms/weapons qualification or proficiency standards by addressing specific areas of performance.

(12) When qualification is required following the completion of the remedial training course, any SPO who fails to qualify after two subsequent attempts must lose SPO status and the authority to carry firearms/weapons and to make arrests. When weapons-specific safety or proficiency cannot be demonstrated, the SPO must not be assigned to posts that require the operation of that weapon until such safety or proficiency standards can be met.

(13) Any SPO who requires remedial training on three consecutive semiannual qualification periods with the same type of firearm/weapon (caliber, make, and model, but not necessarily the exact same weapon) must be removed from duties that require the

issuance of that weapon. If the weapon is considered a primary duty weapon; e.g., rifle or handgun, the officer must be removed from SPO status based on recurring inability to maintain qualification status. If an SPO requires remedial training for the same firearm during three consecutive semiannual qualification periods, then a fourth remediation shall not be offered for subsequent failures to achieve that firearms qualification standard. The employer may reinstate an individual removed from SPO status if the individual can demonstrate the ability to pass the current Department qualification course for that firearm. Prior to being given the opportunity to obtain reinstatement, the SPO must provide the employer written validation from a certified firearms instructor that the SPO has demonstrated the ability to meet applicable DOE standards. All such training and validation expenses are solely the responsibility of the SPO. If reinstatement under these circumstances occurs, the employer must provide all other training for returning protective force members according to the requirements of this part and as otherwise specified by DOE.

(14) An appropriate Department record must be maintained for each SPO who qualifies or who attempts to qualify or to demonstrate proficiency. Records must be retained for one year after separation of a PF member from SPO duties, unless a longer retention period is specified by other requirements. A supervisor or a training officer must be designated, in writing, as the individual authorized to certify the validity of the scores.

[78 FR 55184, Sept. 10, 2013, as amended at 80 FR 57083, Sept. 22, 2015]

§ 1046.18 Access authorization.

PF personnel must have the access authorization for the highest level of classified matter to which they have access or SNM which they protect. The specific level of access authorization required for each duty assignment must be determined by the site security organization and approved by the local ODFSA. At sites where access authorizations are not required, SPOs must have at least a background investigation based upon a national agency

Department of Energy

§ 1046.20

check with local agency and credit check with maximum duration between reinvestigations not to exceed 10 years. This background investigation must be favorably adjudicated by the applicable Departmental field element. Those SPOs who have access to Category I or Category II quantities of SNM as defined by DOE or with access to credible roll-up potential to Category I according to site-specific determination must have and maintain a DOE "Q" access authorization.

§ 1046.19 Medical and fitness for duty status reporting requirements.

(a) SPOs and SOs must report immediately to their supervisor that they have a known or suspected change in health status that might impair their capacity for duty. To protect their medical confidentiality, they are required only to identify that they need to see the Designated Physician. SOs and SPOs must provide to the Designated Physician detailed information on any known or suspected change in health status that might impair their capacity for duty or the safe and effective performance of assigned duties.

(b) SPOs and SOs must report to their supervisor and the Designated Physician for a determination of fitness for duty when prescription medication is started or a dosage is changed, to ensure that such medication or change in dosage does not alter the individual's ability to perform any of the essential functions of the job. SPOs and SOs must report to their supervisor and the Designated Physician for a determination of fitness for duty within 24 hours, and prior to assuming duty, after any medication capable of affecting the mind, emotions, and behavior is started, to ensure that such medication does not alter the individual's ability to perform any of the essential functions of the job. Where a written reasonable accommodation determination already has been made, any additional change to an SO's or SPO's health status affecting that accommodation must be reported to their supervisor and the Designated Physician for a determination of fitness for duty.

(c) Supervisory personnel must document and report to the Designated

Physician any observed physical, behavioral, or health changes or deterioration in work performance in SPOs and SOs under their supervision.

(d)(1) PF contractor management must inform the Designated Physician of all anticipated job transfers or re-categorizations including:

(i) From SO to FPRS, BRS, ARS, or SRT Member;

(ii) From FPRS, to BRS, ARS or SRT Member;

(iii) From BRS to ARS or SRT Member;

(iv) From ARS to SRT Member;

(v) From SRT Member to ARS, BRS, FPRS or SO;

(vi) From ARS to BRS, FPRS, or SO;

(vii) From BRS to FPRS or SO;

(viii) From FPRS to SO; and

(ix) From PF to other assignments.

(2) For downward re-categorizations in paragraphs (d)(1)(v) through (ix) of this section, the anticipated transfer notification must include appropriate additional information such as the apparent inability of the employee to perform essential functions, meet physical readiness standards, or to serve without posing a direct threat to self or others.

(e) The Designated Physician must notify the PPMD to ensure appropriate medical review can be made regarding any recommended or required changes to the PF member's status.

§ 1046.20 Medical records maintenance requirements.

(a) The Designated Physician must maintain all medical information for each employee or applicant as a confidential medical record, with the exception of the psychological record. The psychological record is part of the medical record but must be stored separately, in a secure location in the custody of the evaluating psychologist. These records must be kept in accordance with the appropriate DOE Privacy Act System of Records, available at <http://energy.gov/sites/prod/files/maprod/documents/FinalPASORNCCompilation.1.8.09.pdf>.

(b) Nothing in this part is intended to preclude access to these records according to the requirements of other parts of this or other titles. Medical records maintained under this section

Pt. 1047

may not be released except as permitted or required by law.

(c) Medical records must be retained according to the appropriate DOE Administrative Records Schedule, available at: http://energy.gov/sites/prod/files/cioprod/documents/ADM_1%281%29.pdf (paragraph 21.1)

(d) When an individual has been examined by a Designated Physician, all available history and test results must be maintained by the Designated Physician under the supervision of the PPMD in the medical record, regardless of whether:

(1) The individual completes the examination;

(2) It is determined that the individual cannot engage in physical training or testing and cannot perform the essential functions of the job; or

(3) It is determined that the individual poses a direct threat to self or others.

(e) The Designated Physician must provide written work restrictions to the affected SPO/SO and PF management. PF management must develop, approve, implement, and operate according to site-specific plans based upon the PF contractor's operational and contract structure to ensure confidentiality of PF medical information. This plan must permit access only to those with a need to know specific information, and must identify those individuals by organizational position or responsibility. The plan must adhere to all applicable laws and regulations, including but not limited to the Privacy Act of 1974, the Health Insurance Portability and Accountability Act of 1996, the Family and Medical Leave Act of 1993, and the ADA, as amended by the ADAAA.

PART 1047—LIMITED ARREST AUTHORITY AND USE OF FORCE BY PROTECTIVE FORCE OFFICERS

GENERAL PROVISIONS

- Sec.
- 1047.1 Purpose.
- 1047.2 Scope.
- 1047.3 Definitions.
- 1047.4 Arrest authority.
- 1047.5 Exercise of arrest authority—general guidelines.

10 CFR Ch. X (1–1–16 Edition)

1047.6 Use of physical force when making an arrest.

1047.7 Use of deadly force.

AUTHORITY: Sec. 2201, Pub. L. 83-703, 68 Stat. 919 (42 U.S.C. 2011 *et seq.*); Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 565 (42 U.S.C. 7101 *et seq.*).

SOURCE: 50 FR 30929, July 31, 1985, unless otherwise noted.

GENERAL PROVISIONS

§ 1047.1 Purpose.

The purpose of this part is to set forth Department of Energy (hereinafter “DOE”) policy and procedures on the exercise of arrest authority and use of force by protective force personnel.

§ 1047.2 Scope.

This part applies to DOE and DOE contractor protective force personnel armed pursuant to section 161.k. of the Atomic Energy Act of 1954 (42 U.S.C. 2011 *et seq.*) to protect nuclear weapons, special nuclear material, classified matter, nuclear facilities, and related property.

§ 1047.3 Definitions.

(a) *Act* means section 161.k. of the Atomic Energy Act of 1954, as amended, (42 U.S.C. 2201.k.).

(b) *Arrest* means any act, including taking, seizing or detaining of a person, that indicates an intention to take a person into custody and that subjects the person to the control of the person making the arrest.

(c) *Citizen's Arrest* means that type of arrest which can be made by citizens in general and which is defined in the statutory and case law of each state.

(d) *Contractor* means contractors and subcontractors at all tiers.

(e) *LLEA* means local law enforcement agencies: city, county; and state.

(f) *Offender* means the person to be arrested.

(g) *Protective Force Officer* means any person authorized by DOE to carry firearms under section 161.k. of the Atomic Energy Act of 1954.

(h) *Special Nuclear Material* (SNM) means: (1) Plutonium, uranium enriched in the isotope 233 or in the isotope 235, and any other material which DOE, pursuant to the provisions of Section 51 of the Atomic Energy Act of

Department of Energy

§ 1047.4

1954, determines to be special nuclear material, but does not include source material; or (2) any material artificially enriched by any of the foregoing, but does not include source material.

§ 1047.4 Arrest authority.

(a) Under the Act, the authority of a DOE protective force officer to arrest without warrant is limited to the performance of official duties and should be exercised only in the enforcement of:

(1) The following laws only if property of the United States which is in the custody of the DOE or its contractors is involved:

(i) *Felonies*: (A) Arson—18 U.S.C. 81—(only applicable to “special maritime and territorial jurisdiction of the United States” as defined by 18 U.S.C. 7).

(B) Building or property within special maritime and territorial jurisdiction—18 U.S.C. 1363—(only applicable to “special maritime and territorial jurisdiction of United States” as defined by 18 U.S.C. 7).

(C) Civil disorder—18 U.S.C. 231.

(D) Communication lines, stations or systems—18 U.S.C. 1362.

(E) Concealment, removal or mutilation generally—18 U.S.C. 2071.

(F) Conspiracy—18 U.S.C. 371—(violation of this section is a felony if the offense which is the object of the conspiracy is a felony).

(G) Destruction of motor vehicles or motor vehicle facilities—18 U.S.C. 33.

(H) Explosives—18 U.S.C. 844(f).

(I) Government property or contracts—18 U.S.C. 1361—(violation of section is a felony if property damage exceeds \$100).

(J) Military, naval or official passes—18 U.S.C. 499—(pertains to forging or altering official passes).

(K) Personal property of the United States—18 U.S.C. 2112.

(L) Public money, property, or records—18 U.S.C. 641—(violation of section is a felony if the property value exceeds \$100).

(M) Sabotage—18 U.S.C. 2151, 2153–2156.

(N) Violation under Physical Security Convention—18 U.S.C. 831.

(ii) *Misdemeanors*: (A) Conspiracy—18 U.S.C. 371—(violation of section is a

misdemeanor if the offense which is the object of the conspiracy is a misdemeanor).

(B) Explosives—18 U.S.C. 844(g).

(C) Government property or contracts—18 U.S.C. 1361—(violation of section is a misdemeanor if the property damage does not exceed \$100).

(D) Official badges, identification cards, other insignia—18 U.S.C. 701—(pertains to the manufacture, sale, and possession of official insignia).

(E) Public money, property or records—18 U.S.C. 641—(violation of section is a misdemeanor if the property value does not exceed \$100).

(iii) *Assaulting, resisting, or impeding certain officers or employees*—18 U.S.C. 111. Both the felony and misdemeanor level offenses may only be enforced by protective force officers that are federal employees.

(2) The following criminal provisions of the Atomic Energy Act:

(i) *Felonies*: (A) Section 222. Violation of Specific Sections—42 U.S.C. 2272.

(B) Section 223. Violation of Sections Generally. 42 U.S.C. 2273.

(C) Section 224. Communication of Restricted Data—42 U.S.C. 2274.

(D) Section 225. Receipt of Restricted Data—42 U.S.C. 2275.

(E) Section 226. Tampering with Restricted Data—42 U.S.C. 2276.

(ii) *Misdemeanors*: (A) Section 227. Disclosure of Restricted Data—42 U.S.C. 2277.

(B) Section 229. Trespass Upon Commission (DOE) Installations—42 U.S.C. 2278.

(C) Section 230. Photographing, etc., of Commission (DOE) Installations—42 U.S.C. 2278.b.

(b) *Felony Arrests*. A protective force officer is authorized to make an arrest for any felony listed in paragraph (a)(1)(i) or (a)(2)(i) of this section if the offense is committed in the presence of the protective force officer or if he or she has reasonable grounds to believe that the individual to be arrested has committed or is committing the felony.

(c) *Misdemeanor Arrest*. A protective force officer is authorized to make an arrest for any misdemeanor listed in paragraph (a)(1)(ii) or (a)(2)(ii) of this section if the offense is committed in

§ 1047.5

10 CFR Ch. X (1–1–16 Edition)

the presence of the protective force officer.

(d) *Other Authority.* The Act does not provide authority to arrest for violations of state criminal statutes or for violations of federal criminal statutes other than those listed in paragraph (a) of this section. Therefore, arrests for violations of such other criminal statutes shall be made by other peace officers (e.g., U.S. Marshals or Federal Bureau of Investigation (FBI) agents for federal offenses; LLEA officers for state or local offenses) unless:

(1) The protective force officer can make a citizen's arrest for the criminal offense under the law of the state,

(2) The protective force officer is an authorized state peace officer or otherwise deputized by the particular state to make arrests for state criminal offenses, or

(3) The protective force officer has been deputized by the U.S. Marshals Service or other federal law enforcement agency to make arrests for the criminal offense.

(e) In those locations which are within the "special maritime and territorial jurisdiction of the United States," as defined in 18 U.S.C. 7, the Assimilative Crimes Act (18 U.S.C. 13) adopts the law of the state for any crime under state law not specifically prohibited by Federal statute and provides for federal enforcement of that state law. The local DOE Office of Chief Counsel, in coordination with contractor legal counsel, as appropriate, shall provide guidance in this matter.

[50 FR 30929, July 31, 1985, as amended at 80 FR 23692, Apr. 29, 2015]

§ 1047.5 Exercise of arrest authority—general guidelines.

(a) In making an arrest, the protective force officer should announce his or her authority (e.g., "Security Officer") and that the person is under arrest prior to taking the person into custody. If the circumstances are such that making such announcements would be useless or dangerous to the officer or others, the protective force officer may dispense with these announcements.

(b) The protective force officer at the time and place of arrest may search

any arrested person for weapons and criminal evidence and the area into which the arrested person might reach for a weapon or to destroy evidence. Guidance on the proper conduct and limitations in scope of search and seizure of evidence shall be obtained from the local DOE Office of Chief Counsel, in coordination with contractor legal counsel, as appropriate.

(c) After the arrest is effected, the arrested person shall be advised of his or her constitutional right against self-incrimination (Miranda warnings). If the circumstances are such that making such advisement is dangerous to the officer or others, this requirement may be postponed until the immediate danger has passed.

(d) Custody of the person arrested should be transferred to other federal law enforcement personnel (i.e., U.S. Marshals or FBI agents) or to LLEA personnel, as appropriate, as soon as practicable. The arrested person should not be questioned or required to sign written statements unless:

(1) Questioning is necessary for security or safety reasons (e.g., questioning to locate a bomb), or

(2) Questioning is authorized by other federal law enforcement personnel or LLEA officers responsible for investigating the crime.

§ 1047.6 Use of physical force when making an arrest.

(a) When a protective force officer has the right to make an arrest as discussed above, the protective force officer may use only that physical force which is reasonable and necessary to apprehend and arrest the offender; to prevent the escape of the offender; or to defend himself or herself or a third person from what the protective force officer believes to be the use or threat of imminent use of physical force by the offender. It should be noted that verbal abuse alone by the offender cannot be the basis under any circumstances for use of physical force by a protective force officer.

(b) Protective force officers shall consult the local DOE Office of Chief Counsel and contractor legal counsel, as appropriate, for additional guidance on use of physical force in making arrests.

Department of Energy

§ 1048.3

§ 1047.7 Use of deadly force.

(a) Deadly force means that force which a reasonable person would consider likely to cause death or serious bodily harm. Its use may be justified only under conditions of extreme necessity, when all lesser means have failed or cannot reasonably be employed. A protective force officer is authorized to use deadly force only when one or more of the following circumstances exists:

(1) *Self-Defense*. When deadly force reasonably appears to be necessary to protect a protective force officer who reasonably believes himself or herself to be in imminent danger of death or serious bodily harm.

(2) *Serious offenses against persons*. When deadly force reasonably appears to be necessary to prevent the commission of a serious offense against a person(s) in circumstances presenting an imminent danger of death or serious bodily harm (e.g. sabotage of an occupied facility by explosives).

(3) *Nuclear weapons or nuclear explosive devices*. When deadly force reasonably appears to be necessary to prevent the theft, sabotage, or unauthorized control of a nuclear weapon or nuclear explosive device.

(4) *Special nuclear material*. When deadly force reasonably appears to be necessary to prevent the theft, sabotage, or unauthorized control of special nuclear material from an area of a fixed site or from a shipment where Category II or greater quantities are known or reasonably believed to be present.

(5) *Apprehension*. When deadly force reasonably appears to be necessary to apprehend or prevent the escape of a person reasonably believed to: (i) have committed an offense of the nature specified in paragraphs (a)(1) through (a)(4)¹ of this section; or (ii) be escaping by use of a weapon or explosive or who otherwise indicates that he or she poses a significant threat of death or serious bodily harm to the protective force officer or others unless apprehended without delay.

¹These offenses are considered by the Department of Energy to pose a significant threat of death or serious bodily harm.

(b) *Additional Considerations Involving Firearms*. If it becomes necessary to use a firearm, the following precautions shall be observed:

(1) A warning, e.g. an order to halt, shall be given, if feasible, before a shot is fired.

(2) Warning shots shall not be fired.

PART 1048—TRESPASSING ON STRATEGIC PETROLEUM RESERVE FACILITIES AND OTHER PROPERTY

Sec.

1048.1 Purpose.

1048.2 Scope.

1048.3 Unauthorized entry.

1048.4 Unauthorized introduction of weapons or dangerous materials.

1048.5 Violations.

1048.6 Posting.

1048.7 Applicability of other laws.

AUTHORITY: Sec. 662, Pub. L. No. 100-531, 102 Stat. 2652 (42 U.S.C. 7270b); section 6, Pub. L. No. 100-185, 101 Stat. 1280 (18 U.S.C. 3571(b)(5)).

SOURCE: 56 FR 1910, Jan. 17, 1991, unless otherwise noted.

§ 1048.1 Purpose.

The regulations in this part are issued for the protection and security of: (a) The Strategic Petroleum Reserve (SPR), its storage or related facilities, and real property subject to the jurisdiction or administration, or in the custody of DOE under part B, title I of the Energy Policy and Conservation Act, *as amended* (42 U.S.C. 6231-6247) (EPCA); and (b) persons upon the SPR or other property subject to DOE jurisdiction under part B, title I of the EPCA.

§ 1048.2 Scope.

The regulations in this part apply to entry into or upon all SPR storage or related facilities, and real property subject to DOE jurisdiction or administration, or in its custody under part B, title I of the EPCA, which have been posted with a notice of the prohibitions and penalties contained in this part.

§ 1048.3 Unauthorized entry.

Unauthorized entry into or upon an SPR facility or real property subject to this part, without authorization, is prohibited.

§ 1048.4

§ 1048.4 Unauthorized introduction of weapons or dangerous materials.

Unauthorized carrying, transporting, introducing or causing to be introduced into or upon an SPR facility or real property subject to this part, of a dangerous weapon, explosive or other dangerous material likely to produce substantial injury or damage to persons or property, is prohibited.

§ 1048.5 Violations.

Willful unauthorized entry, or willful unauthorized introduction of weapons or dangerous materials into or upon real property subject to this part, constitutes a violation of these regulations. Violation of these regulations is a misdemeanor, and a person convicted of violating these regulations is subject to the maximum fine permitted by law, imprisonment for not more than one year, or both.

§ 1048.6 Posting.

Notices stating the pertinent prohibitions of §§ 1048.3 and 1048.4 and the penalties of § 1048.5 will be conspicuously posted at all entrances of each facility or parcel of real property subject to the regulations in this part, and at such intervals along the perimeters thereof as will provide reasonable assurance of notice to persons about to enter.

§ 1048.7 Applicability of other laws.

Nothing in this part shall be construed to affect the applicability of the provisions of State law or of any other Federal law.

[56 FR 1910, Jan. 17, 1991. Redesignated at 56 FR 48096, Sept. 24, 1991]

PART 1049—LIMITED ARREST AUTHORITY AND USE OF FORCE BY PROTECTIVE FORCE OFFICERS OF THE STRATEGIC PETROLEUM RESERVE

Sec.

- 1049.1 Purpose.
- 1049.2 Scope.
- 1049.3 Definitions.
- 1049.4 Arrest authority.
- 1049.5 Exercise of arrest authority—General guidelines.
- 1049.6 Exercise of arrest authority—Use of non-deadly force.

10 CFR Ch. X (1–1–16 Edition)

1049.7 Exercise of arrest authority—Use of deadly force.

1049.8 Training of SPR Protective Force Officers and qualification to carry firearms.

1049.9 Firearms and firearms incidents.

1049.10 Disclaimer.

AUTHORITY: 42 U.S.C. 7101 *et seq.*

SOURCE: 56 FR 58492, Nov. 20, 1991, unless otherwise noted.

§ 1049.1 Purpose.

The purpose of these guidelines is to set forth internal Department of Energy (DOE) security policies and procedures regarding the exercise of arrest authority and the use of force by DOE employees and DOE contractor and subcontractor employees while discharging their official duties pursuant to section 661 of the Department of Energy Organization Act.

§ 1049.2 Scope.

These guidelines apply to the exercise of arrest authority and the use of force, as authorized by section 661 of the Department of Energy Organization Act, as amended, 42 U.S.C. 7101 *et seq.*, by employees of DOE and employees of DOE's SPR security contractor and subcontractor. These policies and procedures apply with respect to the protection of:

- (a) The SPR and its storage or related facilities; and
- (b) Persons upon the SPR or its storage or related facilities.

§ 1049.3 Definitions.

(a) *Act* means sections 661 of the Department of Energy Organization Act, as amended, (42 U.S.C. 7270a).

(b) *Arrest* means an act resulting in the restriction of a person's movement, other than a brief consensual detention for purposes of questioning about a person's identity and requesting identification, accomplished by means of force or show of authority under circumstances that would lead a reasonable person to believe that he was not free to leave the presence of the officer.

(c) *Contractor* means a contractor or subcontractor at any tier.

(d) *Deadly force* means that force which a reasonable person would consider likely to cause death or serious bodily harm.

Department of Energy

§ 1049.5

(e) *Protective Force Officer* means a person designated by DOE to carry firearms pursuant to section 661 of the Act.

(f) *SPR* means the Strategic Petroleum Reserve, its storage or related facilities, and real property subject to the jurisdiction or administration, or in the custody of the Department of Energy under part B of title I of the Energy Policy and Conservation Act (42 U.S.C. 6231–6247).

(g) *Suspect* means a person who is subject to arrest by a Protective Force Officer as provided in these guidelines.

§ 1049.4 Arrest authority.

(a) Under the Act, the authority of a DOE Protective Force Officer to arrest without warrant is to be exercised only in the performance of official duties of protecting the SPR and persons within or upon the SPR.

(b) A Protective Force Officer is authorized to make an arrest for a felony committed in violation of laws of the United States, or for a misdemeanor committed in violation of laws of the United States if the offense is committed in the officer's presence.

(c) A Protective Force Officer also is authorized to make an arrest for a felony committed in violation of laws of the United States if the Officer has reasonable grounds to believe that the felony has been committed, or that the suspect is committing the felony, and is in the immediate area of the felony or is fleeing the immediate area of the felony. "Reasonable grounds to believe" means that the facts and circumstances within the knowledge of the Protective Force Officer at the moment of arrest, and of which the Protective Force Officer has reasonably trustworthy information, would be sufficient to cause a prudent person to believe that the suspect had committed or was committing a felony.

§ 1049.5 Exercise of arrest authority—General guidelines.

(a) In making an arrest, and before taking a person into custody, the Protective Force Officer should:

(1) Announce the Protective Force Officer's authority (*e.g.*, by identifying himself as an SPR Protective Force Officer);

(2) State that the suspect is under arrest; and

(3) Inform the suspect of the crime for which the suspect is being arrested. If the circumstances are such that making these announcements would be useless or dangerous to the Officer or to another person, the Protective Force Officer may dispense with these announcements.

(b) At the time and place of arrest, the Protective Force Officer may search the person arrested for weapons and criminal evidence, and may search the area into which the person arrested might reach to obtain a weapon to destroy evidence.

(c) After the arrest is effected, the person arrested shall be advised of his constitutional right against self-incrimination ("*Miranda* warnings"). If the circumstances are such that immediately advising the person arrested of this right would result in imminent danger to the Officer or other persons, the Protective Force Officer may postpone this requirement. The person arrested shall be advised of this right as soon as practicable after the imminent danger has passed.

(d) As soon as practicable after the arrest is effected, custody of the person arrested should be transferred to other Federal law enforcement personnel (*e.g.*, U.S. Marshals or FBI agents) or to local law enforcement personnel, as appropriate, in order to ensure that the person is brought before a magistrate without unnecessary delay.

(e) Ordinarily, the person arrested shall not be questioned or required to sign written statements unless such questioning is:

(1) Necessary to establish the identity of the person arrested and the purpose for which such person is within or upon the SPR;

(2) Necessary to avert an immediate threat to security or safety (*e.g.*, to locate a bomb); or

(3) Authorized by other Federal law enforcement personnel or local law enforcement personnel responsible for investigating the alleged crime.

**§ 1049.6 Exercise of arrest authority—
Use of non-deadly force.**

(a) When a Protective Force Officer is authorized to make an arrest as provided in the Act, the Protective Force Officer may use only that degree of non-deadly force that is reasonable and necessary to apprehend and arrest the suspect in order to prevent escape or to defend the Protective Force Officer or other persons from what the Officer reasonably believes to be the use or threat of imminent use of non-deadly force by the suspect. Verbal abuse by the suspect, in itself, is not a basis for the use of non-deadly force by a Protective Force Officer under any circumstances.

(b) Protective Force Officers should consult the local DOE Office of Chief Counsel and contractor legal counsel for additional guidance on the use of non-deadly force in the exercise of arrest authority, as appropriate.

**§ 1049.7 Exercise of arrest authority—
Use of deadly force.**

(a) The use of deadly force is authorized only under exigent circumstances where the Protective Force Officer reasonably believes that such force is necessary to:

(1) Protect himself from an imminent threat of death or from serious bodily harm;

(2) Protect any person or persons in or upon the SPR from an imminent threat of death or serious bodily harm.

(b) If circumstances require the use of a firearm by a Protective Force Officer, the Officer shall give a verbal warning (*e.g.*, an order to halt), if feasible. A Protective Force Officer shall not fire warning shots under any circumstances.

§ 1049.8 Training of SPR Protective Force Officers and qualification to carry firearms.

(a) Protective Force Officers shall successfully complete training required by applicable Department of Energy orders prior to receiving authorization to carry firearms. The Chief Health, Safety and Security Officer shall approve the course.

(b) Prior to initial assignment to duty, Protective Force Officers shall successfully complete a basic qualifica-

tion training course which equips them with at least the minimum level of competence to perform tasks associated with their responsibilities. The basic course shall include the following subject areas:

(1) Legal authority, including use of deadly force and exercise of limited arrest authority;

(2) Security operations, including policies and procedures;

(3) Security tactics, including tactics for Protective Force Officers acting alone or as a group;

(4) Use of firearms, including firearms safety and proficiency with all types of weapons expected to be used;

(5) Use of non-deadly weapons, weapon-less self-defense, and physical conditioning;

(6) Use of vehicles, including vehicle safety in routine and emergency situations;

(7) Safety, first aid, and elementary firefighting procedures;

(8) Operating in such a manner as to preserve SPR sites and facilities;

(9) Communications, including methods and procedures.

(c) After completing training, and receiving the appropriate security clearance, Protective Force Officers shall be authorized to carry firearms and exercise limited arrest authority. Protective Force Officers shall receive an identification card, which must be carried whenever on duty and whenever armed.

(d) On an annual basis, each Protective Force Officer must successfully complete training sufficient to maintain at least the minimum level of competency required for the successful performance of all assigned tasks identified for Protective Force Officers.

(e) Protective Force Officers shall be qualified in the use of firearms by demonstrating proficiency in the use of firearms on a semiannual basis prior to receiving authorization to carry firearms. Protective Force Officers shall demonstrate proficiency in the use of all types of weapons expected to be used while on duty under both day and night conditions. In demonstrating firearms proficiency, Protective Force Officers shall use firearms of the same type and barrel length as firearms used by Protective Force Officers while on

Department of Energy

§ 1050.101

duty, and the same type of ammunition as that used by Protective Force Officers on duty. Before a Protective Force Officer is qualified in the use of firearms, the Officer shall complete a review of the basic principles of firearms safety.

(f) Protective Force Officers shall be allowed two attempts to qualify in the use of firearms. Protective Force Officers shall qualify in the use of firearms within six months of failing to qualify. If an Officer fails to qualify, the Officer shall complete a remedial firearms training program. A Protective Force Officer who fails to qualify in the use of firearms after completion of a remedial program, and after two further attempts to qualify shall not be authorized to carry firearms or to exercise limited arrest authority.

[56 FR 58492, Nov. 20, 1991, as amended at 71 FR 68738, Nov. 28, 2006]

§ 1049.9 Firearms and firearms incidents.

(a) Protective Force Officers shall receive firearms of a type suitable to adequately protect persons and property within or upon the SPR. Firearms and ammunition shall be secured, inventoried, and maintained in accordance with applicable Department of Energy orders, when not in use.

(b) The authority of a Protective Force Officer to carry firearms and to exercise limited arrest authority shall be suspended if the Officer participates in an incident involving the use of firearms. In such circumstances, the Officer shall be assigned to other duties, pending completion of an investigation.

(c) Incidents involving the discharge of firearms shall be reported to the Department of Energy Headquarters Emergency Operations Center immediately, and to the SPR Project Management Office Security Division within 24 hours. The Strategic Petroleum Reserve Project Manager shall appoint a committee to investigate the incident.

§ 1049.10 Disclaimer.

These guidelines are set forth solely for the purpose of internal Department of Energy guidance. These guidelines do not, and are not intended to, and

may not be relied upon to, create any substantive or procedural rights enforceable at law by any party in any matter, civil or criminal. These guidelines do not place any limitations on otherwise lawful activities of Protective Force Officers or the Department of Energy.

AUTHORITY: The Constitution of the United States, Article I, Section 9; 5 U.S.C. 7342; 22 U.S.C. 2694; 42 U.S.C. 7254 and 7262; 28 U.S.C. 2461 note.

SOURCE: 45 FR 53972, Aug. 13, 1980, unless otherwise noted.

Subpart A—General

§ 1050.101 Purpose and scope.

These regulations implement the provisions of the Foreign Gifts and Decorations Act (5 U.S.C. 7342), which establishes policies and procedures pertaining to the acceptance, use, and disposition of gifts or decorations from foreign governments. If an employee of

§ 1050.102

Department of Energy (DOE) meets the requirements of these regulations, he or she is deemed to be in compliance with the DOE Conduct of Employees regulations, 10 CFR part 1010.

§ 1050.102 Applicability.

These regulations apply to all DOE employees, including special Government employees, and civilian and military personnel of other Government agencies regularly detailed to DOE, and to spouses and dependents of such personnel. These regulations apply to all employees of the Federal Energy Regulatory Commission (FERC) to the extent the Commission by rule makes these regulations applicable to FERC employees. These regulations do not apply to gifts and bequests accepted by the Department as authorized by section 652 of the Department of Energy Organization Act (42 U.S.C. 7262), except as set forth in §1050.202(d) of this part. These regulations do not apply to assistance from a foreign government for participation by DOE employees in foreign cultural exchange programs pursuant to the Mutual Educational and Cultural Exchange Act (22 U.S.C. 2458a).

§ 1050.103 Definitions.

(a) *Employee* means—

(1) An employee of DOE or FERC as defined by 5 U.S.C. 2105 (employees of DOE contractors are specifically excluded);

(2) A special Government employee as defined in 18 U.S.C. 202(a), and an expert or consultant who is under contract to the DOE pursuant to 5 U.S.C. 3109, including, in the case of an organization performing services under such section, any individual involved in the performance of such services;

(3) A member of a Uniformed Service or an employee of another Government agency assigned or detailed to the DOE or FERC;

(4) The spouse of an individual described in paragraphs (a)(1) through (a)(3) of this section (unless such individual and his or her spouse are legally separated) or a dependent (within the meaning of section 152 of the Internal Revenue Code of 1954) of such an individual, other than a spouse or depend-

10 CFR Ch. X (1–1–16 Edition)

ent who is an employee under paragraphs (a)(1) through (a)(3).

(b) *Foreign government* means:

(1) Any unit of foreign governmental authority, including any foreign national, State, local, or municipal government;

(2) Any international or multinational organization whose membership is composed of any unit of foreign government described in paragraph (b)(1); and

(3) Any agent or representative of any such unit or such organization, while acting as such.

(c) *Gift* means a tangible or intangible present (other than a decoration) tendered by, or received from, a foreign government.

(d) *Decoration* means an order, device, medal, badge, insignia, emblem, or award tendered by, or received from, a foreign government.

(e) *Minimal value* means that value as defined in regulations prescribed by the Administrator of General Services, in consultation with the Secretary of State, to reflect changes in the consumer price index for the immediately preceding 3-year period in accordance with the definition of “minimal value” as set forth in the Federal Property Management Regulations of title 41 of the Code of Federal Regulations as applied to the Utilization, Donation, and Disposal of Foreign Gifts and Decorations.

(f) *The Act* means the Foreign Gifts and Decorations Act, 5 U.S.C. 7342.

(g) *Appropriate General Counsel* means either the DOE General Counsel when the employee involved is an employee of that portion of the DOE which excludes FERC, or the FERC General Counsel when the employee involved is an employee of FERC.

[45 FR 53972, Aug. 13, 1980, as amended at 59 FR 44896, Aug. 31, 1994]

§ 1050.104 Responsibilities and authorities.

(a) The Director of Administration shall:

(1) Assure that all employees are given access to or a copy of the Act and these regulations;

(2) Maintain liaison with the Department of State and prepare Departmental reports to the Department of

Department of Energy

§ 1050.202

State consistent with the Act and these regulations;

(3) Provide advice and assistance on implementation of the act and these regulations, in coordination with the Assistant Secretary for International Affairs (IA) and the appropriate General Counsel;

(4) Collect and maintain for public inspection all employee statements submitted pursuant to these regulations;

(5) Arrange for independent appraisal of the value of gifts or decorations, upon the request of the General Services Administration or the Inspector General (or other appropriate DOE official); and

(6) Accept and maintain custody and make all determinations regarding the use and disposition of all gifts and decorations accepted by employees on behalf of the United States, in coordination with IA, the appropriate General Counsel, and, for gifts to the Secretary, Deputy Secretary or Under Secretary, the appropriate official in the Office of the Secretary.

(b) The Assistant Secretary for International Affairs (IA) shall assist the Directorate of Administration, where appropriate, in making determinations concerning the effects of the proposed acceptance, use, or disposition of a foreign gift or decoration on the foreign relations of the United States.

(c) The appropriate General Counsel shall assist the Directorate of Administration in matters relating to the interpretation and application of the Act, and these and any related regulations, and shall provide counseling and interpretation regarding the Act, and these and any related regulations, to employees.

(d) The Inspector General shall investigate suspected violations of these regulations pursuant to § 1050.303 below.

Subpart B—Guidelines for Acceptance of Foreign Gifts or Decorations

§ 1050.201 Policy against accepting foreign gifts or decorations.

(a) The Constitution of the United States, Article I, section 9, clause 8, provides that “* * * no Person holding any Office of Profit or Trust under

* * * [the United States], shall, without the consent of the Congress, accept of any present, Emolument, Office, or Title, of any kind whatever, from any * * * foreign State.” In the Foreign Gifts and Decorations Act the Congress consented to the acceptance by Federal employees of gifts and decorations with certain constraints and under certain procedures. Acceptance of any gift or decoration not consistent with this Act, the Department of Energy Organization Act, or the regulations in this part is prohibited.

(b) No employee shall request or otherwise encourage the tender of a gift or decoration from a foreign government. No employee shall accept a gift or decoration from a foreign government except as provided in §§ 1050.202 or 1050.203 of this part and in accordance with the additional procedures set forth in §§ 1050.204 and 1050.301 of this part.

§ 1050.202 Allowable acceptance of gifts.

(a) An employee may accept and retain gifts from foreign governments where the gift is tendered or received as a souvenir or mark of courtesy, and is of minimal value. Initial responsibility for determining the value of a gift lies with the employee.

(b) Subject to the prior approval requirements described in § 1050.204(a) of this part, an employee may accept gifts of more than minimal value, tendered as a souvenir or mark of courtesy, where it appears that refusal of the gift would likely cause offense or embarrassment or otherwise adversely affect the foreign relations of the United States. Otherwise, an employee, when offered a gift of more than minimal value from a foreign government, other than a gift designated in paragraph (c) of this section, should advise the donor that acceptance of such gifts by the employee is contrary to the policy of the United States. If a gift described in this paragraph is accepted by an employee and not immediately returned thereby, it shall be deemed to have been accepted on behalf of the United States. Upon acceptance it becomes the property of the United States. Within 60 days after acceptance by the employee, the gift shall be deposited with

§ 1050.203

the Directorate of Administration for disposal or official Departmental use as determined by the Directorate of Administration, in accordance with §1050.302 of this part, and an appropriate statement shall be filed by the employee in accordance with §1050.301(a) of this part.

(c) Subject to the prior approval requirements described in §1050.204(a) of this part, an employee may accept and retain gifts of more than minimal value:

(1) Where the gift is in the nature of an educational scholarship.

(2) Where the gift is in the form of medical treatment.

An employee accepting a gift pursuant to this paragraph shall file an appropriate statement in accordance with §1050.301(a) of this part.

(d) An employee may accept gifts (whether or not of minimal value) of travel or expenses for travel (such as transportation, food, lodging, or entertainment) taking place entirely outside of the United States where the provision of such travel or expenses is in accordance with diplomatic custom or treaty and where the Head of the employee's Office grants prior written approval. A spouse or dependent may accept gifts of travel or travel expenses when accompanying the employee, provided this is done with the prior written approval of the Head of the employee's Office. The Head of the employee's Office shall consult with the appropriate General Counsel in connection with granting approval under this paragraph. Travel or expenses for travel may not be accepted merely for the personal benefit, pleasure, enjoyment, or financial enrichment of the individual involved. An appropriate statement shall be filed in accordance with §1050.301(b) of this part. When *any portion* of the travel (such as the origination or termination of a flight) is within the United States, it may not be paid for by a foreign government, except as set forth in paragraph (e) of this section.

(e) Pursuant to section 652 of the DOE Organization Act, an employee may accept gifts from the International Atomic Energy Agency or other energy-related international organizations (e.g., the Nuclear Energy

10 CFR Ch. X (1-1-16 Edition)

Agency and the International Energy Agency) covering transportation expenses to or from a foreign country in connection with scientific or technical assistance projects of such agencies for which the Department of Energy has lead U.S. Government agency responsibility. Such gifts may be accepted only with the prior written approval of the Head of the employee's Office, who is hereby delegated authority to accept such gifts in accordance with section 652.

§ 1050.203 Acceptance of decorations.

(a) An employee may accept, retain and wear a decoration tendered by a foreign government in recognition of active field service in time of combat operations or awarded for other outstanding or unusually meritorious performance.

(b) Acceptance of a decoration in accordance with paragraph (a) of this section shall be reviewed and approved by the Directorate of Administration in accordance with §1050.204 of this part. Otherwise, it will be deemed to have been accepted on behalf of the United States, shall become the property of the United States, and shall be deposited, within 60 days of acceptance, with the Directorate of Administration for disposal or official Departmental use as determined by the Directorate of Administration in accordance with §1050.302 of this part.

§ 1050.204 Advance approval for acceptance of gifts or decorations.

(a) If an employee is advised that a gift of more than minimal value as described in §1050.202 (b) or (c) is to be tendered to him or her, the employee shall, if time permits, request the written advice of the Directorate of Administration regarding the appropriateness of accepting or refusing the gift. A request for approval shall be submitted to the Directorate of Administration in writing, stating the nature of the gift and the reasons for which it is being tendered. The Directorate of Administration shall consult with Assistant Secretary for International Affairs and the appropriate General Counsel in connection with advising the employee. If such advice cannot be obtained and refusal of the gift would

Department of Energy

§ 1050.302

likely cause offense or embarrassment or otherwise adversely effect the foreign relations of the United States, the gift may be accepted, but the Directorate of Administration shall be informed as soon as possible. In either event, the employee shall proceed as provided in §§1050.202 and 1050.301 of this part.

(b) Where an employee is notified of the intent of a foreign government to award him a decoration for outstanding or unusually meritorious service, approval required under §1050.203 should be obtained prior to acceptance of the award. A request for approval shall be submitted to the Directorate of Administration in writing, stating the nature of the decoration and the reasons for which it is being awarded. The Directorate of Administration shall consult with the Assistant Secretary for International Affairs and the appropriate General Counsel. If time does not permit the employee to obtain approval for the award of the decoration before its receipt, the employee may accept it, but shall seek such approval immediately thereafter.

Subpart C—Procedures and Enforcement

§ 1050.301 Reports.

(a) Within 60 days of accepting a gift of more than minimal value, other than gifts of travel or travel expenses, which are covered in paragraph (b) of this section, an employee shall, in addition to depositing a tangible gift (e.g. wearing apparel, liquor, etc.) with the Directorate of Administration in accordance with §1050.202 of this part, file with the Directorate of Administration a statement concerning the gift containing the information identified on the sample form set forth in appendix I. The form set forth in appendix I must also be filed if the aggregate value of gifts accepted by the recipient from all sources over any period of one year exceeds \$250.

(b) Within 30 days after accepting travel or travel expenses in accordance with §1050.202 of this part, an employee shall file with the Directorate of Administration a statement concerning the travel containing the information identified on the sample form set forth

in appendix II. Such a statement need not be filed, however, if the travel is in accordance with specific travel arrangements made by the Department in cooperation with the foreign government.

(c) The Directorate of Administration shall:

(1) Maintain the statements filed pursuant to these regulations and make them available for public inspection and copying during regular business hours; and

(2) Not later than January 31 of each year compile and transmit to the Department of State for publication by the Department of State in the FEDERAL REGISTER a list of all statements filed pursuant to these regulations during the preceding calendar year.

§ 1050.302 Use or disposal of gifts and decorations accepted on behalf of the United States.

(a) The Directorate of Administration shall accept and maintain custody of all tangible gifts and decorations accepted by employees on behalf of the United States pending their final disposition.

(b) Whenever possible, the gift or decoration shall be returned to the original donor. The Directorate of Administration shall examine the circumstances surrounding its donation, and, in consultation with the Assistant Secretary for International Affairs, assess whether any adverse effect upon the United States foreign relations might result from return of the gift or decoration to the donor. The appropriate officials of the Department of State shall be consulted if the question of an adverse effect arises.

(c) The Directorate of Administration may determine that the gift or decoration may be retained for the official use of the Department, if it can be properly displayed in an area at Headquarters or at a field facility accessible to employees or members of the public or if it is otherwise usable in carrying out the mission of the Department. The Assistant Secretary for International Affairs shall be consulted to determine whether failure to accept the gift or decoration for the official use of the Department will have an adverse effect on the foreign relations of

§ 1050.303

10 CFR Ch. X (1–1–16 Edition)

the United States. In no case shall a gift or decoration be accepted for the official use of the Department when the enjoyment and beneficial use of the gift will accrue primarily to the benefit of the donee or any other individual employee. Gifts or decorations that are retained for the official use of the Department shall be handled in accordance with the provisions of paragraph (d) of this section when their official use is ended.

(d) If a gift or decoration is not retained for official use of the Department, or if its official use has ended, the Directorate of Administration shall, within 30 days after its deposit or after its official use has ended—

(1) Report the gift or decoration to the General Services Administration (GSA) for transfer, donation, or other disposal in accordance with the provisions of the Federal Property and Administrative Services Act of 1949 and the Federal Property Management Regulations at 41 CFR part 101–49, or

(2) If the gift or decoration is in cash, currency, or monies (except those with possible historic or numismatic value), or is a noncash monetary gift such as a check, money order, bonds, shares of stock, or other negotiable instrument, forward it to the Finance and Accounting Office for deposit with the Department of the Treasury.

(e) The Directorate of Administration shall retain custody of gifts and decorations not returned to the donor or retained for the official use of the Department until GSA directs it concerning their disposition. At the request of GSA, the Directorate of Administration shall arrange for appraisal of specific gifts and decorations.

§ 1050.303 Enforcement.

(a) An employee who violates the provisions of the Act or these regulations may be subject to disciplinary action or civil penalty action as set forth in paragraphs (c) and (d) of this section.

(b) Suspected violations of the Act or these regulations shall be reported promptly to the appropriate General Counsel and the Inspector General.

(c) The Inspector General will be responsible for taking the following actions:

(1) If the results of an investigation by the Inspector General do not provide any support for a determination that a violation of the Act or these regulations has occurred, then no further action shall be taken.

(2) If it is determined that the employee knowingly and through actions within his own control has done any of the following, the matter shall be referred to the Attorney General for appropriate action:

(i) Solicited or accepted a gift from a foreign government in a manner inconsistent with the provisions of the Act and these regulations;

(ii) As the approved recipient of travel expenses failed to follow the procedures set forth in the Act and these regulations; or

(iii) Failed to deposit or report a gift as required by the Act and these regulations.

(3) If it is determined that the employee failed to deposit a tangible gift with the Directorate of Administration within 60 days, or to account properly for acceptance of travel expenses, or to comply with the requirements of these regulations relating to the disposal of gifts and decorations retained for official use, but that the criteria of knowledge and control specified in paragraph (c)(2) of this section for referral to the Attorney General have not been met, then the matter shall be referred by the Inspector General to appropriate Departmental officials for administrative action.

(d) As set forth in section 7342(h) of title 5, United States Code, the Attorney General may bring a civil action in any district court of the United States against any employee who knowingly solicits or accepts a gift from a foreign government not consented to by the Act, or who fails to deposit or report such gift as required by the Act. The court in which such action is brought may assess a civil penalty against such employee in any amount not to exceed the retail value of the gift improperly solicited or received plus \$9,000.

Department of Energy

Pt. 1050, App. I

STATEMENT CONCERNING GIFTS RECEIVED FROM A FOREIGN GOVERNMENT

Item 1. This statement is to be filed pursuant to the provisions of the Foreign Gifts and Decorations Act (5 U.S.C. 7342, as amended by Pub. L. 95-105, August 17, 1977) and DOE implementing regulations at 10 CFR part 1050. These provisions apply to foreign gifts tendered to or accepted by Federal employees *and* their spouses and dependents. The name of the employee should always be indicated in item 1; if the employee is the recipient of the gift then items 5 and 6 should be marked N/A-not applicable; if the recipient is a spouse or dependent, then the appropriate information should be included in items 5 and 6.

Item 2. Self explanatory.

Items 3 and 4. The Office or Division and the position of the employee should be indicated here regardless of whether the recipient is the employee or a spouse or dependent.

Items 5 and 6. See above, Item 1.

Item 7. Self explanatory.

Item 8. Self explanatory.

Item 9. Indicate the retail value in the United States at the time of acceptance. If there is any uncertainty as to the value of the gift, it is the recipient's responsibility to make a reasonable effort to determine value. If the value is \$100 or under, and if the aggregate value of the gifts accepted by the recipient from all sources over any period of one year does not exceed \$250, then the gift may be retained by the recipient and this Statement need not be submitted.

Item 10. Identify in this item whether or not approval to accept the gift was sought or given in advance in accordance with §1050.204 of the DOE regulations. Also identify those circumstances supporting a determination that refusal of the gift would likely cause offense or embarrassment or otherwise adversely affect the foreign relations of the United States.

Items 11 and 12. Self explanatory.

Item 13. Though there is no assurance that the item will be sold or if it is sold that it will be feasible for the recipient to participate in the sale, GSA regulations provide for participation by the recipient where feasible.

§ 1060.101

STATEMENT CONCERNING ACCEPTANCE OF TRAVEL OR TRAVEL EXPENSES FROM A FOREIGN GOVERNMENT

- Item 1. This statement is to be filed pursuant to the provisions of the Foreign Gifts and Decorations Act (5 U.S.C. 7342, as amended by Pub. L. 95-105, August 17, 1977) and DOE implementing regulations at 10 CFR part 1050. These provisions apply to travel or travel expenses for travel *entirely outside* of the United States¹ tendered to or accepted by Federal employees and their spouses and dependents. The name of the employee should always be indicated in item 1; if the employee is the recipient of the travel or travel expenses, then items 5 and 6 should be marked N/A-not applicable; if the recipient is a spouse or dependent, then the appropriate information should be included in items 5 and 6.
- Item 2. Self explanatory.
- Items 3 and 4. The Office or Division of the employee should be indicated here regardless of whether the recipient is the employee or a spouse or dependent.
- Items 5 and 6. See above, Item 1.
- Item 7a. Indicate the location and mode of transportation and approximate value in U.S. dollars, if possible. Attach itinerary if available.
- Item 7b. Indicate nature and location of travel expenses provided and approximate value in U.S. dollars, if possible. Attach itinerary if available.
- Item 8. Indicate dates of travel.
- Item 9. Self explanatory.
- Item 10. Travel and travel expenses may be accepted in accordance with DOE regulations where the travel is official agency business. Spouses and dependents may accept such travel and expenses only when accompanying the employee. Item 10 therefore should be completed to identify the *employee's* official business whether the recipient is an employee or a spouse or dependent.
- Item 11. Identify in this item any treaty or diplomatic custom that related to acceptance of the travel or expenses, and any circumstances indicating that acceptance would be consistent with the interests of the U.S. Also provide information regarding any prior approval of the acceptance.
- Items 12, 13a, and 13b. Self explanatory.

¹The Congress has consented in Pub. L. 95-105 only to acceptance of travel or travel expenses that is *entirely outside* of the United States. Travel, *any portion* of which (such as the origination or termination of a flight) is within the United States, may not be paid for by a foreign government. All such travel must be handled within applicable DOE Travel Regulations and Standards of Conduct Regulations.

PART 1060—PAYMENT OF TRAVEL EXPENSES OF PERSONS WHO ARE NOT GOVERNMENT EMPLOYEES

Sec.

- 1060.101 Persons who may be paid.
1060.201 Relatives, contractors, and assistance award recipients.
1060.301 Government employees.
1060.401 Applicability of internal DOE rules.
1060.501 Definitions.

AUTHORITY: Sec. 644, Pub. L. 95-91, 91 Stat. 599 (42 U.S.C. 7254).

SOURCE: 46 FR 35631, July 10, 1981, unless otherwise noted.

§ 1060.101 Persons who may be paid.

(a) Payment may not be authorized or approved for transportation, lodging, subsistence, or other travel expenses from DOE funds to, or on behalf of, a person who is not a Government

employee unless such payment is made—

(1) Pursuant to an invitation received by that person from the Department to confer with a DOE employee on matters essential to the advancement of DOE programs or objectives and (i) in the case of a person invited to confer at the post of duty of the conferring DOE employee, a designated official has approved and stated the reasons for the invitation in writing, or (ii) in the case of a person invited to confer at a place other than the post duty of the conferring DOE employee, a principal departmental official has approved and stated the reasons for the invitation in writing;

(2) Pursuant to an invitation for an interview to a prospective employee of the Department who is an applicant for (i) a position in the Department classified at GS-16 or above of the General

§ 1060.201

Schedule or the rate of basic pay for which is fixed, other than under the General Schedule, at a rate equal to or greater than the minimum rate of basic pay fixed for GS-16, (ii) a position for which a determination has been made that there is a manpower shortage pursuant to 5 U.S.C. 5723, or (iii) a DOE position for which the Department has the exclusive duties of recruitment and selection;

(3) In accordance with 28 U.S.C. 1821 or other applicable law, to a person who is subpoenaed by the Department to appear and testify or to appear and to produce documents at a designated place;

(4) To a person who serves as a travel attendant for a handicapped individual who is authorized to travel at DOE expense and who cannot travel alone because of the handicap; or

(5) Pursuant to a written determination of a principal departmental officer that it is in the interest of the Government to provide such payment, where the Counselor has determined in writing that the payment is authorized under 5 U.S.C. ch. 57 or other statutory authority.

(b) The authority of a designated official or a principal departmental officer, as the case may be, to provide approval of an invitation to travel under paragraph (a)(1) and of a principal departmental officer to determine that payment of travel expenses is in the interest of the Government under paragraph (a)(5) of this section may not be delegated.

(c) Within 30 days of providing written approval of an invitation under paragraph (a)(1)(i) of this section, a designated official who is an Administrator of a power administration or the head of a Field Organization shall transmit a copy of the written approval to the principal departmental officer to whom the official or the official's organization reports.

(d) Payment of travel expenses may not be made pursuant to an invitation to travel under paragraphs (a)(1) or (a)(5) unless the written approval and statement of reasons required by paragraph (a)(1), or the written determinations required by paragraph (a)(5) of this section, are made before the travel

10 CFR Ch. X (1-1-16 Edition)

to be authorized by the invitation takes place.

(e) Nothing in this section shall be interpreted to prohibit payment for travel expenses that are reimbursable or allowable by the Department under the terms of a DOE contract or assistance award.

§ 1060.201 Relatives, contractors, and assistance award recipients.

Notwithstanding any other provision in this part, a DOE employee may not authorize or approve, require another person to authorize or approve, or advocate the authorization or approval of, payment from DOE funds of travel expenses of a person who is not a Government employee and who is (a) the DOE employee's relative (except in the case of payment under §1060.101(a)(4)), or (b) in the case of payment under §1060.101(a)(1), a DOE contractor or a DOE assistance award recipient or the employee of a DOE contractor or a DOE assistance award recipient unless the travel expenses are incurred with respect to matters outside the scope of the contract or assistance award, as the case may be. (See also §1060.101(e).)

§ 1060.301 Government employees.

Nothing in this part shall be interpreted as being applicable to authorization or approval of payment of travel expenses of Government employees, including DOE employees.

§ 1060.401 Applicability of internal DOE rules.

Payment of travel expenses under §1060.101(a) (1) through (5) shall be subject to other Department rules relating to authorization of travel.

§ 1060.501 Definitions.

For purposes of this part—

(a) *Counselor* means the General Counsel of the Department or the General Counsel of the Federal Energy Regulatory Commission or their delegates, as appropriate.

(b) *Designated official* means (1) a principal departmental officer, (2) an individual who is appointed to a position in the Department by the President of the United States with the advice and consent of the Senate, (3) the

Department of Energy

§ 1060.501

Administrator of a power administration, or (4) the head of a Field Organization.

(c) *DOE* or *Department* means the Department of Energy established by the Department of Energy Organization Act, section 201, Pub. L. 95-91 (42 U.S.C. 7131).

(d) *Employee* means—

(1) An employee as defined by 5 U.S.C. 2105;

(2) A special Government employee as defined in 18 U.S.C. 202(a);

(3) A member of a Uniformed Service.

(e) *Handicapped individual* means a person who has a physical or mental disability or health impairment, and includes an individual who is temporarily incapacitated because of illness or injury.

(f) *Principal departmental officer* means the Secretary, Deputy Secretary, or Under Secretary, or, in the

case of the Federal Energy Regulatory Commission, the Chairman or Executive Director of the Commission.

(g) *Relative* means, with respect to a DOE employee, an individual who is related to the employee, by blood, marriage, or operation of law, as father, mother, son, daughter, brother, sister, uncle, aunt, great aunt, great uncle, first cousin, nephew, niece, husband, wife, grandchild, grandparent, father-in-law, mother-in-law, son-in-law, daughter-in-law, brother-in-law, sister-in-law, stepfather, stepmother, stepson, stepdaughter, stepbrother, stepsister, half brother, or half sister, and shall also include the grandparent of an employee's spouse, an employee's fiancé or fiancée, or any person residing in the employee's household.

§ 1303.101 Scope

This part sets forth the policies and procedures of the U.S. Nuclear Waste Technical Review Board (Board) regarding public access to documents under the Freedom of Information Act (FOIA), 5 U.S.C. 552. The provisions in the Act shall take precedence over any part of the Board's regulations in conflict with the Act. This part gives the procedures the public may use to inspect and obtain copies of Board records under the FOIA, including administrative procedures which must be exhausted before a request invokes the jurisdiction of an appropriate United States District Court for the Board's failure to respond to a proper request within the statutory time limits, for a denial of Board records or challenges to the adequacy of a search, or for denial of fee waiver.

§ 1303.102 Definitions.

For words used in this part, unless the context varies otherwise, singular includes the plural, plural includes the singular, present tense includes the fu-

ture tense, and words of one gender include the other gender.

(a)(1) Agency records—include materials that are in the control of the Board and associated with Board business, as follows:

- (i) Materials produced by the Board.
 - (ii) Materials produced a consultant for the Board.
 - (iii) Materials distributed by presenters at a Board meeting.
- (2) All references to records, include both the entire record, or any part of the record.

(b) Board—The U.S. Nuclear Waste Technical Review Board.

(c) Chairman—The Chairman of the Board as designated by the President.

(d) Designated FOIA Officer—The person named by the Board to administer the Board's activities in regard do the regulations in this part. The FOIA Officer also shall be:

(1) The Board officer having custody of, or responsibility for, agency records in the possession of the Board.

(2) The Board officer having responsibility for authorizing or denying production of records from requests filed under the Freedom of Information Act.

(e) Executive Director—The chief operating officer of the Board.

(f) Member—An individual appointed to serve on the Board by the President of the United States.

(g) Days—Standard working days, excluding weekends and federal holidays.

§ 1303.103 Public reading area.

(a) A public reading area is available at the Board office located at 2300 Clarendon Blvd., Suite 1300, Arlington, Virginia 22201. To use the reading area, contact the Director of Administration by:

(1) Letter to the address in this paragraph (a):

(2) Telephone: 703-235-4473;

(3) A request to the Board's Web site at <http://www.nwtrb.gov>; or

(4) Fax: 703-532-4495.

(b) Documents also may be requested through the Board's Web site or by letter or fax. Please ensure that the records sought are clearly described. Materials produced by the Board are in the public domain unless otherwise noted.

§ 1303.104

(c) Many Board records are available electronically at the Board's Web site (<http://www.nwtrb.gov>).

(d) Records of the Board available for inspection and copying include:

(1) The rules and regulations of the Board.

(2) Statements of policy adopted by the Board.

(3) Board reports to the U.S. Congress and the U.S. Secretary of Energy.

(4) Board correspondence with Congress and the Department of Energy (DOE).

(5) Transcripts of Board meetings.

(6) Biographical information about current Board members.

(7) Copies of records released in response to FOIA requests.

(e) The cost of copying information available in the Board office shall be imposed in accordance with the provisions of § 1303.108.

§ 1303.104 Board records exempt from public disclosure.

5 U.S.C. 552 provides that the requirements of the FOIA do not apply to matters that are:

(a) Specifically authorized under the criteria established by an executive order to be kept secret in the interest of national defense or foreign policy and in fact are properly classified pursuant to such an executive order.

(b) Related solely to the internal personnel rules and practices of the Board.

(c) Specifically exempted from disclosure by another federal statute, provided that such statute:

(1) Requires that records be withheld from the public in such a manner that leaves no discretion on the issue; or

(2) Establishes criteria for withholding or refers to particular types of matters to be withheld.

(d) Trade secrets, and commercial or financial information obtained from a person and privileged or confidential.

(e) Interagency or intra-agency memoranda or letters that would not be available by law to a party other than an agency in litigation with the Board.

(f) Personnel, medical, or similar files that disclosing would constitute a clearly unwarranted invasion of personal privacy.

10 CFR Ch. XIII (1-1-16 Edition)

(g) Records or information compiled for law enforcement purposes. Buy only to the extent that the production of such law enforcement records or information:

(1) Could reasonably be expected to interfere with enforcement proceedings;

(2) Would deprive a person of a right to a fair trial or an impartial adjudication;

(3) Could reasonably be expected to constitute an unwarranted invasion of personal privacy;

(4) Could reasonably be expected to disclose the identity of any confidential source, including a State, local, or foreign agency or authority, or any private institution which furnished information on a confidential basis, and in the case of a record or information compiled by a criminal law enforcement agency in the course of a criminal investigation or by an agency conducting a lawful security intelligence investigation, information furnished by a confidential source;

(5) Would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law; or

(6) Could reasonably be expected to endanger the life or physical safety of any individual.

(h) Contained in or related to examination, operating, or condition reports, prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions.

(i) Geological and geophysical information and data, including maps, concerning wells.

§ 1303.105 Requests for Board records.

(a) A written FOIA request must be submitted. You may:

(1) Write: NWTRB Designated FOIA Officer, 2300 Clarendon Boulevard, Suite 1300, Arlington, VA 22201;

(2) Send an e-mail request to foia@nwtrb.gov and specify that this is a FOIA request in the subject line; or

(3) Fax: 703-235-4495.

Nuclear Waste Technical Review Board

§ 1303.106

(b) When making a request for records about a person, Privacy Act regulations also may apply. Please check the regulations for additional requirements before submitting a request. When making a request for records about someone other than yourself, you must include either:

(1) Written authorization signed by the person permitting you to see the records; or

(2) Proof that the individual is deceased (e.g., a death certificate or an obituary).

(c) A request will be considered received for purposes of §1303.107 on the date that it is received by the Board's FOIA office. For prompt handling, write "Freedom of Information Act Request" on the letter and envelope or in the subject line of the Web request or fax.

(d) Each request must clearly describe the desired records in sufficient detail to enable Board personnel to locate them with reasonable effort. Response to requests may be delayed if the records are not clearly described.

(e) Whenever possible, requests should include specific information about each record sought, such as date, title or name, author, recipient, and subject.

(f) If the FOIA Officer determines that the request does not clearly describe the records sought, he or she will either advise you of the additional needed to locate the record or otherwise state why the request is insufficient. The requestor will then be given the opportunity to provide additional information or to modify their request.

(g) Submitting a FOIA request shall be considered a commitment by the requestor to pay all applicable fees required under §1303.108 unless the requestor seeks a waiver of fees. When making a request, you may specify a willingness to pay fees up to a specific amount.

(h) The FOIA does not require the Board to:

(1) Compile or create records solely for the purpose of satisfying a request for records.

(2) Provide records not yet in existence, even if such records may be expected to come into existence at some time in the future.

(3) Restore records destroyed or otherwise disposed of, except that the FOIA Officer must notify the requestor that the records have been destroyed or otherwise disposed of.

§1303.106 Responsibility, form, and content of responses.

The Board's Executive Director or his/her designated FOIA Officer is authorized to grant or deny any request for a record and determine appropriate fees. When determining which records are responsive to a request, the Board will include only records in its possession as of the date of the search.

(a) If no records are responsive to the request, the FOIA Officer will notify the requestor in writing.

(b) When a FOIA Officer denies a request in whole or in part he/she will notify the requestor in writing. The response will be signed by the FOIA Officer and will include:

(1) The name and title or position of the person making the denial;

(2) A brief statement of the reasons for the denial, including the FOIA exemption(s) that the FOIA Officer has relied on the denying the request; and

(3) A statement that the denial may be appealed under §1303.114 and a description of the requirements of that section.

(c) *Consultations and referrals.* When a request for a record not produced by the Board is received, the Board shall refer the requestor to the issuing agency in writing. The Board may hold records that contain or refer to non-public information obtained from other federal agencies (co-mingled records). If those co-mingled records are requested, the Board shall determine whether the portion of those records produced by the Board can be released. Before any portion of a co-mingled record is released, the Board shall redact the non-public information obtained from other federal agencies. The Board shall inform the requestor of the reason for the redaction and shall refer the requestor to the issuing agency in writing.

(d) *Notice of referral.* When the Board refers all or part of a request to another agency, it shall give the requestor the address of the agency contact and the section(s) referred.

§ 1303.107

10 CFR Ch. XIII (1-1-16 Edition)

(e) *Timing of responses to requests sent to other agencies.* The Board shall provide, within the FOIA deadline, responses only to those parts of the request not referred. Requests will be referred to other agencies and the requestor notified as soon as it is determined that a referral is appropriate.

(f) *Agreements on consultations and referrals.* The Board may make agreements with other agencies to eliminate the need for consultations or referrals for particular types of records.

§ 1303.107 Timing of responses to requests.

(a) *General.* The Board shall normally respond to requests in the order of their receipt.

(b) *Acknowledgement of requests.* On receipt of a request, the Board shall send an acknowledgment letter or an e-mail confirming the requestor's agreement to pay fees under § 1303.108 and providing a request number for further reference.

(c) *Granting requests.* The Board shall have 20 business days from when a request is received to determine whether to grant or deny it. Once the Board determines whether it can grant a request entirely or in part, it shall notify the requestor in writing. The Board shall advise the requestor of any fees to be charged under § 1303.108 and shall disclose records promptly on payment of the fees. Records disclosed in part shall be marked or annotated to show the amount of information deleted unless doing so would harm an interest protected by an applicable exemption. The location of the information deleted also shall be indicated on the record when technically feasible.

(d) *Unusual circumstances:*

(1) If the statutory time limits for processing a request cannot be met because of "usual circumstances" as defined in the FOIA, the Board shall promptly notify the requestor in writing, explaining the circumstances and giving the date by which the request can be completed or if the Board cannot complete the request. If the extension is for more than 10 working days, the Board shall provide the requestor with an opportunity either to:

(i) Modify the request so that it can be processed within the time limits; or

(ii) Arrange an alternative time period for processing the original request.

(2) If the Board believes that multiple requests submitted by a requestor or by requestors acting in concert constitute a single request that would otherwise involve unusual circumstances, and if the requests involve clearly related matters, they may be aggregated. Multiple requests involving unrelated matters will not be aggregated.

(e) *Expedited processing:*

(1) Requests and appeals shall be taken out of order and given expedited processing whenever it is determined that they involve:

(i) Circumstances that could reasonably be expected to pose an imminent threat to the life or physical safety of an individual; or

(ii) An urgency to inform the public about an actual or alleged activity if made by a person primarily engaged in disseminating information.

(2) Requests for expedited processing may be made either at the time of the initial request or at a later time.

(3) Requests for expedited processing must include a statement explaining in detail the basis for requesting expedited processing. For example, a requestor under § 1303.108 must demonstrate that their professional activity involves news reporting or otherwise disseminating information to the public, although this need not be their sole occupation. A requestor also must establish a particular urgency to inform the public about government activity involved in the request, beyond the public's right to know about government activity generally.

(4) Within 10 calendar days of receipt of a request for expedited processing, the Board shall decide whether to grant the request and notify the requestor of its decision. If a request for expedited treatment is granted, the request shall be processed as soon as practicable. If a request for expedited processing is denied, an appeal of that decision shall be acted on expeditiously.

§ 1303.108 Fees.

(a) *General.* The Board shall charge for processing requests the FOIA in accordance with paragraph (c) of this section, except where fees are limited

Nuclear Waste Technical Review Board

§ 1303.108

under § 1303.109 or where a waiver or reduction of fees is granted under § 1303.111. Fees must be paid before the copies of records are sent. Fees may be paid by check or money order payable to the Treasury of the United States.

(b) Definitions for this section:

(1) Commercial use request—A request from, or on behalf of, a person who seeks information for a purpose that furthers their commercial, trade, or profit interests including furthering those interests through litigation. The Board shall try to determine the use to which a record will be put. When the Board believes that a request is for commercial use either because of the nature of the request or because the Board has cause to doubt the stated use, the Board shall ask the requestor for clarification.

(2) Direct costs—Expenses that the Board incurs in searching for, duplicating, and, for some requests, reviewing records in response to a FOIA. Direct costs include the full salary of the employee performing the work and the cost of duplication of the records. Overhead expenses, such as the costs of space, heating, and lighting, are not included.

(3) Duplication—Making a copy of a record or the information in the record, to respond to a FOIA. Copies can be in paper, microform, electronic, or other format. The Board shall honor a requestor's preference for format if the record is readily reproducible in that format at a reasonable cost.

(4) Educational institution—A public or private school, an undergraduate, graduate, professional or vocational school, that has a program of scholarly research. For a request to be in this category, a requestor must show that the request is authorized by and made under the auspices of the qualifying institution and that the records will be used for scholarly research.

(5) Noncommercial scientific institution—An institution that is not operated on a commercial basis, as defined in paragraph (b)(1) of this section and is operated solely for conducting scientific research that does not promote any particular product or industry. For a request to be in this category, the requestor must show that the request is authorized by and made under the aus-

pices of the qualifying institution and that the records will be used to further scientific research.

(6) Representative of the news media—Any person actively reporting for an entity that provides news to the public. The term "news" means information about current events or of current interest to the public. Examples include: Television and radio stations broadcasting to the public; and publishers of periodicals who make their news products available to the general public. For freelance journalists to be regarded as working for a news organization, they must demonstrate a solid basis for expecting publication through that organization. The Board may use a publication contract or past publication records to make their determination. The requestor must not be seeking records for a commercial use; however, a request solely supporting the news-dissemination function is not considered a commercial use.

(7) Review—Examining a record to determine whether any part of it is exempt from disclosure, and processing a record for disclosure. Review costs are recoverable even if a record is to disclosed. Review time includes time spent considering any formal objection to disclosure made by a business submitter under paragraph (c)(3) of this section but does not include time spent resolving general legal or policy issues regarding the application of exemptions.

(8) Search—The process of looking for and retrieving records, including page-by-page or line-by-line identification of information within records and reasonable efforts to locate and retrieve information from records maintained in electronic form. The Board shall ensure that searches are done in the most efficient and least expensive way that is reasonably possible.

(c) Fees. In responding to FOIA requests, the Board shall charge the following fees unless a waiver or a reduction of fees has been granted under § 1303.111:

(1) Search (i) Search fees shall be charged for all requests subject to the limitations of § 1303.109. The Board may charge for time spent searching even if no responsive record is located, or if

§ 1303.109

10 CFR Ch. XIII (1-1-16 Edition)

the record(s) located are withheld as exempt from disclosure.

(ii) For each quarter hour spent by clerical personnel in searching for and retrieving a requested record, the fee will be \$5. If a search and retrieval requires the use of professional personnel the fee will be \$8 for each quarter hour. If the time of managerial personnel is required, the fee will be \$10 for each quarter hour.

(iii) For computer searches of records, requestors will be charged the direct costs of conducting the search, although certain requestors (see §1303.109(a)) will be charged no search fee and certain other requestors (see §1303.109(b)) will be entitled to two hours of manual search time without charge. Direct costs include the cost of operating a computer for the search time for requested records and the operator salary for the search.

(2) *Duplication.* Duplication fees for paper copies of a record will be 10 cents per page for black and white and 20 cents per page for color. For all other forms of duplication, the Board shall charge the direct costs of producing the copy. All charges are subject to the limitations of §1303.109 and §1303.111.

(3) *Review.* When a commercial use request is made, review fees shall be charged as stated in paragraph (c)(1) of this section. These fees apply only to the initial record review, when the Board determines whether an exemption applies to a particular record. Charges shall not be imposed for review at the administrative appeal level if an exemption is applied. However, records withheld under an exemption that is subsequently determined not to apply may be reviewed again to determine whether any other exemption not previously considered applies. The cost of that review shall be charged. All review fees shall be charged at the same rates as those charged in paragraph (c)(1) of this section.

§1303.109 Restrictions on charging fees.

(a) When determining search or review fees:

(1) No search or review fee shall be charged for requests by educational institutions, noncommercial scientific

institutions, and representatives of the news media.

(2) The Board shall provide without charge, to all but commercial users.

(i) The first 100 pages of black and white duplication (or the cost equivalent); and

(ii) The first two hours of search by a clerical staff member (or the cost equivalent).

(3) When the total fee for a request will be \$14.00 or less for any request, no fee shall be charged.

(b) The Provisions of paragraphs (a)(2) and (a)(3) of this section work together. All requestors seeking records for a non-commercial use shall not be charged unless the total cost for the request exceeds by more than \$14.00, the cost of a two hour clerical search, plus the cost of duplication over the 100 page exemption.

§ 1303.110 Notice of anticipated fees.

(a) *General.* The Board shall advise the requestor in writing of any applicable fees. If only a part of the fee can be estimated readily, the Board shall advise the requestor that this may be only a part of the total fee. After the requestor has been sent a fee estimate, the request shall not be considered received until the requestor makes a firm commitment to pay the anticipated total fee. Any such agreement must be made by the requestor in writing and must be received within 60 days of the Board's notice. If the requestor does not provide a firm commitment to pay the anticipated fee within 60 days of the notice, the request shall be closed. The requestor may be given an opportunity to work with the Board to change the requests and lower the cost.

(b) *Charges for other services.* When the Board chooses as a matter of administrative discretion to provide a special service, such as certifying that records are true copies or sending them by other than ordinary mail, the Board shall pay the costs of providing the service unless previous arrangements have been made with the requestor.

(c) *Charging interest.* The Board may charge interest on any unpaid bill starting on the 31st day following the date of billing. Interest charges shall be assessed at the rate provided in 31 U.S.C. 3717 and shall accrue from the

date of the billing until payment is received by the Board. The Board shall follow the provisions of the Debt Collection Act of 1982 (Pub. L. 97-365, 96 Stat. 1749), as amended.

(d) *Aggregating requests.* If the Board reasonably believes that a requestor or a group of requestors acting together is trying to divide a request into a series of smaller requests for the purpose of avoiding fees, the Board may aggregate the requests and charge accordingly. The Board shall assume that multiple requests of the same type made within a 30-day period have been made in order to avoid fees. If requests are separated by a longer period, the Board shall aggregate them only if there is a solid basis for determining that aggregation is warranted. Multiple requests involving unrelated matters shall not be aggregated.

(e) *Advance payments.* Where a requestor has previously failed to pay promptly a properly charged FOIA fee to the Board or another agency, the Board shall require proof that full payment has been made to that agency before it begins to process that requestor's FOIA. The Board shall also require advance payment of the full amount of the anticipated fee. When advance payment is required, the request is not considered received until payment has been made.

§ 1303.111 Requirements for waiver or reduction of fees.

(a) Records shall be furnished without charge or at a reduced charge if the Board determined that:

(1) Disclosure is in the public interest and the information is likely to contribute significantly to public understanding of the activities of the government; and

(2) Disclosure is not primarily in the commercial interest of the requestor.

(b) In determining whether the first requirement is met, the Board shall consider:

(1) Subject: Do the requested records concern identifiable activities of the federal government?

(2) Informative value: Will the disclosure contribute to an understanding of government activities? Do records contain information on activities "likely to contribute" to an increased public

understanding? If the information or similar information is already in the public domain, the record(s) would not increase the public's understanding.

(3) Would the disclosure contribute to the understanding of a reasonably broad audience, as opposed to the individual understanding of the requestor? A requestor's expertise in the subject and intention to convey information to the public shall be considered. Being a valid representative of the news media shall satisfy this consideration.

(4) Is the disclosure likely to contribute significantly to public understanding of government activities? The level of understanding after the disclosure versus that before the disclosure must be enhanced to a significant extent. However, the Board shall not make value judgments about whether information contributing to public understanding of government activities is important enough to release.

(c) In determining whether the second requirement is met, the Board shall consider:

(1) The existence and extent of the commercial interest: Would a commercial interest be substantially furthered by the disclosure? The Board shall consider the commercial interest (see paragraph (a)(2) of this section) of either the requestor or of any person on whose behalf they may be acting that would be furthered by the disclosure. During the administrative process, requestors shall be given an opportunity to provide additional information about this concern.

(2) The primary interest for disclosure: Whether the commercial interest of the requestor is sufficiently large in comparison to the public interest, that disclosure is "primarily in the commercial interest of the requestor." A fee waiver is justified if the public interest standard under paragraph (b) of this section is satisfied and if that public interest is greater than any commercial interest. The Board shall presume that when news media requestors satisfy this standard, primarily the public interest is served.

(d) If only some of the records to be released satisfy the requirements for a waiver of fees, a waiver shall be granted only for those records.

§ 1303.112

(e) Requests for a waiver or a reduction of fees must address the factors listed in paragraphs (a) and (b) of this section only as they apply to each request. The Board also shall consider their administrative resources when responding to requests and may negotiate with the requestor to find the best way to optimize their resources in responding to the request when deciding whether to grant waivers or reductions of fees.

§ 1303.112 Denials.

(a) When denying a request in any respect, the Board shall notify the requestor of that determination in writing. The types of denials include:

(1) Denials of requests, consisting of a determination:

(i) To withhold any requested record in whole or in part;

(ii) That a requested record does not exist or cannot be located;

(iii) That a record is not readily reproducible in the form or format sought;

(iv) That what has been requested is not a record subject to the FOIA; and

(v) That the material requested is not a Board record (e.g., material produced by another agency or organization).

(2) A determination on any disputed fee matter, including a denial of a request for a fee waiver.

(3) A denial of a request for expedited processing.

(b) The denial letter shall be signed by the Director of Administration, the Deputy Director, or their designee, and shall include all of the following:

(1) The name and title of the person responsible for the denial.

(2) A brief statement of the reason(s) for the denial, including any FOIA exemptions applied in denying the request.

(3) An estimate of the volume of records withheld, in number of pages or in some other reasonable form of estimation. This estimate does not need to be provided if it would harm an interest protected by an applicable exemption.

(4) A statement that the denial may be appealed under §1303.114 and a description of the requirements of §1303.114.

10 CFR Ch. XIII (1-1-16 Edition)

§ 1303.113 Business information.

(a) *In general.* Business information obtained by the Board from a submitter shall be disclosed under the FOIA only under this section.

(b) *Definitions.* For purposes of this section:

(1) Business information—commercial or financial records obtained by the Board that may be protected from disclosure under Exemption 4 of the Freedom of Information Act (FOIA).

(2) Submitter—any person or entity from which the Board obtains business records, either directly or indirectly. The term includes, but is not limited to, corporations, and state, local, tribal, and foreign governments.

(c) *Designation of business information.* Submitters of business information shall designate any part of the record considered to be protected from disclosure under Exemption 4 of the FOIA by appropriately marking the material. This may be done either at the time the record is submitted or at a reasonable time thereafter. This designation lasts for 10 years after submittal unless the submitter requests and provides justification for a longer period.

(d) *Notice to submitters.* The Board shall provide a business submitter with prompt written notice of any FOIA request or appeal that seeks its business information under paragraph (e) of this section, except as provided in paragraph (h) of this section, to give the submitter an opportunity to object to that disclosure under paragraph (f) of this section. The notice shall either describe the records requested or include copies of the records.

(e) *Required notice.* Notice shall be given to a submitter when:

(1) The submitter has designated that the information is considered protected from disclosure under Exemption 4 of the FOIA; or

(2) The Board has reason to believe that the information may be protected from disclosure under Exemption 4 of the FOIA.

(f)(1) *Objecting to disclosure.* A submitter shall have 30 days to respond to the notice described in paragraph (d) of this section. If a submitter has an objection to disclosure, they are required to submit a detailed written statement including:

Nuclear Waste Technical Review Board

§ 1303.114

(i) All grounds for withholding any of the information under any exemption of the FOIA, and

(ii) In the case of Exemption 4, the reason why the information is a trade secret, commercial, or financial information that is privileged or confidential.

(2) If a submitter fails to respond to the notice in paragraph (d) of the section within 30 days, the Board shall assume that the submitter has no objection to disclosure. The Board shall not consider information not received by the Board until after a disclosure decision has been made. Information provided by a submitter under this paragraph might itself be subject to disclosure under the FOIA.

(g) *Notice of intent to disclose.* The Board shall consider a submitter's objections and specific grounds for non-disclosure in deciding whether to disclose the business records. Whenever the Board decides to disclose business records over the objection of a submitter, it shall give the submitter written notice, that will include:

(1) A statement of the reason(s) the submitter's objections were not sustained;

(2) A description of the business records to be disclosed; and

(3) A specified disclosure date at a reasonable time subsequent to the notice.

(h) *Exceptions to notice requirements.* The notice requirements in paragraphs (d) and (g) of this section shall not apply if:

(1) The Board determines that the information should not be disclosed;

(2) The information has been published legally or has been officially made available to the public;

(3) Disclosure of the information is required by another statute or by a regulation issued in accordance with Executive Order 12600 (3 CFR, 1988 Comp., p. 235); or

(4) The objection made by the submitter under paragraph (f) of this section appears frivolous. In such a case, the Board shall promptly notify the submitter of its decision using the guidelines in paragraph (g) of this section.

(i) *Notice of FOIA lawsuit.* When a requestor files a lawsuit seeking to com-

pel the disclosure of business information, the Board shall promptly notify the submitter.

(j) *Corresponding notice to requestors.* When the Board provides a submitter with either notice and an opportunity to object to disclosure under paragraph (d) of this section or with its intent to disclose requested information under paragraph (g) of this section, the Board also shall notify the requestor(s). When a submitter files a lawsuit seeking to prevent the disclosure of business information, the Board shall notify the requestor(s).

§ 1303.114 Appeals.

(a)(1) *Appeals of adverse determinations.* If you are dissatisfied with the Board's response to your request, you may appeal to the Board's Executive Director:

(i) By mail to: U.S. Nuclear Waste Technical Review Board, 2300 Clarendon Boulevard, Suite 1300, Arlington, VA 22201;

(ii) By e-mail to: foia@nwturb.gov specifying that this is a FOIA request in the subject line; or

(iii) By fax to: 703-235-4495.

(2) The appeal must be in writing and must be received within 30 days of the date of the Board's response. The appeal letter, e-mail, or fax may include as much or as little related information as you wish, as long as it clearly identifies the Board determination that you are appealing, including the assigned request number, if known. For prompt handling, please mark your appeal "Freedom of Information Act Appeal."

(b) *Responses to appeals.* Requestors shall be notified in writing of the decision on the appeal. A decision affirming an adverse determination shall include a statement of the reason(s) for the affirmation, including any FOIA exemption(s) applied, and shall include the FOIA provisions for court review of the decision. If the adverse determination is reversed or modified on appeal, the request shall be reprocessed in accordance with that appeal decision.

(c) *When appeal is required.* If a review by a court or any adverse determination is desired, the determination must first be appealed under this section.

§ 1303.115

10 CFR Ch. XIII (1-1-16 Edition)

(d) *Denial of appeal.* An adverse determination by the Executive Director shall be the final action of the Board.

(e) *Unacceptable appeals.* An appeal will not be acted on if the request becomes a matter of FOIA litigation.

§ 1303.115 Preservation of records.

The Board shall preserve all correspondence pertaining to the requests that it receives under this part, as well as copies of all requested records, until disposition or destruction is authorized by title 44 of the United States Code or the National Archives and Records Administration's General Records Schedule 14. Records will not be disposed of while they are the subject of a pending request, appeal, or lawsuit.

§ 1303.116 Other rights and services.

Nothing in this part shall be construed to entitle any person, as a right, to any service or to the disclosure of any record to which such person is not entitled under the FOIA.

AUTHORITY: 5 U.S.C. 552a(f).

SOURCE: 72 FR 8879, Feb. 28, 2007, unless otherwise noted.

§ 1304.101 Purpose and scope.

This part sets forth the policies and procedures of the U.S. Nuclear Waste Technical Review Board (Board) regarding access to systems of records maintained by the Board under the Pri-

vacancy Act of 1974, Public Law 93-579, 5 U.S.C. 552a. The provisions in the Act shall take precedence over any part of the Board's regulations in conflict with the Act. These regulations establish procedures by which an individual may exercise the rights granted by the Privacy Act to determine whether a Board system contains a record pertaining to him or her; to gain access to such records; and to request correction or amendment of such records. These regulations also set identification requirements and prescribe fees to be charged for copying records.

§ 1304.102 Definitions.

The terms used in these regulations are defined in the Privacy Act of 1974, 5 U.S.C. 552a. In addition, as used in this part:

(a) *Agency* means any executive department, military department, government corporation, or other establishment in this executive branch of the Federal Government, including the Executive Office of the President or any independent regulatory agency;

(b) *Individual* means any citizen of the United States or an alien lawfully admitted for permanent residence;

(c) *Maintain* means to collect, use, store, or disseminate records as well as any combination of these record-keeping functions. The term also includes exercise of control over, and therefore responsibility and accountability for, systems of records;

(d) *Record* means any item, collection, or grouping of information about an individual that is maintained by the Board and contains the individual's name or other identifying information, such as a number or symbol assigned to the individual or his or her fingerprint, voice print, or photograph. The term includes, but is not limited to, information regarding an individual's education, financial transactions, medical history, and criminal or employment history;

(e) *System of records* means a group of records under the control of the Board from which information is retrievable by use of the name of the individual or by some number, symbol, or other identifying particular assigned to the individual;

Nuclear Waste Technical Review Board

§ 1304.105

(f) *Routine use* means, with respect to the disclosure of a record, the use of a record for a purpose that is compatible with the purpose for which it was collected;

(g) *Designated Privacy Act Officer* means the person named by the board to administer the Board's activities in regard to the regulations in this part. The Privacy Act Officer also shall be the following:

(1) The Board officer having custody of, or responsibility for, agency records in the possession of the Board.

(2) The Board officer having responsibility for authorizing or denying production of records from requests filed under the Privacy Act.

(h) *Executive Director* means the chief operating officer of the Board;

(i) *Member* means an individual appointed to serve on the Board by the President of the United States;

(j) *Days* means standard working days, excluding weekends and federal holidays; and

(k) *Act* refers to the Privacy Act of 1974.

§ 1304.103 Privacy Act inquiries.

(a) *Requests regarding the contents of record systems.* Any person wanting to know whether the Board's systems of records contains a record pertaining to him or her may file a request in person or in writing, via the internet, or by telephone.

(b) *Requests in persons* may be submitted at the Board's headquarters located at 2300 Clarendon Blvd., Suite 1300; Arlington, VA. Requests should be marked "Privacy Act Request" on each page of the request and on the front of the envelope and directed to the Privacy Act Officer.

(c) *Requests in writing* may be sent to: Privacy Act Officer, U.S. Nuclear Waste Technical Review Board, 2300 Clarendon Blvd., Suite 1300, Arlington, VA 22201. "Privacy Act Request" should be written on the envelope and each page of the request.

(d) *Requests via the internet* may be made on the Board's Web site at www.nwtrb.gov, using the "Contact NWTRB" icon on the bottom of the Home page. The words "Privacy Act" should appear on the subject line.

(e) *Telephone requests* may be made by calling the Board's Privacy Act Officer at 703-235-4473.

§ 1304.104 Privacy Act records maintained by the Board.

(a) The Board shall maintain only such information about an individual as is relevant and necessary to accomplish a purpose of the agency required by statute or by Executive Order of the President. In addition, the Board shall maintain all records that are used in making determinations about any individual with such accuracy, relevance, timeliness, and completeness as is reasonably necessary to ensure fairness to that individual in the making of any determination about him or her. However, the Board shall not be required to update retired records.

(b) The Board shall not maintain any record about any individual with respect to or describing how such individual exercises rights guaranteed by the First Amendment of the Constitution of the United States, unless expressly authorized by statute or by the subject individual, or unless pertinent to and within the scope of an authorized law enforcement activity.

§ 1304.105 Requests for access to records.

(a) All requests for records should include the following information:

(1) Full name, address, and telephone number of requester.

(2) The system of records containing the desired information.

(3) Any other information that the requester believes would help locate the record.

(b) *Requests in writing.* A person may request access to his or her own records in writing by addressing a letter to: Privacy Act Officer; U.S. Nuclear Waste Technical Review Board; 2300 Clarendon Blvd., Suite 1300; Arlington, VA 22201.

(c) *Requests via the internet.* Internet requests should be transmitted through the Board's Web site at www.nwtrb.gov, using the "Contact NWTRB" icon on the bottom of the main page. The words "Privacy Act" should appear on the subject line.

(d) *Requests in person.* Any person may examine and request copies of his

§ 1304.106

or her own records on the Board's premises. The requester should contact the Board's offices at least one week before the desired appointment date. This request may be made to the Privacy Act Officer in writing, via the Internet, or by calling 703-235-4473.

(e) Before viewing the records, proof of identification, must be provided. The identification should be a valid copy of one of the following:

A government ID,

A driver's license,

A passport, or

Other current identification that contains both an address and a picture of the requester.

§ 1304.106 Processing of requests.

Upon receipt of a request for information, the Privacy Act Officer will ascertain:

Whether the records identified by the requester exist, and

Whether they are subject to any exemption under §1304.115. If the records exist and are not subject to exemption, the Privacy Officer will provide the information.

(a) *Requests in writing, including those sent by e-mail, via the Web site, or by Fax.* Within five working days of receiving the requests the Privacy Act Officer will acknowledge its receipt and will advise the requester of any additional information that may be needed. Within 15 working days of receiving the request, the Privacy Act Officer will send the requested information or will explain to the requester why additional time is needed for a response.

(b) *Requests in person or by telephone.* Within 15 days of the initial request, the Privacy Act Officer will contact the requestor and arrange an appointment at a mutually agreeable time when the records can be examined. The requester may be accompanied by one person. The requestor should inform the Privacy Act Officer that a second individual will be present and must sign a statement authorizing disclosure of the records to that person. The statement will be kept with the requester's records. At the appointment, the requester will be asked to present identification as stated in § 1304.105.

(c) *Excluded information.* If a request is received for information compiled in

10 CFR Ch. XIII (1-1-16 Edition)

reasonable anticipation of litigation, the Privacy Officer will inform the requester that the information is not subject to release under the Privacy Act (*see* 5 U.S.C. 552a(d)(5)).

§ 1304.107 Fees.

A fee will not be charged for searching, reviewing, or making corrections to records. A fee for copying will be assessed at the same rate established for Freedom of Information Act requests. Duplication fees for paper copies of a record will be 10 cents per page for black and white and 20 cents per page for color. For all other forms of duplication, the Board will charge the direct costs of producing the copy. However, the first 100 pages of black-and-white copying or its equivalent will be free of charge.

§ 1304.108 Appealing denials of access.

If access to records is denied by the Privacy Act Officer, the requester may file an appeal in writing. The appeal should be directed to Executive Director; U.S. Technical Review Board; 2300 Clarendon Blvd., Suite 1300; Arlington, VA 22201. The appeal letter must:

Specify the denied records that are still sought; and

State why denial by the Privacy Act Officer is erroneous.

The Executive Director or his or her designee will respond to such appeals within 20 working days of the receipt of the appeal letter in the Board offices. The appeal determination will explain the basis of the decision to deny or grant the appeal.

§ 1304.109 Requests for correction of records.

(a) *Correction requests.* Any person is entitled to request correction of his or her record(s) covered under the Act. The request must be made in writing and should be addressed to Privacy Act Officer; U.S. Nuclear Waste Technical Review Board; 2300 Clarendon Blvd., Suite 1300; Arlington, VA 22201. The letter should clearly identify the corrections desired. In most circumstances, an edited copy of the record will be acceptable for this purpose.

(b) *Initial response.* Receipt of a correction request will be acknowledged

Nuclear Waste Technical Review Board

§ 1304.110

by the Privacy Act Officer in writing within 5 working days. The Privacy Act Officer will endeavor to provide a letter to the requester within 20 working days stating whether the request for correction has been granted or denied. If the Privacy Act Officer denies any part of the correction request, the reasons for the denial will be provided to the requester.

§ 1304.110 Disclosure of records to third parties.

(a) The Board will not disclose any record that is contained in a system of records to any person or agency, except with a written request by or with the prior written consent of the individual whose record is requested, unless disclosure of the record is:

(1) Required by an employee or agent of the Board in the performance of his/her official duties.

(2) Required under the provisions of the Freedom of Information Act (5 U.S.C. 552). Records required to be made available by the Freedom of Information Act will be released in response to a request in accordance with the Board's regulations published at 10 CFR part 1303.

(3) For a routine use as published in the annual notice in the FEDERAL REGISTER.

(4) To the Census Bureau for planning or carrying out a census, survey, or related activities pursuant to the provisions of Title 13 of the United States Code.

(5) To a recipient who has provided the Board with adequate advance written assurance that the record will be used solely as a statistical research or reporting record and that the record is to be transferred in a form that is not individually identifiable.

(6) To the National Archives and Records Administration as a record that has sufficient historical or other value to warrant its continued preservation by the United States government, or for evaluation by the Archivist of the United States, or his or her designee, to determine whether the record has such value.

(7) To another agency or to an instrumentality of any governmental jurisdiction within or under the control of the United States for a civil or crimi-

nal law enforcement activity, if the activity is authorized by law, and if the head of the agency or instrumentality has made a written request to the Board for such records specifying the particular part desired and the law enforcement activity for which the record is sought. The Board also may disclose such a record to a law enforcement agency on its own initiative in situations in which criminal conduct is suspected, provided that such disclosure has been established as a routine use, or in situations in which the misconduct is directly related to the purpose for which the record is maintained.

(8) To a person pursuant to a showing of compelling circumstances affecting the health or safety of an individual if, upon such disclosure, notification is transmitted to the last known address of such individual.

(9) To either House of Congress, or, to the extent of matters within its jurisdiction, any committee or subcommittee thereof, any joint committee of Congress, or subcommittee of any such joint committee.

(10) To the Comptroller General, or any of his or her authorized representatives, in the course of the performance of official duties of the Government Accountability Office.

(11) Pursuant to an order of a court of competent jurisdiction. In the event that any record is disclosed under such compulsory legal process, the Board shall make reasonable efforts to notify the subject individual after the process becomes a matter of public record.

(12) To a consumer reporting agency in accordance with 31 U.S.C. 3711(e).

(b) Before disseminating any record about any individual to any person other than a Board employee, the Board shall make reasonable efforts to ensure that the records are, or at the time they were collected were, accurate, complete, timely, and relevant. This paragraph (b) does not apply to disseminations made pursuant to the provisions of the Freedom of Information Act (5 U.S.C. 552) and paragraph (a)(2) of this section.

§ 1304.111

10 CFR Ch. XIII (1-1-16 Edition)

§ 1304.111 Maintaining records of disclosures.

(a) The Board shall maintain a log containing the date, nature, and purpose of each disclosure of a record to any person or agency. Such accounting also shall contain the name and address of the person or agency to whom or to which each disclosure was made. This log will not include disclosures made to Board employees or agents in the course of their official duties or pursuant to the provisions of the Freedom of Information Act (5 U.S.C. 552).

(b) The Board shall retain the accounting of each disclosure for at least five years after the accounting is made or for the life of the record that was disclosed, whichever is longer.

(c) The Board shall make the accounting of disclosures of a record pertaining to an individual available to that individual at his or her request. Such a request should be made in accordance with the procedures set forth in § 1304.105. This paragraph (c) does not apply to disclosures made for law enforcement purposes under 5 U.S.C. 552a(b)(7) and § 1304.110(a)(7).

§ 1304.112 Notification of systems of Privacy Act records.

(a) *Public notice.* On November 22, 1996, the Board published a notice of its systems of records in the FEDERAL REGISTER (Vol. 61, Number 227, pages 59472-69473). It is updating and republishing the notice in this issue of the FEDERAL REGISTER. The Board periodically reviews its systems of records and will publish information about any significant additions or changes to those systems. Information about systems of records maintained by other agencies that are in the temporary custody of the Board will not be published. In addition, the Office of the Federal Register biennially compiles and publishes all systems of records maintained by all federal agencies, including the Board.

(b) At least 30 days before publishing additions or changes to the Board's systems of records, the Board will publish a notice of intent to amend, providing the public with an opportunity to comment on the proposed amendments to its systems of records.

§ 1304.113 Privacy Act training.

(a) The Board shall ensure that all persons involved in the design, development, operation, or maintenance of any Board systems are informed of all requirements necessary to protect the privacy of individuals. The Board shall ensure that all employees having access to records receive adequate training in their protection and that records have adequate and proper storage with sufficient security to ensure their privacy.

(b) All employees shall be informed of the civil remedies provided under 5 U.S.C. 552a(g)(1) and other implications of the Privacy Act and of the fact that the Board may be subject to civil remedies for failure to comply with the provisions of the Privacy Act and the regulations in this part.

§ 1304.114 Responsibility for maintaining adequate safeguards.

The Board has the responsibility for maintaining adequate technical, physical, and security safeguards to prevent unauthorized disclosure or destruction of manual and automatic record systems. These security safeguards shall apply to all systems in which identified personal data are processed or maintained, including all reports and output from such systems that contain identifiable personal information. Such safeguards must be sufficient to prevent negligent, accidental, or unintentional disclosure, modification, or destruction of any personal records or data; must minimize; to the extent practicable, the risk that skilled technicians or knowledgeable persons could improperly obtain access to modify or destroy such records or data; and shall further ensure against such casual entry by unskilled persons without official reasons for access to such records or data.

(a) *Manual systems.* (1) Records contained in a system of records as defined in this part may be used, held, or stored only where facilities are adequate to prevent unauthorized access by persons within or outside the Board.

(2) Access to and use of a system of records shall be permitted only to persons whose duties require such access to the information for routine uses or for such other uses as may be provided in this part.

Nuclear Waste Technical Review Board

§ 1304.116

(3) Other than for access by employees or agents of the Board, access to records within a system of records shall be permitted only to the individual to whom the record pertains or upon his or her written request.

(4) The Board shall ensure that all persons whose duties require access to and use of records contained in a system of records are adequately trained to protect the security and privacy of such records.

(5) The disposal and destruction of identifiable personal data records shall be done by shredding and in accordance with rules promulgated by the Archivist of the United States.

(b) *Automated systems.* (1) Identifiable personal information may be processed, stored, or maintained by automated data systems only where facilities or conditions are adequate to prevent unauthorized access to such systems in any form.

(2) Access to and use of identifiable personal data associated with automated data systems shall be limited to those persons whose duties require such access. Proper control of personal data in any form associated with automated data systems shall be maintained at all times, including maintenance of accountability records show-

ing disposition of input and output documents.

(3) All persons whose duties require access to processing and maintenance of identifiable personal data and automated systems shall be adequately trained in the security and privacy of personal data.

(4) The disposal and disposition of identifiable personal data and automated systems shall be done by shredding, burning, or, in the case of electronic records, by degaussing or by overwriting with the appropriate security software, in accordance with regulations of the Archivist of the United States or other appropriate authority.

§ 1304.115 Systems of records covered by exemptions.

The Board currently has no exempt systems of records.

§ 1304.116 Mailing lists.

The Board shall not sell or rent an individual's name and/or address unless such action is specifically authorized by law. This section shall not be construed to require the withholding of names and addresses otherwise permitted to be made public.

§ 1703.101 Scope.

This part contains the Board's regulations implementing the Freedom of Information Act, 5 U.S.C. 552.

§ 1703.102 Definitions; words denoting number, gender and tense.

Agency record is a record in the possession and control of the Board that is associated with Board business. Agency records do not include records such as:

(1) Publicly available books, periodicals, or other publications that are owned or copyrighted by non-federal sources;

(2) Records solely in the possession and control of Board contractors;

(3) Personal records in the possession of Board personnel that have not been circulated, were not required by the Board to be created or retained, and may be retained or discarded at the author's sole discretion. In determining whether such records are agency records the Board shall consider whether, and to what extent, the records were used in agency business;

(4) Records of a personal nature that are not associated with any Board business; or

(5) Non-substantive information in the calendar or schedule books of the Chairman or Members, uncirculated except for typing or recording purposes.

Board means the Defense Nuclear Facilities Safety Board.

Chairman means the Chairman of the Board.

Designated FOIA Officer means the person designated by the Board to administer the Board's activities pursuant to the regulations in this part. The Designated FOIA Officer shall also be the Board officer having custody of or responsibility for agency records in the possession of the Board and shall be the Board officer responsible for authorizing or denying production of records upon requests filed pursuant to § 1703.105.

General Counsel means the chief legal officer of the Board.

General Manager means the chief administrative officer of the Board.

Member means a Member of the Board.

In determining the meaning of any provision of this part, unless the context indicates otherwise: the singular includes the plural; the plural includes the singular; the present tense includes the future tense; and words of one gender include the other gender.

§ 1703.103 Requests for board records available through the public reading room.

(a) A Public Reading Room will be maintained at the Board's headquarters and will be open between 8:30 a.m. and 4:30 p.m. Mondays through Fridays, with the exception of legal holidays. Documents may be obtained in person or by written or telephonic request from the Public Reading Room by reasonably describing the records sought. The purpose of the Public Reading Room is to provide easy accessibility to a substantial portion of the Board's records. The Board considers that documents available through the Public Reading Room have been placed in the public domain.

(b) The public records of the Board that are available for inspection and

§ 1703.104

10 CFR Ch. XVII (1-1-16 Edition)

copying upon request in the Public Reading Room include:

- (1) The Board's rules and regulations;
- (2) Statements of policy adopted by the Board.
- (3) Board recommendations; the Secretary of Energy's response, any final decision, and implementation plans regarding Board recommendations; and interested person's comments, data, views, or arguments to the Board concerning its recommendations and the Secretary of Energy's response and final decision;
- (4) Transcripts of public hearings and any Board correspondence related thereto;
- (5) Recordings or transcripts of Board meetings that were closed under 10 CFR part 1704, where the Board subsequently determines under 10 CFR 1704.9 that the recordings or transcripts may be made publicly available;
- (6) Board orders, decisions, notices, and other actions in a public hearing;
- (7) Board correspondence, except that which is exempt from mandatory public disclosure under §1703.104;
- (8) Copies of the filings, certifications, pleadings, records, briefs, orders, judgments, decrees, and mandates in court proceedings to which the Board is a party and the correspondence with the courts or clerks of court;
- (9) Those of the Board's Administrative Directives that affect members of the public;
- (10) Index of the documents identified in this section, but not including drafts thereof; and
- (11) Annual reports to Congress in which the Board's operations during a past fiscal year are described.
- (12) Copies of records released pursuant to FOIA requests, along with an index to these records. The format will generally be the same as the format of the released records.

[56 FR 21261, May 8, 1991, as amended at 62 FR 66815, Dec. 22, 1997]

§ 1703.104 Board records exempt from public disclosure.

The following records are exempt from public disclosure:

- (a)(1) Records specifically authorized under criteria established by an Executive Order to be kept secret in the in-

terest of national defense or foreign policy, and

- (2) Which are in fact properly classified pursuant to such Executive Order;
- (b) Records related solely to the internal personnel rules and practices of an agency;
- (c) Records specifically exempted from disclosure by statute, provided that such statute:
 - (1) Requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or
 - (2) Establishes particular criteria for withholding or refers to particular types of matters to be withheld;
- (d) Trade secrets and commercial or financial information obtained from a person and privileged or confidential;
- (e) Interagency or intraagency memoranda or letters which would not be available by law to a party other than an agency in litigation with the Board;
- (f) Personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;
- (g) Records of information compiled for law enforcement purposes, but only to the extent that the production of such law enforcement records or information:
 - (1) Could reasonably be expected to interfere with enforcement proceedings,
 - (2) Would deprive a person of a right to a fair trial or an impartial adjudication,
 - (3) Could reasonably be expected to constitute an unwarranted invasion of personal privacy,
 - (4) Could reasonably be expected to disclose the identity of a confidential source, including a state, local, or foreign agency or authority or any private institution which furnished information on a confidential basis, and, in the case of a record or information compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source,

(5) Would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law, or

(6) Could reasonably be expected to endanger the life or physical safety of any individual;

§ 1703.105 Requests for board records not available through the public reading room (FOIA requests).

(a) Upon the request of any person, the Board shall make available for public inspection and copying any reasonably described agency record in the possession and control of the Board, but not available through the Public Reading Room, subject to the provisions of this part. If a member of the public files a request with the Board under the FOIA for records that the Board determines are available through the Public Reading Room, the Board will treat the request under the simplified procedures of § 1703.103.

(b)(1) A person may request access to Board records that are not available through the Public Reading Room by using the following procedures:

(i) The request must be in writing and must describe the records requested to enable Board personnel to locate them with a reasonable amount of effort. Where possible, specific information regarding dates, titles, file designations, and other information which may help identify the records should be supplied by the requester, including the names and titles of any Board personnel who have been contacted regarding the request prior to the submission of the written request.

(ii) A request for all records falling within a reasonably specific and well-defined category shall be regarded as conforming to the statutory requirement that records be reasonably described. The request must enable the Board to identify and locate the records by a process that is not unreasonably burdensome or disruptive of Board operations.

(2) The request should be addressed to the Designated FOIA Officer and clearly marked "Freedom of Informa-

tion Act Request." The address for such requests is: Designated FOIA Officer, Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW., suite 700, Washington, DC 20004. For purposes of calculating the time for response to the request under § 1703.108, the request shall not be deemed to have been received until it is in the possession of the Designated FOIA Officer or his designee.

(3) The request must include:

(i) A statement by the requester of a willingness to pay the fee applicable under § 1703.107(b), or to pay that fee not to exceed a specific amount, or

(ii) A request for waiver or reduction of fees.

(4) No request shall be deemed to have been received until the Board has:

(i) Received a statement of willingness to pay, as indicated in § 1703.105(b)(3)(i), or

(ii) Received and approved a request for waiver or reduction of fees. However, the FOIA request shall be deemed to have been received if the request for waiver or reduction of fees includes a statement of willingness to pay the fee anticipated to be incurred in processing the request under this section, or to pay that fee not to exceed a specific amount, should the request for fee waiver or reduction be denied.

(c) with respect to records in the files of the Board that have been obtained from other federal agencies:

(1) Where the record originated in another federal agency, the Designated FOIA Officer shall refer the request to that agency and so inform the requester, unless the originating agency agrees to direct release by the Board.

(2) Requests for Board records containing information received from another agency, or records prepared jointly by the Board and other agencies, shall be treated as requests for Board records. The Designated FOIA Officer shall, however, coordinate with the appropriate official of the other agency. The notice of determination to the requester, in the event part or all of the record is recommended for denial by the other agency, shall cite the other agency Denying Official as well as the Designated FOIA Officer if a denial by the Board is also involved.

§ 1703.106

10 CFR Ch. XVII (1–1–16 Edition)

(d) If a request does not reasonably describe the records sought, as provided in paragraph (b) of this section, the Board response shall specify the reasons why the request failed to meet those requirements and shall offer the requester the opportunity to confer with knowledgeable Board personnel in an attempt to restate the request. If additional information is needed from the requester to render records reasonably described, any restated request submitted by the requester shall be treated as an initial request for purposes of calculating the time for response under § 1703.108.

(e)(1) *Expedited processing.* A person may request expedited processing of an FOIA request when a compelling need for the requested records has been shown. “Compelling need” means:

(i) Circumstances in which the lack of expedited treatment could reasonably be expected to pose an imminent threat to the life or physical safety of an individual;

(ii) An urgency to inform the public about an actual or alleged Federal Government activity, if the request is made by a person primarily engaged in disseminating information; or

(iii) The records pertain to an immediate source of risk to the public health and safety or worker safety at a defense nuclear facility under the Board’s jurisdiction.

(2) A requester seeking expedited processing should so indicate in the initial request, and should state all facts supporting the need to obtain the requested records rapidly. The requester must also state that these facts are true and correct to the best of the requester’s knowledge and belief.

(3) When a request for expedited processing is received, the Board will respond within ten calendar days from the date of receipt of the request, stating whether or not the request has been granted. If the request for expedited processing is denied, any appeal of that decision will be acted upon expeditiously.

[56 FR 21261, May 8, 1991, as amended at 62 FR 66815, Dec. 22, 1997]

§ 1703.106 Requests for waiver or reduction of fees.

(a) The Board shall collect fees for record requests made under § 1703.105, as provided in § 1703.107(b), unless a requester submits a request in writing for a waiver or reduction of fees. The Designated FOIA Officer shall make a determination on a fee waiver or reduction request within five working days of the request coming into his possession. No determination shall be made that a fee waiver or reduction request should be denied, until the Designated FOIA Officer has consulted with the General Counsel’s Office. If the determination is made that the written request for a waiver or reduction of fees does not meet the requirements of this section, the Designated FOIA Officer shall inform the requester that the request for waiver or reduction of fees is being denied and set forth his appeal rights under § 1703.109.

(b) A person requesting the board to waive or reduce search, review, or duplication fees shall:

(1) Describe the purpose for which the requester intends to use the requested information;

(2) Explain the extent to which the requester will extract and analyze the substantive content of the agency record;

(3) Describe the nature of the specific activity or research in which the agency records will be used and the specific qualifications the requester possesses to utilize information for the intended use in such a way that it will contribute to public understanding;

(4) Describe the likely impact of disclosure of the requested records on the public’s understanding of the subject as compared to the level of understanding of the subject existing prior to disclosure;

(5) Describe the size and nature of the public to whose understanding a contribution will be made;

(6) Describe the intended means of dissemination to the general public;

(7) Indicate if public access to information will be provided free of charge or provided for an access or publication fee; and

(8) Describe any commercial or private interest the requester or any

other party has in the agency records sought.

(c) The Board shall waive or reduce fees, without further specific information from the requester if, from information provided with the request for agency records made under §1703.105, it can determine that disclosure of the information in the agency records is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the Government and is not primarily in the commercial interest of the requester.

(d) In making a determination regarding a request for a waiver or reduction of fees, the Board shall consider the following factors:

(1) Whether the subject of the requested agency records concerns the operations or activities of the Government;

(2) Whether disclosure of the information is likely to contribute significantly to public understanding of Government operations or activities;

(3) Whether, and the extent to which, the requester has a commercial interest that would be furthered by the disclosure of the requested agency records; and

(4) Whether the magnitude of the identified commercial interest of the requester is sufficiently large, in comparison with the public interest in disclosure, that disclosure is primarily in the commercial interest of the requester.

§ 1703.107 Fees for record requests.

(a) Fees for records available through the Public Reading Room.

(1) With the exception of copies of transcripts of Board public hearings addressed in paragraph (a)(2) of this section, the fees charged shall be limited to costs of duplication of the requested records. The Board shall either duplicate the requested records or have them duplicated by a commercial contractor. If the Board duplicates the records, it shall not charge the requester for the associated labor costs. A schedule of fees for this duplication service shall be prescribed in accordance with paragraph (b)(6) of this section. A person may obtain a copy of the schedule of fees in person or by mail

from the Public Reading Room. There shall be no charge for responses consisting of ten or fewer pages.

(2) Transcripts of Board public hearings are made by private contractors. Interested persons may obtain copies of public hearing transcripts from the contractor at prices set in the contract, or through the duplication service noted in paragraph (a) of this section, if the particular contract so permits. Copies of the contracts shall be available for public inspection in the Public Reading Room.

(3) Requests for certification of copies of official Board records must be accompanied by a fee of \$5.00 per document. Inquiries and orders may be made to the Public Reading Room in person or by mail.

(b) Fees for records not available through the Public Reading Room (FOIA requests).

(1) *Definitions.* For the purpose of paragraph (b) of this section:

Commercial use request means a request from or on behalf of one who seeks information for a use or purpose that furthers commercial, trade, or profit interests as these phrases are commonly known or have been interpreted by the courts in the context of the FOIA;

Direct costs means those expenditures which the Board incurs in search, review and duplication, as applicable to different categories of requesters, to respond to requests under §1703.105. Direct costs include, for example, the average hourly salary and projected benefits costs of Board employees applied to time spent in responding to the request and the cost of operating duplicating machinery. Not included in direct costs are overhead expenses such as cost of space, and heating or lighting the facility in which the Board records are stored.

Educational institution refers to a pre-school, a public or private elementary or secondary school, an institution of graduate higher education, an institution of undergraduate higher education, an institution of professional education, and an institution of vocational education, which operates a program of scholarly research;

Noncommercial scientific institution refers to an institution that is not operated on a commercial basis and which is operated solely for the purpose of conducting scientific research the results of which are not intended to promote any particular product or industry;

Representative of the news media refers to any person actively gathering news for an entity that is organized and operated to publish or broadcast news to the public. The term *news* means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations broadcasting to the public at large, and publishers of periodicals (but only in those instances when the periodicals can qualify as disseminations of “news”) who make their products available for purchase or subscription by the general public. These examples are not intended to be all-inclusive. Moreover, as traditional methods of news delivery evolve (e.g., electronic dissemination of newspapers through telecommunications services), such alternative media may be included in this category. A “freelance” journalist may be regarded as working for a news organization if the journalist can demonstrate a solid basis for expecting publication through that organization, even though the journalist is not actually employed by the news organization. A publication contract would be the clearest proof, but the Board may also look to the past publication record of a requester in making this determination.

(2) *Fees.* (i) If documents are requested for commercial use, the Board shall charge the average hourly pay rate for Board employees, plus the average hourly projected benefits cost, for document search time and for document review time, and the costs of duplication as established in the schedule of fees referenced in paragraph (b)(6) of this section.

(ii) If documents are not sought for commercial use and the request is made by an educational or noncommercial scientific institution, whose purpose is scholarly or scientific research, or a representative of the news media, the Board’s charges shall be limited to

the direct costs of duplication as established in the schedule of fees referenced in paragraph (b)(6) of this section. There shall be no charge for the first 100 pages of duplication.

(iii) For a request not described in paragraphs (b)(2) (i) or (ii) of this section the Board shall charge the average hourly pay rate for Board employees, plus the average hourly projected benefits cost, for document search time, and the direct costs of duplication as established in the schedule of fees referenced in paragraph (b)(6) of this section. There shall be no charge for document review time and the first 100 pages of reproduction and the first two hours of search time will be furnished without charge.

(iv) [Reserved]

(v) The Board, or its designee, may establish minimum fees below which no charges will be collected, if it determines that the costs of routine collection and processing of the fees are likely to equal or exceed the amount of the fees. If total fees determined by the Board for a FOIA request would be less than the appropriate threshold, the Board shall not charge the requesters.

(vi) Payment of fees must be by check or money order made payable to the U.S. Treasury.

(vii) Requesters may not file multiple requests at the same time, each seeking portions of a document or documents, solely in order to avoid payment of fees. When the Board reasonably believes that a requester, or a group of requesters acting in concert, is attempting to break a request down into a series of requests for the purpose of evading assessment of fees, the Board may aggregate any such requests and charge the requester accordingly. The Board shall not, however, aggregate multiple requests on unrelated subjects from a requester.

(viii) Whenever the Board estimates that duplication or search costs are likely to exceed \$25, it shall notify the requester of the estimated costs, unless the requester has indicated in advance his willingness to pay fees as high as those anticipated. Such a notice shall offer the requester an opportunity to confer with the Board personnel with the object of reformulating the request

Defense Nuclear Fac. Safety Board

§ 1703.108

to meet the requester's needs at a lower cost.

(3) *Fees for unsuccessful search.* The Board may assess charges for time spent searching, even if it fails to locate the records, or if records located are determined to be exempt from disclosure.

(4) *Advance payments.* (i) If the Board estimates or determines that allowable charges that a requester may be required to pay are likely to exceed \$250, the Board shall notify such requester of the estimated cost and either require satisfactory assurance of full payment where the requester has a history of prompt payment of fees, or require advance payment of the charges if a requester has no payment history.

(ii) If a requester has previously failed to pay a fee charged in a timely fashion, the Board shall require the requester to pay the full amount owed plus any applicable interest, and to make an advance payment of the full amount of the estimated fee before the Board will begin to process a new request or a pending request from that requester.

(iii) When the Board requires advance payment under this paragraph, the administrative time limits prescribed in §1703.108(b) will begin only after the Board has received the fee payments.

(5) *Debt collection.* The Board itself may endeavor to collect unpaid FOIA fees, or may refer unpaid FOIA invoices to the General Services Administration, or other federal agency performing financial management services for the Board, for collection.

(6) *Annual adjustment of fees—(i) Update and publication.* The Board, by its designee, the General Manager, shall promulgate a schedule of fees and the average hourly pay rates and average hourly projected benefits cost and will update that schedule once every twelve months. The General Manager shall publish the schedule for public comment in the FEDERAL REGISTER.

(ii) *Payment of updated fees.* The fee applicable to a particular FOIA request will be the fee in effect on the date that the request is received.

[56 FR 21261, May 8, 1991, as amended at 62 FR 66816, Dec. 22, 1997]

§1703.108 Processing of FOIA requests.

(a) Where a request complies with §1703.105 as to specificity and statement of willingness to pay or request for fee waiver or reduction, the Designated FOIA Officer shall acknowledge receipt of the request and commence processing of the request. The Designated FOIA Officer shall prepare a written response:

- (1) Granting the request,
- (2) Denying the request,
- (3) Granting or denying it in part,
- (4) Stating that the request has been referred to another agency under §1703.105, or
- (5) Informing the requester that responsive records cannot be located or do not exist.

(b) Action pursuant to this section to provide access to requested records shall be taken within twenty working days. This time period may be extended up to ten additional working days, in unusual circumstances, by written notice to the requester. If the Board will be unable to satisfy the request in this additional period of time, the requester will be so notified and given the opportunity to—

- (1) Limit the scope of the request so that it can be processed within the time limit, or
- (2) Arrange with the Designated FOIA Officer an alternative time frame for processing the original request or a modified request.

(c) For purposes of this section and §1703.109, the term *unusual circumstances* may include but is not limited to the following:

- (1) The need to search for and collect the requested records from field facilities or other establishments that are separate from the Board's Washington, DC offices;
- (2) The need to search for, collect and appropriately examine a voluminous amount of separate and distinct records which may be responsive to a single request; or
- (3) The need for consultation, which shall be conducted with all practicable speed, with another agency pursuant to §1703.105(d).

(d) If no determination has been made at the end of the ten day period,

§ 1703.109

or the last extension thereof, the requester may deem his administrative remedies to have been exhausted, giving rise to a right of review in a district court of the United States as specified in 5 U.S.C. 552(a)(4). When no determination can be made within the applicable time limit, the Board will nevertheless continue to process the request. If the Board is unable to provide a response within the statutory period, the Designated FOIA Officer shall inform the requester of the reason for the delay; the date on which a determination may be expected to be made; and that the requester can seek remedy through the courts, but shall ask the requester to forgo such action until a determination is made.

(e) Nothing in this part shall preclude the Designated FOIA Officer and a requester from agreeing to an extension of time for the initial determination on a request. Any such agreement shall be confirmed in writing and shall clearly specify the total time agreed upon.

(f) The procedure for appeal of denial of a request for Board records is set forth in §1703.109.

[56 FR 21261, May 8, 1991, as amended at 62 FR 66816, Dec. 22, 1997]

§1703.109 Procedure for appeal of denial of requests for board records and denial of requests for fee waiver or reduction.

(a)(1) A person whose request for access to records or request for fee waiver or reduction is denied in whole or in part may appeal that determination to the General Counsel within 30 days of the determination. Appeals filed pursuant to this section must be in writing, directed to the General Counsel at the address indicated in §1703.105(b)(2) and clearly marked "Freedom of Information Act Appeal." Such an appeal received by the Board not addressed and marked as indicated in this paragraph will be so addressed and marked by Board personnel as soon as it is properly identified and then will be forwarded to the General Counsel. Appeals taken pursuant to this paragraph will be considered to be received upon actual receipt by the General Counsel.

(2) The General Counsel shall make a determination with respect to any ap-

10 CFR Ch. XVII (1-1-16 Edition)

peal within 20 working days after the receipt of such appeal. If, on appeal, the denial of the request for records or fee reduction is in whole or in part upheld, the General Counsel shall notify the person making such request of the provisions for judicial review of that determination.

(b) In unusual circumstances, as defined in §1703.108(c), the time limits prescribed for deciding an appeal pursuant to this section may be extended by up to ten working days, by the General Counsel, who will send written notice to the requester setting forth the reasons for such extension and the expected determination date.

§1703.110 Requests for classified records.

The Board may at any time be in possession of classified records and Unclassified Controlled Nuclear Information (UCNI) received from the Department of Energy or other federal agencies. The Board shall refer requests under §1703.105 for such records or information to the Department of Energy or other originating agency without making an independent determination as to the releasability of such documents. The Board shall refer requests for classified records in a manner consistent with Executive Order 12356, "National Security Information," 3 CFR, 1982 Comp., p. 166, or any superseding Executive Order. The Board shall refer requests for UCNI in a manner consistent with 42 U.S.C. 2168 and the Department of Energy's implementing regulations in 10 CFR part 1017 or any successor regulations.

§1703.111 Requests for privileged treatment of documents submitted to the board.

(a) *Scope.* Any person submitting a document to the Board may request privileged treatment by claiming that some or all of the information contained in the document is exempt from the mandatory public disclosure requirements of FOIA and should otherwise be withheld from public disclosure.

(b) *Procedures.* A person claiming that information is privileged under paragraph (a) of this section must file:

Defense Nuclear Fac. Safety Board

§ 1703.112

(1) An application, accompanied by an affidavit, requesting privileged treatment for some or all of the information in a document, and stating the justification for nondisclosure of the information and addressing the factors set forth in paragraph (e) of this section;

(2) The original document, boldly indicating on the front page "Contains Privileged Information—Do Not Release" and identifying within the document the information for which the privileged treatment is sought;

(3) Three copies of the redacted document (*i.e.*, without the information for which privileged treatment is sought) and with a statement indicating that information has been removed for privileged treatment; and

(4) The name, title, address, telephone number, and telecopy information of the person or persons to be contacted regarding the request for privileged treatment of documents submitted to the Board.

(c) *Effect of privilege claim.* (1) The Designated FOIA Officer shall place documents for which privileged treatment is sought in accordance with paragraph (b) of this section in a nonpublic file, while the request for confidential treatment is pending. By placing documents in a nonpublic file, the Board is not making a determination on any claim for privilege. The Board retains the right to make determinations with regard to any claim of privilege, and the discretion to release information as necessary to carry out its responsibilities.

(2) The Designated FOIA Officer shall place the request for privileged treatment described in paragraph (b)(1) of this section and a copy of the redacted document described in paragraph (b)(3) of this section in a public file while the request for privileged treatment is pending.

(d) *Notification of request and opportunity to comment.* When a FOIA requester seeks a document for which privilege is claimed, the Designated FOIA Officer shall so notify the person who submitted the document and give that person an opportunity (at least five days) in which to comment in writing on the request. A copy of this no-

tice shall be sent to the FOIA requester.

(e) *Factors to be considered by Board.* In determining whether to grant the document privileged status and to deny the request for the document the Board shall consider:

(1) Whether the information has been held in confidence by its owner;

(2) Whether the information is of a type customarily held in confidence by its owner and whether there is a rational basis therefor;

(3) Whether the information was transmitted to and received by the Board in confidence;

(4) Whether the information is available in public sources; and

(5) Whether public disclosure of the information sought to be withheld is likely to cause substantial harm to the competitive position of the owner of the information, taking into account the value of the information to the owner; the amount of effort or money, if any, expended by the owner in developing the information; and the ease or difficulty with which the information could be properly acquired or duplicated by others.

(f) *Notification before release.* Notice of a decision by the Designated FOIA Officer to deny a claim of privilege, in whole or in part, shall be given to any person claiming that information is privileged no less than five days before public disclosure. The decision shall be made only after consultation with the General Counsel's Office. The notice shall briefly explain why the person's objections to disclosure were not sustained. A copy of this notice shall be sent to the FOIA requester.

(g) *Notification of suit in Federal courts.* When a FOIA requester brings suit to compel disclosure of confidential commercial information, the Board shall notify the person who submitted documents containing such confidential commercial information of the suit.

§ 1703.112 Computation of time.

In computing any period of time under this part, the day of the Board's action is not included. The last day of the period is included unless it is a Saturday, Sunday or legal holiday, in which case the period runs until the

end of the next working day. Whenever a person has the right or is required to take some action within a prescribed period after notification by the Board and the notification is made by mail, five days shall be added to the prescribed period. Only two days shall be added when a notification is made by express mail.

PART 1704—RULES IMPLEMENTING THE GOVERNMENT IN THE SUNSHINE ACT

Sec.

- 1704.1 Applicability.
- 1704.2 Definitions.
- 1704.3 Open meetings requirement.
- 1704.4 Grounds on which meetings may be closed or information may be withheld.
- 1704.5 Procedures for closing meetings, or withholding information, and requests by affected persons to close a meeting.
- 1704.6 Procedures for public announcement of meetings.
- 1704.7 Changes following public announcement.
- 1704.8 Transcripts, recordings, or minutes of closed meetings.
- 1704.9 Availability and retention of transcripts, recordings, and minutes, and applicable fees.
- 1704.10 Severability.

AUTHORITY: 5 U.S.C. 552b; 42 U.S.C. 2286, 2286b(c).

SOURCE: 56 FR 9609, Mar. 7, 1991, unless otherwise noted.

§ 1704.1 Applicability.

(a) This part implements the provisions of the Government in the Sunshine Act (5 U.S.C. 552b). These procedures apply to meetings, as defined herein, of the Members of the Defense Nuclear Facilities Safety Board (Board). The Board may waive the provisions set forth in this part to the extent authorized by law.

(b) Requests for all documents other than the transcripts, recordings, and minutes described in §1704.8 shall be governed by Board regulations pursuant to the Freedom of Information Act (5 U.S.C. 552).

§ 1704.2 Definitions.

As used in this part:

(a) *Chairman* and *Vice Chairman* mean those Members designated by the

President to serve in said positions, pursuant to 42 U.S.C. 2286(c).

(b) *Defense Nuclear Facilities Safety Board* means the Board established under the National Defense Authorization Act, Fiscal Year 1989.

(c) *General Counsel* means the Board's principal legal officer, or an attorney serving as Acting General Counsel.

(d) *Meeting* means the deliberations of three or more Members where such deliberations determine or result in the joint conduct or disposition of official Board business. A meeting does not include:

(1) Notation voting or similar consideration of business for the purpose of recording of votes, whether by circulation of material to the Members individually in writing or by a polling of the Members individually by telephone.

(2) Action by three or more Members to:

(i) Open or to close a meeting or to release or to withhold information pursuant to §1704.5;

(ii) Set an agenda for a proposed meeting(s);

(iii) Call a meeting on less than seven days' notice as permitted by §1704.6(b); or

(iv) Change the subject matter or the determination to open or to close a publicly announced meeting under §1704.7(b).

(3) A session attended by three or more Members for which the purpose is to have the Board's staff or expert consultants to the Board brief or otherwise provide information to the Board concerning any matters within the purview of the Board under its authorizing statute, provided that the Board does not engage in deliberations that determine or result in the joint conduct or disposition of official Board business on such matters.

(4) A session attended by three or more Members for which the purpose is to have the Department of Energy (including its contractors) or other persons or organizations brief or otherwise provide information to the Board concerning any matters within the purview of the Board under its authorizing statute, provided that the Board does not engage in deliberations that determine or result in the joint conduct or

Defense Nuclear Fac. Safety Board

§ 1704.4

disposition of official Board business on such matters.

(5) A gathering of Members for the purpose of holding informal preliminary discussions or exchange of views which do not effectively predetermine official action.

(e) *Member* means an individual duly appointed and confirmed to the collegial body, known as "the Board."

§ 1704.3 Open meetings requirement.

(a) Any meetings of the Board, as defined in §1704.2, shall be conducted in accordance with this part. Except as provided in §1704.4, the Board's meetings, or portions thereof, shall be open to public observation.

(b) The General Counsel or his designee will attend and monitor briefings described in §1704.2(d) (3)-(4) and informal preliminary discussions described in §1704.2(d)(5) to assure that those gatherings do not proceed to the point of becoming deliberations and "meetings" within the meaning of the Sunshine Act.

(c) The General Counsel or his designee will inform the Board Members if developing discussions at a briefing or gathering should be deferred until a notice of an open or closed meeting can be published in the FEDERAL REGISTER, and a meeting conducted pursuant to the Sunshine Act and these regulations.

§ 1704.4 Grounds on which meetings may be closed or information may be withheld.

Except in a case where the Board finds that the public interest requires otherwise, a meeting may be closed and information pertinent to such meeting otherwise required by §§1704.5, 1704.6, and 1704.7 to be disclosed to the public may be withheld if the Board properly determines that such meeting or portion thereof or the disclosure of such information is likely to:

(a) Disclose matters that are:

(1) Specifically authorized under criteria established by an Executive Order to be kept secret in the interests of national defense or foreign policy; and

(2) In fact properly classified pursuant to such Executive order. In making the determination that this exemption applies, the Board shall rely upon the

classification assigned to a document by the Department of Energy or other originating agency;

(b) Relate solely to the internal personnel rules and practices of the Board;

(c)(1) Disclose matters specifically exempted from disclosure by statute (other than 5 U.S.C. 552): *Provided*, That such statute:

(i) Requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue; or

(ii) Establishes particular criteria for withholding or refers to particular types of matters to be withheld;

(2) This exemption applies to Board meetings, or portions of meetings, involving deliberations regarding recommendations which, under 42 U.S.C. 2286d(b) and (h)(3), may not be made publicly available until after they have been received by the Secretary of Energy or the President, respectively; Defense Nuclear Facilities Safety Board.

(d) Disclose trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(e) Involve accusing any person of a crime, or formally censuring any person;

(f) Disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy;

(g) Disclose investigatory records compiled for law enforcement purposes, or information which, if written, would be contained in such records, but only to the extent that the production of such records or information would;

(1) Interfere with enforcement proceedings;

(2) Deprive a person of a right to a fair trial or an impartial adjudication;

(3) Constitute an unwarranted invasion of personal privacy;

(4) Disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source;

(5) Disclose investigative techniques and procedures; or

§ 1704.5

(6) Endanger the life or physical safety of law enforcement personnel;

(h) Disclose information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed action of the Board, except that this subsection shall not apply in any instance where the Board has already disclosed to the public the content or nature of its proposed action, or where the Board is required by law to make such disclosure on its own initiative prior to taking final action on such proposal;

(i) Specifically concern the Board's issuance of a subpoena, or the Board's participation in a civil action or proceeding, an action in a foreign court or international tribunal, or an arbitration, or the initiation, conduct, or disposition by the Board of a particular case of formal agency adjudication pursuant to the procedures in 5 U.S.C. 554 or otherwise involving a determination on the record after opportunity for a hearing; or

(j) Disclose other information for which the Government in the Sunshine Act provides an exemption to the open meeting requirements of that Act.

[56 FR 9609, Mar. 7, 1991, as amended at 79 FR 42181, July 21, 2014]

§1704.5 Procedures for closing meetings, or withholding information, and requests by affected persons to close a meeting.

(a) A majority of all Members may vote to close a meeting or withhold information pertaining to that meeting. A separate vote shall be taken with respect to any action under §1704.4. A majority of the Board may act by taking a single vote with respect to a series of meetings, a portion or portions of which are proposed to be closed to the public, or with respect to any information concerning such series of meetings, so long as each meeting in such series involves the same particular subject matters and is scheduled to be held no more than thirty days after the initial meeting in such series. Each Member's vote under this paragraph shall be recorded and proxies are not permitted.

(b) Any person whose interest may be directly affected if a portion of a meeting is open may request the Board to close that portion on any of the

10 CFR Ch. XVII (1–1–16 Edition)

grounds referred to in §1704.4 (e), (f), or (g). Requests, with reasons in support thereof, should be submitted to the General Counsel, Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW., suite 700, Washington, DC 20004. On motion of any Member, the Board shall determine by recorded vote whether to grant the request.

(c) Within one working day of any vote taken pursuant to this section, the Board shall make available a written copy of such vote reflecting the vote of each Member on the question, and if a portion of a meeting is to be closed to the public a full written explanation of its action closing the meeting and a list of all persons expected to attend and their affiliation.

(d) For every closed meeting, the General Counsel of the Board shall publicly certify that, in his or her opinion, the meeting may be closed to the public and shall state each relevant exemption provision. If the General Counsel invokes the exemption for classified or sensitive unclassified information under §1704.4(a), he shall rely upon the classification or designation assigned to the document containing such information by the Department of Energy or other originating agency. A copy of such certification, together with a statement setting forth the time and place of the meeting and the persons present, shall be retained by the Board as part of the transcript, recording, or minutes required by §1704.8.

§1704.6 Procedures for public announcement of meetings.

(a) For each meeting, the Board shall make public announcement, at least one week before the meeting, of the:

- (1) Time of the meeting;
- (2) Place of the meeting;
- (3) Subject matter of the meeting;
- (4) Whether the meeting is to be open or closed; and

(5) The name and business telephone number of the official designated by the Board to respond to requests for information about the meeting.

(b) The one week advance notice required by paragraph (a) of this section may be reduced only if:

- (1) A majority of all Members determines by recorded vote that Board

business requires that such meeting be scheduled in less than seven days; and

(2) The public announcement required by paragraph (a) of this section is made at the earliest practicable time.

(c) Immediately following each public announcement required by this section, or by §1704.7, the Board shall submit a notice of public announcement for publication in the FEDERAL REGISTER.

§ 1704.7 Changes following public announcement.

(a) The time or place of a meeting may be changed following the public announcement only if the Board publicly announces such change at the earliest practicable time. Members need not approve such change.

(b) The subject matter of a meeting or the determination of the Board to open or to close a meeting, or a portion thereof, to the public may be changed following public announcement if:

(1) A majority of all Members determines by recorded vote that Board business so requires and that no earlier announcement of the change was possible; and

(2) The Board publicly announces such change and the vote of each Member thereon at the earliest practicable time.

(c) The deletion of any subject matter announced for a meeting is not a change requiring the approval of the Board under paragraph (b) of this section.

§ 1704.8 Transcripts, recordings, or minutes of closed meetings.

Along with the General Counsel's certification and presiding officer's statement referred to in §1704.5(d), the Board shall maintain a complete transcript or electronic recording adequate to record fully the proceedings of each meeting, or a portion thereof, closed to the public. The Board may maintain a set of minutes in lieu of such transcript or recording for meetings closed pursuant to §1704.4(i). Such minutes shall fully and clearly describe all matters discussed and shall provide a full and accurate summary of any actions taken, and the reasons therefor, including a description of each of the views

expressed on any item and the record of any rollcall vote.

§ 1704.9 Availability and retention of transcripts, recordings, and minutes, and applicable fees.

The Board shall make promptly available to the public in the Public Reading Room the transcript, electronic recording, or minutes of the discussion of any item on the agenda or of any testimony received at a closed meeting, except for such item, or items, of discussion or testimony as determined by the Board to contain matters which may be withheld under the exemptive provisions of §1704.4. Copies of the nonexempt portions of the transcript or minutes, or transcription of such recordings disclosing the identity of each speaker, shall be furnished to any person at the actual cost of transcription or duplication. If at some later time the Board determines that there is no further justification for withholding a portion of a transcript, electronic recording, or minutes or other item of information from the public which has previously been withheld, such portion or information shall be made publicly available. The Board shall maintain a complete verbatim copy of the transcript, a complete copy of the minutes, or a complete electronic recording of each meeting, or a portion thereof, closed to the public for at least two years after such meeting, or until one year after the conclusion of any Board proceeding with respect to which the meeting, or a portion thereof, was held, whichever occurs later.

§ 1704.10 Severability.

If any provision of this part or the application of such provision to any person or circumstances, is held invalid, the remainder of this part or the application of such provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

AUTHORITY: 5 U.S.C. 552a(f).

SOURCE: 56 FR 47144, Sept. 18, 1991, unless otherwise noted.

§ 1705.01 Scope.

This part contains the Board's regulations implementing the Privacy Act of 1974, Public Law 93-579, 5 U.S.C. 552a.

§ 1705.02 Definitions.

The following terms used in these regulations are defined in the Privacy Act, 5 U.S.C. 552a(a): *agency, individual, maintain, record, system of records, statistical record, and routine use*. The Board's use of these terms conforms with the statutory definitions. References in this part to "the Act" refer to the Privacy Act of 1974.

§ 1705.03 Systems of records notification.

(a) *Public notice*. The Board has published in the FEDERAL REGISTER its systems of records. The Office of the Federal Register biennially compiles and publishes all systems of records maintained by all Federal agencies, including the Board.

(b) *Requests regarding record systems*. Any person who wishes to know whether a system of records contains a record pertaining to him or her may file a request in person or in writing. Written requests should be directed to: Privacy Act Officer, Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW., Suite 700, Washington, DC 20004. Telephone requests should be made by calling the Board at 202-208-6400, and asking to speak to the Privacy Act Officer.

§ 1705.04 Requests by persons for access to their own records.

(a) *Requests in writing*. A person may request access to his or her own records in writing by addressing a letter to: Privacy Act Officer, Defense Nuclear Facilities Safety Board, 625 Indi-

10 CFR Ch. XVII (1-1-16 Edition)

ana Avenue, NW., suite 700, Washington, DC 20004. The request should contain the following information:

(1) Full name, address, and telephone number of requester,

(2) Proof of identification, which should be a copy of one of the following: Valid driver's license, valid passport, or other current identification which contains both an address and picture of the requester,

(3) The system of records in which the desired information is contained, and

(4) At the requester's option, authorization for copying expenses (see § 1705.10 below).

(b) *Requests in person*. Any person may examine his or her own records on the Board's premises. To do so, the person should call the Board's offices at 202-208-6400 and ask to speak to the Privacy Act Officer. This call should be made at least two weeks prior to the time the requester would like to see the records. During this call, the requester should be prepared to provide the same information as that listed in paragraph (a) of this section, except for proof of identification.

§ 1705.05 Processing of requests.

(a) *Requests in writing*. The Privacy Act Officer will acknowledge receipt of the request within five working days of its receipt in the Board's offices. The acknowledgment will advise the requester if any additional information is needed to process the request. Within fifteen working days of receipt of the request, the Privacy Act Officer will provide the requested information or will explain to the requester why additional time is needed for response.

(b) *Requests in person*. Following the initial call from the requester, the Privacy Act Officer will determine (1) whether the records identified by the requester exist, and (2) whether they are subject to any exemption under § 1705.11 below. If the records exist and are not subject to exemption, the Privacy Act Officer will call the requester and arrange an appointment at a mutually agreeable time when the records can be examined. The requester may be accompanied by one person of his or her own choosing, and should state

Defense Nuclear Fac. Safety Board

§ 1705.10

during this call whether or not a second individual will be present at the appointment. At the appointment, the requester will be asked to present identification as stated in § 1705.04(a)(2).

(c) *Excluded information.* If a request is received for information compiled in reasonable anticipation of litigation, the Privacy Act Officer will inform the requester that this information is not subject to release under the Privacy Act (see 5 U.S.C. 552a(d)(5)).

§ 1705.06 Appeals from access denials.

When access to records has been denied by the Privacy Act Officer, the requester may file an appeal in writing. This appeal should be directed to The Chairman, Defense Nuclear Facilities Safety Board, 625 Indiana Avenue NW., suite 700, Washington, DC 20004. The appeal letter must (a) specify those denied records which are still sought, and (b) state why the denial by the Privacy Act Officer is erroneous. The Chairman or his designee will respond to such appeals within twenty working days after the appeal letter has been received in the Board's offices. The appeal determination will explain the basis for continuing to deny access to any requested records.

§ 1705.07 Requests for correction of records.

(a) *Correction requests.* Any person is entitled to request correction of a record pertaining to him or her. This request must be made in writing and should be addressed to Privacy Act Officer, Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW., Suite 700, Washington, DC 20004. The letter should clearly identify the corrections desired. An edited copy of the record will usually be acceptable for this purpose.

(b) *Initial response.* Receipt of a correction request will be acknowledged by the Privacy Act Officer in writing within five working days of receipt of the request. The Privacy Act Officer will endeavor to provide a letter to the requester within thirty working days stating whether or not the request for correction has been granted or denied. If the Privacy Act Officer decides to deny any portion of the correction re-

quest, the reasons for the denial will be provided to the requester.

§ 1705.08 Appeals from correction denials.

(a) When amendment of records has been denied by the Privacy Act Officer, the requester may file an appeal in writing. This appeal should be directed to The Chairman, Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW., Suite 700, Washington, DC 20004. The appeal letter must (1) specify the records subject to the appeal, and (2) state why the denial of amendment by the Privacy Act Officer is erroneous. The Chairman or his designee will respond to such appeals within thirty working days (subject to extension by the Chairman for good cause) after the appeal letter has been received in the Board's offices.

(b) The appeal determination, if adverse to the requester in any respect, will: (1) Explain the basis for denying amendment of the specified records, (2) inform the requester that he or she may file a concise statement setting forth reasons for disagreeing with the Chairman's determination, and (3) inform the requester of his or her right to pursue a judicial remedy under 5 U.S.C. 552a(g)(1)(A).

§ 1705.09 Disclosure of records to third parties.

Records subject to the Privacy Act that are requested by any person other than the individual to whom they pertain will not be made available except in the following circumstances:

(a) Their release is required under the Freedom of Information Act in accordance with the Board's FOIA regulations, 10 CFR part 1703;

(b) Prior consent for disclosure is obtained in writing from the individual to whom the records pertain; or

(c) Release is authorized by 5 U.S.C. 552a(b) (1) or (3) through (11).

§ 1705.10 Fees.

A fee will not be charged for search or review of requested records, or for correction of records. When a request is made for copies of records, a copying fee will be charged at the same rate established for FOIA requests. See 10 CFR

§ 1705.11

1703.107. However, the first 100 pages of copying will be free of charge.

§ 1705.11 Exemptions.

Pursuant to 5 U.S.C. 552a(k), the Board has determined that system of records DNFSB-3, "Drug Testing Program Records," is partially exempt from 5 U.S.C. 552(a)(c)(3), (d), (e)(1), (e)(4)(G), (H), (I), and (f). The exemption pertains to portions of these records which would identify persons supplying information on drug abuse by Board employees or contractors.

PART 1706—ORGANIZATIONAL AND CONSULTANT CONFLICTS OF INTERESTS

Sec.

1706.1 Scope; statement of policy.

1706.2 Definitions.

1706.3 Applicability.

1706.4 Head of the contracting activity.

1706.5 General rules.

1706.6 Solicitation provisions.

1706.7 Procedures.

1706.8 Waiver.

1706.9 Examples.

1706.10 Remedies.

1706.11 Organizational conflicts of interest certificate—Advisory or assistance services.

AUTHORITY: 42 U.S.C. 2286b(c).

SOURCE: 57 FR 44652, Sept. 29, 1992, unless otherwise noted.

§ 1706.1 Scope; statement of policy.

(a) *Scope.* This part sets forth the guidelines, requirements, and procedures the Defense Nuclear Facilities Safety Board will follow in determining whether a contractor or offeror has an organizational or consultant conflict of interest (OCI) and in avoiding, neutralizing, or mitigating OCIs.

(b) *Policy.* It is the policy of the Board to identify and then avoid or mitigate organizational and consultant conflicts of interest. Normally, the Board will not award contracts to offerors who have OCIs and will terminate contracts where OCIs are identified following contract award. In exceptional circumstances, the Board reserves the right to waive conflicts of interest if it determines that such action is in the best interests of the Government, pursuant to §1706.8, and to take such mitigating measures as it

10 CFR Ch. XVII (1–1–16 Edition)

deems appropriate pursuant to such section.

§ 1706.2 Definitions.

Advisory or assistance services means services acquired by contract to advise or assist the Board, whether with respect to its internal functions or its oversight of defense nuclear facilities, or otherwise to support or improve policy development or decisionmaking by the Board, or management or administration of the Board, or to support or improve the operation of the Board's management systems. Such services may take the form of the provision of information, advice, reports, opinions, alternatives, conclusions, recommendations, training, direct assistance, or performance of site visits, technical reviews, investigation of health and safety practices or other appropriate services.

Affiliates means associated business concerns or individuals if, directly or indirectly, either one controls or can control the other or a third party controls or can control both.

Board means, as the context requires, the Defense Nuclear Facilities Safety Board, its Chairman, or any other officer of the Defense Nuclear Facilities Safety Board to whom the appropriate delegation has been made under 42 U.S.C. 2286(c)(3).

Contract means any contract, agreement, or other arrangement with the Board, except as provided in §1706.3.

Contractor means any person, firm, unincorporated association, joint venture, co-sponsor, partnership, corporation, or other entity, or any group of one or more of the foregoing, which is a party to a contract with the Board, and the affiliates and successors in interest of such party. The term "contractor" also includes the chief executive and directors of a party to a contract with the Board, the key personnel of such party identified in the contract, and current or proposed consultants or subcontractors to such party. The term "contractor" shall also include consultants engaged directly by the Board through the use of a contract.

Defense nuclear facility means any United States Department of Energy

Defense Nuclear Fac. Safety Board

§ 1706.3

(DOE) defense nuclear facility, as defined in 42 U.S.C. 2286g, subject to the Board's oversight.

Evaluation activities means activities that involve evaluation of some aspect of defense nuclear facilities.

Mitigating means, with respect to an organizational or consultant conflict of interest, reducing or counteracting the effects of such a conflict of interest on the Board, but without eliminating or avoiding the conflict of interest.

National Laboratories means laboratories operated by educational institutions or business entities under management and operating contracts with DOE.

Offeror means any person, firm, unincorporated association, joint venture, partnership, corporation, or other entity, or any group of one or more of the foregoing, submitting a bid or proposal to the Board, solicited, unsolicited or otherwise invited by the Board, to obtain a contract, and the affiliates and successors in interest of such a bidder or proposer. The term "offeror" also includes the chief executive and directors of such a bidder or proposer, the key personnel of a bidder or proposer identified in the bid or proposal, and proposed consultants or subcontractors to such bidder or proposer.

Organizational or consultant conflict of interest means that, because of other past, present, or future planned activities or relationships, an offeror or contractor is unable, or potentially unable, to render impartial assistance or advice to the Board, or the objectivity of such offeror or contractor in performing contract work for the Board is or might be otherwise impaired, or such offeror or contractor has or would have an unfair competitive advantage. The term "organizational or consultant conflict of interest" shall include, but not be limited to, actions or situations that would preclude the award or extension of a contract under, or would be prohibited by, §1706.5.

Potential organizational or consultant conflict of interest means a factual situation that indicates or suggests that an actual organizational or consultant conflict of interest may exist or arise from award of a proposed contract or from continuation of an existing contract. The term is used to signify those

situations that merit conflicts review prior to contract award or that must be reported to the contracting officer for conflicts review if they arise during contract performance.

Research means any scientific, engineering, or other technical work involving theoretical analysis, exploration, or experimentation.

Subcontractor means any subcontractor of any tier which performs work under a prime contract with the Board.

Task order contract means a Board contract that contains a broad scope of work but does not authorize the contractor to perform specific tasks within that broad scope until the contracting officer issues task orders.

Unfair competitive advantage means an advantage obtained by an offeror or contractor to the Board by virtue of the relationship of the offeror or contractor with the Board or access to information not available to other offerors or contractors, and recognized in appropriate legal precedent as unfair.

In determining the meaning of any provision of this part, unless the context indicates otherwise, the singular includes the plural; the plural includes the singular; the present tense includes the future tense; and words of one gender include the other gender.

§ 1706.3 Applicability.

(a) *General applicability.* This part applies to contractors and offerors only, except as otherwise herein provided. This part shall be incorporated by reference and made a part of all Board contracts in excess of the small purchases threshold, except as provided in the last sentence of this §1706.3(a). In addition, if determined appropriate by the contracting officer for the Board, this part may be incorporated by reference and made a part of Board contracts below the small purchases threshold, except as provided in the last sentence of this §1706.3(a). This part does not apply to the acquisition of services, including, without limitation, consulting services, through the personnel appointment process or to Board agreements with other federal government agencies, but shall apply

§ 1706.4

to Board agreements with the management and operating contractors (and subcontractors and consultants there-to) of the National Laboratories.

(b) *Subcontractors and consultants.* The requirements of this part shall also apply to subcontractors and consultants proposed for, or working on, a Board contract, in each case where the amount of the subcontract or consultant agreement under which such subcontractor or consultant is or will be working is expected to exceed \$10,000, and in each other case where the contracting officer for the Board deems it appropriate to make the requirements of this part applicable to a subcontractor or consultant proposed for, or working on, a Board contract. The certificates or disclosures submitted by offerors or contractors pursuant to this part shall include certificates or disclosures from all subcontractors and consultants to contractor or offerors in those cases where this part applies by its terms to such subcontractors or consultants or has been applied to such persons by the contracting officer. Contractors and offerors shall assure that contract clauses giving effect to this §1706.3(b), satisfactory to the contracting officer, are included in subcontracts and consultant agreements of any tier involving performance of work under a prime contract covered by this part.

[57 FR 44652, Sept. 29, 1992; 58 FR 13684, Mar. 12, 1993]

§ 1706.4 Head of the contracting activity.

The head of the contracting activity for the Board shall be the General Manager.

§ 1706.5 General rules.

(a) *Award of Contracts.* Contracts shall generally not be awarded to an offeror:

(1) For any services where the award would result in the offeror evaluating products or services it has provided to the Board, is then providing to the Board, or is then offering to provide for the Board;

(2) For evaluation activities or research related to the Board's oversight of defense nuclear facilities, where the award would result in the offeror eval-

10 CFR Ch. XVII (1-1-16 Edition)

uating products or services it has provided, is then providing, or is then offering to provide to DOE or to contractors or subcontractors for defense nuclear facilities; or

(3) For any other services (the acquisition of which is otherwise covered by this part), where the Board has determined, pursuant to §1706.7, that an actual or potential OCI exists and cannot be avoided, and the Board does not waive that OCI. Paragraphs (a) (1) and (2) of this section also apply when award would result in evaluation of products or services of another entity where the offeror has been, is, or would be substantially involved in the development of the product or performance of the service, or has other substantial involvement regarding the product or services.

(b) *Subsequent related contracts.* (1) A Board contractor under a Board contract shall normally be ineligible to participate in Board contracts or subcontracts that stem directly from the contractor's performance of work under a previous Board contract, where the Board determines that an OCI would exist because:

(i) The expectation of receiving the subsequent contract is likely to diminish the contractor's capacity to give impartial assistance and advice, or otherwise result in a biased work product; or

(ii) An offeror on the subsequent contract would have an unfair competitive advantage by virtue of having performed the first contract.

(2) If a contractor under a Board contract prepares a complete or essentially complete statement of work or specifications in the performance of a contract, the contractor shall be ineligible to perform or participate in the initial contractual effort that is based on such statement of work or specifications. The contractor shall not incorporate its products or services in such statement of work or specifications.

(c) *National Laboratory personnel.* The Board may engage personnel of the National Laboratories who have expertise needed by the Board in the performance of its oversight responsibilities, provided that prior to each such engagement, the Board determines either:

Defense Nuclear Fac. Safety Board

§ 1706.6

(1) That the nature of work performed by such personnel for DOE does not pose actual or potential OCIs with respect to the particular work covered by the Board contract; or

(2) That such engagement is in the Government's best interests and that a waiver should be granted pursuant to §1706.8. In all cases involving National Laboratory personnel, notice of the circumstances of the contract, stating the rationale for use of the personnel, shall be published in the FEDERAL REGISTER.

(d) *Work for others.* During the term of any Board contract, the contractor may not enter into consulting or other contractual arrangements with other persons or entities, the result of which could give rise to an OCI with respect to the work being performed under the contract. The prime contractor shall ensure that all of its employees, subcontractors, and consultants under the contract abide by this paragraph. If the contractor has reason to believe that any proposed arrangement with other persons or entities may involve an actual or potential OCI, it shall promptly inform the Board in writing of all pertinent facts regarding such proposed arrangement. In the case of task order contracts, this paragraph applies, subject to §1706.7(c), only to specific ongoing tasks that the contracting officer authorizes the contractor to perform.

(e) *Contractor protection of Board information that is not publicly available.* If the contractor in the performance of a Board contract obtains access to information, such as Board plans, policies, reports, studies, or financial plans, or internal data protected by the Privacy Act (5 U.S.C. 552a), proprietary information, or any other data which has not been released to the public, the contractor shall not:

(1) Use such information for any private purpose until the information has been released or is otherwise made available to the public;

(2) Compete for work for the Board based on such information for a period of six months after either the contract has been completed or such information has been released or otherwise made available to the public, whichever occurs first, or submit an unsolicited proposal to the Government based on such information until one year

after such information is released or otherwise made available to the public, unless a waiver permitting such action has been granted pursuant to §1706.8; or

(3) Release the information without prior written approval of the contracting officer, unless such information has previously been released or otherwise made available to the public by the Board.

[57 FR 44652, Sept. 29, 1992; 58 FR 13684, Mar. 12, 1993]

§ 1706.6 Solicitation provisions.

(a) *Advisory or assistance services.* There shall be included in all formal Board solicitations for advisory or assistance services where the contract amount is expected to exceed \$25,000 (or the then applicable small purchases threshold), a provision requiring a certificate representing whether award of the contract to the offeror would present actual or potential OCIs. Apparent successful offerors will be required to submit such certificates, but the Board may also require such a certificate to be submitted in other circumstances, such as:

(1) Where the contracting officer has identified certain offerors who have passed an initial screening and has determined that it is appropriate to request the identified offerors to file the certificate in order to expedite the award process; or

(2) In the case of modifications for additional effort under Board contracts, except those issued under the "changes" clause. If a certificate has been previously submitted with regard to the contract being modified, only an updating of such statement shall be required for a contract modification.

In addition, if determined appropriate by the contracting officer for the Board, such certificates may be required in connection with any other contracts subject to this part or in which this part has been incorporated by reference.

(b) *Marketing consultant services.* There shall further be included in all Board solicitations, except sealed bids, where the contract amount is expected to exceed \$200,000, a provision requiring an organizational conflicts of interest

§ 1706.7

10 CFR Ch. XVII (1–1–16 Edition)

certificate from any marketing consultants engaged by an offeror in support of the preparation or submission of an offer for a Board contract by that offeror.

[57 FR 44652, Sept. 29, 1992; 58 FR 13684, Mar. 12, 1993]

§ 1706.7 Procedures.

(a) *Pre-award disclosure and resolution of OCIs.* If a certificate under § 1706.6 indicates, or the Board otherwise learns, that actual or potential OCIs could be, or would appear to be, created by contract award to a particular offeror, the Board shall afford the affected offeror an opportunity to provide in writing all relevant facts bearing on the certificate. If the Board thereafter determines that an actual or potential OCI exists, one of the following actions shall ultimately be taken:

(1) Disqualify the offeror;

(2) Include in the contract appropriate terms and conditions which avoid the conflict, in which case no waiver is required; or

(3) Make a finding that it is in the best interests of the Government to seek award of the contract under the waiver provisions of § 1706.8, and, where reasonably possible, include contract terms and conditions or take other measures which mitigate such conflicts.

(b) *Post-award disclosure and resolution of OCIs.* (1) If, after contract award, the contractor discovers actual or potential OCIs with respect to the contract, it shall make an immediate and full disclosure in writing to the contracting officer. This statement shall include a description of the action that the contractor has taken or proposes to avoid or mitigate such conflicts.

(2) If a disclosure under this section indicates, or the Board otherwise learns, that actual or potential OCIs exist, the Board may afford the contractor an opportunity to provide all relevant facts bearing upon the problem. If at any time the Board determines that an actual or potential OCI exists, one of the following actions shall ultimately be taken:

(i) Terminate the contract, or, in the case of a task order contract, terminate the particular task;

(ii) Insist on appropriate contract terms and conditions which avoid the OCIs, in which case no waiver is required; or

(iii) Make a finding that it is in the best interests of the Government to permit the contractor to continue to perform the contract (or task) under the waiver provisions of § 1706.8, and, where reasonably possible, insist on appropriate contract terms and conditions or take other measures which mitigate the OCIs.

(c) *Task order contracts.* (1) Because a task order contract generally entails a broad scope of work, apparent successful offerors shall be required to identify in their certificates filed in accordance with § 1706.6 any actual or potential OCIs that come within the full scope of the contract. The Board may decline to award a task order contract to an offeror based upon such information or it may decline to approve performance of a particular task by the contractor if an actual or potential OCI is subsequently identified with respect to that particular task. The Board may also take the other actions identified in § 1706.7(a) to avoid or mitigate such conflicts.

(2) Contractors performing task order contracts for the Board shall disclose to the contracting officer any new work for others they propose to undertake that may present an actual or potential OCI with regard to the performance of any work under the full scope of the Board contract. Such disclosure shall be made at least 15 days prior to the submission of a bid or proposal for the new work. The disclosure shall include the statement of work and any other information necessary to describe fully the proposed work and contemplated relationship.

(3) If the Board has issued a task order or a letter request for proposal under the contract with a contractor who has disclosed to the contracting officer that it proposes to undertake new work for persons other than the Board as described in § 1706.7(c)(2), for services in the same technical area and/or at the same defense nuclear facility that is the subject of the proposed new work (including overlap based upon generic work performed for others by the contractor), the Board

Defense Nuclear Fac. Safety Board

§ 1706.8

shall inform the contractor that entering into a contract for the new work may result in termination by the Board of the task order contract, if the Board determines that such work would give rise to an OCI and the Board does not grant a waiver.

(d) *Decisions on OCIs.* The contracting officer shall make recommendations to the General manager regarding disqualification or actions to be taken by the Board to avoid or mitigate any actual or potential OCI.

(1) The General Manager shall have the authority to approve, modify, or disapprove such recommendations regarding avoidance of an actual or potential OCI. If an offeror or contractor disagrees with the actions approved by the General Manager and requests review of the action, the Chairman shall make the decision on the actions to be taken by the Board.

(2) Any recommended action respecting the best interests of the Government and mitigation measures to be taken with respect to an actual or potential OCI must be approved by the Chairman in conjunction with the decision to grant a waiver pursuant to §1706.8, and any recommended action to terminate a contract or a particular task on account of an actual or potential OCI must be approved by the Chairman.

(3) Decisions on OCIs by the General Manager or the Chairman shall be made with the advice of the Office of the General Counsel.

[57 FR 44652, Sept. 29, 1992; 58 FR 13684, Mar. 12, 1993]

§ 1706.8 Waiver.

(a) *Waiver of OCIs.* The need for a waiver of any OCI in connection with the award or continuation of specific contracts may be identified either by the contracting officer for the Board or other Board employee or by a written request filed by an offeror or contractor with the contracting officer. The request may be combined with the certificate or disclosure required under §§1706.6 or 1706.7, or with additional statements filed under §1706.7 regarding matters raised in the certificate or disclosure. The contracting officer shall review all of the relevant facts brought to his attention and shall

bring the matter to the General Manager, who shall make a written recommendation to the Chairman of the Board regarding whether a waiver should be granted for a contract award or for continuation of an existing contract.

(b) *Criteria for Waiver of OCIs.* (1) The Chairman is authorized to waive any OCI (and the corresponding provision of §1706.5 where applicable) upon a determination that awarding or extending the particular contract, or not terminating the particular contract, would be in the best interests of the Government. Issuance of a waiver shall ordinarily be limited to those situations in which:

(i) The work to be performed under contract is vital to the Board program;

(ii) The work cannot be satisfactorily performed except by a contractor or offeror whose interests give rise to a question of OCI; and

(iii) Contractual and/or technical review and supervision methods can be employed by the Board to mitigate the conflict.

(2) The Chairman is also authorized to waive any OCI (and the corresponding provision of §1706.5 where applicable), without regard to the foregoing factors, if the Chairman determines, notwithstanding the existence of the OCI, that it is in best interests of the Government to award or extend the particular contract, or not to terminate it, without compliance with §1706.8(b)(1).

(c) *Waiver of Rules or Procedures.* The Chairman is also authorized to waive any rules or procedures contained in this part upon a determination that application of the rules or procedures in a particular situation would not be in the best interests of the Government. Any request for such a waiver must be in writing and shall describe the basis for the waiver.

(d) *Office of General Counsel.* Waivers of OCIs or of any rule or procedure contained in this part shall be made after consultation with the Office of General Counsel.

(e) *Federal Register.* Except as otherwise provided in §1706.8(c), notice of each waiver granted under this section shall be published in the FEDERAL REGISTER with an explanation of the basis

§ 1706.9

for the waiver. In the discretion of the Board, notices of instances of avoidance of OCIs may also be published in the FEDERAL REGISTER.

§ 1706.9 Examples.

The examples in this section illustrate situations in which questions concerning OCIs may arise. The examples are not all inclusive, but are intended to provide offerors and contractors with guidance on how this subpart will be applied.

(a) *Circumstances*—(1) *Facts*. A Board contractor for technical assistance in the review of a safety aspect of a particular defense nuclear facility proposes to use the services of an expert who also serves on an oversight committee for a contractor of other defense nuclear facilities.

(2) *Guidance*. Assuming the work of the oversight committee has no direct or indirect relationship with the work at the facility that is the subject of the Board's contract, there would not be an OCI associated with the use of this expert in the performance of the Board contract.

(b) *Circumstances*—(1) *Facts*. A Board contractor studying the potential for a chemical explosion in waste tanks at a defense nuclear facility advises the Board that it has been offered a contract with DOE to study the chemical composition of the waste in the same tanks.

(2) *Guidance*. The contractor would be advised that accepting the DOE contract would result in termination of its performance under its contract with the Board.

(c) *Circumstances*—(1) *Facts*. The Board issues a task order under an existing contract for the evaluation of the adequacy of fire protection systems at a defense nuclear facility. The contractor then advises the Board that it is considering making an offer on a solicitation by DOE to evaluate the same matter.

(2) *Guidance*. The contractor would be advised that entering into a contract with DOE on that solicitation could result in the contract with the Board being terminated.

(d) *Circumstances*—(1) *Facts*. A firm responding to a formal Board solicitation for technical assistance provides

10 CFR Ch. XVII (1–1–16 Edition)

information regarding a contract it currently has with DOE. The effort under the DOE contract is for technical assistance work at DOE facilities not subject to Board oversight and outside its jurisdiction.

(2) *Guidance*. The Board would analyze the work being performed for DOE to ensure no potential or actual conflict of interest would be created through award of the Board contract. Should the Board determine that no potential or actual conflict of interest exists, the contractor would be eligible for award. If the Board determines that a potential or actual conflict of interest would arise through a contract award, it may disqualify the firm or, if the Board determines that such action is in the best interests of the Government, the Board may waive the conflict or the rules and procedures and proceed with the award.

(e) *Circumstances*—(1) *Facts*. The Board discovers that a firm competing for a contract has a number of existing agreements with DOE in technical areas which are unrelated to the Board's oversight authority. While these contracts may not represent a potential or actual conflict of interest regarding the substance of the technical effort, their total value constitutes a significant portion of the firm's gross revenues.

(2) *Guidance*. A conflict of interest may exist due to the firm's substantial pecuniary dependence upon DOE. Consequently, the Board may question the likelihood that the contractor would provide unbiased opinions, conclusions, and work products because of this extensive financial relationship. The Board will review and consider the extent of the firm's financial dependence on DOE, the nature of the proposed Board contract, the need by the Board for the services and expertise to be provided by the firm and the availability of such services and expertise elsewhere, and whether the likelihood of the firm's providing objective technical evaluations and opinions to the Board could be influenced in view of its DOE relationship. Based on this analysis, the Board may either determine that there is no conflict and make the

award, waive the conflict if one is identified and establish procedures to mitigate it where possible, or disqualify the offeror.

(f) *Circumstances—(1) Facts.* The Board discovers that a firm competing for a contract has a substantial business relationship in technical areas unrelated to the Board's oversight authority with a contractor operating a defense nuclear facility under a DOE contract. Similar to the situation described in paragraph (e) of this section, the total value of the contracts with the DOE contractor constitutes more than half of the firm's gross revenues, even though those contracts do not represent a potential or actual conflict of interest regarding any of the particular matters to be covered by the contract with the Board.

(2) *Guidance.* The firm's substantial financial and business dependence upon the DOE contractor may give rise to a conflict of interest, in that the likelihood of the firm's rendering impartial, objective assistance or advice to the Board may be impaired by its extensive financial relationship with the DOE contractor. In this situation, the Board will review and consider the nature of the proposed Board contract, the need by the Board for the services and expertise to be provided by the firm and the availability of such services and expertise elsewhere. The Board will also review and consider the extent of the firm's financial dependence on the DOE contractor and whether the firm would be impartial and objective in providing technical evaluation and opinions to the Board, especially on matters in which the DOE contractor is involved, notwithstanding the relationship with the DOE contractor. Based on this analysis, the Board may determine that there is no actual conflict of interest and make the award. Alternatively, if the Board identifies a conflict that cannot be avoided, the Board may determine to waive the conflict in the best interests of the United States, with or without the establishment of procedures to mitigate the conflict, or it may disqualify the offeror.

[57 FR 44652, Sept. 29, 1992; 58 FR 13684, Mar. 12, 1993]

§ 1706.10 Remedies.

The refusal to provide the certificate, or upon request of the contracting officer the additional written statement, required by §§1706.6 and 1706.7 in connection with an award shall result in disqualification of the offeror for that award. The nondisclosure or misrepresentation of any relevant information may also result in the disqualification of the offeror for that award. If such nondisclosure or misrepresentation by an offeror or contractor is discovered or occurs after award, or in the event of breach of any of the restrictions contained in this part, the Board may terminate the contract for convenience or default, and the offeror or contractor may also be disqualified by the Board from consideration for subsequent Board contracts and be subject to such other remedial actions as provided by law or the contract.

[57 FR 44652, Sept. 29, 1992; 58 FR 13684, Mar. 12, 1993]

§ 1706.11 Organizational conflicts of interest certificate—Advisory or assistance services.

As prescribed in or permitted by §1706.6(a), insert the following provision in Board solicitations:

ORGANIZATIONAL AND CONSULTANT CONFLICTS OF INTEREST CERTIFICATE—ADVISORY AND ASSISTANCE SERVICES (OCT. 1990)

(a) An organizational or consultant conflict of interest means that because of other activities or relationships with other persons, a person is unable or potentially unable to render impartial assistance or advice to the Government, or the person's objectivity in performing the contract work is or might be otherwise impaired, or a person has an unfair competitive advantage.

(b) In order to comply with the Office of Federal Procurement Policy Letter 89-1, Conflict of Interest Policies Applicable to Consultants, the offeror shall provide the certificate described in paragraph (c) of this provision.

(c) The certificate must contain the following:

(1) Name of the agency and the number of the solicitation in question.

(2) The name, address, telephone number, and federal taxpayer identification number of the offeror.

(3) A description of the nature of the services rendered by or to be rendered on the instant contract.

Pt. 1707

(4) The name, address, and telephone number of the client or clients, a description of the services rendered to the previous client(s), and the name of a responsible officer or employee of the offeror who is knowledgeable about the services rendered to each client, if, in the 12*months preceding the date of the certification, services were rendered to the Government or any other client (including a foreign government or person) respecting the same subject matter as the instant solicitation, or directly relating to such subject matter. The agency and contract number under which the services were rendered must also be included, if applicable.

(5) A statement that the person who signs the certificate has made inquiry and that, to the best of his or her knowledge and belief, no actual or potential conflict of interest or unfair competitive advantage exists with respect to the advisory or assistance services to be provided in connection with the instant contract, or that any actual or potential conflict of interest or unfair competitive advantage that does or may exist with respect to the contract in question has been communicated in writing to the contracting officer or his or her representative; and

(6) The signature, name, employer's name, address, and telephone number of the person who signed the certificate.

(d) Persons required to certify but who fail to do so may be determined to be nonresponsible. Misrepresentation of any fact may result in suspension or debarment, as well as penalties associated with false certifications or such other provisions provided for by law or regulation.

(End of provision)

PART 1707—TESTIMONY BY DNFSB EMPLOYEES AND PRODUCTION OF OFFICIAL RECORDS IN LEGAL PROCEEDINGS

SOURCE: 66 FR 66715, Dec. 27, 2001, unless otherwise noted.

Subpart A—General Provisions

§ 1707.101 Scope and purpose.

(a) This part sets forth policies and procedures you must follow when you submit a demand or request to an employee of the Defense Nuclear Facilities Safety Board (DNFSB) to produce official records and information, or provide testimony relating to official information, in connection with a legal proceeding. You must comply with these requirements when you request the release or disclosure of official records and information.

(b) The Defense Nuclear Facilities Safety Board intends these provisions to:

- (1) Promote economy and efficiency in its programs and operations;
- (2) Minimize the possibility of involving DNFSB in controversial issues not related to our functions;
- (3) Maintain DNFSB's impartiality among private litigants where DNFSB is not a named party; and
- (4) Protect sensitive, confidential information and the deliberative processes of DNFSB.

(c) In providing for these requirements, DNFSB does not waive the sovereign immunity of the United States.

(d) This part provides guidance for the internal operations of DNFSB. It does not create any right or benefit, substantive or procedural, that a party

may rely upon in any legal proceeding against the United States.

§ 1707.102 Applicability.

This part applies to demands and requests to employees for factual, opinion, or expert testimony relating to official information, or for production of official records or information, in legal proceedings whether or not the United States or the DNFSB is a named party. However, it does not apply to:

- (a) Demands upon or requests for a DNFSB employee to testify as to facts or events that are unrelated to his or her official duties or that are unrelated to the functions of DNFSB;
- (b) Demands upon or requests for a former DNFSB employee to testify as to matters in which the former employee was not directly or materially involved while at the DNFSB;
- (c) Requests for the release of records under the Freedom of Information Act, 5 U.S.C. 552, or the Privacy Act, 5 U.S.C. 552a; and
- (d) Congressional demands and requests for testimony or records.

§ 1707.103 Definitions.

DNFSB means the Defense Nuclear Facilities Safety Board.

DNFSB employee or employee means:

- (1) Any current or former officer or employee of DNFSB;
- (2) Any contractor or contractor employee working on behalf of the DNFSB or who has performed services for DNFSB; and
- (3) Any individual who is serving or has served in any advisory capacity to DNFSB, whether formal or informal.
- (4) Provided, that this definition does not include persons who are no longer employed by DNFSB and who are retained or hired as expert witnesses or who agree to testify about general matters, matters available to the public, or matters with which they had no specific involvement or responsibility during their employment with DNFSB.

Demand means a subpoena, or an order or other demand of a court or other competent authority, for the production, disclosure, or release of records or for the appearance and testimony of a DNFSB employee that is issued in a legal proceeding.

General Counsel means the General Counsel of DNFSB or a person to whom the General Counsel has delegated authority under this part.

Legal proceeding means any matter before a court of law, administrative board or tribunal, commission, administrative law judge, hearing officer, or other body that conducts a legal or administrative proceeding. Legal proceeding includes all phases of litigation.

Records or official records and information mean:

- (1) All documents and materials which are DNFSB agency records under the Freedom of Information Act, 5 U.S.C. 552;
- (2) All other documents and materials contained in DNFSB files; and
- (3) All other information or materials acquired by a DNFSB employee in the performance of his or her official duties or because of his or her official status.

Request means any formal or informal request, by whatever method, for the production of records and information or for testimony which has not been demanded by a court or other competent authority.

Testimony means any written or oral statements, including but not limited to depositions, answers to interrogatories, affidavits, declarations, interviews, and statements made by an individual in connection with a legal proceeding.

Subpart B—Requests for Testimony and Production of Documents

§ 1707.201 General prohibition.

No employee may produce official records and information or provide any testimony relating to official information in response to a demand or request without the prior, written approval of the General Counsel.

§ 1707.202 Factors DNFSB will consider.

The General Counsel, in his or her sole discretion, may grant an employee permission to testify on matters relating to official information, or produce official records and information, in response to a demand or request. Among the relevant factors that the General

§ 1707.203

Counsel may consider in making this decision are whether:

- (a) The purposes of this part are met;
- (b) Allowing such testimony or production of records would be necessary to prevent a miscarriage of justice;
- (c) DNFSB has an interest in the decision that may be rendered in the legal proceeding;
- (d) Allowing such testimony or production of records would assist or hinder DNFSB in performing its statutory duties or use DNFSB resources where responding to the request will interfere with the ability of DNFSB employees to do their work;
- (e) Allowing such testimony or production of records would be in the best interest of DNFSB or the United States;
- (f) The records or testimony can be obtained from other sources;
- (g) The demand or request is unduly burdensome or otherwise inappropriate under the applicable rules of discovery or the rules of procedure governing the case or matter in which the demand or request arose;
- (h) Disclosure would violate a statute, executive order or regulation;
- (i) Disclosure would reveal confidential, sensitive, or privileged information, trade secrets or similar, confidential commercial or financial information, or otherwise protected information, or would otherwise be inappropriate for release;
- (j) Disclosure would impede or interfere with an ongoing law enforcement investigation or proceedings;
- (k) Disclosure would compromise constitutional rights;
- (l) Disclosure would result in DNFSB appearing to favor one litigant over another;
- (m) Disclosure relates to documents that were produced by another agency;
- (n) A substantial Government interest is implicated;
- (o) The demand or request is within the authority of the party making it; and
- (p) The demand or request is sufficiently specific to be answered.

10 CFR Ch. XVII (1-1-16 Edition)

§ 1707.203 Filing requirements for demands or requests for documents or testimony.

You must comply with the following requirements whenever you issue demands or requests to a DNFSB employee for official records, information, or testimony.

- (a) Your request must be in writing and must be submitted to the General Counsel. If you serve a subpoena on DNFSB or a DNFSB employee before submitting a written request and receiving a final determination, DNFSB will oppose the subpoena on grounds that your request was not submitted in accordance with this subpart.
- (b) Your written request must contain the following information:
 - (1) The caption of the legal proceeding, docket number, and name and address of the court or other authority involved;
 - (2) A copy of the complaint or equivalent document setting forth the assertions in the case and any other pleading or document necessary to show relevance of the testimony, records, or information you seek from the DNFSB;
 - (3) A list of categories of records sought, a detailed description of how the information sought is relevant to the issues in the legal proceeding, and a specific description of the substance of the testimony or records sought;
 - (4) A statement as to how the need for the information outweighs the need to maintain any confidentiality of the information and outweighs the burden on DNFSB to produce the records or provide testimony;
 - (5) A statement indicating that the information sought is not available from another source, from other persons or entities, or from the testimony of someone other than a DNFSB employee, such as a retained expert;
 - (6) If testimony is requested, the intended use of the testimony, a general summary of the desired testimony, and a showing that no document could be provided and used in lieu of testimony;
 - (7) A description of all prior decisions, orders, or pending motions in the case that bear upon the relevance of the requested records or testimony;
 - (8) The name, address, and telephone number of counsel to each party in the case; and

Defense Nuclear Fac. Safety Board

§ 1707.207

(9) An estimate of the amount of time that the requester and other parties will require with each DNFSB employee for time spent by the employee to prepare for testimony, in travel, and for attendance in the legal proceeding.

(c) The Defense Nuclear Facilities Safety Board reserves the right to require additional information to complete your request where appropriate.

(d) Your request should be submitted at least 45 days before the date that records or testimony is required. Requests submitted in less than 45 days before records or testimony is required must be accompanied by a written explanation stating the reasons for the late request and the reasons for expedited processing.

(e) Failure to cooperate in good faith to enable the General Counsel to make an informed decision may serve as the basis for a determination not to comply with your request.

§ 1707.204 Service of subpoenas or requests.

Subpoenas or requests for official records or information or testimony must be served on the General Counsel, Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW., Suite 700, Washington, DC 20004-2901.

§ 1707.205 Processing demands or requests.

(a) After service of a demand or request to testify, the General Counsel will review the demand or request and, in accordance with the provisions of this subpart, determine whether, or under what conditions, to authorize the employee to testify on matters relating to official information and/or produce official records and information.

(b) The Defense Nuclear Facilities Safety Board will process requests in the order in which they are received. Absent exigent or unusual circumstances, DNFSB will respond within 45 days from the date that we receive it. The time for response will depend upon the scope of the request.

(c) The General Counsel may grant a waiver of any procedure described by this subpart where a waiver is considered necessary to promote a significant

interest of the DNFSB or the United States or for other good cause.

§ 1707.206 Final determination.

The General Counsel makes the final determination on demands and requests to employees for production of official records and information or testimony. All final determinations are within the sole discretion of the General Counsel. The General Counsel will notify the requester and the court or other authority of the final determination, the reasons for the grant or denial of the demand or request, and any conditions that the General Counsel may impose on the release of records or information, or on the testimony of a DNFSB employee.

§ 1707.207 Restrictions that apply to testimony.

(a) The General Counsel may impose conditions or restrictions on the testimony of DNFSB employees including, for example, limiting the areas of testimony or requiring the requester and other parties to the legal proceeding to agree that the transcript of the testimony will be kept under seal or will only be used or made available in the particular legal proceeding for which testimony was requested. The General Counsel may also require a copy of the transcript of testimony at the requester's expense.

(b) The DNFSB may offer the employee's written declaration in lieu of testimony.

(c) If authorized to testify pursuant to this part, an employee may testify as to facts within his or her personal knowledge, but, unless specifically authorized to do so by the General Counsel, the employee shall not:

(1) Disclose classified, privileged, or otherwise protected information;

(2) Testify as an expert or opinion witness with regard to any matter arising out of the employee's official duties or the functions of DNFSB unless testimony is being given on behalf of the United States (see also 5 CFR 2635.805 for current employees).

§ 1707.208

§ 1707.208 Restrictions that apply to released records.

(a) The General Counsel may impose conditions or restrictions on the release of official records and information, including the requirement that parties to the proceeding obtain a protective order or execute a confidentiality agreement to limit access and any further disclosure. The terms of the protective order or of a confidentiality agreement must be acceptable to the General Counsel. In cases where protective orders or confidentiality agreements have already been executed, DNFSB may condition the release of official records and information on an amendment to the existing protective order or confidentiality agreement.

(b) If the General Counsel so determines, original DNFSB records may be presented for examination in response to a demand or request, but they are not to be presented as evidence or otherwise used in a manner by which they could lose their identity as official DNFSB records, nor are they to be marked or altered. In lieu of the original records, certified copies will be presented for evidentiary purposes (see 28 U.S.C. 1733).

§ 1707.209 Procedure when a decision is not made prior to the time a response is required.

If a response to a demand or request is required before the General Counsel can make the determination referred to in § 1707.201, the General Counsel, when necessary, will provide the court or other competent authority with a copy of this part, inform the court or other competent authority that the demand or request is being reviewed, and seek a stay of the demand or request pending a final determination.

§ 1707.210 Procedure in the event of an adverse ruling.

If the court or other competent authority fails to stay the demand, the employee upon whom the demand is made, unless otherwise advised by the General Counsel, will appear at the stated time and place, produce a copy of this part, state that the employee has been advised by counsel not to provide the requested testimony or

10 CFR Ch. XVII (1–1–16 Edition)

produce documents, and respectfully decline to comply with the demand, citing *United States ex rel. Touhy v. Ragen*, 340 U.S. 462 (1951). A written response may be offered to a request, or to a demand, if permitted by the court or other competent authority.

Subpart C—Schedule of Fees

§ 1707.301 Fees.

(a) Generally. The General Counsel may condition the production of records or appearance for testimony upon advance payment of a reasonable estimate of the costs to DNFSB.

(b) Fees for records. Fees for producing records will include fees for searching, reviewing, and duplicating records, costs of attorney time spent in reviewing the demand or request, and expenses generated by materials and equipment used to search for, produce, and copy the responsive information. Costs for employee time will be calculated on the basis of the hourly pay of the employee (including all pay, allowance, and benefits). Fees for duplication will be the same as those charged by DNFSB in its Freedom of Information Act fee regulations at 10 CFR part 1703.

(c) Witness fees. Fees for attendance by a witness will include fees, expenses, and allowances prescribed by the court's rules. If no such fees are prescribed, witness fees will be determined based upon the rule of the Federal district court closest to the location where the witness will appear. Such fees will include cost of time spent by the witness to prepare for testimony, in travel, and for attendance in the legal proceeding.

(d) Payment of fees. You must pay witness fees for current DNFSB employees and any records certification fees by submitting to the General Counsel a check or money order for the appropriate amount made payable to the Treasury of the United States. In the case of testimony by former DNFSB employees, you must pay applicable fees directly to the former employee in accordance with 28 U.S.C. 1821 or other applicable statutes.

(e) Certification (authentication) of copies of records. The Defense Nuclear Facilities Safety Board may certify

Defense Nuclear Fac. Safety Board

§ 1708.101

that records are true copies in order to facilitate their use as evidence. If you seek certification, you must request certified copies from DNFSB at least 45 days before the date they will be needed. The request should be sent to the General Counsel. You will be charged a certification fee of \$15.00 for each document certified.

(f) Waiver or reduction of fees. The General Counsel, in his or her sole discretion, may, upon a showing of reasonable cause, waive or reduce any fees in connection with the testimony, production, or certification of records.

(g) De minimis fees. Fees will not be assessed if the total charge would be \$10.00 or less.

Subpart D—Penalties

§ 1707.401 Penalties.

(a) An employee who discloses official records or information or gives testimony relating to official information, except as expressly authorized by DNFSB or as ordered by a Federal court after DNFSB has had the opportunity to be heard, may face the penalties provided in 18 U.S.C. 641 and other applicable laws. Additionally, former DNFSB employees are subject to the restrictions and penalties of 18 U.S.C. 207 and 216.

(b) A current DNFSB employee who testifies or produces official records and information in violation of this part shall be subject to disciplinary action.

PART 1708—PROCEDURES FOR SAFETY INVESTIGATIONS

Sec.

1708.100 Authority to conduct safety investigations.

1708.101 Scope and purpose of safety investigations.

1708.102 Types of safety investigations.

1708.103 Request to conduct safety investigations.

1708.104 Confidentiality of safety investigations and privileged safety information.

1708.105 Promise of confidentiality.

1708.106 Limitation on participation.

1708.107 Powers of persons conducting formal safety investigations.

SOURCE: 79 FR 71010, Dec. 1, 2014, unless otherwise noted.

§ 1708.100 Authority to conduct safety investigations.

(a) The Defense Nuclear Facilities Safety Board (Board) is an independent federal agency in the executive branch of the United States Government.

(b) The Board's enabling legislation authorizes it to conduct safety investigations pursuant to the Atomic Energy Act of 1954, as amended (42 U.S.C. 2286a(b)(2)).

§ 1708.101 Scope and purpose of safety investigations.

(a) The Board shall investigate any event or practice at a Department of Energy defense nuclear facility which the Board determines has adversely affected, or may adversely affect, public health and safety.

(b) The purpose of any Board investigation shall be:

(1) To determine whether the Secretary of Energy is adequately implementing standards (including all applicable Department of Energy orders, regulations, and requirements) at Department of Energy defense nuclear facilities;

(2) To ascertain information concerning the circumstances of such event or practice and its implications for such standards;

(3) To determine whether such event or practice is related to other events or practices at other Department of Energy defense nuclear facilities; and

(4) To provide to the Secretary of Energy such recommendations for changes in such standards or the implementation of such standards (including

§ 1708.102

Department of Energy orders, regulations, and requirements) and such recommendations relating to data or research needs as may be prudent or necessary.

§ 1708.102 Types of safety investigations.

(a) The Board may initiate a preliminary safety inquiry or order a formal safety investigation.

(b) A preliminary safety inquiry means any inquiry conducted by the Board or its staff, other than a formal investigation. Where it appears from a preliminary safety inquiry that a formal safety investigation is appropriate, the Board's staff will so recommend to the Board.

(c) A formal safety investigation is instituted by an Order of Safety Investigation issued either after a recorded notational vote of Board Members or after convening a meeting in accordance with the Government in the Sunshine Act and voting in open or closed session, as the case may be.

(d) Orders of Safety Investigations will outline the basis for the investigation, the matters to be investigated, the Investigating Officer(s) designated to conduct the investigation, and their authority.

(e) The Office of the General Counsel shall have primary responsibility for conducting and leading a formal safety investigation. The Investigating Officer(s) shall report to the Board.

(f) Following a notational vote and in accordance with the Government in the Sunshine Act, the Board or an individual Board Member authorized by the Board may hold such closed or open hearings and sit and act at such times and places, and require the attendance and testimony of such witnesses and the production of such evidence as the Board or an authorized member may find advisable, or exercise any other applicable authority as provided in the Board's enabling legislation. Each Board Member shall have full access to all information relating to the matter under investigation, including attendance at closed hearings.

(g) Subpoenas in formal safety investigation hearings may be issued by the Chairman only after a notational vote of the Board. The Chairman may des-

10 CFR Ch. XVII (1-1-16 Edition)

ignate another Board Member to issue a subpoena. Subpoenas shall be served by any person designated by the Chairman, or otherwise as provided by law.

(h) A determination of a decision or action authorized to the Board by these procedures shall only be made after a notational vote of the Board with each Board Member having one vote.

§ 1708.103 Request to conduct safety investigations.

(a) Any person may request that the Board perform a preliminary safety inquiry or conduct a formal safety investigation concerning a matter within the Board's jurisdiction.

(b) Actions the Board may take regarding safety investigation requests are discretionary.

(c) The Board will offer to protect the identity of a person requesting a safety investigation to the maximum extent permitted by law.

(d) Board safety investigations are wholly administrative and investigatory in nature and do not involve a determination of criminal culpability, adjudication of rights and duties, or other quasi-judicial determinations.

§ 1708.104 Confidentiality of safety investigations and privileged safety information.

(a) Information obtained during the course of a preliminary safety inquiry or a formal safety investigation may be treated as confidential, safety privileged, and non-public by the Board and its staff, to the extent permissible under existing law. The information subject to this protection includes but is not limited to: Identity of witnesses; recordings; statements; testimony; transcripts; emails; all documents, whether or not obtained pursuant to Board subpoena; any conclusions based on privileged safety information; any deliberations or recommendations as to policies to be pursued; and all other related investigative proceedings and activities.

(b) The Board shall have the discretion to assert the safety privilege when safety information, determined by the Board as protected from release, is

sought by any private or public governmental entity or by parties to litigation who attempt to compel its release.

(c) Nothing in this section voids or otherwise displaces the Board's legal obligations with respect to the Freedom of Information Act, the Government in the Sunshine Act, or any procedures or requirements contained in the Board's regulations issued pursuant to those Acts.

§ 1708.105 Promise of confidentiality.

(a) The Investigating Officer(s) may give a promise of confidentiality to any individual who provides evidence for a safety inquiry or investigation to encourage frank communication.

(b) A promise of confidentiality must be explicit.

(c) A promise of confidentiality must be documented in writing.

(d) A promise of confidentiality may be given only as needed to ensure forthright cooperation of a witness and may not be given on a blanket basis to all witnesses.

(e) A promise of confidentiality must inform the witness that it applies only to information given to the Investigating Officer(s) and not to the same information if given to others.

§ 1708.106 Limitation on participation.

(a) A safety investigation under this rule is not a judicial or adjudicatory proceeding.

(b) No person or entity has standing to intervene or participate as a matter of right in any safety investigation under this regulation.

§ 1708.107 Powers of persons conducting formal safety investigations.

The Investigating Officer(s) appointed by the Board may take informal or formal statements, interview witnesses, take testimony, request production of documents, recommend issuance of subpoenas, recommend taking of testimony in a closed forum, recommend administration of oaths, and otherwise perform any lawful act authorized under the Board's enabling legislation in connection with any safety investigation ordered by the Board.

§ 1708.108 Cooperation: Ready access to facilities, personnel, and information.

(a) Section 2286c(a) of the Atomic Energy Act of 1954, as amended, requires the Department of Energy to fully cooperate with the Board and provide the Board with ready access to such facilities, personnel, and information as the Board considers necessary, including ready access in connection with a safety investigation.

(b) Each contractor operating a Department of Energy defense nuclear facility under a contract awarded by the Secretary is also required, to the extent provided in such contract or otherwise with the contractor's consent, to fully cooperate with the Board and provide the Board with ready access to such facilities, personnel, and information of the contractor as the Board considers necessary in connection with a safety investigation.

(c) The Board may make a written request to persons or entities relevant to the safety investigation to preserve pertinent information, documents, and evidence, including electronically stored information, in order to preclude alteration or destruction of that information.

§ 1708.109 Rights of witnesses in safety investigations.

(a) Any person who is compelled to appear in person to provide testimony or produce documents in connection with a safety investigation is entitled to be accompanied, represented, and advised by an attorney. Subpoenas in safety investigations shall issue only under signature of the Chairman or any Member of the Board designated by the Chairman. Attendance and testimony shall be before the Board or a Member authorized by the Board.

(b) If an executive branch agency employee witness is represented by counsel from that same agency, counsel shall identify who counsel represents to determine whether counsel represents multiple interests in the safety investigation.

(c) Counsel for a witness may advise the witness with respect to any question asked where it is claimed that the testimony sought from the witness is

§ 1708.110

outside the scope of the safety investigation, or that the witness is privileged to refuse to answer a question or to produce other evidence. For these permissible objections, the witness or counsel may object on the record to the question and may state briefly and precisely the grounds therefore. If the witness refuses to answer a question, then counsel may briefly state on the record that counsel has advised the witness not to answer the question and the legal grounds for such refusal. The witness and his or her counsel shall not otherwise object to or refuse to answer any question, and they shall not otherwise interrupt any oral examination.

(d) When it is claimed that the witness has a privilege to refuse to answer a question on the grounds of self-incrimination, the witness must assert the privilege personally.

(e) Any objections made during the course of examination will be treated as continuing objections and preserved throughout the further course of testimony without the necessity for repeating them as to any similar line of inquiry.

(f) Counsel for a witness may not interrupt the examination by making any unnecessary objections or statements on the record.

(g) Following completion of the examination of a witness, such witness may make a statement on the record, and that person's counsel may, on the record, question the witness to enable the witness to clarify any of the witness's answers or to offer other evidence.

(h) The Board or any Member authorized by the Board shall take all measures necessary to regulate the course of an investigative proceeding to avoid delay and prevent or restrain obstructionist or contumacious conduct or contemptuous language.

(i) If the Board or any Member authorized by the Board finds that counsel for a witness, or other representative, has refused to comply with his or her directions, or has engaged in obstructionism or contumacy, the Board or Member authorized by the Board may thereupon take action as the circumstances may warrant.

(j) Witnesses appearing voluntarily do not have a right to have counsel

10 CFR Ch. XVII (1-1-16 Edition)

present during questioning, although the Board or Member authorized by the Board, in consultation with the Office of the General Counsel, may permit a witness appearing on a voluntary basis to be accompanied by an attorney or non-attorney representative.

§ 1708.110 Multiple interests.

(a) If counsel representing a witness appears in connection with a safety investigation, counsel shall state on the record all other persons or entities counsel represents in that investigation.

(b) When counsel does represent more than one person or entity in a safety investigation, counsel shall inform the Investigating Officer(s) and each client of counsel's possible conflict of interest in representing that client.

(c) When an Investigating Officer(s), or the Board, as the case may be, in consultation with the Board's General Counsel, has concrete evidence that the presence of an attorney representing multiple interests would obstruct or impede the safety investigation, the Investigating Officer(s) or the Board may prohibit that attorney from being present during testimony.

(d) The Board shall issue a written statement of the reasons supporting a decision to exclude counsel under this section within five working days following exclusion. The Board shall also delay the safety investigation for a reasonable period of time to permit retention of new counsel.

§ 1708.111 Sequestration of witnesses.

(a) Witnesses shall be sequestered during interviews, or during the taking of testimony, unless otherwise permitted by the Investigating Officer(s) or by the Board, as the case may be.

(b) No witness, or counsel accompanying any such witness, shall be permitted to be present during the examination of any other witness called in such proceeding, unless permitted by the Investigating Officer(s) or the Board, as the case may be.

§ 1708.112 Appearance and practice before the Board.

(a) Counsel appearing before the Board or the Investigating Officer(s)

Defense Nuclear Fac. Safety Board

§ 1708.116

must conform to the standards of ethical conduct required of practitioners before the Courts of the United States.

(b) The Board may suspend or deny, temporarily or permanently, the privilege of appearing or practicing before the Board in any way to a person who is found:

(1) Not to possess the requisite qualifications to represent others; or

(2) To have engaged in unethical or improper professional conduct; or

(3) To have engaged in obstructionism or contumacy before the Board; or

(4) To be otherwise not qualified.

(c) Obstructionist or contumacious conduct in an investigation before the Board or the Investigating Officer(s) will be grounds for exclusion of any person from such safety investigation proceedings and for summary suspension for the duration of the investigation.

(d) At the time of the finding the Board shall issue a verbal or written statement of the reasons supporting a decision to suspend or exclude counsel for obstructionism or contumacy.

(e) A witness may have a reasonable amount of time to retain replacement counsel if original counsel is suspended or excluded.

§ 1708.113 Right to submit statements.

At any time during the course of an investigation, any person may submit documents, statements of facts, or memoranda of law for the purpose of explanation or further development of the facts and circumstances relevant to the safety matter under investigation.

§ 1708.114 Official transcripts.

(a) Official transcripts of witness testimony, whether or not compelled by subpoena to appear before a Board safety investigation, shall be recorded either by an official reporter or by any other person or means designated by the Investigating Officer(s) or the Board's General Counsel.

(b) Such witness, after completing the compelled testimony, may file a request with the Board's General Counsel to procure a copy of the official transcript of that witness's testimony. The General Counsel shall rule on the request, and may deny for good cause.

(c) Good cause for denying a witness's request to procure a transcript may include, but shall not be limited to, the protection of a trade secret, non-disclosure of confidential or proprietary business information, security-sensitive operational or vulnerability information, safety privileged information, or the integrity of Board investigations.

(d) Whether or not a request is made, the witness and his or her attorney shall have the right to inspect the official transcript of the witness's own testimony, in the presence of the Investigating Officer(s) or his designee, for purposes of conducting errata review.

(e) Transcripts of testimony are otherwise considered confidential and privileged safety information, and in no case shall a copy or any reproduction of such transcript be released to any other person or entity, except as provided in paragraph (b) above or as required under the Freedom of Information Act or the Government in the Sunshine Act, or any procedures or requirements contained in Board regulations issued pursuant to those Acts.

§ 1708.115 Final report of safety investigation.

(a) The Board will complete a final report of the safety investigation fully setting forth the Board's findings and conclusions.

(b) The final report of the safety investigation is confidential and protected by the safety privilege, and is therefore not releasable.

(c) The Board, in its discretion, may sanitize the final report of the safety investigation by redacting confidential and safety privileged information so that the report is put in a publically releasable format.

(d) Nothing in this section voids or otherwise displaces the Board's legal obligations with respect to compliance with the Freedom of Information Act, the Government in the Sunshine Act, or any procedures or requirements contained in the Board's regulations issued pursuant to those Acts.

§ 1708.116 Procedure after safety investigations.

(a) If a formal safety investigation results in a finding that an event or

§ 1708.116

practice has adversely affected, or may adversely affect, public health and safety, the Board may take any appropriate action authorized to it under its enabling statute, including, but not limited to, making a formal recommendation to the Secretary of Energy, convening a hearing, or establishing a reporting requirement.

(b) If a safety investigation yields information relating to violations of federal criminal law involving government officers and employees, the Board shall expeditiously refer the matter to

10 CFR Ch. XVII (1–1–16 Edition)

the Department of Justice for disposition.

(c) If in the course of a safety investigation, a safety issue or concern is found to be outside the Board's jurisdiction, that safety issue or concern shall be referred to the appropriate entity with jurisdiction for disposition.

(d) Statements made in connection with testimony provided to the Board in an investigation are subject to the provisions of 18 U.S.C. 1001.

CHAPTER XVIII—NORTHEAST INTERSTATE LOW-LEVEL RADIOACTIVE WASTE COMMISSION

<i>Part</i>		<i>Page</i>
1800	Declaration of Party State Eligibility for Northeast Interstate Low-Level Radioactive Waste Compact	1081
1801–1899	[Reserved]	

**PART 1800—DECLARATION OF
PARTY STATE ELIGIBILITY FOR
NORTHEAST INTERSTATE LOW-
LEVEL RADIOACTIVE WASTE
COMPACT**

Sec.

1800.10 Purpose and scope.

1800.11 Definitions.

1800.12 Procedures for declaring a state eligible for membership in the Compact.

1800.13 Conditions for becoming an eligible party state.

1800.14 Modification to and enforcement of the rules in this part.

AUTHORITY: Sec. 227, Art. IV(i)(7), Art. VII(e), Pub. L. 99-240, 99 Stat. 1842, 1914, 1921-1922.

SOURCE: 65 FR 30835, May 15, 2000, unless otherwise noted.

§ 1800.10 Purpose and scope.

Pursuant to Articles IV.i.(1), (7), (15), and VII.e. of the Northeast Interstate Low-Level Radioactive Waste Compact (enacted by the “Omnibus Low-Level Radioactive Waste Compact Consent Act of 1985,” Public Law 99-240, 99 Stat. 1842, Title I) (the “Compact”), the Northeast Interstate Low-Level Radioactive Waste Commission (the “Commission”) establishes through this part the conditions that it deems necessary and appropriate to be met by a state requesting eligibility to become a party state to this Compact. The Commission shall apply these conditions to evaluate the petition of any state seeking to be eligible to become a party state pursuant to Article VII of the Compact.

§ 1800.11 Definitions.

The definitions contained in Article II of the Compact and Article I.B. of the Commission’s By Laws shall apply throughout this part. For the purposes of this part, additional terms are defined as follows:

(a) *By Laws* refers to the Commission’s By Laws as adopted and amended by the Commission pursuant to Article IV.c. and Article IV.i.(7) of the Compact, most recently amended on December 10, 1998, and dated July 1999;

(b) *Person* means an individual, corporation, business enterprise or other legal entity, either public or private, and expressly includes states;

(c) *Nuclear power station* means any facility holding a license from the U.S. Nuclear Regulatory Commission under 10 CFR Part 50.

(d) *Existing party states* means Connecticut and New Jersey collectively.

§ 1800.12 Procedures for declaring a state eligible for membership in the Compact.

(a) Any state seeking to become an eligible state under the Compact shall submit to the Chairman of the Commission six copies of a petition to become an eligible state. The petition shall discuss each of the conditions specified in §1800.13 and shall:

(1) Affirm that the petitioning state fully satisfies each condition; or

(2) Explain why the petitioning state does not or cannot fully satisfy any particular condition.

(b) Upon receipt of a petition from any state seeking to become an eligible state under the Compact, the Commission shall publish a notice in accordance with Article I.F.1. of the By Laws and shall initiate an adjudicatory proceeding to act on the petition. Any person may submit written comments on a petition, and all such comments must be received by the Commission within 30 days of notice that a petition has been submitted.

(c) The Commission shall evaluate the petition against the conditions for declaration of an eligible state specified in §1800.13. As part of the proceeding to evaluate a petition to become an eligible state, the Commission may, in its discretion, conduct a hearing pursuant to Article IV.i.(6) of the Compact and Article V.F.1. of the Commission’s By-Laws. For good cause shown, the Commission may issue an order shortening the notice period for hearings provided in Article I.F.1. of the By Laws to a period of not less than ten days.

(d) After review of the petition and after any hearing, if held, the Commission shall issue an order accepting or rejecting the petition or accepting the petition with conditions. If the Commission accepts the petition without conditions, the petitioning state shall be declared an eligible state and shall become a new party state upon passage of the Compact by its state legislature,

§ 1800.13

repeal of all statutes or statutory provisions that pose unreasonable impediments to the capability of the state to satisfy the conditions for eligibility (as determined by the Commission) and payment of (or arrangement to pay) the fee specified in Article IV.j.(1). If the Commission accepts the petition with conditions, the petitioning state may become an eligible state by satisfying all of the conditions in the Commission's order and providing an amended petition incorporating its compliance with all of the conditions in this subpart and in the Commission's order. The Commission will consider the amended petition as part of the original adjudicatory proceeding and will issue a new order accepting or rejecting the amended petition.

(e) A state that submits a petition for declaration as an eligible state that is rejected by the Commission may submit a new petition at any time. The Commission will consider the new petition without reference to the prior petition but may use evidence obtained in any prior proceeding to evaluate the new petition.

(f) The Commission's consideration of a petition for declaration of an eligible state shall be governed by the Compact, the Commission's By Laws, and this part.

§ 1800.13 Conditions for becoming an eligible party state.

The Commission shall evaluate a petition to become an eligible party state on the basis of the following conditions and criteria:

(a) To be eligible for Compact membership, a state must agree that it will be the voluntary host state upon admission to the Compact and will continue to be the voluntary host state for a least that period of time until all currently licensed nuclear power stations within the region have been fully decommissioned and their licenses (including any licenses for storage of spent nuclear fuel under 10 CFR Part 72) have been terminated.

(b) To be eligible for Compact membership, a state must agree that, so long as the petitioning state remains within the Compact, it will be the sole host state.

10 CFR Ch. XVIII (1-1-16 Edition)

(c) To be eligible for Compact membership, a state must warrant the availability of a regional disposal facility that will accommodate 800,000 cubic feet of waste from generators located within the borders of the existing party states.

(d) To be eligible for Compact membership, a state must agree to establish a uniform fee schedule for waste disposal at the regional disposal facility that shall apply to all generators within the region. That uniform fee schedule, including all surcharges (except new surcharges imposed pursuant to Article V.f.3. of the Compact), shall not exceed the average fees that generators within the existing party states paid for disposal at the Barnwell, South Carolina, facility at the end of calendar year 1999, adjusted annually based on an acceptable inflation index.

(e) To be eligible for Compact membership, a state must agree with the existing states that regional generators shall be permitted to process or dispose of waste at sites outside the Compact boundaries based solely on the judgment and discretion of each regional generator.

(f) To be eligible for Compact membership, a state must agree with the existing states that the Commission may authorize importation of waste from non-regional generators for the purpose of disposal only if the host state approves and such importation does not jeopardize the warranted availability of 800,000 cubic feet of disposal capacity for waste produced by generators within the existing party states. A new party state must agree that regional generators shall not pay higher fees than non-regional generators and that all books and records related to the establishment or collection of fees shall be available for Commission review.

(g) To be eligible for Compact membership, in addition to the express limitations on non-host state and Commission liability provided in the Compact, a state must agree to indemnify the Commission or the existing party states for any damages incurred solely because of the new state's membership in the Compact and for any damages associated with any injury to persons or property during the institutional

Northeast Interstate Low-Level Radioactive Waste Commission

§ 1800.14

control period as a result of the radioactive waste and waste management operations of any regional facility. The petitioning state must agree that this indemnification obligation will survive the termination of the petitioning state's membership in the Compact.

(h) To be eligible for Compact membership, a state must agree that any incentive payments made by the existing party states as an inducement for a state to join the Compact will be returned to the existing party states, with interest, on a pro rata basis if, for any reason, the regional disposal facility ceases to be available to generators in the existing party states for a period of more than six months (other than periods that have been expressly approved and authorized by the Commission) or is unavailable for disposal of 800,000 cubic feet of waste from generators within the borders of the existing states. In the event of such unavailability, the new party state must agree to return the incentive payments based on the following schedule:

(1) 75% of the incentive payment if the regional facility becomes unavailable prior to January 1, 2002;

(2) 50% of the incentive payment if the regional facility becomes unavailable on or after January 1, 2002, and prior to January 1, 2004;

(3) 30% of the incentive payment if the regional facility becomes unavailable on or after January 1, 2004, and prior to January 1, 2006;

(4) 20% of the incentive payment if the regional facility becomes unavailable on or after January 1, 2006, and prior to January 1, 2009;

(5) 10% of the incentive payment if the regional facility becomes unavail-

able on or after January 1, 2009, and prior to the time when all currently licensed nuclear power stations within the region have been fully decommissioned and their licenses (including any licenses for storage of spent nuclear fuel under 10 CFR Part 72) have been terminated.

(i) To be eligible for Compact membership, a state must agree with the existing states that once a new party state has been admitted to membership in the Compact pursuant to the rules in this part, declaration of any other state as an eligible party state will require the unanimous consent of all members of the Commission.

§ 1800.14 Modification to and enforcement of the rules in this part.

(a) Because of the importance of the conditions for declaration of an eligible state under the Compact, the rules in this part may only be modified, amended, or rescinded after a public hearing held pursuant to Article IV.i.(6) of the Compact and Article V.F.1. of the Commission's By Laws and by a unanimous vote of all members of the Commission.

(b) Any party state may enforce the rules in this part by bringing an action against or on behalf of the Commission in the United States District Court for the District of Columbia pursuant to Article IV.n. of the Compact.

(c) If, for any reason, any portion of the rules in this part shall be declared invalid or unenforceable, the remainder of the rules in this part shall remain in full force and effect.

Alphabetical List of Agencies Appearing in the CFR

(Revised as of January 1, 2016)

Agency	CFR Title, Subtitle or Chapter
Administrative Committee of the Federal Register	1, I
Administrative Conference of the United States	1, III
Advisory Council on Historic Preservation	36, VIII
Advocacy and Outreach, Office of	7, XXV
Afghanistan Reconstruction, Special Inspector General for	5, LXXXIII
African Development Foundation	22, XV
Federal Acquisition Regulation	48, 57
Agency for International Development	2, VII; 22, II
Federal Acquisition Regulation	48, 7
Agricultural Marketing Service	7, I, IX, X, XI
Agricultural Research Service	7, V
Agriculture Department	2, IV; 5, LXXXIII
Advocacy and Outreach, Office of	7, XXV
Agricultural Marketing Service	7, I, IX, X, XI
Agricultural Research Service	7, V
Animal and Plant Health Inspection Service	7, III; 9, I
Chief Financial Officer, Office of	7, XXX
Commodity Credit Corporation	7, XIV
Economic Research Service	7, XXXVII
Energy Policy and New Uses, Office of	2, IX; 7, XXIX
Environmental Quality, Office of	7, XXXI
Farm Service Agency	7, VII, XVIII
Federal Acquisition Regulation	48, 4
Federal Crop Insurance Corporation	7, IV
Food and Nutrition Service	7, II
Food Safety and Inspection Service	9, III
Foreign Agricultural Service	7, XV
Forest Service	36, II
Grain Inspection, Packers and Stockyards Administration	7, VIII; 9, II
Information Resources Management, Office of	7, XXVII
Inspector General, Office of	7, XXVI
National Agricultural Library	7, XLI
National Agricultural Statistics Service	7, XXXVI
National Institute of Food and Agriculture	7, XXXIV
Natural Resources Conservation Service	7, VI
Operations, Office of	7, XXVIII
Procurement and Property Management, Office of	7, XXXII
Rural Business-Cooperative Service	7, XVIII, XLII
Rural Development Administration	7, XLII
Rural Housing Service	7, XVIII, XXXV
Rural Telephone Bank	7, XVI
Rural Utilities Service	7, XVII, XVIII, XLII
Secretary of Agriculture, Office of	7, Subtitle A
Transportation, Office of	7, XXXIII
World Agricultural Outlook Board	7, XXXVIII
Air Force Department	32, VII
Federal Acquisition Regulation Supplement	48, 53
Air Transportation Stabilization Board	14, VI
Alcohol and Tobacco Tax and Trade Bureau	27, I
Alcohol, Tobacco, Firearms, and Explosives, Bureau of	27, II
AMTRAK	49, VII
American Battle Monuments Commission	36, IV
American Indians, Office of the Special Trustee	25, VII

Agency	CFR Title, Subtitle or Chapter
Animal and Plant Health Inspection Service	7, III; 9, I
Appalachian Regional Commission	5, IX
Architectural and Transportation Barriers Compliance Board	36, XI
Arctic Research Commission	45, XXIII
Armed Forces Retirement Home	5, XI
Army Department	32, V
Engineers, Corps of	33, II; 36, III
Federal Acquisition Regulation	48, 51
Bilingual Education and Minority Languages Affairs, Office of	34, V
Blind or Severely Disabled, Committee for Purchase from People Who Are	41, 51
Broadcasting Board of Governors	22, V
Federal Acquisition Regulation	48, 19
Career, Technical and Adult Education, Office of	34, IV
Census Bureau	15, I

List of CFR Sections Affected

All changes in this volume of the Code of Federal Regulations (CFR) that were made by documents published in the FEDERAL REGISTER since January 1, 2011 are enumerated in the following list. Entries indicate the nature of the changes effected. Page numbers refer to FEDERAL REGISTER pages. The user should consult the entries for chapters, parts and subparts as well as sections for revisions.

For changes to this volume of the CFR prior to this listing, consult the annual edition of the monthly List of CFR Sections Affected (LSA). The LSA is available at *www.fdsys.gov*. For changes to this volume of the CFR prior to 2001, see the “List of CFR Sections Affected, 1949–1963, 1964–1972, 1973–1985, and 1986–2000” published in 11 separate volumes. The “List of CFR Sections Affected 1986–2000” is available at *www.fdsys.gov*.
